NO.949596125126127128129130131132135136138139147 This Contract made this 23rd day of September 2005 between
PRODUCTION SHARING CONTRACT1. The President of India acting through the Joint Secretary Ministry of Petroleum and Natural Gas hereinafter referred to as the Government of
the FIRST PART; Gujarat State Petroleum Company a Company incorporated under the Companies Act 1956 hereinafter referred to as GSPC having its registered office at GSPC Bhavan behind Udyog Bhavan Sector11 Gandhinagar 382011 Gujarat India which expression shall include its successors and such assigns as are permitted under Article 28 hereof of the SECOND PART;AND Gail India Limited a Company incorporated under the Companies Act 1956 hereinafter referred to as GAIL having its registered office at 16 Bhikaji Cama Place New Delhi 110065 which expression shall include its successors and such assigns as are permitted under Article 28 hereof of the THIRD PART;AND Jubilant Capital Pvt. Limited a Company incorporated under the Companies Act 1956 hereinafter referred to as JCPL having its registered office at 2 Western Avenue Maharani Bagh New Delhi 110065 which expression shall include its successors and such assigns as are permitted under Article 28 hereof of the FOURTH PART;AND GeoGlobal Resources Barbados Inc. a Company incorporated under the laws of Barbados West Indies hereinafter referred to as GGR having its registered office at Chancery House High Street Bridgetown Barbados West Indies which expression shall include its successors and such assigns as are permitted under Article 28 hereof of the FIFTH PART;AND1 WITNESSETH
WHEREAS1 The Oilfields Regulation and Development Act 1948 53 of 1948 hereinafter referred to as the Act and the Petroleum and Natural Gas Rules 1959 made thereunder hereinafter referred to as the Rules make provisions inter alia for the regulation of Petroleum Operations and grant of Licenses and Leases for exploration development and production of Petroleum in India;2 The rules provide for the grant of Licenses and Leases in respect of land vested in a State Government by that State Government with the

prior approval of the Central Government;³ Rule 5 of the Rules provides for an agreement between the Government and the Licensee or Lessee containing additional terms and conditions with respect to the License or Lease;⁴ The Government desires that the Petroleum resources which may exist in India be discovered and exploited with the utmost expedition in the overall interest of India and in accordance with modern oilfield and petroleum industry practices;⁵ Companies have committed that they have or will acquire and make available the necessary financial and technical resources and the technical and industrial competence and experience necessary for proper discharge and performance of all obligations required to be performed under this Contract in accordance with modern oilfield and petroleum industry practices and will provide guarantees as required in Article 29 for the due performance of its obligations hereunder; and⁶ As a result of discussions between representatives of the Government and GSPCGAILJCPLGGR on the proposal of GSPCGAILJCPLGGR the Government has agreed to enter into this Contract with GSPCGAILJCPLGGR with respect to the Contract Area identified as block CBONN20032 and detailed in Appendix A and Appendix B on the terms and conditions herein set forth. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follows²

ARTICLE 1 DEFINITIONS In this Contract unless the context requires otherwise the following terms shall have the meaning ascribed to them hereunder

1.1 Accounting Procedure means the principles and procedures of accounting set out in Appendix C.

1.2 Act means Oilfields Regulation and Development Act 1948 as amended from time to time.

1.3 Affiliate means a company or a body;^a ^b which directly or indirectly controls or is controlled by a Company which is a Party to this Contract; or which directly or indirectly controls or is controlled by a company which directly or indirectly controls or is controlled by a Company which is a Party to this Contract. For the purpose of this definition it is understood that control means ownership by one company of more than fifty percent⁵⁰ of the voting securities of the other company; or the power to direct administer and dictate policies of the other company even where the voting securities held by such company exercising such effective control in that other company is less than fifty percent⁵⁰ and

the term controlled shall have a corresponding meaning.1.4 Appendix means an Appendix attached to this Contract and made a part thereof.1.5 Appraisal Programme means a programme carried out following a Discovery in the Contract Area for the purpose of appraising Discovery and delineating the Petroleum Reservoirs to which the Discovery relates in terms of thickness and lateral extent and determining the characteristics thereof and the quantity of recoverable Petroleum therein.1.6 Appraisal Well means a Well drilled pursuant to an Appraisal Programme.1.7 Approved Work Programme and Approved Budget means a Work Programme or a Budget that has been approved by the Management Committee pursuant to the provisions of this Contract.3 1.8 Arms Length Sales means sales made freely in the open market in freely convertible currencies between willing and unrelated sellers and buyers and in which such buyers and sellers have no contractual or other relationship directly or indirectly or any common or joint interest as is reasonably likely to influence selling prices and shall inter alia exclude sales whether direct or indirect through brokers or otherwise involving Affiliates sales between Companies which are Parties to this Contract sales between governments and government owned entities countertrades restricted or distress sales sales involving barter arrangements and generally any transactions motivated in whole or in part by considerations other than normal commercial practices.1.9 Article means an article of this Contract and the term Articles means more than one Article.1.10 Associated Natural Gas or ANG means Natural Gas produced in association with Crude Oil either as free gas or in solution if such Crude Oil can by itself be commercially produced.1.11 Barrel means a quantity or unit equal to 158.9074 litres forty two 42 United States gallons liquid measure at a temperature of sixty 60 degrees Fahrenheit 15.56 degrees Celsius and under one atmosphere pressure 14.70 psia.1.12 Basement means any igneous or metamorphic rock or rocks or any stratum of such nature in and below which the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of Petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected in accordance with the knowledge generally accepted in the international petroleum industry.1.13 Budget means a

budget formulated in relation to a Work Programme.1.14 Business Day means any of the Calendar Day excluding holidays.1.15 Calendar Day means any of the seven 7 days of a week.1.16 Calendar Month means any of the twelve 12 months of the Calendar Year.1.17 Calendar Quarter or Quarter means a period of three 3 consecutive Calendar Months commencing on the first day of January April July and October of each Calendar Year.1.18 Calendar Year means a period of twelve 12 consecutive Months according to the Gregorian calendar commencing with the first 1st day of January and ending with the thirtyfirst 31st day of December.4 1.19 Commercial Discovery means a Discovery of Petroleum reserves which has been declared as a Commercial Discovery in accordance with the provisions of Article 10 and/or Article 21.1.20 Commercial Production means production of Crude Oil or Condensate or Natural Gas or any combination of these from the Contract Area excluding production for testing purposes and delivery of the same at the relevant Delivery Point under a programme of regular production and sale.1.21 Company for the purpose of this Contract means a company which is a Party to this Contract and where more than one Company is Party to the Contract the term Companies shall mean all such Companies collectively including their respective successors and permitted assigns under Article 28.1.22 Condensate means those low vapour pressure hydrocarbons obtained from Natural Gas through condensation or extraction and refers solely to those hydrocarbons that are liquid at normal surface temperature and pressure conditions provided that in the event Condensate is produced from a Development Area and is segregated and transported separately to the Delivery Point then the provisions of this Contract shall apply to such Condensate as if it were Crude Oil.1.23 Contract means this agreement and the Appendices mentioned herein and attached hereto and made an integral part hereof and any amendments made thereto pursuant to the terms hereof.1.24 Contract Area means on the Effective Date the area described in Appendix A and delineated on the map attached as Appendix B or any portion of the said area remaining after relinquishment or surrender from time to time pursuant to the terms of this Contract including any additional area as provided under Article 11.3.1.25 Contract Costs means Exploration Costs Development Costs and Production Costs as provided in

Section 2 of the Accounting Procedure and allowed to be cost recoverable in terms of Section 3 of the Accounting Procedure.

1.26 Contract Year means a period of twelve 12 consecutive months counted from the Effective Date or from the anniversary of the Effective Date.

1.27 Contractor means the Companies.

1.28 Cost Petroleum means the portion of the total value of Petroleum Produced and Saved from the Contract Area which the Contractor is entitled to take in a particular period for the recovery of Contract Costs as provided in Article 15.

1.29 Crude Oil or Oil or Crude means all kinds of hydrocarbons and bitumen both in solid and in liquid form in their natural state or obtained from Natural Gas by condensation or extraction including distillate and Condensate when commingled with the heavier hydrocarbons and delivered as a blend at the Delivery Point but excluding Natural Gas.

1.30 Deepwater Area for deepwater blocks areas means area falling beyond four hundred 400 metre isobath provided however that for the purposes of this Contract the Contract Area as on Effective Date as described in the Appendix A and Appendix B shall be deemed to be Deepwater Area falling beyond four hundred 400 metre isobath.

1.31 Delivery Point means except as otherwise herein provided or as may be otherwise agreed between the Parties having regard to international practice the point at which Petroleum reaches the outlet flange of the delivery facility either offshore or onshore and different Delivery Points may be established for purposes of sales. Delivery Points shall be approved by the Management Committee.

1.32 Development Area means part of the Contract Area which encompasses one or more Commercial Discoveries and any additional area that may be required for proper development of such Commercial Discoveries and established as such in accordance with the provisions of the Contract.

1.33 Development Costs means those costs and expenditures incurred in carrying out Development Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof.

1.34 Development Operations means operations conducted in accordance with the Development Plan and shall include but not be limited to the purchase shipment or storage of equipment and materials used in developing Petroleum accumulations the drilling completion and testing of Development Wells the drilling and completion of Wells for Gas or water injection the laying

of gathering lines the installation of offshore platforms and installations the installation of separators tankages pumps artificial lift and other producing and injection facilities required to produce process and transport Petroleum into main Oil storage or Gas processing facilities either onshore or offshore including the laying of pipelines within or outside the Contract Area storage at Delivery Points the installation of said storage or Gas processing facilities the installation of export and loading facilities and other facilities required for the development and production of the said Petroleum accumulations and for the delivery of Crude Oil and/or Gas at the Delivery Point and also including incidental operations not specifically referred to herein but required for the most efficient and economic development and production of the said Petroleum accumulations in accordance with modern oilfield and petroleum industry practices.

1.35 Development Plan means a plan submitted by the Contractor for the development of a Commercial Discovery which has been approved by the Management Committee or the Government pursuant to Article 10 or Article 21.6

1.36 Development Well means a Well drilled deepened or completed after the date of approval of the Development Plan pursuant to Development Operations or Production Operations for the purposes of producing Petroleum increasing production sustaining production or accelerating extraction of Petroleum including production Wells injection Wells and dry Wells.

1.37 Directorate General of Hydrocarbons or DGH means an organisation including its successors under the Ministry of Petroleum and Natural Gas.

1.38 Discovery means the finding during Petroleum Operations of a deposit of Petroleum not previously known to have existed which can be recovered at the surface in a flow measurable by conventional petroleum industry testing methods.

1.39 Discovery Area means that part of the Contract Area about which based upon Discovery and the results obtained from a Well or Wells drilled in such part the Contractor is of the opinion that Petroleum exists and is likely to be produced in commercial quantities.

1.40 Effective Date means the later of the date on which this Contract is executed by the Parties or the date of issue of License or date from which License has been made effective by the Central Government or State Governments as the case may be.

1.41 Environmental Damage means soil erosion removal of vegetation destruction of wildlife pollution of

groundwater or surface water landcontamination air pollution noise pollution bush fire disruption to water supplies to natural drainage or natural flow of rivers or streamsdamage to archaeological palaeontological and cultural sites and shall include any damage or injury to or destruction of soil or water in theirphysical aspects together with vegetation associated therewith aquatic or terrestrial mammals fish avifauna or any plant or animal life whetherin the sea or in any other water or on in or under land.

1.42 Exploration Costs means those costs and expenditures incurred in carrying out Exploration Operations as classified and defined in Section 2 ofthe Accounting Procedure and allowed to be recovered in terms of Section 3 thereof.

1.43 Exploration Operations means operations conducted in the Contract Area pursuant to this Contract in searching for Petroleum and in the courseof an Appraisal Programme and shall include but not be limited to aerial geological geophysical geochemical palaeontological palynologicaltopographical and seismic surveys analysis studies and their interpretation investigations relating to the subsurface geology including structuraltest drilling stratigraphic test drilling drilling of Exploration Wells and Appraisal Wells and other related activities such as surveying drill sitepreparation and all work necessarily connected therewith that is conducted in connection with Petroleum exploration.

7 1.44 Exploration Period means the period mentioned in Article 3 during which Exploration Operations may be carried out by the Contractor asprovided in Article 3 hereof.

1.45 Exploration Phase or Phase means any of the periods specified in Article 3 in which the Contractor is required to complete the MinimumWork Programme specified therein.

1.46 Exploration Well means a Well drilled for the purpose of searching for undiscovered Petroleum accumulations on any geological entity be it ofstructural stratigraphic facies or pressure nature to at least a depth or stratigraphic level specified in the Work Programme.

1.47 Field means an Oil Field or a Gas Field or combination of both as the case may be.

1.48 Financial Year means the period from the first 1st day of April to the thirtyfirst 31st day of March of the following Calendar Year.

1.49 Foreign Company means a Company within the meaning of Section 591 of the Companies Act 1956.

1.50 Frontier Area means any area identified demarcated and so notified by the Government or its authorised agencyies for the purpose ofexploration and

exploitation of Oil and Gas which is logistically and technically difficult and lacks infrastructural and/or marketing facilities etc.

1.51 Gas means Natural Gas.

1.52 Gas Field means within the Contract Area a Natural Gas Reservoir or a group of Natural Gas Reservoirs within a common geological structure or feature.

1.53 Government or Central Government means Government of India unless otherwise stated.

1.54 Investment shall have the meaning ascribed to that expression in paragraph 3 of Appendix D.

1.55 Investment Multiple means the ratio of accumulated Net Cash Income to accumulated Investment by the Contractor as determined in accordance with Appendix D.

1.56 Lease means a petroleum mining lease referred to in the Rules and shall unless otherwise stated therein exclude right for exploration and exploitation of coal lignite bed methane CBM.

1.57 Lessee means the Contractor to whom a Lease is issued under the Rules for the purpose of carrying out Petroleum Operations in a Development Area or Contract Area.

1.58 LIBOR means the London InterBank Offer Rate for six month maturates of United States Dollars as quoted by the International Swaps and Derivative Association or such other bank being a BBA LIBOR contributor panel bank as the Parties may agree.

1.59 License means a petroleum exploration license referred to in the Rules.

1.60 Licensee means the Contractor to whom a License is issued under the Rules for the purpose of carrying out Petroleum Operations in the Contract Area.

1.61 Minimum Work Programme means with respect to each Exploration Phase the Work Programme specified in Article 5 with respect to such Phase.

1.62 Management Committee means the committee constituted pursuant to Article 6 hereof.

1.63 Month means Calendar Month.

1.64 Natural Gas means wet gas dry gas all other gaseous hydrocarbons and all substances contained therein including sulphur carbon dioxide and nitrogen but excluding extraction of helium which are produced from Oil or Gas Wells excluding those condensed or extracted liquid hydrocarbons that are liquid at normal temperature and pressure conditions and including the residue gas remaining after the condensation or extraction of liquid hydrocarbons from gas.

1.65 Net Cash Income shall have the meaning assigned in paragraph 2 of Appendix D.

1.66 Non Associated Natural Gas or NANG means Natural Gas which is produced either without association of Crude Oil or in association with such quantities of Crude Oil which by

itself cannot be commercially produced.1.67 Oil Field means within the Contract Area an Oil Reservoir or a group of Oil Reservoirs within a common geological structure or feature.1.68 Operator means one of the Parties comprising the Contractor appointed as the Operator pursuant to Article 7.1.69 Operating Agreement means the operating agreement entered by the constituents of the Contractor in accordance with Article 7 with respect to conduct of Petroleum Operations.1.70 Operating Committee means the Committee established by that name in the Operating Agreement pursuant to Article 7.9 1.71 Participating Interest means in respect of each Party constituting the Contractor the undivided share expressed as a percentage of such Partys participation in the rights and obligations under this Contract.1.72 Parties means the parties signatory to this Contract including their successors and permitted assigns under this Contract and the term Party means any of the Parties.1.73 Petroleum means Crude Oil and/or Natural Gas existing in their natural condition but excluding helium occurring in association with Petroleum or shale.1.74 Petroleum Operations means as the context may require Exploration Operations Development Operations or Production Operations or any combination of two or more of such operations including construction operation and maintenance of all necessary facilities plugging and abandonment of Wells safety environmental protection transportation storage sale or disposition of Petroleum to the Delivery Point Site Restoration and any or all other incidental operations or activities as may be necessary.1.75 Petroleum Produced and Saved means gross Petroleum produced minus impurities such as water or solids produced along with Petroleum Petroleum recycled to the reservoir Petroleum used in Petroleum Operations or flared or otherwise unavoidably lost under the provisions of the Contract.1.76 Production Costs means those costs and expenditures incurred in carrying out Production Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof.1.77 Production Operations means all operations conducted for the purpose of producing Petroleum from the Development Area after the commencement of production from the Development Area including the operation and maintenance of all necessary facilities therefor.1.78 Profit Petroleum means the total value of

Petroleum Produced and Saved from the Contract Area in a particular period as reduced by CostPetroleum and calculated as provided in Article 16.1.79 Recompletion means an operation whereby a completion in one zone is abandoned in order to attempt a completion in a different zone within an existing Well bore.1.80 Reservoir means a naturally occurring discrete accumulation of Petroleum.1.81 Rules means the Petroleum and Natural Gas Rules 1959 and any amendments made thereto from time to time.1.82 Section means a section of the Accounting Procedure.10 1.83 Selfsufficiency means in relation to any Year that the volume of Crude Oil and Crude Oil equivalent of Petroleum products exported from India during that Year either equals or exceeds the volume of Crude Oil and Crude Oil equivalent of Petroleum products imported into India during the same Year as determined by Government.1.84 Site Restoration shall mean all activities required to return a site to its state as of the Effective Date pursuant to the Contractors environmental impact study and approved by the Government or to render a site compatible with its intended after use to the extent reasonable after cessation of Petroleum Operations in relation thereto and shall include where appropriate proper abandonment of Wells or other facilities removal of equipment structures and debris establishment of compatible contours and drainage replacement of top soil revegetation slope stabilisation infilling of excavations or any other appropriate actions in the circumstances.1.85 Statement or Statements refers to the statements required to be furnished in accordance with Appendix C of this Contract.1.86 State Government means any government of a state of the Union of India which has control over the Contract Area for the purpose of grant of Licenses Leases. In case the Contract Area covers more than one state the State Government shall include all such governments of those states.1.87 Subcontractor means any company or person contracted by the Contractor or Operator to provide goods or services with respect to Petroleum Operations.1.88 US or USD or US Dollar or United States Dollar means the currency of the United States of America.1.89 Well means a borehole made by drilling in the course of Petroleum Operations but does not include a seismic shot hole.1.90 Work Programme means a work programme formulated for the purpose of carrying out Petroleum Operations.1.91 Year means a Financial Year.11 2.1 The initial Participating

Interest of the Parties comprising the Contractor shall be as follows

ARTICLE 2 PARTICIPATING INTERESTS

Party	Interest
SGSPC	50 Fifty Percent
GAIL	20 Twenty Percent
JCPL	20 Twenty Percent
GGR	10 Ten Percent

2.2 Except as provided in this Article or elsewhere in this Contract the rights and obligations of the Parties comprising the Contractor shall include but not be limited to

- a the right to take Cost Petroleum in accordance with the provisions of Article 15;
- b the right to take its Participating Interest share of Profit Petroleum in accordance with the provisions of Article 16;
- c the right to receive its Participating Interest share of any incidental income and receipts arising from Petroleum Operations;
- and d the obligation to contribute its Participating Interest share of costs and expenses including Contract Costs.

12 ARTICLE 3 LICENSE AND EXPLORATION PERIOD

3.1 The Exploration Period shall begin on the Effective Date and shall consist of three (3) Exploration Phases each phase not exceeding three (3) Contract Years for a total period not exceeding seven (7) consecutive Contract Years unless extended pursuant to the terms of this Contract.

3.2 Except as otherwise provided in this Contract the term of the first Exploration Phase shall not exceed three (3) consecutive Contract Years hereinafter referred to as the first Exploration Phase.

3.3 Except as otherwise provided in this Contract the term of the second Exploration Phase shall not exceed three (3) consecutive Contract Years from the end of the first Exploration Phase hereinafter referred to as the second Exploration Phase.

3.4 Except as otherwise provided in this Contract the term of the third Exploration Phase shall not exceed one (1) consecutive Contract Years from the end of the second Exploration Phase hereinafter referred to as the third Exploration Phase.

3.5 At the expiry of any Exploration Phase of the Exploration Period provided that the Contractor has completed the Minimum Work Programme for that Exploration Phase the Contractor shall have the option exercisable by giving a written notice to the Government at least thirty (30) days prior to the expiry of the relevant Phase either

- a to proceed to the next Exploration Phase on presentation of the requisite guarantees as provided for in Article 29;
- or b to relinquish the entire Contract Area except for any Discovery Area and any Development Area and to conduct Development Operations and Production Operations in relation to any Commercial Discovery in accordance with the terms of this Contract and the Contractor shall have

no further obligation in respect of the Minimum Work Programme under Article 5 for any subsequent Exploration Phases of the Exploration Period. If neither of the options provided for in paragraphs a and b hereof is exercised by the Contractor this Contract shall terminate at the end of the then current Exploration Phase and the License shall be automatically cancelled.

3.6 If at the end of an Exploration Phase the Minimum Work Programme for that phase is not completed the time for completion of the said Minimum Work Programme shall be extended for a period necessary to enable completion thereof but not exceeding six 6 months provided that the Contractor submits his request by giving a written notice to the Government at least thirty 30 days prior to the expiry of the relevant Phase and can show technical or other good reasons for noncompletion of the Minimum Work Programme and the Management Committee gives its consent to the said extension and provided further that the period of such extension shall be subtracted from the next succeeding Exploration Phase if any. In case the Minimum Work Programme of any particular Exploration Phase is completed before stipulated time as provided in the Article 3.2 and 3.3 the time so saved will be added to the next Exploration Phase if so requested by the Contractor giving a notice in writing to the Government thirty 30 days prior to such early completion of the Phase and in that event the provision of the Article 3.5 a shall apply immediately after such early completion of the Phase.

3.7 If at the end of an Exploration Phase execution of any Work Programme is in progress and which is in addition to the Minimum Work Programme such Exploration Phase shall be extended for a period not exceeding six 6 months to enable completion thereof provided that the Minimum Work Programme for such Phase has been completed and the Management Committee gives its consent to the said extension as provided in the Article 3.6. In the event of an extension as provided for herein the notice referred to in Article 3.5 shall be given at least thirty 30 days prior to the expiry of the relevant extension.

3.8 Where sufficient time is not available prior to the expiry of the Exploration Period to complete an Appraisal Programme at the request of the Contractor the Government shall extend the Exploration Period for such period not exceeding eighteen 18 months for onland and shallow water blocks and thirty 30 months for deepwater blocks as may be mutually

agreed between the Parties for the Appraisal Programme to be carried out and for the Contractor and the Management Committee to comply with the provisions of Article 10 and Article 21.3.9 If no Commercial Discovery has been made in the Contract Area by the end of the Exploration Period the Contract shall terminate.3.10 If this Contract is terminated in accordance with its terms the License shall be automatically cancelled.3.11 If at the expiry of the Exploration Period a development plan for development of a Commercial Discovery and an application for Lease is under consideration by the Management Committee or Government as the case may be pursuant to Articles 10 11 and 21 respectively the License shall continue in force with respect to that part of the Contract Area to which the application for the Lease relates pending a decision on the proposed development plan and the application for the Lease but shall cease to be in force and effect with respect to the remainder of the Contract Area.14 ARTICLE 4 RELINQUISHMENT4.1 If at the end of the first Exploration Phase the Contractor elects pursuant to Article 3.5 to continue Exploration Operations in the Contract Area in the second Exploration Phase the Contractor shall retain up to seventy five percent 75 of the original Contract Area including any Development Area and Discovery Area in not more than three 3 areas of simple geometrical shapes and relinquish the balance of the Contract Area prior to the commencement of the second Exploration Phase. Notwithstanding the provision of this Article 4.1 in the event the Development Areas and Discovery Areas exceed seventy five percent 75 of the original Contract Area the Contractor shall be entitled to retain to the extent of Development Areas and Discovery Areas.4.2 If at the end of the second Exploration Phase the Contractor elects pursuant to Article 3.5 to continue Exploration Operations in the Contract Area in the third Exploration Phase the Contractor shall retain up to fifty percent 50 of the original Contract Area including any Development Area and Discovery Area in not more than three 3 areas of simple geometrical shapes and relinquish the balance of the Contract Area prior to the commencement of the third Exploration Phase. Notwithstanding the provision of this Article 4.2 in the event the Development Areas and Discovery Areas exceed fifty percent 50 of the original Contract Area the Contractor shall be entitled to retain to the extent of Development Areas and Discovery Areas.4.3 At

the end of the third Exploration Phase the Contractor shall retain only Development Areas and Discovery Areas.

4.4 If the Contractor exercises the option provided for in paragraph b of Article 3.5 the Contractor shall after any Discovery Areas or Development Areas have been designated relinquish all of the Contract Area not included within the said Discovery Areas or Development Areas.

4.5 As and when the Contract is terminated under the provisions of Article 3 or in accordance with any other provisions of this Contract the entire Contract Area remaining with the Contractor shall be deemed to have been relinquished by the Contractor as on the date on which the Contract is terminated.

4.6 Relinquishment of all or part of the Contract Area or termination of the Contract shall not be construed as absolving the Contractor of any liability undertaken or incurred by the Contractor in respect of the Contract Area during the period between the Effective Date and the date of such relinquishment or termination.

4.7 Subject to Article 14.9 the liability of the Contractor shall be limited to any liability undertaken or incurred in respect of relating to or connected with the Contract and/or any claim arising out of or in relation to the act of negligence misconduct commission or omission in carrying out Petroleum Operations during the period between the Effective Date and the date of relinquishment of the Contract Area or termination or expiry of the Contract as the case may be.

15 ARTICLE 5 WORK PROGRAMME

5.1 The Contractor shall commence Petroleum Operations not later than six 6 months from the Effective Date.

5.2 During the currency of the first Exploration Phase as per Article 3.2 the Contractor shall complete the following Work Programme:

- i A seismic programme consisting of the acquisition processing and interpretation of 448 sq. kms. of 3D seismic data in relation to the exploration objectives; and
- ii iv Reprocessing of 650 LKM of 2 D seismic; Geochemical survey of 500 samples; and Technical Assessment and Geological Modeling

b Fourteen 14 Exploration Wells shall be drilled to at least one of the following depths:

- iiiii Six 6 wells 1500 m. each
- Three 3 wells 2000 m. each
- Five 5 wells 2500 m. each

to Basement; and that point below which further drilling becomes impracticable due to geological conditions encountered and drilling would be abandoned by a reasonable prudent operator in the same or similar circumstances. Abandonment of drilling under this provision by the Contractor would

require unanimous approval of the Management Committee.5.3 During the currency of the second Exploration Phase as per Article 3.3 the Contractor shall complete the following Work Programmeab Technical Assessment and Geological Modeling Four 4 Exploration Wells shall be drilled to at least one of the following depthsiiiiii Two 2 wells 2500 m. each Two 2 wells 3500 m. eachto Basement; andthat point below which further drilling becomes impracticable due to geological conditions encountered and drillingwould be abandoned by a reasonable prudent operator in the same or similar circumstances. Abandonment of drillingunder this provision by the Contractor would require unanimous approval of the Management Committee.16 5.4 During the currency of the third Exploration Phase as per Article 3.4 the Contractor shall complete the following Work Programmeab Technical Six 6 Exploration Wells shall be drilled to at least one of the following depths Assessment and Geological Modelingiiiiiii Three 3 wells 2500 m. each Three 3 wells 3500 m. eachto Basement; andthat point below which further drilling becomes impracticable due to geological conditions encountered and drillingwould be abandoned by a reasonable prudent operator in the same or similar circumstances. Abandonment ofdrilling under this provision by the Contractor would require unanimous approval of the Management Committee.5.5 The actual depth objective for each of the Wells shall be determined by the Contractor in the light of the advice of the Management Committeebefore the commencement of the drilling. Each Well which reaches the geological objective for which the depth objective was determined shallbe deemed to have been drilled to the depth objective or to actual total depth whichever is greater. The Contractor shall ensure that all relevantsubsurface geological geochemical and geophysical information necessary for the attainment of the exploration objectives in accordance withmodern oilfield and petroleum industry practices is obtained during exploratory drilling.5.6 If the depthgeological objective of the Well is not achieved for any reason a substitute Well shall be drilled of the same specifications asstipulated in and subject to Articles 5.2 5.3 and 5.4 as the case may be.5.7 In the event that the Contractor is unable to complete the Minimum Work Programme as provided herein under Articles 5.2 a 5.2 b i 5.3a 5.3 b i and 5.4 a 5.4 b i hereinafter referred to as Bid Commitments or it becomes unnecessary

to complete BidCommitments in view of Articles 5.2 b ii and iii 5.3 b ii and iii and 5.4 b ii and iii as the case may be the Contractor shall berequired to carry out and complete such additional substituted or alternate work programme as may be fixed by the Government on therecommendation of the Management Committee so as to match the Bid Commitments undertaken and committed under the bid or in thealternative the Contractor shall pay to the Government the cost as estimated by the Government on the recommendation of the ManagementCommittee for fulfilling such Bid Commitments of the Contractor. The Management Committee shall give its recommendation on additionalsubstituted or alternate work programme or payment to the Government for unfinished work programme to the Government¹⁷ within sixty 60 days from the date of notice given by the Government of nonfulfillment of the Minimum Work Programme. Failing anyproposal from the Management Committee within the time frame the Government shall make a decision and convey to the Contractor forcompliance.

5.8 If the Minimum Work Programme for the third Exploration Phase has been completed earlier than eighteen months from the end of the Phase theContractor shall meet with the Government to discuss the possibility of early relinquishment unless the Contractor undertakes further work withthe approval of the Management Committee.

5.9 In the event that the Contractor has carried out work in excess of the Minimum Work Programme in any Exploration Phase the excessexploration work done shall be set off against the Minimum Work Programme for the following Exploration Phase.

5.10 As soon as possible after the Effective Date and thereafter within ninety 90 days before commencement of each following Year the Contractorshall submit to the Management Committee the Work Programmes and the Budgets relating to Petroleum Operations to be carried out during therelevant Year. Work Programme and Budgets for the Exploration Period shall include work sufficient to meet the relevant Minimum WorkProgramme with respect to each Exploration Phase specified in this Article 5.

5.11 The Contractor may propose modifications or revisions to the details of a reviewed or an approved Work Programme and Budget as the casemay be in the light of the then existing circumstances and shall submit to the Management Committee modifications or revisions to the WorkProgramme and Budget referred to in

Article 5.10.5.12 Work Programmes and Budgets and any modifications or revisions thereto relating to Exploration Operations shall be submitted to the Management Committee for review and advice as provided in Article 6.5. Work Programmes and Budgets related to Development Operations and Production Operations and any modifications or revisions thereto shall be submitted for approval as provided in Article 10 and Article 21.18

ARTICLE 6 MANAGEMENT COMMITTEE

6.1 There shall be constituted a committee to be called the Management Committee with functions as stated herein below.

6.2 Government shall nominate two 2 members representing Government in the Management Committee whereas each Company constituting the Contractor shall nominate one 1 member each to represent Company in the Management Committee provided that in case the Contractor constitutes only one Company that Company shall have two 2 members. The Parties shall nominate the members to the Management Committee within thirty 30 days of the Effective Date.

6.3 Each Party may nominate alternate members with full authority to act in the absence and on behalf of the members nominated under Article 6.2 and may at any time nominate another member or alternate member to replace any member nominated earlier by notice to other members of the Management Committee.

6.4 One representative of the Government shall be designated as the Chairman of the Management Committee and the second representative of the Government shall be designated as the Deputy Chairman. The member of the Operator or the member designated by the Operator where Operator has two 2 members in the Management Committee shall be designated as the Secretary of the Committee.

6.5 Operator on behalf of the Contractor with the approval of Operating Committee if constituted under the Article 7.4 or in case of a single Party constituting the Contractor then that Party shall submit following matters to the Management Committee for review and it shall have advisory functions:

- a the annual Work Programmes and Budgets in respect of Exploration Operations and any revisions or modifications thereto;
- b annual work progress and costs incurred thereon;
- c proposals for surrender or relinquishment of any part of the Contract Area by the Contractor;
- d proposals for an Appraisal Programme or revisions or additions thereto and the declaration of a Discovery as a Commercial Discovery;
- e any other matter required by the terms of

this Contract to be submitted to it for review or advice; andf any other matter which the Contractor dees to submit for review or advice including matters concerning interParty relationships.19 6.6 The following matters shall be submitted by Operator on behalf of the Contractor with the approval of Operating Committee if constituted underthe Article 7.4 or in case of single Party constituting the Contractor then by that Party to the Management Committee for approvala Annual Work Programmes and Budgets in respect of Development Operations and Production Operations and any modifications or revisionsthereto;b proposals for the approval of development plans as may be required under this Contract or modifications or revisions to a DevelopmentPlan;c determination of a Development Area;d appointment of auditors along with scope of audit approval and adoption of audited report submitted under Article 25.4.3;e collaboration with licensees or contractors of other areas;f claims or settlement of claims for or on behalf of or against the Contractor in excess of limits fixed by the Management Committee fromtime to time;g proposal about abandonment planSite Restoration as required to be submitted under Article 14.10;h any other matter required by the terms of this Contract to be submitted for the approval of the Management Committee;i any other matter which the Contractor dees to submit to it; andj any matter which Government refers to the Management Committee for its consideration and reasoned opinion.6.7 Unless agreed otherwise by all the members of the Management Committee the Management Committee shall meet at least once every six6 months during the Exploration Period and thereafter at least once every three 3 months or more frequently at the request of any member.The Secretary with the approval of the Chairman shall convene each meeting by notifying the members twenty eight 28 days prior to such a meeting or a shorter period of notice if the members unanimously so agree of the time and place of such meeting and the purpose thereof andshall include in such notice a provisional agenda for such meeting. The Chairman shall be responsible for processing the final agenda for suchmeeting and the agenda shall include all items of business requested by the members to be included provided such requests are received by theSecretary at least ten 10 days prior to the date fixed for the meeting. The Secretary shall forward the agenda to the members at least seven7 Business Days

prior to the date fixed for the meeting. Matters not included in the agenda may be taken up at the meeting by any member with the unanimous consent of all the members whether present or not present at the meeting.

6.8 The Chairman or the Deputy Chairman as may be the case shall preside over the meetings of the Management Committee and in their absence any other member representing Government and present shall preside over the meetings.

6.9 Secretary to the Management Committee shall be responsible inter alia for preparation of the minutes of every meeting in the English language and provision to every member of the Management Committee with two copies of the minutes approved by the Chairman within three Business Days of the meeting. Unless agreed otherwise by all the members of the Management Committee the minutes of a meeting shall be finalised by the Management Committee within three Business Days thereafter. Members shall notify the Chairman and the other members of their approval of the minutes by putting their signatures on one copy of the minutes and returning the same to the Chairman. Members may suggest any modification to the minutes while returning the signed copy. Members may also communicate with the Chairman through telex cable or facsimile or any other effective mode of communication agreed by all the members of the Management Committee. If the Chairman or any other member does not agree with the modification to the minutes suggested by any member the matter shall be brought to the attention of the other members and resubmitted to the Management Committee at the next meeting and the minutes shall stand approved as to all other matters. If a member fails to respond within the aforesaid three Business Day period unless agreed otherwise by the Management Committee as herein provided the minutes shall be deemed to be approved by such member.

6.10 Any member shall be entitled if either he or his alternate is unable to attend a meeting to cast his vote by telex cable facsimile transmission or any other effective mode of communication agreed by all the members of the Management Committee and received by the Chairman prior to the date on which the vote is taken in the course of the meeting or by giving a prior written notice to all other members appoint a member with his prior consent representing another Party in the Management Committee as its proxy to attend a meeting and to exercise the

appointing members right to vote at the meeting whether as directed by the appointing member or otherwise. A member appointed as a proxy and attending a meeting shall be present in two separate capacities and vote accordingly. All such votes shall have the same effect as if that member had been present and so voted at the meeting.

6.11 In case of urgency where Operating Committee has made a recommendation together with reasons to the Chairman requiring consideration of a matter by the Management Committee without delay Chairman after being satisfied may waive the requirements of notice period for the meeting and circulation of agenda to such extent as would be consistent with the urgency and consideration of the matter by the Management Committee. Alternatively Chairman may approve submission of notice and agenda to members by telex or facsimile transmission or any other effective mode of communication agreed by all the members of the Management Committee receipt of which shall be confirmed by telephone by the Chairman requiring the members to confirm their decision by these modes of communication not later than three (3) Business Days from confirmation of receipt of notice and agenda by the member. Any member failing to convey the decision within the time limits of three (3) Business Days shall be deemed to have voted in favour of the proposal. The result of any such vote shall be notified by the Chairman to all the members.

6.12 The meetings of the Management Committee shall be held in India unless otherwise mutually agreed by the members of the Management Committee. All expenses of the members of the Management Committee attending meetings shall be borne by the respective Party and shall in no event be cost recoverable.

6.13 All matters requiring the approval of the Management Committee shall be generally approved by a unanimous vote of the members of the Management Committee present as well as the views of the members received by some other mode of communication. In case unanimity is not achieved in decision making process within a reasonable period as may be required under the circumstances the decision of the Management Committee shall be approved by the majority Participating Interest of seventy percent (70) or more with Government representative having a positive vote in favour of the decision.

6.14 There shall be a quorum of the Management Committee for holding a meeting and making decisions

with each Party to the Contract represented by at least one of its nominated members in the Management Committee either present in person or represented as per Article 6.10. If there is no quorum in a meeting the meeting shall stand postponed to the same day and time in the next week and if quorum is not present or represented even in the next meeting and subject to a Government member being present the members present and represented will constitute the quorum and take decisions and decisions taken by such quorum shall be final and binding to all the absenting Parties or Parties not represented notwithstanding the provisions of Article 6.13.6.15 The Management Committee if it considers necessary may appoint legal financial or technical subcommittees comprised of such representatives as may be agreed by the Management Committee to consider any matter requiring approval or decision of the Management Committee. Such subcommittee expenses shall form part of Contract Cost with relevant cost classification as decided by the Management Committee pursuant to the Section 2 of the Accounting Procedure and will be cost recoverable.6.16 In the event a Party to the Contract is not entitled to vote in the Operating Committee meetings being in default under the Operating Agreement and Operator notifies Chairman of the default by the Party then the issue of exercising voting right by such defaulting Party in the Management Committee meetings shall be discussed by the Management Committee. The Management Committee excluding the defaulting Party after duly hearing the views of the defaulting Party on the matter of their default under Operating Agreement shall take unanimous decision on exclusion or otherwise of the defaulting Party from voting in the Management Committee meetings. For avoidance of any doubt it is clearly understood that unanimous decision by the Management Committee referred to in this Article 6.16 excludes defaulting Party from such decision. Accordingly if the Management Committee decides to exclude the defaulting Party from voting in the Management Committee then the said Party shall not be entitled to vote in the meetings of the Management Committee under Contract. In that event notwithstanding the provisions of Article 6.13 decisions of the Management Committee shall be made by vote of the members of the Management Committee excluding the member appointed by the said Party in default and any vote or purported

vote by such member in the Management Committee shall be ignored. The said Party in default shall be bound by all decisions of the Management Committee. The nondefaulting Parties under the Operating Agreement shall indemnify Government against any claims of whatsoever nature which may arise due to exclusion of defaulting Party from voting in the Management Committee.²³

OPERATORSHIP OPERATING AGREEMENT AND OPERATING COMMITTEE ARTICLE 77.1

GSPC shall be the Operator for the purpose of carrying out Petroleum Operations pursuant to this Contract during the term of the Contract. 7.2 No change in the operatorship shall be effected without

the consent of the Government and such consent shall not be unreasonably withheld. 7.3 The

functions required of the Contractor under this Contract shall be performed by the Operator on

behalf of all constituents of the Contractor subject to and in accordance with the terms and

provisions of this Contract and generally accepted modern oilfield and petroleum industry practices

provided however that this provision shall not be construed as relieving the constituents of the

Contractor from any of its obligations or liability under the Contract. 7.4 Within forty five 45 days of the

Effective Date or such longer period as may be agreed to by Government the Companies

constituting the Contractor shall execute an Operating Agreement. The said agreement shall be

consistent with the provisions of this Contract and shall provide for among other things a the

appointment resignation removal and responsibilities of the Operator; b the establishment of an

Operating Committee comprising of an agreed number of representatives of the Companies chaired

by a representative of the Operator; c functions of the said Operating Committee taking into account

the provisions of the Contract procedures for decision making frequency and place of meetings;

and d contribution to costs default sole risk disposal of Petroleum and assignment as between the

Parties to the Operating Agreement. 7.4.1 Operator shall provide to the Government a copy of the

duly executed Operating Agreement within thirty 30 days of the Effective Date or such longer period

as may be agreed to by the Government. 7.4.2 In case a single Company constitutes the Contractor

the provisions of Article 7.4 and 7.4.1 shall not be applicable. However in case of increase in the

number of constituents of the Contractor the provisions of Article 7.4 and 7.4.1 shall apply from the

date of such increase in the number of the constituents.²⁴ 8.1 Subject to the provisions of this Contract the Contractor shall have the following rights:

ARTICLE 8 GENERAL RIGHTS AND OBLIGATIONS OF THE PARTIES

a) subject to the provisions of Article 12 the exclusive right to carry out Petroleum Operations to recover costs and expenses as provided in this Contract. The right shall exclude exploitation of coalbed methane CBM by the Contractor in the Contract Area;

b) the right to use free of charge such quantities of Petroleum produced as are reasonably required for conducting Petroleum Operations in the Contract Area in accordance with generally accepted modern oilfield and petroleum industry practices;

c) the right to lay pipelines build roads construct bridges ferries aerodromes landing fields radio telephones and related communication and infrastructure facilities and exercise other ancillary rights as may be reasonably necessary for the conduct of Petroleum Operations subject to such approvals as may be required and the applicable laws in force from time to time for the regulation and control thereof;

d) the right to use all available technical data seismic and well information maps samples etc. of the Contract Area as on the Effective Date free of charge subject to nominal copying reproduction costs for further Petroleum Operations. The Contractor shall submit the list of all data required by them to Directorate General of Hydrocarbons DGH based on the list of data provided in the information docket for the block pertaining to the Contract Area as soon as possible but not later than one hundred and eighty 180 days from the execution of the Contract and the same if available and reproducible shall be made available to the Contractor in the office of DGH within ninety 90 days from the submission of such request for data by the Contractor provided the Effective Date of the Contract has commenced and the Contractor has furnished relevant guarantees under Article 29 of the Contract.

e) such other rights as are specified in this Contract.

8.2 The Government reserves the right to itself or to grant to others the right to prospect for and mine minerals or substances other than Petroleum within the Contract Area; provided however that if after the Effective Date others are issued rights or the Government proceeds directly to prospect for and mine in the Contract Area any minerals or substances other than Petroleum the Contractor shall use its best efforts to avoid obstruction to or interference with

such operations within the Contract Area and the third parties and/or the Government²⁵ as the case may be shall use best efforts to ensure that operations carried out do not obstruct or unduly interfere with Petroleum Operations in the Contract Area.

8.3 The Contractor shall having due regard to modern oilfield and petroleum industry practices a except as otherwise expressly provided in this Contract conduct all Petroleum Operations at its sole risk cost and expense and provide all funds necessary for the conduct of Petroleum Operations including funds for the purchase or lease of equipment materials or supplies required for Petroleum Operations as well as for making payments to employees agents and Subcontractors; b conduct all Petroleum Operations within the Contract Area diligently expeditiously efficiently and in a safe and workmanlike manner pursuant to the Work Programme formulated in accordance with Contract; c ensure provision of all information data samples etc. which may be required to be furnished under the applicable laws or under this Contract; d ensure that all equipment materials supplies plant and installations used by the Contractor the Operator and Subcontractors comply with generally accepted standards and are of proper construction and kept in safe and good working order; e in the preparation and implementation of Work Programmes and in the conduct of Petroleum Operations follow modern oilfield and petroleum industry practices with such degree of diligence and prudence reasonably and ordinarily exercised by experienced parties engaged in a similar activity under similar circumstances and conditions; f the procedure for acquisition of goods and services as of the Effective Date shall be as per the Appendix F of this Contract. Based on economic considerations and generally accepted practices in the international petroleum industry with the objective of ensuring cost and operational efficiency in the conduct of Petroleum Operations the Appendix F to this Contract may be modified or changed with the prior approval of the Management Committee when circumstances so justify; g after the designation of a Development Area pursuant to this Contract forthwith proceed to take all necessary action for prompt and orderly development of the Development Area and for the production of Petroleum in accordance with the terms of this Contract; h appoint a technically competent and sufficiently experienced representative and in his absence a suitably qualified

replacement therefor who shall be resident in India and who shall have full authority to take such steps as may be necessary to implement this Contract and whose names shall on appointment within ninety 90 days after commencement of the first Contract Year be made known to the Government;

26 i provide acceptable working conditions living accommodation and access to medical attention and nursing care for all personnel employed in Petroleum Operations;

j carry out such other obligations as are specified in this Contract in particular those specified in Article 14;

and k be always mindful of the rights and interests of India in the conduct of Petroleum Operations.

27 ARTICLE 9 GOVERNMENT ASSISTANCE

9.1 Upon application in the prescribed manner and subject to compliance with applicable laws and relevant procedures the Government or its nominee will use their good offices to provide the right of ingress and egress from the Contract Area and any facilities used in Petroleum Operations wherever located and which may be within their control;

b use their good offices when necessary to assist the Contractor in procurement or commissioning of facilities required for execution of Work Programmes including necessary approvals permits consents authorisations visas work permits Licenses including Licenses and Leases rights of way easement surface rights and security protection at the Contractor's cost required pursuant to this Contract and which may be available from resources within its control; and

c in the event that onshore facilities are required outside the Contract Area for Petroleum Operations including but not limited to storage loading and processing facilities pipelines and offices use their good offices in assisting the Contractor to obtain from the authorities of the state in which such facilities are required such licenses permits authorizations consents security protection at the Contractor's cost surface rights and easements as are required for the construction and operation of the said facilities by the Contractor.

28 ARTICLE 10 DISCOVERY DEVELOPMENT AND PRODUCTION

10.1 If and when a Discovery is made within the Contract Area the Contractor shall forthwith inform the Management Committee and Government of the Discovery;

b promptly thereafter but in no event later than a period of thirty 30 days from the date of the Discovery furnish to the Management Committee and Government particulars in writing of the Discovery; and

c promptly run

tests to determine whether the Discovery is of potential commercial interest and within a period of sixty 60 days after completion of such tests submit a report to the Management Committee containing data obtained from such tests and its analysis and interpretation thereof together with a written notification of whether in the Contractor's opinion such Discovery is of potential commercial interest and merits appraisal.

10.2 If the Contractor determines to conduct a drill stem or production test in open hole or through perforated casing with regard to any Exploration Well it shall notify the Government of the time of such test at least forty eight 48 hours prior to the proposed test and the Government shall have the right to have a representative present during such test.

10.3 If pursuant to Article 10.1 c the Contractor notifies the Management Committee that the Discovery is of potential commercial interest the Contractor shall prepare and submit to the Management Committee within one hundred and twenty 120 days of such notification a proposed Appraisal Programme with a Work Programme and Budget to carry out an adequate and effective appraisal of such Discovery designed to achieve both the following objectives i determine without delay and in any event within the period specified in Article 10.5 whether such Discovery is a Commercial Discovery and ii determine with reasonable precision the boundaries of the area to be delineated as the Development Area.

10.4 The proposed Appraisal Programme shall be reviewed by the Management Committee within thirty 30 days after submission thereof pursuant to Article 10.3. The said Appraisal Programme together with the Work Programme and Budget submitted by the Contractor which may be revised or modified or amended by the Contractor in light of the Management Committee review shall be adopted as the Appraisal Programme and the Contractor shall promptly commence implementation thereof; and the annual Budget for the Exploration Period adopted pursuant to Article 5 shall be revised accordingly.

29 10.5 The Contractor shall in respect of a Discovery of Crude Oil advise the Management Committee by notice in writing within a period of eighteen 18 months for onland and shallow water blocks and thirty 30 months for deepwater blocks from the date on which the notice provided for in Article 10.1 c was delivered whether such Discovery should be declared a Commercial Discovery or not. Such notice shall be accompanied by a report on the Discovery setting

forth all relevant technical and economic data including estimated recoverable reserves sustainable production levels estimated development and production expenditures prevailing and forecasted prices and other pertinent technical and economic factors according to modern oilfield and petroleum industry practices as well as all evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or for the Contractor with respect to the Discovery and any other relevant information. If the Contractor is of the opinion that Crude Oil has been discovered in commercial quantities it shall submit the proposal to the Management Committee for review that the Discovery be declared a Commercial Discovery. In the case of a Discovery of Gas the provisions of Article 21 shall apply.

10.6 The Management Committee shall within forty 40 days of the date of the notice referred to in Article 10.5 review the proposal of the Contractor and request any other additional information it may reasonably require so as to complete the review of the proposal made by the Contractor. The Contractor shall furnish the additional information within thirty 30 days from the date of the request. The review by the Management Committee shall be made and conveyed to the Contractor within the later of a ninety 90 days from the date of notice referred to in Article 10.5 or b forty 40 days of receipt of such other information as may be required under this Article.

10.7 If the Contractor declares the Discovery a Commercial Discovery after taking into account the advice of the Management Committee as referred in the Article 10.6 within two hundred 200 days of the declaration of the Discovery as a Commercial Discovery the Contractor shall submit to the Management Committee a comprehensive development plan of the Commercial Discovery which shall relate to the Discovery Area and contain a Reservoir or part thereof and the boundaries of the proposed Development Area; b be designed to ensure the most efficient beneficial and timely use of the Petroleum resources discovered; and c be prepared in accordance with sound engineering economic safety and environmental principles recognised in the generally accepted modern oilfield and petroleum industry practices. Such plan shall contain detailed proposals by the Contractor for the construction establishment and operation of all facilities and services for and incidental to the recovery storage and transportation of the Petroleum from the proposed 30

Development Area to the Delivery Point together with all data and supporting information including but not limited to description of the nature and characteristic of the Reservoir data statistics interpretations and conclusions on all aspects of the geology Reservoir evaluation Petroleum engineering factors Reservoir models estimates of reserve in place possible production magnitude nature and ratio of Petroleum fluids and analysis of producible Petroleum; ii outlines of the development project and/or alternative development projects if any describing the production facilities to be installed and the number of Wells to be drilled under such development project and/or alternative development projects if any; iii estimate of the rate of production to be established and projection of the possible sustained rate of production in accordance with modern oilfield and petroleum industry practices under such development project and/or alternative development projects if any which will ensure that the area does not suffer an excessive rate of decline of production or an excessive loss of Reservoir pressure; iv estimates of Development Costs and Production Costs under such development project and/or alternative development projects if any; v Contractors recommendations as to the particular project that it would prefer; vi Work Programme and Budget for development proposals relating to the proposed Development Area; vii anticipated adverse impact on the environment and measures to be taken for prevention or minimisation thereof and for general protection of the environment in conduct of operations; viii measures to be taken for the health and safety of persons employed in Petroleum Operations; ix the information required in Article 21.10.8

A proposed development plan submitted by the Contractor pursuant to Article 10.7 may be approved by the Management Committee within one hundred and ten 110 days of submission thereof or eighty 80 days of receipt of any additional information requested by the Management Committee. In case the Management Committee requires any reasonable additional information the same shall be requested by it within eighty 80 days from the submission of the development plan. The Contractor shall provide such additional information within thirty 30 days from the request by the Management Committee. If within a period of one hundred and ten 110 days after submission of a proposed development plan or eighty 80 days from the receipt of any additional

information where asked by the Management Committee the Management Committee fails to convey a decision to the Contractor the Contractor shall have option to submit the proposal to the Government. Also where the Management Committee rejects the development plan of the Contractor the Contractor can submit the development³¹ plan for the approval of the Government. The Government shall respond on the proposed development plan submitted by the Contractor within one hundred and ten 110 days. In case Government refuses to approve the proposed development plan it shall convey the reasons for such refusal and the Contractor shall be given opportunity to make appropriate modifications to meet concerns of Government and the provisions of the foregoing Article and resubmit the plan within ninety 90 days from the date of receipt of refusal from the Government.

10.9 A Development Plan approved by the Management Committee or Government as may be the case from time to time shall commit the Contractor to the obligations stipulated in Articles 10.10 to 10.12.

10.10 Work Programmes and Budgets for Development and Production Operations shall be submitted to the Management Committee as soon as possible after the approval of a Development Plan under Article 10.8 and thereafter not later than 31st December each Year in respect of the Year immediately following.

10.11 The Management Committee when considering any Work Programme and Budget may require the Contractor to prepare an estimate of potential production to be achieved through the implementation of the said Work Programme and Budget for each of the three 3 Years following the Year to which the Work Programme and Budget relate. If major changes in yearly estimates of potential production are required these shall be based on evidence necessitating such changes.

10.12 Not later than the fifteenth 15th of January each Year in respect of the Year immediately following commencement of Commercial Production the Contractor shall determine the Programme Quantity with the approval of the Management Committee. The Programme Quantity for any Year shall be the maximum quantity of Petroleum based on Contractor's estimates as approved by the Management Committee which can be produced from a Development Area consistent with modern oilfield and petroleum industry practices and minimising unit production cost taking into account the capacity of the producing Wells gathering

lines separators storage capacity and other production facilities available for use during the relevant Year as well as the transportation facilities up to the Delivery Point.

10.13 Proposed revisions to the details of a Development Plan or an annual Work Programme or Budget in respect of Development and Production Operations shall for good cause and if the circumstances so justify be submitted for approval to the Management Committee.

10.14 In the event the area encompassing the Commercial Discovery extends beyond the Development Area designated in the Development Plan either within the original Contract Area but subsequently relinquished or outside the original Contract Area the Management Committee may make recommendations to the Government³² concerning enlargement of the Development Area provided the same was not awarded to any other company by the Government or is not held by any other party or not on offer by the Government and no application for a License or Lease is pending with the Government. However in case the area is held by any other party or on offer by the Government or application for License or Lease is pending with the Government the Management Committee shall notify the same to the Government for further action on the matter. Government may consider such request for extension at its sole discretion and on terms and conditions which it may consider fit.

33 PETROLEUM EXPLORATION LICENSE AND MINING LEASE

ARTICLE 11

11.1 The Contractor shall submit an application for grant of License in respect of the Contract Area as early as possible but not later than fifteen¹⁵ Business Days from the date of execution of this Contract.

11.2 On submission of a development plan of a Commercial Discovery pursuant to Article 10.7 the Contractor shall submit an application for a Lease in respect of the proposed Development Area to the relevant State Governments.

11.3 Where a part of a Reservoir in respect of which a Commercial Discovery has been declared extends beyond the Contract Area subject to Article 10.14 such area may be included in the proposed Development Area in relation to which application for a Lease is made on terms and conditions as deemed by the Central Government; provided that such area is a not subject to a license or lease granted to any other person; b not the subject of negotiations bidding or contract awarded for a license or lease; and c available for licensing i.e. is not an area over which Petroleum Operations are excluded.

11.4 Where

a Development Plan has been approved pursuant to Article 10 and the Contractor has complied with the terms and conditions of the License and this Contract and is not in breach of any of the terms thereof or the provisions of any law and subject to normal Government clearances approvals being obtained by the Contractor as applicable before grant issue of the Lease the Central Government will assist the Contractor in obtaining the Lease from the relevant State Governments over the Development Area as agreed subject to Article 11.5 to enable the Contractor to carry out Petroleum Operations in the Development Area in accordance with the Development Plan.

11.5 The Lease shall be granted for an initial period of twenty 20 years from the date of grant thereof subject to a cancellation in accordance with its terms or for termination of this Contract in accordance with its terms;

b extension by mutual agreement between the Parties for five 5 years or such period as may be agreed after taking into account the balance recoverable reserve and balance economic life of the Field Development Area from the expiry of the initial period provided that in the event of a Commercial production of Non Associated Natural Gas the extension may³⁴ be for a period of ten 10 years or such period as may be mutually agreed between the Parties after taking into account the balance recoverable reserves and balance economic life of the Field Development Area from the date of expiry of the initial term; and

c the terms of this Contract and other terms and conditions as set forth in such Lease be consistent with this Contract and the relevant legislation.

35 ARTICLE 12 UNIT DEVELOPMENT

12.1 If a Reservoir in a Discovery Area is situated partly within the Contract Area and partly in an area in India over which other parties have a contract to conduct petroleum operations and both parts of the Reservoir can be more efficiently developed together on a commercial basis on receiving information in writing from any party to these contracts or any information on this from any bonafide source the Government may for securing the more effective recovery of Petroleum from such Reservoir by notice in writing to the Contractor require that the Contractor

a collaborate and agree with such other parties on the joint development of the Reservoir

b submit such agreement between the Contractor and such other parties to the Government for approval within one hundred and eighty¹⁸⁰ days; and

c prepare a plan for such joint development of

the said Reservoir within one hundred and eighty 180 days of the approval of the agreement referred to in b above.

12.2 If no plan is submitted within the period specified in Article 12.1 c or such longer period as the Government and the Contractor and the other parties referred to in Article 12.1 may agree or if such plan as submitted is not acceptable to the Government and the Parties cannot agree on amendments to the proposed joint development plan the Government may cause to be prepared at the expense of the Contractor and such other parties a plan for such joint development consistent with generally accepted modern oilfield and petroleum industry practices which shall take into consideration any plans and presentations made by the Contractor and the aforementioned other parties.

12.3 If the parties are unable to agree on the proposed plan for joint development the Government may call for a joint development plan from an independent agency which agency may make such a proposal after taking into account the position of the parties in this regard. Such a development plan if approved by Government shall be binding on the parties notwithstanding their disagreement with the plan. However the Contractor may in case of any disagreement on the issue of joint development or the proposed joint development plan prepared in accordance with Article 12.2 or within forty five 45 Business Days of the plan approval as aforesaid in this Article notify the Government that it elects to surrender its rights in the Reservoir Discovery in lieu of participation in a joint development.

36 12.4 If a proposed joint development plan is agreed and adopted by the parties or adopted following determination by the Government the plan as finally adopted shall be the approved joint development plan and the Contractor shall comply with the terms of the said development plan as if the Commercial Discovery is established.

12.5 The provisions of Articles 12.1 12.2 and Article 12.3 shall apply mutatis mutandis to a Discovery of a Reservoir located partly within the Contract Area which although not equivalent to a Commercial Discovery if developed alone would be a Commercial Discovery if developed together with that part of the Reservoir which extends outside the Contract Area to the areas subject to contract for petroleum operations by other parties.

37 ARTICLE 13 MEASUREMENT OF PETROLEUM

13.1 Petroleum used for internal consumption for Petroleum Operations flared saved and sold from the Contract Area shall be

measured by methods and appliances generally accepted and customarily used in modern oilfield and petroleum industry practices and approved by the Management Committee and the Government.

13.2 The Government may at all reasonable times inspect and test the appliances used for measuring the volume and determining the quality of Petroleum provided that any such inspection or testing shall be carried out in such a manner so as not to unduly interfere with Petroleum Operations.

13.3 Before commencement of production from the Contract Area the Parties shall mutually agree on a methods to be employed for measurement of volumes of Petroleum production;

b the point or points at which Petroleum shall be measured and the respective shares allocated to the Parties in accordance with the terms of this Contract;

c the frequency of inspections and testing of measurement appliances and relevant procedures relating thereto; and

d the consequences of a determination of an error in measurement.

13.4 The Contractor shall undertake to measure the volume and quality of the Petroleum Produced and Saved from the Contract Area at the agreed measurement point consistent with generally accepted modern oilfield and petroleum industry practices with the frequency and according to procedures agreed pursuant to Article 13.3. The Contractor shall not make any alteration in the agreed method or procedures for measurement or to any of the approved appliances used for that purpose without the written consent of the Management Committee and the Government.

13.5 The Contractor shall give the Government timely notice of its intention to conduct measuring operations or any agreed alteration for such operations and the Government shall have the right to be present at and supervise either directly or through authorised representatives such operations.

13.6 The Contractor shall keep all the records of analysis and measurement of hydrocarbons calibrations and proving of measurement system and make available to Government or its authorized agency such records on request.

38 ARTICLE 14 PROTECTION OF THE ENVIRONMENT

14.1 The Government and the Contractor recognise that Petroleum Operations will cause some impact on the environment in the Contract Area. Accordingly in performance of the Contract the Contractor shall conduct its Petroleum Operations with due regard to concerns with respect to protection of the environment and conservation of natural

resources and shall in particular; a employ modern oilfield and petroleum industry practices and standards including advanced techniques practices and methods of operation for the prevention of Environmental Damage in conducting its Petroleum Operations; b take necessary and adequate steps to prevent Environmental Damage and where some adverse impact on the environment is unavoidable to minimise such damage and the consequential effects thereof on property and people; ii ensure adequate compensation for injury to persons or damage to property caused by the effect of Petroleum Operations; and c comply with the requirements of applicable laws and the reasonable requirements of the Government from time to time.

14.2 If the Contractor fails to comply with the provisions of paragraph bi of Article 14.1 or contravenes any relevant law and such failure or contravention results in any Environmental Damage the Contractor shall forthwith take all necessary and reasonable measures to remedy the failure and the effects thereof.

14.3 If the Government in accordance with the laws has good reason to believe that any works or installations erected by the Contractor or any operations conducted by the Contractor are endangering or may endanger persons or any property of any person or are causing or may cause pollution or are harming or may harm fauna or flora or the environment to a degree which the Government deems unacceptable the Government may require the Contractor to take remedial measures within such reasonable period as may be determined by the Government and to repair any such damage. If the Government deems it necessary it may also require the Contractor to discontinue Petroleum Operations in whole or in part until the Contractor has taken such remedial measures or has repaired any damage caused.

14.4 The measures and methods to be used by the Contractor for the purpose of complying with the terms of paragraph bi of Article 14.1 shall be determined in timely consultation with the Government upon the commencement of Petroleum Operations or whenever there is a significant change in the scope or method of conducting Petroleum Operations and shall take into account the international standards applicable in similar circumstances and the relevant environmental impact study carried out in accordance with Article 14.5 below. The Contractor shall notify the Government in writing of the measures and methods finally determined by the Contractor

and shall cause such measures and methods to be reviewed from time to time in the light of prevailing circumstances.

14.5 The Contractor shall cause a person or persons with special knowledge on environmental matters to carry out two environmental impact studies in order to determine at the time of the studies the prevailing situation relating to the environment human beings and local communities the flora and fauna in the Contract Area and in the adjoining or neighbouring areas; and

b to establish the likely effect on the environment human beings and local communities the flora and fauna in the Contract Area and in the adjoining or neighbouring areas in consequence of the relevant phase of Petroleum Operations to be conducted under this Contract and to submit for consideration by the Parties methods and measures contemplated in Article 14.4 for minimising Environmental Damage and carrying out Site Restoration activities.

14.5.1 The first of the aforementioned studies shall be carried out in two parts namely a preliminary part which must be concluded before commencement of any field work relating to a seismographic or other survey and a final part relating to drilling in the Exploration Period. The part of the study relating to drilling operations in the Exploration Period shall be approved by Government before the commencement of such drilling operations it being understood that such approval shall not be unreasonably withheld.

14.5.2 The second of the aforementioned studies shall be completed before commencement of Development Operations and shall be submitted by the Contractor as part of the Development Plan with specific approval of Government being obtained before commencement of Development Operations it being understood that such approval shall not be unreasonably withheld.

14.5.3 The studies mentioned in Article 14.5 above shall contain proposed environmental guidelines to be followed in order to minimize Environmental Damage and shall include but not be limited to the following to the extent appropriate to the respective study taking into account the phase of operations to which the study relates

40 a proposed access cutting; b clearing and timber salvage; c wildlife and habitat protection; d fuel storage and handling; e use of explosives; f camps and staging; g liquid and solid waste disposal; h cultural and archaeological sites; i selection of drilling sites; j terrain stabilization; k protection of freshwater horizons; l blowout prevention plan; m flaring

during completion and testing of Gas and Oil Wells;n abandonment of Wells;o rig dismantling and site completion;p reclamation for abandonment;q noise control;r debris disposal; ands protection of natural drainage and water flow.14.5.4 Subject to the provision of all applicable laws and notifications on protection of environment any new project or expansion or modernizationprojects for petroleum operations for which a proposal is submitted by the Contractor the Government shall compete the assessment of theproject within a period of ninety 90 days from the receipt of the requisite documents and data from the project authorities and completion ofpublic hearing. The decision of the Government on the proposal of the Contractor for environmental clearance shall be conveyed within thirty30 days thereafter.14.6 The Contractor shall ensure thata Petroleum Operations are conducted in an environmentally acceptable and safe manner consistent with modern oilfield and petroleumindustry practices and that such Petroleum Operations are properly monitored;b the pertinent completed environmental impact studies are made available to its employees and to its contractors and Subcontractors todevelop adequate and proper awareness of the measures and methods of environmental protection to be used in carrying out the PetroleumOperations; andc the contracts entered into between the Contractor and its contractors and Subcontractors relating to its Petroleum Operations shall include theprovisions stipulated herein and any established measures and methods for the implementation of the Contractors obligations in relation tothe environment under this Contract.41 14.7 The Contractor shall prior to conducting any drilling activities prepare and submit for review by the Government contingency plans fordealing with Oil spills fires acents and emergencies designed to achieve rapid and effective emergency response. The plans referred toabove shall be discussed with the Government and concerns expressed shall be taken into account.14.7.1 In the event of an emergency acent Oil spill or fire arising from Petroleum Operations affecting the environment the Contractor shallforthwith notify the Government and shall promptly implement the relevant contingency plan and perform such Site Restoration as may benecessary in accordance with modern oilfield and petroleum industry practices.14.7.2 In the event of any other emergency or acent arising from the Petroleum

Operations affecting the environment the Contractor shall take such action as may be prudent and necessary in accordance with modern oilfield and petroleum industry practices in such circumstances.

14.8 In the event that the Contractor fails to comply with any of the terms contained in Article 14.7 within a period specified by the Government the Government after giving the Contractor reasonable notice in the circumstances may take any action which may be necessary to ensure compliance with such terms and to recover from the Contractor immediately after having taken such action all costs and expenditures incurred in connection with such action together with such interest as may be determined in accordance with Section 1.7 of Appendix C of this Contract.

14.9 On expiry or termination of this Contract or relinquishment of part of the Contract Area the Contractor shall subject to Article 27 remove all equipment and installations from the relinquished area or former Contract Area in a manner agreed with the Government pursuant to an abandonment plan; and b perform all necessary Site Restoration in accordance with modern oilfield and petroleum industry practices and take all other action necessary to prevent hazards to human life or to the property of others or the environment.

14.10 The Contractor shall prepare a proposal for the restoration of site including abandonment plan and requirement of funds for this and the annual contribution. This will be submitted along with the annual Budget for the consideration and approval of the Management Committee. The annual contribution shall be deposited by the Contractor in the Site Restoration fund which will be established in accordance with the scheme notified by the Government.

14.11 Subject to Section 3.2 of Accounting Procedure any Site Restoration fund scheme formulated by Government and subject to provisions of this Contract any and all costs incurred by the Contractor pursuant to this Article shall be cost recoverable including but not limited to sinking funds established for abandonment and restoration of the Contract Area.

14.12 In this Article a reference to Government includes the State Government.

14.13 Where the Contract Area is partly located in areas forming part of certain national parks sanctuaries mangroves wetlands of national importance biosphere reserves and other biologically sensitive areas passage through these areas shall generally not be permitted. However if there is no passage other

than through these areas to reach a particular point beyond these areas permission of the appropriate authorities shall be obtained.

14.14 The obligations and liability of the Contractor for the environment hereunder shall be limited to damage to the environment which occurs after the Effective Date; and results from an act or omission of the Contractor.

43 ARTICLE 15 RECOVERY OF COST PETROLEUM

15.1 The Contractor shall be entitled to recover Contract Costs out of a percentage of the total value of Petroleum Produced and Saved from the Contract Area in the Year in accordance with the provisions of this Article.

15.2 Exploration Costs incurred by the Contractor in the Contract Area up to the date of first Commercial Production shall be aggregated and the Contractor shall be entitled to recover the aggregate of such Exploration Costs out of the Cost Petroleum at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date of such Commercial Production.

15.3 The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Exploration Costs which it has incurred in any Year after the date of Commercial Production at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date such Exploration Costs are incurred.

15.4 Development Costs incurred by the Contractor in the Contract Area up to the date of first Commercial Production shall be aggregated and the Contractor shall be entitled to recover out of the Cost Petroleum the aggregate of such Development Costs at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date of such Commercial Production.

15.5 The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Development Costs which it has incurred after the date of first Commercial Production at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date such Development Costs are incurred.

15.6 The Contractor shall be entitled to recover in full during any Year the Production Costs incurred in that Year out of the Cost Petroleum.

15.7 The Contractor shall be entitled to recover in full during any Year the royalty payments to the Government State Governments in that Year out of the Cost Petroleum.

15.8 If during any Year the Cost Petroleum is not sufficient to enable the Contractor to recover in full the Contract Costs due for recovery in that Year in accordance with the provisions of

Articles 15.1 to 15.7 then subject to the provisions of Article 15.1244 a recovery shall first be made of royalty payments; andb recovery shall next be made of the Production Costs; andc recovery shall next be made of the Exploration Costs; andd recovery shall then be made of the Development Costs. The unrecovered portions of Contract Costs shall be carried forward to the following Year and the Contractor shall be entitled to recover suchContract Costs in such Year or the subsequent Years as if such Contract Costs were due for recovery in that Year or the succeeding Years untilthe unrecovered Contract Costs have been fully recovered out of Cost Petroleum from the Contract Area.15.9 The maximum amount of Cost Petroleum to which the Contractor shall be entitled in accordance with the provisions of this Article shall be tobe taken from the accepted bid X percent X of the total value of the Petroleum Produced and Saved from the Contract Area.15.10 For the purposes of this Article as well as Article 16 costs receipts and income shall be converted into production unit equivalents and viceversa viz both in physical and monetary terms using the relevant prices established pursuant to Article 19 for Crude Oil and Article 21 for Natural Gas.15.11 Pending completion of the calculations required to establish definitively the Contractors entitlement to Cost Petroleum from the Contract Area in any Year the Contractor shall take delivery provisionally of volumes of Crude Oil or Natural Gas representing its estimated Cost Petroleum entitlement calculated with reference to estimated production quantities costs and prices as established by the Contractor and approved by the Management Committee. Such provisional determination of Cost Petroleum shall be made every Quarter on an accumulative basis. Within ninety 90 days of the end of each Year a final calculation of the Contractors entitlement to Cost Petroleum based on actual production quantities costs and prices for the entire Year as reflected in audited accounts under Article 25.4.3 shall be undertaken and any necessary adjustments to the Cost Petroleum entitlement shall be agreed upon between the Government and the Contractor within thirty 30 days and made within thirty 30 days thereafter.15.12 Where more than one Party constitutes the Contractor the percentage of the total Cost Petroleum from the Contract Area which shall be available to each such Party in any Year for recovery of its share of Contract Costs shall be determined on the basis of the

respective Participating Interest of each such Party. 15.13 The Contractor acknowledges that the cost estimates for Minimum Work Programme are the realistic estimate of expenditure. For the purposes of allowing cost recovery under Article 15 herein read with Section 3 of the Accounting Procedure the cost estimates given by the Contractor in the bid documents towards the Minimum Work Programme in all three Exploration Phases shall be taken as Bench Mark notwithstanding any claims for higher actual cost. Any material increase over the Bench Mark shall not be allowed for cost recovery unless the Government on the recommendation of the Management Committee agrees that the cost increase is due to change in circumstances after the Contract comes into effect. For the above purpose an itemized breakup provided by the Contractor of cost estimates given in the bid documents is placed at Appendix H to this Contract.

46 ARTICLE 16 PRODUCTION SHARING OF PETROLEUM

16.1 The Parties to this Contract shall share in the Profit Petroleum in each Year in accordance with the provisions of this Article. A Party's share of Profit Petroleum in any Year shall be calculated on the basis of the Investment Multiple actually achieved by the Contractor at the end of the preceding Year for the Contract Area as provided in Appendix D.

16.2.1 When the Investment Multiple of the Contractor at the end of any Year is less than one and one half 1.5 the Government shall be entitled to take and receive twenty percent 20 and the Contractor shall be entitled to take and receive eighty percent 80 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year.

16.2.2 When the Investment Multiple of the Contractor at the end of any Year is equal to or more than one and one half 1.5 but is less than two 2.0 the Government shall be entitled to take and receive twenty five percent 25 and the Contractor shall be entitled to take and receive seventy five percent 75 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year.

16.2.3 When the Investment Multiple of the Contractor at the end of any Year is equal to or more than two 2.0 but is less than two and one half 2.5 the Government shall be entitled to take and receive thirty percent 30 and the Contractor shall be entitled to take and receive seventy percent 70 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year.

16.2.4 When the Investment Multiple

of the Contractor at the end of any Year is equal to or more than two and one half 2.5 but is less than three 3.0 the Government shall be entitled to take and receive thirty percent 30 and the Contractor shall be entitled to take and receive seventypercent 70 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year.16.2.5 When the Investment Multiple of the Contractor at the end of any Year is equal to or more than three 3.0 but is less than three and one half 3.5 the Government shall be entitled to take and receive thirtyfive percent 35 and the Contractor shall be entitled to take and receivesixtyfive percent 65 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year.16.2.6 When the Investment Multiple of the Contractor at the end of any Year is equal to or more than three and one half 3.5 the Government shallbe entitled to take and receive forty percent 40 and the Contractor shall be entitled to take and receive sixty percent 60 of the total ProfitPetroleum from the Contract Area with effect from the start of the succeeding Year.47 16.3 Any balance left to the credit of the Parties in any Site Restoration account opened pursuant to the provision of Article 14.10 after SiteRestoration has been done by the Contractor in accordance with the provisions of this Contract and the laws in this regard shall be sharedbetween the Government and the Contractor as per the Investment Multiple reached at the time of ceasing of production from the ContractArea.16.4.1 Other than ANG or NANG the Government shall have the option to take its entitlement to Profit Petroleum either in cash or in kind inany Year. In case of ANG or NANG as the case may be the Government shall have the option to take its entitlement to Profit Petroleum incash or in kind and such option shall be exercised at interval of every five 5 Years from the commencement of first Commercial Productionfrom the Contract Area.16.4.2 In accordance with the Article 16.4.1 The Government shall exercise such option by giving a written notice to the Contractor not later thanthirtieth 30th June in the preceding Year in which the entitlement is due. Once the Government has exercised its option the same shallcontinue unless the Government informs the Contractor otherwise.16.4.3 Where the Government has informed the Contractor of its intention to take its share in kind the Parties shall mutually agree on a procedure fordelivery of the Governments share of Profit Petroleum and where

relevant the composition of the Petroleum which is to be delivered.16.5 The value of the Contractors Investment Multiple at the end of any Year in respect of the Contract Area shall be calculated in the manner provided for and on the basis of the net cash flows specified in Appendix D to this Contract. However the amount of Profit Petroleum to be shared between the Government and the Contractor shall be determined for each Quarter on an accumulative basis. Pending finalisation of accounts Profit Petroleum shall be shared between the Government and the Contractor on the basis of provisional estimated figures of Contract Costs production prices receipts income and any other income or allowable deductions and on the basis of the value of the Investment Multiple achieved at the end of the preceding Year. All such provisional estimates shall be approved by the Management Committee. When it is necessary to convert monetary units into physical units of production equivalents or vice versa the price or prices determined pursuant to Articles 19 and 21 for Crude Oil Condensate and Natural Gas respectively shall be used. Within ninety 90 days⁴⁸ of the end of each Year a final calculation of Profit Petroleum based on actual costs quantities prices and income for the entire Year shall be completed and any necessary adjustments to the sharing of Petroleum shall be agreed upon between the Government and the Contractor within thirty 30 days and made within thirty 30 days thereafter. Explanation The Profit Petroleum due to the Government shall be deposited with Pay Accounts officer or its successor Ministry of Petroleum Natural Gas Government of India Shastri Bhavan New Delhi by 10th of the Month following each Quarter

16.6 The Profit Petroleum due to the Contractor in any Year from the Contract Area shall be divided amongst the Parties constituting the Contractor in proportion to their respective Participating Interest.⁴⁹

ARTICLE 17 TAXES ROYALTIES RENTALS DUTIES ETC.

17.1 Companies their employees persons providing any materials supplies services or facilities or supplying any ship aircraft machinery equipment or plant whether by way of sale or hire to the Companies for Petroleum Operations or for any other purpose and the employees of such persons shall be subject to all fiscal legislation in India except where pursuant to any authority granted under any applicable law they are exempted wholly or partly from the application of the provisions of a particular law or as

otherwise provided herein.17.2 Pursuant to the provisions of section 42 of the Incometax Act 1961 the allowances specified herein shall apply in computing income taxpayable by a Company on its profits and gains from the business of Petroleum Operations in lieu of and not in addition to corresponding allowances provided for under the heading Profits and Gains of Business or Profession in the Incometax Act 1961. Any other allowance which are not specified herein shall be treated in accordance with the provisions of Incometax Act 1961.17.2.1 Subject to the provisions herein below deductions at the rate of one hundred percent 100 per annum shall be allowed for all expenditures both capital and revenue expenditures incurred in respect of Exploration Operations and drilling operations. The expenditure incurred in respect of Development Operations other than drilling operations and Production Operations will be allowable as per the provisions of the Incometax Act 1961. The expenses so incurred are subject to the following a where any expenditure is not solely incurred on Petroleum Operations or is incurred as part of or in conjunction with any other business only that proportion of the total expenditure which can be proved to the assessing officer to represent a fair proportionate part thereof having regard to all relevant facts and circumstances shall be allowed; b sections 40A and 44C of the Incometax Act 1961 shall apply.17.2.2 A Company shall be entitled for income tax purposes only to deduct all its unsuccessful Exploration Costs in contract areas covered by other contracts from the aggregate value of Petroleum allocable to the Company from any Fields in the Contract Area in the manner as follows a unsuccessful Exploration Costs incurred in contract areas other than the Contract Area where a Commercial Discovery has been made up to the date of commencement of Commercial Production shall be aggregated and 50 the Company shall be entitled to deduct such costs at the rate of one hundred per cent 100 per annum; b unsuccessful Exploration Costs incurred in contract areas other than the Contract Area where a Commercial Discovery has been made after the commencement of Commercial Production shall be deductible at the rate of one hundred per cent 100 per annum of such costs beginning from the Year such costs are incurred.17.2.3 All allowable expenditure incurred prior to the Year in which Commercial Production commences shall be aggregated and the assessed loss for that Year as well

as the assessed loss if any incurred in the assessment year relevant to the Year in which Commercial Production commences or in any subsequent assessment year shall be carried forward to succeeding assessment years and set off as provided in the Income tax Act 1961.

17.2.4 For any or all accumulated expenditures incurred in respect of Exploration Operations and drilling operations prior to the date of commercial production Companies shall have option to amortize such expenditures over a period of ten 10 years from the date of first commercial production.

17.2.5 The profits and gains of the business of the Parties comprising the Contractor consisting of Petroleum Operations shall for the purpose of levy of income tax under the Income tax Act 1961 be computed on the basis of the value determined in accordance with Article 19 of its Participating Interest share of Crude Oil produced and saved and sold or otherwise disposed of from the Contract Area and from any revenue realised on the sale of Associated or Non Associated Natural Gas referred to in Article 21 as well as any other gains or receipts from Petroleum Operations as reduced by the deductions as specified herein and except as herein provided all the provisions of the Income tax Act 1961 shall apply.

17.2.6 Companies shall be eligible for benefits available under section 80 IA of the Income tax Act 1961 as applicable from time to time.

17.3 For the purposes of Article 17.2 and section 42 of the Income tax Act 1961

17.3.1 The following terms used in section 42 of the Income tax Act 1961 shall have the meanings corresponding to the terms used in this Contract and defined in Article 1 as follows

a agreement means this Contract as defined in Article 1;

b commercial production shall have the meaning assigned in Article 1.

17.3.2 The terms assessing officer assessed loss and assessment year shall have the meaning as defined in the Income tax Act 1961.

17.3.3 The other terms used herein and defined in Article 1 shall have the meaning therein ascribed.

17.4 Companies Lessee shall be required to pay royalty to the Government Lessor for offshore areas at the rate of ten percent 10 of the wellhead value of Crude Oil and Natural Gas. In case of an onshore area Companies shall be required to pay to the State Governments Lessor at the rate of twelve point five zero percent 12.5 of the wellhead value of Crude Oil and ten percent 10 of the wellhead value of Natural Gas. In case of an offshore area falling beyond four hundred 400 metre isobath the rate of

royalty payable by Companies Lessee to the Government Lessor shall be at the rate of five percent 5 of the wellhead value of Crude Oil and Natural Gas for the first seven years from the date of commencement of Commercial Production in the Field. The valuation of Crude Oil and Natural Gas shall be as per the Article 19 and Article 21 respectively. The royalty amount due to Government State Governments shall be payable latest by the end of the succeeding Month. 17.5 Machinery plant equipment materials and supplies imported by the Contractor and its Subcontractors solely and exclusively for use in Petroleum Operations under this Contract or similar contracts with the Government where customs duty has been exempted by the Government shall be exempt from customs duties and export duties or other charges on reexportation of the said items in accordance with applicable legislation. 17.6 The Government shall have the right to inspect the records and documents of the physical item or items for which an exemption has been provided pursuant to Article 17.5 to determine that such item or items are being or have been imported solely and exclusively for the purpose for which the exemption was granted. The Government shall also be entitled to inspect such physical items wherever located to ensure that such items are being used for the purpose herein specified and any item not being so used shall immediately become liable to payment of the applicable customs duties. 17.7 Subject to Article 27 the Contractor and its Subcontractors may sell or otherwise transfer in India all imported items which are no longer required for Petroleum Operations subject to applicable laws including rules regulations procedures notifications etc. governing customs duties and sale or disposal of such items. 17.8 Any sales tax or tax of similar nature payable on the sales of Petroleum under this Contract shall be borne and reimbursed by the buyers. 17.9 Subject to the provisions herein above provided the Contractor shall be liable for payment of a annual license charges and rental fees and other charges under the Rules; 52 b charges payable by specified industries or in connection with Petroleum Operations under applicable legislation; c payments for purchase lease or rental of land or land rights in connection with Petroleum Operations; d taxes fees or charges for specific services rendered on request or to the public generally; e customs duties except for those items subject to exemption as provided in

Article 17 applicable at the rates specified from time to time; and stamp duties registration fees license fees taxes such as taxes on property or assets not calculated by reference to income or otherwise exempted or other levies fees or charges of a non-discriminatory nature and generally applicable in India or in the State where Petroleum Operations are being conducted.

17.10 If any change in or to any Indian law rule or regulation dealing with income tax or other corporate tax export-import tax excise customs duty or any other levies duties or taxes imposed on Petroleum or dependent upon the value of Petroleum results in a material change to the expected economic benefits accruing to any of the Parties after the date of execution of the Contract the Parties shall consult promptly in good faith to make necessary revisions and adjustments to the Contract in order to maintain such expected economic benefits to each of the Parties provided however that the expected economic benefits to the Parties shall not be reduced as a result of the operation of this Article.

53 ARTICLE 18 DOMESTIC SUPPLY SALE DISPOSAL AND EXPORT OF CRUDE OIL AND CONDENSATE

18.1 Until such time as the total availability to the Government of Crude Oil and Condensate from all Petroleum production activities in India meets the total national demand each Company comprising the Contractor shall be required to sell in the domestic market in India all of the Company's entitlement to Crude Oil and Condensate from the Contract Area in order to assist in satisfying the national demand.

18.2 If during any Year India attains self-sufficiency the Government shall promptly thereafter but in no event later than the end of the first Quarter of the following Year so advise the Companies by written notice. In such event as from the end of the second Quarter of the following Year or such earlier date as the Parties may mutually agree domestic sale obligation shall be suspended and the Company shall have the right to lift and export its Participating Interest share of Crude Oil and Condensate until such time if any as self-sufficiency shall have ceased to exist. If self-sufficiency ceases to exist during a Year the Government shall recover its position to ask Companies under Article 18.1 in respect of the following Year by giving ninety 90 days notice thereof to the Companies to sell Crude Oil and Condensate in the Indian domestic market.

18.3 Upon India achieving self-sufficiency the Companies shall be entitled to freely lift and export any

Crude Oil and Condensate pursuant to this Article 18 subject to Governments generally applicable destination restrictions to countries with which the Government for policy reasons has severed or restricted trade.

18.4 No later than sixty 60 days prior to the commencement of production in a Field and thereafter no less than sixty 60 days before the commencement of each Year the Contractor shall cause to be prepared and submitted to the Parties a production forecast setting out the total quantity of Crude Oil that it estimates can be produced from a Field during the succeeding Year based on a maximum efficient rate of recovery of Crude Oil from that Field in accordance with modern oilfield and petroleum industry practices. No later than thirty 30 days prior to the commencement of each Quarter the Contractor shall inform its estimate of production for the succeeding Quarter and shall endeavour to produce the forecast quantity for each Quarter.

18.5 Each Company comprising the Contractor shall throughout the term of this Contract have the right to separately take in kind and dispose of all its share of Cost Petroleum and Profit Petroleum and shall have the obligation to lift the said Petroleum on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the other Companies.

18.6 The Government shall throughout the term of this Contract have the right to separately take in kind and dispose of its share of Crude Oil and shall have the obligation to lift the said Oil on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the Contractor.

18.7 For the purpose of implementing the provisions of this Article a Crude lifting procedure and Crude sales agreement based on generally acceptable international terms shall be agreed upon by the Contractor with buyers no later than six 6 months or such shorter period as may be mutually agreed between the Contractor and buyers with the consent of Government prior to the commencement of production in a Field. Such lifting procedure shall be made available to all the Parties to this Contract.

55 ARTICLE 19 VALUATION OF PETROLEUM

19.1 For the purpose of this Contract the value of Crude Oil Condensate and Natural Gas referred to in Article 21 shall be based on the price determined as provided herein.

19.2 A price for Crude Oil shall be determined for each Month or such other period as the Parties may agree hereinafter referred to as the Delivery Period in terms of

United States Dollars per Barrel on import parity basis with marine freight being determined on the basis of nearest port to the Contract Area for Crude Oil produced and sold or otherwise disposed of from Contract Area for each Delivery Period in accordance with the appropriate basis for that type of sale or disposal specified below. Subject to the provisions of this Article 19 it is clearly understood that the actual prices received by the Companies from the sales will form the basis for the purposes of cost recovery Profit Petroleum sharing and payment of royalty as provided in the Articles 15 16 and 17 respectively. The basis of valuation given in this Article for the purpose of Article 15 16 and 17 shall apply only where Government is of the view that sale prices realised by the Companies are not consistent with the price realisable at Arms Length Sales.

19.3 In the event that some or all of a Company's or Contractor's total sales of Crude Oil during a Delivery Period are made to third parties at Arms Length Sales all sales so made shall be valued at the weighted average of the prices actually received by a Company calculated by dividing the total receipts from all such sales at the Delivery Point by the total number of Barrels of the Crude Oil sold in such sales.

19.3.1 Each Company constituting the Contractor shall separately submit to the designated nominee of the Government within fifteen (15) days of the end of each Delivery Period a report containing the actual prices obtained in their respective Arms Length Sales for any Crude Oil. Such reports shall distinguish between term sales and spot sales and itemize volumes customers prices received and credit terms and a Company shall allow the designated nominees of the Government to examine the relevant sales contracts.

19.4 For the purpose of determining price at Arms Length Sales the price of the Crude Oil at which sale takes place will generally be based on per Barrel of one or more crude oils which at the time of calculation are being freely and actively traded in the international market and are similar in characteristics and quality to the Crude Oil in respect of which the price is being determined. Selling price to be ascertained from Platts Crude Oil Market Wire daily publication Platts or the spot market for the same crude oils ascertained in the same manner whichever price more truly reflects the current value of such crude oils. For any Delivery Period in which sales take place the price shall be the arithmetic average price per Barrel determined by calculating the average for

such Delivery Period of the mean of the high and low FOB prices for each day of the crude oils selected for comparison adjusted for differences in the Crude Oil and the crude oils being compared for quality, transportation costs, delivery time, quantity, payment terms and other contract terms to the extent known and other relevant factors. In the event that Platts ceases to be published or is not published for a period of thirty (30) consecutive days the Parties shall agree on an alternative daily publication. The Contractor shall make available all the data pertaining to pricing of Crude to enable Government to deem that the proposed sale price by the Contractor to each constituent of the Contractor reflects a fair market price for the Crude.

19.4.1 In the event that at the relevant time no crude oils of similar quality to the Crude Oil to be sold are being actively traded in the international markets where prices can be ascertained by international publication or the official FOB selling prices and the international spot market price vary widely between producers the Parties shall meet in good faith to determine an appropriate pricing basis.

19.5 The Contractor shall determine the relevant prices in accordance with this Article and the calculation basis of calculation and the price determined shall be supplied to the Government and shall be subject to agreement by the Government.

19.6 In the event that the Parties fail to reach agreement on any matter concerning selection of the crude oils for comparison, the calculation basis or mechanism for the calculation of the prices, the prices arrived at, the adjustment of any price or generally about the manner in which the prices are determined according to the provisions of this Article within thirty (30) days or such longer period as may be mutually agreed between the Parties from the date of commencement of Commercial Production or the end of each Delivery Period thereafter any Party may refer the matter or matters in issue for final determination by a sole expert or arbitrator appointed as provided in Article 33.

19.6.1 If the matter is referred to the sole expert within ten (10) days of the said appointment the Parties shall provide the expert with all information they deem necessary or as the expert may reasonably require.

19.6.2 Within fifteen (15) days from the date of his appointment the expert shall report to the Parties on the issues referred to him for determination applying the criteria or mechanism set forth herein and indicate his decision thereon to

be applicable for the relevant Delivery Period for CrudeOil and such decision shall be accepted as final and binding by the Parties.19.6.3 Any price or pricing mechanism agreed by the Parties pursuant to the provisions of this Article shall not be changed retroactively.57 19.7 In the event that all sales of Crude Oil in a Delivery Period by a Company constituting the Contractor are to be made to an Affiliate the Parties may agree on an alternative method of valuing the Crude Oil for the purposes of this Contract provided that such alternative method results in an internationally competitive fair market valuation for that Delivery Period. In case of disagreement the decision of the Government on determining a Crude price in case of sales to an Affiliate shall be final and binding.19.8 In the event that in any Delivery Period there is more than one type of sales referred to in Articles 19.3 and 19.7 then for the purpose of calculating Cost Petroleum and Profit Petroleum entitlement and royalty payments pursuant to Articles 15 16 and 17 respectively a single price per Barrel of Crude Oil for all the sales for the relevant Delivery Period shall be used. Such single price shall be the weighted average of the prices determined for each type of sale weighted by the respective volumes of Crude Oil sold in each type of sale in the relevant Delivery Period.19.9 The provisions specified above for the determination of the price of sales of Crude Oil shall apply mutatis mutandis to Condensates.19.10 The price of Natural Gas shall be determined as provided in Article 21.58 ARTICLE 20 CURRENCY AND EXCHANGE CONTROL PROVISIONS20.1 Subject to the provisions herein and to compliance with the relevant provisions of the laws of general application in India governing currency and foreign exchange and related administrative instructions and procedures issued thereunder on a non discriminatory basis each Foreign Company comprising the Contractor shall during the term of this Contract have the right to repatriate abroad in United States Dollars or any other freely convertible currency acceptable to the Government and the Foreign Company the net proceeds of sales of Petroleum in India; b receive retain and use abroad the proceeds of any export sales of Petroleum under the Contract; c open maintain and operate bank accounts with reputable banks both inside and outside India for the purpose of this Contract; d freely import through normal banking channels funds necessary for carrying out the Petroleum

Operations;e convert into foreign exchange and repatriate sums imported pursuant to d above in excess if any of its requirements; andf make payments outside of India for purchases services and loans obtained abroad without the requirement that funds used in makingsuch payments must come from or originate in India.Provided however that repatriation pursuant to subparagraphs a and e and payments pursuant to subparagraph f shall be subject to theprovisions of any treaties and bilateral arrangements between the Government and any country with respect to payments to or from that country.20.2 The rates of exchange for the purchase and sale of currency by the Companies shall be the prevailing rates of general application determined bythe Reserve Bank of India or such other financial body as may be mutually agreed by the Parties and for accounting purposes under thisContract these rates shall apply as provided in Section 1.6 of AppendixC.20.3. A Party other than a Foreign Company comprising the Contractor shall be governed by the relevant currency and foreign exchange laws andrelated administrative instructions and procedures issued thereunder.20.4 Indian Companies shall have right to remit their portion of expenditure in foreign currencyies in accordance with the exchange controlprovisions.59 ARTICLE 21NATURAL GAS21.1 Subject to Article 21.2 the Indian domestic market shall have the first call on the utilisation of Natural Gas discovered and produced from theContract Area. Accordingly any proposal by the Contractor relating to Discovery and production of Natural Gas from the Contract Area shallbe made in the context of the Governments policy for the utilisation of Natural Gas and shall take into account the objectives of theGovernment to develop its resources in the most efficient manner and to promote conservation measures.21.2 The Contractor shall have the right to use Natural Gas produced from the Contract Area for the purpose of Petroleum Operations includingreinjection for pressure maintenance in Oil Fields gas lifting and captive power generation required for Petroleum Operations.21.3 For the purpose of sales in the domestic market pursuant to this Article 21 the Contractor shall have freedom to market the Gas and sell itsentitlement.21.4 Associated Natural Gas ANG21.4.1 In the event that a Discovery of Crude Oil contains ANG the Contractor shall declare in the proposal for the declaration of the said Discoveryas a Commercial Discovery as

specified in Article 10 whether and by what amount the estimated production of ANG is anticipated to exceed the quantities of ANG which will be used in accordance with Article 21.2 such excess being hereinafter referred to as the Excess ANG. In such an event the Contractor shall indicate whether on the basis of the available data and information it has reasonable grounds for believing that the Excess ANG could be commercially exploited in accordance with the terms of this Contract along with the Commercial Production of the Crude Oil from the Contract Area and whether the Contractor intends to so exploit the Excess ANG.

21.4.2 Based on the principle of full utilisation and minimum flaring of ANG a proposed development plan for an Oil Discovery shall to the extent practicable include a plan for utilisation of the ANG including estimated quantities to be flared reinjected and to be used for Petroleum Operations; and if the Contractor proposes to commercially exploit the Excess ANG for sale in the domestic market in accordance with Government's policy or elsewhere the proposed plans for such exploitation.

21.4.3 If the Contractor wishes to exploit the Excess ANG subject to Article 21.1 the Contractor shall be free to explore markets for the commercial exploitation of the said Excess ANG and submit its proposals for such exploitation to the Government in accordance with Article 21.4.2.

21.4.4 Where the Contractor is of the view that the Excess ANG cannot be commercially exploited and chooses not to exploit the said Excess ANG or is unable to find a market for the Excess ANG pursuant to Article 21.4.3 the Government shall be entitled to take and utilise such Excess ANG free of any cost charge.

21.4.5 If the Government elects to take the Excess ANG as provided in Article 21.4.4a the Contractor shall deliver such Excess ANG to the Government or its nominee free of any cost charge at the downstream flange of the Gas Oil separation facilities;

b the Contractor shall based on sound petroleum engineering practices install such facilities as would facilitate insofar as practicable uninterrupted delivery of such Excess ANG to the Government or its nominee;

c the cost of all facilities installed pursuant to paragraph b above shall be borne by the Government or its nominee;

d the Government or its nominee shall bear all costs including gathering treating processing and transporting costs beyond the downstream flange of the Gas Oil separation facilities; and e the delivery of such Excess ANG shall be subject to

procedures to be agreed between the Government or its nominee and the Contractor prior to such delivery such procedures to include matters relating to timing of offtake of such Excess ANG. Parties shall endeavour that such procedures do not restrict Oil production.

21.4.6 The Excess ANG which is not commercially exploited by the Contractor or taken by the Government or its nominee pursuant to this Article 21 shall be returned to the subsurface structure or flared or otherwise disposed off as approved by the Government in the context of the Development Plan provided that flaring will be resorted to only for small quantities and as a last resort.

21.4.7 As soon as practicable after the submission of the proposed development plan the Contractor and the Government or its nominee shall meet to discuss the sale and/or disposal of any ANG discovered with a view to giving effect to the provisions of this Article 21 in a timely manner.

21.5 Non Associated Natural Gas NANG

21.5.1 In the event of a Discovery of NANG in the Contract Area the Contractor shall promptly report such Discovery to the Management Committee and the Government and the provisions of Articles 10.1 and 10.2 shall apply. The remaining provisions of Article 10 would apply to the Discovery and development of NANG only insofar as they are not inconsistent with the provisions of this Article. Notwithstanding the provisions of Article 3 the Contractor shall be entitled to retain the Discovery Area subject to the provisions of this Article 21.

21.5.2 If pursuant to Article 10.1 the Contractor gives notification that the Discovery is of potential commercial interest the Contractor shall submit to the Management Committee within one 1 year from the date of notification of the above said Discovery the proposed Appraisal Programme including a Work Programme and Budget to carry out an adequate and effective appraisal of such Discovery to determine i without delay whether such Discovery is a Commercial Discovery and ii with reasonable precision the boundaries of the area to be delineated as the Development Area. Such proposed Appraisal Programme shall be supported by all relevant data such as Well data Contractor's best estimate of reserve range and production potential and shall indicate the date of commencement of the proposed Appraisal Programme.

21.5.3 The proposed Appraisal Programme together with the Work Programme and Budget referred to in Article 21.5.2 shall be reviewed by the Management Committee within sixty 60 days of its submission

by the Contractor. The Management Committee shall offer its comments within the said period. The said Appraisal Programme together with the Work Programme and Budget submitted by the Contractor as revised or modified or amended in light of the Management Committee review and advice shall be adopted as the Appraisal Programme and the Contractor shall promptly proceed with implementation of the said Programme.

21.5.4 If on the basis of the results of the Appraisal Programme the Contractor is of the opinion that NANG has been discovered in commercial quantities it shall submit to the Management Committee as soon as practicable but not later than three (3) years from the date of notification of the aforementioned Discovery a proposal for the declaration of the Discovery as a Commercial Discovery. Such proposal shall take into account the Government's policies on Gas utilization and propose alternative options if any for use or consumption of the NANG and be accompanied by a report on the Discovery supported by inter alia technical and economic data evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or on behalf of the Contractor and other relevant information. If no proposal is submitted to the Management Committee by the Contractor within three (3) years from the said Discovery the Contractor shall relinquish its rights to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area.

21.5.5 Where the Contractor has submitted a proposal for the declaration of a Discovery as a Commercial Discovery the Management Committee shall consider the proposal of the Contractor with reference to commercial utilization or commercial development of the NANG in the domestic market or elsewhere and in the context of Government's policy on Gas utilization and the chain of activities required to bring the NANG from the Delivery Point to potential consumers in the domestic market or elsewhere. The Management Committee may within eighty five (85) days of the submission of the said proposal request the Contractor to submit any additional information on the Discovery the anticipated markets or any other related matter that may reasonably be required to facilitate a review. The Contractor shall submit the required information within thirty (30) days of the request by the Management Committee. The Management Committee will advise the Contractor of its review within

one hundred and thirty five 135 days from the submission of proposal or within fifty five 55 days from the receipt of additional information as the case may be on the proposal made by the Contractor to declare the Discovery as a Commercial Discovery. 21.5.6 If the Contractor declares the Discovery a Commercial Discovery after taking into account the advice of the Management Committee as referred to in the Article 21.5.5 the Contractor shall within one 1 year of the declaration of the Discovery as a Commercial Discovery submit a development plan for the development of the Discovery to the Management Committee for approval. Such plan shall be supported by all relevant information including inter alia the information required in Article 10.7. 21.5.7 Unless otherwise agreed by the Management Committee it shall consider the proposed development plan and give their approval within one hundred and sixty five 165 days of submission thereof or eighty five 85 days from the receipt of the clarification additional information from the Contractor. Any clarification additional information required by the Management Committee shall be asked for within eighty five 85 days of receipt of the proposal from the Contractor. The Contractor shall provide such additional information within thirty 30 days from the receipt of request by the Management Committee. If the Management Committee fails to convey its decision within one hundred and sixty five 165 days from the submission of the development plan or eighty five 85 days from the receipt of the clarification additional information whichever is later the Contractor may submit the development plan for the approval of the Government. Also where the Management Committee rejects the development plan of the Contractor the Contractor can submit the development plan for the approval of the Government. 21.5.8 Where the development plan is submitted to the Government for approval pursuant to Article 21.5.7 the Government shall convey its decision within one hundred and fifteen 115 days from the date of receipt of the proposal from the Contractor. Government where it considers necessary may ask 63 clarification additional information from the Contractor within eighty five 85 days and shall convey its decision within fifty five 55 days from the date of receipt of such clarification additional information. 21.5.9 If the Government has failed to approve or disapproves the Contractor's proposed development plan within one hundred and fifteen 115 days

from receipt or within fifty five 55 days from the receipt of clarifications information from the Contractor as mentioned in the Article 21.5.8 the Government shall advise the Contractor in writing of the reasons for such failure or disapproval and the Government and the Contractor shall meet to discuss the said development plan and the reasons for the said failure to approve or disapproval and use their best efforts to agree on appropriate modifications thereto to meet the Governments concerns or objections. Thereafter the Contractor shall have the right to resubmit within eighty five 85 days of communication from the Government the proposed development plan duly amended to meet the Governments concerns. Such right of resubmission of the proposed development plan shall be exercisable by the Contractor only once. The Government will respond to the resubmitted plan within one hundred and fifteen 115 days. If no such plan is submitted to the Government within the above specified period the Contractor shall relinquish its right to develop such Gas Discovery and such Discovery shall be excluded from the Contract Area.

21.5.10 In the event that the Management Committee or Government as may be the case approves the Contractors development plan for the development of such Commercial Discovery with such modifications and amendments as the Management Committee or Government as may be the case may approve the said Gas Discovery shall be promptly developed by the Contractor in accordance with the approved plan which shall be the Development Plan.

21.5.11 The Contractor will have a two 2 years period from the date of approval of the Development Plan by the Management Committee or Government to tie up the markets for sale of Nonassociated Natural Gas.

21.5.12 In the event the Contractor does not commence development of such Discovery within ten 10 years from the date of the first Discovery Well the Contractor shall relinquish its right to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area.

21.6 Valuation of Natural Gas

21.6.1 The Contractor shall endeavour to sell all Natural Gas produced and saved from the Contract Area at armslength prices to the benefits of Parties to the Contract.

21.6.2 Notwithstanding the provision of Article 21.6.1 Natural Gas produced from the Contract Area shall be valued for the purposes of this Contract as follows

64 a Gas which is used as per Article 21.2 or flared with the approval of the

Government or reinjected or sold to the Government pursuant to Article 21.4.5 shall be ascribed a zero value; b Gas which is sold to the Government or any other Government nominee shall be valued on the terms and conditions actually obtained including pricing formula and delivery; and Explanation However it is clarified that this provision would apply only when the sale is made to the Government or Government nominee under the provisions of the Contract c Gas which is sold or disposed of otherwise than in accordance with paragraph a or b shall be valued on the basis of competitive armslength sales in the region for similar sales under similar conditions. 21.7 The formula or basis on which the prices shall be determined pursuant to Article 21.6 shall be approved by the Government prior to the sale of Natural Gas to the consumers buyers within sixty 60 Business Days from the receipt of proposal or from the date of receipt of clarification additional information where asked for by the Government. For granting this approval Government shall take into account the prevailing policy if any on pricing of Natural Gas including any linkages with traded liquid fuels and it may delegate or assign this function to a regulatory authority as and when such an authority is in existence and in place. 65

EMPLOYMENT TRAINING AND TRANSFER OF TECHNOLOGY

ARTICLE 22 22.1 Without prejudice to the right of the Contractor to select and employ such number of personnel as in the opinion of the Contractor are required for carrying out Petroleum Operations in a safe cost effective and efficient manner the Contractor shall to the maximum extent possible employ and require the Operator and Subcontractors to employ citizens of India having appropriate qualifications and experience taking into account experience required in the level and nature of the Petroleum Operations. 22.2 The Operator shall offer a mutually agreed number of Indian nationals the opportunity for on the job training and practical experience in Petroleum Operations during the Exploration Period. Not later than six 6 months after approval of the Development Plan the Operator shall in consultation with the Government establish and implement training programmes for staff positions in each phase and level of Petroleum Operations including skilled technical executive and management positions with a view to ensuring employment of nationals of India and gradual and progressive reduction of foreign personnel. 22.3 At the request

of the Government the Foreign Companies shall separately endeavour to negotiate in good faith technical assistance agreements with the Government or a company nominated by Government for this purpose setting forth the terms by which each Foreign Company constituting the Contractor may render technical assistance and make available commercially proven technical information of a proprietary nature for use in India by the Government or the company nominated by Government. The issues to be addressed in negotiating such technical assistance agreements shall include but not be limited to licensing issues royalty conditions confidentiality restrictions liabilities costs and method of payment.

66 ARTICLE 23 LOCAL GOODS AND SERVICES

23.1 In the conduct of Petroleum Operations the Contractor shall give preference to the purchase and use of goods manufactured produced or supplied in India provided that such goods are available on terms equal to or better than imported goods with respect to timing of delivery quality and quantity required price and other terms;

b employ Indian Subcontractors having the required skills or expertise to the maximum extent possible insofar as their services are available on comparable standards with those obtained elsewhere and at competitive prices and on competitive terms; provided that where no such Subcontractors are available preference shall be given to non-Indian Subcontractors who utilise Indian goods to the maximum extent possible subject however to the proviso in paragraph a above;

and c ensure that provisions in terms of paragraphs a to b above are contained in contracts between the Operator and its Subcontractors.

23.2 Subject to Article 8.3f the Contractor shall establish appropriate procedures including tender procedures for the acquisition of goods and services which shall ensure that suppliers and Subcontractors in India are given adequate opportunity to compete for the supply of goods and services. The tender procedures shall include inter alia the financial amounts or value of contracts which will be awarded on the basis of selective bidding or open competitive bidding the procedures for such bidding and the exceptions to bidding in cases of emergency and shall be subject to the approval of the Management Committee.

23.3 Within sixty 60 days after the end of each Year the Contractor shall provide the Government with a report outlining its achievements in utilising Indian resources during that Year in accordance with Section 10 of

Appendix C to this Contract.23.4 In this Article goods means equipment materials and supplies.67

ARTICLE 24 INSURANCE AND INDEMNIFICATION24.1 Insurance24.1.1 The Contractor shall

during the term of this Contract maintain and obtain insurance coverage for and in relation to Petroleum Operations for such amounts and against such risks as are customarily or prudently insured in the international petroleum industry in accordance with modern oilfield and petroleum industry practices and shall furnish to the Government certificates evidencing that such coverage is in effect. Such insurance policies shall include the Government as additional insured and shall waive subrogation against the Government. The said insurance shall without prejudice to the generality of the foregoing cover a loss or damage to all installations equipment and other assets for so long as they are used in or in connection with Petroleum Operations; provided however that if for any reason the Contractor fails to insure any such installation equipment or assets it shall replace any loss thereof or repair any damage caused thereto; b loss damage or injury caused by pollution in the course of or as a result of Petroleum Operations; c loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor may be liable; d any claim for which the Government may be liable relating to the loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor is liable to indemnify the Government or the State Government; e with respect to Petroleum Operations offshore the cost of removing wrecks and cleaning up operations following any accident in the course of or as a result of Petroleum Operations; and f the Contractor and/or the Operator's liability to its employees engaged in Petroleum Operations.24.1.2 The Contractor shall require its Subcontractors to obtain and maintain insurance against the risks referred to in Article 24.1.1 relating mutatis mutandis to such Subcontractors.24.2 Indemnity Subject to Article 4.7 the Contractor shall indemnify defend and hold the Government and the State Government harmless against all claims losses and damages of any nature whatsoever including without limitation claims for loss or damage to property or injury or death to persons caused by or resulting from any Petroleum Operations conducted by or on behalf of the Contractor.68

ARTICLE 25RECORDS REPORTS ACCOUNTS AND AUDIT25.1 The Contractor shall prepare and maintain in original at an office in India accurate and current books records reports and accounts of itsactivities for and in connection with Petroleum Operations so as to present a fair clear and accurate record of all its activities expenditures andreceipts.25.2 Based on generally accepted and recognised accounting principles and modern petroleum industry practices record books accounts andaccounting procedures in respect of Petroleum Operations shall be maintained on behalf of the Contractor by the Operator at its business officein India in accordance with the Accounting Procedure to this Contract.25.3 The Contractor shall submit to the Government regular Statements and reports relating to Petroleum Operations as provided in AppendixC.25.4.1 The annual audit of accounts shall be carried out on behalf of the Contractor by a qualified independent firm of recognised charteredaccountants registered in India.25.4.2 The appointment of auditor and the scope of audit should have prior approval of the Management Committee.25.4.3 The Contractor shall submit the audited accounts to the Management Committee for approval within sixty 60 days from the end of the Year.The Management Committee shall consider and approve the auditors report within thirty 30 days after the submission of such report.25.4.4 Copy of the auditors report shall be submitted to the Government within thirty 30 days after the approval of the Management Committee.25.5 The Government shall have the right to audit the accounting records of the Contractor in respect of Petroleum Operations as provided in theAccounting Procedure.25.6 The accounting and auditing provisions and procedures specified in this Contract are without prejudice to any other requirements imposed byany statute in India including without limitation any specific requirements of the statutes relating to taxation of Companies.25.7 For the purpose of any audit referred to in Articles 25.5 the Contractor shall make available in original to the auditor all such books recordsaccounts and other documents and information as may be reasonably required by the auditor during normal business hours.69 ARTICLE 26INFORMATION DATA CONFIDENTIALITYINSPECTION AND SECURITY26.1 The Contractor shall promptly after they become available in India provide the Government free of cost with all data obtained as a result

of Petroleum Operations under the Contract including but not limited to geological geophysical geochemical petrophysical engineering Welllogs maps magnetic tapes cores cuttings and production data as well as all interpretative and derivative data including reports analyses interpretations and evaluation prepared in respect of Petroleum Operations hereinafter referred to as Data. Data shall be the property of the Government provided however that the Contractor shall have the right to make use of such Data free of cost for the purpose of Petroleum Operations under this Contract as provided herein.

26.2 The Contractor may for use in Petroleum Operations retain copies or samples of material or information constituting the Data and with the approval of the Government original material except that where such material is capable of reproduction and copies have been supplied to the Government the Contractor may subject to the right of inspection by the Government export subject to any applicable regulations samples or other original Data for processing or laboratory examination or analysis provided that representative samples equivalent in quality size and quantity or where such material is capable of reproduction copies of equivalent quality have first been delivered to the Government.

26.3 The Contractor shall keep the Government currently advised of all developments taking place during the course of Petroleum Operations and shall furnish the Government with full and accurate information and progress reports relating to Petroleum Operations on a daily Monthly Yearly or other periodic basis as Government may reasonably require provided that this obligation shall not extend to proprietary technology. The Contractor shall meet with the Government at a mutually convenient location in India to present the results of all geological and geophysical work carried out as well as the results of all engineering and drilling operations as soon as such Data becomes available to the Contractor.

26.4 All Data information and reports obtained or prepared by for or on behalf of the Contractor pursuant to this Contract shall be treated as confidential and subject to the provisions herein below the Parties shall not disclose the thereof to any third party without the consent in writing of the other Parties.

26.5 The obligation specified in Article 26.4 shall not operate so as to prevent disclosure

70 a to Affiliates contractors or Subcontractors for the purpose of Petroleum Operations; b to employees professional

consultants advisers data processing centres and laboratories where required for the performance of functions in connection with Petroleum Operations for any Party comprising the Contractor; c to banks or other financial institutions in connection with Petroleum Operations; d to bonafide intending assignees or transferees of a Participating Interest of a Party comprising the Contractor or in connection with a sale of the stock or shares of a Party comprising the Contractor; e to the extent required by any applicable law or in connection with any legal proceedings or by the regulations of any stock exchange upon which the shares of a Party comprising the Contractor are quoted; f to Government departments for or in connection with the preparation by or on behalf of the Government of statistical reports with respect to Petroleum Operations or in connection with the administration of this Contract or any relevant law or for any purpose connected with Petroleum Operations; and g by a Party with respect to any Data or information which without disclosure by such Party is generally known to the public.

26.6 Any Data information or reports disclosed by the Parties comprising the Contractor to any other person pursuant to Article 26.5 a to d shall be disclosed on the terms that such Data information or reports shall be treated as confidential by the recipient. Prompt notice of disclosures made by Companies pursuant to Article 26.5 shall be given to the Government.

26.7 Any Data information and reports relating to the Contract Area which in the opinion of the Government might have significance in connection with offers by the Government of acreages may be disclosed by the Government for such purpose. Government may also disclose such Data or information for any exploration programme to be conducted by a third party in adjoining areas with the consent of the Contractor for better understanding of regional geological setup and such consent by the Contractor shall not be unreasonably withheld.

26.8 Where an area ceases to be part of the Contract Area the Contractor shall hand over all the originals and copies of the Data and information with respect to that part to the Government within a period of one 1 year from the date of relinquishment or surrender. The Contractor shall however be allowed to retain one copy of the Data in its possession for its own use where required and shall not use the Data for sale or any other purposes. Subject to the provisions of this Article the Contractor shall keep all

Data information confidential.71 26.9 The Government shall at all reasonable times through duly authorised representatives be entitled to observe Petroleum Operations and to inspect all assets books records reports accounts contracts samples and Data kept by the Contractor or the Operator in respect of Petroleum Operations in the Contract Area provided however that the Contractor shall not be required to disclose any proprietary technology. The duly authorised representatives shall be given reasonable assistance by the Contractor for such functions and the Contractor shall afford such representatives reasonable use of all facilities and privileges afforded to its own personnel in the field including the use of office space and housing for a period not exceeding 30 mandays in a Year and thereafter at the cost of Government. The said representatives shall be entitled to make a reasonable number of surveys measurements drawings tests and copies of documents take samples and make reasonable use of the equipment and instruments of the Contractor provided that such functions shall not unduly interfere with the Contractor's Petroleum Operations.26.10 The Contractor shall give reasonable advance notice to the Government or to any other authority designated by the Government for such purpose of its programme of conducting surveys by aircraft or by ships indicating inter alia the name of the survey to be conducted approximate extent of the area to be covered the duration of the survey the commencement date and the name of the airport or port from which the survey aircraft or ship will commence its voyage.26.11 The Government or the authority designated by the Government for such purpose shall have the right to inspect any aircraft or ship used by the Contractor or a Subcontractor carrying out any survey or other operations in the Contract Area and shall have the right to put on board such aircraft or ship Government officers in such number as may reasonably be necessary to ensure compliance by the Contractor or the Subcontractor with the security requirements of India.72 ARTICLE 27 TITLE TO PETROLEUM DATA AND ASSETS27.1 The Government is the sole owner of Petroleum underlying the Contract Area and shall remain the sole owner of Petroleum produced pursuant to the provisions of this Contract except as regards that part of Crude Oil Condensate or Gas the title whereof has passed to the Contractor or any other person in accordance with the provisions of this Contract.27.2 Title to

Petroleum to which the Contractor is entitled under this Contract and title to Petroleum sold by the Companies shall pass to the relevant buyer party at the Delivery Point. The Contractor shall be responsible for all costs and risks prior to and including at the Delivery Point and each buyer party shall be responsible for all costs and risks associated with such buyer party's share after the Delivery Point.

27.3 Title to all Data specified in Article 26 shall be vested in the Government and the Contractor shall have the right to use thereof as therein provided.

27.4 Assets purchased by the Contractor for use in Petroleum Operations shall be owned by the Parties comprising the Contractor in proportion to their Participating Interest provided that the Government shall have the right to require vesting of full title and ownership in it free of charge and encumbrances of any or all assets whether fixed or movable acquired and owned by the Contractor for use in Petroleum Operations inside or outside the Contract Area such right to be exercisable at the Government's option upon expiry or earlier termination of the Contract.

27.5 The Contractor shall be responsible for proper maintenance insurance and safety of all assets acquired for Petroleum Operations and for keeping them in good repair order and working condition at all times and the costs thereof shall be recoverable as Contract Costs in accordance with Appendix C.

27.6 So long as this Contract remains in force subject to Article 27.5 the Contractor shall free of any charge for the purpose of carrying out Petroleum Operations hereunder have the exclusive use of assets which have become the property of Government.

27.7 Equipment and assets no longer required for Petroleum Operations during the term of the Contract shall be sold exchanged or otherwise disposed of by the Contractor provided however that the proceeds of sale shall be credited to Petroleum Operations as provided in Appendix C provided that prior written consent of the Management Committee shall be obtained for each transaction in excess of US 50000 Fifty thousand United States Dollars or such other value as may be agreed from time to time by the Management Committee. The consent of the Management Committee shall not be unreasonably withheld.

73 ARTICLE 28 ASSIGNMENT OF PARTICIPATING INTEREST

28.1 Subject to the terms of this Article and other terms of this Contract any Party comprising the Contractor may assign or transfer a part or all of its Participating Interest

with the prior written consent of the Government which consent shall not be unreasonably withheld provided that the Government is satisfied that the prospective assignee or transferee is of good standing has the capacity and ability to meet its obligations hereunder and is willing to provide an unconditional undertaking to the Government to assume its Participating Interest share of obligations and to provide guarantees in respect thereof as provided in the Contract; b the prospective assignee or transferee is not a company incorporated in a country with which the Government for policy reasons has restricted trade or business; c the prospective assignor or transferor and assignee or transferee respectively are willing to comply with any reasonable conditions of the Government as may be necessary in the circumstances with a view to ensuring performance under the Contract; and d the assignment or transfer will not adversely affect the performance or obligations under this Contract or be contrary to the interests of India.

28.1.1 Subject to Article 28.7 nothing in this Article 28 shall prevent a Party comprising the Contractor from assigning or transferring a part or all of its Participating Interest to an Affiliate with the approval of the Management Committee provided that; a the assignee provides an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for the amount specified in Article 29.2 in a form provided at Appendix G; b the assignee provides a parent financial and performance guarantee issued by the guarantor which furnished the guarantee pursuant to Article 29 in respect of the assignor Party's obligations under this Contract in favour of the Government of the performance of such Affiliate assignee of its obligations under this Contract; c the prospective Affiliate is not a company incorporated in a country with which the Government for policy reason has restricted trade or business; and d the assignment will not adversely affect the performance or obligations under this Contract or be contrary to the interest of India.

74 28.2 In case of any change in the status of a Company or its shareholding resulting in a change in a the control of the Company; or b its relationship with the companies providing the guarantee under Article 29.1 a and 29.1 b; the Company shall seek the consent of the Government for assigning the Participating Interest under the changed circumstances and the provisions of this

Article 28 shall apply mutatis mutandis to be obtaining of such consent. For the purpose of this Article 28.2 control has the same meaning as in Article 1.3.28.3 An application for consent to assign or transfer shall be accompanied by all relevant information concerning the proposed assignment or transfer including detailed information on the proposed assignee or transferee and its shareholding and corporate structure as was earlier required from the Companies constituting the Contractor the terms of the proposed assignment or transfer and the unconditional undertaking referred to in Article 28.4 The applicant shall also submit such information relating to the prospective assignee or transferee of the assignment or transfer as the Government may reasonably require to enable proper consideration and disposal of the application.28.5 No assignment or transfer shall be effective until the approval of the Government is received or deemed to have been received. Approval may be given by the Government on such terms and conditions as it may deem fit. Provided that such terms and conditions may not increase the obligations of the Parties comprising the Contractor. Upon assignment or transfer of its interest in this Contract the assignor or transferor shall be released and discharged from its obligations hereunder only to the extent that such obligations are assumed by the assignee or transferee with the approval of the Government.28.6 In the event that the Government does not give its consent or does not respond to a request for assignment or transfer by a Party comprising the Contractor within one hundred and twenty 120 days of such request and receipt of all information referred to in Article 28.3 above consent shall be deemed to have been given by the Government.28.7 An assignment or transfer shall not be made where the Participating Interest to be retained by the proposed assignor or the percentage interest of assignee shall be less than ten per cent 10 of the total Participating Interest of all the constituents of the Contractor except where the Government on the recommendations of the Management Committee may in special circumstances so permit.75 28.8 Nothing contained in this Article 28 shall prevent a Party comprising the Contractor from mortgaging pledging charging or otherwise encumbering at its own risk and cost all or part of its Participating Interest for the purposes of security relating to finance to the extent required for performing its obligation under the Contract

provided thati such Party shall remain solely liable for all its obligations relating to its Participating Interest to the exclusion of the other participants thereto;ii the encumbrance shall be expressly subordinated to the rights of the other Parties under this Contract. The obligations occurring from the saidencumbrance shall be the sole responsibility of the original Party and shall in no manner compromise the rights of other Parties to theContract;iii such Party has given reasonable notice of such encumbrance and furnishes to all other Parties including for the avoidance of doubt theGovernment a certified copy of the executed instruments evidencing the encumbrances;iv keeping in view the national interest of India prior consent of the Government shall be required which consent shall not be unreasonablywithheld of the list of potential lenders with whom such Party can consider hypothecation; v the Party creating the charge shall ensure that such charge shall not in any way affect the interest of other Parties or result in interference withjoint operations. In the event of any claims or liabilities imposed on other Parties because of the creation of such charges the Party havingcreated charge on its Participating Interest shall indemnify the other Parties; and vi in case of foreclosure or default by a borrowing Party the mortgagee shall not be deemed to have acquired a right to carry on either by itself orthrough an agent the Petroleum Operation without the written consent of the Government of India.28.8.1 The Parties acknowledge that to obtain financing a Party Borrower will be required to secure for a permitted chargee the right to receive acopy of any notice served on the Borrower and the Parties agree that they shall serve a copy of any such notice on any such permitted chargeein accordance with the provisions of Article 37 at the same time as such notice is served on the Borrower. For the purposes of Article 37 theaddress for service of notices of the permitted chargee shall be that specified in the instrument or instruments referred to in Article 28.8iii.28.8.2 In case lender elects to participate directly or through a company other than the Borrower under the financing arrangement referred to abovethe same shall be subject to the rights of Government as contained in Article 28.1 of Contract and the preemptive rights of the Parties as maybe contained in Operating Agreement. Any Party which wishes to exercise the said preemptive rights will explicitly assume the obligation onthe same terms

and conditions as the Borrower.⁷⁶ ARTICLE 29 GUARANTEES

29.2 The amount of the guarantee referred to in Article 29.1 a above shall be an amount equal to thirty five percent 35 of the Company's Participating Interest share of the total estimated annual expenditure in respect of the Minimum Work Programme to be undertaken by the Contractor in the Contract Area during the relevant Year of a Phase subject to Article 29.3.

29.3 The guarantee referred to in Article 29.2 shall provide that; a at the end of each Year it shall be automatically renewed for an amount equal to a Company's Participating Interest share of thirty five percent 35 of the total estimated expenditure in respect of the Minimum Work Programme to be undertaken for the following Year of an Exploration Phase unless the Contractor has terminated the Contract in accordance with the terms thereof. The guarantee shall be renewed at the end of each Year positively thirty 30 days before the expiry of the guarantee period.⁷⁷ b after the completion and due performance of the Minimum Work Programme of a particular Exploration Phase the guarantee will be released in favour of the Company on presentation to the bank of a certificate from the Government that the obligation

of the Contractor has been fulfilled and the guarantee may be released subject to Article 29.4.29.4 If the Contractor elects to proceed to the second and third Exploration Phase respectively of the Exploration Period a bank guarantee for the succeeding Exploration Phase in terms of Articles 29.1 a 29.2 and 29.3 shall be delivered to the Government with the notice of such election and if such guarantee is not so delivered the provisions of Article 29.5 shall apply.29.5 If any of the documents referred to in Article 29.1 is not delivered within the period specified herein this Contract may be terminated by the Government upon ninety 90 days written notice of its intention to do so.29.6 Subject to Article 29.7 notwithstanding any change in the composition or shareholding of the parent company furnishing a performance guarantee as provided herein it shall not under any circumstances be absolved of its obligations contained in the guarantees provided pursuant to Article 29.1b.29.7 If a Party Assignor assigns all or a part of its Participating Interest to a third party Assignee in accordance with Article 28;b the Assignee provides an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for an amount equal to the assignee's Participating Interest share of the estimated expenditure of the Minimum Work Programme of the Exploration Phase current at the Effective Date of the assignment;c the Assignee provides performance guarantee and legal opinion in terms of this Article; and d the addendum to the Contract giving effect to the assignment of Participating Interest is executed by all Parties; then the Government shall release the guarantee given by the assignor under Article 29.1 a to the extent of the amount of the guarantee provided by the assignee and where relevant the guarantee under Article 29.1 b.78 ARTICLE 30 TERM AND TERMINATION OF THE CONTRACT30.1 The term of this Contract shall be for the period of the License and any Lease granted thereunder unless the Contract is terminated earlier in accordance with its terms and shall be deemed to have been terminated if for any reason the Contractor ceases to hold such License or Lease.30.2 Subject to the provision of Articles 5 14 and 30.6 and without prejudice to the provisions of Article 30.7 or any other provisions of this Contract the Contractor shall have the right to terminate this Contract with respect to any part of the Contract Area other than a Development Area then

producing or that prior thereto had produced Petroleum upon giving ninety 90 days written notice of its intention to do so; andb with respect to any Development Area in which Petroleum is being produced or that prior thereto had produced Petroleum upon giving atleast one hundred and eighty 180 days written notice of its intention to do so.30.3 This Contract may subject to the provisions herein below and Article 31 be terminated by the Government upon giving ninety 90 days writtennotice with reasons to the other Parties of its intention to do so in the following circumstances namely that the Contractor or a Party comprisingthe Contractor the Defaulting Partya has knowingly submitted any false statement to the Government in any manner which was a material consideration in the execution of thisContract; orb has intentionally and knowingly extracted or authorised the extraction of hydrocarbon not authorized to be extracted by the Contract orwithout the authority of the Government except such extractions as may be unavoidable as a result of operations conducted hereunder inaccordance with generally accepted modern oilfield and petroleum industry practices which when so extracted were immediately notified tothe Government orc is adjudged bankrupt by a competent court or enters into or scheme of composition with its creditors or takes advantage of any law for thebenefit of debtors; ord has passed a resolution to apply to a competent court for liquidation of the Company unless the liquidation is for the purpose of amalgamationor reconstruction of which the Government has been given notice and the79 Government is satisfied that the Companys performance under this Contract would not be adversely affected thereby and has given itsapproval thereto; ore has assigned any interest in the Contract without the prior consent of the Government as provided in Article 28; orf has failed to make any monetary payment required by law or under this Contract by the due date or within such further period after the duedate as may thereafter be specified by the Government; org has failed to comply with or has contravened the provisions of this Contract in a material particular; orh has failed to comply with any final determination or award made by a sole expert or arbitrators subject to Article 33; ori has failed to carry out or observe any of the terms and conditions of the License or Lease or the provisions of the Acts or Rules in forcethereunder subject however to Article 31.j on notice of termination as provided

in Article 29.5. PROVIDED THAT where the Contractor comprises two or more Parties the Government shall not exercise its rights of termination pursuant to Article 30.3 on the occurrence in relation to one or more but not all of the Parties comprising the Contractor of an event entitling the Government to terminate the Contract if any other Party or Parties constituting the Contractor the non Defaulting Party or Parties satisfies the Government that it or they is/are willing and would be able to carry out the obligations of the Contractor. b where the non Defaulting Party or Parties with the consent of the Government has/have acquired the Participating Interest of the Defaulting Party pursuant to the provisions of the Operating Agreement and has/have procured and delivered to the Government a guarantee or guarantees as referred to in Article 29.1 in respect of the Participating Interest of the Defaulting Party acquired by the non Defaulting Party or Parties. 30.4 This Contract may also be terminated by the Government on giving the requisite notice specified above if the events specified in Article 30.3 c and d occur with respect to a company which has given a performance guarantee pursuant to Article 29 subject however to Article 30.5. 30.5 If the circumstance or circumstances that give rise to the right of termination under Article 30.3 f or g or i or Article 30.4 are remedied whether by the Defaulting Company or by another Party or Parties in its behalf within the ninety 90 day period or such extended period as may be granted by the Government following the notice of the Government's intention to terminate the Contract as aforesaid such termination shall not become effective. 80 30.6 On termination of this Contract for any reason whatsoever the rights and obligations of the Contractor shall cease but such termination shall not affect any rights of any Party which may have accrued or any obligations undertaken or incurred including obligations under Article 5.7 by the Contractor or any Party comprising the Contractor and not discharged prior to the date of termination. 30.7 In the event of termination pursuant to Articles 30.2 30.3 or 30.4 a the Government may require the Contractor for a period not exceeding one eighty 180 days from the date of termination to continue for the account and at the cost of the Government Crude Oil or Natural Gas production activities until the right to continue such production has been transferred to another entity; b a Foreign Company which is a constituent of the

Contractor shall have to remove and export all its property subject to Article 27 and the provisions hereof provided that in the event that ownership of any property is in doubt or disputed such property shall not be exported unless and until the doubt or dispute has been settled in favour of the Foreign Company.

30.8 Within ninety 90 days after the termination of this Contract pursuant to Article 30.2 30.3 or 30.4 or such longer period as the Government may agree the Contractor shall comply with Article 14.9 and any reasonably necessary action as directed by the Government to avoid Environmental Damage or hazards to human life or to the property of others.

81 ARTICLE 31 FORCE MAJEURE

31.1 Any nonperformance or delay in performance by any Party hereto of any of its obligations under this Contract or in fulfilling any condition of any License or Lease granted to such Party or in meeting any requirement of the Act the Rules or any License or Lease shall except for the payment of monies due under this Contract or under the Act and the Rules or any law be excused if and to the extent that such nonperformance or delay in performance under this Contract is caused by Force Majeure as defined in this Article.

31.2 For the purpose of this Contract the term Force Majeure means any cause or event other than the unavailability of funds whether similar to or different from those enumerated herein lying beyond the reasonable control of and unanticipated or unforeseeable by and not brought about at the instance of the Party claiming to be affected by such event or which if anticipated or foreseeable could not be avoided or provided for and which has caused the nonperformance or delay in performance. Without limitation to the generality of the foregoing the term Force Majeure shall include natural phenomena or calamities earthquakes typhoons fires wars declared or undeclared hostilities invasions blockades riots strikes insurrection and civil disturbances but shall not include the unavailability of funds.

31.3 Where a Party is claiming suspension of its obligations on account of Force Majeure it shall promptly but in no case later than seven 7 days after the occurrence of the event of Force Majeure notify the Management Committee in writing giving full particulars of the Force Majeure the estimated duration thereof the obligations affected and the reasons for its suspension.

31.4 A Party claiming Force Majeure shall exercise reasonable diligence to seek to overcome the Force Majeure event and to mitigate the

effectsthereof on the performance of its obligations under this Contract. The Party affected shall promptly notify the Management Committee as soon asthe Force Majeure event has been removed and no longer prevents it from complying with the obligations which have been suspended and shallthereafter resume compliance with such obligations as soon as possible.31.5 The Party asserting the claim of Force Majeure shall have the burden of proving that the circumstances constitute valid grounds of Force Majeureunder this Article and that such Party has exercised reasonable diligence and efforts to remedy the cause of any alleged Force Majeure.82 31.6 Where a Party is prevented from exercising any rights or performing any obligations under this Contract due to Force Majeure the time for theperformance of the obligations affected thereby and for performance of any obligation or the exercise of any right dependent thereon and theterm of any Exploration Phase of the Exploration Period or this Contract may be extended to the extent of Force Majeure period or by suchperiod as may be agreed by the Management Committee.31.7 Notwithstanding anything contained herein above if an event of Force Majeure occurs and is likely to continue for a period in excess of thirty30 days the Parties shall meet to discuss the consequences of the Force Majeure and the course of action to be taken to mitigate the effectsthereof or to be adopted in the circumstances.83

ARTICLE 32APPLICABLE LAW AND LANGUAGE OF THE CONTRACT

32.1 This Contract shall be governed and interpreted in accordance with the laws of India.32.2 Nothing in this Contract shall entitle the Contractor to exercise the rights privileges and powers conferred upon it by this Contract in a mannerwhich will contravene the laws of India.32.3 The English language shall be the language of this Contract and shall be used in arbitral proceedings. All communications hearing or visualmaterials or documents relating to this Contract shall be written or prepared in English.32.4 The laws will also include amendments revisions modifications etc.84

ARTICLE 33SOLE EXPERT CONCILIATION AND ARBITRATION

33.1 The Parties shall use their best efforts to settle amicably all disputes differences or claims arising out of or in connection with any of the termsand conditions of this Contract or concerning the interpretation or performance thereof.33.2 Matters which by the terms of this Contract the Parties have agreed to

refer to a sole expert and any other matter which the Parties may agree to so refer may be referred to a sole expert who shall be an independent and impartial person of international standing with relevant qualifications and experience appointed by agreement between the Parties and who shall not by virtue of nationality personal connection or commercial interest have a conflict between his own interest and his duty as a sole expert. In the event that the Parties fail or are unable to agree on a sole expert within thirty 30 days or such longer period as may be mutually agreed by Parties the sole expert shall be appointed by a body or an institution or an agency or a person mutually agreed by Parties. In case there is no agreement on the body or an institution or an agency or a person for appointing sole expert or such institution or agency or body fails to appoint a sole expert within thirty 30 days or such longer period as may be mutually agreed by Parties the matter shall be referred to arbitration. Any sole expert appointed shall be acting as an expert and not as an arbitrator and the decision of the sole expert on matters referred to him shall be final and binding on the Parties and shall not be subject to arbitration.

33.3 Subject to the provisions of this Contract the Parties hereby agree that any controversy difference disagreement or claim for damages compensation or otherwise hereinafter in this Clause referred to as a dispute arising between the Parties which cannot be settled amicably within ninety 90 days after the dispute arises may except for those referred to in Article 33.2 which may be referred to a sole expert be submitted to conciliation or an arbitral tribunal for final decision as hereinafter provided.

33.4 The arbitral tribunal shall consist of three arbitrators. Each Party to the dispute shall appoint one arbitrator and the Party or Parties shall so advise the other Parties. The two arbitrators appointed by the Parties shall appoint the third arbitrator.

33.5 Any Party may after appointing an arbitrator request the other Parties in writing to appoint the second arbitrator. If such other Party fails to appoint an arbitrator within thirty 30 days of receipt of the written request to do so such arbitrator may at the request of the first Party be appointed in accordance with Arbitration and Conciliation Act 1996.⁸⁵

33.6 If the two arbitrators appointed by or on behalf of the Parties fail to agree on the appointment of the third arbitrator within thirty 30 days of the appointment of the second arbitrator and if the Parties do not otherwise agree at

the request of either Party the third arbitrator shall be appointed in accordance with Arbitration and Conciliation Act 1996.33.7 If any of the arbitrators fails or is unable to act his successor shall be appointed by the Party or person who originally appointed such in the manner set out in this Article as if he was the first appointment.33.8 The decision of the arbitral tribunal shall be pronounced within four 4 months unless otherwise extended by the Parties and in case of difference among the arbitrators the decision of the majority shall be final and binding on the Parties.33.9 The arbitration agreement contained in this Article 33 shall be governed by the Arbitration and Conciliation Act 1996 Arbitration Act. Arbitration proceedings shall be conducted in accordance with the rules for arbitration provided in Arbitration Act.33.10 The right to arbitrate disputes under this Contract shall survive expiry or the termination of this Contract.33.11 Prior to submitting a dispute to arbitration the Parties may by mutual agreement submit the matter for conciliation in accordance with Part III of the Arbitration and Conciliation Act 1996. No arbitration proceedings shall be instituted while conciliation proceedings are pending provided that a Party may initiate arbitration proceedings in the event that dispute has not been resolved by conciliation within sixty 60 days of the date of agreement by the Parties to submit such dispute to conciliation.33.12 The venue of the sole expert conciliation or arbitration proceedings pursuant to this Article unless the Parties agree otherwise shall be New Delhi India and shall be conducted in the English language. Insofar as practicable the Parties shall continue to implement the terms of this Contract notwithstanding the initiation of proceedings before a sole expert conciliator or arbitral tribunal and any pending claim or dispute.33.13 The fees and expenses of a sole expert or conciliator appointed by the Parties shall be borne equally by the Parties. The cost and expenses of arbitrator appointed by a Party in accordance with the provision of this Article shall be borne by the respective Party and the cost and expenses of third arbitrator and other incidental expenditure in relation to arbitration and liability thereof shall be at the discretion of the arbitrators.33.14 Notwithstanding anything contrary contained herein above in the event of dispute among Government Companies and with the Government such disputes shall be settled in accordance with guidelines issued on the subject by Government from time to time.86 ARTICLE

34CHANGE OF STATUS OF COMPANIES34.1 The Parties comprising the Contractor shall notify the Government of any change in the management or control of a Companies or therelationship with any guarantor of the Companies.87 ENTIRE AGREEMENT AMENDMENTS WAIVER AND MISCELLANEOUSARTICLE 3535.1 This Contract supersedes and replaces any previous agreement or understanding between the Parties whether oral or written on the subjectmatter hereof prior to the execution date of this Contract.35.2 This Contract shall not be amended modified varied or supplemented in any respect except by an instrument in writing signed by all the Partieswhich shall state the date upon which the amendment or modification shall become effective.35.3 No waiver by any Party of any one or more obligations or defaults by any other Party in the performance of this Contract shall operate or beconstrued as a waiver of any other obligations or defaults whether of a like or of a different character.35.4 The provisions of this Contract shall inure to the benefit of and be binding upon the Parties and their permitted assigns and successors in interest.35.5 In the event of any conflict between any provisions in the main body of this Contract and any provision in the Appendices the provision in themain body shall prevail.35.6 The headings of this Contract are for convenience of reference only and shall not be taken into account in interpreting the terms of this Contract.35.7 Reference to any law or regulation having the force of law includes a reference to that law or regulation as from time to time may be amendedextended or reenacted.35.8 A reference in this Contract to the word including shall also mean including but not limited to.88 ARTICLE 36CERTIFICATES36.1 A Company shall furnish prior to execution of this Contract a duly authorised copy of a resolution properly and legally passed by the Board ofDirectors of the Company authorising its President or any VicePresident or any other representative to execute this Contract along with acertificate duly signed by the Secretary or an Assistant Secretary of the Company under its seal in this regard and to the effect that the Companyhas the power and authority to enter into this Contract and to perform its obligations thereunder and has taken all necessary action to authorise theexecution delivery and performance of the Contract.89 37.1 All notices statements and other communications to be given submitted or made hereunder by any

Party to another shall be sufficiently given if given in writing in English language and sent by registered post postage paid or by telegram telex facsimile radio or cable to the address or addresses of the other Party or Parties as follows

1GENERAL PROVISIONS1.1 Purpose Generally the purpose of this Accounting Procedure is to set out principles and procedures of accounting which will enable the Government of India to monitor effectively the Contractors costs expenditures production and income so that the Governments entitlement to Profit Petroleumcan be accurately determined pursuant to the terms of the Contract. More specifically the purpose of the Accounting Procedure is to classify costs and expenditures and to define which costs and expenditures shall be allowable for cost recovery and profit sharing and participation purposes; specify the manner in which the Contractors accounts shall be prepared and approved; and address numerous other accounting related matters. This Accounting Procedure is intended to apply to the provisions of the Contract and is without prejudice to the computation of income taxunder applicable provisions of the IncomeTax Act 1961 as amended.1.2 Definitions For purposes of this Accounting Procedure the terms used herein which are defined in the Contract shall have the same meaning when used inthis Accounting Procedure.1.3 Inconsistency In the event of any inconsistency or conflict between the provisions of this Accounting Procedure and the other provisions of the Contract theother provisions of the Contract shall prevail.1.4 Documentation and Statements to be submitted by the Contractor1.4.1 Within ninety 90 days of the Effective Date of the Contract the Contractor shall submit to and discuss with the Government a proposed outlineof charts of accounts operating records and reports which outline shall reflect each of the99 categories

and subcategories of costs and income specified in Sections 2 and 3 and shall be in accordance with generally accepted standards and recognized accounting systems and consistent with normal petroleum industry practice and procedures for joint venture operations. Within ninety 90 days of receiving the above submission the Government shall either provide written notification of its approval of the proposal or request in writing revisions to the proposal. Within one hundred and eighty 180 days from the Effective Date of the Contract the Contractor and the Government shall agree on the outline of charts of accounts records and reports which shall also describe the basis of the accounting system and procedures to be developed and used under this Contract. Following such agreement the Contractor shall expeditiously prepare and provide the Government with formal copies of the comprehensive charts of accounts records and reports and allow the Government to examine the manuals and to review procedures which are and shall be observed under the Contract.

1.4.2 Notwithstanding the generality of the foregoing the Contractor shall make regular Statements relating to the Petroleum Operations as follows:

- i Production Statement see Section 5 of this Accounting Procedure.
- ii Value of Production and Pricing Statement see Section 6 of this Accounting Procedure.
- iii Statement of Costs Expenditures and Receipts see Section 7 of this Accounting Procedure.
- iv Cost Recovery Statement see Section 8 of this Accounting Procedure.
- v Profit Sharing Statement see Section 9 of this Accounting Procedure.
- vi Local Procurement Statement see Section 10 of this Accounting Procedure.
- vii End of Year Statement see Section 11 of this Accounting Procedure.
- viii Budget Statement see Section 12 of this Accounting Procedure.

1.4.3 All reports and Statements shall be prepared in accordance with the Contract and the laws of India and where there are no relevant provisions in either of these in accordance with generally accepted practices in the international petroleum industry.

1.4.4 Each of the entities constituting the Contractor shall be responsible for maintaining its own accounting records in order to comply with all legal requirements and to support all returns or any other accounting reports required by any Government authority in relation to the Petroleum Operations. However for the purposes of giving effect to this Accounting Procedure the Party constituting the Contractor who is the Operator shall be

responsible for maintaining at its business office in India on behalf of the Contractor all the 100 accounts of the Petroleum Operations in accordance with the provisions of the Accounting Procedure and the Contract.

1.5 Language and Units of Account All accounts records books reports and Statements shall be maintained and prepared in the English language using mercantile basis of accounting. The accounts shall be maintained in United States Dollars which shall be the controlling currency of account for cost recovery and profit sharing purposes. Metric units and Barrels shall be employed for measurements required under the Contract. Where necessary for clarification the Contractor may also maintain accounts and records in other languages currencies and units.

1.6 Currency Exchange Rates

1.6.1 For conversion purposes between United States Dollars and Indian Rupees or any other currency the monthly average of the daily mean of the buying and selling rates of exchange as quoted by the State Bank of India or any other financial body as may be mutually agreed by the Parties for the Month in which the revenues costs expenditures receipts or income are recorded shall be used. However in the case of any single non-US Dollar transaction in excess of the equivalent of fifty thousand 50000 US Dollars the conversion into US Dollars shall be performed on the basis of the average of the applicable exchange rates for the day on which the transaction occurred.

1.6.2 Any realized or unrealized gains or losses from the exchange of currency in respect of Petroleum Operations shall be credited or charged to the accounts. A record of the exchange rates used in converting Indian Rupees or any other currencies into United States Dollars as specified in Section 1.6.1 shall be maintained by the Contractor and shall be identified in the relevant Statements required to be submitted by the Contractor in accordance with Section 1.4.2.

1.7 Payments

1.7.1 Subject to Article 20.3 of the Contract and the foreign exchange laws and regulations prevailing from time to time all payments between the Parties shall unless otherwise agreed be in United States Dollars and shall be made through a bank designated by each receiving Party.

1.7.2 Unless otherwise specified all sums due under the Contract shall be paid within forty five 45 days from the date on which the obligation to pay was incurred.

1.7.3 All sums due by one Party to the other under the Contract during any Month shall for each day such sums are overdue during

such Month bear interest compounded daily at the applicable LIBOR plus two percentage points.¹⁰¹

1.8 Arms Length Transactions Unless otherwise specifically provided for in the Contract all transactions giving rise to revenues costs or expenditures which will be credited or charged to the accounts prepared maintained or submitted hereunder shall be conducted at arms length or on such a basis as will assure that all such revenues costs or expenditures will not be lower or higher as the case may be than would result from a transaction conducted at arms length on a competitive basis with third parties.

1.9 Audit and Inspection Rights of the Government

1.9.1 Without prejudice to statutory rights the Government upon at least twenty (20) Business Days advance written notice to the Contractor shall have the right to inspect and audit during normal business hours all records and documents supporting costs expenditures expenses receipts and income such as the Contractor's accounts books records invoices cash vouchers debit notes price lists or similar documentation with respect to the Petroleum Operations conducted hereunder in each Year within two (2) years or such longer period as may be required in exceptional circumstances from the end of such Year.

1.9.2 The Government may undertake the conduct of the audit either through its own representatives or through a qualified firm of recognised chartered accountants registered in India or a reputed consulting firm appointed for the purpose by the Government and the costs of audit in case of Government auditors shall be borne by the Government where as for outside auditors this shall be borne by the Contractor as a General and Administrative Cost.

1.9.3 In conducting the audit the Government or its auditors shall be entitled to examine and verify at reasonable times all charges and credits relating to the Contractor's activities under the Contract and all books of account accounting entries material records and inventories vouchers payrolls invoices and any other documents correspondence and records considered necessary by the Government to audit and verify the charges and credits. The auditors shall also have the right in connection with such audit to visit and inspect at reasonable times all sites plants facilities warehouses and offices of the Contractor directly or indirectly serving the Petroleum Operations and to physically examine other property facilities and stocks used in Petroleum Operations wherever located and to question

personnel associated with those operations. Where the Government requires verification of charges made by an Affiliate the Government shall have the right to obtain an audit certificate from an internationally recognized firm of public accountants acceptable to both the Government and the Contractor which may be the Contractor's statutory auditor. Submission of the audit certificate shall in no way relieve or diminish the responsibility of the Contractor for the compliance with the obligations under the Contract.

1.9.4 Any audit exceptions shall be made by the Government in writing and notified to the Contractor within one hundred and twenty (120) days following completion of the audit in question.

1.9.5 The Contractor shall answer any notice of exception under Section 1.9.4 within one hundred and twenty (120) days of the receipt of such notice. Where the Contractor has after the said one hundred and twenty (120) days failed to answer a notice of exception the exception shall prevail and be deemed to have been agreed to by the Contractor.

1.9.6 All agreed adjustments resulting from an audit and all adjustments required by prevailing exceptions under Section 1.9.5 shall be promptly made in the Contractor's accounts and any consequential adjustments to the Government's entitlement to Petroleum shall be made within thirty (30) days therefrom.

1.9.7 Notwithstanding any reference to a Sole Expert or Arbitration in accordance with the provisions of the Contract in case any amount is claimed as due to the Government resulting from the audit exception but not accepted or settled by the Contractor then the Contractor shall deposit such claimed amount in an escrow account to be opened with a financial institution failing mutually agreed agreement with State Bank of India within thirty (30) days from the date when the amount is disputed by the Contractor. The amount in escrow account shall be appropriated or adjusted in accordance with the decision or award of the Sole Expert or Arbitral Tribunal as may be or otherwise as mutually agreed to between the Parties.

1.9.8 If the Contractor and the Government are unable to reach final agreement on proposed audit adjustments either Party may refer any dispute thereon to a sole expert as provided for in the Contract. So long as any issues are outstanding with respect to an audit the Contractor shall maintain the relevant documents and permit inspection thereof until the issue is resolved.

1.10 Revision of the Accounting Procedure By mutual

agreement between the Government and the Contractor this Accounting Procedure may be revised from time to time in writingsigned by the Parties stating the date upon which the amendments shall become effective.¹⁰³

SECTION 2 CLASSIFICATION DEFINITION AND ALLOCATION OF COSTS AND EXPENDITURES

2.1 Segregation of Costs

Costs shall be segregated in accordance with the purposes for which such expenditures are made. All costs and expenditures allowable underSection 3 relating to Petroleum Operations shall be classified defined and allocated as set out below in this Section.

2.2 Exploration Costs

Exploration Costs are all direct and allocated indirect expenditures incurred in the search for Petroleum in an area which is or was at the timewhen such costs were incurred part of the Contract Area including expenditures incurred in respect of

2.2.1 Aerial geophysical geochemical palaeontological geological topographical and seismic surveys analysis and studies and their interpretation.

2.2.2 Core hole drilling and water Well drilling.

2.2.3 Labour materials supplies and services used in drilling Wells with the object of finding Petroleum or in drilling Appraisal Wells provided that ifsuch Wells are completed as producing Wells or injection Well for enhancing Oil recovery the costs of completion thereof shall be classified asDevelopment Costs.

2.2.4 Facilities used solely in support of the purposes described in Sections 2.2.1 2.2.2 and 2.2.3 above including access roads all separatelyidentified.

2.2.5 Any Service Costs and General and Administrative Costs directly incurred on exploration activities and identifiable as such and a portion of theremaining Service Costs and General and Administrative Costs allocated to Exploration Operations determined by the proportionate share oftotal Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Exploration Costs.

2.2.6 Geological and geophysical information purchased or acquired in connection with Exploration Operations.

2.2.7 Any other expenditures incurred in the search for Petroleum not covered under Sections 2.3 or 2.4.¹⁰⁴2.3 Development Costs Development Costs are all direct and allocated indirect expenditures incurred with respect to the development of discoveries within the ContractArea including expenditures incurred on account of 2.3.1 Geological and Geophysical information acquired in connection with Development Operations.2.3.2 Drilling Development Wells

whether these Wells are dry or producing and drilling Wells for the injection of water or Gas to enhance recovery of Petroleum.

2.3.3 Completing of Exploration Wells by way of installation of casing or equipment or otherwise or for the purpose of bringing a Well into use as a producing Well or as a Well for the injection of water or Gas to enhance recovery of Petroleum.

2.3.4 Purchase installation or construction of production transport and storage facilities for production of Petroleum such as pipelines flow lines production and treatment units wellhead equipment subsurface equipment enhanced recovery systems offshore and onshore platforms export terminals and piers harbours and related facilities and access roads for production activities.

2.3.5 Engineering and design studies for facilities referred to in Section 2.3.3.

2.3.6 Any Service Costs and General and Administrative Costs directly incurred in Development Operations and identifiable as such and a portion of the remaining Service Costs and General and Administrative Costs allocated to development activities determined by the proportionate share of total Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Development Costs.

2.4 Production Costs Production Costs are expenditures incurred on Production Operations after the start of production from the Field which are other than Exploration and Development Costs. The balance of General and Administrative Costs and Service Costs not allocated to Exploration Costs or Development Costs shall be allocated to Production Costs.

2.5 Service Costs Service Costs are direct and indirect expenditures incurred in support of Petroleum Operations in the Contract Area including expenditures on warehouses piers marine vessels vehicles motorized rolling equipment aircraft fire and security stations workshops water and sewerage plants power plants housing community and recreational facilities and furniture and tools and equipment used in these activities. Service Costs in any Year shall include the costs incurred in such Year to purchase and/or construct the said facilities as well as the annual costs of maintaining and operating the same each to be identified separately. All Service Costs shall be regularly allocated as specified in Sections 2.2.5 2.3.5 and 2.4 to Exploration Costs Development Costs and Production Costs and shall be separately shown under each of these categories. Where Service Costs are made in respect of shared facilities the basis of allocation of costs to

Petroleum Operations hereunder shall be specified.

2.6 General and Administrative Costs General and Administrative Costs are expenditures incurred on general administration and management primarily and principally related to Petroleum Operations in or in connection with the Contract Area and shall include:

2.6.1 main office field office and general administrative expenditures in India including supervisory accounting and employee relations services;

2.6.2 an annual overhead charge for services rendered by the parent company or an Affiliate to support and manage Petroleum Operations under the Contract and for staff advice and assistance including financial legal accounting and employee relations services but excluding any remuneration for services charged separately under this Accounting Procedure provided that:

i for the period from the Effective Date until the date on which the first Development Plan under the Contract is approved by the Government this annual charge shall be the Contractor's verifiable expenditure but shall in no event be greater than the following percentages of the total Contract Costs incurred during the Contract Year in or in connection with the Contract Area and qualifying for recovery pursuant to Section 3:

Contract costs in any Contract year in million US\$	Over 25	Over 5
Annual overhead charge	3%	2%

ii from the date on which the first Development Plan is approved the charge shall be at an amount or rate to be agreed on between the Parties and stated in the Development Plan.

2.6.3 All General and Administrative Costs shall be regularly allocated as specified in Sections 2.2, 2.3, 2.5 and 2.4 to Exploration Costs, Development Costs and Production Costs respectively and shall be separately shown under each of these cost categories.

106 SECTION 3 COSTS, EXPENSES, EXPENDITURES AND INCIDENTAL INCOME OF THE CONTRACTOR

3.1 Costs Recoverable and Allowable Without Further Approval of the Government: Costs incurred by the Contractor on Petroleum Operations as per reviewed or approved Work Programme and Budget by the Management Committee as the case may be pursuant to the Contract as classified under the headings referred to in Section 2 shall be allowable for the purposes of the Contract except to the extent provided in Section 3.2 or elsewhere in this Accounting Procedure and subject to audit as

referred to in Articles 25.4.1 to 25.4.4 and Article 25.5 as provided for herein. Further in case of variation in costs over the reviewed approved Work Programme and Budget as the case may be or reappropriation of costs shall be submitted to the Management Committee for review approval as the case may be within thirty 30 days from end of the relevant Financial Year and subject to the audit and other provisions of the Contract such costs shall be allowable for the purposes of the Contract.

3.1.1 Surface Rights All direct costs necessary for the acquisition renewal or relinquishment of surface rights acquired and maintained in force for the purposes of the Contract except as provided in Section 3.1.9.

3.1.2 Labour and Associated Labour Costs

a Contractors locally recruited employees based in India Costs of all the Contractors locally recruited employees who are directly engaged in the conduct of Petroleum Operations under the Contract in India. Such costs shall include the costs of employee benefits and Government benefits for employees and levies imposed on the Contractor as an employer transportation and relocation costs within India of the employee and such members of the employees family as per the personnel policy of the employer as required by law or customary practice in India. If such employees are engaged in other activities in India in addition to Petroleum Operations the cost of such employees shall be apportioned on a time sheet basis according to sound and acceptable accounting principles.

b Assigned Personnel 107 Costs of salaries and wages including bonuses of the Contractors employees directly and necessarily engaged in the conduct of the Petroleum Operations under the Contract whether temporarily or permanently assigned irrespective of the location of such employees it being understood that in the case of those personnel only a portion of whose time is wholly dedicated to Petroleum Operations under the Contract only that pro rata portion of applicable salaries wages and other costs as specified in Sections 3.1.2c d e f and g shall be charged and the basis of such pro rata allocation shall be specified.

c The Contractors costs regarding holiday vacation sickness and disability benefits and living and housing and other customary allowances applicable to the salaries and wages chargeable under Section 3.1.2b above.

d Expenses or contributions made pursuant to assessments or obligations imposed under the laws of India which are applicable to the Contractors

cost of salaries and wages chargeable under Section 3.1.2b above.e The Contractors cost of established plans for employees group life insurance hospitalization pension retirement and other benefit plans of a like nature customarily granted to the Contractors employees provided however that such costs are in accordance with generally accepted standards in the international petroleum industry applicable to salaries and wages chargeable to Petroleum Operations under Section 3.1.2b above.f Personal income taxes where and when they are paid by the Contractor to the Government of India for the employee in accordance with the Contractors standard personnel policies.g Reasonable transportation and travel expenses of employees of the Contractor including those made for travel and relocation of the expatriate employees including their dependent family and personal effects assigned to India whose salaries and wages are chargeable to Petroleum Operations under Section 3.1.2b above. Transportation cost as used in this Section shall mean the cost of freight and passenger service and any accountable inland expenditures related to transfer travel and authorized under the Contractors standard personnel policies. The Contractor shall ensure that all expenditures related to transportation costs are equitably allocated to the activities which have benefited from the personnel concerned.

3.1.3 Transportation Costs The reasonable cost of transportation of equipment materials and supplies within India and from outside India to India necessary for the conduct of Petroleum Operations under the Contract including directly related costs such as unloading charges dock fees and inland and ocean freight charges.108

3.1.4 Charges for Servicesi Third Parties The actual costs of contract services services of professional consultants utilities and other services necessary for the conduct of Petroleum Operations under the Contract performed by third parties other than an Affiliate of the Contractor provided that the transactions resulting in such costs are undertaken pursuant to Section 1.8 of this Accounting Procedure.ii

Affiliates of Contractor a Professional and Administrative Services and Expenses Cost of professional and administrative services provided by any Affiliate for the direct benefit of Petroleum Operations including but not limited to services provided by the production exploration legal financial insurance accounting and computer services divisions other than those covered by Section 3.1.4 iib

which the Contractor may use in lieu of having its own employees. Charges shall be equal to the actual cost of providing their services shall not include any element of profit and shall not be any higher than the most favourable prices charged by the Affiliate to third parties for comparable services under similar terms and conditions elsewhere and will be fair and reasonable in the light of prevailing modern oilfield and petroleum industry practices.

b Scientific or Technical Personnel Cost of scientific or technical personnel services provided by any Affiliate of the Contractor for the direct benefit of Petroleum Operations which cost shall be charged on a cost of service basis. Charges therefor shall not exceed charges for comparable services currently provided by outside technical service organizations of comparable qualifications. Unless the work to be done by such personnel is covered by an Approved Budget and Work Programme the Contractor shall not authorize work by such personnel without approval of the Management Committee.

c Equipment facilities and property owned and furnished by the Contractors Affiliates at rates commensurate with the cost of ownership and operation provided however that such rates shall not exceed those currently prevailing for the supply of like equipment facilities and property on comparable terms in the area where the Petroleum Operations are being conducted. The equipment and facilities referred to herein shall exclude major investment items such as but not limited to drilling rigs producing platforms oil treating facilities oil and gas loading and transportation systems storage and terminal facilities and other major facilities rates for which shall be subject to separate agreement with the Government.

3.1.5 Communications Cost of acquiring leasing installing operating repairing and maintaining communication systems including radio satellite link and microwave facilities between the Contract Area and the Contractors nearest base facility.

3.1.6 Office Shore Bases and Miscellaneous Facilities Net cost to the Contractor of establishing maintaining and operating any office suboffice shore base facility warehouse housing or other facility directly serving the Petroleum Operations. If any such facility services contract areas other than the Contract Area or any business other than Petroleum Operations the net costs thereof shall be allocated on an equitable and consistent basis.

3.1.7 Environmental Studies and Protection Costs incurred in conducting the

environmental impact assessment studies for the Contract Area and in taking environmental protection measures including abandonment cost or contribution to abandonment funds as may be created for abandonment and Site Restoration pursuant to the terms of the Contract.

3.1.8 Materials and equipment

General So far as is practicable and consistent with efficient and economical operation only such material shall be purchased or furnished by the Contractor for use in the Petroleum Operations as may be required for use in the reasonably foreseeable future and the accumulation of surplus stocks shall be avoided. Material and equipment held in inventory shall only be charged to the accounts when such material is removed from inventory and used in Petroleum Operations. Costs shall be charged to the accounting records and books based on the First in First out method.

ii Warranty In the case of defective material or equipment any adjustment received by the Contractor from the suppliers or manufacturers or their agents in respect of any warranty on material or equipment shall be credited to the accounts under the Contract.

iii Value of materials charged to the accounts under the Contract

110 a Except as otherwise provided in subparagraph b below materials purchased by the Contractor for use in the Petroleum Operations shall be valued to include invoice price less trade and cash discounts if any purchase and procurement fees plus freight and forwarding charges between point of supply and point of shipment freight to port of destination insurance taxes custom duties consular fees other items chargeable against imported material and where applicable handling and transportation costs from point of importation to warehouse or operating site and these costs shall not exceed those currently prevailing in normal arms length transactions on the open market.

b Material purchased from or sold to Affiliates or transferred to or from activities of the Contractor other than Petroleum Operations under the Contract

aa new material hereinafter referred to as condition A shall be valued at the current international price which shall not exceed the price prevailing in normal arms length transactions on the open market;

bb used material which is in sound and serviceable condition and is suitable for reuse without reconditioning hereinafter referred to as condition B shall be priced at not more than seventy five per cent 75 of the current price of the above mentioned new materials;

cc used material

which cannot be classified as condition B but which after reconditioning will be further serviceable for original function as good secondhand condition B material or is serviceable for original function but substantially not suitable for reconditioning hereinafter referred to as condition C shall be priced at not more than fifty per cent 50 of the current price of the new material referred to above as condition A. The cost of reconditioning shall be charged to the reconditioned material provided that the condition C material value plus the cost of reconditioning does not exceed the value of condition B material. Material which cannot be classified as condition B or condition C shall be priced at a value commensurate with its use. Material involving erection expenditure shall be charged at the applicable condition percentage referred to above of the current knocked down price of new material referred to above as condition A. When the use of material is temporary and its service to the Petroleum Operations does not justify the reduction in price in relation to materials referred to above as conditions B and C such material shall be priced on a basis that will result in a net charge to the accounts under the Contract consistent with the value of the service rendered.

3.1.9 Duties Fees and Other Charges Any duties levies fees charges and any other assessments levied by any governmental or taxing authority in connection with the Contractor's activities under the Contract and paid directly by the Contractor except corporate income tax payable by the constituents of the Contractor.

3.1.10 Insurance and Losses Insurance premia and costs incurred for insurance pursuant to Article 24 of the Contract provided that such insurance is customary affords prudent protection against risk and is at a premium no higher than that charged on a competitive basis by insurance companies which are not Affiliates. Except as provided in Sections 3.2 ix Section 3.2x and Section 3.2xi actual costs and losses incurred shall be allowable to the extent not made good by insurance. Such costs may include but are not limited to repair and replacement of property in the Contract Area resulting from damages or losses incurred by fire flood storm theft accident or such other cause.

3.1.11 Legal Expenses All reasonable costs and expenses except Section 3.2 xi resulting from the handling investigating asserting defending or settling of any claim or legal action necessary or expedient for the procuring perfecting retention and protection of the Contract Area and in

defending or prosecuting lawsuits involving the Contract Area or any third party claim arising out of Petroleum Operations under the Contract or sums paid in respect of legal services necessary for the protection of the joint interest of Government and the Contractor shall be allowable. Such expenditures shall include attorneys fees court costs costs of investigation and procurement of evidence and amounts paid in settlement or satisfaction of any such litigation and claims provided such costs are not covered elsewhere in the Accounting Procedure. Where legal services are rendered in such matters by salaried or regularly retained lawyers of the Contractor or an Affiliate such compensation shall be included instead under Section 3.1.2 or 3.1.4 ii above as applicable.

3.1.12 Training Costs All costs and expenses incurred by the Contractor in training as is required under Article 22 of the Contract.

3.1.13 General and Administrative Costs The costs described in Section 2.6.1 and the charge described in Section 2.6.2 of this Accounting Procedure.

3.1.14 Royalty License fee surface rentals etc.

112 Royalty License fee surface rentals dead rents and other levies and taxes paid to the Government of India or State Government or local Government bodies or authority or agency except income tax paid to the Government.

3.2 Costs not recoverable and not allowable under the Contract The following costs and expenses shall not be recoverable or allowable whether directly as such or indirectly as part of any other charges or expense for cost recovery and profit sharing purposes under the Contract i costs and charges incurred before the Effective Date including costs in respect of preparation signature or ratification of this Contract; Explanatory Note It is clarified that costs and expenditures incurred prior to the Effective Date but after the execution of the Contract for making statutory payments in connection with the Petroleum Operations such as Petroleum Exploration License PEL fee and application fee shall be allowed as Contract Cost and shall be cost recoverable. ii expenditures in respect of any financial transaction to negotiate float or otherwise obtain or secure funds for Petroleum Operations including but not limited to interest commission brokerage and fees related to such transactions as well as exchange losses on loans or other financing whether between Affiliates or otherwise; iii costs of marketing or transportation of Petroleum beyond the Delivery Point; iv

expenditures incurred in obtaining furnishing and maintaining the guarantees required under the Contract and any other amounts spent on indemnities with regard to nonfulfillment of contractual obligations;v attorneys fees and other costs and charges in connection with arbitration proceedings and sole expert determination pursuant to the Contract;vi fines interest and penalties imposed by Courts of law of the Republic of India;vii donations and contributions;viii expenditures on creation of any partnership or joint venture arrangement;ix amounts paid with respect to nonfulfillment of contractual obligations;x costs incurred as a result of failure to insure where insurance is required pursuant to the Contract or of failure to follow procedures laid down by an insurance policy or where the Contractor has elected to self insure or has underinsured;xi costs and expenditures incurred as a result of misconduct or negligence of the Contractor; andxii expenses of the members of the Management Committee as per Article 6.12.113

3.3 Other costs recoverable and allowable only with Management Committee approval Any other costs and expenditures not included in Section 3.1 or 3.2 of this Accounting Procedure but which have been incurred by the Contractor for the necessary and proper conduct of Petroleum Operations shall be allowed to be recovered only with the express prior approval in writing of the Management Committee.

3.4 Intental Income and Credits All intental income and proceeds received from Petroleum Operations under the Contract including but not limited to the items listed below shall be credited to the accounts under the Contract and shall be taken into account for cost recovery and Profit Petroleum sharing purposes in the manner described in Articles 15 and 16 of the Contract

i The proceeds of any insurance or claim or judicial awards in connection with Petroleum Operations under the Contract or any assets charged to the accounts under the Contract where such operations or assets have been insured and the premia charged to the accounts under the Contract;ii Revenue received from third parties for the use of property or assets the cost of which has been charged to the accounts under the Contract;iii Any adjustment received by the Contractor from the suppliers manufacturers or their agents in connection with defective material the cost of which was previously charged by the Contractor to the accounts under the Contract;iv Rentals refunds or other credits received by the Contractor which apply to any

charge which has been made to the accounts under the Contract;v Prices originally charged to the accounts under the Contract for materials subsequently exported from the Republic of India without being used in Petroleum Operations under the Contract;vi Proceeds from the sale or exchange by the Contractor of assets plant or facilities the acquisition costs of which have been charged to the accounts under the Contract;vii Legal costs charged to the accounts under Section 3.1.11 of this Accounting Procedure and subsequently recovered by the Contractor.

3.5 NonDuplication of Charges and Credits Notwithstanding any provision to the contrary in this Accounting Procedure it is the objective of the Parties that there shall be no duplication of charges or credits to the accounts under the Contract.

114 SECTION 4 RECORDS AND INVENTORIES OF ASSETS

4.1 Records
4.1.1 The Contractor shall keep and maintain detailed records of property and assets in use for or in connection with Petroleum Operations under the Contract in accordance with normal practices in exploration and production activities of the international petroleum industry. Such records shall include information on quantities location and condition of such property and assets and whether such property or assets are leased or owned.

4.2 Inventories
4.2.1 The Contractor shall not less than once every twelve 12 Months with respect to movable assets; and not less than once every three 3 Years with respect to immovable assets take an inventory of the assets used for or in connection with Petroleum Operations in terms of the Contract and address and deliver such inventory to the Government together with a written statement of the principles upon which valuation of the assets mentioned in such inventory has been based.

4.2.2 The Contractor shall give the Government at least thirty 30 days notice in writing in the manner provided for in the Contract of its intention to take the inventory referred to in Section 4.2.1 and the Government shall have the right to be represented when such inventory is taken.

4.2.3 When an assignment of rights under the Contract takes place a special inventory shall be taken by the Contractor at the request of the assignee provided that the cost of such inventory is borne by the assignee and paid to the Contractor.

4.2.4 In order to give effect to Article 27 of the Contract the Contractor shall provide the Government with a comprehensive list of all relevant assets when requested by the Government to

do so.115 SECTION 5 PRODUCTION STATEMENT 5.1 From the date of first production of Petroleum from the Contract Area the Contractor shall submit a monthly Production Statement to Government showing the following information separately of each producing Field and in aggregate for the Contract Area 5.1.1 The quantity of Crude Oil and Condensate produced and saved. 5.1.2 The quality and characteristics of such Crude Oil and Condensate produced and saved. 5.1.3 The quantity of Associated Natural Gas and Non Associated Natural Gas produced and saved. 5.1.4 The quality characteristics and composition of such Natural Gas produced and saved separately. 5.1.5 The quantities of Crude Oil Condensate and Natural Gas used for the purposes of carrying on drilling and production operations and pumping to field storage as well as quantities reinjected. 5.1.6 The quantities of Crude Oil Condensate and Natural Gas unavoidably lost. 5.1.7 The quantities of Natural Gas flared and vented. 5.1.8 The size of Petroleum stocks held on the first day of the Month in question. 5.1.9 The size of Petroleum stocks held on the last day of the Month in question. 5.1.10 The quantities of Natural Gas reinjected into the Petroleum Reservoir. 5.1.11 The number of days in the Month during which Petroleum was produced from each Field. 5.1.12 The Gas/Oil ratio for each Reservoir and Field for the relevant Month. 5.1.13 Water production water injection and Reservoir pressure data for each Reservoir and Field. 116 5.2 All quantities shown in this Statement shall be expressed in both volumetric terms barrels of Oil and cubic metres of Gas and in the case of Oil in weight metric tonnes. 5.3 For the purpose of reporting Field production quantities pursuant to this Section the Contractor shall agree with the Management Committee on the exact area to be designated as Development Area. 5.4 The Government may direct in writing that the Contractor include other reasonable particulars relating to the production of Petroleum in its monthly Production Statement and the Contractor shall comply with such direction. 5.5 The Production Statement for each Month shall be submitted to Government no later than fifteen 15 days after the end of such Month. 117 SECTION 6 VALUE OF PRODUCTION AND PRICING STATEMENT 6.1 The Contractor shall for the purposes of Article 19 of the Contract prepare a Statement providing calculations of the value of Crude Oil and Condensate produced and saved

during each Month. This Statement shall contain the following information:

6.1.1 The quantities, prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and Condensate to third parties made during the Month in question.

6.1.2 The quantities, prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and Condensate made during the Month in question other than to third parties if any.

6.1.3 The quantities of Crude Oil and Condensate appropriated by the Contractor to refining or other processing without otherwise being disposed of in the form of Crude Oil or Condensate.

6.1.4 The value of stocks of Crude Oil and Condensate on the first day of the Month in question.

6.1.5 The value of stocks of Crude Oil and Condensate on the last day of the Month in question.

6.1.6 The percentage volume of total sales of Crude Oil and Condensate made by the Contractor during the Month that are Arms Length Sales to third parties.

6.1.7 Information available to the Contractor insofar as required for the purposes of Article 19 of the Contract concerning the prices of competitive crude oils produced by the main petroleum producing and exporting countries including contract prices, discounts and premia and prices obtained on the spot markets.

6.2 The Contractor shall for the purpose of Article 21 of the Contract prepare a Statement providing calculations of the value of Associated Natural Gas and Non Associated Natural Gas produced, flared internally, used, saved and sold during each Month. This Statement shall contain all information of the type specified in Section 6.1 for Crude Oil as is applicable to Gas and such other relevant information as may be required by Government.

6.3 The Statements required pursuant to Sections 6.1 and 6.2 shall include a detailed breakdown of the calculation of the prices of Crude Oil, Condensate, Associated Natural Gas and Non Associated Natural Gas pursuant to the provisions of Articles 19 and 21.

6.4 The Value of Production and Pricing Statement for each Month shall be submitted to Government not later than thirty (30) days after the end of such Month.

118

6.3 The Statements required pursuant to Sections 6.1 and 6.2 shall include a detailed breakdown of the calculation of the prices of Crude Oil, Condensate, Associated Natural Gas and Non Associated Natural Gas pursuant to the provisions of Articles 19 and 21.

6.4 The Value of Production and Pricing Statement for each Month shall be submitted to Government not later than thirty (30) days after the end of such Month.

119

SECTION 7 STATEMENT OF COSTS, EXPENDITURES AND RECEIPTS

7.1 The Contractor shall prepare with respect to each Quarter a Statement of Costs, Expenditures and Receipts under the Contract using mercantile basis of accounting. The Statement shall distinguish between Exploration Costs, Development Costs and Production Costs and shall

separately identify all significant items of costs and expenditure as itemised in Section 3 of this Accounting Procedure within these categories. The Statement of receipts shall distinguish between income from the sale of Petroleum and internal income of the sort itemised in Section 3.4 of this Accounting Procedure. If the Government is not satisfied with the degree of disaggregation within the categories it shall be entitled to request a more detailed breakdown. The Statement shall show the following:

- 7.1.1 Actual costs expenditures and receipts for the Quarter in question.
- 7.1.2 Cumulative costs expenditures and receipts for the Year in question.
- 7.1.3 Latest forecast of cumulative costs expenditures and receipts at the Year end.
- 7.1.4 Variations between budget forecast and latest forecast and explanations thereof.

7.2 The Statement of Costs Expenditures and Receipts of each Quarter shall be submitted to Government not later than thirty 30 days after the end of such Quarter.

120 8.1 The Contractor shall prepare with respect to each Calendar Quarter a Cost Recovery Statement containing the following information:

SECTION 8 COST RECOVERY STATEMENT

- 8.1.1 Unrecovered Contract Costs carried forward from the previous Quarter if any.
- 8.1.2 Contract Costs for the Quarter in question.
- 8.1.3 Total Contract Costs for the Quarter in question: Section 8.1.1 plus Section 8.1.2.
- 8.1.4 Quantity and value of Cost Petroleum taken and disposed of by the Contractor for the Quarter in question.
- 8.1.5 Contract Costs recovered during the Quarter in question as per Article 15.
- 8.1.6 Total cumulative amount of Contract Costs recovered up to the end of the Quarter in question.
- 8.1.7 Amount of Contract Costs to be carried forward into the next Quarter.

8.2 The Cost Recovery Statement for each Quarter shall be submitted to Government not later than thirty 30 days after the end of such Quarter.

121 **SECTION 9 PROFIT SHARING STATEMENT**

9.1 The Contractor shall prepare with respect to each Quarter a Profit Sharing Statement containing the following information:

- 9.1.1 The calculation of the applicable net cash flows as defined in Appendix D for the Quarter in question.
- 9.1.2 The value of the Investment Multiple applicable in the Quarter in question.
- 9.1.3 Based on Section 9.1.2 and Article 16 the appropriate percentages of Profit Petroleum for the Government and the Contractor in the Quarter in question.
- 9.1.4 The total amount of Profit Petroleum to be shared between the Government and the

Contractor in the Quarter in question.9.1.5 Based on Sections 9.1.3 and 9.1.4 the amount of Profit Petroleum due to the Government and the Contractor as well as to each constituent of the Contractor in the Quarter in question.9.1.6 The actual amounts of Petroleum taken or payment received by Government and the Contractor as well as by each constituent of the Contractor during the Quarter in question to satisfy their entitlements pursuant to Section 9.1.5.9.1.7 Adjustments to be made if any in future Quarters in the respective amounts of Profit Petroleum due to the Government and the Contractor as well as to each constituent of the Contractor on account of any differences between the amounts specified in Sections 9.1.5 and 9.1.6 as well as any cumulative adjustments outstanding from previous Quarters.9.2 The Profit Sharing Statement shall be submitted to Government not later than thirty 30 days after the end of such Quarter. Any amount due or adjustment required in profit sharing among the Parties shall be made within thirty 30 days from the submission of the Statement to the Government.122 SECTION 10 LOCAL PROCUREMENT STATEMENT10.1 In furtherance of the obligation in Article 23 of the Contract for the Contractor to give preference to the procurement of Indian goods and services the Contractor shall prepare in respect of each Year a local procurement statement containing the following information: a The amount of expenditure incurred by the Contractor directly or indirectly through its Subcontractors on goods supplied produced or manufactured in India; b the amount of expenditure incurred by the Contractor directly or indirectly through its Subcontractors on services provided by Indian entities; c the respective percentages that the expenditures recorded under items a and b above represent of the Contractor's total expenditures; d a detailed description of the procedures adopted during the Year to identify and purchase goods and services from Indian suppliers; and e a detailed exposition of how the local purchases for the Year as recorded under items a and b above compared with the projected purchases included in the budget statement for that Year pursuant to Section 12.1.3 with explanations for any significant variations;10.2 The local procurement statement shall be submitted to the Government within sixty 60 days after the end of each Year.123 SECTION 11 END OF YEAR STATEMENT11.1 The Contractor shall prepare a definitive End of Year Statement. The Statement

shall contain aggregated information in the same format as required in the Production Statement Value of Production and Pricing Statement Statement of Costs Expenditures and Receipts Cost Recovery Statement and Profit Sharing Statement but shall be based on actual quantities of Petroleum produced income received and costs and expenditures incurred. Based upon this Statement any adjustments that are necessary shall be made to the transactions concerned under the Contract. [Explanation End of year Statement shall further contain the item wise justification for the variation between the actual costs and expenditure incurred and included in the statement of costs expenditure and receipts visvis the Budgets for corresponding line items.]

11.2 The End of Year Statement for each Year shall be submitted to Government within ninety 90 days of the end of such Year.

124 SECTION 12 BUDGET STATEMENT

12.1 The Contractor shall prepare a Budget Statement for each Year. This Statement shall distinguish between budgeted Exploration Costs Development Costs and Production Costs and shall show the following

12.1.1 Forecast costs expenditures and receipts for the Year in question.

12.1.2 A schedule showing the most important individual items of total costs expenditures and receipts for the said Year.

12.1.3 Estimated amounts to be spent in the Year on procuring goods and services in India.

12.2 The Budget Statement shall be submitted to Government with respect to each Year not less than ninety 90 days before the start

of the said Year provided that in the case of the Year in which the Effective Date falls the Budget

Statement shall be submitted within ninety 90 days of the Effective Date.

125 APPENDIX D CALCULATION OF THE INVESTMENT MULTIPLE FOR PRODUCTION SHARING PURPOSES

1. In accordance with the provisions of Article 16 the share of the Government and the Contractor respectively of Profit Petroleum from the Contract Area in any Year shall be determined

by the Investment Multiple earned by the Contractor from the then Petroleum Operations at the end of the preceding Year. These measures of profitability shall be calculated on the basis of the

appropriate net cash flows as specified in this Appendix D.2. The Net Cash Income of the Contractor from their Petroleum Operations in any particular Year is the aggregate value for the Year of

the following i Cost Petroleum entitlement of the Contractor as provided in Article 15; plus ii Profit

Petroleum entitlement of the Contractor as provided in Article 16; plusiii the Contractors all inental income of the type specified in section 3.4 of the Accounting Procedure arising from Petroleum Operations; lessiv the Contractors Production Costs and royalty payments Article 17 incurred on or in the Contract Area;3. The Investment made by the Contractor in the Contract Area in any particular Year is the aggregate value for the Year ofi the Contractors Exploration Costs incurred on or in the Contract Area pursuant to Article 15 plusii the Contractors Development Costs incurred on or in the Contract Area.4. For the purposes of the calculation of the Investment Multiple costs or expenditures which are not allowable as provided in the AccountingProcedure shall be excluded from Contract Costs and be disregarded.126 5. The Investment Multiple ratio earned by the Contractor as at the end of any Year shall be calculated by dividing the aggregate value of theaddition of each of the annual Net Cash Incomes accumulated without interest up to and including that Year starting from the Year in whichProduction Costs were first incurred or Production first arose by the aggregate value of the addition of each of the annual Investmentsaccumulated without interest up to and including that Year starting from the Year in which Exploration and Development Costs were firstincurred.6. Profit Petroleum from the Contract Area in any Year shall be shared between the Government and the Contractor in accordance with the value ofthe Investment Multiple earned by the Contractor as at the end of the previous Year pursuant to Articles 16.2 to 16.5.127

APPENDIXE1FORM OF PARENT COMPANY FINANCIAL AND PERFORMANCE GUARANTEEto be furnished pursuant to Article 29.1 b of the Contract WHEREAS a company duly organised and existing under the laws of having itsregistered office at hereinafter referred to as the Guarantor which expression shall include its successors and assignsis [the indirect owner of one hundred percent 100 of the capital stock of XYZ Company and direct owner of its parent company;] and WHEREAS XYZ Company is signatory to a Production Sharing Contract in respect of an offshore onshore area identified as Block hereinafter referred to as the Contract made between the Government of India hereinafter referred to asthe Government and XYZ Company hereinafter referred to as XYZ which expression shall include its successors and permitted assigns; and

WHEREAS the Guarantor wishes to guarantee the performance of XYZ Company or its Affiliate Assignee under the Contract as required by the terms of the Contract; NOW THEREFORE this Deed hereby provides as follows:

1. The Guarantor hereby unconditionally and irrevocably guarantees to the Government that it will make available or cause to be made available to XYZ Company or any other directly or indirectly owned Affiliate of XYZ Company to which any part or all of XYZ Company's rights or interest under the Contract may subsequently be assigned Affiliate Assignee financial technical and other resources required to ensure that XYZ Company or any Affiliate Assignee can carry out its obligations as set forth in the Contract.
2. The Guarantor further unconditionally and irrevocably guarantees to the Government the due and punctual compliance by XYZ Company or any Affiliate Assignee of any obligations of XYZ Company or any Affiliate Assignee under the Contract.
3. The Guarantor hereby undertakes to the Government that if XYZ Company or any Affiliate Assignee shall in any respect fail to perform its obligations under the Contract or commit any breach of such obligations then the Guarantor shall fulfil or cause to be fulfilled the said obligations in place of XYZ Company or any Affiliate Assignee and will indemnify the Government against all losses, damages, costs, expenses or otherwise which may result directly from such failure to perform or breach on the part of XYZ Company.
4. This guarantee shall take effect from the Effective Date and shall remain in full force and effect for the duration of the said Contract and thereafter until no sum remains payable by XYZ Company or its Affiliate Assignee under the Contract or as a result of any decision or award made by any expert or arbitral tribunal thereunder.
5. This guarantee shall not be affected by any change in the articles of association and byelaws of XYZ Company or the Guarantor or in any instrument establishing the Company or Guarantor.
6. The liabilities of the Guarantor shall not be discharged or affected by a any time indulgence, waiver or consent given to XYZ Company; b any amendment to the Contract or to any security or other guarantee or indemnity to which XYZ Company has agreed; c the enforcement or waiver of any terms of the Contract or of any security other guarantee or indemnity; or d the dissolution, amalgamation, reconstruction or reorganisation of XYZ Company.
7. This guarantee shall

be governed by and construed in accordance with the laws of India. IN WITNESS WHEREOF the Guarantor through its duly authorised representatives has caused its seal to be duly affixed hereto and this guarantee to be duly executed the day of 200.129 APPENDIXE2FORM OF COMPANY FINANCIAL AND PERFORMANCE GUARANTEE to be furnished pursuant to Article 29.1 b of the Contract WHEREAS XYZ Company duly organised and existing under the laws of having its registered office at hereinafter referred to as the Guarantor which expression shall include its successors and assigns is signatory to a Production Sharing Contract in respect of an offshore onshore area identified as Block hereinafter referred to as the Contract made between the Government of India hereinafter referred to as the Government and XYZ Company hereinafter referred to as XYZ which expression shall include its successors and permitted assigns; and WHEREAS the Guarantor wishes to guarantee its performance under the Contract as required by the terms of the Contract; NOW THEREFORE this Deed hereby provides as follows

1. The Guarantor hereby unconditionally and irrevocably guarantees to the Government that it will make available or cause to be made available financial technical and other resources required to ensure that XYZ Company can carry out its obligations as set forth in the Contract.

5. This guarantee shall not be affected by any change in the articles of association and byelaws of XYZ Company or in any instrument establishing the Company.
6. The liabilities of the Guarantor shall not be discharged or affected by a

any time indulgence waiver or consent given to XYZ Company; b any amendment to the Contract or to any security or other guarantee or indemnity to which XYZ Company has agreed; c the enforcement or waiver of any terms of the Contract or of any security other guarantee or indemnity. 7.

This guarantee shall be governed by and construed in accordance with the laws of India. IN WITNESS WHEREOF the Guarantor through its duly authorised representatives has caused its seal to be duly affixed hereto and this guarantee to be duly executed the day of 200.

131 PROCEDURE FOR ACQUISITION OF GOODS AND SERVICES APPENDIX F I OBJECTIVES The objectives of these procedures are to a ensure that the goods and services acquired by the Operator for carrying out the Petroleum Operations are acquired at the optimum cost taking into consideration all relevant factors including price quality delivery time and the reliability of potential suppliers. b ensure that goods and services are delivered in a timely manner taking into consideration the consequences of delays in the acquisition of these goods and services on the project as a whole. c ensure that the provisions of Article 23 of the Contract are implemented.

II PRINCIPLES The principles upon which these procedures are based are a The Parties must be satisfied that the Operator is working to an agreed procedure for acquiring goods and services which is auditable and in accordance with the provisions of the Contract. b The Operator must have the ability to acquire goods and services expeditiously so that the project schedules in respect of Approved Work Programmes are maintained.

III PROCEDURES The procedures to be adopted by the Operator for the acquisition of goods and services shall be as follows

Applicable to	Procedure
Exploration	A
Appraisal	B
Development and Production operations	C

Procedure A 50000 to less than 200000 Procedure B 200000 to less than 500000 Procedure C Equal to or more than 500000

132 For contracts valued at less than US 5000 The Operator will be at liberty to determine the procurement procedures and methods to procure goods and services valued at less than US Dollars five thousand US 5000. For Contracts valued at US 5000 and above but less than US 50000 The Operator will be at liberty to determine the preferred method of acquiring goods and services valued at US Dollars five thousand US 5000 and above but less than US Dollars fifty thousand US 50000 provided that at least three 3 quotations from selected

suppliers including at least one Indian supplier will be obtained. For items valued at greater than US Dollars twenty thousand US 20000 Operator is required to report to the Operating Committee if the quote accepted exceeds the lowest quote by more than twenty 20 percent. Operator will promptly report to the Operating Committee the Operator's reasons for not selecting the lowest quote.

Procedure A Operator shall

- 1 provide the constituents of the Contractor with a list of all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender;
- 2 add to such list the entities whom other Party requests for adding within five 5 Business Days on receipt of such lists;
- 3 if and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix F IV to perform under the contract;
- 4 complete the tendering process within a reasonable period of time;
- 5 circulate to all constituents of the Contractor a comparative bid analysis stating Operator's choice of the entity for award of contract. Provide also reasons for such choice in case entity chosen is not the lowest bidder;
- 6 inform all the constituents of the Contractor of the entities to whom the contract has been awarded; and
- 7 upon the request of a Party provide such Party with a copy of the final version of the contract awarded.

Procedure B Operator shall

- 1 provide the Parties with a list of all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender;
- 2 add to such list the entities whom a Party requests for adding within five 5 Business Days on receipt of such list;
- 3 if and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix F IV to perform under the contract;
- 4 complete the tendering procedure within a reasonable period of time;
- 5 circulate to all constituents of the Contractor a comparative bid analysis stating Operator's choice of the entity for award of contract. Provide also reasons for such choice in case the entity chosen is not the lowest bidder. If the bid selected is not the lowest bid obtain prior approval of the Operating Committee for award of

contract;6 award the contract accordingly and inform all the members of the Management Committee of the entities to whom the contract has been awarded; and7 upon the request of a Party provide such Party with a copy of the final version of the contract awarded.Procedure COperator shall1 publish invitations for parties to prequalify for the proposed contract in at least three 3 daily national Indian newspaper. Provide to NonOperating Companies a list of responding parties and an analysis of their qualifications for the contract being contemplated to be awarded.Include those who qualify as per the prequalification criteria approved as per AppendixF IV in the list of entities from whom Operatorproposes to invite tender for the said contract;2 provide the members of the Management Committee with a total list of all the entities selected as 1 above and all the entities approved by theOperating Committee as per AppendixFV for the applicable category of the contract along with other entities if any from whom theOperator proposes to invite tender;3 add to such entities whom a Party requests for adding within five 5 Business Days on receipt of such list;4 if and when any Party so requests Operator shall evaluate any entity listed in 2 and 3 above to assure that entity is qualified as based on thequalification criteria agreed in accordance with AppendixFIV to perform under the contract;5 prepare and dispatch the tender documents to the entities as finally listed and to Parties;6 after the expiration of the period allowed for tendering consider and analyse the details of all bids received;7 prepare and circulate to the constituents of the Contractor a comparative bid analysis stating Operators recommendation as to the entity towhom the contract134 should be awarded the reasons therefor and the technical commercial and contractual terms to be agreed upon;8 obtain the approval of the Operating Committee to the recommended bid. However failing Operating Committee approval any Company mayrefer the issue to the Management Committee for decision; and9 award the contract accordingly and upon the request of a Party provide such Party with a copy of the final version of the contract;IV. A set of vendor qualifications criteria for each major category contractsupply shall be proposed by the Operator and approved by the OperatingCommittee within thirty 30 days of its submission. In the event the Operating Committee fails to approve vendor qualification criteria withinthirty 30 days of the date the same is

first submitted by the Operator the matter shall be referred to the Management Committee for decision. The Operating Committee may revise the qualification criteria. V. It is anticipated that in order to expedite joint operations contracts will be awarded to qualified vendors/contractors who are identified as approved vendors for the specified activities. A list of such approved vendors shall first be established as follows: Operator shall 1 provide the constituents of the Contractor with a list of the entities from whom Operator proposes to invite tender for contracts; and 2 add to such list entities whom a Company requests for adding within fourteen (14) days on receipt of such list; and 3 obtain approval of the Operating Committee. Such list shall thereafter be maintained by the Operator. The Operating Committee may add to or delete vendors from such list.

135 APPENDIX G PERFORMA OF BANK GUARANTEE TO BE PROVIDED PURSUANT TO ARTICLE 291. In consideration of Government of India hereinafter referred to as Government having entered into a Production Sharing Contract for the block dated hereinafter referred to as Contract which expression shall include all the amendments agreed to between the Government and the Contractor thereto with Ms having its registered office at hereinafter referred to as which expression unless repugnant to the context or meaning thereof include all its successors administrators executors and assigns which is a constituent of the Contractor and the Government have agreed that the Company shall furnish to Government a bank guarantee hereinafter referred to as Guarantee towards its obligations as provided in the Contract for US\$ for Foreign Companies US\$ equivalent in Indian Rupees for Indian Companies for the performance of its obligations under the Contract.

NoticesAPPENDICESAppendix A Description of Contract AreaAppendix B Map of Contract AreaAppendix C Accounting Procedure to Production Sharing ContractAppendix D Calculation of the Investment Multiple for Production Sharing PurposesAppendix E Form of Financial and Performance GuaranteeAppendix F EquipmentAppendix G Development Commitment Specified by the CompaniesAppendix H Production Profile of the Panna and Mukta FieldsThis Contract made and entered into as of the 22nd day of December 1994by and amongTHE PRESIDENT OF INDIA acting through the Joint SecretaryExploration Ministry of Petroleum and Natural Gas hereinafterreferred as Government; ANDOIL NATURAL GAS CORPORATION LIMITED ONGC a body corporate established underthe provisions of the Companies Act 1956 which expression shall include its successors and such assigns as are permitted under Article 28 hereof actingthrough its duly authorized Chairman Managing Director; ANDRELIANCE INDUSTRIES LTD. RIL a body corporate established under the laws ofIndia which expression shall include its 35 successors and such assigns as arepermitted under Article 28 hereof acting through its duly authorized ChiefExecutive Officer Oil Gas; ANDENRON OIL GAS INDIA LTD. EOGIL a body corporate established under thelaws of the Cayman Islands which expression shall include its successors andsuch assigns as are permitted under Article 28 hereof acting through its dulyauthorized Vice President;WITNESSETHWHEREAS1. By virtue of Article 297 of the Constitution of India Petroleum in its natural state in the Territorial Waters and the Continental Shelf of India is vested in the Union of India;2. The Territorial Waters Continental Shelf Exclusive Economic Zone And Other Maritime Zones Act 1976 No. 80 of 1976 provides for the grant of a Lease or letter of authority by the Government to explore and exploit the resources of the Continental Shelf;3. The Oil Fields Regulation and Development Act 1948 53 of 1948 hereinafter referred to as the Act and the Petroleum and Natural Gas Rules 1959 made thereunder hereinafter referred to as the Rules make provision inter alia for the regulation of Petroleum Operations and the grant of petroleum exploration licenses and mining leases for exploration and development of Petroleum in India;4. The Act and the Rules provide for the grant by the Government of mining leases in respect of the Territorial

Waters and the Continental Shelf and the Contractor is being duly granted a mining lease to carry out Petroleum Operations in that area offshore identified as Panna and Mukta Fields more particularly described in Appendices A and B;5. The Government desires that the Petroleum resources which may exist in the Contract Area be discovered and exploited with the utmost expedition in the overall interest of India in accordance with sound international petroleum industry practices;6. The Government is satisfied that it is in the public interest to enter into this Contract on terms different from those specified in Section 12 of the Oil Fields Regulations and Development Act 1948 and the Government is entering into this Agreement on the terms and conditions specified herein.7. EOGIL and RIL have represented that they have or will acquire and make available the necessary financial and technical resources and the technical and industrial competence and experience necessary for proper discharge andor performance of all obligations required to be performed under this Contract in accordance with good international petroleum industry practices and will provide guarantees as required in Article 29 for the due performance of their undertakings hereunder;8. The Parties desire to enter into this Contract with respect to the Contract Area referred to in Appendices A and B on the terms and conditions herein set forth.NOW THEREFORE in consideration of the premises and covenants and conditionsherein contained IT IS HEREBY AGREED between the Parties as follows

2 ARTICLE 1 D E F I N I T I O N S In this Contract unless the context requires otherwise the following terms shall have the meaning ascribed to them hereunder

1.1 Accounting Procedure means the principles and procedures of accounting set out in Appendix C.

1.2 Affiliate means a company that directly or indirectly controls or is controlled by a Party to this Contract or a company which directly or indirectly controls or is controlled by a company which controls a Party to this Contract it being understood that control means ownership by one company of more than fifty percent 50 of the voting securities of the other company or the power to direct administer and dictate policies of the other company even where the voting securities held by such company exercising such effective control in that other company is less than fifty percent 50 and the term controlled shall have a corresponding meaning.

1.3 Appendix means an Appendix

attached to this Contract and made a part hereof.

1.4 Appraisal Programme means a programme approved by the Management Committee for the appraisal of an Existing or New Discovery of Petroleum in the Contract Area for the purpose of delineating the Petroleum Reservoirs to which the Discovery relates in terms of thickness and lateral extent and determining the characteristics thereof and the quantity and quality of recoverable Petroleum therein.

1.5 Appraisal Well means a Well drilled within the Contract Area pursuant to an approved Appraisal Programme.

1.6 Arms Length Sales means sales of Petroleum made freely on the open international market in freely convertible currencies between willing and unrelated sellers and buyers and in which such buyers and sellers have no contractual or other relationship directly or indirectly or any common or joint interest as is reasonably likely to influence selling prices and shall inter alia exclude sales whether direct or indirect through brokers or otherwise involving Affiliates sales between entities comprising the Contractor sales between governments and governmentowned entities counter trades restricted or distress sales sales involving barter arrangements and generally any transactions motivated in whole or in part by considerations other than normal commercial practices.

1.7 Article means an article of this Contract and the term Articles means more than one Article.

31.8 Associated Natural Gas or ANG means Natural Gas occurring in association with Crude Oil either as free Gas or in solution if such Crude Oil can by itself be commercially produced.

1.9 Barrel means a quantity or unit equal to 158.9074 litres fortytwo 42 United States gallons liquid measure at a temperature of sixty 60 degrees Fahrenheit 15.56 degrees Centigrade under one atmosphere of pressure 14.7 psia.

1.10 Basement means any igneous or metamorphic rock or rock or any stratum of such nature in and below which the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of Petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected in accordance with the knowledge generally accepted in the international petroleum industry.

1.11 Calendar Month means any of the twelve 12 months of the Calendar Year unless specified otherwise.

1.12 Calendar Quarter means a period of three consecutive Calendar Months

commencing on the first day of January April July and October of each Calendar Year.1.13 Calendar Year means a period of twelve consecutive months according to the Gregorian calendar commencing with the first day of January and ending with the thirtyfirst day of December.1.14 Commercial Discovery means a Discovery which when produced is likely to yield a reasonable profit on the funds invested in Petroleum Operations after deduction of Contract Costs and which has been declared a Commercial Discovery in accordance with the provisions of Article 9 andor Article 21 after consideration of all pertinent operating and financial data such as recoverable reserves sustainable production levels estimated development and production expenditures prevailing prices and other relevant technical and economic factors according to generally accepted practices in the international petroleum industry.1.15 Commercial Production means production of Crude Oil or Natural Gas or both from a Field within the Contract Area and delivery of the same at the relevant Delivery Point under a programme of regular production and sale.1.16 Company means either EOGIL or RIL.1.17 Companies means EOGIL and RIL.1.18 Condensate means those low vapour pressure hydrocarbons obtained from Natural Gas through condensation or extraction 4 and refers solely to those hydrocarbons that are liquid at normal surface temperature and pressure conditions provided that in the event Condensate is produced from an Oil Field and is segregated and transported separately to the Delivery Point then the provisions of this Contract shall apply to such Condensate as if it were Crude Oil.1.19 Contract means this agreement and the Appendices attached hereto and made a part hereof and any amendments made thereto pursuant to the terms hereof.1.20 Contract Area means the area described in Appendix A and delineated on the map attached as Appendix B or any portion of the area remaining after relinquishment or surrender from time to time pursuant to the terms of this Contract.1.21 Contract Costs means Exploration Costs Development Costs Production costs and all other costs related to Petroleum Operations as set forth in Section 3 of the Accounting Procedure.1.22 Contract Year means a period of twelve consecutive months counted from the Effective Date or from the anniversary of the Effective Date.1.23 Contractor means EOGIL RIL and ONGC.1.24 Cost Petroleum means the portion of the

total volume of Petroleum produced and saved from the Contract Area which the Contractor is entitled to take from the Contract Area in a particular period for the recovery of Contract Costs as provided in Article 13.1.25 Cost Recovery Limit shall have the meaning given in Article 13.1.2.1.26

Crude Oil means crude mineral oil asphalt ozokerite and all kinds of hydrocarbons and bitumens both in solid and in liquid form in their natural state or obtained from Natural Gas by condensation or extraction including distillate and Condensate when commingled with the heavier hydrocarbons and delivered as a blend at the Delivery Point but excluding verified Natural Gas.1.27 Delivery Point means except as otherwise herein provided or as may be otherwise agreed between the Government and the Contractor the point at which Petroleum reaches the upstream weld of the outlet flange of the delivery facility either offshore or onshore and different Delivery Points may be established for purposes of sales to the Government export or domestic sales.1.28 Development Area means that part of the Contract Area corresponding to the area of an Oil Field or Gas Field delineated in simple geometric shape together with a 5 reasonable margin of additional area surrounding the Field consistent with international petroleum industry practice and approved by the Management Committee or the Government as the case may be.1.29 Development Costs means those costs and expenditures incurred in carrying out Development Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof.1.30 Development Operations means operations conducted in accordance with the Development Plan and shall include but not be limited to the purchase shipment or storage of equipment and materials used in developing Petroleum accumulations the drilling completion Recompletion and testing of Development Wells the drilling completion and Recompletion of Wells for Gas or water injection the laying of gathering lines the installation of offshore platforms and installations the installation hook up and commissioning of separators tankage pumps artificial lifting and other producing and injection facilities required to produce process and transport Petroleum into main oil storage or Gas processing facilities either onshore or offshore including the laying of pipelines within or outside the Contract Area storage and Delivery Point or Points the installation of

storage or Gas processing facilities the installation of export and loading facilities and other facilities required for development and production of the Petroleum accumulations and for the delivery of Crude Oil and Gas at the Delivery Points and also including incidental operations not specifically referred to herein as required for the most efficient and economic development and production of the Petroleum accumulations in accordance with good international petroleum industry practices.

1.31 Development Plan means a plan containing proposals required under Article 9 or Article 21.

1.32 Development Well means a Well drilled deepened completed or Recompleted after the date of approval of the Development Plan pursuant to Development Operations or Production Operations for the purposes of producing Petroleum increasing production sustaining production or accelerating extraction of Petroleum including production Wells injection Wells and dry Wells.

1.33 Discovery means the finding during Exploration Operations of a deposit of Petroleum not previously known to have existed which can be recovered at the surface in a flow measurable by conventional petroleum industry testing methods including an Existing Discovery and a New Discovery.

61.34 Discovery Area means that part of the Contract Area about which based upon Discovery and the results obtained from a Well or Wells drilled in such part both the Government and the Contractor are of the opinion that Petroleum exists and is likely to be produced in commercial quantities.

1.35 Effective Date means the date on which this Contract is executed.

1.36 Environmental Clearance means permission granted in writing by the Government to the Contractor to perform all activities necessary and appropriate to conduct Petroleum Operations subject to conditions specified with regard to protection of the environment and minimizing Environmental Damage.

1.37 Environmental Damage means soil erosion removal of vegetation destruction of wildlife pollution of groundwater or surface water land contamination air pollution noise pollution bush fire disruption to water supplies to natural drainage or natural flow of rivers or streams damage to archaeological palaeontological and cultural sites and shall include any damage or injury to or destruction of soil or water in their physical aspects together with vegetation associated therewith aquatic or terrestrial mammals fish avifauna or any plant or animal life whether in the sea or in any other water or on in or under land provided

such damage is in violation of legislation relating to the protection of the environment.1.38 Excess ANG shall have the meaning given in Article 21.4.1.39 Existing Discovery means a Discovery made by ONGC before the Effective Date and accepted by the Parties as a Commercial Discovery.1.40 Exploration Costs means those costs and expenditures incurred in carrying out Exploration Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof.1.41 Exploration Operations means operations conducted in the Contract Area pursuant to this Contract in searching for Petroleum or in the course of an Appraisal Programme and shall include but not be limited to aerial geological geophysical geochemical palaeontological palynological topographical and seismic surveys analysis studies and their interpretation investigations relating to the subsurface geology including structure test drilling stratigraphic test drilling drilling of Exploration Wells or Appraisal Wells and other related activities such as testing surveying drill site preparation and all work necessarily connected therewith that is conducted in connection with Petroleum exploration. 71.42 Exploration Well means a Well drilled for the purpose of searching for undiscovered Petroleum accumulations on any geological entity be it of structural stratigraphic facies or pressure nature to at least a depth or stratigraphic level specified in the Work Programme.1.43 Field means an Oil Field or a Gas Field in the Contract Area in respect of which a Development Plan has been duly approved in accordance with Article 9 or Article 21 hereof.1.44 Financial Year means the period from the first day of April through the thirtyfirst day of March of the following Calendar Year.1.45 Foreign Company means a Company within the meaning of Section 591 of the Companies Act 1956 as amended from time to time.1.46 Gas means Natural Gas.1.47 Gas Field means an area within the Contract Area consisting of a single Gas Reservoir or multiple Gas Reservoirs all grouped on or related to the same individual geological structure or stratigraphic conditions designated by the Contractor and approved by the Government or Management Committee as the case may be to include the maximum area of potential productivity in the Contract Area in a simple geometric shape in respect of which a Commercial Discovery has been declared or a Development Plan has been approved in accordance with Article 9 or Article 21

hereof.1.48 Investment shall have the meaning assigned in paragraph 3 of Appendix D.1.49 Investment Multiple means the ratio of accumulated Net Cash Income to accumulated Investment in the Contract Area earned by the Companies as determined in accordance with Appendix D.1.50 LIBOR means the London InterBank Offering Rate for sixmonth deposits of United States Dollars as quoted by the London office of the Bank of America or such other Bank as the Parties may agree for the day or days in question.1.51 Lessee means any person or body corporate including the Contractor which holds a mining lease under the Petroleum and Natural Gas Rules 1959 for the purpose of carrying out Petroleum Operations in the Contract Area and their successors and permitted assigns.1.52 Management Committee means the committee constituted pursuant to Article 5 hereof.1.53 Minimum Work Obligation means the Work Programme related 8 to those items specified in Appendix G as approved by the Management Committee.1.54 Natural Gas means wet Gas dry Gas all other gaseous hydrocarbons and all substances contained therein including sulphur and helium which are produced from Oil or Gas Wells excluding those condensed or extracted liquid hydrocarbons that are liquid at normal temperature and pressure conditions and including the residue Gas remaining after the condensation or extraction of liquid hydrocarbons from Gas.1.55 Net Cash Income shall have the meaning assigned in paragraph 2 of Appendix D.1.56 New Discovery means a Discovery made after the Effective Date.1.57 Non Associated Natural Gas or NANG means Natural Gas which is produced either without association with Crude Oil or in association with Crude Oil which by itself cannot be commercially produced.1.58 Oil means Crude Oil.1.59 Oil Field means an area within the Contract Area consisting of a single Oil Reservoir or multiple Oil Reservoirs all grouped on or related to the same individual geological structure or stratigraphic conditions designated by the Contractor and approved by the Government or the Management Committee as the case may be to include the maximum area of potential productivity in the Contract Area in a simple geometric shape in respect of which a Commercial Discovery has been declared and a Development Plan has been approved in accordance with Article 9 hereof and a reference to an Oil Field shall include a reference to the production of Associated Natural Gas

from that Oil Field.1.60 Operating Agreement means the Joint Operating Agreement entered into by the Parties constituting Contractor in accordance with Article 6 with respect to the conduct of Petroleum Operations.1.61 Operating Committee means the committee established by that name in the Operating Agreement.1.62 Operator means the Party so designated in Article 6.1.63 Participating Interest means the percentage of participation of the constituents of the Contractor at any given time in the rights and obligations under this Contract. Initially the Participating Interest of the constituents of Contractor are as follows 9 1. ONGC 40 2. RIL 30 3. EOGIL 30.1.64 Parties means the Parties signatory to this Contract including their successors and permitted assigns under this Contract and the term Party means any of the Parties.1.65 Petroleum means Crude Oil and/or Natural Gas existing in their natural condition.1.66 Petroleum Operations means as the context may require Exploration Operations Development Operations or Production Operations or any combination of such operations including but not limited to collection of seismic information drilling and completion and Recompletion of Wells construction operation and maintenance of all necessary facilities plugging and abandonment of Wells environmental protection transportation storage sale or disposition of Petroleum to the Delivery Point Site Restoration and all other incidental operations or activities as may be necessary.1.67 Production Costs means those costs and expenditures incurred in carrying out Production Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof.1.68 Production Operations means all operations conducted for the purpose of producing Petroleum from the Contract Area after the commencement of production from the Contract Area including the operation and maintenance of all necessary facilities therefor.1.69 Profit Petroleum means all Petroleum produced and saved from the Contract Area in a particular period as reduced by Cost Petroleum and calculated as provided in Article 14.1.70 Recompletion means an operation whereby a completion in one zone is abandoned in order to attempt a completion in a different zone within the existing wellbore.1.71 Reservoir means a naturally occurring discrete accumulation of Petroleum.1.72 Section means a section of the Accounting Procedure.1.73 SelfSufficiency means in relation to any

Financial Year that the volume of Crude Oil and Crude Oil equivalent of Petroleum products exported from India during that Financial Year either equals or exceeds the volume of Crude Oil and Crude Oil equivalent of Petroleum products imported into India during the same Financial Year.1.74

Site Restoration shall mean all activities required to 10 return a site to its state as of the Effective Date pursuant to the Contractors environmental impact study or to render a site compatible with its intended afteruse to the extent reasonable after cessation of Petroleum Operations in relation thereto and shall include where appropriate proper abandonment of Wells or other facilities removal of equipment and structures whether installed before or after the Effective Date and debris establishment of compatible contours and drainage replacement of top soil revegetation slope stabilization infilling of excavations or any other appropriate actions in the circumstances.1.75

Subcontractor means any company or person contracted by the Operator to provide services with respect to the Petroleum Operations.1.76 Well means a borehole made by drilling in the course of Petroleum Operations but does not include a seismic shot hole.1.77 Work Programme means all the plans formulated for the performance of the Petroleum Operations.1.78 Year means Financial Year.

11 ARTICLE 2 DURATION2.1 The term of this Contract shall be for a period of twenty five 25 years from the Effective Date unless the Contract is terminated earlier in accordance with its terms but may be extended on such terms and conditions as may be mutually agreed by the Parties hereto.

12 ARTICLE 3 RELINQUISHMENT3.1 The Contractor may with the approval of the Management Committee voluntarily relinquish a portion of the Contract Area other than an area for which a Development Plan has been approved. Contractor shall give the Government written notice of relinquishments thirty 30 days prior to the end of any Calendar Year.3.2 Relinquishment of less than all of the Contract Area shall be in blocks of not less than one hundred square kilometres 100 sq. kms. and be of such shape and location as the Government may deem appropriate for enabling effective exploration and exploitation of such area.3.3 Relinquishment of all or a part of the Contract Area or termination of the Contract shall not be construed as absolving the Contractor of any liability undertaken or incurred by the Contractor in respect of the Contract Area prior to the date of such

relinquishment or termination. 13 ARTICLE 4 WORK PROGRAMME4.1 The Contractor shall commence Petroleum Operations not later than six 6 months from the Effective Date.4.2 As soon as possible after the Effective Date in respect of the period ending with the last day of the Financial Year in which the Effective Date falls and thereafter ninety 90 days before commencement of each following Financial Year the Contractor shall submit to the Management Committee through the Operating Committee the Work Programmes and budgets relating to Petroleum Operations including the Minimum Work Obligations to be carried out during the ensuing Financial Year.4.3 The Contractor may propose amendments to the details of an approved Work Programme and budget in the light of the then existing circumstances and shall submit to the Management Committee through the Operating Committee modifications or revisions to the Work Programme and budgets. 14

ARTICLE 5 MANAGEMENT COMMITTEE5.1 For the purpose of proper and expeditious performance of Petroleum Operations under the provisions of this Contract there shall be constituted a committee to be called the Management Committee.5.2 The Management Committee shall consist of four 4 members one 1 member nominated by and representing Government and one 1 member nominated by and representing each constituent of the Contractor. The member nominated by ONGC shall act as chairman.5.3 A representative of the Operator acting as the convenor shall call the meetings of the Management Committee.5.4 Government and the Contractor may nominate alternate members with full authority to act in the absence and on behalf of the members nominated under Article 5.2 and may at any time nominate another member or alternate member to replace any member nominated earlier by notice to other members of the Management Committee.5.5 A quorum of the Management Committee shall consist of three 3 members.5.6 The following matters shall be submitted to the Management Committee for approval a annual Work Programmes and budgets and any modifications or revisions thereto as proposed by the Operating Committee for Exploration Operations Development Operations and/or Production Operations; b proposals for an Appraisal Programme the declaration of a New Discovery as a Commercial Discovery and the approval of Development Plans as may be required under this Contract or revisions or additions to an Appraisal

Programme or a Development Plan; c delineation of a Field and a Development Area; d appointment of auditors; e collaboration with lessees or contractors of other areas; f claims or settlement of claims for or on behalf of or against the Contractor in excess of limits specified in the Operating Agreement or fixed by the Management Committee from time to time; g any proposed mortgage charge or encumbrance on petroleum assets petroleum reserves or production of 15 Petroleum; h any other matter required by the terms of this Contract to be submitted for the approval of the Management Committee; i any other matter which the Contractor or the Operating Committee dees to submit to it.

5.7 The Management Committee shall not take any decision without obtaining prior approval of the Government where such approval is required under this Contract.

5.8 The Management Committee shall meet at least once every three 3 months or more frequently at the request of any member. Operator shall convene each meeting by notifying the members at least twenty eight 28 days prior to such meeting or a shorter period of notice if the members unanimously so agree of the time and place of such meeting and the purpose thereof and shall include in such notice a provisional agenda for such meeting. The Operator shall be responsible for processing the final agenda for such meeting and the agenda shall include all items of business requested by the members to be included provided such requests are received by the Operator at least ten 10 days prior to the date fixed for the meeting. The Operator shall forward the agenda to the members at least nine 9 days prior to the date fixed for the meeting. Matters not included in the agenda may be taken up at the meeting by any member with the unanimous consent of all the members.

5.9 The Chairman and in his absence any other member nominated by ONGC shall preside over the meetings of the Management Committee.

5.10 The Operator shall appoint one of the members nominated by the constituents of the Contractor as secretary to the Management Committee with responsibility inter alia for preparation of the minutes of every meeting in the English language and provision to every member of the Management Committee with two 2 copies of the minutes not later than twentyeight 28 days after the date of the meeting.

5.11 Within twentyone 21 days of the receipt of the minutes of a meeting members shall notify the Operator and the other members of their

approval of the minutes by putting their signatures on one copy of the minutes and returning the same to the Operator or by indicating such approval to the Operator by telex cable or facsimile with copies to the other members. Any member may suggest any modification amendment or addition to the minutes by telex cable or facsimile to the Operator and other members or by indicating such suggestions when returning the copy of the minutes to the Operator. If the Operator or any other member does not agree with the modification amendment or addition to the 16 minutes suggested by any member the matter shall be brought to the attention of the other members and resubmitted to the Management Committee for approval at the next meeting and the minutes shall stand approved as to all other matters. If a member fails to appropriately respond within the aforesaid twentyone 21 day period as herein provided the minutes shall be deemed approved by such member.

5.12 The meetings of the Management Committee shall be held in New Delhi India unless otherwise mutually agreed by the members of the Management Committee.

5.13 All matters requiring the approval of the Management Committee shall be approved by a vote of three 3 or more members of the Management Committee one 1 of whom shall be the Government representative.

17 ARTICLE 6 OPERATORSHIP AND OPERATING AGREEMENT

6.1 EOGIL shall be the Operator for purposes of this Contract.

6.2 No change in operatorship shall be effected without the consent of the Government which consent shall not be unreasonably withheld.

6.3 The operating functions required of the Contractor under this Contract shall be performed by the Operator on behalf of all constituents of the Contractor subject to and in accordance with the terms and provisions of this Contract and generally accepted international petroleum industry practice.

6.4 The constituents of the Contractor shall execute a mutually agreed Operating Agreement. The Agreement shall be consistent with the provisions of this Contract and shall provide for among other things a the appointment resignation removal and responsibilities of the Operator; b the establishment of an Operating Committee; c functions of the Operating Committee taking into account the provisions of the Contract procedures for decision making frequency and place of meetings; and d contribution to costs default sole risk disposal of petroleum and assignment as between the parties to the Operating Agreement.

18

ARTICLE 7 GENERAL RIGHTS AND OBLIGATIONS OF THE PARTIES

7.1 Subject to the provisions of this Contract the Contractor shall have but not be limited to the following rights a the exclusive right during the term hereof to carry out Petroleum Operations in the Contract Area and to recover costs and expenses as provided in this Contract; b the right to use free of charge such quantities of Petroleum produced from any Field as are reasonably required for conducting Petroleum Operations in the Contract Area in accordance with generally accepted practices in the international petroleum industry; c the right to lay build construct or install pipelines roads bridges ferries aerodromes landing fields radio telephones satellite communications and related communication and infrastructure facilities and exercise other ancillary rights as may be reasonably necessary for the conduct of Petroleum Operations subject to such approvals as may be required which shall not be unreasonably withheld under the applicable laws andor regulations in force from time to time for the regulation and control thereof; d the right to have an expatriate work force as required and necessary together with their required personal effects; e the right to flare Gas temporarily when and as necessary provided the Operator shall give notice thereof to the Government within fortyeight 48 hours of the start of such flaring and the issue shall be discussed in the next meeting of the Management Committee; f the right to use all wells equipment and facilities installed as of the Effective Date in the Contract Area Assets free of any additional cost or charges or encumbrances and assignment of such Assets to Operator on behalf of the Contractor; g such other rights as are specified in this Contract.

7.2 The Government reserves the right to itself or to grant to the Lessee or others the right to prospect for and mine minerals or substances other than Petroleum within the Contract Area; provided however that if after the Effective Date the Lessee or others are issued rights or the Government proceeds directly to prospect for and mine in the Contract Area for any minerals or substances other than 19 Petroleum the Contractor shall use reasonable efforts to avoid obstruction to or interference with such operations within the Contract Area and in either case the Government shall use reasonable efforts to ensure that operations carried out do not obstruct or unduly interfere with Petroleum Operations in the Contract Area. In the

event of any conflict Petroleum Operations shall take preference.7.3 The Contractor shall a except as otherwise expressly provided in this Contract conduct all Petroleum Operations at its sole risk cost and expense and provide all funds necessary for the conduct of Petroleum Operations including funds for the purchase or lease of equipment materials or supplies required for Petroleum Operations as well as for making payments to employees and Subcontractors; b conduct all Petroleum Operations within the Contract Area diligently expeditiously efficiently and in a safe and workmanlike manner in accordance with good international petroleum industry practice pursuant to the approved Work Programmes; c ensure provision of all information data samples etc. which the Contractor may be required to furnish under the applicable laws; d ensure that all equipment materials supplies plant and installations used for Petroleum Operations comply with generally accepted standards in the international petroleum industry and are of proper construction and kept in good working order; e in the preparation and implementation of Work Programmes and in the conduct of Petroleum Operations follow good international petroleum industry practices with such degree of diligence and prudence reasonably and ordinarily exercised by experienced parties engaged in a similar activity under similar circumstances and conditions; f after the designation of a Field and a Development Area pursuant to this Contract forthwith proceed to take all necessary action for prompt and orderly development of the Field and the Development Area and for the production of Petroleum in accordance with the terms of this Contract; g appoint a technically competent and sufficiently experienced representative and in his absence a suitably qualified replacement therefor who shall be resident in India and who shall have full authority to take such steps as may be necessary to implement this Contract and whose names shall on appointment within 20 ninety 90 days after commencement of the first Contract Year be made known to the Government; h provide acceptable working conditions living accommodation and access to medical attention and nursing care in the Contract Area for all personnel employed in Petroleum Operations and extend these benefits to other persons who are engaged in or assisting in the conduct of Petroleum Operations in the Contract Area; i be always mindful of the rights and interests of India in

the conduct of Petroleum Operations;7.4 The infrastructure such as pipelines as may be developed established by the Contractor within the country may to the extent capacity is available be available to the Government or any other entity upon payment of compensation which shall include but not be limited to cost of operation repair maintenance interest and profit. The Government and any other entity using any of Contractors facilities shall indemnify and hold harmless Contractor from and against any and all loss damage or injury arising out of or connected with such use. 21

ARTICLE 8 GOVERNMENT ASSISTANCE8.1 Upon application in the prescribed manner and subject to compliance with applicable laws and relevant procedures the Government will without any cost to itself a provide the right of ingress and egress from the Contract Area and any facilities used in Petroleum Operations wherever located and which may be within their control; b use their good offices when necessary to assist Contractor in procurement of facilities and services required for execution of Petroleum Operations including necessary approvals permits consents authorisations visas work permits licenses rights of way easement surface rights and security protection required pursuant to this Contract and which may be available from resources within the Governments control; c use their good offices to assist in identifying and making available necessary priorities for obtaining local goods and services; d in the event that onshore facilities are required outside the Contract Area for Petroleum Operations including but not limited to storage loading and processing facilities pipelines and offices use their good offices in assisting the Contractor to obtain from the authorities of the state government in the state in which such facilities are required such licenses permits authorizations consents security protection surface rights and easements as are required for the construction and operation of the said facilities by the Contractor; e in the event there is no economical passage other than through national parks sanctuaries mangroves wetlands of national importance biosphere reserves or other biologically sensitive areas assist in obtaining the prior written permission of the concerned authorities.8.2 ONGC shall provide data if any related to the Contract Area to the Contractor which has not been previously provided.8.3 Environmental Clearances if any at the Effective Date shall be assigned to EOGIL without obligation to remediate

or correct any prior commission of omission by ONGC but obligations after the Effective Date shall be binding on Contractor.

22 ARTICLE 9 DISCOVERY DEVELOPMENT AND PRODUCTION

9.1 If and when a New Discovery is made within the Contract Area the Contractor shall forthwith inform the Government of the Discovery; b promptly thereafter but in no event later than a period of thirty 30 days from the date of such Discovery furnish to the Government particulars in writing of the Discovery; c promptly run tests to determine whether the New Discovery is of potential commercial interest and within a period of sixty 60 days after completion of such tests and analysis of results submit a report to the Management Committee and the Government containing data obtained from such tests and its analysis and interpretation thereof together with a written notification to the Government of whether in the Contractors opinion such New Discovery is of potential commercial interest and merits appraisal.

9.2 If pursuant to Article 9.1c the Contractor notifies the Government that a New Discovery is of potential commercial interest the Contractor shall prepare and submit to the Management Committee within one hundred and twenty 120 days of such notification a proposed Appraisal Programme with a Work Programme and budget to carry out an adequate and effective appraisal of such New Discovery designed to achieve both the following objectives a determine without delay and in any event within the period specified in Article 9.5 whether such New Discovery is a Commercial Discovery; and b determine with reasonable precision the boundaries of the area to be delineated as a Field.

9.3 The proposed Appraisal Programme for a New Discovery shall be considered by the Management Committee within fortyfive 45 days after submission thereof pursuant to Article 9.2. The Appraisal Programme together with the Work Programme and budget submitted by the Contractor revised in accordance with any agreed amendments or additions thereto approved by the Management Committee shall be adopted as the Appraisal Programme and the Contractor shall promptly commence implementation thereof; and the Yearly budget adopted pursuant to Article 4 shall be revised accordingly. Where in the case of an Existing Discovery Contractor desires to carry out additional appraisal work the Contractor shall submit its proposed Appraisal Programme in respect of the Existing Discovery with a Work Programme and budget to

the Management Committee for its approval within 23 one hundred twenty 120 days of the Effective Date.

9.4 The Contractor shall unless otherwise agreed in respect of a New Discovery of Crude Oil advise the Management Committee by notice in writing within a period of twentyfour 24 months from the date on which the notice provided for in Article 9.1 was delivered whether such New Discovery is a Commercial Discovery or not. Such notice shall be accompanied by a report on the New Discovery setting forth all relevant technical and economic data as well as all evaluations interpretations and analysis of such data and feasibility studies relating to the New Discovery prepared by or for the Contractor with respect to the Discovery. If the Contractor is of the opinion that Petroleum has been discovered in commercial quantities it shall propose that the Government or Management Committee as the case may be declare the New Discovery as a Commercial Discovery based on the report submitted. In respect of a New Discovery of Gas the provisions of Article 21 shall apply.

9.5 The Management Committee shall within fortyfive 45 days of the date of the notice referred to in Article 9.4 consider the proposal of the Contractor and request any other additional information it may reasonably require so as to reach a decision on whether or not to declare the New Discovery as a Commercial Discovery. Such decision shall be made within the later of a ninety 90 days from the date of notice referred to in Article 9.4 or b ninety 90 days of receipt of such other information as may be reasonably required under this Article 9.5. In the case of an Existing Discovery Contractor shall within ninety 90 days of the Effective Date propose a Development Plan following the plan brought out in Appendix G intended to achieve the production profile brought out in Appendix H containing the detailed information required in Article 9.6 with supporting budget. Where a Development Plan is so agreed it shall be the approved Development Plan pursuant to Article 9 hereof.

9.6 If a New Discovery is declared commercial the Contractor shall submit to the Management Committee a comprehensive plan for the development of the Commercial Discovery within two hundred 200 days of the declaration of the Discovery as a Commercial Discovery. Such plan shall contain detailed proposals by the Contractor for the construction establishment and operation of all facilities and services for and inental to the recovery

storage and transportation of the Petroleum from the proposed Development Area to the Delivery Point together with all data and supporting information including but not limited to a Description of the nature and characteristics of the 24 Reservoir data statistics interpretations and conclusions on all aspects of the geology reservoir evaluation petroleum engineering factors reservoir models estimates of reserves in place possible production magnitude nature and ratio of Petroleum fluids and analysis of producible Petroleum; b Outlines of the development project and/or alternative development projects if any describing the production facilities to be installed and the number of wells to be drilled under such development project and/or alternative development projects if any; c Estimate of the rate of production to be established and projection of the possible sustained rate of production in accordance with generally accepted international petroleum industry practice under such development project and/or alternative development project if any which will ensure that the area does not suffer an excessive rate of decline of production or an excessive loss of reservoir pressure; d estimates of Development Costs and Production Costs under such development project and/or alternative development projects if any; e Contractors recommendations as to the particular project that it would prefer if any; f Work Programme and budget for Development and Production Operations; g anticipated adverse impact on the environment and measures to be taken for prevention or minimization thereof and for general protection of the environment in conduct of operations; and h production profiles financial commercial analysis of the project proposal.

9.7 Any proposed Development Plan submitted by the Contractor pursuant to Articles 9.5 and/or 9.6 will be approved by the Management Committee with such amendments and modifications as may be agreed upon by the Contractor within seventyfive 75 days of submission of the Development Plan which approval shall not be unreasonably withheld. If such a Development Plan has not been approved by the Management Committee within the seventyfive 75 day period the Contractor shall have the right to submit such plan directly to the Government for approval which approval shall not be unreasonably withheld. The submission will be answered within sixty 60 days of receipt.

9.8 The Management Committee shall obtain such approvals from the Government as may be required

except where this Contract provides that the Contractor may obtain such approvals directly.9.9 If the Management Committee fails to declare a New Discovery of Oil to be commercial while the Contractor consider that it is commercial or the Management Committee fails to declare the New Discovery as a Commercial Discovery within the time limit stipulated in Article 9.5 hereof the Contractor may declare the New Discovery as a Commercial Discovery and submit development and production plans in respect of the Discovery to the Management Committee as per the provisions of Article 9.6 and after such plans have been approved by the Management Committee the Contractor shall acting solely provide the entire Development Costs and undertake development of the Oil Field. If however the Field turns out to be noncommercial the entire Development Cost of the Field shall be borne solely by the Contractor and shall not be recoverable as Cost Petroleum from any other Field or Contract Area but shall be recoverable solely from such Field.9.10 In the event that the Government considers a New Discovery to be commercial but the Contractor considers the same as noncommercial the Government shall give notice to the Contractor to that effect and thereafter the Field relating to such New Discovery shall be excluded from the Contract Area for all purposes. In this event the Contractor shall have no claim on the production from such Field.9.11 Work Programmes and budgets for Development and Production Operations shall be submitted to the Management Committee as soon as possible after the designation of a Development Area and thereafter not later than 31st December each Calendar Year in respect of the Financial Year immediately following.9.12 The Management Committee when considering any Work Programme and budget may require the Contractor to prepare an estimate of potential production to be achieved through the implementation of the programme and budget for each of the three 3 Financial Years following the Financial Year to which the Work Programme and budget relate. If major changes in Financial Year to Financial Year estimates of potential production are required these shall be based on concrete evidence necessitating such changes.9.13 Not later than the fifteenth 15 day of January each Calendar Year in respect of the Financial Year immediately following the Contractor shall determine the Programme Quantity. The Programme Quantity for any

Financial Year shall be the maximum quantity of Petroleum based on Contractors estimates as approved by the Management Committee which can be produced from a Field consistent with sound international petroleum industry practices and 26 minimizing unit production cost taking into account the capacity of the producing Wells gathering lines separators storage capacity and other production facilities available for use during the relevant Financial Year as well as the transportation facilities up to the Delivery Point.

9.14 Proposed revisions to the details of a Development Plan or an annual Work Programme or budget in respect of Development and Production Operations shall for good cause and if the circumstances so justify be submitted to the Management Committee for approval through the Operating Committee.

27 ARTICLE 10 UNIT DEVELOPMENT

10.1 If a Reservoir in a New Discovery Area is situated partly within the Contract Area and partly in an area in India over which other parties have a contract or licenselease to conduct Petroleum Operations the Government may for securing the most effective recovery of Petroleum from such Reservoir by notice in writing to the Contractor require that the Contractor a collaborate and agree with such other parties on the joint development of the Reservoir; b submit such agreement between the Contractor and such other parties to the Government for approval; and c prepare a plan for such joint development of the Reservoir within one hundred and eighty 180 days of the approval of the agreement referred to in b above.

10.2 If no plan is submitted within the period specified in Article 10.1c or such longer period as the Contractor and other parties may agree or if such plan as submitted is not acceptable to the Government and the parties cannot agree on amendments to the proposed joint development plan the Government may cause to be prepared at the expense of the Contractor and the other parties referred to in Article 10.1 a plan for such joint development consistent with generally accepted practices in the international petroleum industry which shall take into consideration any plans and presentations made by the Contractor and the aforementioned other parties.

10.3 If the Parties are unable to agree on the plan for joint development then any of them may refer the matter to a sole expert for final determination pursuant to Article 33 provided that the Contractor may in case of any disagreement on the issue of joint development or the proposed

joint development plan or within sixty 60 days of determination by a sole expert notify the Management Committee that it elects to surrender its rights in the New Discovery Area in lieu of participation in a joint development.10.4 If a proposed joint development plan is agreed and adopted by the parties or adopted following determination by the sole expert the plan as finally adopted shall be the approved joint development plan and the Contractor shall comply with the terms of the Development Plan as if the Commercial Discovery is established.10.5 The provisions of Articles 10.1 10.2 10.3 and 10.4 shall apply MUTATIS MUTANDIS to a New Discovery of a Reservoir located partly within the Contract Area which although not equivalent to a Commercial Discovery if developed alone 28 would be a Commercial Discovery if developed together with that part of the Reservoir which extends outside the Contract Area to areas subject to contract or given on licenselease for Petroleum Operations by other parties.10.6 If a New Discovery is situated partly within the Contract Area and partly outside the Contract Area the area outside the Contract Area over which at the time of the making of the New Discovery by the Contractor no production sharing contract similar to this Contract has been granted or is under negotiation andor no licenselease to conduct petroleum operations has been granted the Government will favourably consider the extension of the Contract Area to include the entire area of the Reservoir if so requested by the Contractor. 29 ARTICLE 11 MEASUREMENT OF PETROLEUM11.1 The volume and quality of Petroleum produced and saved from a Field shall be measured by methods and appliances generally accepted and customarily used in generally accepted international petroleum industry practice.11.2 The Government may at all reasonable times inspect and test the appliances used for measuring the volume and determining the quality of Petroleum provided that any such inspection or testing shall be carried out in such a manner so as not to unduly interfere with Petroleum Operations.11.3 Before commencement of production in a Field except for the Fields which are producing as of the Effective Date the Parties shall mutually agree on a methods to be employed to optimize the measurement of volumes of Petroleum; b the point at which Petroleum shall be measured and the respective shares allocated to the Parties in accordance with the terms of this

Contract; c the frequency of inspections and testing of measurement appliances and relevant procedures relating thereto; and d the consequences of a determination of an error in measurement.

In the case of existing Fields this Article 11.3 shall be given force as soon as practicable after the Effective Date but in any case not later than one hundred eighty 180 days after the Effective Date.

11.4 The Contractor shall undertake to measure the volume and quality of the Petroleum produced and saved from a Field at the agreed measurement point consistent with generally accepted practices in the international petroleum industry. The Contractor shall not make any alteration in the agreed method or procedures for measurement or to any of the approved appliances used for the purpose without the written consent of the Government.

11.5 The Contractor shall give the Government timely notice of its intention to conduct calibration operations or any agreed alteration for such operations and the Government shall have the right to be present and observe either directly or through authorized representatives such operations.

30 ARTICLE 12 PROTECTION OF THE ENVIRONMENT

12.1 The Government and the Contractor recognise that Petroleum Operations will cause some impact on the environment in the Contract Area. Accordingly in performance of the Contract the Contractor shall conduct its Petroleum Operations with due regard to concerns with respect to protection of the environment and conservation of natural resources. In the furtherance of any laws regulations and rules promulgated by the Government the

Contractor shall employ generally accepted industrial standards including as required advanced techniques practices and methods of operation for the prevention of Environmental Damage in

conducting its Petroleum Operations; b take necessary and adequate steps to prevent Environmental Damage and where some adverse impact on the environment is unavoidable to

minimize such damage and the consequential effects thereof on property and people; and c adhere to the guidelines limitations or restrictions if any imposed by Environmental Clearance as applicable

on the Effective Date and as such Environmental Clearance may be revised expanded or replaced as a result of Contractors applications duly submitted after the Effective Date.

12.2 If the Contractor fails to substantially comply with the provisions of Article 12.1 or materially contravenes any relevant

law and such failure or contravention results in substantial Environmental Damage the Contractor shall forthwith take all necessary and reasonable measures to remedy the failure and the effects thereof.

12.3 If the Government has on reasonable grounds reason to believe that any works or installations erected by the Contractor or any operations conducted by the Contractor are endangering or may endanger persons or any property of any person or are causing avoidable pollution or are harming fauna and flora or the environment to a degree which is unlawful the Government may pursuant to applicable law require the Contractor to take remedial measures within such reasonable period as may be determined by the Government and if appropriate repair such damage. The Government may pursuant to applicable law require the Contractor to discontinue Petroleum Operations in whole or in part until the Contractor has taken such action.

12.4 The Contractor shall within one hundred twenty 120 days of the Effective Date cause a person or persons with special knowledge on environmental matters approved by the 31 Government to carry out an environmental impact study in order a to determine at the time of the study the prevailing situation relating to the environment human beings and local communities the wildlife and marine life in the Contract Area and in the adjoining or neighbouring areas; and b to establish the likely effect on the environment human beings and local communities the wildlife and marine life in the Contract Area and in the adjoining or neighbouring areas in consequence of the relevant phase of Petroleum Operations to be conducted under this Contract.

12.5 The Contractor shall ensure that a Petroleum Operations are conducted in an environmentally acceptable and safe manner consistent with good international petroleum industry practice and that such Petroleum Operations are properly monitored; b the pertinent completed environmental impact studies are made available to its employees and to its Subcontractors to develop adequate and proper awareness of the measures and methods of environmental protection to be used in carrying out the Petroleum Operations; and c the contracts entered into between the Contractor and its Subcontractors relating to its Petroleum Operations shall include the provisions stipulated herein and any established measures and methods for the implementation of the Contractors obligations in relation to the environment under

this Contract.12.6 The Contractor shall prior to conducting any drilling activities prepare and submit for review by the Government contingency plans for dealing with oil spills fires acents and emergencies designed to achieve rapid and effective emergency response. The plans referred to above shall be discussed with the Government and concerns expressed shall be taken into account.

12.6.1 In the event of an emergency acent oil spill or fire arising from Petroleum Operations affecting the environment the Contractor shall forthwith notify the Government and shall promptly implement the relevant contingency plan and perform such Site Restoration as may be necessary. 12.6.2 In the

event of any other emergency or acent arising from the Petroleum Operations affecting 32 the environment the Contractor shall take such action as may be prudent and necessary in accordance

with good international petroleum industry practice in such circumstances.12.7 In the event that the

Contractor fails to take necessary action to comply with any of the terms contained in Article 12.5 and Article 12.6 within a reasonable period specified by the Government the Government after

giving the Contractor reasonable notice in the circumstances may take any action which may be necessary to ensure compliance with such terms and recover from the Contractor immediately after

having taken such action all costs and expenditures incurred in connection with such action together with such interest as may be determined in accordance with Section 1.7 of Appendix C of this

Contract.12.8 Contractor shall notify the Government upon determination by it that the estimated remaining recoverable reserves of any Field net of operating costs equal two and onehalf 2 12 times

the estimated abandonment cost whereupon the Government shall within sixty 60 days take control of the Field and the abandonment obligation or failing which the Contractor may then proceed to

recover the abandonment cost from the remaining production and abandon such Field.12.9 Any and all costs incurred by Contractor pursuant to this Article shall be cost recoverable including but not

limited to sinking funds established for abandonment.12.10 The responsibility of the Contractor for the environment hereunder shall be limited to damage to the environment which a occurs after the

date of the environmental impact assessment EIA made to establish the benchmark condition. The EIA will be conducted as soon after the Effective Date as is reasonably possible; b results from an

act or omission of Contractor in violation of existing law; and c notwithstanding the above Contractor shall be responsible for any damage to the environment because of any evidence of Oil spill blowout fire etc. during the course of Joint Operations from the Effective Date.

33 ARTICLE 13 RECOVERY OF COSTS

13.1 The Contractor shall be entitled to recover Contract Costs out of the total volume of Petroleum produced and saved from the Contract Area in each Financial Year in accordance with the provisions of this Article and in respect of sole risk or exclusive operations Article VII of the Operating Agreement.

13.1.1 Development Costs incurred by the Contractor in the Contract Area shall be aggregated and the Contractor shall be entitled to recover out of Cost Petroleum the aggregate of such Development Costs at the rate of one hundred percent 100 per annum provided however that subject to the remaining provisions of this Article 13.1 the Contractor shall not for the purposes only of determining the volume of Petroleum to which Contractor shall be entitled under Article 13.1 as Cost Petroleum claim as Contract Costs Contractors Development Costs incurred after the Effective Date in connection with Development Operations under the Development Plan for Panna and Mukta Fields as those Fields are determined in the Development Plan first approved by the Management Committee which exceed Contractors Cost Recovery Limit as hereinafter defined.

13.1.2 For the purposes of this Article 13.1 Contractors Cost Recovery Limit means costs incurred after the Effective Date relating to the construction and/or establishment of such facilities as are necessary to produce process store and transport Petroleum from within the Existing Discoveries in order to enable Oil production of thirtyeight thousand three hundred barrels per day 38300 BOPD in accordance with the Development Plan for the Panna and Mukta Fields. Such costs shall include costs incurred in relation to those items illustrated in Appendix G and matters in connection therewith. Appendix G Annex G1 further describes Companies development concept based on an assumed project start date of 1st July 1993 and Parties understand and agree that the schedules and activities contained in such assessment shall be revised subject to Management Committee approval by the Contractor in Contractors Development Plan first submitted pursuant to this Contract. The Parties agree that for the purposes of this Article 13.1 the Contractors Cost Recovery

Limit shall be the sum of Five Hundred Seventyseven Million Five Hundred Thousand U.S. Dollars US\$775,000,000. 34 13.1.3 The Parties acknowledge that the amount representing Contractors Cost Recovery Limit has been agreed by Contractor on the basis of the following assumptions and/or factors and/or information a Included in calculations for the Cost Recovery Limit are costs relating to Gas compression offshore required for delivering Gas into ONGCs pipeline; excluded from the Cost Recovery Limit are Site Restoration and exploration or appraisal drilling; b the Cost Recovery Limit does not include any costs for the development of any satellite Fields; c the Contractor being able to obtain all necessary approvals including Government and state government approvals to enable Contractor to carry out the Development Operations contemplated by the Development Plan for the Panna and Mukta Fields in accordance with the timing set out in such plan; d the data relating to the Contract Area provided by ONGC from time to time prior to the Effective Date inclusive of the data package pertaining to the Contract Area prepared by ONGC and made available for inspection and purchase by the Companies pursuant to the Governments Notice Inviting Offers for Joint Ventures to Develop Medium Sized Oil and Gas Field in India 1992; e international market conditions relating to the availability and cost of materials and services in the international petroleum industry in constant 1993 United States Dollars; f the range of physical reservoir characteristics in respect of the Oil and Gas Fields comprising the Existing Discoveries not being materially different from the ranges for such characteristics as revealed in the data referred to in Article 13.1.3d on which Companies based their assessment as described in Annex G1 to Appendix G; g with regard to onshore facilities not included in the Cost Recovery Limit as per Articles 13.1.3a and 13.1.4a ONGC and Companies will determine a fee/terms and 35 conditions for the referenced facilities which fee shall be determined by an internationally recognized expert in the field who shall be selected by two members of the Operating Committee from a group of three internationally recognized experts selected by ONGC and the cost of the facilities shall be cost recoverable and not subject to the Cost Recovery Limit; and h no capital investment of a material nature is required on the Equipment contained in Appendix F. 13.1.4 Having regard inter alia to the matters referred to in Article 13.1.3

the Parties agree as follows a Included in calculations for the Cost Recovery Limit are costs relating to Gas compression offshore required for delivering Gas into ONGCs pipeline system; excluded from the Cost Recovery Limit are water injection; Site Restoration and exploration or appraisal drilling and capital investment if any of a material nature on the Equipment contained in Exhibit F shall not be subject to the Cost Recovery Limit; b the costs of developing the reserves and/or potential reserves and/or satellite Fields referred to in Article 13.1.3b shall not be subject to the Cost Recovery Limit notwithstanding that the development within the Contract Area of such reserves and/or potential reserves and/or satellite Fields may include shared flowlines injection lines Gaslift lines and other facilities with those constructed as part of the Development Plan for the Panna and Mukta Fields; c in the event that the Contractors Cost Recovery Limit is exceeded as a result of i delays in carrying out the Development Operations referred to in Article 13.1.3c due to a delay in obtaining any necessary approval; ii material changes to the Development Plan for the Panna and Mukta Fields 36 necessitated by Contractors review of data provided if any to the Companies by the Government and/or ONGC after the Effective Date where the Companies are able to establish that had such data been available prior to the Effective Date then the Companies acting reasonably would have included such changes in the Development Plan for the Panna and Mukta Fields; iii a material change to the international market conditions referred to in Article 13.1.3e; iv a variation to the Development Plan for the Panna and Mukta Fields approved by the Management Committee; or v an event of force majeure as provided in Article 31; vi capital investments of a material nature reasonably required as at the Effective Date on the Equipment shown in Appendix F; then the Management Committee shall at the request of the Operator in a meeting convened under Article 5.8 promptly consider what if any increase should be made to the Contractors Cost Recovery Limit to fairly reflect the circumstances in question PROVIDED THAT in the case of delays referred to in Article 13.1.3c the Management Committee shall not be obligated to consider any increase where and to the extent that such delay has been caused by the Companies failure to act in a diligent manner. 13.1.5 In the event that a there is any dispute between the Parties whether or to what

extent a circumstance referred to in Article 13.1.4c has arisen or resulted in the Contractors Cost Recovery Limit being exceeded; or b the Management Committee is unable to agree whether an increase should be made to the Contractors Cost Recovery Limit or is unable to agree on the amount of any such increase; 37 then at any time after thirty 30 days from the date of the Management Committee meeting referred to in Article 13.1.4c any Party shall be at liberty to refer the matter to arbitration in accordance with the provisions of Article 33.

13.1.6 Costs incurred by the Companies prior to the Effective Date hereof which have been approved by the Government in writing shall be cost recoverable for purposes hereof after approval of the Management Committee.

13.2 Exploration Costs if any incurred by the Contractor in respect of the Contract Area up to the date of Commercial Production of Petroleum from the Contract Area shall be aggregated and the Contractor shall be entitled to recover the aggregate of such Exploration Costs out of the Cost Petroleum from the Contract Area at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date of such Commercial Production.

13.3 The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Exploration Costs which it has incurred in that Contract Area in any Financial Year after the date of Commercial Production from the Contract Area at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date such Exploration Costs are incurred.

13.4 The Contractor shall be entitled to recover Exploration Costs as provided in Articles 13.2 and 13.3 in relation to the values of the quantity of Petroleum produced saved and sold from the Contract Area in the relevant year provided that such Exploration Costs once recovered shall not be allowable for recovery against any other contract area.

13.5 Development Costs incurred by the Contractor in the Contract Area up to the date of Commercial Production from the Contract Area shall be aggregated and the Contractor shall be entitled to recover out of the Cost Petroleum from that Contract Area the aggregate of such Development Costs at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date of such Commercial Production from the Contract Area.

13.6 The Contractor shall be entitled to recover out of the Cost Petroleum produced from the Contract Area the

Development Costs which it has incurred on such Contract Area after the date of Commercial Production from the Contract Area at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date such Development Costs are incurred.13.7 The Contractor shall be entitled to recover in full during any Financial Year the Production Costs incurred in the 38 Contract Area out of the Cost Petroleum.13.8 If during any Financial Year the Cost Petroleum is not sufficient to enable the Contractor to recover in full the Contract Costs due for recovery in that Financial Year in accordance with the provisions of Articles 13.1 through 13.7 then subject to the provisions of Article 13.1 a recovery shall first be made of the Production Costs; and b recovery shall next be made of the Exploration Costs; and c recovery shall then be made of the Development Costs. The unrecovered portions of Contract Costs shall be carried forward to the following Financial Year and the Contractor shall be entitled to recover such Costs in such Financial Year or the subsequent Financial Years as if such costs were due for recovery in that Financial Year or the succeeding Financial Years until the unrecovered costs have been fully recovered out of Cost Petroleum from the Contract Area.13.9 For the purposes of this Article as well as Article 14 costs receipts and income shall be converted into production unit equivalents and vice versa using the relevant prices established pursuant to Article 19 for Crude Oil and Article 21 for Natural Gas.13.10 Pending completion of the calculations required to establish definitively the Contractors entitlement to Cost Petroleum from the Contract Area in any Financial Year the Contractor shall take delivery provisionally of volumes of Crude Oil and/or Natural Gas representing its estimated Cost Petroleum entitlement calculated with reference to estimated production quantities costs and prices for the Contract Area as established by the Contractor and approved by the Management Committee. Such provisional determination of Cost Petroleum shall be made every quarter on a cumulative basis. Within sixty days of the end of each Financial Year a final calculation of the Contractors entitlement to Cost Petroleum based on actual production quantities costs and prices for the entire Financial Year shall be undertaken and any necessary adjustments to the Cost Petroleum entitlement shall be agreed upon between the Government and the Contractor and made as soon as practicable

thereafter.13.11 Nothing herein contained shall provide for the recovery of costs by ONGC which were incurred prior to the Effective Date. 39 ARTICLE 14 PRODUCTION SHARING OF PETROLEUM BETWEEN CONTRACTOR AND GOVERNMENT14.1 The Contractor and the Government shall share in the Profit Petroleum from the Contract Area in accordance with the provisions of this Article. The share of Profit Petroleum in any Financial Year shall be calculated for the Contract Area on the basis of the Investment Multiple actually achieved by the Companies at the end of the preceding Financial Year for the Contract Area as provided in Appendix D.14.2 Profit Petroleum 14.2.1 When the Investment Multiple of the Companies at the end of any Financial Year is less than two 2.0 the Government shall be entitled to take and receive five percent 5 and the Contractor shall be entitled to take and receive ninetyfive percent 95 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Financial Year. 14.2.2 When the Investment Multiple of the Companies at the end of any Financial Year in respect of any Contract Area is equal to or more than two 2.0 but is less than two and onehalf 2.5 the Government shall be entitled to take and receive fifteen percent 15 and the Contractor shall be entitled to take and receive eightyfive percent 85 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Financial Year. 14.2.3 When the Investment Multiple of the Companies at the end of any Financial Year in respect of the Contract Area is equal to or more than two and onehalf 2.5 but is less than three 3.0 the Government shall be entitled to take and receive twentyfive percent 25 and the Contractor shall be entitled to take and receive seventy five percent 75 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Financial Year. 14.2.4 When the Investment Multiple of the Companies at the end of any Financial Year in respect of the Contract Area is equal to or more than three 3.0 but is less than three and onehalf 3.5 the Government shall be entitled to take and receive forty percent 40 and the Contractor shall be entitled to take and receive sixty percent 60 of the total Profit Petroleum from the Contract Area with effect from the start of 40 the succeeding Financial Year. 14.2.4 When the Investment Multiple of the Companies at the end of any Financial Year in respect of the Contract Area is equal to or more than

three and onehalf 3.5 the Government shall be entitled to take and receive fifty percent 50 and the Contractor shall be entitled to take and receive fifty percent 50 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Financial Year.14.3 The value of the Companies Investment Multiple at the end of any Financial Year in respect of the Contract Area shall be calculated in the manner provided for and on the basis of net cash flows specified in Appendix D to this Contract. However the volume of Profit Petroleum to be shared between the Government and the Contractor shall be determined for each quarter on a cumulative basis. As regards the period from the Effective Date through the end of the first full Financial Year in view of the vagaries of shortterm financial records and to assure equitable calculation of the Investment Multiple based on reasonable historical records the Investment Multiple calculated at the end of the first full Financial Year shall be applied retroactively to the Effective Date and until the actual value can be determined the provisional Investment Multiple for that period shall be calculated on the basis of Contractors estimate of revenues and expenditures as provided in the Development Plan. Pending finalization of accounts delivery of Profit Petroleum shall be taken by the Government and the Contractor on the basis of provisional estimated figures of Contract Costs production prices receipts income and any other income or allowable deductions and on the basis of the value of the Investment Multiple achieved at the end of the preceding Financial Year. All such provisional estimates shall be finally approved by the Management Committee but are deemed valid until such time as the Management Committee reaches a decision or a decision is rendered under Article 33. When it is necessary to convert monetary units into physical units of production equivalents or vice versa the price or prices determined pursuant to Articles 19 and 21 for Crude Oil and Natural Gas respectively shall be used. Within sixty 60 days of the end of each Financial Year a final calculation of Profit Petroleum based on actual costs quantities prices and income for the entire Financial Year shall be undertaken and any necessary adjustments to the sharing of Profit Petroleum shall be agreed upon between the Government and the Contractor and made as soon as is practicable thereafter.14.4 The Profit Petroleum due to the Contractor in any Financial Year from the Contract

Area shall be divided between the Parties constituting the Contractor in proportion to their 41 respective Participating Interests. 42 ARTICLE 15 TAXES ROYALTIES RENTALS ETC.15.1 The Companies and the operations under this Contract shall be subject to all fiscal legislation in India except where pursuant to any authority granted under any applicable law they are exempt wholly or partly from the application of the provisions of a particular law or as otherwise provided herein.15.2.1 For the purpose of computing profits or gains of the business consisting of and prospecting for or extraction or production of Petroleum there shall be made in lieu of the allowances admissible under the Income Tax Act 1961 such allowances as are specified in this Agreement pursuant to Section 42 in relation to a expenditure by way of infructuous or abortive exploration expenses in respect of any area surrendered prior to the beginning of Commercial Production; and b after the beginning of commercial production to expenditure incurred whether before or after such Commercial Production in respect of drilling or exploration activities or services or in respect of physical assets used in that connection.15.2.2 Payments made by the Companies pursuant to Article 16 shall be deductible for income tax purpose in the year in which payment is made by the Companies as permissible under Section 42 of the Income Tax Act 1961.15.3.1 In respect of matters not covered above deduction shall be allowed in accordance with other provisions of Income Tax Act 1961 and the rules framed thereunder.15.3.2 The revenue from the Business consisting of Petroleum Operations shall be determined in accordance with Article 19 for its Participating Interest share of Crude Oil saved and sold or otherwise disposed of from each Field and from any revenue realized on the sale of ANG or NANG referred to in Article 21 as well as any other gains or receipts from Petroleum Operations as reduced by the deductions as specified within this Article and except as herein provided all the provisions of the Income Tax Act 1961 shall apply. 4315.4 The following terms used in Section 42 of the Income Tax Act 1961 and Articles 15.2 and 15.3 shall have the meanings corresponding to the terms used in this Contract and defined in Article 1 as follows a Previous Year means the year as defined in Section 234 of the Income Tax Act 1961. b The other terms used herein and not defined in the Income Tax Act 1961 shall have the meaning therein ascribed in Article 1.15.5 Except for

income tax as otherwise provided in this Article the Government covenants to the Companies that the Companies shall not be liable to the Government for payment of a any taxes calculated by reference to income from or sale of Petroleum; or b any customs or excise duties export duties or any other statutory charge on the import or reexport of machinery plant equipment materials or supplies imported by or on behalf of Contractor or its subcontractors solely and exclusively for use in Petroleum Operations. Any such payment if the Companies are made liable shall be reimbursed by the Government.

15.6.1 The constituents of the Contractor shall be liable to pay royalties and cess on their Participating Interest share of Crude Oil and Natural Gas saved and sold in accordance with the provisions of this Agreement. The royalty on Oil saved and sold will be paid at Rs. 481 per metric ton and cess on Oil saved and sold will be paid at Rs. 900 per metric ton. Royalty on Gas saved and sold will be paid at ten percent 10 of the value at wellhead. No cess shall be payable on Gas or Condensate or other Natural Gas liquids produced in association with Gas. Royalty and cess shall not exceed the herein above amounts throughout the term of the Contract. Royalty and cess shall be payable in Indian Rupees. Any such additional payment shall be made by the Government.

15.6.2 All payments except income tax made by Contractor or its constituents as applicable under appropriate law including but not limited to taxes whether levied by the Central Government or state government or any other local or statutory authority royalties cess levies duties rentals lease rent license fees export duties 44 countervailing duties provision for sinking fund for environmental or abandonment costs or any other charges whatsoever directly attributable to Petroleum Operations shall be cost recoverable.

15.7 If any change in or to any Indian law rule or regulation by any authority dealing with income tax or other corporate tax exportimport tax customs duty or tax imposed upon Petroleum or dependent on the value of Petroleum including Royalty and cess results in a material change to the economic benefits accruing to any of the Parties to this Contract after the Effective Date the Parties shall consult promptly to make necessary revisions and adjustments to the Contract in order to maintain such expected benefits to each of the Parties.

45
ARTICLE 16 PAYMENT16.1 The Companies shall pay to ONGC in consideration of the right to

commence and carry out exploration and drilling activities in the Contract Area pursuant to and in accordance with the Notice Inviting Offers for Joint Ventures to Develop Medium Size Oil and Gas Fields in India 1992 and the bid submitted in response thereto as follows a within two 2 days following the Effective Date excluding days on which the banks in India or the United States are closed Three Million Six Hundred Thousand United States Dollars US3600000. EOGIL shall pay One Million Eight Hundred Thousand United States Dollars US1800000 and RIL shall pay One Million Eight Hundred Thousand United States Dollars US1800000. ONGCs bank wire transfer instructions are as follows ACCOUNT NUMBER 01 00000 3054 OIL NATURAL GAS CORPORATION LIMITED STATE BANK OF INDIA OVERSEAS BRANCH VIJAYA BUILDING BARAKHAMBA ROAD NEW DELHI INDIA 110 001 b When and if the hereinafter set forth production quantities are reached the Companies will within fifteen 15 days following such attainment pay ONGC in accordance with the following schedule i Another Six Million United States Dollars US6000000 after achieving a cumulative production of fifty million barrels of Oil; ii Another Nine Million United States Dollars US9000000 after achieving a cumulative production of one hundred million barrels of Oil; and iii Another Fifteen Million United States Dollars US15000000 after achieving a cumulative production of two hundred million barrels of Oil.16.2 Cumulative production shall for purposes of this Article mean Oil produced.16.3 Each Company shall pay its share of the payment in the proportion that it received Petroleum. 46 ARTICLE 17 CUSTOMS DUTIES17.1 Machinery plant equipment materials and supplies imported by a Contractor or its Subcontractors for use in Petroleum Operations shall be exempted from customs duties subject to compliance with procedures if any as may be determined pursuant to applicable customs duty legislation Article 23 and the terms herein specified.17.2 Contractor shall from time to time and as required submit to the Government a list of Subcontractors who are engaged by it for the purpose of obtaining the various categories of items pursuant to the conduct of Petroleum Operations and who may claim exemptions hereunder.17.3 In order to qualify for the exemption from customs duties as provided for in Article 17.1 all imported items for which duty exemption is being claimed shall be certified by a

representative of the Contractor to be imported under the terms of this Contract for use in carrying out Petroleum Operations and shall be certified by a representative of the Government to be eligible for such exemption pursuant to the terms of the Contract. In order to expedite such exemption Contractor may submit a certified list of qualified items up to sixty 60 days in advance of anticipated import.17.4 The Government shall have the right to inspect the records and documents of the physical item or items for which an exemption is or has been provided under Article 17.1 to determine that such item or items are being or have been imported for the purpose for which the exemption was granted. The Government shall also be entitled to inspect such physical items wherever located to ensure that such items are being used or held for the purpose herein specified and any item not being so used shall immediately become subject to payment of the applicable customs duties.17.5 Subject to Article 27 the Contractor and its Subcontractors may sell or otherwise transfer in India or sell for export all imported items which are no longer required for Petroleum Operations subject to applicable laws governing customs duties and sale or disposal of such items. 47 ARTICLE 18 DOMESTIC SUPPLY SALE DISPOSAL AND EXPORT OF CRUDE OIL18.1 Until such time as the total availability to the Government and government companies of Crude Oil from all Petroleum production activities in India meets the total national demand as determined by the Government each constituent of the Contractor shall be required to offer to the Government or its nominee all of the Contractors entitlement to Crude Oil from each Field in order to assist in satisfying the national demand provided however that nothing contained in any contract entered into by the Contractor for the supply sale or disposal of Petroleum with any nominee of the Government pursuant to this Contract shall in any manner abrogate the obligation of the Government contained herein.18.2 Pursuant to Article 18.1 and subject to Articles 18.4 and 18.6 each constituent of Contractor shall offer to sell to the Government or its nominee its total Participating Interest share of Crude Oil to which it is entitled under Articles 13 and 14 at the price determined in accordance with Article 19 for sales to Government and the Government shall have the option to purchase the whole or any portion thereof at the said price.18.3 The aforementioned

offer shall be made by each constituent of Contractor in writing at least six 6 months preceding the Financial Year in which the sale is to be made specifying the estimated quantities and grade of Crude Oil being offered based upon estimates which shall be adjusted within ninety 90 days of the end of each Financial Year on the basis of actual quantities produced and saved. The Government shall exercise its option to purchase in writing not later than ninety days 90 preceding the Financial Year in respect of which the sale is to be made specifying the quantity and grade of Crude Oil which it elects to take in the ensuing year. Failure by the Government to give such notice within the period specified shall be conclusively deemed an election to take all of the Crude Oil offered adjusted as provided herein in the ensuing Financial Year. Notwithstanding the above during the first six 6 months commencing with the Effective Date of this Contract notices cited in Article 18.3 shall be given as soon as practicable and are deemed to satisfy the notice obligations of this Article 18.3.

18.4 If during any Financial Year India attains SelfSufficiency the Government shall promptly thereafter but in no event later than the end of that Financial Year so advise the Contractor by written notice. In such event as from the end of the first quarter of the following Financial Year or such earlier date as the Parties may 48 mutually agree Governments option to purchase shall be suspended and each constituent of Contractor shall have the right to lift and export their Participating Interest share of Crude Oil until such time if any as SelfSufficiency shall have ceased to exist. If SelfSufficiency ceases to exist during a Financial Year the Government shall recover its option to purchase under Article 18.2 in respect of the following Financial Year by giving notice thereof to the Contractor as provided in Article 18.3.

18.5 All payments in respect of sales to the Government pursuant to provisions of this Article 18 shall be made by the Government within the period for credit applicable in the calculation of the price pursuant to Article 19. If no time frame for credit is applicable in such calculation payment shall be made within forty five 45 days from the date the invoice is delivered to the Government. Contractor shall submit a monthly invoice to the Government for the quantity of Crude Oil delivered. Payment shall be made in United States Dollars by bank wire to the credit of the Foreign Companys designated account with a bank within or

outside India. All amounts unpaid by the Government by the due date shall from the due date bear interest calculated on a daytoday basis at the LIBOR plus one percentage 1 point from the due date compounded daily until paid.18.6 If full payment is not received by Contractor when due as provided in Article 18.5 the Contractor shall at any time thereafter notify the Government of the default and unless such default is remedied within fifteen 15 days from the date of the notice the Contractor shall have the right unless otherwise agreed upon written notice to the Government and without prejudice to the Contractors right to recover all costs charges expenses and losses incurred by the Contractor a to suspend the Governments option to purchase under Article 18.2 and transport the Petroleum to any onshore facility and sell as each constituent of Contractor may in its absolute discretion deem fit; b without prejudice to the foregoing to freely lift sell and export all its Participating Interest share of Crude Oil subject to the destination restrictions specified in Article 18.7 until the Government has paid the due amount plus interest as provided herein; c if the payment plus interest is not received by the Contractor within one hundred and eighty 180 days from the date the payment was due to receive and export the Governments share of Profit Oil until such time as either Government has paid all amounts due plus interest or the value based on the price as deter mined in accordance with Article 19 of Governments share of Profit Oil so sold is equal to all amounts due 49 plus interest whichever first occurs; provided however that if the Government makes a payment to the Contractor after the Contractor has commenced sale of Governments share of Profit Oil and such payment together with the value of Governments share of Profit Oil sold based on the price determined in accordance with Article 19 exceeds the amount due plus interest necessary adjustment shall be carried out to refund to the Government forthwith the excess amount received by the Contractor.18.7 The Contractor shall be entitled to freely lift sell and export any Crude Oil which the Government is unable to take or has elected not to purchase pursuant to this Article 18 subject to Governments generally applicable destination restrictions to countries with which the Government for policy reasons has severed or restricted trade.18.8 No later than sixty 60 days prior to the commencement of production in a Field or Fields where production is

from more than one Field and thereafter no less than sixty 60 days before the commencement of each Financial Year the Contractor shall cause to be prepared and submitted to the Parties a production forecast setting out the total quantity of Crude Oil that it estimates can be produced from a Field during the succeeding year based on the maximum efficient rate of recovery of Crude Oil from that Field in accordance with good petroleum industry practice. No later than thirty 30 days prior to the commencement of each Calendar Quarter the Contractor shall advise its estimate of production for the succeeding Calendar Quarter and shall endeavour to produce the forecast quantity for each Calendar Quarter. Notwithstanding the above during the first six 6 months commencing with the Effective Date of this Contract notices cited in Article 18.8 shall be given as soon as practicable and are deemed to satisfy the notice obligations of this Article 18.8.

18.9 Each Party comprising the Contractor shall throughout the term of this Contract have the right to separately take in kind and dispose of all its share of Cost Petroleum and Profit Petroleum and shall have the obligation to lift the Cost Petroleum and Profit Petroleum on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the other Parties.

18.10 The Government shall throughout the term of this Contract have the right to separately take in kind and dispose of its share of Profit Petroleum and of such portion of the Contractors share of Petroleum as is purchased by the Government pursuant to Article 18 subject to Article 18.6 and shall have the obligation to lift all of the Oil on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the other Parties. Subject to Force Majeure any Party with an obligation to lift Oil and failing to do so shall compensate the other Parties for any loss of revenue due to such failure and will at its own cost and risk be liable for all inent expenses including demurrage if any.

18.11 For the purpose of implementing the provisions of Articles 18.9 and 18.10 a Crude Oil lifting procedure shall be agreed upon by the Parties as soon as practicable but no later than two 2 months after the Effective Date of this Contract. Such lifting procedure shall include but not necessarily be limited to a a procedure for notification by the Operator to the Government and to each Party comprising the Contractor of projected Crude Oil production; b a

procedure for notification by the Government and by each Party comprising the Contractor to the Operator of its expected offtake and the consequences of inability or failure to offtake. 51 ARTICLE 19 VALUATION OF OIL

19.1 For the purpose of this Contract the value of Crude Oil shall be based on the price determined as provided herein.

19.2 A price for Crude Oil shall be determined for each Calendar Month or such other period as the Parties may agree hereinafter referred to as the Delivery Period in terms of United States Dollars per Barrel FOB Delivery Point for Crude Oil produced and sold or otherwise disposed of from each Contract Area for each Delivery Period in accordance with the appropriate basis for that type of sale or disposal specified below.

19.3 In the event that some or all of Contractors total sales of Crude Oil during a Delivery Period are made to third parties in Arms Length Sales all sales so made shall be valued at the weighted average of the prices actually received by Contractor calculated by dividing the total receipts from all such sales FOB the Delivery Point by the total number of Barrels of the Crude Oil sold in such sales.

19.3.1 In the event that a portion of such third party Arms Length Sales are made on a basis other than an FOB basis as herein specified the portion shall be valued at the prices equivalent to the prices FOB the Delivery point for such sales determined by deducting all costs such as transportation demurrage loss of Crude Oil in transit and similar costs incurred downstream of the Delivery Point and the prices so determined shall be deemed to be the actual prices received for the purpose of calculation of the weighted average of the prices for all third party Arms Length Sales for the Delivery Period.

19.3.2 Each constituent of Contractor shall separately submit to the Government within fifteen 15 days of the end of each Delivery Period a report containing the actual prices obtained in their respective Arms Length Sales to third parties of any Crude Oil. Such reports shall distinguish between term sales and spot sales and itemize volumes customers prices received and credit terms and the constituent of the Contractor shall allow the Government to examine the relevant sales contracts.

19.4 In the event that some or all of a constituent of Contractors total sales of Crude Oil during a Calendar Month are made to the Government the price of all sales so made shall unless otherwise agreed between the Parties be determined on the basis of either the FOB

selling price per Barrel of one or more crude oils which at the time of 52 calculation are being freely and actively traded in the international market and are similar in characteristics and quality to the Crude Oil and/or Condensate in respect of which the price is being determined such FOB selling price to be ascertained from Platts Crude Oil Market Wire daily publication Platts or the spot market for the same crude oils ascertained in the same manner whichever price in the opinion of the Parties more truly reflects the current value of such crude oils. For any Calendar Month in which sales take place the price shall be the arithmetic average price per Barrel determined by calculating the average for the preceding Calendar Month of the mean of the high and low FOB or spot prices for each day of the crude oils selected for comparison adjusted for differences in the Crude Oil and the crude oils being compared for quality transportation costs delivery time quantity payment terms the market area into which the Crude Oil is being sold other contract terms to the extent known and other relevant factors. In the event that Platts ceases to be published or is not published for a period of thirty 30 consecutive days the Parties shall agree on an alternative daily publication. 19.4.1 Notwithstanding anything herein otherwise provided the price paid for such sales shall be in any Calendar Month the FOB selling price for a Marker Crude Marker Crude which shall be Brent DTD on a United States Dollar per Barrel basis less US\$0.10 per Barrel. 19.4.2 The Marker Crude price will be based on the previous Calendar Months average of the daily low and high quotations of Marker Crude as published by Platts Market wire. The average is to be calculated up to three 3 decimals to arrive at a United States Dollar per Barrel price which will be applicable for the month of supply. 19.4.3 The Government and/or its nominee shall pay any and all sales tax payable on the sale of Oil to the Government or its nominee. 19.4.4 The Government and/or its nominee shall enter into a Crude Oil sales agreement with the Constituents of the Contractor which shall contain terms and conditions normally contained in international Crude Oil sales agreements of a similar nature. 19.5 In the event that in any Delivery Period some but not all of a constituent of Contractor's sales of Crude Oil from the Contract Area are made to the Government or a Government company and some but not all of a constituent of Contractor's sales of Crude Oil from the Contract Area are 53 made to third

parties in Arms Length Sales and the price as established in accordance with Article 19.4 differs by more than one percent ¹ from the price as determined in accordance with Article 19.3 for the same Delivery Period the Parties shall meet upon notice from any Party to determine if the prices established for the relevant Delivery Period for sales to the Government should be adjusted taking into account third party Arms Length Sales made by a constituent of Contractor of the same or similar Crude Oil from the relevant Field or other fields and published information in respect of other genuine third party Arms Length Sales of the same or similar crude oil for that Delivery Period. Until the matter of an adjustment for the relevant Delivery Period is finally determined the price as established in accordance with this Article will apply for that Delivery Period. Any adjustment if necessary will be made within thirty 30 days from the date the adjustment for that Delivery Period is finally determined.

19.6 A constituent of Contractor shall determine the relevant prices in accordance with this Article and the calculation basis of calculation and the price determined shall be supplied to the Government and shall be subject to agreement by the Government before it is finally determined. Pending final determination the last established price if any for the Crude Oil shall be used.

19.7 In the event that the Parties fail to reach agreement on any matter concerning selection of the crude oils for comparison the calculation the basis of or mechanism for the calculation of the prices the prices arrived at the adjustment of any price or generally about the manner in which the prices are determined according to the provisions of this Article within thirty 30 days or such longer period as may be mutually agreed between the parties from the date of commencement of Commercial Production or the end of each Delivery Period thereafter any Party may refer the matter or matters in issue for final determination by a sole expert appointed as provided in Article 33.

19.7.1 Within ten 10 days of the said appointment the Parties shall provide the expert with all information they deem necessary or as the expert may reasonably require.

19.7.2 Within fifteen 15 days from the date of his appointment the expert shall report to the Parties on the issues referred to him for determination applying the criteria or mechanism set forth herein and indicate his decision thereon to be applicable for the relevant Delivery Period for Crude Oil and such decision shall be accepted

as final and binding by the Parties. 54 19.7.3 Except for the adjustment referred to in Article 19.5 any price or pricing mechanism agreed by the Parties pursuant to the provisions of this Article shall not be changed retroactively.19.8 Any sale or disposal to Affiliates or other sale or disposal of Crude Oil produced from a Field other than to the Government or Government companies or to third parties in Arms Length Sales in any Delivery Period shall be valued on the same basis as sales to the Government or a Government company. In the event of such a sale or disposal by a Company such Company shall submit to the Government within fifteen 15 days of the end of each Delivery Period all relevant information concerning such sales or disposals.19.9 In the event that in any Delivery Period there is more than one type of sales referred to in Articles 19.3 19.4 and 19.8 then for the purpose of calculating Cost Petroleum and Profit Petroleum entitlement pursuant to Articles 13 and 14 a single price per Barrel of Crude Oil for all the sales for the relevant Delivery Period shall be used. Such single price shall be the weighted average of the prices determined for each type of sale weighted by the respective volumes of Crude Oil sold in each type of sale in the relevant Delivery Period.19.10 In this Article the term Government shall include any other agency or nominee of the Government to whom Crude Oil is to be sold.19.11 The provisions specified above for the determination of the price of sales of Crude Oil shall apply mutatis mutandis to Condensates.19.12 The Parties shall meet annually or sooner upon notice served by any Party on the others to review the list of selected Crude Oils or the mechanism established pursuant to this Article 19 in light of any new facts since the date of selection of such Crude Oils or establishment of such mechanism and to determine what adjustment if any should be made to the said selection or mechanism by mutual agreement of the Parties. 55 ARTICLE 20 CURRENCY AND EXCHANGE CONTROL PROVISIONS20.1 Subject to the provisions herein and to compliance with the relevant provisions of the laws of general application in India governing currency and foreign exchange and related administrative instructions and procedures issued thereunder on a nondiscriminatory basis each Foreign Company comprising the Contractor shall during the term of this Contract have the right to a repatriate funds relating to Petroleum Operations abroad in United States Dollars or any other freely

convertible currency acceptable to the Government and the Foreign Company; b receive retain and use abroad the proceeds of any export sales of Petroleum under the contract; c open maintain and operate bank accounts with reputable banks both inside and outside India for the purpose of this Contract; d freely import through normal banking channels funds necessary for carrying out the Petroleum Operations; e convert into foreign exchange and repatriate sums imported pursuant to d above in excess if any of its requirements; and f make payments of interest and principal outside of India for purchases services and loans obtained abroad without the requirement that funds used in making such payments must come from or originate in India. Provided however that repatriation pursuant to subparagraphs a and e and payments pursuant to subparagraph f shall be subject to the provisions of any treaties or bilateral arrangements between the Government and any country with respect to payments to that country.

20.2 The rates of exchange for the purchase and sale of currency by the Contractor shall be the prevailing rates of general application determined by the State Bank of India or such other financial body as may be mutually agreed by the Parties and in accordance with prevailing currency and exchange regulations and for accounting purposes under this Contract these rates shall apply as provided in Section 1.6 of Appendix C.

20.3 Domestic Companies shall be subject to the relevant provisions of the applicable laws in India governing currency and foreign exchange and related administrative instructions and procedures issued thereunder.

56 ARTICLE 21 NATURAL GAS

21.1 Subject to Article 21.2 the Indian domestic market shall have the first call on the utilisation of Natural Gas discovered pursuant to Petroleum Operations and produced from the Contract Area. Accordingly any proposal by the Contractor relating to Discovery and production of Natural Gas from the Contract Area shall be made in the context of the Governments policy for the utilisation of Natural Gas and shall take into account the objectives of the Government to develop its resources in the most efficient manner and to promote conservation measures.

21.2 Contractor shall have the right to use Natural Gas produced from the Contract Area for the purpose of Petroleum Operations including but not limited to reinjection for pressure maintenance in the Oil Fields Gas lifting and power generation.

21.3 For the purpose of

sales to the domestic market pursuant to this Article 21 the Delivery Point shall be the Delivery Point set forth in the Gas sales contract entered into by the Contractor.

21.4 ASSOCIATED NATURAL GAS ANG

21.4.1

In the event that a New Discovery of Crude Oil contains ANG Contractor shall declare in the proposal for the declaration of the New Discovery as a Commercial Discovery as specified in Article 9 whether and by what amount the estimated production of ANG is anticipated to exceed the quantities of ANG which will be used in accordance with Article 21.2 hereinafter referred to as the Excess ANG. In such event the Contractor shall indicate whether on the basis of the available data and information it has reasonable grounds for believing that the Excess ANG could be commercially exploited in accordance with the terms of this Contract along with the Commercial Production of the Crude Oil from the Oil Field and whether the Contractor intends to so exploit the Excess ANG.

21.4.2

Based on the principle of full utilization and minimum flaring of ANG a proposed development plan for an Oil Field or Oil Fields shall to the extent economically reasonable include a plan for utilisation of the ANG from the Existing Discovery and New Discovery including estimated quantities to be flared reinjected and to be used for Petroleum Operations; and if the Contractor proposes to commercially exploit the Excess ANG for sale in the domestic market in accordance with Governments policy or elsewhere the proposed plans for such exploitation. If an Existing Discovery is determined to possess Excess ANG and such Existing Discovery is producing or capable of producing as of the Effective Date of this Contract Contractor is granted the right to flare without penalty or limitation such Excess ANG until Gas transportation facilities if any can be provided for and such right shall be extended to such future time or times as such Gas transportation facilities may become unavailable or their capacity would restrict or limit production of Crude Oil. Government will use its good offices to effect early reduction and/or elimination of such flaring by causing Gas transportation to be made available at reasonable rates if a proposal to that effect is proposed by Contractor or a Company and approved by the Management Committee.

21.4.3

If the Contractor wishes to exploit the Excess ANG whether from an Existing or New Discovery such ANG shall first be offered for sale to the Government or its nominee in writing in

accordance with the terms of this Contract. On receipt of such offer the Government or its nominee shall within three 3 months of the date of receipt thereof notify the Contractor in writing whether or not it wishes to exercise its option to purchase the Excess ANG. 21.4.4 If the Government exercises its option to purchase the Excess ANG as provided in Article 21.4.3 a the Government shall indicate in the notice exercising the option a date within two 2 years of the date of the Contractors offer for commencement of purchase of the Excess ANG; b within six 6 months of the date of notification of the exercise of the Governments option pursuant to Article 21.4.3. the Contractor and the Government or its nominee shall agree on the terms for the sale to Government or its nominee of the Excess ANG. 21.4.5 If the Government does not exercise its option to purchase the Excess ANG the Contractor shall be 58 free to explore markets for the commercial exploitation of the Excess ANG. 21.4.6 Where the Contractor is of the view that Excess ANG cannot be commercially exploited and chooses not to exploit ANG or is unable to find a market for the Excess ANG pursuant to Article 21.4.5 the Government shall be entitled to take and utilise such Excess ANG. 21.4.7 If the Government elects to take the Excess ANG as provided in Article 21.4.6 a the Contractor shall deliver such Excess ANG to the Government or its nominee free of cost at the downstream flange of the GasOil separation facilities; b the Government or its nominee shall bear all costs including gathering treating processing and transporting costs beyond the downstream flange of the GasOil separation facilities; c the delivery of such Excess ANG shall be subject to procedures to be agreed between the Government or its nominee and the Contractor prior to such delivery such procedures to include matters relating to timing of offtake of such Excess ANG which procedures shall not in any way restrict Oil production. 21.4.8 Excess ANG which is not commercially exploited by the Contractor or taken by the Government or its nominee pursuant to this Article 21 shall be returned to the subsurface structure or flared where such flaring is approved in the Development Plan which approval shall not be unreasonably withheld for the relevant Oil Field or where reinjection is uneconomical or inadvisable in accordance with good reservoir engineering practices. 21.4.9 Where the Contractor is of the view that there is economic merit in flaring Gas in the absence of a

Gas transmission system or during such time as the pipeline is inoperable or lacks capacity to take all available Gas Contractor shall have the right to flare Gas. In any such event Contractor shall notify the Management Committee within fortyeight 48 hours to obtain its approval for continuing operations. 59 21.4.10 As soon as practicable after the New Discovery referred to in Article 21.4.1 or the submission to the Government of the proposal for the declaration of the New Discovery as a Commercial Discovery as therein specified the Contractor and the Government or its nominee shall meet to discuss the sale andor disposal of any ANG discovered with a view to giving effect to the provisions of this Article 21 in a timely manner. 21.4.11 Notwithstanding the above during the first six 6 months commencing with the Effective Date of this Contract notices cited in Article 21.4 shall be given as soon as practicable and are deemed to satisfy the notice obligations of this Article 21.4.21.5 NON ASSOCIATED NATURAL GAS NANG 21.5.1 In the event of a New Discovery of NANG the Contractor shall promptly report such New Discovery to the Management Committee and the provisions of Articles 9.1 and 9.2 shall apply. The remaining provisions of Article 9 would apply to the New Discovery and development of NANG only in so far as they are not inconsistent with the provisions of Articles 21.5.1 to 21.5.13. 21.5.2 If pursuant to Article 9.1 the Contractor gives notification that a New Discovery is of potential commercial interest the Contractor shall submit to the Management Committee within one 1 Calendar Year from the date of notification of the above New Discovery the proposed Appraisal Programme including a Work Programme and budget to carry out an adequate and effective appraisal of such New Discovery to determine i without delay whether such New Discovery is a Commercial Discovery and ii with reasonable precision the boundaries of the area to be delineated as a Field. Such programme shall be supported by all relevant data such as Well data Contractors best estimate of reserve range and production potential and shall indicate the date of commencement of the proposed Appraisal Programme. Where in the case of an Existing Discovery Contractor desires to carry out additional appraisal work the Contractor shall submit its proposed Appraisal Programme with a Work Programme and budget to the Management Committee within one hundred twenty 120 days of the Effective Date for approval.

21.5.3 The proposed Appraisal Programme for an Existing Discovery or a New Discovery shall be considered 60 by the Management Committee within sixty 60 days of its submission by the Contractor and the programme together with the Work Programme and budget submitted by the Contractor revised in accordance with any agreed amendments or additions thereto approved by the Management Committee shall be adopted as the Appraisal Programme and the Contractor shall promptly proceed with implementation of such programme. 21.5.4. If on the basis of the results of the Appraisal Programme the Contractor is of the opinion that NANG has been discovered in commercial quantities it shall submit to the Management Committee as soon as practicable but not later than five 5 years from the date of notification of the aforementioned New Discovery a proposal for the declaration of the New Discovery as a Commercial Discovery. Such proposal shall take into account the Governments policies on Gas utilisation and propose alternative options if any for use or consumption of the NANG and be supported by inter alia technical and economic data evaluations interpretations and analyses of such data feasibility studies relating to the New Discovery prepared by or on behalf of the Contractor and other relevant information. 21.5.5 In the case of a New Discovery simultaneously with the Contractors Appraisal Programme Government and the Contractor shall seek to reach an agreement on the development production processing utilisation and sale of the NANG in the context of Article 21.1 within thirtysix 36 months of the date of notification of the Discovery referred to in Article 21.5. If no proposal is submitted to the Management Committee by the Contractor within five 5 years from the date of notification of such New Discovery the Contractor shall relinquish its rights to develop such New Discovery and the area relating to such New Discovery shall be excluded from the Contract Area. 21.5.6 Where the Contractor has submitted a proposal for the declaration of a New Discovery as a Commercial Discovery the Management Committee shall consider the proposal of the Contractor with reference to commercial utilisation of the NANG in the domestic market or elsewhere and in the context of Governments policy on Gas utilisation and the chain of activities required to bring the NANG from the Delivery Point to 61 potential consumers in the domestic market or elsewhere. The Management

Committee may within ninety 90 days request that the Contractor submit any additional information on the New Discovery and the related Appraisal Programme that it may reasonably require to facilitate a decision on whether or not to declare the New Discovery as a Commercial Discovery.

21.5.7 The Management Committee shall make a decision regarding the declaration of a New Discovery as a Commercial Discovery within the latter of a one hundred eighty 180 days of receipt of such proposal; or b one hundred eighty 180 days of receipt of the additional information referred to above.

21.5.8 If the Management Committee with the approval of the Government declares a New Discovery a Commercial Discovery such declaration shall be accompanied by an indication of the probable dates by when the markets would be ready to receive the Gas and an estimate of the quantities of Gas that could be so utilised. The Contractor in such an event shall within One 1

Calendar Year of the declaration of the New Discovery as a Commercial Discovery submit a Development Plan for the development of the Gas Field to the Management Committee for its approval. Such plan shall be supported by all relevant information including inter alia the information required in Article 9.6. In the case of an Existing Discovery Contractor shall within ninety 90 days of

the Effective Date propose a Development Plan following the plan brought out in Appendix G intended to achieve the production profile brought out in Appendix H containing the detailed information required in Article 9.6 with supporting budget and the Management Committee shall

render its decision regarding such proposal within thirty 30 days of such submittal. Where a Development Plan is so agreed it shall be an approved Development Plan pursuant to this Article.

62 21.5.9 If the Development Plan has not been approved by the Management Committee within one hundred and eighty 180 days of its submission the Contractor shall have the right to submit such plan or plans directly to the Government for approval within sixty 60 days of the expiry of the

time provided to the Management Committee to approve the plan or plans. The Government shall respond to the submission within ninety 90 days of receipt thereof. If the Government rejects the Contractors proposed plan or plans the Government shall state in writing the reasons for such rejection and the Contractor shall have the right to resubmit within sixty 60 days of written notice of

such rejection such plan or plans duly amended to meet the Governments objections thereto. Such right of resubmission of each proposed plan or plans shall be exercisable by the Contractor only once. If the Parties are unable to agree any Party shall have the right to submit the matter to arbitration. If no such plan or plans isare submitted to the Government within the aforesaid period the Contractor shall relinquish its right to develop such Gas Field and such Gas Field shall be excluded from the Contract Area. 21.5.10 If the Management Committee is unable to agree on the declaration of a New Discovery as a Commercial Discovery within the time limit prescribed in Article 21.5.7 the Contractor or any of its constituents shall be entitled to submit such proposal directly to the Government for approval. In such event the Contractor or any of its constituents shall also submit a comprehensive plan or plans for development of such New Discovery which shall detail the proposed Development Plan for utilisation of the NANG produced in the domestic market giving inter alia the data specified in Article 21.5.8. The proposal for declaration of the New Discovery as a Commercial Discovery as well as the proposed Development Plan shall be submitted to the Government within one hundred and eighty 180 days of the expiry of the time given to the Management Committee to reach a decision on the proposal for declaration of the New Discovery as a Commercial Discovery and Government shall respond to the said submission within one hundred 63 twenty 120 days of its receipt. If the Government disapproves the proposed plan or plans the Government shall state in writing the reasons for such disapproval and the concerned Parties shall have the right to resubmit within sixty 60 days such plan or plans duly amended to meet the Governments objections thereto. Such right of resubmission of each proposed plan or plans shall be exercisable by the Contractor only once. In the event the Government does not approve such plan or plans any Party shall have the right to submit the matter to arbitration. If no such plan plans is are submitted to the Government within the aforesaid period the Contractor shall relinquish its rights to develop such Gas Field and such Gas Field shall be excluded from the Contract Area. 21.5.11 In the event the Management Committee or Government as the case may be approves the Contractors proposal for declaration of the New Discovery as a Commercial Discovery

and also the comprehensive plan or plans for development of such New Discovery and for the utilisation of NANG produced in the domestic market the Gas Field shall be promptly developed by the Contractor in accordance with the approved plan which shall be the Development Plan for the Field.

21.5.12 In the event the Contractor does not commence development of a New Discovery within ten 10 years from the date of completion of the first Discovery Well the Contractor shall relinquish its rights to develop such New Discovery and the area relating to such New Discovery shall be excluded from the Contract Area.

21.5.13 The price of the ANG and NANG produced from the Oil or Gas Field for use in India shall be specified in the Gas sales contract which shall be in accordance with the provisions of this Article 21.5.13 between the Contractor and the nominee of the Government.

a Unless the context otherwise requires the following words and terms wherever and whenever used or appearing in this 64 Article 21.5.13 shall have the following meaning i British Thermal Unit or BTU means the amount of energy required to raise the temperature of one 1 pound avoirdupois of pure water at sixty degrees 60degree Fahrenheit one degree 1degree Fahrenheit at an absolute pressure of 14.73 pounds per square inch. ii Buyer means the Government of India or as Authority of India Limited GAIL. iii Deliverability means the lesser of the maximum aggregate rate of all wells in the Contract Area or the maximum delivery capacity of the processing facility subject to generally accepted international petroleum industry practices. iv Delivery Point means the upstream well at the underwater connection between Sellers pipeline and ONGCs underwater Gas transmission line or lines which transport Gas from the Bassein Field to the Hazira area. v Maximum Delivery Pressure has the meaning set forth in Article 21.5.13c. vi MMBTU means one million 1000000 BTUs on a net heating value basis. vii Seller means Contractor.

b The Seller agrees to produce and deliver on a daily basis to the Buyer one hundred percent 100 of the Deliverability of ANG and NANG and Condensate delivered therewith at the Delivery Point and the Buyer provided the Gas and Condensate are made available and tendered for delivery by the Seller agrees to take and purchase on a daily basis one hundred percent 100 of the Deliverability of ANG and NANG and Condensate delivered therewith provided however that Seller at Sellers sole discretion subject to

generally accepted operator practices in the international petroleum industry may adjust deliveries to provide for necessary maintenance service and testing. Buyer may request that Seller vary deliveries to accommodate similar circumstances in the 65 Buyers operation and Sellers approval shall not be unreasonably withheld. Communications procedures shall be mutually agreed in the Gas sales contract in accordance with internationally accepted industry standards. c The Gas and Condensate sold hereunder shall be separated into Gas and Condensate at the offshore processing facility measured separately and recombined and delivered at the Delivery Point at the operating pressure of the Buyers owned or contracted pipeline up to a maximum pressure Maximum Delivery Pressure of one thousand 1000 psig. d Subject to the provisions hereof the Buyer shall pay the Seller for each MMBTU of Gas delivered hereunder or for each MMBTU of Gas for which the Buyer is obligated to pay hereunder a price calculated as follows The Base Price Base Price in United States Dollars US per MMBTU is fixed on the basis of ninety-nine percent 99 of a Low Sulfur Fuel Oil Basket LSFO Basket calculated as the average of the daily mean value for low and high prices of fuel oil taking into account equal parts of 1 bulk residual fuel oil containing one percent 1 sulfur quoted for barges at Northwest Europe Barges FOB Rotterdam; and 2 bulk residual fuel oil containing one percent 1 sulfur quoted for Mediterranean basis Italy Cargoes FOB Med basis Italy; and 3 a theoretical blend of residual fuel oil composed of Singapore Cargoes made up of seventy-four percent 74 of LSWRSR 0.3 three-tenths percent 0.3 sulfur and twenty-six percent 26 of HSFO 180 three and one-half percent 3.5 sulfur viscosity 180 centistokes. The Base Price is calculated on the basis of the arithmetic average of the monthly values of the prices of the listed products as published in Platts Oilgram Price Report for the eighteen 18 months of May 1992 through October 1993 inclusive. These values are derived from the mean of the daily 66 ranges on days the postings are published to give a monthly value. For the purpose of this Contract Base Price will be equal to 2.32MMBTU. The price of Gas for each MMBTU for each Calendar Quarter thereafter shall be determined by the following formula $\text{Price} = \text{Base Price} \times \text{AB}$ Where A a value calculated for the HSLSFO Basket defined in this Article 21.5.13 d evaluated for the twelve 12

months preceding the Calendar Quarter using the method for averaging as described for calculating the Base Price and B A value calculated for the HSLSFO Basket evaluate for the twelve 12 months April 1993 through March 1994. The High SulfurLow Sulfur Fuel Oil Basket HSLSFO Basket is valued as equal parts of 1 bulk residual fuel oil containing one percent 1 sulphur quoted for Mediterranean basis Italy Cargoes FOB Med basis Italy; and 2 bulk residual fuel oil containing one percent 1 sulfur quoted for Northwest Europe Cargoes CIF basis ARA Cargoes CIF NWE Basis ARA and 3 bulk residual fuel oil Singapore Cargoes containing three and onehalf percent 3.5 sulfur viscosity 180 centistokes Singapore HSFO 180 cst and 4 bulk residual fuel oil Cargoes FOB Arab Gulf viscosity 180 centistokes Arab Gulf FOB HSFO 180 cst using the method for averaging as described for calculating the Base Price. The Floor Price Floor Price shall be ninety percent 90 of the monthly values of 67 the prices of the LSFO Basket as published in Platts Oilgram Price Report for the eighteen 18 months of May 1992 through October 1993 inclusive. These values are derived from the mean of the daily ranges on days the postings are published to give a monthly value. For the purpose of this Contract Floor Price will be equal to 2.11MMBTU. Notwithstanding results of the calculations for price as shown in this Article 21.5.13 d the actual price shall in no event be less than a Floor Price Floor Price which is calculated as US2.11MMBTU nor more than a Ceiling Ceiling of the Floor Price plus US1.00MMBTU provided that after seven 7 years from the Effective Date the Seller shall have the option to revise the Ceiling to one hundred fifty percent 150 of ninety percent 90 of the same or equivalent basket of fuel oils used in calculating the Base Price averaged over the immediately preceeding eighteen 18 months. Parties agree to convert USbarrel prices for fuel oil as published in Platts Oilgram to USMMBTU using a factor of 6.28. If Platts Oilgram is no longer published an alternate publication shall be mutually agreed upon. e Parties acknowledge that Gas is to be received by GAIL at Hazira downstream of separation and sweetening facilities owned and operated by ONGC. In order to compensate ONGC for cost of ownership and operations of these facilities Contractor shall make payments to ONGC on the basis of the costs fixed on an incremental basis by an internationally recognised expert who shall be selected by two members of the

Operating Committee from a panel of three internationally recognised experts selected by ONGC. In case there is no agreement between the Companies and ONGC on the advice tendered the matter shall be referred to Government. The decision of Government shall be final and binding on all the Parties.

21.5.14 Nothing contained in any contract entered into by the Contractor for the supply sale or disposal of Gas with any nominee of the Government shall in any manner abrogate the obligation of the Government contained herein.

21.5.15 The Government and/or its nominee shall pay any and all sales tax payable on the sale of Gas to the Government or its nominee.

ARTICLE 22 EMPLOYMENT TRAINING AND TRANSFER OF TECHNOLOGY

22.1 Without prejudice to the right of the Contractor to select and employ personnel in numbers and with the qualifications as in the opinion of the Contractor are required for carrying out Petroleum Operations in a safe cost effective and efficient manner the Contractor shall to the maximum extent reasonably possible employ and require the Operator and Subcontractors to employ citizens of India having appropriate qualifications and experience taking into account the experience required and the level and nature of the Petroleum Operations.

22.2 Contractor shall offer up to two man months per year of on the job training and practical experience in skilled management and executive positions of their ongoing Petroleum Operations to Indian nationals of the Government's choice.

22.3 Contractor shall associate and involve mutually agreed numbers of citizens of India designated by the Government which shall in no event exceed three people at any one time in the technological aspects of the then ongoing Petroleum Operations for up to two man months per year. Such aspects shall include a seismic data acquisition processing and interpretation; b computerized formation evaluation using well logs; c computerized analysis of geological data for basin analysis; d laboratory core analysis; e reservoir simulation and modelling; f geochemistry including analytical methods source rock studies hydrocarbon generation modelling; g measurement while drilling techniques; h stimulation of wells; i production engineering including optimization methods for surface and subsurface facilities e.g. NODAL analysis and implementation; j reservoir engineering and management including gas and water injection; k enhanced oil recovery

techniques; 71 l gas production technology; m pipeline technology; n well design and drilling technology; o design of offshore facilities.22.4 Except as herein provided no Party shall be obliged to disclose by virtue of this Article 22 any data process or information whether owned by itself any of its Affiliates or a third party of a proprietary nature.22.5 At the request of the Government the Contractor shall separately endeavour to negotiate in good faith technical assistance agreements with the Government setting forth the terms by which each constituent of the Contractor may render technical assistance and make available commercially proven technical information of a proprietary nature for use in India by the Government. The issues to be addressed in negotiating such technical assistance agreements shall include but not be limited to licensing issues royalty conditions confidentiality restrictions liabilities costs and method of payment. 72 ARTICLE 23 LOCAL GOODS AND SERVICES23.1 In the conduct of Petroleum Operations the Contractor shall a give preference to the purchase and use of goods manufactured produced or supplied in India provided that such goods are available on terms equal to or better than imported goods with respect to timing of delivery quality and quantity required price and other terms; b employ Indian Subcontractors having the required skills or expertise to the extent reasonably possible in so far as their services are available on comparable standards with those obtained elsewhere and at competitive prices and on competitive terms; provided that where no such Subcontractors are available preference shall be given to nonIndian Subcontractors who utilise Indian goods to the maximum extent possible subject however to the proviso in paragraph a above; c cooperate to the extent possible and without financial obligation with domestic companies in India to enable them to develop skills and technology to service the petroleum industry; d ensure that provisions in terms of paragraphs a to c above are contained in contracts between the Operator and its Subcontractors.23.2 The Contractor shall establish appropriate procedures including tender procedures for the acquisition of goods and services which shall ensure that suppliers and Subcontractors in India are given adequate opportunity to compete for the supply of goods and services. The tender procedures shall include inter alia the financial amounts or value of contracts which will be awarded on the basis of selective

bidding or open competitive bidding the procedures for such bidding and the exceptions to bidding in cases of emergency.23.3 Within one hundred and twenty 120 days after the end of each Calendar Year the Contractor shall provide the Government with a report outlining its achievements in utilising Indian resources during that Calendar Year.23.4 In this Article goods means equipment materials and supplies. 73 ARTICLE 24 INSURANCE AND INDEMNIFICATION24.1 INSURANCE 24.1.1 The Contractor shall during the term of this Contract obtain and maintain insurance coverage for and in relation to Petroleum Operations for such amount and against such risks in accordance with generally accepted international operating practices as are set forth herein and shall furnish to the Government certificates evidencing that such coverage is in effect. Such insurance policies shall include the Government as additional insured and shall waive subrogation against the Government. The insurance shall without prejudice to the generality of the foregoing cover a Loss or damage to all installations equipment and other assets for so long as they are used in or in connection with Petroleum Operations; provided however if Contractor fails to insure any such installation equipment or assets it shall replace any loss thereof or repair any damage caused thereto; b Loss damage or injury caused by pollution in the course of or as a result of Petroleum Operations; c Loss or damage to property or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor may be liable; d With respect to Petroleum Operations offshore the cost of removing wrecks and cleaning up operations following any accident in the course of or as a result of Contractors Petroleum Operations; e The Contractors and/or Operators liability to its employees engaged in Petroleum Operations. 24.1.2 The Contractor shall require its Subcontractors to obtain and maintain insurance against the risks referred to in Article 24.1.1 relating mutatis mutandis to such Subcontractors. 7424.2 INDEMNITY The Contractor shall indemnify defend and hold the Government harmless against all claims losses and damages of any nature whatsoever including without limitation claims for loss or damage to property or injury or death to persons caused by or resulting from any Petroleum Operations conducted by or on behalf of the Contractor.24.3 ONGC shall indemnify and hold the Companies harmless against all claims losses

and damages of any nature whatsoever including but not by way of limitation claims for loss or damage to property or injury or death to persons or Environmental Damage caused by or resulting from and attributable to any operations in the nature of Petroleum Operations conducted by or on behalf of ONGC or failure to comply with any Environmental Clearances prior to the Effective Date.

75 ARTICLE 25 RECORDS REPORTS ACCOUNTS AND AUDIT

25.1 The Contractor shall prepare and maintain at an office in India accurate and current books records reports and accounts of its activities for and in connection with Petroleum Operations so as to present a fair clear and accurate record of all its activities expenditures and receipts. The Contractor shall also keep representative samples of cores and cuttings.

25.2 Based on generally accepted and recognised accounting principles and modern petroleum industry practices records books accounts and accounting procedures in respect of Petroleum Operations shall be maintained on behalf of the Contractor by the Operator at its business office in India.

25.3 The annual audit of accounts shall be carried out on behalf of the Contractor by a qualified independent firm of internationally recognised chartered accountants registered in India and selected by the Contractor.

25.4 Accounts together with the auditors report thereon shall be submitted to the Parties for approval not later than the thirtieth 30th day of September following the Financial Year.

25.5 The Government shall have the right to audit the accounting records of the Contractor in respect of Petroleum Operations as provided in the Accounting Procedure.

25.6 The accounting and auditing provisions and procedures specified in this Contract are without prejudice to any other requirements imposed by any statute in India including without limitation any specific requirements of the statutes relating to taxation of companies.

25.7 For the purpose of any audit referred to in Article 25.5 the Operator or the Contractor shall make available to the auditor all such books records accounts and other documents and information as may be reasonably required by the auditor during normal business hours.

76 ARTICLE 26 INFORMATION DATA CONFIDENTIALITY INSPECTION AND SECURITY

26.1 The Contractor shall promptly after they become available make available to the Government in its offices all data obtained as a result of Petroleum Operations under the Contract including but not limited to

geological geophysical geochemical petrophysical engineering well logs maps magnetic tapes cores and production data as well as all interpretative and derivative data including reports analyses interpretations and evaluations prepared in respect of Petroleum Operations hereinafter referred to as Data. Data shall be the property of the Government provided however that the Contractor shall have the right to make use of such Data free of cost for the purpose of Petroleum Operations under this Contract as provided herein.

26.2 Contractor shall keep the Government currently advised of all developments taking place during the course of Petroleum Operations and shall furnish the Government with such progress reports containing full and accurate information relating to Petroleum Operations on a periodic basis as the Government may reasonably require provided that this obligation shall not extend to proprietary technology. Without prejudice to the generality of the foregoing the Contractor shall submit regular statements and reports relating to Petroleum Operations as provided in Appendix C. Contractor shall meet with the Government at a mutually convenient location to present the results of all geological and geophysical work carried out as well as the results of all engineering and drilling operations as soon as practical after such Data becomes available to the Contractor.

26.3 All Data information and reports obtained or prepared by for or on behalf of the Contractor pursuant to this Contract shall be treated as confidential and subject to the provisions hereinbelow the Parties shall not disclose the thereof to any third party without the consent in writing of the other Parties.

26.4 The obligation specified in Article 26.3 shall not operate so as to prevent disclosure a to Affiliates Contractors or Subcontractors for the purpose of Petroleum Operations; b to employees professional consultants advisers data processing centres and laboratories where required for the performance of functions in connection with Petroleum Operations for any Party comprising the Contractor; c to banks or other financial institutions in connection with Petroleum Operations; 77 d to bona fide intending assignees or transferees of an interest hereunder of a Party comprising the Contractor or in connection with a sale of stock of a Party comprising the Contractor; e to the extent required by any applicable law or in connection with any legal proceedings or by the regulations of any stock exchange upon which the shares of a Party

comprising Contractor are quoted; f to Government departments for or in connection with the preparation by or on behalf of the Government of statistical reports with respect to Petroleum Operations or in connection with the administration of this Contract or any relevant law or for any purpose connected with Petroleum Operations; g by a Party with respect to any Data or information which without disclosure by such Party is generally known to the public.

26.5 Any Data information or reports disclosed by the Parties comprising the Contractor to any person other than pursuant to Article 26.4 a b and g shall be disclosed on the terms that such Data information or reports shall be treated as confidential by the recipient. Prompt notice of disclosures made by the Contractor pursuant to Article 26.5 shall be given to the Government.

26.6 Any Data information and reports relating to the Contract Area which in the opinion of the Government might have significance in connection with offers by the Government of open acreage or an exploration programme to be conducted by a third party in another area may be disclosed by the Government for such purposes on conditions to be agreed upon between the Government and the Contractor.

26.7 Where an area ceases to be part of the Contract Area the Contractor shall continue to treat Data and information with respect to the area as confidential and shall deliver to the Government copies or originals of all Data and information in its possession with respect to the area. The Government shall however have the right to freely use the Data and information thereafter.

26.8 The Government shall at all reasonable times through duly authorised representatives be entitled to observe Petroleum Operations and to inspect all assets books records reports accounts contracts samples and Data kept by the Contractor or the Operator in respect of Petroleum Operations under the Contract provided however that the Contractor shall not be required to disclose any proprietary technology. The duly authorised representatives shall be given reasonable assistance by the Contractor for such functions and the Contractor shall afford such 78 representatives all facilities and privileges afforded to its own personnel in the field including the use of office space and housing free of charge. The representatives shall be entitled to make a reasonable number of surveys measurements drawings tests and copies of documents take samples and make a reasonable use of the equipment and

instruments of the Contractor provided that such functions shall not unduly interfere with the Contractor's Petroleum Operations.

26.9 Contractor shall give reasonable advance notice to the Government or to any other authority designated by the Government for such purpose of its programme of conducting surveys by aircraft or by ships indicating inter alia the name of the survey to be conducted approximate extent of the area to be covered the duration of the survey the commencement date and the name of the airport or port from which the survey aircraft or ship will commence its voyage.

26.10 The Government or the authority designated by the Government for such purpose shall have the right to inspect any aircraft or ship used by the Contractor or a Subcontractor carrying out any survey or other operations in the Contract Area and shall have the right to put on board such aircraft or ship Government officers in such number as may reasonably be necessary to ensure compliance by the Contractor or the Subcontractor with the security requirements of India.

26.11 Expatriate employees and Subcontractors shall for national security purposes be subject to the approval of the Government such approval not to be unreasonably withheld.

79 ARTICLE 27 TITLE TO PETROLEUM DATA AND ASSETS

27.1 The Government is the sole owner of Petroleum underlying the Contract Area and shall remain the sole owner of Petroleum produced pursuant to the provisions of this Contract except that part of Crude Oil or Gas the title whereof has passed to each constituent of the Contractor or any other person in accordance with the provisions of this Contract.

27.2 Title to Crude Oil and Gas to which each constituent of the Contractor is entitled under this Contract and title to Crude Oil and Gas sold to Government or its nominee by the constituents of the Contractor shall pass to the relevant Party or as the case may be to Government or its nominee at the Delivery Point. Contractor shall be responsible for all costs and risks prior to the Delivery Point and each Party shall be responsible for all costs and risks associated with such Party's share after the Delivery Point. Where the Government or its nominee purchases all or some of the Contractor's share of Crude Oil or Condensate the Government or its nominee shall be responsible for all costs and risks in respect of the amount purchased after the Delivery Point.

27.3 Title to all Data specified in Article 26 shall be vested in the Government and the

Contractor shall have the right of use thereof as therein provided.27.4 Assets in place or contracted for use in or on the Contract Area purchased by the Contractor for use in Petroleum Operations shall be owned by the Parties comprising Contractor in proportion to their Participating Interest provided that the Government or its nominee shall have the right to require vesting of full title and ownership including abandonment obligations if any in it free of cost charge and encumbrances of any or all assets whether fixed or movable acquired and owned by the Contractor for use in Petroleum Operations inside or outside the Contract Area except assets required by a Party for ongoing operations in the nature of Petroleum Operations in India such right to be exercisable by the Government or its nominee upon expiry or earlier termination of the Contract.27.5 Contractor shall be responsible in accordance with international petroleum standards for proper maintenance insurance and safety of all assets acquired for Petroleum Operations for keeping them in good repair order and working condition at all times and the costs thereof shall be recoverable as Contract Costs in accordance with Appendix C.27.6 So long as this Contract remains in force the Contractor shall free of any charge for the purpose of carrying out Petroleum Operations hereunder have the exclusive use of 80 the assets which have become or are the property of the Government including without limitation those identified in Appendix F except that the Sagar Laxmi shall be released to ONGC as soon as alternate facilities are available but not later than thirty 30 months after the Effective Date unless agreed otherwise by the Parties. During the period Contractor is using the Sagar Laxmi Contractor shall pay to ONGC as rental a price to be based upon a mutually agreed daily rate. The daily rate shall be determined in accordance with competitive prices for like type of service. In the event the daily rate cannot be mutually agreed upon it shall be determined by an internationally recognized expert in the field selected by two members of the Operating Committee from a group of three internationally recognized experts selected by ONGC. If the parties do not agree the Government shall make the determination.27.7 Equipment and assets no longer required for Petroleum Operations shall first be offered free of cost charge and encumbrance to the Government or its nominee and if not required by the Government or its nominee will be so indicated

in writing within thirty 30 days of such offer. Failure to so indicate will be deemed to be a rejection of the offer by the Government.

27.8 Assets not acquired by the Government or its nominee may be sold or otherwise disposed of subject to the terms of this Contract.

81 ARTICLE 28 ASSIGNMENT OF INTEREST

28.1 Subject to the terms of this Article and other terms of this Contract any Party comprising the Contractor may assign or transfer a part or all of its Participating Interest with the prior written consent of the Government which consent shall not be unreasonably withheld provided that the Government is satisfied that a the prospective assignee or transferee has the financial standing technical competence capacity and ability to meet its obligations hereunder and is willing to provide an unconditional undertaking to assume its Participating Interest share of obligations and to provide a guarantee in respect thereof as provided in the Contract. b the prospective assignee or transferee is not a company incorporated in a country with which the Government for policy reasons has restricted trade or business; c the prospective assignor or transferor and assignee or transferee respectively are willing to comply with any reasonable conditions of the Government as may be necessary in the circumstances with a view to ensuring performance under the Contract; and d the assignment or transfer will not adversely affect the performance or obligations under this Contract or be contrary to the interests of India.

28.2 An application by a Company for consent to assign or transfer shall be accompanied by all relevant information concerning the proposed assignment or transfer including detailed information on the proposed assignee or transferee and its shareholding and corporate structure as was earlier required from the Companies constituting the Contractor the terms of the proposed assignment or transfer and the unconditional undertaking referred to in Article 28.1a above. The applicant shall also submit such information relating to the prospective assignee or transferee of the assignment or transfer as the Government may reasonably require to enable proper consideration and disposal of the application.

28.3 No assignment or transfer shall be effective until the approval of the Government is received which approval may be given by the Government on such terms as it may deem fit. Upon assignment or transfer of its interest in this Contract the assignor or transferor shall be released and discharged from its obligations hereunder

only to the extent that such obligations are assumed by the assignee or transferee with the approval of the Government. 8228.4 The assignor shall clearly state in its deed of assignment that the assignee shall be liable for all future obligations under the Contract to the extent of assignment.28.5 Upon prior notice to the Contractor the Government may assign or transfer all or any part of its rights and interest under this Contract to any Government company wholly or partly owned by the Government and authorised by the Government to explore for and exploit Petroleum in the Contract Area. Upon prior notice to the Government a Company may assign or transfer all or any part of its rights and interest under this Contract to an Affiliate subject to Article 6.2 and the parent company guarantee shall apply.28.6 An assignment or transfer shall not be made so as to reduce the Participating Interest of a constituent of the Contractor at any time to less than ten percent 10 of the total Participating Interest of all the constituents of the Contractor except where the Government may in special circumstances so permit.28.7 Nothing herein contained shall prohibit a Company in the normal course of business from pledging its Participating Interest share for purposes of financing such as a mortgage charge or encumbrance on Petroleum assets or production of Petroleum at its own risk cost and responsibility. The Contractor shall provide the Government with fifteen 15 days prior written notice before entering into any such financing arrangements.28.8 No assignment or pledge under this Article shall have the effect of decreasing the benefits accruing to Government under this Contract in any manner whatsoever. 83 ARTICLE 29 GUARANTEE29.1 Each of the Companies shall deliver to the Government on the Effective Date of this Contract a a financial and performance guarantee for the performance of all obligations under the Contract in the case of EOGIL from a parent company of good financial standing acceptable to the Government in favour of the Government in the form and substance set out in Appendix E; b a legal opinion from its legal advisors in a form satisfactory to the Government to the effect that the aforesaid guarantee has been duly signed and delivered on behalf of the guarantors with due authority and is legally valid and enforceable and binding upon them.29.2 If any of the documents referred to in Article 29.1 are not delivered within the period specified herein this Contract may be cancelled by the Government

upon ninety 90 days written notice of its intention to do so.29.3 Notwithstanding any change in the composition or shareholding of the parent company furnishing the guarantees herein it shall under no circumstances be absolved of its obligations contained in the guarantees provided pursuant to this Article. 84 ARTICLE 30 TERMINATION OF CONTRACT30.1 This Contract may subject to the provisions hereinbelow and Article 31 be terminated by the Government without any financial liability upon giving ninety 90 days written notice of its intention to do so in the following circumstances namely that a Company a has knowingly submitted any false statement to the Government in any manner which was a material consideration in the execution of this Contract; or b has intentionally and knowingly extracted or authorised the extraction of any mineral not authorised to be extracted by the Contract or without the authority of the Government except such extractions as may be unavoidable as a result of operations conducted hereunder in accordance with generally accepted international petroleum industry practice which when so extracted were immediately notified to the Government; or c is adjudged bankrupt by a competent court or enters into any agreement or scheme of composition with its creditors or takes advantage of any law for the benefit of debtors; or d has passed a resolution to apply to a competent court for liquidation of the Company unless the liquidation is for the purpose of amalgamation or reconstruction of which the Government has been given notice and the Government is satisfied that the Companys performance under this Contract would not be adversely affected thereby and has given its approval thereto; or e has assigned any interest in the Contract without the prior consent of the Government as provided in Article 28; or f fails to make any monetary payment required by law or under this Contract by the due date or within the specified period after the due date; or g fails to comply with or contravenes the provisions of this Contract in a material particular; or h fails to comply with any final determination or award made by a sole expert or arbitrators pursuant to Article 33; or i has been served a notice of cancellation pursuant to Article 29.2. PROVIDED THAT 85 where the Contractor comprises two or more Companies the Government shall not exercise its rights of termination pursuant to Article 30.1 on the occurrence in relation to one or more but not all of the Companies of an event entitling the

Government to terminate the Contract if any other Company or Companies constituting the Contractor satisfies the Government that it or they isare willing and would be able to carry out the obligations of the Contractor.30.2 This Contract may also be terminated by the Government on giving the requisite notice specified above if the events specified in Article 30.1 c and d occur with respect to a company which has given a guarantee pursuant to Article 29 subject however to Article 30.3.30.3 If the circumstances that give rise to the right of termination under Article 30.1 f or g or Article 29.2 are remedied by the Contractor within the ninety 90 day period or such extended period as may be granted by the Government following the notice of the Governments intention to terminate the Contract as aforesaid such termination shall not become effective.30.4 If the circumstance or circumstances that would otherwise result in termination are the subject matter of proceedings under Article 33 then termination shall not take place so long as such proceedings continue and thereafter may only take place when and if consistent with the arbitral award.30.5 On termination of this Contract for any reason whatsoever the rights and obligations of the Contractor shall cease but such termination shall not affect any rights of any Party which may have accrued or any obligations undertaken or incurred pursuant to this Contract by Government or the Contractor or any Party comprising the Contractor and not discharged by the Contractor or the Party prior to the date of termination.30.6 In the event of termination pursuant to Articles 30.1 or 30.2 a the Government may require the Contractor for a period not exceeding one hundred and eighty 180 days from the date of termination to continue for the account and at the cost of the Government Crude Oil or Natural Gas production activities until the right to continue such production has been transferred to another entity; b A Foreign Company which is a constituent of the Contractor shall subject to the provisions hereof have the right to remove and export all its property which has not vested in the Government provided that in the event that ownership of any property is in doubt 86 or disputed such property shall not be exported unless and until the doubt or dispute has been settled in favour of the Foreign Company. 87 ARTICLE 31 FORCE MAJEURE31.1 Performance by any Party hereto of any of its obligations under this Contract or in fulfilling any condition of any lease

granted to such Party or any lease issued thereunder shall except for the payment of monies due under this Contract or under the Act and the Rules or any law be suspended or excused if and to the extent that such nonperformance or delay in performance is caused by Force Majeure as defined in this Article.

31.2 For the purpose of this Contract the term Force Majeure means any cause or event other than the unavailability of funds whether similar to or different from those enumerated herein beyond the reasonable control of and unanticipated or unforeseeable by and not brought about at the instance of the Party claiming to be affected by such event or which if anticipated or foreseeable could not be avoided or provided for and which has caused the nonperformance or delay in performance. Without limitation to the generality of the foregoing the term Force Majeure shall include natural phenomena or calamities earthquakes typhoons fires wars declared or undeclared hostilities invasions blockades riots insurrection and civil disturbances.

31.3 Where a Party is claiming suspension of its obligations on account of Force Majeure it shall promptly but in no case later than seven 7 days after the occurrence of the event of Force Majeure notify the other Parties in writing giving full particulars of the Force Majeure the estimated duration thereof the obligations affected and the reasons for its suspension.

31.4 A Party claiming Force Majeure shall exercise reasonable diligence to seek to overcome the Force Majeure event and to mitigate the effects thereof on the performance of its obligations under this Contract provided however that the settlement of strikes or differences with employees shall be within the discretion of the Party having the difficulty. The Party affected shall promptly notify the other Parties as soon as the Force Majeure event has been removed and no longer prevents it from complying with the obligations which have been suspended and shall thereafter resume compliance with such obligations as soon as possible. The period of work commitment or this Contract may be extended by such additional period as may be agreed by the Parties.

31.5 Notwithstanding anything contained herein if an event of Force Majeure occurs and is likely to continue for a period in excess of thirty 30 days the Parties shall meet to discuss the consequences of the Force Majeure and the course of action to be taken to mitigate the effects thereof or to be adopted in the circumstances.

88 ARTICLE 32 APPLICABLE

LAW AND LANGUAGE OF THE CONTRACT32.1 Subject to the provisions of Article 33.12 this Contract shall be governed and interpreted in accordance with the laws of India.32.2 Nothing in this Contract shall entitle the Government or the Contractor to exercise the rights privileges and powers conferred upon it by this Contract in a manner which will contravene the laws of India.32.3 The English language shall be the language of this Contract and shall be used in arbitral proceedings. All communication hearings or visual materials or documents relating to this Contract shall be in English.

89 ARTICLE 33 SOLE EXPERT CONCILIATION AND ARBITRATION33.1

The Parties shall use their best efforts to settle amicably all disputes differences or claims arising out of or in connection with any of the terms and conditions of this Contract or concerning the interpretation or performance thereof.33.2 Except for matters which by the terms of this Contract the Parties have agreed to refer to a sole expert and any other matters which the Parties may agree to so refer any dispute difference or claim arising between the Parties hereunder which cannot be settled amicably may be submitted by any Party to arbitration pursuant to Article 33.3. Such sole expert shall be an independent and impartial person of international standing with relevant qualifications and experience appointed by agreement between the Parties. Any sole expert appointed shall be acting as an expert and not as an arbitrator and the decision of the sole expert on matters referred to him shall be final and binding on the Parties and not subject to arbitration. If the Parties are unable to agree on a sole expert the disputed subject matter may be referred to arbitration.33.3 Subject to the provisions herein any unresolved dispute difference or claim which cannot be settled amicably within a reasonable time may except for those referred to in Article 33.2 be submitted to an arbitral tribunal for final decision as hereinafter provided.33.4 The arbitral tribunal shall consist of three arbitrators. The Party or Parties instituting the arbitration shall appoint one arbitrator and the Party or Parties responding shall appoint another arbitrator and both Parties shall so advise the other Parties. The two arbitrators appointed by the Parties shall appoint the third arbitrator.33.5 Any Party may after appointing an arbitrator request the other Parties in writing to appoint the second arbitrator. If such other Party fails to appoint an arbitrator within fortyfive 45 days of receipt of the written request to do

so such arbitrator may at the request of the first Party be appointed by the Secretary General of the Permanent Court of Arbitration at the Hague within fortyfive 45 days of the date of receipt of such request from amongst persons who are not nationals of the country of any of the Parties to the arbitration proceedings.33.6 If the two arbitrators appointed by the Parties fail to agree on the appointment of the third arbitrator within thirty 30 days of the appointment of the second arbitrator and if the Parties do not otherwise agree the Secretary General of the Permanent Court of Arbitration at the Hague 90 may at the request of either Party and in consultation with both appoint the third arbitrator who shall not be a national of the country of any Party.33.7 If any of the arbitrators fails or is unable to act his successor shall be appointed in the manner set out in this Article as if he was the first appointment.33.8 The decision of the arbitration tribunal and in the case of difference among the arbitrators the decision of the majority shall be final and binding upon the Parties.33.9 Arbitration proceedings shall be conducted in accordance with the arbitration rules of the United Nations Commission on International Trade Law UNCITRAL of 1985 except that in the event of any conflict between these rules and the provisions of this Article 33 the provisions of this Article 33 shall govern.33.10 The right to arbitrate disputes and claims under this Contract shall survive the termination of this Contract.33.11 Prior to submitting a dispute to arbitration a Party may submit the matter for conciliation under the UNCITRAL conciliation rules by mutual agreement of the Parties. If the Parties fail to agree on a conciliator or conciliators in accordance with the rules the matter may be submitted for arbitration. No arbitration proceedings shall be instituted while conciliation proceedings are pending and such proceedings shall be concluded within sixty 60 days.33.12 The venue of conciliation or arbitration proceedings pursuant to this Article unless the Parties otherwise agree shall be London England and shall be conducted in the English language. The arbitration agreement contained in this Article 33 shall be governed by the laws of England. Insofar as practicable the Parties shall continue to implement the terms of this Contract notwithstanding the initiation of arbitral proceedings and any pending claim or dispute.33.13 The fees and expenses of a sole expert or conciliator appointed by the Parties shall be borne equally by

the Parties. Assessment of the costs of arbitration including inental expenses and liability for the payment thereof shall be at the discretion of the arbitrators. 91 ARTICLE 34 ENTIRE AGREEMENT AMENDMENTS WAIVER AND MISCELLANEOUS34.1 This Contract supersedes and replaces any previous agreement or understanding between the Parties whether oral or written on the subject matter hereof prior to the Effective Date of this Contract.34.2 This Contract shall not be amended modified varied or supplemented in any respect except by an instrument in writing signed by all the Parties which shall state the date upon which the amendment or modification shall become effective.34.3 No waiver by any Party of any one or more obligations or defaults by any other Party in the performance of this Contract shall operate or be construed as a waiver of any other obligations or defaults whether of a like or of a different character.34.4 The provisions of this Contract shall inure to the benefit of and be binding upon the Parties and their permitted assigns and successors in interest.34.5 In the event of any conflict between any provisions in the main body of this Contract and any provision in the Appendices the provision in the main body shall prevail.34.6 The headings of this Contract are for convenience of reference only and shall not be taken into account in interpreting the terms of this Contract. 92 ARTICLE 35 CERTIFICATES35.1 A Company shall furnish prior to execution of this Contract a duly authorised copy of a resolution properly and legally passed by the Board of Directors of the Company specifying the person authorised to execute this Contract along with a Certificate duly signed by the Secretary or an Assistant Secretary of the Company under its seal in this regard and to the effect that the Company has the power and authority to enter into this Contract and to perform its obligations thereunder and has taken all necessary action to authorise the execution delivery and performance of the Contract. 93 ARTICLE 36 NOTICES36.1 All notices statements and other communications to be given submitted or made hereunder by any Party to another shall be sufficiently given if given in writing in the English language and sent by registered post postage paid or by telegram telex facsimile radio or cable to the address or addresses of the other Party or Parties as follows a To the President of India through the Secretary to the Government of India Ministry of Petroleum and Natural Gas

STATEMENTSECTION 11 BUDGET STATEMENT 100 ACCOUNTING PROCEDURE SECTION 1
GENERAL PROVISIONS1.1 PURPOSE Generally the purpose of this Accounting Procedure is to
set out principles and procedures of accounting which will enable the Government of India to
monitor effectively the Contractors costs expenditures production and income so that the
Governments entitlement to Profit Petroleum royalty cess etc. as well as Contractors entitlement to
Cost Petroleum and Profit Petroleum can be accurately determined pursuant to the terms of the
Contract. More specifically the purpose of the Accounting Procedure is to classify costs and
expenditures and to define which costs and expenditures shall be allowable for cost recovery
production sharing and participation purposes; specify the manner in which the Contractors
accounts shall be prepared and approved. This Accounting Procedure is intended to apply to the
provisions of the Contract and is without prejudice to the computation of income tax under
applicable provisions of the Income Tax Act 1961 as amended.1.2 DEFINITIONS For purposes of
this Accounting Procedure the terms used herein which are defined in the Contract shall have the
same meaning when used in this Accounting Procedure.1.3 INCONSISTENCY In the event of any
inconsistency or conflict between the provisions of this Accounting Procedure and the other
provisions of the Contract the other provisions of the Contract shall prevail.1.4 DOCUMENTATION
AND STATEMENTS TO BE SUBMITTED BY THE CONTRACTOR 1.4.1 Within thirty 30 days of the
Effective Date of the Contract the Contractor shall submit to and discuss with the Government a
proposed outline of charts of accounts operating records and reports which outline shall reflect each
of the categories and subcategories of costs and income specified in Sections 2 and 3 and shall be
in accordance with generally accepted standards and recognized accounting systems and
consistent with normal petroleum industry practice and procedures 101 for joint venture operations.
Within ninety 90 days of receiving the above submission the Government shall either provide written
notification of its approval of the proposal or request in writing revisions to the proposal. Within one
hundred and eighty 180 days from the Effective Date of the Contract the Contractor and the

Government shall agree on the outline of charts of accounts records and reports which shall also describe the basis of the accounting system and procedures to be developed and used under this Contract. Following such agreement the Contractor shall expeditiously prepare and provide the Government with formal copies of the comprehensive charts of accounts records and reports and allow the Government to examine the manuals and to review procedures which are and shall be observed under the Contract.

1.4.2 Notwithstanding the generality of the foregoing the Contractor shall make regular Statements relating to the Petroleum Operations as follows i Production Statement and Royalty and Cess Statement see Section 5 of this Accounting Procedure ii Value of Production and Pricing Statement see Section 6 of this Accounting Procedure iii Statement of Costs Expenditures and Receipts see Section 7 of this Accounting Procedure iv Cost Recovery Statement see Section 8 of this Accounting Procedure v Production Sharing Statement see Section 9 of this Accounting Procedure vi End of Year Statement see Section 10 of this Accounting Procedure vii Budget Statement see Section 11 of this Accounting Procedure

1.4.3 All reports and statements shall be prepared in accordance with the Contract and the laws of India and where there are no relevant provisions in either of these in accordance with generally accepted practices in the international petroleum industry.

1.4.4 Each of the entities constituting the Contractor shall be responsible for maintaining its own accounting records in order to comply with all legal requirements and to support all returns or any other accounting reports required by any Government authority in relation to the Petroleum Operations. However for the purposes of giving effect to this Accounting Procedure the Contractor shall appoint and notify the Government in writing thereof one of the Parties constituting Contractor who shall be responsible for maintaining at its business office in India on behalf of the Contractor all the accounts of the Petroleum Operations in accordance with the provisions of the Accounting Procedure and the Contract.

1.5 LANGUAGE AND UNITS OF ACCOUNT All accounts records books reports and statements shall be maintained on an accrual basis and prepared in the English language. The accounts shall be maintained in United States Dollars which shall be the controlling currency of account for cost recovery production sharing and

participation purposes. Metric units and Barrels shall be employed for measurements required under the Contract. Where necessary for clarification the Contractor may also maintain accounts and records in other languages currencies and units. Following any new discovery of Petroleum the Parties shall meet to establish specific principles and procedures for identifying all costs expenditures receipts and income with respect to the Contract Area.

1.6 CURRENCY EXCHANGE RATES

1.6.1

For translation purposes between United States Dollars and Indian Rupees or any other currency the previous months average of the daily means of the buying and selling rates of exchange as quoted by the State Bank of India or any other financial body as may be mutually agreed between the Parties shall be used for the month in which the revenues costs expenditures receipts or income are recorded. However in the case of any single nonUS Dollar transaction in excess of the equivalent of one hundred thousand US Dollars US\$100,000 the conversion into US Dollars shall be performed on the basis of the average of the applicable exchange rates for the day on which the transaction occurred.

1.6.2

Any realized or unrealized gains or losses from the exchange of currency in respect of Petroleum Operations shall be credited or charged to the accounts. A record of the exchange rates used in converting Indian Rupees or any other currencies into United States Dollars as specified in Section 1.6.1 shall be maintained by the Contractor and shall be identified in the relevant statements required to be submitted by the Contractor in accordance with Section 1.4.2.

1.7 PAYMENTS

1.7.1

Subject to the foreign exchange laws and regulations prevailing from time to time all payments between the Parties shall unless otherwise agreed be in United States Dollars and shall be made through a bank designated by each receiving Party.

1.7.2

Unless otherwise specified all sums due under the Contract shall be paid within fortyfive 45 days from the date on which the obligation to pay was incurred.

1.7.3

Unless otherwise specified all sums due by one Party to the other under the Contract during any month shall for each day such sums are overdue during such month bear interest compounded daily at the applicable LIBOR plus one percentage 1 point.

1.8 ARMS LENGTH TRANSACTIONS

Unless otherwise specifically provided for in the Contract all transactions giving rise to revenues costs or expenditures which will

be credited or charged to the accounts prepared maintained or submitted hereunder shall be conducted at arms length or on such a basis as will assure that all such revenues costs or expenditures will be equal to or better than as the case may be would result from a transaction conducted at arms length on a competitive basis with third parties. For the purposes of clarification this means revenues would be equal to or higher and costs would be equal to or lower.

1.9 AUDIT AND INSPECTION RIGHTS OF THE GOVERNMENT

1.9.1 Without prejudice to statutory rights the Government upon at least ninety 90 days advance written notice to the Contractor shall have the right to inspect and audit during normal business hours all records and documents supporting costs expenditures expenses receipts and income such as Contractors accounts books records invoices cash vouchers debit notes price lists or similar documentation with respect to the Petroleum Operations conducted hereunder in each Financial Year within two 2 years or such longer period 104 as may be required in exceptional circumstances from the end of such Financial Year.

1.9.2 The Government may undertake the conduct of the audit either through its own representatives or through a qualified firm of recognized international chartered accountants registered in India appointed for the purpose by the Government.

1.9.3 In conducting the audit the Government or its auditors shall be entitled to examine and verify at reasonable times all charges and credits relating to Contractors activities under the Contract and all books of account accounting entries material records and inventories vouchers payrolls invoices and any other documents correspondence and records considered necessary by the Government to audit and verify the charges and credits. The auditors shall also have the right in connection with such audit to visit and inspect at reasonable times all sites plants facilities warehouses and offices of the Contractor directly or indirectly serving the Petroleum Operations and to physically examine other property facilities and stocks used in Petroleum Operations wherever located and to question personnel associated with those operations. Where the Government requires verification of charges made by an Affiliate the Government shall have the right to obtain an audit certificate from an internationally recognized firm of public accountants acceptable to both the Government and the Contractor which may be the

Contractors statutory auditor. Any and all such costs shall be for the Governments account. 1.9.4 Any audit exceptions shall be made by the Government in writing and notified to the Contractor within one hundred and twenty 120 days following completion of the audit in question. 1.9.5 The Contractor shall answer any notice of exception under Section 1.9.4 within one hundred and twenty 120 days of the receipt of such notice. Where the Contractor has after the one hundred and twenty 120 days failed to answer a notice of exception the exception shall prevail. 1.9.6 All agreed adjustments resulting from an audit and all adjustments required by prevailing exceptions shall be promptly made in the Contractors accounts and any consequential 105 adjustments to the Governments entitlement to Petroleum shall be made as promptly as practicable. 1.9.7 If the Contractor and the Government are unable to reach final agreement on proposed audit adjustments either Party may refer any dispute thereon to a sole expert as provided for in the Contract. So long as any issues are outstanding with respect to an audit the Contractor shall maintain the relevant documents and permit inspection thereof until the issue is resolved.1.10 REVISION OF THE ACCOUNTING PROCEDURE 1.10.1 By mutual agreement between the Government and the Contractor this Accounting Procedure may be revised from time to time in writing signed by the Parties stating the date upon which the amendments shall become effective. 106 SECTION 2 CLASSIFICATION DEFINITION AND ALLOCATION OF COSTS AND EXPENDITURES2.1 SEGREGATION OF COSTS Costs shall be segregated in accordance with the purposes for which such expenditures are made. All costs and expenditures allowable under Section 3 relating to Petroleum Operations shall be classified defined and allocated as set out below in this Section. Expenditure records shall be maintained in such a way as to enable proper allocation.2.2 EXPLORATION COSTS Exploration Costs are all direct and allocated indirect expenditures incurred in the search for Petroleum in an area which is or was at the time when such costs were incurred part of the Contract Area including expenditures incurred in respect of 2.2.1 Aerial geophysical geochemical palaeontological geological topographical and seismic surveys analyses and studies and their interpretation. 2.2.2 Core hole drilling and water well drilling. 2.2.3 Labor materials supplies

and services used in drilling Wells with the object of finding Petroleum or in drilling Appraisal Wells provided that if such Wells are completed as producing Wells the costs of completion thereof shall be classified as Development Costs.

2.2.4 Facilities used solely in support of the purposes described in Sections 2.2.1 2.2.2 and 2.2.3 above including access roads all separately identified.

2.2.5 Any Service Costs and General and Administrative Costs directly incurred on exploration activities and identifiable as such and a portion of the remaining Service Costs and General and Administrative Costs allocated to Exploration Operations determined by the proportionate share of total Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Exploration Costs.

2.2.6 Geological and geophysical information purchased or acquired in connection with Exploration Operations.

107 2.2.7 Any other expenditure incurred in the search for Petroleum not covered under Sections 2.3 or 2.4.

2.3 DEVELOPMENT COSTS Development Costs are all direct and allocated indirect expenditures incurred with respect to the development of the Contract Area including expenditures incurred on account of

2.3.1 Drilling Development Wells whether these Wells are dry or producing and drilling Wells for the injection of water or Gas to enhance recovery of Petroleum and Recompletion or working over of existing or service wells.

2.3.2 Purchase installation or construction of production transport and storage facilities for production of Petroleum from a Field such as pipelines flow lines production and treatment units wellhead equipment subsurface equipment enhanced recovery systems offshore and onshore platforms export terminals and piers harbours and related facilities and access roads for production activities.

2.3.3 Engineering and design studies for facilities referred to in Section 2.3.2.

2.3.4 Any Service Costs joint Development Plans and General and Administrative Costs directly incurred in Development Operations and identifiable as such and a portion of the remaining Service Costs and General and Administrative Costs allocated to development activities determined by the proportionate share of total Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Development Costs.

2.4 PRODUCTION COSTS 2.4.1 Production Costs are expenditures incurred on Production Operations in respect of the Contract Area after the

start of production from the Field which are other than Exploration and Development Costs. The balance of General and Administrative Costs and Service Costs not allocated to Exploration Costs or Development Costs shall be allocated to Production Costs.

2.4.2 Production Costs shall include costs for completion of Exploration Wells by way of installation of casing or equipment or otherwise or for the purpose of bringing a Well into use as a producing Well or as a Well for the injection of water or Gas to enhance recovery of Petroleum and Recompletion or working over of existing or service wells.

2.5 SERVICE COSTS Service Costs are direct and indirect expenditures incurred in support of Petroleum Operations in the Contract Area including expenditures on insurance environmental protection warehouses piers marine vessels vehicles motorized rolling equipment aircraft fire and security stations workshops water and sewerage plants power plants housing community and recreational facilities and furniture and tools and equipment used in these activities. Service Costs in any Year shall include the costs incurred in such Year to purchase and/or construct the facilities as well as the annual costs of maintaining and operating the same each to be identified separately. All Service Costs shall be regularly allocated as specified in Sections 2.2.5 2.3.4 and 2.4 to Exploration Costs Development Costs and Production Costs and shall be separately shown under each of these categories. Where Service Costs are made in respect of shared facilities the basis of allocation of costs to Petroleum Operations hereunder shall be on the basis of gross expenditures.

2.6 GENERAL AND ADMINISTRATIVE COSTS General and Administrative Costs are expenditures incurred on general administration and management primarily and principally related to Petroleum Operations in or in connection with the Contract Area and shall include

2.6.1 main office field office and general administrative expenditures in India including supervisory accounting and employee relations services;

2.6.2 an annual overhead charge for services rendered by the parent company or an Affiliate of the Operator outside India to support and manage Petroleum Operations under the Contract and for staff advice and assistance including financial legal accounting and employee relations services but excluding any remuneration for services charged separately under this Accounting Procedure calculated on the basis of one percent (1%) of expenditures.

2.6.3 The

expenditures used to calculate the monthly indirect charge shall not include the indirect charge calculated either as a percentage of expenditures or as a minimum monthly charge rentals on surface rights acquired and maintained for the joint account guarantee deposits 109 concession acquisition costs bonuses paid in accordance with the Contract royalties value added taxes and taxes paid under the Contract settlement of claims proceeds from the sale of assets including division in kind amounting to more than US\$10,000 per transaction and similar items mutually agreed upon by the parties. Credits arising from any government subsidy payment and disposition of joint account property shall not be deducted from total expenditures in determining such charge. 2.6.4

The indirect charges provided for in this Section may be amended periodically by mutual agreement between the Parties if in practice these charges are found to be insufficient or excessive. 110

SECTION 3 COSTS EXPENSES EXPENDITURES AND INCIDENTAL INCOME OF THE CONTRACTOR

3.1 COSTS RECOVERABLE AND ALLOWABLE WITHOUT FURTHER APPROVAL OF THE GOVERNMENT.

Costs incurred by the Contractor on Petroleum Operations pursuant to the Contract as classified under the headings referred to in Section 2 shall be allowable for the purposes of the Contract except to the extent provided in Section 3.2 or elsewhere in this Accounting Procedure and subject to audit as provided for herein. 3.1.1 Surface Rights All direct costs necessary for the acquisition renewal or relinquishment of surface rights acquired and maintained in force for the purposes of the Contract except as provided in Section 3.1.9. Why expected How applicable 3.1.2 Labor and Associated Costs a Costs of all Contractors locally recruited employees who are directly engaged in the conduct of Petroleum Operations under the Contract in India. Such costs shall include the costs of employee benefits and Government benefits for employees and levies imposed on the Contractor as an employer transportation and relocation costs within India of the employee and such members of the employees family limited to spouse and dependent children as required by law or customary practice in India. If such employees are engaged in other activities in India in addition to Petroleum Operations the cost of such employees shall be apportioned on a time sheet basis according to sound and acceptable accounting

principles. b Assigned Personnel Costs of salaries and wages including bonuses of the Contractors employees directly and necessarily engaged in the conduct of the Petroleum Operations under the Contract whether temporarily or permanently assigned irrespective of the location of such employees it being understood that in the case of those personnel only a portion of whose time is wholly dedicated to Petroleum Operations under the Contract only that pro rata portion of applicable salaries wages 111 and other costs as specified in Sections 3.1.2c d e and f shall be charged and the basis of such pro rata allocation shall be specified. c Expenses or contributions made pursuant to assessments or obligations imposed under the laws of India which are applicable to the Contractors cost of salaries and wages. d The Contractors cost of established plans for employees group life insurance hospitalization pension retirement and other benefit plans of a like nature customarily granted to the Contractors employees provided however that such costs are in accordance with generally accepted standards in the international petroleum industry applicable to salaries and wages chargeable to Petroleum Operations under Section 3.1.2b above. e Personal Income taxes where and when they are paid by the Contractor to the Government of India for the employee in accordance with the Contractors standard personnel policies. f Reasonable transportation and travel expenses of employees of the Contractor including those made for travel and relocation of the expatriate employees including their dependent family and personal effects assigned to India whose salaries and wages are chargeable to Petroleum Operations under Section 3.1.2b. Actual transportation expenses of personnel transferred to Petroleum Operations from their country of origin and/or relocation to their country of origin shall be charged to the Petroleum Operations. Where such transfer or relocation is to or from a country other than the country of origin there shall be no reimbursement. Transportation cost as used in this Section shall mean the cost of freight and passenger service and any accountable incidental expenditures related to transfer travel and authorized under Contractors standard personnel policies. Contractor shall ensure that all expenditures related to transportation costs are equitably allocated to the activities which have benefited from the personnel concerned. 112 3.1.3 Transportation Costs The reasonable cost of

transportation of equipment materials and supplies within India and from outside India to India necessary for the conduct of Petroleum Operations under the Contract including but not limited to directly related costs such as unloading charges dock fees and inland and ocean freight charges.

3.1.4 Charges for Services a Third Party Contracts The actual costs of contract services services of professional consultants utilities and other services necessary for the conduct of Petroleum Operations under the Contract performed by third parties other than an Affiliate of the Contractor provided that the transactions resulting in such costs are undertaken pursuant to Section 1.8 of this Accounting Procedure.

b Affiliated Company Contracts i Professional and Administrative Services and Expenses Cost of professional and administrative services provided by any Affiliate for the direct benefit of Petroleum Operations including but not limited to services provided by the production exploration legal financial insurance accounting and computer services divisions other than those covered by Section 3.1.4bii which Contractor may use in lieu of having its own employees. Charges shall be equal to the actual cost of providing their services shall not include any element of profit and shall not be any higher than the most favorable prices charged by the Affiliate to third parties for comparable services under similar terms and conditions elsewhere and will be fair and reasonable in the light of prevailing international petroleum industry practice and experience.

113 ii Scientific or Technical Personnel Cost of scientific or technical personnel services provided by any Affiliate of Contractor for the direct benefit of Petroleum Operations which cost shall be charged on a cost of service basis. Charges therefor shall not exceed charges for comparable services currently provided by outside technical service organizations of comparable qualifications. Unless the work to be done by such personnel is covered by an approved Work Programme and Budget Operator shall not authorize work by such personnel without approval of the Management Committee. c Equipment facilities and property owned and furnished by the Contractors Affiliates at rates commensurate with the cost of ownership and operation provided however that such rates shall not exceed those currently prevailing for the supply of like equipment facilities and property on comparable terms in the area where the Petroleum Operations are being conducted. The equipment

and facilities referred to herein shall exclude major investment items such as but not limited to drilling rigs producing platforms oil treating facilities oil and gas loading and transportation systems storage and terminal facilities and other major facilities rates for which shall be subject to separate agreement with the Government.

3.1.5 Communications Cost of acquiring leasing installing operating repairing and maintaining communication systems including satellite radio and microwave facilities between the Contract Area and the Contractors base facility offices helicopter bases port and railway yards.

3.1.6 Office Shore Bases and Miscellaneous Facilities Net cost to Contractor of establishing maintaining and operating any office suboffice shore base facility warehouse housing or other facility directly serving the Petroleum Operations. If any such facility services contract 114 areas other than the Contract Area or any business other than Petroleum Operations the net costs thereof shall be allocated on an equitable and consistent basis.

3.1.7 Environmental Studies and Protection Costs incurred in conducting the environmental impact studies for the Contract Area and in taking environmental protection measures pursuant to the terms of the Contract.

3.1.8 Materials and Equipment a General So far as is practicable and consistent with efficient and economical operation only such material shall be purchased or furnished by the Contractor for use in the Petroleum Operations as may be required for use in the reasonably foreseeable future and the accumulation of surplus stocks shall be avoided to the extent possible. Material and equipment held in inventory shall only be charged to the accounts when such material is removed from inventory and used in Petroleum Operations. Contractor shall be allowed to recover interest at the LIBOR rate plus one percent 1 for reasonable inventories it carries. Costs shall be charged to the accounting records and books based on the average cost method.

b Warranty In the case of defective material or equipment any adjustment received by the Contractor from the suppliers or manufacturers or their agents in respect of any warranty on material or equipment shall be credited to the accounts under the Contract.

c Value of Materials Charged to the Accounts Under the Contract. i Except as otherwise provided in subparagraph b materials purchased by the Contractor and used in the Petroleum Operations shall be valued to include invoice price less trade and cash discounts if any

purchase and procurement fees plus freight and forwarding charges between point of 115 supply and point of shipment freight to port of destination insurance taxes customs duties consular fees other items chargeable against imported material and where applicable handling and transportation costs from point of importation to or from warehouse or operating site and these costs shall not exceed those currently prevailing in normal arms length transactions on the open market. ii Material purchased from or sold to Affiliates or transferred to or from activities of the Contractor other than Petroleum Operations under the Contract aa new material hereinafter referred to as condition A shall be valued at the current international price which shall not exceed the price prevailing in normal arms length transactions on the open market; bb used material which is in sound and serviceable condition and is suitable for reuse without reconditioning hereinafter referred to as condition B shall be priced at not more than seventyfive percent 75 of the current price of the above mentioned new materials; cc used material which cannot be classified as condition B but which after reconditioning will be further serviceable for original function as good secondhand condition B material or is serviceable for original function but substantially not suitable for reconditioning hereinafter referred to as condition C shall be priced at not more than fifty per cent 50 of the current price of the new material referred to above as condition A. The cost of reconditioning shall be charged to the reconditioned material provided that the condition C material value plus the cost of 116 reconditioning does not exceed the value of condition B material. Material which cannot be classified as condition B or condition C shall be priced at a value commensurate with its use. Material involving erection expenditure shall be charged at the applicable condition percentage referred to above of the current knockeddown price of new material referred to above as condition A. When the use of material is temporary and its service to the Petroleum Operations does not justify the reduction in price in relation to materials referred to above as conditions B and C such material shall be priced on a basis that will result in a net charge to the accounts under the Contract consistent with the value of the service rendered. 3.1.9 Duties Fees and Other Charges Any duties levies fees charges and any other assessments levied by any governmental or taxing authority in connection

with the Contractors activities under the Contract and paid directly by the Contractor except corporate income tax payable by the constituents of the Contractor. If Operator or its Affiliate is subject to income or withholding tax as a result of service performed at cost for Petroleum Operations under the Agreement its charges for such services may be increased by the amount of such taxes incurred grossed up provided such charges have not been otherwise recovered or a tax credit received.

3.1.10 Insurance and Losses Insurance premia and costs incurred for insurance required by law or pursuant to Article 24 of the Contract provided that such insurance is customary affords prudent protection against risk and is at a premium no higher than that charged on a competitive basis by insurance companies which are not Affiliates. Actual costs and losses incurred shall be allowable to the extent not made good by insurance. Such costs may include but are not limited to repair and replacement of property resulting from damages or losses incurred by fire flood storm theft accident or such other cause.

3.1.11 Legal Expenses All reasonable costs and expenses resulting from the handling investigating asserting defending or settling of any claim or legal action necessary or expedient for the procuring perfecting retention and protection of the Contract Area and in defending or prosecuting lawsuits involving the Contract Area or any third party claim arising out of Petroleum Operations under the Contract or sums paid in respect of legal services necessary for the protection of the joint interest of Government and the Contractor shall be allowable. Such expenditures shall include attorneys fees court costs costs of investigation and procurement of evidence and amounts paid in settlement or satisfaction of any such litigation and claims provided such costs are not covered elsewhere in the Accounting Procedure. Where legal services are rendered in such matters by salaried or regularly retained lawyers of the Contractor or an Affiliate such compensation shall be included instead under Sections 3.1.2 or 3.1.4bi above as applicable.

3.1.12 Training Costs All costs and expenses incurred by the Contractor in training as is required under Article 22 of the Contract.

3.1.13 General and Administrative Costs The costs described in Section 2.6.1 and the charge described in Section 2.6.2 of this Accounting Procedure.

3.2 COSTS NOT RECOVERABLE AND NOT ALLOWABLE UNDER THE CONTRACT

The following costs and expenses shall not be recoverable or allowable whether directly as such or indirectly as part of any other charges or expenses for cost recovery and production sharing purposes under the Contract i costs and charges incurred before the Effective Date including costs in respect of preparation signature or ratification of this Contract except as otherwise provided in Article 13.1; ii expenditures in respect of any financial transaction to negotiate float or otherwise obtain or secure funds for Petroleum Operations including but not limited to interest commission brokerage and fees related to such 118 transactions and exchange losses on loans or other financing; iii costs of marketing or transportation of Petroleum beyond the Delivery Point; iv expenditures incurred in obtaining furnishing and maintaining the guarantees required under the Contract and any other amounts spent on indemnities with regard to nonfulfillment of contractual obligations; v attorneys fees and other costs and charges in connection with arbitration proceedings and sole expert determination pursuant to the Contract; vi fines and penalties imposed by courts of law of the Republic of India; vii donations and contributions; viii expenditures for the creation of any partnership or joint venture arrangement; ix amounts paid with respect to nonfulfillment of contractual obligations; x costs incurred as a result of failure to insure where insurance is required pursuant to the Contract; xi costs and expenditures incurred as a result of wilful misconduct or gross negligence of the Contractors supervisory personnel; xii payments pursuant to Article 16 of the Contract.

3.3 OTHER COSTS RECOVERABLE AND ALLOWABLE. Any other costs and expenditures not included in Section 3.1 or 3.2 of this Accounting Procedure but which have been incurred by the Contractor for the necessary and proper conduct of Petroleum Operations pursuant to an approved Work Programme and Budget.

3.4 INCIDENTAL INCOME AND CREDITS All incidental income and proceeds received from Petroleum Operations under the Contract including but not limited to the items listed below shall be credited to the accounts under the Contract and shall be taken into account for cost recovery production sharing and participation purposes in the manner described in Articles 13 and 14 of the Contract i The proceeds of any insurance or claim or 119 judicial awards in connection with Petroleum Operations under the Contract or any assets charged

to the accounts under the Contract where such operations or assets have been insured and the premia charged to the accounts under the Contract; ii Revenue received from third parties for the use of property or assets the cost of which has been charged to the accounts under the Contract; iii Any adjustment received by the Contractor from the suppliers/manufacturers or their agents in connection with defective material the cost of which was previously charged by the Contractor to the accounts under the Contract; iv Rentals refunds or other credits received by the Contractor which apply to any charge which has been made to the accounts under the Contract; v Prices originally charged to the accounts under the Contract for materials subsequently exported from the Republic of India without being used in Petroleum Operations under the Contract; vi Proceeds from the sale or exchange by the Contractor of plant or facilities from a Field the acquisition costs of which have been charged to the accounts under the Contract for the relevant Field; vii Legal costs charged to the accounts under Section 3.1.11 of this Accounting Procedure and subsequently recovered by the Contractor.

3.5 NONDUPLICATION OF CHARGES AND CREDITS Notwithstanding any provision to the contrary in this Accounting Procedure it is the intention that there shall be no duplication of charges or credits to the accounts under the Contract. 120 **SECTION 4 RECORDS AND INVENTORIES OF ASSETS**

4.1 RECORDS 4.1.1 The Contractor shall keep and maintain detailed records of property and assets in use for or in connection with Petroleum Operations under the Contract in accordance with normal practices in exploration and production activities of the international petroleum industry. Such records shall include information on quantities location and condition of such property and assets and whether such property or assets are leased or owned.

4.1.2 The Contractor shall furnish annually particulars to the Government by notice in writing as provided in the Contract of all major assets acquired by the Contractor to be used for or in connection with Petroleum Operations.

4.2 INVENTORIES 4.2.1 The Contractor shall at not less than once every twelve 12 Calendar Months with respect to movable assets take an inventory of the controllable assets used for or in connection with Petroleum Operations in terms of the Contract and address and deliver such inventory to the Government with a statement of the principles upon which

valuation of the assets mentioned in such inventory has been based. Controllable assets means those assets the Operator shall submit to detailed record keeping. b not less than once every three 3 years with respect to immovable assets take an inventory of the assets used for or in connection with Petroleum Operations in terms of the Contract and address and deliver such inventory to the Government together with a written statement of the principles upon which valuation of the assets mentioned in such inventory has been based. Immovable assets means those assets which are placed in service and have an original cost in excess of Fifty Thousand United States Dollars US50000.

4.2.2 The Contractor shall give the Government at least thirty 30 days notice in writing in the manner provided for in the Contract of its intention to take the inventory referred to in Section 4.2.1 121 and the Government shall have the right to be represented when such inventory is taken.

4.2.3 When an assignment of rights under the Contract takes place a special inventory shall be taken by the Contractor at the request of the assignee provided that the cost of such inventory is borne by the assignee and paid to the Contractor.

4.2.4 In order to give effect to Article 27 of the Contract the Contractor shall provide the Government with a comprehensive list of all relevant assets when requested by the Government to do so.

122 SECTION 5 PRODUCTION STATEMENT AND ROYALTY AND CESS STATEMENT

5.1 From the date of first production after the Effective Date of Petroleum from the Contract Area the Contractor shall submit a Production Statement for each Calendar Month to Government showing the following information separately for each producing field and in aggregate for the Contract Area

5.1.1 The quantity of Crude Oil produced and saved.

5.1.2 The quality and characteristics of such Crude Oil produced and saved.

5.1.3 The quantity of Associated Natural Gas and Non Associated Natural Gas produced and saved.

5.1.4 The quality characteristics and composition of such Natural Gas produced and saved.

5.1.5 The quantities of Crude Oil and Natural Gas used for the purposes of carrying on drilling and Production Operations and pumping to field storage as well as quantities reinjected.

5.1.6 The quantities of Crude Oil and Natural Gas unavoidably lost.

5.1.7 The quantities of Natural Gas flared and vented.

5.1.8 The size of Petroleum stocks held on the first day of the Calendar Month in question.

5.1.9

The size of Petroleum stocks held on the last day of the Calendar Month in question. 5.1.10 The quantities of Natural Gas reinjected into the Petroleum Reservoir. 5.1.11 The number of days in the Calendar Month during which Petroleum was produced from each Field. 5.1.12 The GasOil ratio for each Field for the relevant Calendar Month. 5.1.13 The waterOil ratio for each Field for the relevant Calendar Month if available. 5.2 All quantities shown in this Statement shall be expressed in both volumetric terms barrels of oil and cubic metres of gas and in weight metric tonnes. 5.3 The Government may direct in writing that the Contractor include other particulars relating to the production of Petroleum in its Production Statement and the Contractor shall to the extent possible comply with such direction. 5.4 The Production Statement for each Calendar Month shall be submitted to Government no later than ten 10 days after the end of such Calendar Month for Oil and the immediately succeeding Calendar Month for Gas. 5.5 The Contractor shall for the purposes of Article 15 submit a statement to Government providing the calculation of the amount of royalty and cess separately paid with respect to each Calendar Month for each producing Field and in aggregate for the Contract Area. The statement shall show the following information 5.5.1 The quantity of Crude Oil and Condensate produced and saved. 5.5.2 The quantity of ANG and NANG produced and saved. 5.5.3 The amount of royalty and cess separately paid on Crude Oil and Condensate produced saved and sold and the particulars of the calculation thereof. 5.5.4 The amount of royalty paid on ANG and NANG and the particulars of the calculation thereof. 5.6 The Royalty and Cess Statement for each Calendar Month shall be submitted to Government no later than twentyone 21 days after the end of such Calendar Month for Oil and the most recently available Calendar Month for Gas.

124 SECTION 6 VALUE OF PRODUCTION AND PRICING STATEMENT

6.1 The Contractor shall prepare a Statement providing calculations of the value of Crude Oil produced and saved during each Calendar Month. This Statement shall contain the following information 6.1.1 The quantities prices and receipts realized by the Contractor as a result of sales of Crude Oil to third parties with any sales to Government being separately identified made during the Calendar Month in question. 6.1.2 The quantities prices and receipts realized therefor by

the Contractor as a result of sales of Crude Oil made during the Calendar Month in question other than to third parties. 6.1.3 The quantities of Crude Oil appropriated by the Contractor to refining or other processing without otherwise being disposed of in the form of Crude Oil. 6.1.4 The value of stocks of Crude Oil on the first day of the Calendar Month in question. 6.1.5 The value of stocks of Crude Oil on the last day of the Calendar Month in question. 6.1.6 The percentage volume of total sales of Crude Oil made by the Contractor during the Calendar Month that are Arms Length Sales to third parties. 6.1.7 Information available to the Contractor in so far as required for the purposes of Article 19 of the Contract concerning the prices of competitive crude oils produced by the main petroleum producing and exporting countries including contract prices discounts and premia and prices obtained on the spot markets. 6.2 The Contractor shall prepare a statement providing calculations of the value of ANG and NANG produced and sold during each Calendar Month for the most recently available Calendar Month. This Statement shall contain all information of the type specified in Section 6.1 for Crude Oil as is applicable to Gas and such other relevant information as may be required by the Government. 6.3 The Statements required pursuant to Sections 6.1 and 6.2 shall include a detailed breakdown of the calculation of the prices of Crude Oil Associated Natural Gas and Non Associated Natural Gas. 125 6.4 The Value of Production and Pricing Statement for each Calendar Month shall be submitted to Government not later than twentyone 21 days after the end of such Calendar Month for Oil and the most recently available Calendar Month for Gas. 126

SECTION 7 STATEMENT OF COSTS EXPENDITURES AND RECEIPTS

7.1 The Contractor shall prepare with respect to each Calendar Quarter a Statement of Costs Expenditures and Receipts under the Contract. The statement shall distinguish between Exploration costs Development Costs and Production Costs and shall separately identify all significant items of costs and expenditure as itemized in Section 3 of this Accounting Procedure within these categories. The statement of receipts shall distinguish between income from the sale of Petroleum and inental income of the sort itemized in Section 3.4 of this Accounting Procedure. If the Government is not satisfied with the categories it shall be entitled to request a more detailed breakdown. The Statement shall show the

following 7.1.1 Actual costs expenditures and receipts for the Calendar Quarter in question. 7.1.2 Cumulative costs expenditures and receipts for the Year in question. 7.1.3 Latest forecast of cumulative costs expenditures and receipts at the Year end. 7.1.4 Variations between budget forecast and latest forecast and explanations thereof. 7.2 The Statement of Costs Expenditure and Receipts of each Calendar Quarter shall be submitted to Government not later than sixty 60 days after the end of such Calendar Quarter. 127 SECTION 8 COST RECOVERY STATEMENT

8.1 The Contractor shall prepare with respect to each Calendar Quarter a Cost Recovery Statement containing the following information 8.1.1 Unrecovered Contract Costs carried forward from the previous Calendar Quarter if any. 8.1.2 Contract costs for the Calendar Quarter in question. 8.1.3 Total Contract Costs for the Calendar Quarter in question Section 8.1.1 plus Section 8.1.2. 8.1.4 Quantity and value of Cost Petroleum taken and disposed of by the Contractor for the Calendar Quarter in question. 8.1.5 Contract Costs recovered during the Calendar Quarter in question. 8.1.6 Total cumulative amount of Contract Costs recovered up to the end of the Calendar Quarter in question. 8.1.7 Amount of Contract Costs to be carried forward into the next Calendar Quarter. 8.2

Where necessary and possible the information to be provided under Section 8.1 shall be identified separately Field by Field and also separately for Crude Oil Associated Natural Gas and Non Associated Natural Gas. 8.3 The cost recovery information required pursuant to Subsection 8.1 above shall be presented in sufficient detail so as to enable Government to identify how the cost of assets are being recovered. 8.4 The Cost Recovery Statement for each Calendar Quarter shall be submitted to Government not later than sixty 60 days after the end of such Calendar Quarter. 128

SECTION 9 PRODUCTION SHARING STATEMENT 9.1 The Contractor shall prepare with respect to each Calendar Quarter a Production Sharing Statement containing the following information 9.1.1

The calculation of the applicable net cash flows as defined in Appendix D for the Calendar Quarter in question. 9.1.2 The Investment Multiple applicable in the Calendar Quarter in question. 9.1.3 Based on Section 9.1.2 and Article 14 the appropriate percentages of Profit Petroleum if any for the Government and Contractor in the Calendar Quarter in question. 9.1.4 The total amount of Profit

Petroleum if any to be shared between the Government and Contractor in the Calendar Quarter in question. 9.1.5 Based on Sections 9.1.3 and 9.1.4 the amount of Profit Petroleum due to the Government and Contractor as well as to each constituent of the Contractor in the Calendar Quarter in question. 9.1.6 The actual amounts of Petroleum taken by the Government and Contractor as well as by each constituent of the Contractor during the Calendar Quarter in question to satisfy their entitlement pursuant to Section 9.1.5. 9.1.7 Adjustments to be made if any in future Calendar Quarters in the respective amounts of Profit Petroleum due to the Government and Contractor as well as to each constituent of the Contractor on account of any differences between the amounts specified in Sections 9.1.5 and 9.1.6 as well as any cumulative adjustments outstanding from previous Calendar Quarters. 9.2 Where necessary and if possible the information to be provided under Section 9.1 shall be identified separately for each Field and also separately for Crude Oil as distinct from Natural Gas. 9.3 The Production Sharing Statement shall be submitted to Government not later than sixty 60 days after the end of such Calendar Quarter. 129 SECTION 10 END OF FINANCIAL YEAR STATEMENT

10.1 The Contractor shall prepare a definitive End of Year Statement. The statement shall contain aggregated information in the same format as required in the Production Statement and Royalty and Cess Statement Value of Production and Pricing Statement Statement of Costs Expenditure Receipts Cost Recovery Statement and Production Sharing Statement but shall be based on actual quantities of Petroleum produced income received and costs and expenditures incurred. Based upon this Statement any adjustments that are necessary shall be made to the transactions concerned under the Contract. 10.2 The End of Year Statement for each year shall be submitted to Government within ninety 90 days of the end of such Year. 130 SECTION 11 BUDGET STATEMENT 11.1 The Contractor shall prepare a Budget Statement for each Year. This statement shall distinguish between budgeted Exploration Costs Development Costs and Production Costs and shall show the following 11.1.1 Forecast costs expenditures and receipts for the Year in question. 11.1.2 A schedule showing the most important individual items of total costs expenditures and receipts for the Year. 11.2 The Budget Statement

shall be submitted to Government with respect to each Year not less than ninety 90 days before the start of the Year provided that in the case of the Year in which the Effective Date falls the Budget Statement shall be submitted within ninety 90 days of the Effective Date. 131

APPENDIX D CALCULATION OF THE INVESTMENT MULTIPLE FOR PRODUCTION SHARING PURPOSES¹.

In accordance with the provisions of Article 14 the share of the Government and the Contractor respectively of Profit Petroleum from the Contract Area in any Financial Year shall be determined by the Investment Multiple earned by the Companies from the Contract Area at the end of the preceding Financial Year. These measures of profitability shall be calculated on the basis of the appropriate net cash flows as specified in this Appendix D.

INVESTMENT MULTIPLE². The Net Cash Income of the Companies from the Contract Area in any particular Financial Year is the aggregate value for the year of the following i Cost Petroleum entitlement of the Companies as provided in Article 13; PLUS ii Profit Petroleum entitlement of the Companies as provided in Article 14; PLUS iii Rental income of the Companies of the type specified in Section 3.4 of the Accounting Procedure arising from Petroleum Operations and apportioned to the Contract Area; LESS iv the Companies share of all Production Costs and royaltycess payments incurred on or in the Contract Area; LESS v the notional income tax determined in accordance with paragraph 7 of this Appendix payable by the Companies on profits and gains from the Contract Area.

3. The Investment made by the Companies in the Contract Area in any particular Financial Year is the aggregate value for the year of i Exploration Costs incurred by the Companies in the Contract Area and apportioned to the Contract Area in the same proportion that said Costs were recovered pursuant to Articles 13.2 and 13.3. 132 PLUS ii Development Costs incurred by the Companies in the Contract Area.

4. For the purposes of the calculation of the Investment Multiple Costs or expenditures which are not allowable as provided in the Accounting Procedure shall be excluded from Contract Costs and be disregarded.

5. The Investment Multiple ratio earned by the Companies as at the end of any Financial Year from the Contract Area shall be calculated by dividing the aggregate value of the addition of each of the annual Net Cash Incomes accumulated without interest up to and including

that Financial Year starting from the Financial Year in which Production Costs were first incurred or production first arose after the Effective Date on or in the Contract Area by the aggregate value of the addition of each of the annual Investments accumulated without interest up to and including that Financial Year starting from the Financial Year in which Exploration and Developments Costs were first incurred.

6. Profit Petroleum from the Contract Area in any Financial Year shall be shared between the Government and the Contractor in accordance with the value of the Investment Multiple earned by the Companies as at the end of the previous Financial Year pursuant to Articles 14.2 14.3 and 14.4.

GENERAL 7. In determining the amount of notional income tax to be deducted in the applicable cash flows specified in paragraph 2 of this Appendix a notional income tax liability in respect of the Contract Area shall be determined for each Company as if the conduct of Petroleum Operations by the Company in the Contract Area constituted the sole business of the Company and as if the provisions of the Income Tax Act 1961 with respect to the computation of income tax at a fifty percent 50 rate applicable to Petroleum Operations on the basis of the income and deductions provided for in Article 15 of this Contract were accordingly applicable separately to the Contract Area disregarding any income allowances deductions losses or setoff of losses from any other Contract Area or business of the Company.

8. Sample Calculation is attached in Appendix D1.

APPENDIX D1 INVESTMENT MULTIPLE CALCULATION EXAMPLE PROBLEM

The following example is intended to demonstrate the calculation and impact of the Investment Multiple. The figures shown would be for the Companies and are fictitious in this example for demonstration purposes. The investment multiple is calculated individually for the Companies.

	RIL	OR	EOGIL
Investment Multiple at beginning of	1.96	Financial Year 11	Profit Oil Shares at beginning of
24.00	Financial Year 11	US MILLIONS	SA Cumulative Net Cash Income at 100.00 beginning of
Financial Year 11	Cost Petroleum in Financial Year 11	10.00	Profit Petroleum in Financial Year 11
1.00	Inental Income in Financial Year 11	.00	Production Costs in Financial Year 11
.60	Oil Royalty and Cess in Financial Year 11	1.57	Gas Royalty in Financial Year 11
0.41	Notional Income Tax in Financial Year 11	2.00	B Cumulative Net Cash Income at end of
106.42	Financial Year 11	C	

Cumulative Investment at beginning of 51.00 Financial Year 11 Exploration Costs in Financial Year 11 0.30 Development Costs in Financial Year 11 1.50 Service Costs in Financial Year 11 0.00D
 Cumulative Investment at end of 52.80 Financial Year 11Investment Multiple at beginning of 2.02
 Financial Year 12 B DProfit Oil Shares at beginning of 18.00 Financial Year 12Since the Investment
 Multiple is calculated to be greater than 2.0 at thebeginning of Financial Year 12 the Profit
 Petroleum share to be received by RILor EOGIL falls from 24 to 18 at the inception of Financial Year
 12.In the event that the Investment Multiple were found to exceed 2.0during the financial close of
 Financial Year 11 the Contractor mayhave received excess Profit Petroleum during the first sixty
 60days of Financial Year 12. In this case the quantity of excessProfit Petroleum will be calculated
 and the accounts will besettled by adjustment to entitlements within sixty 60 days of the
 followingyear year twelve. 134 APPENDIX E FORM OF FINANCIAL AND PERFORMANCE
 GUARANTEE to be furnished pursuant to Article 29 of the ContractWHEREAS ENRON
 EXPLORATION COMPANY a Company duly organized and existing underthe laws of Delaware
 U.S.A. having its registered office at 1400 Smith StreetHouston Texas U.S.A. hereinafter referred to
 as the Guarantor whichexpression shall include its successors and assigns is the indirect owner
 of100 of the capital stock of ENRON OIL GAS INDIA LIMITED Company anddirect owner of its
 parent company; andWHEREAS Company is signatory to a Production Sharing Contract of even
 date ofthis guarantee in respect of an Offshore area identified as Panna and MuktaBlocks
 hereinafter referred to as the Contract made between the Governmentof India hereinafter referred to
 as the Government Company RELIANCEINDUSTRIES LIMITED and OIL NATURAL GAS
 CORPORATION LIMITED hereinafterreferred to as Contractor which expression shall include its
 successors andpermitted assigns; andWHEREAS the Guarantor wishes to guarantee the
 performance of Company or itsAffiliate Assignee under the Contract as required by the terms of the
 Contract;NOW THEREFORE this Deed hereby provides as follows1. The Guarantor hereby
 unconditionally and irrevocably guarantees to the Government that it will make available or cause to
 be made available to Company or any other directly or indirectly owned Affiliate of Company to

which any part or all of Companys rights or interest under the Contract may subsequently be assigned Affiliate Assignee to ensure that Company or any Affiliate Assignee can carry out its work commitment as set forth in the Contract.2. The Guarantor further unconditionally and irrevocably guarantees to the Government reasonable compliance by Company or any Affiliate Assignee of any obligations of Company or any Affiliate Assignee under the Contract.3. The Guarantor hereby undertakes to the Government that if Company or any Affiliate Assignee shall in any respect fail to perform its work commitments under the Contract or commit any material breach of such obligations then the Guarantor shall fulfill or cause to be fulfilled the obligations in place of Company or any Affiliate Assignee and will indemnify the Government against all actual losses damages costs expenses or otherwise which may result directly from such failure to perform or breach on the part of Company. In no event shall Guarantor be liable for any special consequential indirect inental or punitive damages of any kind or character including but not limited to loss of profits or revenues loss of product or loss of use arising out of or related to a material breach by Company of its obligations under the Contract.4. This guarantee shall take effect from the Effective Date and shall remain in full force and effect for the duration of the Contract and thereafter until no sum remains payable by Company or its Affiliate Assignee under the Contract or as a result of any decision or award made by any expert or arbitration tribunal thereunder.5. This guarantee shall not be affected by any change in the Articles of Association and bylaws of Company or the Guarantor or in any instrument 135 establishing the Licensee.6. The liabilities of the Guarantor shall not be discharged or affected by a any time indulgence waiver or consent given to Company; b any amendment to the Contract or to any security or other guarantee or indemnity to which Company has agreed; c the enforcement or waiver of any terms of the Contract or of any security other guarantee or indemnity; or d the dissolution amalgamation reconstruction or reorganization of Company.7. This guarantee shall be governed by and construed in accordance with the laws of India. IN WITNESS WHEREOF the Guarantor through its duly authorized representatives has caused its seal to be duly affixed hereto and this guarantee to be duly executed the day of 1994.The seal of was hereto duly affixed by this

day of 1994 in accordance with its bylaws and this guarantee was duly signed by and as required by the said bylaws. Secretary Vice President Witness 136 APPENDIX F EQUIPMENT

The development plan illustrated in Figure G1 is based on the assumption that ONGC has provided at the Effective Date as represented in data and information heretofore provided by ONGC certain structures and facilities. All Equipments specified below including that not yet installed shall be provided at ONGC cost and risk. The following facilities have been installed and placed into service by ONGC as of 1st August 1993 1 well platform PA 8 wells PA1 PA2 PA3 PA4 PA5 PA6 PA7 PA8 Early Production System EPS jackup rig SAGAR LAXMI including production systems and all fixtures and appurtenances Tanker loading system loading buoy and appurtenances PB PD PE jackets only installed; well fluid line connecting each to EPS 23 development wells drilled in PB PD PE MA well platform 8 development wells drilled in MA 14 well fluid pipeline connects MA to Panna EPS Interconnecting Flowlines and Pipelines

The following facilities were assumed by the Companies to be installed and commissioned by ONGC prior to the Effective Date and Companies estimate of project cost does not include the following ONGCs schedule for installation as represented to Companies is also shown PB Deck and Facilities Fourth Quarter 1993 PD Deck and Facilities First Quarter 1994 PE Deck and Facilities Second Quarter 1994 MA Deck and Facilities First Quarter 1994 137 APPENDIX G DEVELOPMENT COMMITMENT SPECIFIED BY THE COMPANIES

The development plan illustrated in Figure G1 is based on the assumption that ONGC has provided at the Effective Date as represented in data and information heretofore provided by ONGC certain structures and facilities. The development of the Fields is proposed to be completed by Contractor through its activities under this Contract. The following describes what facilities platforms and wells are provided by ONGC prior to the Effective Date. The following facilities have been installed and placed into service by ONGC 1 well platform PA 8 wells PA1 PA2 PA3 PA4 PA5 PA6 PA7 PA8 Early Production System EPS jackup Tanker loading system via SBM PB PD PE jackets only installed; well fluid line connecting each to EPS 23 development wells drilled in PB PD PE MA well platform 8 development wells drilled in MA 14 well fluid pipeline connects MA to Panna EPS

The

following facilities were assumed by the Companies to be installed and commissioned by ONGC prior to the Effective Date and Companies estimate of project cost does not include the following ONGCs schedule for installation as represented to Companies is also shown PB Deck and Facilities Fourth Quarter 1993 PD Deck and Facilities First Quarter 1994 PE Deck and Facilities Second Quarter 1994 MA Deck and Facilities First Quarter 1994 Drill two horizontal wells from PD Second half 1993 Drill two horizontal wells from PE Second half 1993 Complete two horizontal wells from PE Second half 1993 The following work intended to complete the development plan contemplated is included in Companies plan and only these facilities and wells are subject to the Cost Recovery Limit as defined in Article 13 Panna Drill two horizontal wells from PD Drill two horizontal sections in two suspended wells on PE and complete same Fabricate and install PC and PF jackets Fabricate or refurbish and install PC and PF deck packages Drill nine horizontal wells from PC Drill nine horizontal wells from PF Fabricate and install PPA and PQ 138 Lay necessary well fluid gaslift and free gas lines Lay sour gas export line from PPA to proposed ONGC 42 pipeline Acquire 850 km of 2D seismic data Drill two exploratory wells Geophysical geological and engineering studies Mukta Fabricate and install MB jacket Fabricate or refurbish and install MB deck package Drill six directional wells from MB Lay MBMA well fluid line Lay PPAMAMB gaslift line Drill two exploratory wells Geophysical geological and engineering studies Reprocess and interpret the 198889 3D survey and usable data from the 1991 SBS 2 D survey Annex G1 shows Companies development concept based on an assumed project start date of 1st July 1993. 139 APPENDIX G ANNEXURE G1 TECHNICAL INFORMATION The following analysis is based on information presented by GOI which has not been independently verified. Hence the information given here is without warranty although we believe it to be accurate. We have accounted for relevant technical details provided in the Docket and Data Package. These technical data are subject to different interpretations and may not necessarily lead to unique results.

VIIA TECHNICAL INFORMATION FOR PANNA FIELD

abc 1. LOCATION The 430 square kilometers Panna block is located in the Offshore Bombay basin of India about 50 km east of the giant Bombay High field. Panna field is a large culmination that occurs

where the westplunging axis of the HeeraBassein structural block intersects the western flank of the faultbound northsouth trending Central Graben FIGURE VIIA1.

2. STRATIGRAPHY

Commercial hydrocarbons are trapped in porous and permeable shoal carbonate reservoirs of the Bassein B zone Middle Eocene and A zone Early Oligocene. The B zone consists of over 300 meters of porous algal and fusillinid packstones and grainstones. It is the primary oil reservoir in Panna with up to 27 meters of oil column and 25 meters of gas. The B zone overlies shales and thin sandstones of the Early EocenePaleocene Basal Clastics formation which have yielded some interesting but apparently subcommercial tests of oil and gas. The top of the Bzone is an unconformable surface overlain by 10 to 15 meters of thin shales and argillaceous limestones called the Tight zone. The Tight zone grades upward into the A zone. It consists of 50 to 60 meters of interbedded tight and porous wackestones and packstones which are in turn overlain by alternating shales and tight limestones of the upper Bassein formation. The A zone is primarily a gas reservoir with upwards of 75 meters of gas column. Mappable seismic reflectors occur at the top A zone H3A and top B zone H3B FIGURE VIIA2.

3. STRUCTURE

ONGC structure maps on the B and A zones are shown in FIGURES VIIA3 and 4. A EECRIL seismic time map on the H3B reflector is exhibited in FIGURE VIIA5. Comparison of the time map with the cited B zone structure map reveals similarities in the general structural aspects of Panna field including a large broad lowrelief SE structure which was tested by the BS136 and 8 exploration wells; a highrelief WNW structure penetrated in a flank position by the BN1 development well; and another highrelief NW structure that was also penetrated in a flank position by the BS5 exploration well. Both the BN1 and BS5 wells have indicated log pay but neither was production tested. The time map exhibits numerous NWSE oriented faults with upwards of 100 meters of throw on the eastern margin of the field and lesser amounts of the 5 to 20 meters range in the field proper where they appear to control the cited highrelief popup structures. The seismic section BS425A located on FIGURE VIIA6 reveals the nature of the faults along a WNWSE transect FIGURE VIIA7. Although all appear to have normal throw their similar orientation and cross sectional geometry suggest a possible transtensional wrench component. This is

supported by the smaller conjugate ENEWSW faults that lie enechelon along the larger fault trends. The large SE structure currently under development by ONGC is considered as the BaseCase reserve target in this proposal. It will be referred to by platform designation as the PAPF structure. The two smaller highrelief structures are considered as upside Success Case targets whose development would be contingent on the successful outcome of a work program detailed later in this document. They are referred to as the PG and PH structures as shown in FIGURE VIIA3 which exhibits a conceptual development scheme overlay to the B zone structure.

4. RESERVOIR CHARACTERIZATION

Core studies indicate that both the A and B zones have been subjected to sealevel lowering and emergence which brought about diagenetic dissolution and general enhancement of porosity and permeability FIGURES VIIA89. Hydrocarbon fluid contacts appear to be extremely consistent throughout the greater field area. The WE diagrammatic cross section of FIGURE VIIA10 demonstrates the cross cutting nature of the fluid levels through formational boundaries. Well performance data suggest strong pressure support from an active water drive mechanism associated with the massive B zone aquifer. Dissolutionenhanced vertical permeability and the cited smallscale faults are interpreted to have locally breached the sealing capacity of the Tight zone between the A and B zones. Therefore concurrent production of B zone oil and A zone gas is not advised especially in the early life of the field. Detailed petrophysical analysis was done on straighthole exploration wells with complete modern log suites including BS5 BS6 and BS8. TABLE VIIA1 lists the petrophysical input parameters utilized for the density porosity and Archie water saturation calculations. The oilfreewater contact was observed at 1760 meters subsea in analysed wells. Similarly the gasoil contact consistently occurred at 1733 meters subsea as defined by RFT and log analysis data. In the B zone up to 50 meters of the upper hydrocarbonbearing interval has average density porosity of 29 while the middle and lower waterwet portions exhibit an average density porosity of 20. For the A zone only higher porosity beds were counted as pay with an average of 13 meters net out of 55 gross and 23 density porosity. Petrophysical analysis of the B Zone indicates that there is a distinct zonation of the hydrocarbon interval as depicted on the type

log in FIGURE VIIA11. These zones include the following ZONE BASE SUBSEA ELEVATIONm
Free Gas 1733 Free Oil 1746 Moveable Oil 1751 Residual Oil 1760 Surfaces vary 12 meters as a
function of reservoir quality 5. VOLUMETRIC RESERVE CALCULATIONS Volumetric input
parameters depict the maximum minimum and most likely values of area under closure net pay
thickness porosity and water saturation for each hydrocarbon zone of the A and B intervals.
Volumetric parameters for the Base Case PAPF structure are listed in TABLE VIId i. The Success
Case for PG and PH is set forth in TABLE VIId ii. It bears noting that the distinction of the various
hydrocarbon zones in the A interval are generally inferred from production tests of the BS4 BS9 and
PBM2 exploration wells. Determination of the cited hydrocarbon zones is inhibited by A zones
poorer reservoir quality and interbedded nature. Fluid properties of A and B zones are listed in
TABLE VIIA2. Of note is the residual oil ROS and gas RGS saturation values of 40 and 45
respectively. The assumed average value for ROS of 40 which is common for carbonate reservoirs
compares with values of 32 37 from data provided in the data package for the highestquality
reservoir samples. The high RGS value of 45 is consistent with the strong waterdrive model where
reservoir pressure drawdown remains relatively low through the fields productive life. The
methodology for volumetric calculations utilizes the B zone and A zone structure maps to determine
the area and resulting rock volume of each cited hydrocarbon zone in the respective A and B
intervals. Average values for pay porosity hydrocarbon saturation were then utilized to calculate oil
and gas in place. Recoverable reserves were calculated by subtracting ROS and RGS from the
hydrocarbon saturation of the respective zones and assuming a sweep efficiency for the natural
water drive as follows A zone gas sweep efficiency 70 A zone oil sweep efficiency 60 B zone gas
sweep efficiency 95 B zone oil sweep efficiency 60 Although calculated no A zone recoverable oil
reserves were included in the Base or Success Cases because the oil occurs in a rim around the
outer perimeter of the field where it is beyond reach with the envisioned development scheme that
targets B zone oil and A zone gas reserves. Comparison of volume per unit area calculations e.g.
MMtsquare kilometers indicate that the A zone oil reservoir requires 5X the area of the B zone oil

reservoir to yield an equivalent volume of recoverable reserves. Stated another way for a given drainage area the A zone will yield 20 of the reserves delivered by the B zone. FIGURE VIIA12 shows the recoverable reserve uncertainty for the base case PAPF structure expressed as a log normal distribution on a log probability scale. It indicates the following range

PROBABILITY	RECOVERABLE	RECOVERABLE or Oil Gas MMt	MMM cubic meters
Minimum	90	12.1	7.25
Most Likely	50	16.2	10.00
Maximum	10	22.4	13.88

The most likely reserve range was utilized in the Base Case development plan and production profile. Comparison of the oil inplace for the B zone and recoverable B zone oil indicates a recovery factor of 23.8. Gas recovery for the A and B zones is 27.3. This low gas recovery is a function of the relatively high percentage of solution gas to total gas volume 33.6 and the relatively poor A zone reservoir quality and high residual gas saturation assumed for the water drive model. Detailed reserves by zone are listed in TABLE VIIAei for the base case TABLE VIIAeii for the upside reserves and TABLE VIIAeiii for the combined Success case.

de PANNA PARAMETERS AND RESERVES Please refer to TABLES VII

Adi dii ei eii eiif

PLANS FOR UTILIZATION OF GAS PANNA

1. The natural water drive characteristics of the Panna field are well substantiated and therefore no gas reinjection for pressure maintenance is necessary. Instead all effort will be made to avoid flaring any gas volumes other than as necessary for optimum oil production. It should be recognised that under some development scenarios increased gas flaring will result from unavailability of the GOlowned gas transmission line. GOI approval for such temporary flaring is presumed and is a condition of this bid.
2. The need for gas lifting of producing wells is not an immediate concern due to the flow capability of the producing wells. Adequate gas lift gas is available and facilities to gather compress and distribute for either sale or gas lift is planned.
3. Upon the installation of either a processing platform or other means of compression and dehydration gas sales will begin expected no later than July 1995.
4. Flaring until gas processing facilities are installed will be minimised by flaring only gas associated with oil production.
5. The proposed gas transportation option is a connection to the planned 42inch ONGC gas pipeline to Hazira. The connecting pipeline will be built by the Bidder as part of the costrecoverable work

program. VIIB. TECHNICAL INFORMATION FOR MUKTA FIELD

abc 1. LOCATION The 777 square kilometers Mukta block is located in the offshore Bombay basin of India about 25 km east of the giant Bombay High field and 25 km west of Panna field. It contains a complex of relatively small structures that are positioned on the axial crest of the westplunging HeeraBassein structural block. The Mukta block lies approximately midway between two major NWSE structural elements that cut the HeeraBassein nose. These include the Bombay High fault to the west and the Central Graben to the east FIGURE VIIB1. The numerous mapped structures of the block have been geographically subdivided into three structural blocks or areas by ONGC called B57 B19 and B126. The B57 and B19 areas are jointly called Mukta field. FIGURE VIIB2 highlights the significant structural closures and defines the B57 seismic 3D map area in red.

2. STRATIGRAPHY Commercial hydrocarbons are trapped in multiple porous and permeable shoal carbonate reservoirs of the Bassein B zone Middle Eocene and sandstones of the underlying Early EocenePaleocene Basal Clastics formation. The Bassen A zone Early Oligocene has tested high rates of gas and condensate in several exploration wells but exhibits low porosity and is considered to have limited reserve potential. The B zone consists of 200 to 250 meters of tight mudstones and pelletal wackestones interbedded with porous algal and fusillinid packstones and grainstones. The impermeable lithologies form effective seals for three major reservoir intervals called B upper B middle and B lower. No free water level was observed in the porous B zones suggesting oil columns in excess of 70 meters. However significant water tests from apparent pay zones indicate that much of the oil saturation is residual. The B zone overlies the Basal Clastics formation which consists of 25 to 35 meters of shale underlain by 25 to 40 meters of porous and permeable sandstone. Hydrocarbon columns appear to be in the range of 10 to 20 meters with a well defined oil freewater contact. The top of the Bzone is an unconformable surface overlain by 5 to 10 meters of thin shales and argillaceous limestones called the Tight zone. The Tight zone grades upwards into the A zone. It consists of 40 to 50 meters of lowporosity pelletal wackestones which are in turn overlain by alternating shales and tight limestones of the upper Bassein formation. The A zone is considered to be a marginal gas reservoir

and was not quantified in this evaluation. Mappable seismic reflectors occur at the top A zone H3A top B zone H3B and top Basal Clastics H4 FIGURE VIIA2. 3. STRUCTURE FIGURE VIIB3 is an ONGC structure map on top of the B zone in the B57 and B19 area. The map is based on 2D seismic data and exhibits a series of interpreted NESW faults that separate and trap B upper oil pools with columns up to 85 meters in thickness. A generally SWNE diagrammatic cross section through the mapped area depicts the interpretation FIGURE VIIB4. It demonstrates the sealing nature of the faults and thick multiple hydrocarbons. The seismic section BS423 located in FIGURE VIIB5 reveals the structural aspects of the same area shown in FIGURE VIIB3 following a WNWSE transect oriented normal to the cited fault trend FIGURE VIIB6 and subparallel to the cross section of FIGURE VIIB4. At the approximate top of the Bassein H3 shown in blue the section clearly shows a moderate relief structure on the east side that corresponds to the position of the B571 and B5712 exploration wells and MA development platform. Another low relief structure can be seen on the western side which occurs in the B126 area. The one critical aspect of the previous interpretation that is not supported by this hard data is any evidence of faulting in the Bassein interval. FIGURE VIIB8 is a depth structure map on top B zone in the B57 area. It was interpreted from a recent vintage 3D seismic survey by ONGC. It basically covers the same area as the previous 2D interpretation FIGURE VIIB3 and is mapped at the same structural level. Areas of structural closure have been colored orange. The two interpretations are radically different. The 3D map shows no faults in support of the hard seismic data FIGURE VIIB7 and depicts relatively small closures on a SW plunging structural nose. The most significant structure with approximately 30 meters of relief is the MA platform structure which also agrees with the cited hard seismic data. From review of the data package and communications with ONGC representatives in the negotiating sessions it is the understanding of EECRIL that reserves quoted by ONGC for the Mukta field do not reflect the recent 3D interpretation and are based on the cited 2D interpretation designed to account for the apparent large oil columns. Based on the compelling evidence of the 3D interpretation it is the position of EECRIL that the MA structure is the only quantifiable feature available for a base case analysis at

this time. The subsequent volumetric evaluation of the MA structure utilizes the ONGC 3D B zone structure map and detailed log analysis to derive base case reserves. The upside case assumes two appraisal tests of features that are exactly 50 of the size of the MA structure with one success and one dry.

4. RESERVOIR CHARACTERIZATION Core studies indicate that the B zone reservoirs have roughly half of the porosity and a fraction of the matrix permeability observed in the neighboring Panna block. The Mukta area appears to have been the site of a lower energy environment of deposition in comparison to Panna. The sequence exhibits alternating low energy finer grained carbonate and moderate energy pelletal to fusulinid wackestones packstones and grainstones. Core descriptions indicate that like Panna the A and B zones have been subjected to sealevel lowering and emergence which brought about diagenetic dissolution and general enhancement of porosity and permeability. This secondary macroporosity and permeability seem to be critical to the excellent fluid flow rates exhibited in both the exploration and development wells in the block. The occurrence of multiple tight and porous zones in the B interval suggests cyclic emergence of a restricted shallow marine platform environment. The stratigraphic thinning of the Bassein formation at Mukta relative to Panna 225 versus 325 meters indicates that the Mukta area was possibly in a higher paleostructural position during Bassein deposition. It is located on the landward side of the Bombay High structural block which is devoid of Bassein age sediments. These observations suggest that the currently westplunging Heera Bassein nose may have undergone structural rotation from a previously eastplunging position with stratigraphic thinning and pinchout of Bassein reservoirs on to the Bombay High block. This paleostructural and stratigraphic setting provides the mechanism for the trapping of a large volume of hydrocarbons in the Mukta area prior to structural rotation in to its current setting. FIGURES VII B7 through 11 show production test results by zone overlain on the appropriate 3D structure map for the B57 area. A similar set of production overlays are shown in FIGURES VII B12 to 15 on the 2D ONGC structure maps of the B126 area. There are 3 water free gas tests of the A zone in the block which are localized on defined structural closures in the northeast B57 area in wells B571 2 and 7 FIGURES VII B7 and 12. Poor or wet A

zone tests were recorded in the remainder of the area. The B upper and B middle zones are the two most prolific intervals in the block with 8 water free oil tests each. The B upper tested rates up to 1900 BOPD and the B middle reported a maximum rate of 2083 BOPD from the BS571. The better tests occur on defined structural closures in the B57 and B126 areas with the exception of well B5710 which tested water free rates of 408 and 1455 BOPD respectively from the B upper and middle zones. The well is located on a small WSWplunging nose with no apparent closure implying a stratigraphic component to the trapping mechanism. However it bears noting that other wells located on the regional SWplunging nose that runs diagonally through the B57 map area are wet or have tested high water cuts including B575 6 17 and 18 FIGURES VIIB8 9 13 14. The most structurally controlled interval in the Mukta block is the B lower zone. It has three significant water free oil tests in the block. Both the B571 and 12 wells in the MA structure tested high rates of up to 2314 BOPD FIGURE VIIB10. Also the structurally highest mapped well in the B126 area B1261 reported an excellent rate of 2286 BOPD FIGURE VIIB15. It is the understanding of EECRIL that the MA platform was positioned and the subsequent 8 development wells were drilled on the basis of the cited 2D interpretation in the B57 area FIGURE VIIB3. An important point to make is that the 3D map matches extremely well with the results of the completions in the B lower zone. Wells MA1 5 6 and 7 are clearly at the edge of closure and tested water or had high water cut except MA 7 which was not tested and has not been completed. Another well MA2 that was completed as a producer has quit flowing due to water encroachment leaving only three currently producing wells. These results indicate that the 3D maps are reliable and that the B lower zone reservoir may have at least a partial water drive mechanism. The pressure drawdown observed in the development wells has been interpreted by ONGC as evidence for a depletion drive mechanism. It is the position of EECRIL that accurate bottom hole pressure monitoring and remediation of cementmechanical problems is required before accurate determination of drive mechanism and reservoir modeling can be done. This would provide the basis for any future pressure maintenance or waterflood operations. The Basal Clastics sandstone reservoirs have yielded significant tests in 3 wells in the

B57 area B576 1218 and B126 area B126245 respectively with rates up to 1540 BOPD FIGURE B16. A certain degree of stratigraphic trapping seems to be occurring in nonclosed areas FIGURES VII B1115. This indicates reserves may be difficult to quantify and conversely that all future exploration and development wells should evaluate this interesting interval. All development wells proposed in the Mukta base development plan are scheduled to be Basal Clastics tests. Detailed petrophysical analysis was done on straighthole exploration wells with complete modern log suites. TABLE VII B1 lists the petrophysical input parameters utilised for the density porosity and WaxmanSmit water saturation calculations of the B zone reservoirs and Archie water saturation calculations for Basal clastics. FIGURE VII B17 is a cross plot of BQV versus Porosity with an interpreted trend line that provides an algorithm tying clay conductance effects into the log analysis through the WaxmanSmit water saturation model. Petrophysical analysis of the B zone indicates that there is a distinct zonation of the hydrocarbon interval as depicted on the type log in FIGURE VII B18. These zones include the following ZONE BASE WATER SATURATION RANGE Free Oil 15 to 30 Moveable Oil 31 to 59 Residual Oil 60 to 100 FIGURE VII B19 is a capillary pressure curve from a typical Mukta B zone reservoir. It demonstrates that for water saturations of 20 or less oil columns of more than 100 meters are required to displace the water from the low permeability matrix. It is clear from the 3D mapping that the largest closures at Mukta have around 30 meters of relief as seen at the location of the type log of well B5712. Clearly none of the free oil zones exceed 30 meters of thickness in the type log example nor do they in other exploration wells examined. This observation combined with the presence of ubiquitous residual oil saturation and lack of free water level in the Bassein reservoirs supports the cited hypothesis of a large accumulation that has been later breached or tilted leaving oil behind in existing smaller structures and stratigraphic traps. The large oil columns of a major accumulation would be required to achieve the free oil saturations seen today and explain the top to bottom residual oil saturation of the Bassein B zones. FIGURE VII B20 is a diagrammatic Resistivity Index versus Water Saturation plot. It provides an explanation of the effects on log analysis of a breached or waterflooded reservoir. The straight line represents the

water drainage cycle of a normal reservoir that has been filled with hydrocarbons over the course of geologic time. In essence oil has displaced water. The arcuate imbibition cycle line represents a breached or flood reservoir where oil has been displaced by water. The saturation exponent N is derived from the slope of the lines. Clearly for a given resistivity the resulting water saturation calculated would be much higher if the reservoir was following the imbibition cycle rather than the water drainage cycle. It is concluded that much of the original thick oil columns mapped by ONGC and disappointing wet tests of apparent pay zones are a product of this breached reservoir phenomena. Restricting pay counts to the free oil zones provides a realistic minimum case and gives the analyst a conservative approximation of oil column height. Inclusion of the moveable pay provides a maximum case.

5. VOLUMETRIC RESERVE CALCULATIONS

Volumetric input parameters listed in TABLE VIIbD depict the maximum minimum and average values of area under closure net pay thickness porosity and water saturation for each hydrocarbon zone for the B upper middle lower and Basal Clastic intervals. Fluid properties of the B zones and Basal Clastics are listed in TABLE VIIb2. Of note is the residual oil ROS saturation value of 40 which is the same used at Panna. The methodology for volumetric calculations of the base case MA structure utilizes the B upper zone structure map to determine the area and resulting rock volume of each cited hydrocarbon zone in the respective B zones and Basal Clastics intervals. Values for pay porosity and hydrocarbon saturation derived from analysis of the B571 and 12 wells and utilized to estimate oil and gas in place. Recoverable reserves were calculated by subtracting ROS from the hydrocarbon saturation of the respective zones and assuming a sweep efficiency for partial water drive of 60. Oil in place was calculated using only the Moveable and Free oil zones. FIGURE VIIb21 shows the recoverable reserve uncertainty for the base case MAMB structure expressed as a log normal distribution on a log probability scale. It indicates the following range

PROBABILITY	RECOVERABLE OIL	RECOVERABLE GAS	MMt	MMM cubic meters
Minimum	90	4.1	0.46	
Most likely	50	5.3	1.85	
Maximum	10	6.7	3.57	

The base case mostlikely reserves represents an average between the maximum case which combines moveable and free oil zone reserves and a minimum

case of free oil zone reserves only. Gas reserves occur as solution gas and show a wide range from a maximum value derived from total oil in place assuming a severe depletion pressure draw down of the reservoir to a minimum based on pressure supported water drive mechanism and straight GOR based volume related to oil produced. Comparison of oil in place for the B zone and recoverable oil indicates a most likely case recovery factor of 17.2. Gas recovery is 51.8 reflecting the partial water drive depletion drive model assumed for the reservoir. Reserves for the base case are listed in TABLE VII Bei. The upside is assumed to be 50 of the Base Case reserves. The Success Case is a combination of the two as follows

	RECOVERABLE OIL	RECOVERABLE GAS
Base	5.37 MMt	1.85 MMM cubic meters
Upside	2.68 MMt	0.93 MMM cubic meters
Success	8.05 MMt	2.78 MMM cubic meters

de MUKTA PARAMETERS AND RESERVES Please refer to TABLES VII B di ei and eii. f PLANS FOR UTILIZATION OF GAS MUKTA

i A study is needed to justify water injection pressure maintenance. No gas reinjection is contemplated. ii After the MA permanent deck is installed at Mukta appropriate testing will be undertaken to determine the timing for gas lift gas installation. Given the water production observed the need for gas lifting at some point is considered likely and provisions for this eventuality have been made in the Base Case work program. iii Apart from the gas requirement for internal use such as power generation and technical flaring the bulk of the gas will be available for sale after dehydration and compression. iv During the producing life of the field efforts will be continuously made to minimise flaring. Flaring of associated gas is presumed without GOI restriction until the gas sales line is commissioned. v After hookup gas not used in operation will be sold via Panna facilities. g MONITORING SYSTEMS RESERVOIR MANAGEMENT 1 MONITORING SYSTEM

Production of all fluids will be monitored on a well by well basis as well as on an aggregate basis as required by standard oil gas field practices. For effective operational control these production rates will be recorded on a daily basis. For fiscal purposes production will be aggregated and reported monthly. An appropriate state of the art well testing system will be installed at each unit. The field will be monitored locally at platforms and remotely from the shore base. EECRIL intend to operate the satellite platforms unmanned to the extent possible and to use computer assisted operations to

monitor ongoing performance. 2 RESERVOIR MANAGEMENT Reservoir Management will be carried out through conventional surface as well as down hole monitoring systems such as bottom hole pressure surveys production testing and well deliverability testing at prescribed intervals. This data will be analysed at regular intervals but at least once a year to study the reservoir performance and to ascertain the reservoir drive mechanism. The operations will be adjusted to maximize economic recovery. It is envisioned that a suitable mathematical model will be used and updated as and when required.

VIII PROPOSED PANNAMUKTA WORK PROGRAMMEa CONCEPTUAL DEVELOPMENT PLAN Data Package material provided by GOI demonstrates a significant potential for increased reserves at PannaMukta in the event of exploration success the Success Case. Described below is a staged development scheme in which Stage I provides a building block towards the expansion needed in the Success Case. The Success Case arises in the event of positive results from exploratory wells included in the EECRIL firm work commitment. The fully developed Success Case is described first so that the integrated buildingblock nature of Stage I is apparent. The firm work programme bid by EECRIL commits to all items needed for Stage I the Base Case; we are dedicated to full Success Case development in the event of exploration success. The risk of such exploration work precludes a firm commitment to additional platforms pipelines and development wells until the additional reserves are conclusively demonstrated.

1 SUCCESS CASE DEVELOPMENT 29.5 MMt or 224 MMBO remaining recoverable oil reserves EECRIL are proposing four exploratory wells as part of the firm work programme. We believe because of exploratory wells previously drilled in the Panna G and H areas that both of these areas are likely to contain commercially viable accumulations. In addition several Mukta area wells have shown encouraging results. As a result we assume that one of the two exploratory tests proposed at Mukta will also yield a commercially viable develop the PannaMukta fields will require See FIGURE VIII1 8 Well platforms at Panna 3 Well platforms at Mukta 1 Common 45000 BOPD processing facility INCLUDING LIVING QUARTERS 1 Interfield MuktaPanna well fluid pipeline and gas lift line POSSIBLY ALSO A WATER FLOOD LINE 84 Development wells 1 Export gas line EECRIL are

capable of developing a highly accelerated production schedule but to do so require the full support and cooperation of GOI.

2. BASE CASE DEVELOPMENT 155 MMBO or 20.4 MMT or remaining recoverable oil reserves This case corresponds to RILEECs committed work programme and is not a reflection of our expectations which are reflected in the Success Case. The extensive drilling campaign conducted by ONGC has demonstrated the viability of developing a large area on Panna and supports the installation of one additional platform at Mukta. The development plan and schedule are illustrated in FIGURES VIII2 VIII3 and includes 6 Well platforms at Panna 2 Well platforms at Mukta 1 Common 45000 BOPD processing facility and living quarters. 1 Interfield MuktaPanna well fluid pipeline and gas lifeline POSSIBLY ALSO A WATERFLOOD LINE 67 Development wells 4 Exploratory wells 1 Export gas line The Base Case assumes that a sour gas export line will be laid from PPA to an interconnect on the proposed ONGC 42inch sour gas line and that the 42inch line will be available no later than April 1 1995.

3 ACCELERATED DEVELOPMENT

A limited unique window of opportunity could exist wherein EECRIL may acquire an existing operating 40000 BOPD Floating Production System FPS capable of a significant acceleration of the availability of processing at a major cost saving to GOIEECRIL. This approach would have positive early cash flow implications to all concerned and obviously enhances the value of the project to a major degree See FIGURE VIII4. Uncertainty about securing the facility preclude bidding the project based on acquiring the unit. However EECRIL commit to a Best Efforts Reasonable Endeavours attempt to acquire the unit if GOI will commit by July 26 1993 to awarding the requested blocks to EECRIL.

b PANNAMUKTA WORK DEVELOPMENT Since PannaMukta development has started a baseline must be established so that the transition from ONGC to EECRIL is clearly defined. Accordingly following are sections defining status of the development specifying ONGC activities which we presume will be completed and then future work which EECRIL commit to undertake.

1. STATUS AS OF JULY 1 1993 The following facilities have been installed and placed into service by ONGC

1 Well platform PA 8 Wells PA1 PA2 PA3 PA4 PA5 PA6 PA7 PA8 Early Production System EPS Jackup Tanker Loading via SBM PB PD PE Jackets only installed; well fluid line connecting

each to EPS. 23 Development wells drilled in PB PD PE. MA Jacket only installed. 8 Development wells drilled in MA 14 well fluid pipeline connects MA to Panna EPS. We understand that The Panna EPS is currently processing approximately 13000 BOPD derived from the PA PB PD PE and MA platforms against a design capacity of 10000 BOPD. Production rates and bottomhole pressures for individual wells on the PB PD PE and MA platforms cannot currently be measured due to the temporary decks. Efforts are being made to balance reservoir withdrawals areally and to minimise gas production all of which is being flared.

2. WORK PLANNED AND COMMITTED BY ONGC We understand that ONGC has work in progress on certain projects related to ongoing PannaMukta development. In formulating the bid EECRIL have assumed that ONGC will design fabricate and install permanent decks and facilities for the PB PD PE and MA jackets at its own cost. The bid assumes that the decks and facilities will be installed and commissioned according to the following schedule PB fourth quarter 1993; PD first quarter 1994; PE second quarter 1994 MA first quarter 1994. Early installation of these deck packages is considered imperative to monitor and optimise reservoir performance. EECRIL would be willing to negotiate the following alternatives to the above EECRIL assumption of responsibility for fabrication of one or more of the deck packages currently under construction EECRIL would prefer to manage the deck installation EECRIL would be willing to locate purchase and refurbish used deck packages or fabricate new deck packages to substitute for those under fabrication by ONGC if this does not result in any delay in project timing. We understand that ONGC has committed to drilling two horizontal wells from PD and two horizontal wells plus two horizontal completions from PE in the second half of 1993. The bid assumes that EECRIL will have the option but not the obligation to accept assignment of any or all drilling rig service and supply contracts and will perform the work at GOIEECRIL expense subject to cost recovery.

WORK TO ACHIEVE BASE CASE DEVELOPMENT EECRIL are committed to proceeding with the Base Case development. EECRIL plan to pursue a very aggressive development schedule FIGURE VIII3 which can only be achieved with the active assistance of ONGC and GOI authorities.

3. WORK PLAN OFFERED AND COMMITTED BY EECRIL PANNA

Drill two horizontal wells from PD Drill two horizontal wells from PE Complete two horizontal wells from PE Fabricate and install PC and PF jackets Fabricate or refurbish and install PC and PF deck packages Drill nine horizontal wells from PC Drill nine horizontal wells from PF Fabricate and install PPA and PQ Lay necessary well fluid gaslift and free gas lines Lay sour gas export line from PPA to proposed ONGC 42inch pipeline Drill two exploratory wells Geophysical geological and engineering studies. MUKTA Fabricate and install MB jacket Fabricate or refurbish and install MB deck package Drill six directional wells from MB Lay MBMA wellfluid line Lay PPAMAMB gaslift line Drill two exploratory wells Geophysical geological and engineering studies Please note that a second EPS is included in the Base Case development plan. However a firm commitment has not been made since the economics are marginal if new construction is required and highly sensitive to project timing and EPS cost.

DEVELOPMENT WORK COMMITMENT EECRIL will immediately begin the design and fabrication of a jacket and deck for location PC. If available a used deck will be acquired and refurbished; otherwise a new deck will be fabricated EECRIL plan to install used decks wherever possible to minimise costs. A new nineslot jacket will be fabricated for PC. At the time of jacket installation nine conductors will be driven. As soon as the PC jacket is installed and drilling on PD and PE is completed the rig will be moved to PC and nine horizontal wells will be drilled. EECRIL plan to employ a single rig to drill all Panna horizontal wells to take advantage of the associated learning curve to minimise drilling time and cost. After drilling is completed the rig will be moved to PF and the deck will be installed on PC. Production will commence from PC as soon as a well fluid line is installed. Drilling prior to deck installation on PC will allow production to be significantly accelerated due to the lead time required to prepare the deck package. Nine horizontal wells will also be drilled from PF. However in this case the deck package will be available and installed prior to drilling. This approach has the advantages of allowing producewhiledrilling operations to accelerate production and raising the wellheads further above the splash zone. Work will commence immediately on the design and fabrication of a new jacket for MB. Six directional wells will be drilled from MB and should be completed at the time the MB deck package becomes available

premonsoon 1995. Production will ensue after the installation of the deck package and a wellfluid line from MB to MA is installed. Work will commence immediately on the design and fabrication of a new 45000 BOPD production processing jacket and deck PPA as described below

FUNCTIONALDESIGN BASIS Production and Test Manifolds Production and Test Separation Gas Compression Gas Dehydration Chemical Injection Corrosion Inhibition Produced Water Treatment Disposal Power Generation Safety systems Fire Protection Utilities STRUCTURAL BASIS 8Pile 86x160 Deck Structural Redundancy Earthquake Zone IV Design PPA is expected to be available for installation premonsoon 1995. Work will also commence immediately on design and fabrication of a separate 100man quarters platform PQ. Although not currently in the Base Case development plan studies will be conducted to ascertain the merit of combining PPA and PQ. In addition the desirability of a manifolding platform PLM possibly combined with PQ will be investigated. A manifolding platform may be justified given the large number of lines associated with the producing platforms riser loads on PA and the future connections and disconnections associated with the Sagar Laxmi EPSI the second early production system EPSII and the PPA. Work will begin immediately to secure a jackup suitable for conversion preferably already converted for service as a second early production system EPSII of 10000 BOPD capacity. If such a unit can be secured at a cost and within a time frame that project economics are enhanced it will be implemented. Installation of EPSII would occur postmonsoon 1994 and would allow PannaMukta production processing capacity to be expanded to 20000 BOPD at the beginning of 1995. EPSII will allow considerable acceleration of oil production prior to the commissioning of PPA. In addition the Sagar Laxmi and EPSII can be retained temporarily after the installation of PPA to process as much as 65000 BOPD in the event production exceeds expectations or the Success Case is achieved. Although EECRIL have included the installation of EPSII in discussion additional economic analysis will be conducted to confirm that the acceleration of oil production justifies the additional expense. The need for future gas lift and free gas lines is anticipated. The lines will be installed when required by field performance and when convenient in terms of lay barge utilisation. A long gas lift line from PPA to

MA and MB will almost certainly be required whereas a free gas line should be unnecessary. Preliminary EECRIL studies indicate that a significant possibility of communication between the Panna Azone and Bzone exists. As a result EECRIL intend to defer production from the Azone gascap to maximise oil recovery. However although every effort will be made to minimise gas production elevated gasoil ratios are inevitable given the thin oil column and free gas lines may become necessary prior to gascap blowdown. The Base Case assumes that a gas export line may be laid from PPA to a connection with the proposed 42inch ONGC gas pipeline to Hazira. It is assumed that line installation would occur premonsoon 1995 with resulting gas sales in July 1995 that 100 of PannaMukta gas will be taken and that oil production will not be restricted by gas flaring considerations. As an alternative not considered in the Base Case EECRIL is studying the possibility of constructing a sour gas pipeline to the Bombay area and constructing onshore sweetening plant. EECRIL assume that suitable shore base facilities including dock space yard space warehousing communications will be made available for lease to support PannaMukta operations.

EXPLORATION WORK COMMITMENT Two exploratory wells will be drilled at Panna and two at Mukta. These wells will be drilled as soon as possible by either of the two rigs after firm locations are established and when the development drilling schedule allows. The wells must be drilled early enough to allow timely jacket and deck commitments to be made in the event of success to ensure minimum delay in the development program. Details of the program are as follows

PANNA SEISMIC Reprocess and interpret all usable data in concession

Commitment 850 km DRILLING Drill and evaluate 2300 meter delineation tests. Penetrate base of Basal Clastics Paleocene/Early Eocene below B Zone middle Eocene limestone. Maintain options to test complete and suspend at mudline if results warrant.

Commitment 2 wells

POTENTIAL RESERVES Based upon the assumption that both of the above mentioned delineation tests are successful in place and recoverable reserves are provided in TABLE VIIAe. For this purpose we have assumed that the tests will be on Panna structures PG and PH

FIGURE VIIA3. However after reprocessing and interpreting seismic

SEE ABOVE WORK COMMITMENT the best two structures will be selected and drilled. **MUKTA**

SEISMIC Reprocess and interpret the 198889 3D survey 150 sq.km 4100 line km and all usable data from 1991 SBS 2D survey 750 km. Commitment Processing and interpretation as noted above.

DRILLING Drill and evaluate two 2300 meter delineation tests. Penetrate to base of Basal Clastics PaleoceneEarly Eocene below B Zone middle Eocene limestone. Maintain options to test complete and suspend at mudline if results warrant. Commitment 2 wells POTENTIAL RESERVES Based upon the assumption that one of the above mentioned delineation tests is successful inplace and recoverable reserves are expected to increase by 50 those provided in TABLE VIIBei. After reprocessing and interpreting seismic SEE ABOVE WORK COMMITMENT the best two prospects will be selected and drilled.f OTHER COMMITMENTS EECRIL have committed to a Base Case development plan based upon data packages prepared by GOI. Upon contract signature it is assumed that all relevant information will be provided to EECRIL and that key ONGC personnel will be made available to allow optimization of the development plan. Based upon this information EECRIL will perform the following technical work the results of which will be shared with GOI.

PANNA The Panna field oil accumulation is relatively thin and lies between an active aquifer and a gascap. Optimum oil recovery will be achieved by minimising gascap gas production thereby minimising movement of the oil bank into the gascap which results in unrecoverable residual oil saturations in the gascap and maintaining reservoir energy. EECRIL believe that the added expense of drilling horizontal wells will be more than made up by the increase in productivity index such completions will achieve. EECRIL intend to conduct single well simulations to determine the optimum completion interval placement with respect to the fluid contacts optimum production rate and optimum horizontal completion length. The results of detailed geological modeling PVT analysis petrophysical analysis and well performance studies will be used to prepare a 3D fullfield reservoir simulation model for the Panna field. The model will be used to optimise areal well placement and platform locations. Analysis of fluid contact movements and areal balancing of withdrawals will be conducted. The model will be used to forecast fluid production rates and pressure changes and will be used to determine the optimum time for gas cap blowdown. History matching will be complicated

by the lack of individual well data concerning PB PD and PE and by the lack of current gas production measurements. Drilling and completion studies will be conducted to minimise costs and formation damage. EECRIL are experienced in the drilling of horizontal wells and hope to meet or exceed ONGC performance. In particular we believe that great improvements in current cementing and formation damage control practices can be made. MUKTA The drive mechanism controlling the lower B Zone reservoir performance cannot be conclusively determined at present since the temporary deck at MA precludes individual well testing and bottomhole pressure measurements. One of the MA wells has ceased to produce probably due to water production and significant water production is occurring from one or more of the remaining wells. In addition flowing wellhead pressures are declining. Based upon this evidence as well as geological considerations we currently assume that the reservoir is producing with a partial water drive. Early installation of the permanent MA deck is considered vital to allow well testing and bottomhole pressure measurement to identify the drive mechanism. Once appropriate data has been collected reservoir engineering studies will be conducted probably 3D reservoir simulation to optimise the development plan. Due to the observed water production gaslifting will almost certainly be required and is therefore included in the Base Case commitment. Waterflood facilities and pipelines are not included in the Base Case commitment since the necessity of water injection has not been established however PPA will include deck space and utilities to allow for subsequent addition of injection facilities if justified. The requirements for water injection facilities will be identified shortly after testing the MA wells and measuring bottomhole pressures. The risk of premature water breakthrough and poor sweep efficiency in the naturally fractured reservoir must also be assessed. Pressure transient analysis will probably be used to confirm well interference and analyze dual porosity behavior. If these preliminary studies indicate that waterflooding might be beneficial a pilot waterflood using one of the EPS units at MA could be conducted. If the above studies indicate that waterflooding is economically viable EECRIL will proceed to install the necessary infrastructure. The MA wells penetrate four reservoirs which appear to be effectively sealed from each other. EECRIL therefore

intend to drill directional wells from MB to penetrate multiple pays. Engineering studies will be conducted to optimise the completion design and depletion plan single completions single completions with sliding sleeve or tubing selectives or dual completions. As the reservoir mechanism becomes better understood horizontal drilling applications may become evident.g PANNAMUKTA FACILITIES Systems analysis nodal analysis will be conducted to optimise surface and subsurface equipment design and operation. PROVISIONS 000095 i vnPRESIDENCY OF THE REPUBLICtARTICLE 2. PURPOSE OF THE AGREEMENTThis agreement hereby lays down the rights and obligations of the Parties as stipulated in LawtoNo. 2016017 of 14 December 2016 instituting the Mining Code and guaranteesSINOSTEEL CAM S.A. the stable legal economic fiscal customs and exchange conditionsexplicitly listed within the framework of the LOBE iron ore industrial mining.ARTICLE 2. SCOPE OF THE AGREEMENT1 The rights laid down by this agreement shall only be binding to the Parties herein and theirrespective permitted assignees.2 Shareholders affiliates cocontractors subcontractors consignors and creditors as well asother third party beneficiaries shall benefit in accordance with the terms and conditions of thisagreement from the rights and guarantees granted to them respectively within the frameworkof their activities on the extraction and processing of ores plus the production of iron oreconcentrates in Cameroon.3 Establishment siteThe LOBE industrial mining project is located about 200km SouthEast of the city of DoualaCameroons economic capital and 40km from the seaside city of Kribi from a birds eye view.More specifically it is found in the Kribi and Campo SubDivisions of the Ocean Divisionin the South Region of Cameroon. It covers a total surface area of 138.5 km. The geographicand cadastral coordinates of the permit are annexed in this agreement.4 Detailed of the projecta The Project purpose of this agreement is a largescale mining project of the LOBE ironore found within the mining area. SINOSTEEL CAM S.A. plans to extract 10000000 tonnesof ore per year with 33 of iron and then enrich it to produce 4 four million tonnes of higcontent iron ore concentrates over 60.43A4bThe project purpose of this Agreement comprisesThe development of a mine towards the production of 4 four million tonnes of ironore concentrates per year as initial capacity;the creation of an iron ore enrichment unit;the establishment of a pipeline to transport the enriched iron ore;the setting up of a power generation unit for the project;the continuation of exploration activities within the perimeter of the mining permit;the development of a mining terminal and its related infrastructure for the marketingof products on the international market.ARTICLE 3. DEFINITIONS1 The definitions enshrined in Law No. 2016101 7 of 14December2016 instituting the MiningCode shall apply to the terms used under this agreement.

The terms used under this agreement may however not for any reason override the provisions of the above law.² Under this agreement the following terms not defined by the above law or aimed at supplementing and/or clarifying it shall have the following definitions: Project agreements refers collectively to this agreement, special agreements, the mining permit and individually to one of these documents and any other agreement, certificate or document signed, issued or established in line with the Project. Cocontractors refer to an entity other than the Creditors which within the framework of a contract signed with SINOSTEEL CAM S.A. provides its goods and/or services for the needs of the Project. Force Majeure refers for either of the Parties to any external unpredictable overwhelming and unavoidable event or circumstance for the Party invoking it against its will and beyond its reasonable control which prevents the Party invoking it to fulfil its legal and/or regulatory obligations as well as any other obligation under this agreement and any project agreement to which it is a party. Bank guarantee refers to a collateral which is acceptable and regular for the State at its sole discretion issued by an independent bank located on the territory of the State or not for the amounts mentioned in this agreement. State holding refers to State shares in the share capital of SINOSTEEL CAM S.A. under this agreement as provided by Section 59 of Law No. 2016017 of 14 December 2016 instituting the Mining Code. PRESIDENCE DE LA REPUBLIQUE VISA 0001 AVR 2022 PRESIDENCY Or THE REPUBLIC⁴ Creditor refers to any natural or legal person, national or international financial institution, export credit agency, any credit insurer or any other body which granted SINOSTEEL CAM S.A. a merchant credit, a loan, obligations or any financing or refinancing related to the Project. Product refers to the iron ore extracted within the framework of this agreement. Third Party refers to any person other than a party to the agreement, an entity designated by the State, a subsidiary, a shareholder or any other entity subrogated to the rights of SINOSTEEL CAM S.A.

ARTICLE 4. DURATION OF THE AGREEMENT¹ This agreement shall be valid for a duration equal to that of the mining permit in accordance with Section 56 1 of Law No. 2016017 of 14 December 2016 instituting the Mining Code. It shall have an initial duration of 20 twenty years as from the date of granting of the mining permit.² The renewal of the mining permit shall lead to the

renewal of the mining agreement.

ARTICLE 5. SCOPE OF THE AGREEMENT

1 Economic significance of the project
 The PROJECT seeks to strengthen the existing industrial fabric while strongly boosting Cameroons balance of trade.
 b SINOSTEEL CAM SA plans to create at least 600 direct jobs and more than 1000 indirect jobs.
 c The project seeks to encourage other industries using IRON as raw material to establish themselves in Cameroon.

2 Sociocultural significance of the project
 the project comprises a programme to construct various sociocultural infrastructures .sports centres leisure centres cultural centres etc. which will favour the wellbeing of both the employees and the local communities.

PRESIDENCE DE LA REPUBLIQUE 00001 AVR022 **PRESIDENCY OF THE REPUBLIC** 53

Technological significance
 Staff working with SINOSTEEL CAM S.A. its cocontractors and subcontractors acquire technology and knowhow through the Learning by doing principle.

4 Technical and financial conditions of the project.

a Technical conditions of the project
 To execute the project and its different components power generation unit mining terminal etc. SINOSTEEL CAM S.A. shall sign with support of the state special agreements within a period of 6 six months as from the date of the signing of this mining agreement.

b Financial conditions of the project
 The project will be financed out of SINOSTEEL CAM S.As own funds up to 30 and bank loans up to 70.

ARTICLE 6. OWNERSHIP OF PRODUCTS AND MARKETING CONDITIONS

1 of Section 52 of the Mining Code.

1 The products shall be owned by SINOSTEEL CAM S.A. pursuant to the provisions
 The products shall be marketed in compliance with national and international market rules.

2 However during the period of the project SINOSTEEL CAM S.A commits to avail
 1 at least 15 fifteen per cent of produced iron ore concentrates for the local market at standard international market price with a discount which takes into account free expenses.

3 The availability of 15 fifteen per cent of iron ore concentrates destined for local processing shall comply with the rules of demand and supply. Nonetheless partial absence on the local market the Minister in charge of Mines may authorize SINOSTEEL CAM S.A. after verification to export part or all of the 15 fifteen per cent.

ARTICLE 7. REGIME OF MOVABLE AND IMMOVABLE PROPERTIES NECESSARY FOR THE REALIZATION OF THE PROJECT

1 The movable property needed for the

execution of the project is the exclusive property of SINOSTEEL CAM S.A.² The constructed immovable property needed for the execution of the project is the exclusive property of SINOSTEEL CAM S.A. Yet at the end of mining the State shall have a right of preference on the acquisition of the said assets. Some assets like roads can be handed over to the State.³ The bare land covered by the exploitation permit shall be registered in the name of the State and made available to SINOSTEEL CAM S.A according to the conditions and modalities defined by the mining code.

PRESIDENCE DE LA REPUBLIQUE² 1 AVR 2022 200 PRESIDENCY OF THE REPUBLIC⁶ PART II RIGHTS AND OBLIGATIONS OF PARTIES ARTICLE TRANSPARENCY⁸. RECIPROCAL OBLIGATIONS GOVERNANCE AND¹ The Parties commit to cooperate to achieve the objectives of this agreement. Each party shall have the obligation to respect its commitments responsibilities and obligations under this its annexes as well as its amendments in accordance with the law and mining agreement regulation in force.⁴ The Parties must comply with international commitment taken by the State and applicable to their activities to improve governance in the mining sector especially those related to the Extractive Industries Transparency Initiative EITI.

SECTION 1 RIGHTS AND OBLIGATIONS OF SINOSTEEL CAM S.A. ARTICLE 9. LOCAL 1 Employment and training of national foreign staff a SINOSTEEL CAM S.A. shall be free to hire and fire in accordance with the Mining Code and the labor code. b However where skills are equal SINOSTEEL CAM S.A. shall give preference of employment to Cameroonian staff. Information on the workforce number level of qualification etc. needed to execute project work will be provided by any individual or body mandated by the State. d For the duration of this agreement SINOSTEEL CAM S.A. shall comply with the labour law and regulation as stipulated in the texts in force especially on safety occupational health and social security.

2 Type of jobs or skills required for the project a Job concerns the components of SINOSTEEL CAM S.A.s activities such as construction ore extraction ore enrichment transportation power generation setting up the mining terminal. b Further clarification on the mapping of positions and jobs at SINOSTEEL CAM S.A. are well detailed and annexed to ent.

PRESIDENCE DE LA REPUBLIQUE AV an ESIDENG Y THE REPUBLIC⁷³ Training and Technology transfer a

SINOSTEEL CAM S.A. commits to offer throughout the project or instruct the main co contractors and/or main subcontractors to offer in-service vocational training programmes on health safety risk management and skills needed for the operational phase of the project with the aim of maximizing the Cameroonization of the workforce and overall to protect local jobs.

b SINOSTEEL CAM S.A. commits to provide or instruct the main co contractors and/or in close collaboration with the relevant State services to provide main subcontractors vocational training structures and programmes for its workforce.

c SINOSTEEL CAM S.A. undertakes to agree with the state of the technical requirements serving as indicators of recognition of the quality of qualified professional in order to help the main co contractors to implement the planned training programs.

4 Recruitment plan

SINOSTEEL CAM S.A. undertakes to achieve during the operation phase and to demand this same objective from main co contractors and main subcontractors the minimum quotas of Cameroonian nationals among their employees who are in the Cameroon and are working on the Project as follows:

- for managerial positions at least 50 fifty per cent of nationals;
- for supervisory positions at least 60 sixty per cent of nationals ;
- for unskilled positions at least 90 ninety per cent of nationals.

o Cb Data on jobs created shall be forwarded to the relevant Government services.

5 Training program

SINOSTEEL CAM S.A. shall forward to the Ministry in charge of mines the job descriptions and the job reference in order to anticipate the training and upgrading programs.

6 Participation in the development of local SMEs

a SINOSTEEL CAM S.A. commits to hire in priority for subcontracting under the Project national SMEs with the necessary capacity to provide goods products materials equipment and services.

7 Social development programme for the local communities

a Within the framework of this project SINOSTEEL CAM S.A. commits in close collaboration with local authorities and all other stakeholder

PRESIDENCE DE LA REPUBLIQUE

Visa development in the

AVR0000 PRESIDENCY OF THE REPUBLIC

8 local communities by implementing its community development programme found in the annex.

b The terms for the management and followup of this programme will be subject to a co management protocol signed between the Ministry in charge of Mines any institution mandated to the effect the

representatives of the population and SINOSTEEL CAM S.A. SINOSTEEL CAM S.A. undertakes to construct within the framework of its operations appropriate lodging facilities as well as medical school sports and recreational facilities for its employees.

ARTICLE 10. LAND AND MINING GUARANTEES

1 The State guarantees to SINOSTEEL CAM S.A. the tenure of the land subject of the mining permit in accordance with the provisions of the mining Code.

2 Pursuant to the provisions of the mining Code SINOSTEEL CAM S.A. shall have movable rights over the resources and property rights over the land.

3 The State guarantees SINOSTEEL CAM S.A. its cocontractors and subcontractors that all administrative permits and procedures to facilitate the mining operations shall be granted in compliance with the regulatory deadlines and conditions.

4 SINOSTEEL CAM S.A. shall under strict respect of the regulation in force have the right to use blasting materials and the elements found within the authorized perimeter.

ARTICLE 11. EXPROPRIATION DAMAGES AND COMPENSATION OF LOCAL COMMUNITIES

1 The conditions for expropriation damages and compensation of local communities shall be those stipulated by the Mining Code.

2 Fees allowances and overall all charges resulting from the execution of procedures to liberate and assign tenure of land shall be borne by SINOSTEEL CAM S.A.

3 The communities concerned by 1 above are those identified by Sections 116 and 118 of Law No. 2016017 of 14 December 2016 instituting the Mining Code.

AND TOBAGO ENERGY SECTOR F1 GEOLOGICAL STUDIES...
... ..G1 ANNEX G 8 PRODUCTION SHARING CONTRACT BLOCK PRODUCTION
SHARING CONTRACT This Contract is made this day of 2014 among THE PRESIDENT OF THE
REPUBLIC OF TRINIDAD AND TOBAGO His Excellency Anthony Thomas Aquinas Carmona
Intendant of State Lands hereinafter referred to as the President of the FIRST PART The MINISTER
OF ENERGY AND ENERGY AFFAIRS Senator the Honourable Kevin Ramnarine hereinafter
referred to as the Minister of the SECOND PART and with limited liability organised and registered
in the United Kingdom and registered as an External Company under the Companies Act Chap.
8101 of the Laws of the Republic of Trinidad and Tobago with its principal office in Trinidad and
Tobago situate at in the City of Port of Spain in the Island of Trinidad hereinafter referred to as
Contractor of the THIRD PART. WHEREAS Section 3 of the Petroleum Act Chapter 6201 of the
Laws of the Republic of Trinidad and Tobago hereinafter referred to as the Act provides that Public
Petroleum Rights as defined in the Act are vested in the State and are exercisable by the President
on behalf of the State. AND WHEREAS pursuant to Section 63 of the Act the Minister is authorized
to enter into Production Sharing Contracts for the carrying out of Petroleum Operations upon such
terms and conditions as the Cabinet may approve. AND WHEREAS the Commissioner of State
Lands has the 9 PRODUCTION SHARING CONTRACT BLOCK requisite authority to sign this
Contract on behalf of the President of the Republic of Trinidad and Tobago pursuant to Section 42
of the State Lands Act Chapter 5701 of the Laws of the Republic of Trinidad and Tobago. AND
WHEREAS the Minister acting as the agent of the Government is responsible for the collection of
revenues accruing under this Contract. AND WHEREAS the Minister under Regulation 4 of the
Petroleum Regulations made under the Act issued on the 14th day of August 2013 the Petroleum
Regulations Deep Water Competitive Bidding Order 2013 published as Legal Notice No.164 of 2013
by which bids were invited for certain submarine areas described in the First Schedule therein. AND

WHEREAS Contractor submitted a bid on the day of 2013 in accordance with and pursuant to the said Order. AND WHEREAS Contractor has represented to the Minister that it has the requisite technical and financial capabilities to carry out Petroleum Operations and wishes to assist the Government in thoroughly evaluating the Petroleum potential and promptly and efficiently developing Petroleum discovered in the Contract Area. AND WHEREAS on the day of 2014 Cabinet approved this Contract. NOW therefore in consideration of the premises mutual covenants and conditions herein contained it is hereby agreed as follows

10 PRODUCTION SHARING CONTRACT BLOCK ARTICLE 1 DEFINITIONS The following words and terms used in this Contract shall unless otherwise expressly specified in the Contract have the following respective meanings

1.1 Procedure set out in Annex C hereto. Accounting Procedure means the Accounting

1.2 the Laws of the Republic of Trinidad and Tobago. Act means The Petroleum Act Chapter 6201 of 1.3 within the meaning of this Article

1.3. Affiliate means an affiliated body corporate

1 For the purposes of this Contract a one body corporate is affiliated with another body corporate if one of them is the subsidiary of the other or both are subsidiaries of the same body corporate or each of them is controlled by the same person; and if two bodies corporate are affiliated with the same body corporate at the same time they are affiliated with each other.

11 PRODUCTION SHARING CONTRACT BLOCK 2 For the purposes of this Contract

aa body corporate is the holding body corporate of another if that other body corporate is its subsidiary; and

ba body corporate is a subsidiary of another body corporate if it is controlled by that other body corporate.

3 For the purpose of this definition control in relation to a body corporate means the power of a person to ensure by the holding of shares or the possession of voting power in relation to that body corporate; or by any other power conferred by the articles of incorporation or other document regulating the body corporate that the business and affairs of the body corporate are conducted in accordance with the wishes of that person. Appraisal or Appraisal Programme means all

1.4 works carried out by Contractor following a Discovery of Petroleum in the Contract Area for the purpose of delineating one or more Petroleum reservoirs to which that Discovery relates in terms of thickness and lateral

extent and in order to further define the quantity of recoverable Petroleum therein. 1.5 Appraisal Area means that area surrounding a Discovery encompassing the geological structure or 12 PRODUCTION SHARING CONTRACT BLOCK feature of the Discovery and a reasonable margin not exceeding 0.5km as approved by the Minister from time to time. 1.6 Arms Length means the relationship that exists between two or more entities where neither of such entities exerts or is in a position to exert significant influence on any of the other entities having regard to all relevant factors. Assessment Plan means a plan submitted pursuant 1.7 to Article 13.3 for the purpose of evaluating a Natural Gas Discovery in sufficient detail to be able to seek a market or markets for the Natural Gas. 1.8 Associated Natural Gas means all Natural Gas produced from any reservoir the predominant production of which is Crude Oil and which is separated from Crude Oil in accordance with normal oilfield practice including free gas cap but shall exclude any liquid hydrocarbon extracted from such gas either by normal field separation dehydration or in a gas plant. Available Crude Oil means all Crude Oil 1.9 produced and saved from the Contract Area and not used in Petroleum Operations. Available Natural Gas means all Natural Gas 1.10 produced and saved from the Contract Area and not used in Petroleum Operations. 1.11 Oil and Available Natural Gas. Available Petroleum means all Available Crude Barrel means a unit of volume equal to forty1.12 two 42 United States gallons liquid measure corrected to a temperature of sixty 60 degrees Fahrenheit and 13 PRODUCTION SHARING CONTRACT BLOCK fourteen point seven 14.7 p.s.i.a. 1.13 Calendar Quarter means a period of three 3 consecutive Months beginning on the first day of January April July or October. 1.14 Calendar Year means a period of twelve 12 consecutive Months beginning on the first day of January and ending on the following thirtyfirst day of December in the same year. 1.15 Commercial Discovery means a Discovery that Contractor proposes to develop and produce under the terms of this Contract. 1.16 Commercial Production means regular and continuous production of Petroleum from a Production Area pursuant to an annual Development and Production Work Programme approved under Article 15. Condensate means the portion of Natural Gas of 1.17 such composition that is in the gaseous phase at temperature and pressure of the

reservoirs but that when produced is in the liquid phase at surface pressure and temperature. It is liquid at the standard conditions of temperature and pressure 60 degrees Fahrenheit and 14.7 p.s.i.a. at the point of measurement of its volume. 1.18 Contract or Production Sharing Contract means this Contract and any subsequent written amendments. 1.19. Contract Area means the area specified in Article 3 hereof and delineated on the map set out in Annex A as modified and reconfigured from time to time in accordance with the stipulations of this Contract. 1.20 Contractor means . and 14 PRODUCTION SHARING CONTRACT BLOCK includes its respective successors and permitted assignees. Contract Year means a period of twelve 12 1.21 consecutive months within the term of this Contract beginning on the Effective Date or any anniversary thereof. 1.22 Contractor Natural Gas is the share of the Natural Gas Production from the Contract Area that is represented by Contractor Cost Recovery Natural Gas and Contractors share of Profit Natural Gas. Contractor Party means an entity that is a 1.23. signatory to this Contract or an entity to which a working interest is assigned pursuant to this Contract. Coordination Committee means the committee 1.24. composed of representatives of the Minister and Contractor constituted in accordance with Article 9. 1.25 Cost Recovery means the recovery of costs and expenses in accordance with Article 18.7. 1.26 Crude Oil means any hydrocarbon produced from the Contract Area which at standard conditions of temperature and pressure 60 degrees Fahrenheit and 14.7 p.s.i.a. is in a liquid state at the wellhead or separator or distillate and Condensate which is extracted from gas or casinghead gas in a plant. 1.27 Development or Development Operations or Development Work shall include but not be limited to i all the operations and activities under the Contract with respect to the drilling of wells other than Exploration Wells and 15 PRODUCTION SHARING CONTRACT BLOCK the with together Appraisal wells the deepening plugging back completing and equipping of such wells design construction and installation of such equipment lines installations production units and all other systems relating to such wells as may be necessary in conformity with sound oilfield prevailing environmental practices in the international Petroleum industry; pipelines generally and or ii all operations and activities relative to the servicing and

maintenance of pipelines lines installations production units and all related activities for Production and management of wells. 1.28 Development Plan means the plan for the development of a Commercial Discovery as provided in Article 13.7ai and 13.8. 1.29 Discovery means any Petroleum not previously known to have existed which is recovered at the surface in a flow measurable by conventional Petroleum industry testing methods. 1.30 Contract has been signed by all Parties. Effective Date means the date on which this Energy Equivalent Basis means the equivalent of 1.31 Natural Gas in Barrels of Crude Oil with six thousand 6000 standard cubic feet of Natural Gas being equivalent to one 1 Barrel of Crude Oil. 1.32 Exploration or Exploration Operations means operations which shall include but not be limited to such 16 PRODUCTION SHARING CONTRACT BLOCK geological geophysical and other surveys and any interpretation of data relating thereto and the drilling of such shot holes core holes stratigraphic tests Exploration Wells for the Discovery of Petroleum Appraisal of Discoveries and other related operations. 1.33 Exploration Period means the period not exceeding nine 9 Contract Years from the Effective Date divided into up to three 3 phases as provided for in Article 4.1. 1.34 Exploration Well means any well drilled with the objective of confirming a geologic trap in which Petroleum has not been previously discovered. 1.35 export oriented markets including but not limited to Export Market means Natural Gas export and a exports of LNG and CNG; b energy use in LNG liquefaction and terminal facilities; c exports through a gas pipeline; d use for any GTL project. Fair Market Value means the price at which 1.36 Crude Oil or Natural Gas could be sold or machinery materials or services of similar quality could be supplied on similar terms at similar times and at a similar location by parties under no compulsion to buy or sell and are trading on an Arms Length basis. 1.37 Field means an area within the Contract Area consisting of a Petroleum reservoir or multiple Petroleum reservoirs all grouped on or related to the same 17 PRODUCTION SHARING CONTRACT BLOCK individual geological structural feature or stratigraphic conditions from which Petroleum may be produced commercially. 1.38 Force Majeure shall mean any event beyond the reasonable control of Contractor and includes war insurrection civil commotion storm tidal wave flood epidemic fire or earthquake. 1.39 Republic of Trinidad and

Tobago. Government shall mean the Government of the 1.40 Internal Market means the Natural Gas market in Trinidad and Tobago including without limitation Natural Gas sold to refineries electricity generating facilities petrochemical manufacturers and other industrial commercial and domestic customers in Trinidad and Tobago but expressly excludes Export Markets. consumption local for Local means the local component of 1.41 goods services and human resources employed in the conduct of Petroleum Operations under this Contract. 1.42 Local Policy means the policy of the Government with respect to Local as stated in this Contract and in the relevant policy documents. 1.43 Local Enterprise means a person firm or entity performing works services and/or supplying goods and materials to Contractor whether as a Subcontractor or otherwise whose business enterprise is incorporated or otherwise organised under the Laws of Trinidad and Tobago and whose principal place of business is in Trinidad and Tobago and which is effectively owned and controlled by nationals of Trinidad and Tobago. 18 PRODUCTION SHARING CONTRACT BLOCK Local Goods means materials and/or equipment 1.44 mined grown or produced in Trinidad and Tobago whether through manufacturing processing or assembly. An article which is produced by manufacturing processing or assembly must differ substantially in its basic characteristics purpose or utility from any of its imported components. Manufactured goods would be considered to be of local origin if the cost of the local materials labour and services used to produce the item constitute not less than fifty 50 per cent of the cost of the finished product. 1.45 performed or supplied by a Local Enterprise. Local Services means works or services 1.46 Measurement Point means the location specified in the approved Development Plan within or outside of the Contract Area where the Petroleum is metered and delivered to the Minister and Contractor. Minimum Exploration Work Programme means the 1.47 Exploration work to which Contractor has committed itself for each phase of the Exploration Period in accordance with Article 7. 1.48 Minister means the member of Cabinet to whom responsibility for matters related to Petroleum is assigned and his duly authorized delegates pursuant to Section 5 of the Act. Ministry means the ministry in the Government 1.49 to which responsibility for matters related to Petroleum is assigned. 1.50 twelve 12 months of the

Calendar Year. Month or Calendar Month means any of the 19 PRODUCTION SHARING CONTRACT BLOCK Natural Gas means all Petroleum which at 1.51 standard conditions of temperature and pressure 60 degrees Fahrenheit and 14.7 p.s.i.a. is in a gaseous state including wet gas dry gas and residue gas remaining after the extraction processing or separation of liquid Petroleum from wet gas as well as nonPetroleum gas or gases produced in association with liquid or gaseous Petroleum. 1.52 Natural Gas Field means a Field from which more than fifty per cent 50 of the estimated reserves on an Energy Equivalent Basis is Natural Gas at standard conditions of temperature and pressure 60 degrees Fahrenheit and 14.7 p.s.i.a.. 1.53 Nonassociated Natural Gas means all gaseous hydrocarbons produced from gas reservoirs and includes wet gas dry gas and residue gas remaining after the extraction of liquid hydrocarbons from wet gas. Operator means the Contractor Party which is in 1.54 charge of the day to day activities of Contractor under this Contract. The initial Operator shall be .. 1.55 Contractor and does not include any Subcontractors. Party or Parties means the Minister and 1.56 Petroleum means all natural organic substances composed of carbon and hydrogen. This includes Crude Oil and Natural Gas and all other mineral substances products byproducts and derivatives that are found in conjunction with such substances. 1.57 Petroleum Operations means the Exploration Operations the Development Operations the Production Operations and all other activities related thereto 20 PRODUCTION SHARING CONTRACT BLOCK carried out under this Contract but excludes mining operations involving the extraction of Petroleum from bituminous shales tar sands asphalt or other like deposits. 1.58 made pursuant to the Act. Petroleum Regulations means the regulations 1.59 Production or Production Operations shall include but not be limited to operations and all activities related thereto carried out for Petroleum production after the Ministers approval of the Development Plan such as extraction injection stimulation treatment transportation storage lifting and related operations but does not include any storage or transportation beyond the Measurement Point. Production Area means the portion of the 1.60 Contract Area specified in an approved Development Plan under Article 13.7a.ii. 1.61 Months. 1.62 Tobago. Quarter means a period of three 3 consecutive State means the

Republic of Trinidad and Subcontractor means a specialized person firm 1.63 or entity contracted by Contractor to carry out specific work relative to Petroleum Operations under the supervision of and for the account of Contractor. 1.64 Transfer shall include the following whether voluntary or involuntary and whether effected by operation of law or otherwise any transfer of ownership or any part thereof of any entity comprising Contractor by sale merger consolidation reorganisation or 21 PRODUCTION SHARING CONTRACT BLOCK liquidation or any change in ownership or voting rights in a company or legal entity. Where Contractor or any of the entities comprising Contractor is a publicly traded organisation registered on a stock exchange Transfer shall include the following whether voluntary or involuntary and whether effected by operation of law or otherwise any transfer of a controlling interest of the voting shares of any entity comprising Contractor by sale or liquidation. consolidation reorganisation merger 1.65 Transfer is made. Transferee shall mean any person to whom any 1.66 Work Programme means a programme itemizing the Petroleum Operations to be conducted with respect to the Contract Area and the time schedule for accomplishing such operations. 1.67 Work Unit means the numerical representation of the cost of the work obligations specified in the Work Programme under the Petroleum Regulations Deep Water Competitive Bidding Order 2013 issued on the 14th day of August 2013 and published as Legal Notice No. 164 of 2013 for one or more phases of this Contract or under an appraisal programme or relative to a retained exploration area as detailed in Annex E. 1.68 or USD or US Dollars or Dollars or dollars or any combination of these shall mean the lawful currency of the United States of America. 22 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 2 SCOPE This is a Production Sharing Contract the object 2.1 of which is the Exploration Appraisal Development and Production of Petroleum in the Contract Area and the provision of required infrastructure within and outside of the Contract Area up to the Measurement Point all at Contractors sole risk and expense. 2.2 a Subject to the terms and conditions of the Contract appoints Contractor as the exclusive agent to conduct Petroleum Operations in the Contract Area during the term of the Contract. Minister hereby the b The grant of this Contract confers upon Contractor the right in respect of the Contract

Area to search for drill and get Petroleum therein and dispose of Petroleum so obtained in accordance with the terms of this Production Sharing Contract but nothing in this Contract shall be taken to confer ownership of any Petroleum in strata or to confer any other rights in land within the Contract Area.

2.3 Contractor shall be responsible to the Minister for the execution of Petroleum Operations in accordance with the provisions of the Contract. Without prejudice to Contractor's position as an independent contractor hereunder the work to be done by Contractor shall be subject to the general supervision and review of the Minister in accordance with the Contract.

2.4 In performing Petroleum Operations Contractor shall provide the requisite financial resources and employ the industry standards scientific methods

23 PRODUCTION SHARING CONTRACT BLOCK . procedures technologies and equipment accepted in the international Petroleum industry.

2.5 Contractor shall comply with the Local Policy in effect as may be varied from time to time and stated in the relevant policy documents. In performing Petroleum Operations under the Contract Contractor shall provide for the maximum utilization of services and facilities available from Local Enterprises. Contractor shall employ with priority nationals in all aspects of Petroleum Operations.

2.6 Contractor shall receive no compensation for its services nor any reimbursement of its expenditures under the Contract except for the share of Petroleum from the Contract Area to which it may become entitled under Article 18. If there is no Commercial Discovery in the Contract Area or if Contractor's share of the Petroleum produced from Production Areas within the Contract Area developed by Contractor is insufficient to reimburse Contractor Contractor shall bear its own losses.

24 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 3 CONTRACT AREA The Contract Area as of the Effective Date of the

3.1 Contract comprises a total area of approximately hectares as described in Annex A attached hereto and delineated in the map which forms part thereof.

3.2 Except for the rights expressly provided by the Contract no right is granted in favour of Contractor to the surface area seabed subsoil or to any natural resources or aquatic resources.

25 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 4 CONTRACT TERM The Exploration Period shall be for a period not

4.1 exceeding nine 9 Contract Years from the Effective Date divided into a first phase of years

and an optional second phase of years an optional third phase of year Contractors right to enter the next phase is subject to it having fulfilled its obligations for the then current phase. Contractor shall notify the Minister of its 4.2 election to enter the next phase at least ninety 90 days prior to expiration of the then current phase. If Contractor does not so elect to enter the next phase this Contract shall terminate as provided herein under terms and conditions to be agreed by the Minister and Contractor at the end of the then current phase with respect to any portion of the Contract Area not included in a a Production Area; b Appraisal Areas subject to an extension pursuant to Article 4.3; c areas retained for a market development phase pursuant to Article 16.1; d areas retained for Exploration pursuant to Article 6.1; 26 PRODUCTION SHARING CONTRACT BLOCK . e any areas then pending approval by the Minister; or f any area that is the subject of a dispute and said dispute is being resolved pursuant to Article 33. Where insufficient time is available during the 4.3 Exploration Period to complete the commercialization determination under an Appraisal Programme approved under Articles 13.2 or 13.4 Contractor shall have the right upon written application to the Minister not less than ninety 90 days before the end of the Exploration Period to an extension of the term with respect to the Appraisal Area until the date on which the evaluation report on such Discovery is due under Article 13.2d or 13.4d. In the event of a Commercial Discovery the term 4.4 of the Contract shall be thirty 30 years from the Effective Date with respect to the Production Area corresponding to such Commercial Discovery; provided however if the Commercial Discovery relates to a Natural Gas Field the term of the Contract shall be thirty 30 years from the Effective Date plus the period of any market development phase granted and utilized in accordance with Article 16.1 and any extension granted in accordance with Article 16.6 with respect to the Production Area corresponding to such Natural Gas Field. 4.5 Contractor may request by notice to the Minister at least one 1 year prior to the end of the term of the Contract to extend the duration of the Contract with respect to any Production Area for periods of five 5 years or more on terms and conditions to be mutually agreed between the Minister and Contractor. 4.6 The Minister may grant further extensions in the 27 same manner as has been laid down in Article 4.5. PRODUCTION SHARING CONTRACT

BLOCK . 28 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 5 RELINQUISHMENTS 5.1

be reduced by Subject to Article 5.2 the Contract Area shall a at least thirty per cent 30 of the original Contract Area not later than the end of the first phase of the Exploration Period; b at least fifty per cent 50 of the original Contract Area inclusive of areas previously relinquished not later than the end of the second phase of the Exploration Period; c all portions of the original Contract Area not later than the end of the Exploration Period under Article 4.1 with the exception of i Production Areas; ii Appraisal Areas subject to an extension under Article 4.3; iii Natural Gas Discovery areas retained for a market development phase under Article 16.1; iv Exploration areas retained in accordance with Article 6.1; v any areas then pending approval by the Minister; and vi any area that is the subject of a dispute and said dispute is being resolved pursuant to Article 33. 29

PRODUCTION SHARING CONTRACT BLOCK . d any Appraisal Area subject to an extension under Article 4.3 that is not declared a Commercial Discovery by the end of the extension under Article 4.3; e any Natural Gas Discovery area retained pursuant to Article 16.1 that is not declared a Commercial Discovery by the end of the market development phase granted under Article 16.1; f any Production Area not in Commercial Production by the end of seven7 years after declaration of Commercial Discovery for such area within thirty 30 days after the Ministers request for such relinquishment; and g any Exploration area retained pursuant to Article 6.1 for which no approved Exploration Work Programme for such area is committed. Subject only to Articles 5.1f and 5.6 5.2 Contractor shall not be required pursuant to Article 5.1 to relinquish any portion of the Contract Area designated as a Production Area. 5.3 Unless the Contract Area is earlier surrendered or the Contract is terminated Contractor shall furnish the Minister with a description of the boundaries of the part to be relinquished not less than ninety 90 days in advance of the deadline for the relinquishment prescribed in Article 5.1. 5.4 The area designated under Article 5.3 for relinquishment shall be as far as practicable rectangular bounded by lines running due north and south and due east and west having the longer side no more than three 3 times the shorter side. Unless the Minister specifically 30 PRODUCTION SHARING CONTRACT BLOCK . consents no individual

rectangular area relinquished shall be less than thirty per cent 30 of the total area being relinquished at such time. 5.5 voluntarily surrenders a part of the Contract Area. Article 5.4 shall also apply where a Contractor Contractor shall relinquish rights to conduct 5.6 Petroleum Operations in a Production Area upon request of the Minister where for reasons other than Force Majeure cases which are approved by the Minister or scheduled maintenance under an approved Work Programme and budget Contractor has ceased voluntarily or intentionally normal Production of such Production Area for more than one hundred and eighty 180 consecutive days. 5.7 No relinquishment shall relieve Contractor of accrued but unfulfilled obligations under the Contract. In the event that Contractor desires to relinquish its rights hereunder in all of the Contract Area without having fulfilled all accrued obligations Contractor or its guarantor shall pay the Minister prior to the date of such proposed total relinquishment an amount equal to the remaining amount of the nondischarged guarantees under Article 8 corresponding to such accrued but unfulfilled obligations. 5.8 Prior to relinquishment of any area Contractor shall perform all necessary abandonment programme activities in accordance with the sound and current international Petroleum industry practices to restore such area as nearly as possible to the condition in which it existed on the Effective Date including removal of such facilities equipment or installations as the Minister may instruct and shall take action necessary to prevent hazards to human life property and the environment which may be caused by its facilities equipment or installations. 31 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 6 RETAINED EXPLORATION AREA Where Contractor declares a Commercial Discovery 6.1 in the Contract Area during the Exploration Period specified in Article 4.1 or any extension as provided for under Article 4.3 Contractor shall have the option exercisable by notice to the Minister at least one hundred and twenty 120 days before the relinquishment required under Article 5.1c to retain up to thirty per cent 30 of the original Contract Area or an area to be mutually agreed by the Minister and Contractor if justified by Contractors Work Programme for ongoing Exploration. The notice to the Minister a shall specify the coordinates of the Exploration area selected for retention which shall be comprised of no more than two 2 separate rectangular blocks

that comply with the specifications stated in Article 5.4; and b shall contain Contractors proposed Exploration Work Programme and budget corresponding to such area for the balance of the current Calendar Year and the next two 2 Calendar Years. Provided the Minister approves the Exploration Work Programme and budget submitted with the aforementioned notice Contractor shall have the right to conduct Petroleum Operations in the retained Exploration area for the approved period. 6.2 If Contractor wishes to retain any portion of the Exploration area selected under Article 6.1 beyond the date for which an agreed programme is committed Contractor shall propose for the Ministers approval an Exploration Work Programme and budget for the next two 32 PRODUCTION SHARING CONTRACT BLOCK . 2 Calendar Year periods. Such proposal shall be presented to the Minister at least ninety 90 days before the end of the period for which an Exploration Work Programme has been approved. 33 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 7 MINIMUM EXPLORATION WORK PROGRAMME Contractor shall commence Exploration Operations 7.1 hereunder within ninety 90 days after the Effective Date. Such Exploration Operations shall be diligently and continuously carried out in accordance with sound and current international Petroleum industry practices for the duration of the Exploration Period. During the first phase of the Exploration Period 7.2 Contractor shall carry out to the value of United States Dollars US..... at least the following Minimum Exploration Work Programme consisting of Work Units a Geological i Evaluate integrate and map all data related to the Contract Area; ii Acquire geological data and conduct studies in accordance with Annex G to the value of approximately United States Dollars US..... equivalent to Work Units. These will include the following elements i. Sedimentology; ii. Sequence Stratigraphy; iii. Geochemistry including Fluid Analysis; iv. Maturation and Migration Studies; v. Biostratigraphy; vi. Structural Analysis; and vii. Other Studies. 34 PRODUCTION SHARING CONTRACT BLOCK . b Geophysical i Acquire and process to industry standards at least square kilometres of full fold 3D seismic to the value of approximately United States Dollars US..... equivalent to Work Units with shooting to commence within Months after the Effective Date; ii Evaluate integrate and map all seismic data related to the Contract Area; iii Acquire at least line

kilometres of Gravity and Magnetic data within the of approximately United States Dollars US..... equivalent to Work Units. Contract value Area the to c Drilling Drilling of at least Exploration Wells i to a depth of at least metres true vertical depth below mudline to the value of approximately United States Dollars US.....00 equivalent to. Work Units; ii to a depth of at least. metres true vertical depth below mudline to the value of approximately United States Dollars US.....00 equivalent to.. Work Units; with spudding of the first such well to be not later than 35 PRODUCTION SHARING CONTRACT BLOCK . Months after the Effective Date. d During the first phase of the Exploration Period Contractor may propose to the Minister to alter the programme described under paragraphs a b and c and the Minister shall approve of such change where the revised programme has an equal or larger number of Work Units and the revision is technically justified. 7.3 During the optional second phase of the Exploration Period Contractor shall carry out to the value of approximately United States Dollars US..... at least the following Minimum Exploration Work Programme consisting of Work Units a Geological i Evaluate integrate and map all data related to the Contract Area; ii Undertake geological studies to the value of approximately United States Dollars US..... equivalent to Work Units. b Geophysical i Acquire and process to industry standards at least square kilometres of full fold 3D seismic to the value of approximately United States Dollars US..... equivalent to Work Units; ii Evaluate integrate and map all seismic data related to the Contract Area; 36 PRODUCTION SHARING CONTRACT BLOCK . c Drilling Drilling of at least Exploration Wells to a depth of at least metres true vertical depth below mudline to the value of approximately United States Dollars US..... equivalent to Work Units. b During the second phase of the Exploration Period Contractor may propose to the Minister to alter the programme described under paragraphs a b and c and the Minister shall approve of such change where the revised programme has an equal or larger number of Work Units and the revision is technically justified. 7.4 During the optional third phase of the Exploration Period Contractor shall carry out to the value of approximately United States Dollars US..... at least the following Minimum Exploration Work Programme consisting of Work Units a Geological i Evaluate integrate and map all data related to the Contract Area; ii

Undertake geological studies to the value of approximately United States Dollars US..... equivalent to Work Units. b Geophysical i Acquire and process to industry standards at least square kilometres of full fold 3D seismic to the value of States approximately United 37 PRODUCTION SHARING CONTRACT BLOCK . Dollars US..... equivalent to Work Units; ii Evaluate integrate and map all seismic data related to the Contract Area; c Drilling Drilling of at least Exploration Wells to a depth of at least metres true vertical depth below mudline to the value of approximately United States Dollars US..... equivalent to Work Units. b During the third phase of the Exploration Period Contractor may propose to the Minister to alter the programme described under paragraphs a b and c and the Minister shall approve of such change where the revised programme has an equal or larger number of Work Units and the revision is technically justified. 7.5 Programme under Articles 7.2 through Article 7.4 For purposes of the Minimum Exploration Work a The obligations related to the second phase or third phase of the Exploration Period will accrue only if Contractor elects to enter such subsequent phase by notice pursuant to Article 4.2. b In the event that an Exploration Well attains the minimum depth requirement in a prospective zone Contractor shall be required to continue drilling to a depth which will ensure penetration of and allow for the proper evaluation of the entire prospective zone provided such further drilling is operationally 38 PRODUCTION SHARING CONTRACT BLOCK . and technically feasible. Such further drilling shall be credited against any other outstanding Work Units on a dollar for dollar basis. c Additional line kilometres of seismic and additional Exploration Wells beyond the minimum required for any phase of the Exploration Period may be carried forward to satisfy the respective work obligations of a subsequent phase of the Exploration Period. Neither Appraisal wells seismic surveys nor any 7.6 other Petroleum Operations carried out as part of an Appraisal Programme or Assessment Plan approved under Article 13 shall discharge Contractor of obligations in respect of the Minimum Exploration Work Programme. 7.7 If in the course of drilling an exploration well Contractor in its reasonable opinion and after consultation with the Minister dees that drilling to the depth specified is impossible or imprudent in accordance with accepted petroleum industry drilling and engineering practice Contractor may discontinue such

operation. Such shortage of drilling depth shall not relieve Contractor of the obligation to carry out the committed Work Units. Where the Minister concurs that further drilling is impossible or imprudent and where Contractor is otherwise unable to carry out the Work Units committed to the Minister may consider accepting a payment in cash in substitution for the remaining Work Units committed and therefore Contractor would retain the option to enter into the next phase where applicable. 39

PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 8 GUARANTEES On the Effective Date upon commencement of each 8.1 subsequent phase of the Exploration Period entered into under Article 4 and upon the approval being granted for an Exploration Work Programme under Article 6 or for any Appraisal Work Programme pursuant to Article 13.2c and 13.4c Contractor shall provide the Minister with irrevocable guarantees from a guarantor of financial substance acceptable to the Minister for an amount equal to a the value of the Work Units committed to for the relevant Work Programme or phase; b the sum of Four Hundred Thousand United States Dollars US400000.00 for the performance of any obligation under the Contract other than those covered by the guarantees under a above. Such guarantees shall be in a form and substance acceptable to the Minister. 8.2 The respective amounts of the guarantees for obligations arising out of Work Programmes referred to in Article 8.1 shall be a For the first phase of the Exploration Period United States Dollars US.....00; b For the second phase of the Exploration Period United States Dollars US.....00; c For the third phase of the Exploration Period 40 PRODUCTION SHARING CONTRACT BLOCK .

United States Dollars US.....00. 8.3 Upon delivery to the issuing guarantor of a certificate from Contractor countersigned on behalf of the Minister by a duly authorized official that the corresponding Work Units have been completed in accordance with the Contract and that all technical data related thereto have been delivered to the Minister the guarantees shall be reduced by the value of the Work Units that were committed to the applicable phase or programme. 8.4 Where Contractor has failed to perform in accordance with this Contract all or any part of accrued Work Programmes a at the end of any phase of the Exploration Period; b at the end of an approved period in respect of a retained Exploration area pursuant to Article 6; c at the end of an approved

period in respect of an Appraisal Work Programme pursuant to Article 13.2 and 13.4 and upon termination of this Contract Contractor or its guarantor shall on demand from the Minister pay the Minister the entire remaining amount of such outstanding guarantee or guarantees within two weeks of receipt of a written notice from the Minister indicating the amount due to be paid.

8.5 On the Effective Date Contractor shall deliver to 41 PRODUCTION SHARING CONTRACT BLOCK . the Minister in a form acceptable to the Minister an undertaking from a financially technically and legally competent parent company that such parent company shall provide all technical and financial resources that its subsidiary may require to meet on a timely basis Contractors obligations under the Contract.

42 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 9 COORDINATION COMMITTEE

Within ten 10 days after the Effective Date a 9.1 Coordination Committee composed of four 4 members two 2 of whom shall be appointed by the Minister and two 2 by Contractor shall be established. A Party by at least ten 10 days notice to the other Party may replace one or more of its members on the Coordination Committee. The chairman of the Coordination Committee shall be appointed by the Minister from the members appointed by him and the secretary shall be named by Contractor from among its appointees. Additional representatives of either Party may attend meetings as observers or alternate members.

9.2 The mandate of the Coordination Committee is to assist Contractor in its activities under this Contract by providing a forum for continuous dialogue and flow of information between Contractor and the Minister regarding Contractors planned activities and progress related to the Contract Area. The Coordination Committee shall review proposals for revisions to agreed Work Programmes and budgets and periodically evaluate Contractors progress in respect of approved Work Programmes budgets local initiatives and other matters related to Petroleum Operations under this Contract.

9.3 Ordinary meetings of the Coordination Committee shall be held quarterly in Port of Spain or any other location agreed by the Parties. Special meetings of the Coordination Committee may be called on reasonable notice by either Party for the purpose of considering any major development or problems in Petroleum Operations.

9.4 The secretarys minutes of a meeting shall be prepared circulated approved and signed by a 43 PRODUCTION

SHARING CONTRACT BLOCK . representative of each Party within fourteen 14 days after adjournment of the meeting. A copy of such minutes shall be delivered to each of the Parties for information and appropriate action. 9.5 The Coordination Committee may from time to time designate one or more technical committees composed of specialists appointed by the Parties to assist as required. 44 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 10 UNDERTAKING BY CONTRACTOR Resident Representative Within thirty 30 days 10.1 after the Effective Date Contractor shall designate a representative residing in Trinidad and Tobago who shall have full authority to represent it in respect of matters related to the Contract and to receive notices addressed to Contractor. Office Within ninety 90 days after the 10.2 Effective Date Contractor shall establish and maintain an office in Trinidad and Tobago with sufficient competence and capacity to conduct and perform Petroleum Operations in accordance with the terms of this Contract. 10.3 Conduct of Petroleum Operations Contractor shall conduct Petroleum Operations hereunder in a continuous diligent and workmanlike manner in accordance with applicable law and the Contract and sound and current international Petroleum industry practices and environmental standards applicable from time to time in similar circumstances all designed to achieve efficient and safe Exploration and Production of Petroleum and to maximize the ultimate economic recovery of Petroleum from the Contract Area. In this regard Contractor shall ensure that all materials equipment technologies and facilities used in Petroleum Operations comply with sound and current engineering and environmental standards accepted in the international petroleum industry and are kept in good working order. 10.4 Local Commitment Contractor shall comply with the Local Policy in effect from time to time. In performing Petroleum Operations under the Contract Contractor shall provide for the maximum utilization of Local Goods Local Services and local 45 PRODUCTION SHARING CONTRACT BLOCK . facilities available in Trinidad and Tobago in accordance with the provisions of Article 25.2. Contractor shall employ with priority nationals in all aspects of Petroleum Operations and shall undertake the training and development of such personnel in accordance with the provisions of Article 25.6. The Work Programmes and budgets submitted and reported pursuant

to Articles 14 and 15 should indicate Contractor's estimate of the Local component of ongoing Petroleum Operations. 10.5 Notification of Work Contractor shall provide the Minister with regular and complete information concerning all Petroleum Operations and shall present to the Minister prior to execution of specific work information relative thereto. 10.6 Records Contractor shall prepare and maintain in Trinidad and Tobago at all times during the term of the Contract accurate and current records of its Petroleum Operations hereunder. Reports In accordance with Annex B Contractor 10.7 shall submit to the Minister detailed daily drilling reports and monthly physical progress reports covering in reasonable detail all the activities carried out under this Contract as well as all other reports as may be required by the Minister. and Technical Comprehensive Commercial 10.8 Evaluation Within ninety 90 days after completion of the Minimum Exploration Work Programme under Articles 7.2 7.3 and 7.4 respectively and Work Programme under Article 6 and Appraisal Programme under Article 13 Contractor shall prepare and present to the Minister a comprehensive technical and commercial evaluation of the Petroleum potential of those portions of the Contract Area for which Exploration Operations and other activities have been performed or evaluated by the work 46 PRODUCTION SHARING CONTRACT BLOCK . conducted. 10.9 Data Contractor shall provide to the Minister in accordance with Annex B any and all data reports samples information interpretation of such data and all other information or work product pertaining to the Contract Area including in particular all data for which the cost was recorded by Contractor as a cost of Petroleum Operations. Contractor may retain for use in Petroleum Operations hereunder copies of technical data. All original data shall be delivered by Contractor to the Minister not later than the end of the term of the Contract. Subject to the prior approval of the Minister Contractor may a export original data; b retain for use in Petroleum Operations hereunder original technical data; and c export for processing or laboratory examination or analysis samples or other original materials provided that samples equivalent in size and quality or where such material is capable of reproduction copies of equivalent quality have first been delivered to the Minister. 10.10 Inspection by the Minister a Contractor shall enable at all reasonable times the duly authorized representatives of the Minister

and other agencies of the Government to inspect any part of Petroleum Operations and all facilities installations offices records books or data related to Petroleum Operations. b All duly authorized representatives of the 47 PRODUCTION SHARING CONTRACT BLOCK . Minister and other agencies of the Government agree to abide by the posted or published safety rules of Contractor during such inspections. Use of Facilities Contractor shall provide 10.11 facilities to a reasonable number of duly authorized representatives of the Minister and other agencies of the Government to perform their duties and obligations in relation to this Contract including in the case of field operations transportation lodging food and other amenities at equal conditions as those supplied by Contractor to its own staff. or Loss Damage 10.12 bear responsibility in accordance with applicable law for any loss or damage to third parties caused by its employees or Subcontractors wrongful or negligent acts or omissions and indemnify the Minister and the Government against all claims and liabilities in respect thereof. Contractor shall 10.13 Legal Proceedings Each Party shall inform the other Party as soon as is reasonably possible of any legal proceedings initiated by or against a Party in relation to this Contract. The relevant Party shall also provide to the other Party details of the claims made and quarterly reports of these proceedings. 10.14 Environment Pollution Safety While conducting Petroleum Operations and in accordance with the sound and current international Petroleum industry practices Contractor shall take and ensure that its Subcontractors and agents take necessary measures for safety of life; conservation of property crops fish wildlife; safety of navigation; protection of the environment; prevention of pollution; and safety and health of personnel including but not limited to a ensuring security areas around all machinery and 48 PRODUCTION SHARING CONTRACT BLOCK . equipment; b with respect to onshore support facilities erecting of fences if applicable at a distance of not less than fifty 50 metres from any drilling rig generator or other equipment of a dangerous nature; c providing secure storage areas for all explosives detonators and similar dangerous materials used in Petroleum Operations; d preventing pollution or damage to any waterbearing formations and other natural resources; e containing any blowout fire or other emergency situation that would result in loss of reserves or damage to the reservoir; f

preventing unintentional entrance of fluids into Petroleum formations and the Production of Crude Oil or Natural Gas from reservoirs at higher rates than consistent with good Petroleum industry practice; g taking all necessary precautions to prevent pollution of or damage to the environment including the undertaking of remedial measures within a reasonable period to repair or offset damage to the environment in cases where the Minister or installations erected by Contractor or any operations conducted by or on behalf of Contractor endanger third party property or cause pollution or harm to wildlife or the environment including where pollution occurs promptly to treat or disperse it in an environmentally acceptable manner; determines works that any 49 PRODUCTION SHARING CONTRACT BLOCK . h reporting to the Minister within twentyfour 24 hours in cases of death or serious injury to workers in the performance of duties connected with Petroleum Operations; i arranging an adequate supply of firstaid medicines and equipment in each area and maintaining a healthy environment for the workers; j providing safety and firefighting equipment and training of personnel in the use of such equipment in each work area; and k participating in the National Oil Spill Contingency Plan as is in force from time to time and in addition and without prejudice to its obligations thereunder preparing and submitting to Minister for approval prior to commencing any drilling activities an oil spill and fire contingency plan which plan shall be implemented in the event of such a catastrophe. 10.15 Joint Operating Agreement In the event there is more than one 1 Contractor Party a joint operating agreement between the entities shall be executed within ninety 90 days of the Effective Date and submitted to the Minister for his information. Contractor shall also supply to the Minister for his information any other agreements executed by the entities comprising Contractor relating to the conduct of Petroleum Operations under this Contract within ten 10 days of execution of such agreements. Changes made to any of these agreements shall be submitted to the Minister for his information within ten 10 days of the execution of such changes. 10.16 No change in the Operator shall take effect unless it has been approved by the Minister. 50 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 11 ANCILLARY RIGHTS OF CONTRACTOR 11.1 Contractor shall for the efficient conduct of Petroleum Operations have the right subject to

appropriate arrangements with other operators and/or relevant authorities and as approved by the Minister a to access to and from the Contract Area and to and from facilities pertaining to Petroleum Operations hereunder wherever located at all times and to use of the land sea and seabed required; and b to use in Petroleum Operations sand gravel and water belonging to the public domain in accordance with the relevant laws and on payment of the generally prevailing charge for such resources in the locality of use.

51 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 12 ASSISTANCE BY MINISTER To enable Contractor to implement the Contract 12.1 expeditiously and efficiently the Minister shall use best efforts when specifically requested by Contractor to assist Contractor among other things in a obtaining rights to use land rights of way permits and/or easements as may be required for the conduct of Petroleum Operations; b obtaining licences or permits for transportation and communication facilities; c complying with import/export controls and regulations and custom formalities and where applicable obtaining exemptions from customs and other duties; d obtaining entry and exit visas for the foreign of employees Subcontractors who may come to Trinidad and Tobago for the implementation of the Contract and members of their families; Contractor foreign and e obtaining relevant work permits; f obtaining access to all geological geophysical drilling well and Production information in the Contract Area; and g transacting business with Government authorities in general.

12.2 Upon presentation of appropriate documentation to Contractor the Minister shall be promptly reimbursed by

52 PRODUCTION SHARING CONTRACT BLOCK . Contractor for all reasonable expenses incurred in providing the assistance requested by Contractor in accordance with this Article 12.

53 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 13 DISCOVERY COMMERCIALIZATION PROCEDURE 13.1 Contractor shall If a Discovery is made in an Exploration Well a immediately notify the Minister of such Discovery; b within thirty 30 days thereafter provide the information Minister regarding the Discovery including a preliminary classification of the Discovery as Crude Oil or Natural Gas; and available with all c within ninety 90 days after such Discovery also notify the Minister whether or not it considers the Discovery of Crude Oil or Natural Gas to have commercial potential.

13.2 Evaluation of Commercial Potential

of Discovery of Crude Oil a If Contractor pursuant to Article 13.1c notifies the Minister that a Discovery of Crude Oil has commercial potential it shall within thirty 30 days after such notice present to the Minister for approval an Appraisal Programme. The Appraisal Programme shall be deemed approved as submitted if the Minister does not respond in writing within sixty 60 days of receipt of the Appraisal Programme. b The Appraisal Programme shall i identify the Appraisal Area; and 54 PRODUCTION SHARING CONTRACT BLOCK . ii specify in reasonable detail the Appraisal work including but not limited to seismic drilling of wells and studies to be carried out the estimated cost of these works the Work Units related to these works and the time frame within which Contractor shall commence and complete the programme. c Contractor shall carry out the approved Appraisal Programme under Article 13.2a within the time frame specified therein. Contractor may amend the Appraisal Programme subject to the Ministers prior approval. d Within ninety 90 days after completion of the Appraisal Programme Contractor shall submit to the Minister a comprehensive evaluation report on the Appraisal Programme. Such evaluation report shall include but not be limited to the following information geological conditions such as structural configuration; physical properties and extent of reservoir rocks; pressure volume and temperature analysis of the reservoir characteristics including gravity and composition of liquid and gaseous percentage sediment and water percentage and product yield pattern; Production forecasts per well and per Field; and estimates of recoverable reserves projected delivery rate and pressure quality specifications and other relevant technical and economic factors including economic feasibility studies carried out by Contractor in respect of its declaration made under Article 13.6. hydrocarbons sulphur fluid; fluid 55 PRODUCTION SHARING CONTRACT BLOCK . 13.3 Evaluation of Commercial Potential of Discovery of Natural Gas a If Contractor pursuant to Article 13.1c notifies the Minister that a Discovery of Natural Gas has commercial potential it shall within ninety 90 days after such notice present to the Minister for approval an Assessment Plan. The Assessment Plan shall be deemed approved as submitted if the Minister does not respond within sixty 60 days of receipt thereof. b The Assessment Plan shall i identify the Assessment Plan area which shall not

exceed the area encompassing the geological structure or feature in which the Discovery is made and a reasonable margin surrounding such structure or feature to be mutually agreed by the Minister and Contractor; ii specify in reasonable detail the work that is needed to assess the Discovery which may include but not be limited to seismic drilling of wells and studies to be carried out the estimated cost of these works and the time frame within which Contractor shall commence and complete such works; iii identify and evaluate potential marketing options for all Available Natural Gas including the options provided for in Article 2.1 of Annex D; and iv incorporate marketing opportunities identified in discussions potential 56 PRODUCTION SHARING CONTRACT BLOCK . between the Minister and Contractor. c Contractor shall carry out the approved Assessment Plan under Article 13.3a within the time frame specified therein. d Contractor may amend the Assessment Plan subject to the Ministers prior approval. e Within ninety 90 days after completion of the works included in the approved Assessment Plan Contractor shall submit to the Minister a comprehensive evaluation report including all available commercial and technical information relevant to the determination of a market for Available Natural Gas. Such evaluation report shall also contain the Marketing Plan referred to in Annex D as well as an evaluation of the marketing options for all Available Natural Gas including the options provided for in Article 2.1 of Annex D. f Within ninety 90 days after the evaluation report under Article 13.3e has been submitted the Minister shall notify Contractor of the marketing arrangements which the Minister has decided to elect pursuant to Article 2.1 of Annex D. g Within sixty 60 days of such notification by the Minister Contractor shall notify the Minister whether or not it wishes to i retain the Natural Gas Discovery for a market development phase in accordance with Article 16.1; ii declare that the Discovery is a Commercial 57 PRODUCTION SHARING CONTRACT BLOCK . Discovery; or iii declare that the Discovery is not a Commercial event Contractor shall be required to relinquish the areas pursuant to Article 5. Discovery which in 13.4 Optional Further Appraisal of a Natural Gas Discovery during Market Development Phase a Within the term of the Contract including any market development phase granted under Article 16.1 Contractor may apply to the Minister for approval and upon approval being granted promptly carry

out an Appraisal Programme of the Natural Gas Discovery or may directly present an evaluation report based on the Assessment Plan or the market development phase pursuant to Article 16.1 hereof. b The Appraisal Programme shall i identify the Appraisal Area; and ii specify in reasonable detail the Appraisal work including but not limited to seismic drilling of wells and studies to be carried out the estimated cost of these works and the Work Units related to these works and the time frame within which Contractor shall commence and complete the programme. c Contractor shall carry out the approved Appraisal Programme under Article 13.4a within the time frame specified therein. Contractor may amend the Appraisal Programme subject to the Ministers prior approval. 58 PRODUCTION SHARING CONTRACT BLOCK . d Within ninety 90 days after completion of the Appraisal Programme Contractor shall submit to the Minister a comprehensive evaluation report on the Appraisal Programme. Such evaluation report shall include but not be limited to the following information geological conditions such as structural configuration; physical properties and extent of reservoir rocks; pressure volume and temperature analysis of the reservoir fluid; fluid characteristics including gravity and composition of liquid and gaseous hydrocarbons sulphur percentage sediment and water percentage and product yield pattern; production forecasts per well and per Field; and estimates of recoverable reserves projected delivery quality specifications and other relevant technical and economic factors including economic feasibility studies carried out by Contractor in respect of its declaration made under Article 13.6. Such report shall also include an analysis of marketing options in the Internal Market of Trinidad and Tobago. pressure rate and If Contractor fails to present an Appraisal 13.5 Programme under Article 13.2a or Assessment Plan under Article 13.3 that is acceptable to the Minister Contractor shall upon the request of the Minister at any time thereafter relinquish an area which shall contain as a minimum the geological structure or feature in which the Discovery was made. Either Party shall have the right to refer this matter to dispute resolution in accordance with the terms of Article 33 in which case Contractor shall not be obliged to relinquish as aforesaid unless and until a determination to this effect is made pursuant to the dispute resolution process. 59 PRODUCTION SHARING CONTRACT BLOCK . 13.6 Declaration of

Commercial Discovery Pursuant To 13.2 For Oil or 13.4 After Further Appraisal of a Natural Gas Discovery With the submission of the applicable evaluation report pursuant to Articles 13.2 and 13.4 or on or before the end of the market development phase of the Natural Gas Discovery Contractor shall submit a written declaration to the Minister indicating that it has determined the Discovery is either a a Commercial Discovery; or b not a Commercial Discovery in which event Contractor shall be required to relinquish the areas pursuant to Article 5. 13.7 a If Contractor declares pursuant to Article 13.3 gii or 13.6a that a Discovery is a Commercial Discovery Contractor shall submit to the Minister for approval within ninety 90 days of such declaration the following i a proposed Development Plan; ii a proposed designation of the Production Area; iiia comprehensive environmental impact study covering the proposed Development and any related facilities or infrastructure inside or outside of the Contract Area; and iv evidence that Contractor is complying with the applicable legislation respecting approvals environmental authorities. required by 60 PRODUCTION SHARING CONTRACT BLOCK . The proposed Development Plan Production Area and environmental impact study shall be deemed approved as submitted if the Minister does not respond within ninety 90 days of receipt thereof. b In the event the Minister and Contractor are unable to reach agreement on any objections raised or changes proposed by the Minister Contractor or the Minister shall have the right to request determination of the disputed issues pursuant to Article 33 in which case the decision shall be binding on both the Minister and Contractor. c Upon approval being granted Contractor shall proceed promptly and diligently and in accordance with sound and current international Petroleum industry practices to develop the Discovery to install all necessary facilities to commence Commercial Production and to produce the Field in a manner that will achieve maximum economic recovery of the reserves. Production shall continue without interruption unless the Minister is satisfied that the interruption is justified for technical or other reasons. 13.8 Contractors proposed Development Plan under Article 13.7 shall detail Contractors proposals for Development and operation of the Production Area and of any facilities and infrastructure up to the Measurement Point required outside of the Production Area.

Such Development Plan shall set forth i production parameters; ii number and spacing of wells; 61 PRODUCTION SHARING CONTRACT BLOCK . iii the facilities and infrastructure including proposed locations to be installed for Production storage transportation and loading of Petroleum; iv an estimate of the overall cost of the Development and estimates of the time required to complete each phase of the Development Plan; a Production forecast and an estimate of v ongoing capital and operating expenses involved to achieve the Production profile marketing arrangements for all Available Petroleum and any other factor which would affect the economic or technical feasibility of the proposed Development; vi profitability estimates; vii safety measures to be adopted; viii a description of the organisation to be established in Trinidad and Tobago; ix measures to be implemented for the employment of nationals and the utilization of Local Goods and Local Services; x the proposed abandonment plan; and xi such other particulars as Minister may direct. 13.9 Any significant changes to an approved Development Plan or proposals related to extension of a Field or for enhanced recovery projects shall be discussed among the Parties and if agreed shall be submitted in writing to the Minister for his prior 62 PRODUCTION SHARING CONTRACT BLOCK . approval. Such changes shall be deemed approved as submitted if the Minister does not respond within sixty 60 days of receipt thereof. 63 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 14 EXPLORATION WORK PROGRAMME 14.1 a Contractor shall present to the Minister for approval with respect to each Calendar Year during the Exploration Period an annual Work Programme and budget for the Contract Area. The Work Programme and budget shall be deemed approved as submitted if the Minister does not respond within sixty 60 days of receipt. The first such Work Programme and budget shall be submitted within thirty 30 days after the Effective Date and each subsequent Work Programme and budget at least sixty 60 days before the beginning of the relevant Calendar Year. b Within thirty 30 days following the end of each Quarter of the Calendar Year Contractor shall provide to the Minister a status report specifying the work and Work Units carried out during that Quarter the approximate costs incurred during such period and any changes that Contractor plans to make to the Work Programme and budget as a result of operations to date

in that report corresponding to the fourth Quarter of each Calendar Year shall also contain an annual summary of the quarterly reports for that Calendar Year. Calendar status Year. The In respect of the retained Exploration area 14.2 approved under Article 6 and the Appraisal Area under Article 13 the provisions of 14.1b shall apply. 14.3 Subject to Contractors obligations under Article 7 and the Ministers prior approval Contractor may amend the Work Programme and budget approved under Article 64 14.1. PRODUCTION SHARING CONTRACT BLOCK . 65 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 15 DEVELOPMENT AND PRODUCTION WORK PROGRAMMES AND BUDGETS Commencing in the Calendar Year in which the 15.1 Minister approves the first Development Plan for the Contract Area Contractor shall prepare and submit to the Minister for approval in such form as the Minister may direct an annual Development and Production Work Programme and budget detailing by Calendar Quarter all aspects of the proposed Petroleum Operations to be carried out in relation to each Production Area and related facilities and infrastructure the estimated cost thereof duration and location of each operation and where applicable the estimated monthly rate of Production for each Production Area. Each proposed Work Programme and budget shall also include a forecast of yearly Development and Production activity and expenditure for the ensuing period of four 4 Calendar Years or the period up to the end of the term of the Contract whichever is shorter. 15.2 The first Development and Production Work Programme and budget covering the balance of the Calendar Year in which the first Development Plan is approved shall be submitted within thirty 30 days after the date of approval of such Development Plan. Thereafter Contractor shall submit its proposed annual Work Programme and budget at least one hundred and twenty 120 days before the beginning of the relevant Calendar Year. 15.3 Contractors proposed Work Programme and budget shall be deemed approved as submitted if the Minister does not respond in writing within sixty 60 days after receipt. 15.4 If the Minister objects to any part of 66 PRODUCTION SHARING CONTRACT BLOCK . Contractors proposal he shall notify Contractor within the period specified in Article 15.3. The Ministers notice shall specify the modifications required by the Minister and the reasons for same. If Contractor

considers that any revision required by the Minister renders the Work Programme and budget unacceptable to Contractor Contractor shall within twentyfive 25 days after receipt notify and substantiate to the Minister its reasons for that decision. Forthwith the Minister and Contractor shall meet with a view to resolving any differences. If they fail to resolve their differences by the beginning of the Calendar Year for which the Work Programme is to apply Contractor shall incorporate the modifications requested by the Minister into the proposed Work Programme and budget submitted under Article 15.2 to the extent such changes a do not increase or decrease any line item of such proposed Work Programme and budget by more than ten per cent 10; and b do not materially alter the Development Plan as approved by the Minister provided that the Development and Production Work Programme and budget is consistent with such Development Plan. 15.5 The Minister may for good reason direct Contractor to modify the proposed rate of Production from any Field from which more than fifty per cent 50 of the Production on an Energy Equivalent Basis is Crude Oil provided always that such changes in Production levels shall not significantly alter the Production levels agreed to between the Minister and Contractor in the then current Development Plan. Notwithstanding the above provisions the Minister reserves the right to modify Production levels for safety considerations. 67 PRODUCTION SHARING CONTRACT BLOCK . 15.6 Contractor shall deliver to the Minister within twentyone 21 days after each Calendar Quarter a status report on the operations conducted and costs incurred under the approved Development and Production Work Programme and budget during such Calendar Quarter. The status report shall forecast any significant changes to such approved Work Programme and budget that Contractor anticipates may be necessary during the balance of the Calendar Year. The report corresponding to the last Quarter of each Calendar Year shall also include a yearend summary of operations and costs during such Calendar Year. 68 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 16 NATURAL GAS Where Contractor pursuant to Article 13.3gi 16.1 hereof has notified the Minister of intent to enter into a market development phase for the Discovery Contractor and the Minister shall within sixty 60 days after the election define by mutual agreement the portion of the Contract Area to be subject to

the market development phase. Such portion shall not exceed the area encompassing the geological structure or feature in which the Discovery was made and a reasonable margin surrounding such structure or feature to be mutually agreed by the Minister and Contractor. 16.2 Subject to Articles 16.1 and 16.3 the duration of such market development phase shall not exceed seven 7 years from the date of Contractors notice under Article 13.3gi. The market development phase shall end on the first to occur of a the date following that on which the Natural Gas Discovery is declared a Commercial Discovery; b the date that Contractor voluntarily surrenders the market development area; or c seven 7 years after the date of Contractors notice under Article 13.3gi. Contractor shall be deemed to have relinquished all rights to the Natural Gas Discovery if it does not declare the Discovery a Commercial Discovery by the end of the market development phase. 16.3 During the market development phase Contractor shall pay to the Minister at the end of each year of the 69 PRODUCTION SHARING CONTRACT BLOCK . market development phase or upon earlier termination an annual holding fee of Two Million United States Dollars US2000000.00 reduced by duly verified amounts that Contractor has expended during such year under specific programmes approved by the Minister on activities or projects directly attributable to the market development area. Expenditures for the following types of activities will be eligible as credits against the holding fee a further geochemical geophysical or geological surveys in the market development area; b the drilling and testing of any well in the market development area; c consulting feasibility and marketing studies; and d market development for projects approved by the Minister. Amounts expended in a particular year in excess of the holding fee may be carried forward as a credit against the following years holding fees if agreed by the Minister in his approval of the programme under which the expenditure was made. The holding fee shall be applied on a pro rata daily basis in the event Contractor relinquishes the market development area or declares such Natural Gas Discovery to be a Commercial Discovery prior to the end of such year. Where the Minister elects the options stated in 16.4 Article 2.1be and f of Annex D Contractor shall have primary responsibility for identification of a market for all Available Natural Gas from the market development area and the marketing

procedures of Annex D shall apply to such Governments share of Profit Natural Gas. 70

16.5a Where the Minister elects the option stated in PRODUCTION SHARING CONTRACT BLOCK . area Article 2.1a of Annex D Contractor shall have primary responsibility for developing a market for all Available Natural Gas from the market of development arrangements for the sale thereof on a joint dedicated basis at prices and terms common to both the Minister and Contractor. Contractor shall provide of active representatives of the Minister in all such market development activities and related negotiations. participation negotiation for for and the b Where the Minister elects either of the options stated in Articles 2.1c and d of Annex D Contractor shall have primary responsibility for developing a market for all Available Natural Gas from the market development area and for negotiation of arrangements for the sale thereof. c The marketing arrangements for any Natural Gas sales contract pursuant to a and b above shall be subject to approval by the Minister. In applying for such approval Contractor shall demonstrate to the Minister that the price of such Natural Gas at the Measurement Point represents the Fair Market Value obtainable for such Natural Gas. The approval of any export project shall be at the discretion of the Minister. 16.6 Contractor may apply to the Minister for the granting of an additional period to be added to the term of this Contract to facilitate the sale of Natural Gas under a gas sales contract as contemplated under Articles 16.4 and 16.5. The Minister shall subject to the execution of such gas sales contract extend the term of this Contract with respect to the Natural Gas Production Area corresponding to such gas sales contract for a period which will allow for the supply of Natural Gas 71 PRODUCTION SHARING CONTRACT BLOCK . under the terms of the gas sales contract. 16.7 Contractor shall apply to the Minister for such licences as may be required for operations in Trinidad and Tobago beyond the Measurement Point. Costs incurred in this regard shall not be subject to Cost Recovery under this Contract. 16.8 Contractor shall use with priority in Petroleum Operations Associated Natural Gas including use for reinjection for pressure maintenance or recycling operations to effect maximum economic recovery of Crude Oil. The Minister may at any time call upon Contractor 16.9 to deliver to the Minister at the Field separator without compensation any quantity of Natural Gas produced in association with

Crude Oil not being required by Contractor for Petroleum Operations or for sale which may be needed in the public interest provided that delivery with Contractors Petroleum Operations. Government shall at its own cost provide and maintain any facilities beyond the delivery point required in connection with gathering transport processing or utilization of such Associated Natural Gas. unreasonably interfere does not 16.10 Contractor shall minimize flaring of any remaining Associated Natural Gas by reinjecting such Natural Gas into suitable strata or underground storage in accordance with sound and current international Petroleum industry practices. Contractor shall seek the Ministers approval to flare any such Natural Gas which cannot be reinjected due to specific reservoir considerations or for other reasons that are in line with best practice employed in the petroleum industry. The decision to grant or refuse approval shall be at the Ministers sole discretion. Any approval shall be subject 72 PRODUCTION SHARING CONTRACT BLOCK . to terms and conditions to be determined by the Minister in light of the prevailing circumstances. Before flaring Contractor shall take reasonable measures to ensure the extraction of natural gasoline and other liquids contained in the Associated Natural Gas if the Minister and Contractor agree that such extraction is economically justifiable. Notwithstanding anything in this Article to the contrary Associated Natural Gas may be flared at any time if necessary for the conducting of well and production tests and during any emergency. 73 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 17 BOOKS OF ACCOUNT FINANCIAL REPORTING AUDIT AND COST VERIFICATION

17.1 Contractor shall maintain in Trinidad and Tobago in accordance with the Accounting Procedure in Annex C and accepted accounting practices generally used in the international Petroleum industry books of account and such other books and records as may be necessary to show the work performed under the Contract the costs incurred and the quantity and value of all Petroleum produced and saved from the Contract Area and not used in Petroleum Operations. 17.2 Contractor shall prepare for each Calendar Year financial statements including a balance sheet and profit and loss statement reflecting its operations under the Contract. Accounting methods rules and practices applied for determining revenue and expense shall be consistent with sound and current

international Petroleum industry practices and the Laws of Trinidad and Tobago. Each Contractor Party shall also provide the Minister with financial statements for each Calendar Year. Each financial statement shall be certified by an independent certified firm of chartered accountants acceptable to the Minister and shall be submitted along with the auditors report to the Minister and the minister to whom responsibility for matters related to finance is assigned within ninety 90 days after the end of the Calendar Year to which it pertains. 17.3 Contractor shall also provide the Minister with the various other financial reports required by Annex C. 17.4 The Minister and/or the minister to whom responsibility for matters related to finance is assigned 74 PRODUCTION SHARING CONTRACT BLOCK . shall have the right to inspect and audit Contractors books accounts and records relating to Petroleum Operations under the Contract for the purpose of verifying Contractors compliance with the terms and conditions hereof. Upon reasonable advance notice such books accounts and records shall be available in Trinidad and Tobago at all reasonable times for inspection and audit by duly authorized representatives of the Government including independent auditors that may be employed by it. Fiscal audits shall be carried out within the period allowed under the Petroleum Taxes Act Chapter 7504. 17.5 The Minister and/or the minister to whom responsibility for matters related to finance is assigned may require Contractor to engage the auditors of any of the entities comprising Contractor to examine at Contractors cost and in accordance with generally accepted auditing standards the books and records of an Affiliate to verify the accuracy and compliance with the terms of the Contract insofar as a charge from the Affiliate of Contractor or of any entity comprising Contractor is included directly or through Contractor as a reimbursable cost under the Contract. Whenever audit of an Affiliates books is requested the Minister shall specify in writing the item or items for which it requires verification from such independent audit. A copy of the independent auditors findings shall be delivered to the Minister and the minister to whom responsibility for matters related to finance is assigned within thirty 30 days after completion of such audit. 17.6 Subject to the Accounting Procedure and the auditing provisions of the Contract the following procedure shall be implemented with respect to each Calendar Month to verify and establish

promptly Contractors costs that qualify for Cost Recovery under Article 18. 75 PRODUCTION SHARING CONTRACT BLOCK . a Contractor shall submit a statement of expenditure in accordance with the procedure detailed in Annex C to the Minister who shall verify that i claimed costs qualify for Cost Recovery under the terms of the Contract and the Accounting Procedure; and ii the claimed amount of a qualifying cost is based on documentation made correct available at Contractors office in Trinidad and Tobago. b The statement of expenditure shall be deemed approved as submitted if the Minister does not respond within ninety 90 days of receipt. If the Minister takes written exception thereto such written exception shall identify the particular cost or costs being contested and the reason for the query. c Contractor shall submit to the Minister within thirty 30 days after receipt of the Ministers exception notice such additional information in written form as the Minister may require or Contractor considers appropriate to support the correctness and/or recoverability of the contested cost or costs. If Contractor does not make a written submission within such time supporting the charge the cost or costs shall be deemed disallowed for purposes of Cost Recovery. d If additional written information supporting the contested cost or costs is submitted by Contractor within the prescribed period the Minister shall notify Contractor of his decision 76 PRODUCTION SHARING CONTRACT BLOCK . within thirty 30 days after receipt of such information. e If the Minister notifies Contractor that the exception remains the charge shall be deemed disallowed for purposes of Cost Recovery under the Contract subject to the right of Contractor to request within thirty 30 days after the receipt of such notice that the final determination as to recoverability of the disputed cost or costs be made by an expert pursuant to Article 33.8. f Contractor shall promptly correct its books of account to reflect any changes resulting from the cost verification procedure. 17.7 Except as otherwise agreed in writing between the Minister and Contractor all transactions giving rise to revenues costs or expenses which will be credited or charged to the books accounts records and reports prepared maintained or submitted hereunder shall be conducted at ArmsLength or on such a basis as will assure that all such revenues will not be lower and costs or expenses will not be higher than would result from a transaction conducted at

ArmsLength on a competitive basis with third parties. 17.8 a Audit Process All audits by the Minister shall be completed within thirtysix 36 Months after the termination of the Contract Year to which such audits apply. Auditors may examine all books and accounts and records of Contractor for a specific period of time or may examine only a specific aspect of such records. 77 PRODUCTION SHARING CONTRACT BLOCK . The Minister shall give at least thirty 30 days notice to Contractor of its intention to conduct an audit. In carrying out such audit the Minister shall not interfere unreasonably with the conduct of operations under the Contract. The Minister may at its sole discretion engage third parties to assist with or execute any or all aspects of the audit. Contractor necessary facilities for auditors appointed hereunder by the Minister including working space and access to all relevant personnel records files and other materials and the required codes to the management information system. provide shall all 17.8 b Final Statements Subject to any adjustments resulting from such audits or notification of a dispute by the Minister reports and statements shall be considered final and not subject to further audit after the end of the period provided for under Article 17.8a. Notwithstanding any provision herein or in the Contract to the contrary if in a subsequent period an issue or error is identified which relates to another period or to fraud or wilful misconduct alleged to have occurred at any time the Minister shall have the right to reexamine reports and statements otherwise considered final or not previously audited. 17.8 c Audit Resolution Process Within ninety 90 days after the end of audit fieldwork the Minister shall present to Contractor audit exceptions claims and queries. Contractor shall allow or deny in writing all exceptions setting report out a 78 PRODUCTION SHARING CONTRACT BLOCK . claims and queries set out in the report within ninety 90 days of the presentation of the report the Review Period. All denials shall be accompanied by a detailed statement of Contractors reasons and supporting evidence. All exceptions claims or queries that are not denied within the Review Period will be deemed allowed. The Minister and Contractor shall have up to ninety 90 days from the end of the Review Period to reach final resolution on exceptions claims and queries which have been denied. If outstanding exceptions claims and queries are not resolved during this period either Party

may initiate dispute resolution procedures in accordance with Article 33 hereof. 17.8 d Affiliates and Subcontractors Contractor shall be required to include in Contractors contracts with Affiliates and Subcontractors audit and record retention provisions which allow the Minister to audit the books and records of the Affiliates or Subcontractors to the extent that they relate to this Contract and to retain records all in accordance with the requirements of this Accounting Procedure. 17.8 e Audits by Contractor Party If any Contractor Party conducts an audit of the books and records of Operator or any other Contractor Party pertaining to the Contract it shall provide to the Minister a copy of the audit results a report setting out the audit exceptions claims and queries and the manner in which these exceptions claims and queries were finally allowed or denied by Operator. 79 PRODUCTION SHARING CONTRACT BLOCK . 17.8 f Retention Subject to the delivery of books records and documents to the Minister in accordance with the Contract upon termination of the Contract all books records and documents must be maintained by Contractor Contractors Affiliates and Subcontractors and made available for inspection until the later of i seventytwo after termination of each Contract Year; or Months 72 the iiif any cost amount or issue is under dispute the date by which that dispute is resolved. 80 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 18 ALLOCATION OF PRODUCTION RECOVERY OF COSTS AND EXPENSES PRODUCTION SHARING AND RIGHT OF EXPORT 18.1 Contractor shall have the right to use free of charge Petroleum produced from the Contract Area to the extent reasonably required for Petroleum Operations under the Contract. All Available Petroleum shall be measured at the 18.2 applicable Measurement Points and allocated as set forth hereinafter. Test or experimental Production to the extent not required for Petroleum Operations hereunder shall be deemed Profit Petroleum and shall be allocated between the Minister and Contractor in accordance with Article 18.14. 18.3 Contractor and the Minister shall review annually Contractors Production programme from each Production Area having due regard to ensuring compliance with Contractors obligations under Article 10. Contractor shall prepare and provide Minister not 18.4 less than ninety 90 days prior to the beginning of each Calendar Quarter following commencement of Commercial Production a written

forecast setting out the total quantity of Petroleum that it estimates can be produced and saved hereunder during each Month for the next four 4 Calendar Quarters in accordance with prevailing Petroleum industry practice and the Production programme established in accordance with Article 18.3. Contractor shall endeavour to produce each Calendar Month the forecast quantity. 81

PRODUCTION SHARING CONTRACT BLOCK . 18.5 aAll Available Crude Oil shall be transported if applicable to storage tanks constructed maintained and operated at the Measurement Point where it shall be measured for purposes of this Contract and delivered to the Minister and each Contractor Party who shall each take in kind assume risk of loss and separately dispose of their respective entitlement. bPrior to commencement of Commercial Production of Crude Oil from the Contract Area the Minister and Contractor shall agree on a procedure for taking volumes of Crude Oil corresponding to their respective entitlements on a regular basis and in a manner that is appropriate having regard to the respective destinations and uses of the Crude Oil. 18.6 aAll Available Natural Gas shall be measured at the Measurement Point where it shall be valued and delivered to the Minister and each Contractor Party who shall each take in kind assumes risk of loss and separately dispose of their respective entitlement. bAll Available Natural Gas shall be disposed of in accordance with the marketing arrangements developed pursuant to Articles 16.4 and 16.5. Cost Recovery Subject to the Accounting Procedure and the 18.7 auditing provisions of the Contract Contractor shall recover costs and expenses duly verified in accordance with Article 17 of the Contract in respect of the Petroleum Operations hereunder to the extent of and out of eighty per cent 80of all Available Crude Oil andor all Available Natural Gas from the Contract Area hereinafter referred to as Cost Recovery Crude Oil andor Cost Recovery Natural Gas and collectively as Cost Recovery Petroleum. 82

PRODUCTION SHARING CONTRACT BLOCK . 18.8 Subject to Article 18.9 such costs and expenses shall be allocated to the applicable recoverable Crude Oil cost account or recoverable Natural Gas cost account and shall be recovered from the relevant account on a first in first out basis subject to the following a costs incurred in respect of Exploration Operations may be recovered on an expensed basis; b capital costs incurred in respect of

Development and Production Operations may be recovered on an expensed basis commencing in the year in which such expenditure is incurred; c annual operating costs may be recovered in the year in which they are incurred; and d annual administrative overhead costs up to the limits established in Article 21 of the Accounting Procedure may be recovered in the year incurred. 18.9 To the extent that in a Calendar Year the recoverable costs or expenses related to the Contract Area exceed the amount allowable for Cost Recovery Crude Oil or Cost Recovery Natural Gas from the Contract Area for such Calendar Year then the excess shall be carried forward for recovery in the next succeeding Calendar Years until fully recovered but in no case after termination of this Contract. To the extent that the amount of Cost Recovery 18.10 Crude Oil or Cost Recovery Natural Gas received by Contractor from the Contract Area during a Calendar Month is greater or less than the amount Contractor was entitled to receive for that Month an appropriate adjustment shall be made in accordance with internationally accepted accounting principles. 83 PRODUCTION SHARING CONTRACT BLOCK . Profit Petroleum 18.11 The remaining Available Petroleum including any portion of Cost Recovery Crude Oil or Cost Recovery Natural Gas not required to cover costs hereinafter referred to as Profit Crude Oil and/or Profit Natural Gas and collectively as Profit Petroleum shall be allocated between the Government and Contractor. 18.12 Contractors share of Profit Petroleum shall be the remaining portion after deducting the Governments share in accordance with the provisions of Article 18.14. 18.13 Subject only to Article 16.5c and Article 26 Contractor may export any Available Petroleum received by Contractor under Article 18. 18.14 The Governments share of Profit Crude Oil and/or Profit Natural Gas for a Calendar Month from the Contract Area shall be determined separately for Crude Oil and Natural Gas by reference to the applicable price class in the relevant tables detailed hereunder. The relevant price class shall be determined using the value of Profit Crude Oil and Profit Natural Gas calculated in accordance with Article 20 herein. The average daily Production rates referred to in the Production tiers set out in the tables hereunder shall be calculated for each Calendar Month by dividing the respective volumes of Available Crude Oil and Available Natural Gas produced from the Contract Area during that Month

by the number of days in such Month. 84 PRODUCTION SHARING CONTRACT BLOCK .

aGovernments share of Profit Crude Oil per cent The Governments share of Profit Crude Oil shall be determined each Month based on each of the percentages in the table below. The Governments share shall be determined on an incremental basis. Production Tier Crude Oil Price Class A B C D

Production up to 75000 BD Production in excess of 75000 BD and up to 100000 BD Production in excess of 100000 BD and up to 150000 BD Production in excess of 150000 BD and up to 200000 BD Production greater than 200000 BD Where Price Class A refers to Governments share for a Crude Oil price less than or equal to Fifty United States Dollars US\$50.00 per Barrel. Price Class B refers to Governments share for a Crude Oil price greater than Fifty United States Dollars US\$50.00 per Barrel but less than or equal to SeventyFive United States Dollars US\$75.00 per Barrel. 85 PRODUCTION SHARING CONTRACT BLOCK . Price Class C refers to Governments share for a Crude Oil price greater than SeventyFive United States Dollars US\$75.00 per barrel but less than or equal to One Hundred United States Dollars US\$100.00 per Barrel. Price Class D Crude Oil price greater than One Hundred United States Dollars US\$100.00 per Barrel the Governments share of Profit Crude Oil is equal to $BR \cdot 70 \left[\frac{P - US\$100}{P} \right]$ 1BR where BR refers to the Base Rates set out in Price Class D and P is the Crude Oil price. 86 PRODUCTION SHARING CONTRACT BLOCK .

bGovernments share of Profit Natural Gas per cent The Governments share of Profit Natural Gas shall be determined each Month based on each of the percentages in the table below. The Governments share shall be determined on an incremental basis. Production Tier Natural Gas Price Class A B C D

Production up to 200 MMcfd Production in excess Of 200 MMcfd and to 350 MMcfd Production in excess of 350 MMcfd and up to 500 MMcfd Production in excess of 500 MMcfd and up to 750 MMcfd Production in excess of 750 MMcfd and up to 1000 MMcfd Production in excess Of 1000 MMcfd Where Price Class A refers to Governments share for a Natural Gas price less than or equal to Four United States Dollars US\$4.00 per Mcf. 87 PRODUCTION SHARING CONTRACT BLOCK . Price Class B refers to Governments share for a Natural Gas price greater than Four United States Dollars US\$4.00 per Mcf but less than or equal to Six United States Dollars and Fifty

Cents US6.50 per Mcf. Price Class C refers to Governments share for a Natural Gas price greater than Six United States Dollars and Fifty Cents US6.50 per Mcf but less than or equal to Nine United States Dollars US9.00 per Mcf. Price Class D Natural Gas price greater than Nine United States Dollars US9.00 per Mcf the Governments share of Profit Natural Gas is equal to $BR \cdot 70 \cdot [P - US9.00]$ 1BR where BR refers to the Base Rates set out in Price Class D and P is the Natural Gas price. 88

PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 19 MEASUREMENT OF PETROLEUM

All Petroleum produced saved and not used in 19.1 Petroleum Operations shall be measured at the Measurement Points approved in the Development Plan. 19.2 The Measurement Point shall be at the end of the facilities for which the cost is included as a recoverable cost of Petroleum Operations under the Contract. 19.3 The Production shall be measured in accordance with the sound and current practices and standards generally accepted in the international Petroleum industry. All measurement equipment shall be installed maintained and operated by Contractor. The Minister shall have the right to inspect the measuring equipment installed by Contractor and all charts and other measurement or test data at all reasonable times. The accuracy of Contractors measuring equipment shall be verified by tests at regular intervals and upon the request of the Minister using sound and current means and methods generally accepted in the international Petroleum industry. 19.4 Upon discovery of a meter malfunction Contractor shall immediately have the meter repaired adjusted and corrected and following such repairs adjustment or correction shall have it tested or calibrated to establish its accuracy. Upon the discovery of a metering error Contractor shall have the meter tested immediately and shall take the necessary steps to correct any error that may be discovered. 19.5 In the event a measuring error is discovered Contractor shall use its best efforts to determine the correct Production figures for the period during which there was a measuring error and the corrected figures shall be used. In determining the correction Contractor shall use where required the information from other measurements made inside or outside the Production Area. Contractor shall submit for the Ministers approval a report detailing the source and nature of the measuring error and the corrections to be

applied. If it proves impossible to determine when the measuring error first occurred the commencement of the error shall be deemed to be that point in time halfway between the date of the last previous test and the date on which the existence of the measuring error was first discovered. All measurements for all purposes in this 19.6 Contract shall be adjusted to standard conditions of pressure and temperature sixty 60 degrees Fahrenheit and 14.7 p.s.i.a.. 90

PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 20 VALUATION The value of Crude Oil from each Production Area 20.1 shall be the Fair Market Value of such Crude Oil at the Measurement Point. 20.2 The Fair Market Value of Crude Oil shall be determined taking into account the quality volume cost of transportation terms of payment and any other relevant conditions including the then prevailing market conditions for Crude Oil. Where different grades of Crude Oil are being 20.3 produced from the Contract Area the value shall be determined and applied for each grade of such Crude Oil. However in the event that different grades of such Crude Oil are blended together for sale then the value of such a blend shall prevail. 20.4 a Contractor shall present to the Minister within ten 10 days after the end of each Calendar Month during which Crude Oil is produced and measured from a Production Area its proposal as to the Fair Market Value of the particular Crude Oil for the preceding Month. Such proposal shall be accompanied by information supporting Contractors proposal including Free On Board FOB sales prices for the particular Crude Oil and/or comparable crude oils delivered during such preceding Calendar Month by Contractor or other producers from Trinidad and Tobago or other producing countries or from publications evidencing such sale prices. b The proposals shall be deemed approved as submitted under Article 20.4a if the Minister 91 PRODUCTION SHARING CONTRACT BLOCK . fails to respond within thirty 30 days of receipt. c If the Minister takes written exception to Contractors proposal the Minister shall include with such notice a counterproposal for the value of the particular Crude Oil. d If Contractor accepts the Ministers counterproposal or does not take written exception thereto within ten 10 days after receipt the Ministers counterproposal shall be the value for the Calendar Month for which the price is being determined. e If Contractor takes written exception to the Ministers counterproposal

within the prescribed period authorized representatives of the Minister and Contractor shall meet to establish the value for the Calendar Month for which the determination is being made in accordance with the principles outlined under Article 20.5.

20.5 For the resolution of matters pursuant to Article 20.4e the following principles shall apply in determining the value of Crude Oil

a a basket of widely traded reference crude oils similar in quality to the Crude Oil to be valued shall be selected and the international market prices of the crude oils selected shall be used as the base value for the Crude Oil to be valued;

b an appropriate pricesetting market where substantial quantities of the reference crude oils are traded at Arms Length and on an ongoing basis shall be chosen;

92 PRODUCTION SHARING CONTRACT BLOCK . c the Crude Oils to be included in the basket shall be proposed by Contractor as part of the Development Plan under Article 13.7 to be approved by the Minister;

d in the event that one or more of the crude oils comprising an agreed basket no longer meets the requirements of Article 20.5a a replacement crude oil shall be determined by agreement between the Minister and Contractor;

e transportation differential shall be taken into account that is to say the difference between the cost of transporting to the pricesetting market the reference crude oils and the Crude Oil to be valued;

f interest charges on the value of the inventory in transit may be considered in determining transportation costs; and

g other relevant considerations.

The Fair Market Value of Natural Gas determined 20.6 at the Measurement Point shall be the price in United States Dollars at which an independent third party would be prepared to buy at the particular time such Natural Gas on an Arms Length basis taking into account the quality volume cost of transportation terms of payment and any other relevant conditions including the then prevailing market conditions for Natural Gas at the final sales destination and shall be based on the higher of actual realized prices or the prices calculated under the marketing arrangements for Natural Gas approved by the Minister under Article 16.5 for deliveries of Natural Gas during the Calendar Month.

93 PRODUCTION SHARING CONTRACT BLOCK . For Natural Gas sales transactions that are non20.7 Arms Length the following considerations shall apply in determining the value of Natural Gas

a the market destination of the Natural Gas;

b the price of the Natural Gas at the final

destination; c regasification costs; d shipping costs; e liquefaction costs; f pipeline transport costs; g publicly available values outside Trinidad and Tobago; and h other relevant considerations. 20.8 Subject to the provisions of this Article 20 in the event of any dispute between the Minister and Contractor concerning the Fair Market Value of Crude Oil or Fair Market Value of Natural Gas such dispute may be referred by either Party for final determination in accordance with Article 33. 94

PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 21 FINANCIAL OBLIGATIONS

Contractors financial obligations towards the 21.1 Minister which it shall satisfy at its own expense shall consist of the following payments a Minimum payment in respect of each hectare of the Contract Area retained by Contractor from time to time throughout the period of this Contract at the following rates USD per hectare per annum During the 1st Contract Year During the 2nd Contract Year During the 3rd Contract Year During the 4th Contract Year During the 5th Contract Year During the 6th Contract Year 6.00 6.50 7.00 7.50 8.00 8.50 Thereafter minimum payment shall increase annually at a rate of six per cent 6 for the unexpired term of the Contract. Minimum payment shall be payable quarterly in advance within the first ten 10 days of January April July and October. No refund shall become due if before the end of a quarterly period a part of the area has been surrendered. b Annual charges payable within ten 10 days of the Effective Date of this Contract and thereafter within the first ten 10 days of each Contract Year in respect of the following items i An administrative charge of Three Hundred Thousand United States Dollars US300000.00 95

PRODUCTION SHARING CONTRACT BLOCK . during the first year of this Contract increasing annually at a rate of four per cent 4 for the unexpired term of the Contract. No refund shall be due if Contractor ceases operation prior to the end of a Contract Year. ii A training contribution to the University of Trinidad and Tobago and/or the University of the West Indies and/or such institution as the Minister may direct for the financing of training of nationals in appropriate fields of study associated with the energy sector as follows United 1. a payment of One Hundred and Twenty Thousand Dollars US120000.00 for the first year of the Contract and increasing annually at a rate of four per cent 4 until Commercial Discovery; States 2. in the event of a Commercial Discovery the

amount shall increase to One Hundred and Fifty Thousand United States Dollars US150000.00 in the year following Commercial Discovery increasing annually at a rate of four per cent⁴ until Production commences from the first Production Area under the Contract; and 3. where the first Production Area under the Contract has initiated Production the payments under Article 21.1bi shall become one quarter of one per cent 0.25 of the value of Contractors share of Profit Petroleum on a monthly basis.

96 PRODUCTION SHARING CONTRACT BLOCK . iiiA research and development contribution for the financing of Petroleum related research and development activity as follows

United 1. a payment of One Hundred and Twenty Thousand Dollars US120000.00 for the first year of the Contract and increasing annually at a rate of four per cent⁴ until Commercial Discovery; States 2. in the event of a Commercial Discovery the amount shall increase to One Hundred and Fifty Thousand United States Dollars US150000.00 in the year following Commercial Discovery increasing annually at a rate of four per cent⁴ until Production commences from the first Production Area under the Contract; and 3. where the first Production Area under the Contract has initiated Production the payments under Article 21.1biii shall become one quarter of one per cent 0.25 of the value of Contractors share of Profit Petroleum on a monthly basis. c Production bonuses payable on first attainment of a sixty 60 consecutive day average at or in excess of the Production levels detailed hereunder Petroleum production in Barrels per day BOPD Production bonus payments in USD

25000	50000	75000	100000	1500000.00	2000000.00	3000000.00	4000000.00
-------	-------	-------	--------	------------	------------	------------	------------

97 PRODUCTION SHARING CONTRACT BLOCK . thereafter for every 50000 BOPD exceeding 100000 BOPD 1000000.00 In computing the Production levels referred to above Natural Gas Production shall be added to Crude Oil production after converting to Barrels of Crude Oil on an Energy Equivalent Basis. d A technical assistanceequipment bonus of Three Hundred Dollars US300000.00 payable as directed by the Minister either Thousand United States i in cash within ten 10 days of the Effective Date of this Contract; or ii in technical assistance andor equipment to a total delivered cost of Three Hundred Thousand United States Dollars US300000.00. Such technical assistance andor equipment shall be delivered to the Minister within three 3 months of the date that

a list of such technical assistance and/or equipment is agreed between the Minister and Contractor.

e Fund the award of scholarships for the training of nationals of Trinidad and Tobago in appropriate fields of study associated with the energy industry. The value of such funding shall be One Hundred Dollars US\$100,000.00 per annum for the first year of the Contract and increasing annually at a rate of four per cent (4%) for the unexpired term of the Contract.

Thousand United States

21.2 The Contractor shall be subject to and must observe the laws in force from time to time in Trinidad and Tobago and nothing herein contained shall be construed as exempting the Contractor from complying with the laws imposing taxes, duties, levies, fees, royalties, charges or similar impositions or contributions which the Contractor would be liable to pay or may be called upon to pay under such laws by virtue of its conduct of Petroleum Operations hereunder.

21.3 Contractor shall be subject to payment of assessment or contributions assessed on employees by generally applicable law on labour costs. Contractor shall also guarantee the payment of any Trinidad and Tobago income tax due from its foreign employees. The Contractor and its Subcontractors and their respective personnel shall be obliged to pay stamp duties or any such transfer tax as may be in effect from time to time at the rates which are generally applicable to all persons or entities in Trinidad and Tobago. The Minister shall pay on behalf of the Contractor out of the Government's share of Profit Petroleum referred to in Article 18.11 the Contractor's liability under applicable law for royalty, petroleum impost, petroleum profits tax, supplemental petroleum tax, petroleum production levy, green fund levy, unemployment levy and any other taxes or impositions whatsoever measured upon income or profits arising directly from the Petroleum Operations under this Contract.

21.6 The Contractor's taxable income under this Contract shall be gross income as set out under Article 21.8 less the deductions allowed in connection with Petroleum Operations under the tax laws of Trinidad and Tobago including any losses carried forward from previous financial years.

Contractor's Taxable Income.

The Minister shall cause the appropriate tax authority of Trinidad and Tobago to furnish the Contractor with the proper official receipts evidencing such payments. The value of the Petroleum to be used in

98 PRODUCTION SHARING CONTRACT BLOCK

99 PRODUCTION SHARING CONTRACT BLOCK

making the application to the Contractors said liability shall be the same as the value used in the computation of the amount of the income giving rise to such liability. 21.7 Notwithstanding the provisions of Article 21.5 Contractor shall discharge its liability for withholding tax in accordance with applicable law. 21.8 For the purpose of applying Article 21.6 the gross income of the Contractor in respect of any financial year shall be calculated as the total of a the sums received by Contractor from the sale or other disposition of all Petroleum acquired by Contractor pursuant to Article 18; and b an amount equal to Contractors Grossup Value calculated in the manner shown in Annex C Article 13. 21.9 Subject only to Articles 21.1 21.3 21.4 21.7 and 23 and notwithstanding Article 21.2 the Minister shall save the Contractor harmless from all other payments to or levies by the treasury or the Government whether or not existing at the date of this Contract including but not limited to royalty petroleum impost petroleum profits tax supplemental petroleum tax petroleum production levy green fund levy and unemployment levy. 21.10 The Parties agree that for the purposes of determining Contractors Taxable Income in Trinidad and Tobago profits andor losses resulting from Petroleum 100 PRODUCTION SHARING CONTRACT BLOCK . Operations carried out under this Contract shall not at any time be consolidated with profits andor losses resulting from any of the Contractors other operations in Trinidad and Tobago outside the Contract Area. 21.11 The Contractor shall maintain financial books and records with respect to Petroleum Operations in the Contract Area and shall enable authorised persons to inspect and review such books. 101 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 22 PAYMENT AND CURRENCY All payments which the Contract requires Contractor 22.1 to make to the Minister or the Government under this Contract shall be made to the recipient bank account in United States Dollars at a bank designated by the recipient. Contractor may make payment in other currencies if acceptable to the recipient. Conversion of all payments made by Contractor in 22.2 Trinidad and Tobago into United States Dollars or any other currency acceptable to the recipient shall be effected at the generally prevailing rate of exchange at the time of payment. 22.3 All payments due to Contractor from Minister shall be made in United States Dollars or any other currency acceptable to Contractor at a

bank to be designated by Contractor. 22.4 Contractor shall have the right to receive retain abroad and use without restriction the entirety of proceeds received from its sales of its share of Petroleum from the Contract Area subject to Contractor satisfying completely its then accrued financial obligations under this Contract. Contractor shall during the term of the Contract 22.5 have the right without the imposition of any control except as otherwise imposed by the terms of the Contract to make any payments and to maintain and operate bank accounts outside Trinidad and Tobago in whatsoever currency. Contractor may also operate and maintain United States Dollar or other foreign currency bank accounts within Trinidad and Tobago subject to applicable law. 102

PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 23 MATERIALS AND EQUIPMENT

IMPORT DUTIES Contractor equipment 23.1 machinery tools spare parts and any other goods of a similar nature Materials required for Petroleum Operations under this Contract. provide shall all 23.2

Such Materials shall be provided by Contractor in accordance with Work Programmes and budgets under Articles 14 and 15 and shall be acquired pursuant to procurement procedures specified by Contractor under Article 1.7 of the Accounting Procedure. 23.3 Contractor shall give preference to the use of locally manufactured or locally available Materials when such are comparable with the competing imported Material in quality and availability and the price thereof does not exceed the c.i.f. price including import duties where applicable of the imported Material delivered to the Contract Area. In this regard Contractor shall maintain records and accounts and provide reports in accordance with the provisions of Article 12 of the Accounting Procedure. 23.4 Subject to Article

23.3 Contractor shall have the right to import any Materials required for Petroleum Operations. In this regard Contractor shall comply with generally applicable importation formalities and pay import and excise duties to the extent not exempt therefrom by generally applicable law. 103

PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 24 OWNERSHIP OF ASSETS Subject

to Article 24.3 ownership of any asset 24.1 whether fixed or moveable acquired and owned by Contractor in connection with Petroleum Operations hereunder shall pass to the Minister without consideration when the part of the Contract Area in which the asset is located is relinquished or at

the end of the term of this Contract whichever first occurs except in cases where the Minister notifies Contractor that he does not accept the particular asset. Where the ownership of any asset passes to the Minister from the date of such transfer Contractor shall have no further rights in and shall be released from all responsibility and liability for the asset unless it can be proven that liability arises from a defect that existed at the date of the passing of such ownership. Where the Minister elects not to take a particular asset Contractor shall carry out the approved abandonment programme under Article 37 and shall be free to dispose of the asset in accordance with applicable law. Where Production from a Production Area is 24.2 possible beyond the term of the Contract and any extensions granted in respect thereof Contractor shall hand over to the Minister without consideration such Production Area and all facilities required for carrying out existing operations in good working order normal wear and tear excepted. Upon the transfer of said Production Area and related facilities the Minister shall assume all responsibility for the facilities and their abandonment and hold Contractor harmless against any liability with respect thereto accruing after the date of such transfer to the Minister. 24.3 Subject to Article 24.2 whenever Contractor 104 PRODUCTION SHARING CONTRACT BLOCK . relinquishes any part of the Contract Area all moveable property located within the part of the Contract Area so relinquished may be removed to any part of the Contract Area that has been retained. 24.4 The provisions of Articles 24.1 and 24.2 shall not apply to Materials facilities or other property that are rented or leased to Contractor or which belong to employees of Contractor provided that the ownership of any such item by other than Contractor is clearly documented with the Minister at the time of entry into Trinidad and Tobago or of local acquisition. 24.5 In the event Contractor desires to move property located on the Contract Area but no longer used in Petroleum Operations to another location within Trinidad and Tobago for further use prior approval of the Minister shall be required. Upon receipt of such approval Contractor shall pay to the Minister either a an amount equal to a transfer price mutually agreed upon by the Parties; or b if no price is agreed and Contractor still desires to move the property as provided herein an amount equal to the percentage of the cost of such property that has been costrecovered under this

Contract as of the date such property is moved multiplied by the depreciated value of the property with applicable law. determined accordance in 24.6 In the event Contractor desires to use property located within the Contract Area for Petroleum Operations not related to the Contract Area the prior approval of the Minister shall be required. The terms and conditions under which the facilities shall be used for such purpose shall be subject to the approval of the Minister. 105 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 25 SUBCONTRACTORS PERSONNEL AND TRAINING Contractor has the right to use qualified 25.1 Subcontractors to provide specialized equipment or services. 25.2 Contractor shall provide Local Enterprises opportunities in competition with foreign entities to provide any services or equipment required in connection with Petroleum Operations. The procurement procedures submitted pursuant to Article 1.7 of the Accounting Procedure shall contain appropriate measures in accordance with the provisions of Article 39 to ensure Contractors compliance in this regard. Contractor shall give preference to Local Enterprises as Subcontractors where bids placed by such are competitive with foreign bids in skills resources availability and price and meet the technical and financial requirements of Contractor. 25.3 Prior to the commencement of any contract Contractor shall provide the Minister with all necessary information covering each Subcontractor including upon the Ministers request an executed copy of any contract and related agreements and changes thereto. Contractor undertakes to employ and ensure that 25.4 its Subcontractors employ with priority nationals of Trinidad and Tobago in all aspects of Petroleum Operations to the extent that these nationals with the requisite qualifications and experience can be found. Contractor shall minimize and ensure that its 25.5 Subcontractors minimize the employment of foreign personnel but may subject to the provisions of this Contract and applicable law employ foreign nationals 106 PRODUCTION SHARING CONTRACT BLOCK . a to the extent that qualified nationals cannot be found to fill the positions required; b to fill a limited number of specialist technical or managerial positions provided that there are clearly national understudies comprehensive programmes for their development in accordance with the provisions of Article 25.6; and counterpart identified together with c to provide shortterm specialist expertise.

Contractor shall undertake the development and 25.6 training of nationals including training for the specific purpose of taking over positions held by expatriate personnel for all positions including administrative technical and executive management positions. Contractor shall together with its annual Work Programme and budget prepare and submit annually to Minister for approval programmes for such development and training. Contractor shall include a status report on these programmes with its submission of the quarterly status report required under Articles 14.1b and 15.6. 25.7 Contractor shall at its own expense as part of Petroleum Operations provide a reasonable number of personnel of the Ministry with onthejob training and where appropriate and practicable with overseas training based on a mutually agreed programme. Onthejob of representatives of Minister on project teams responsible for various aspects of Petroleum Operations under this Contract. inclusion training involve shall the 25.8 Contractor shall also submit to the Minister together with its submission of the annual Work Programme and budget the details of all the payments benefits and privileges accorded for each classified category of Contractors personnel both expatriate and local. 107 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 26 STATES RIGHT OF REQUISITION In case of war or imminent expectation of war or 26.1 grave national emergency as provided for in Section 36 of the Act the President may requisition all or a part of the Petroleum Production from the Contract Area and require Contractor to increase such Production to the extent required. In such event the price to be paid by the President for the Petroleum shall be the value determined in accordance with Article 20 of the Contract and payment shall be made within thirty 30 days after delivery in US Dollars at a bank outside of Trinidad and Tobago designated by Contractor. 26.2 In the event of any requisition as provided above the President shall indemnify Contractor in full for the period during which the requisition is maintained including all reasonable damages if any which result from such requisition. 108 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 27 UNITIZATION If a Petroleum Discovery in the Contract Area 27.1 extends beyond the boundaries of the Contract Area Minister may require that the Development of the Discovery and the Production of Petroleum therefrom be carried out in

collaboration with the entity or entities that have the right to conduct Petroleum Operations in the areas into which the Discovery extends. 27.2 In such case a collective proposal for common Development and Production of the deposit of Petroleum shall be proposed by Contractor and such other entity or entities for approval by the Minister. If such proposal is not approved the Minister may prepare or cause to be prepared for the account of Contractor and the other entities involved a reasonable plan for common Development and Production. Where one or more of the entities object to the 27.3 programme prepared by the Minister under Article 27.2 it or they may within twentyeight 28 days of receipt of the programme submit the matter for determination in accordance with Article 33.

109 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 28 CONFIDENTIALITY Any and all data reports samples information 28.1 interpretation of such data and all other information or work product pertaining to the Contract Area including in particular all data for which the cost was recorded by Contractor as a cost of Petroleum Operations shall be the property of the State. Except as provided in Articles 28.3 28.4 and 28.5 all data shall be maintained by the Parties as strictly confidential and shall not be divulged by either Party during the term of the Contract without prior written consent of the other Party except to the extent required to comply with applicable law unless such data become part of the public domain. 28.2 Such confidentiality undertaking shall continue to apply to Contractor for a period of five 5 years after the termination of the Contract. Contractor shall not trade sell or publish data pertaining to the Contract Area at any time without the prior written consent of the Minister. A Party may disclose such information to its 28.3 employees Affiliates consultants banks financial institutions auditors Subcontractors and prospective assignees to the extent required for the efficient conduct of Petroleum Operations. Prior to making any such disclosures to its consultants banks financial institutions auditors Subcontractors or prospective assignees such Party shall obtain from such individuals or entities a written confidentiality undertaking to keep the data and information strictly confidential. Contractor may also upon written notice to the Minister make such disclosures as may be required by applicable law or the rules of a recognized stock exchange and such notice shall include copies of the information to be 110

PRODUCTION SHARING CONTRACT BLOCK . disclosed. 28.4 a All data furnished under this Contract shall subject to the exemptions in Article 28.4b below be treated as strictly confidential for the term of this Contract or any extension or renewal hereof except that the Minister and Contractor shall have the right to use such data for the purpose of any arbitration or litigation between the Minister and Contractor. bi Data related to Petroleum Operations in areas which have been relinquished by Contractor may be released by the Minister immediately on relinquishment. ii Data related to the Petroleum Operations in areas not relinquished in accordance with the terms of this Contract may be released by the Minister at the end of the first phase of the Contract as specified in Article 4.1 or one 1 year after acquisition whichever period is later. The Minister shall be entitled at any time to 28.5 prepare and publish reports or studies using information derived from any information or data related to the Contract Area. 111 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 29 PIPELINES Sections 26 and 27 of the Petroleum Regulations 29.1 shall apply to any pipeline outside of the Contract Area but which is included as a part of Petroleum Operations hereunder. 29.2 In the event of usage of such pipeline by third parties the tariff collected by Contractor shall be credited to the Cost Recovery account. In consultation with the Minister such tariff shall be negotiated by Contractor at the time of usage. 112 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 30 INSURANCE Contractor shall provide all insurance required 30.1 by applicable law and such other insurance as may be agreed with the Minister from time to time in conformity with generally accepted practices in the international Petroleum industry. Contractor shall insure with a reputable insurance company that shall repay claims in convertible currency. 30.2 All such policies of insurance with respect to the operations of Contractor shall name the Minister as an additional named insured or loss payee and shall contain an express waiver of subrogation against the Government and the Minister. 30.3 Minister with copies of all policies of insurance. Contractor shall upon request provide the Contractor shall actively pursue any claims 30.4 against insurers. Any amount received from insurance settlements shall be applied and accounted for in accordance with the Accounting Procedure. 30.5 Contractor shall not selfinsure or

insure through Affiliates without the specific prior approval of the Minister. 30.6 Contractor may utilize its normal worldwide insurance programmes and coverage to satisfy these insurance requirements with the prior approval of the Minister.

113 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 31 ASSIGNMENT AND TRANSFER Any entity or entities comprising Contractor may 31.1 with prior approval of the Minister assign or Transfer all or an undivided percentage interest in its rights and obligations under the Contract to any of its Affiliates provided that a such entity demonstrates to the Ministers satisfaction that the Affiliate to which the assignment or Transfer is proposed to be made is as qualified as the assignor or transferor with respect to its technical and financial competence; b such entity at the time of such notice provides the Minister with an undertaking from the financially technically and legally competent ultimate parent company of the Affiliate to which the assignment or Transfer is proposed to be made like that which is required by Article 8.5; c the instrument of assignment or Transfer states precisely that the assignee or Transferee is bound by all covenants contained in the Contract; and d the assignor or transferor submits a valuation and all material terms of the assignment. 31.2 Subject to the prior written approval of the Minister any of the entities comprising Contractor may assign all or an undivided percentage interest in its rights and obligations under the Contract to a third party that is not an Affiliate of Contractor. For 114 consideration to be given to any such request PRODUCTION SHARING CONTRACT BLOCK . a all accrued obligations of the assignor derived from the Contract must have been duly fulfilled as of the date such request is made or assignor and assignee must jointly and severally guarantee fulfilment of any unfulfilled accrued obligations of assignor; b the proposed assignee or assignees must produce reasonable evidence to the Minister of its or their financial and technical competence; c the instruments of assignment shall be submitted to the Minister for scrutiny and approval and shall include provisions stating precisely that the assignee is bound by all covenants contained in the Contract; and d the assignor submits a valuation and all material terms of the assignment. 31.3 No assignment shall in any way absolve the assignor from the obligations undertaken by it under the Contract except to the extent such obligations are in fact

performed by the assignee. 31.4 Any entity or entities comprising Contractor shall apply for consent at least ninety 90 calendar days before the proposed effective date of the Transfer; which application shall include evidence to the Minister of the financial and technical competence of the Transferee together with a valuation and all material terms of the Transfer. 31.5 Each assignee or Transferee shall within thirty 30 days after the effective date of the assignment or Transfer comply with the requirements of Articles 10.1 115 PRODUCTION SHARING CONTRACT BLOCK . and 10.2. 31.6 For each assignment or Transfer made by any entity or entities comprising Contractor the following rates shall apply to the amounts or value of the consideration a For every dollar of the first One Hundred Million United States Dollars US100000000.00 1 b For every dollar of the next One Hundred Million United States Dollars US100000000.00 1.5 c For every dollar thereafter 2 The Minister reserves the right to waive this payment or any part thereof. 31.7 The Minister reserves the right to employ the services of an independent consultant at the cost of Contractor or any of the entities comprising Contractor to be mutually agreed by the Minister and such entity to carry out an independent valuation of the transaction. The final determination of the valuation shall remain with the Minister and will be subject to the applicable rates stated in Article 31.6 above. 31.8 No assignment or Transfer amount payable under Article 31.6 shall be chargeable on any assignment or Transfer made under this Article 31 where stamp duty on such assignment or Transfer is paid by any entity comprising Contractor. If an amount which has been paid on an assignment or Transfer subsequently becomes subject to stamp duty such amount shall be refunded. 31.9 Should an assignment or Transfer referred to under this Article occur without such entity first obtaining the required consent of the Minister it may result in the forfeiture of this Contract at the sole discretion of the Minister. 116 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 32 APPLICABLE LAW The validity interpretation and implementation 32.1 of this Contract shall be governed by the Laws of the Republic of Trinidad and Tobago. 117 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 33 CONSULTATION EXPERT DETERMINATION AND ARBITRATION 33.1 The Parties shall apply their best efforts to settle amicably through consultation any dispute arising in connection

with the performance or interpretation of any provision hereof. 33.2 If any dispute referred to under this Article has not been settled through such consultation within ninety 90 days after the dispute arises either Party may by written notice to the other Party propose that the dispute be referred either for determination by a sole expert or to arbitration in accordance with the provisions of this Article. Following the submission of written notice under 33.3 Article 33.2 the Parties may by mutual agreement refer the dispute for determination by a sole expert to be appointed by agreement between the Parties. Such sole expert shall be an internationally recognized specialist in the interpretation of the subject under dispute. If the Parties are unable to agree on designation of the expert within thirty 30 days following the submission of written notice under Article 33.2 the expert shall be named by an internationally recognized organisation to be agreed to by the Parties. 33.4 As an alternative to the procedure described in Article 33.3 and if agreed upon by the Parties such dispute shall be referred to arbitration by an agreed sole arbitrator. 33.5 a If the Parties fail to refer such dispute to a sole expert under Article 33.3 or to a sole arbitrator under Article 33.4 within sixty 60 118 PRODUCTION SHARING CONTRACT BLOCK . days of the submission of notice under Article 33.2 the dispute shall be referred to arbitration. The arbitration shall be conducted by three 3 arbitrators in accordance with the Arbitration Rules of the United Nations Commission on International Trade Law UNCITRAL Rules in effect on the Effective Date of the Contract. b Where arbitration is resorted to either by the sole arbitrator under Article 33.4 or arbitral tribunal the UNCITRAL Rules in effect on the Effective Date of the Contract shall be used. The English language shall be the language used 33.6 in the expert or arbitral proceedings. All hearing materials statements of claim or defence award and the reasons supporting them shall be in English. 33.7 arbitration shall be in Trinidad and Tobago. The place of the expert determination or 33.8 In the case of a request by Contractor pursuant to Article 17.6 e for final determination by an expert of whether a disputed charge is subject to Cost Recovery such expert shall be an internationally recognized specialist in interpretation of Petroleum contracts with experience in verifying costs of Petroleum Operations. If the Parties are unable to agree on designation of the expert within thirty 30

days after Contractors request under Article 17.6 e for the expert determination the expert shall be named by the International Chamber of Commerce. The ninety 90 day period required by Article 33.2 shall not apply to this type of expert determination. 33.9 a Any decision by the expert sole arbitrator or arbitral tribunal shall be final and binding upon 119 PRODUCTION SHARING CONTRACT BLOCK . the Parties. Such decision shall be rendered within sixty 60 days after the completion of the arbitration proceedings. determination expert or b Judgment for execution of any award rendered by the expert determination sole arbitrator or arbitral tribunal may be entered by any court of competent jurisdiction without review of the merits of such award. 120 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 34 FORCE MAJEURE No delay default failure or omission by either 34.1 Party in the performance of any obligation under this Contract shall be considered as a breach of the Contract if such delay default failure or omission is due to Force Majeure. The Party claiming Force Majeure shall notify the other in writing as soon as possible and take all reasonable and necessary measures to resume full execution of performance hereunder as soon as possible. Notwithstanding anything in Article 34.1 and 34.2 without prejudice to the generality thereof the following events or circumstances shall not be treated as being Force Majeure or caused thereby a failure by either Party to pay money when due or fulfil any financial obligation under this Contract; b the insolvency of Contractor or any entity constituting Contractor. 34.3 If the Petroleum Operations are partially or totally suspended as a result of Force Majeure this Contract shall be extended by a period corresponding to the duration of the Force Majeure event provided however that any such extension shall not exceed three 3 years unless otherwise agreed by the Parties. 34.4 Contractor may terminate this Contract upon a three 3 month written notice to the Minister if the fulfilment of the obligation of either Party under this Contract is affected by Force Majeure during the Exploration Period or any extension thereof for a continuous period exceeding 121 PRODUCTION SHARING CONTRACT BLOCK . three 3 years without further obligation and liabilities of any kind. 122 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 35 NOTICES Any notice report and other communications 35.1 required or given under this Contract shall be

deemed given when delivered in writing either by hand in person or through the registered mail courier service or fax transmission appropriately addressed as follows TO MINISTER i By Hand or Mail Ministry of Energy and Energy Affairs Level 26 Tower C Energy Trinidad and Tobago International Waterfront Centre 1 Wrightson Road Port of Spain Trinidad and Tobago Attn Permanent Secretary Telefax No. 868 625 0306 TO CONTRACTOR i By Hand or mail Port of Spain Trinidad and Tobago Attn 123 PRODUCTION SHARING CONTRACT BLOCK . Telefax No. 868

35.2 Each of the Parties may change its address or addresses or representative for purpose of receiving notices by giving at least ten 10 days prior written notice of the change to the other Party.

124 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 36 TERMINATION The Minister shall have the right to terminate 36.1 the Contract and to take without consideration all property of whatever nature belonging to Contractor in Trinidad and Tobago related to the Contract Area if Contractor fails a to fulfil the obligations provided for in Articles 7 or 14 hereof; or b to conform to the provision of an arbitration award or expert determination under Article 33 hereof. 36.2 Contractor shall have the right to terminate this Contract by electing to relinquish the entire Contract Area pursuant to the conditions specified in Article 5. Upon such election any guarantees provided with respect to Contractors obligations shall automatically terminate except with regard to any accrued but unfulfilled obligations existing as of the date of termination. 36.3 If either Party to the Contract commits a material breach of Contract the other Party shall have the right to terminate the Contract using the following procedure a the Party claiming the right to terminate shall give notice to the other Party specifying the particular material breach complained of and requiring the other Party within ninety 90 days of such notice to remedy the same or make reasonable compensation to the complaining Party as the case may be; and 125 PRODUCTION SHARING CONTRACT BLOCK . b if the Party receiving the notice fails to comply with said notice the complaining Party may after the expiration of the ninety 90 days notice forthwith terminate this Contract provided that in the event the issue of whether there has been a material breach has been referred to arbitration or expert determination under Article 33 the complaining Party may not exercise its power of termination until

the result of arbitration or expert determination is known. The Party which elects to refer the dispute to arbitration or expert determination must be diligent in pursuing its claim in such proceedings. Failure to pursue such claim diligently will entitle the complaining Party to exercise its right to terminate in spite of the referral to arbitration or expert determination. Contractor shall have the right to terminate this 36.4 Contract in accordance with the provisions of Article 34.4. 36.5 This Contract may be terminated prior to the end of the Contract term by express agreement of the Parties or in accordance with the provisions of Article 4.2. 36.6 Upon the termination of this Contract by either Party all rights granted to Contractor and all obligations imposed on Contractor hereunder shall terminate subject and without prejudice to any rights which may have accrued to the Minister or to Contractor under this Contract.

126 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 37

ABANDONMENT PROGRAMME BUDGET AND ESCROW ACCOUNT Within sixty 60 days after cessation of 37.1 Production or the sooner relinquishment of some or all of the Contract Area Contractor shall carry out to the Ministers satisfaction an abandonment programme agreed with the Minister for all installations and pipelines provided by Contractor under this Contract that the Minister elects not to have delivered up to him in accordance with Article 24.1. With respect to the area being relinquished and/or facilities thereon such abandonment programme shall comply with sound and current international Petroleum industry practices. 37.2 Contractor shall establish an interest bearing escrow account in the name of the Minister at a financial institution approved by the Minister to accumulate cash reserves for use to fund against possible pollution and eventual abandonment of wells and decommissioning of facilities related to Petroleum Operations in the Contract Area. Contractor shall pay twenty five 25 cents in 37.3 the currency of the United States of America per Barrel of oil equivalent produced into said escrow account. All amounts paid into such escrow account by the Contractor shall be cost recoverable subject to the Accounting Procedure and the auditing provisions of the Contract. The Minister may at his sole discretion access 37.4 funds from the escrow account in the event that Contractor i fails to effect environmental cleanup during the term of this Contract or ii fails to properly abandon wells or decommission facilities to the satisfaction

of the Minister upon termination of this Contract. Where the Minister accesses the escrow account

127 PRODUCTION SHARING CONTRACT BLOCK . as aforementioned Contractor shall be required to pay into the account the sum used for said purposes within sixty 60 days. 37.5 of Not later than five 5 years before the earlier a the scheduled expiry of the term of the Contract; or b Contractors of Production of a Field or of operation of a pipeline anticipated termination Contractor shall submit for the Ministers approval a proposed abandonment programme and budget covering all such installations and pipelines provided by Contractor under this Contract. 37.6 The Minister shall act without unreasonable delay in reaching a decision on Contractors proposal under Article 37.5 and may approve or modify or impose conditions thereon. Before modifying or imposing conditions on the proposal the Minister shall notify Contractor of the proposed modification or conditions and give Contractor the opportunity to make written representations within sixty 60 days thereafter about the proposed modifications or conditions. After taking into consideration such representations the Minister and Contractor shall make their best efforts to mutually agree on the proposed modifications or conditions of the abandonment programme and budget. In the event that the Minister and Contractor cannot mutually agree on the proposed abandonment programme and budget either Party may by written notice to the other Party propose that the dispute be referred for determination in accordance with the provisions of Article 33. Until such time that the determination has been made Contractor shall make 128 PRODUCTION SHARING CONTRACT BLOCK . payments into the escrow account referred to in Article 37.2 based on its proposed abandonment programme and budget. After the determination is made Contractor shall adjust the payments to such escrow account to reflect the abandonment programme and budget so determined. 37.7 In the event that Contractor does not present a timely proposal to the Minister under Article 37.5 the Minister after giving thirty 30 days notice to Contractor of his intention to do so may prepare an abandonment programme and budget for the Contract Area if Contractor does not present a proposal by the end of the thirty 30 day period. When the Minister has so prepared the abandonment programme and budget it shall have the same effect as if it had been submitted by

Contractor and approved by the Minister. 37.8 The approved budget for carrying out the approved abandonment programme shall be provided for by monies paid into the escrow account established under Article 37.2. In addition to the payments made under Articles 37.3 and 37.4 Contractor shall also pay into the account a per unit of Production assessment. If the approved budget is more than the value of the escrow account Contractor shall pay the difference based on a per unit of Production assessment. The assessment shall be calculated dividing the difference between the approved budget and the value in the escrow account by the estimated units of Production to be produced and saved by Contractor between the date of the Ministers approval and the anticipated date of the abandonment. 37.9 a Upon determination of the Contract where Contractor fulfils all obligations in respect of environmental remediation abandonment of wells and decommissioning of facilities to the satisfaction of the Minister all existing funds in the escrow account shall remain with the 129 PRODUCTION SHARING CONTRACT BLOCK . Minister. b If the escrow amount is insufficient to complete the approved programme Contractor shall pay all such additional required costs. c In the event the Minister elects to have the facility delivered up to him the escrow account shall be transferred to the Minister who shall assume all responsibility for the facility and its abandonment and hold Contractor harmless against any liability with respect thereto accruing after the date of such transfer to the Minister. 130 PRODUCTION SHARING CONTRACT BLOCK .

ARTICLE 38 THE PETROLEUM ACT AND REGULATIONS Pursuant to Section 64 of the Act the Parties 38.1 have agreed that this Contract sets out comprehensively the rights and obligations of the Parties with regard to matters otherwise covered by the Act and the Petroleum Regulations provided that any provisions regarding safety incorporated in the Regulations Rules and/or Orders as the Minister may issue from time to time shall apply to Contractor. 38.2 So much only of the Act and the Regulations as are not excluded by the Contract shall apply to Contractor and where any provision of the Act or the Regulations is modified by this Contract for the purposes of this Contract the Act and the Regulations shall be read and construed accordingly and where there is any conflict or variance with reference to any matter between the provisions of this Contract and the Act or the

Regulations the provisions of this Contract shall prevail. 131 PRODUCTION SHARING CONTRACT BLOCK . ARTICLE 39 LOCAL Contractor shall comply with the Governments 39.1 Local Policy in force and as modified from time to time. 39.2 Contractor shall maximize to the satisfaction of the Minister the level of usage of Local Goods and Local Services businesses financing and the employment of nationals of the Republic of Trinidad and Tobago. 39.3 Contractor shall ensure that subcontracts are sized as far as it is economically feasible and practical to match the capability time finance and manpower of Local Enterprises and shall manage the risk to allow their participation. 39.4 Contractor shall provide to the Minister together with the annual Work Programme and budgets required under Articles 14 and 15 a list of all projects to be undertaken as well as all goods and services that are required for the conduct of Petroleum Operations. The Minister and Contractor shall agree on a list of those projects and goods and services which shall be published in at least two local newspapers and on the Ministrys website. 39.5 All tenders are to be advertised evaluated and awarded in Trinidad and Tobago. Contractor shall apply to the Minister for prior approval where the circumstances warrant that any part of the tender process be conducted outside of Trinidad and Tobago. 39.6 Contractor shall give equal treatment to Local Enterprises by ensuring access to all tender invitations and by including high weighting on local value added in 132 PRODUCTION SHARING CONTRACT BLOCK . the tender evaluation criteria. 39.7 Contractor shall give assurance to Local Enterprises in respect of prompt payment for goods and services actually provided to Contractor and its Subcontractors both foreign and local. Contractor shall ensure the development of people 39.8 by imparting to nationals technology and business expertise in all areas of energy sector activity including but not limited to i fabrication; ii information technology support including seismic data acquisition processing and interpretation support; iii operations and maintenance support; iv maritime services; v business support services including accounting human resource services contract consulting negotiations; marketing and vi financing; and vii trading. Contractor shall ensure that nationals are 39.9 selected and trained consistent with Contractors performance standards in relation to activities referred at Article 39.8. 39.10 In addition to the requirements in

Article 39.8 Contractor shall ensure that the development of people in 133 PRODUCTION SHARING CONTRACT BLOCK . key areas allows nationals to take more valueadded analytical and decisionmaking roles in areas of a a technical or professional nature including general management design engineering project management seismic data processing human resource development legal; and b business strategic skills including leadership business development executive management commercial analytical negotiating strategy development and trading knowhow and acumen. 39.11 In accordance with its obligations under Article 10.4 Contractor shall maintain records to facilitate the determination of the Local of expenditure incurred in respect of Petroleum Operations. These records shall include supporting documentation certifying the cost of Local Goods labour and Local Services used and shall be subject to audit by the Minister. Pursuant to Article 12 of Annex C Contractor 39.12 shall prepare and submit reports to the Minister in accordance with the specified timeframe. 134 PRODUCTION SHARING CONTRACT BLOCK .

The contractor appoints and authorises ConocoPhillips 9112 Pty Ltd being one of the

contracting corporations to be the contract operator who on behalf of the contractor shall be responsible to the Designated Authority for the execution of petroleum activities in accordance with the provisions of this contract and is hereby appointed and constituted as the exclusive corporation to conduct petroleum activities. The contractor shall provide all human financial and technical resources required for the performance of petroleum activities authorised by this contract and shall therefore have an economic interest in the development of the petroleum pools in the contract area and be entitled to share in petroleum produced from the contract area in accordance with the provisions of Section 7 of this contract. Except for expenditures on capital costs for the development of petroleum pools the 1.2 contractor shall not incur interest expenses to finance petroleum activities.

DEFINITIONS 1.3 Words and terms used in this contract shall have the same meaning as those defined in the Treaty including the Petroleum Mining Code as referred to in Article 7b to the Treaty except where a new definition is expressly provided for in this contract.

affiliated corporation or affiliate means a corporation or other entity that controls or is controlled by a Party to this contract it being understood that control shall mean ownership by one corporation or entity of at least fifty 50 per cent of i ii the voting stock if the other corporation is a corporation issuing stock; or the controlling rights or interests if the other entity is not a corporation.

barrel means a quantity or unit of oil having a volume of fortytwo 42 United States gallons at the temperature of sixty 60 degrees Fahrenheit.

contract area means the area not relinquished or surrendered constituted by the blocks which are the subject of this contract and which are specified in Appendices A and B of this contract.

Date 2nd April 2003 1230PM 3 **contract year** appearing before or in relation to a calendar year means the period commencing on 7 February of that calendar year and ending on 6 February of the following calendar year except that when appearing before or in relation to the calendar year 2002 it means the period commencing on 20 May 2002 and ending 6 February 2003.

crude oil means crude mineral oil and all liquid hydrocarbons in their natural state or obtained from natural gas by condensation or extraction.

the proposed petroleum reservoir development plan means a description of development and management program details of the production facilities the production profile

for the expected life of the project the estimated capital and noncapital expenditure covering the feasibility fabrication installation and preproduction stages of the project and an evaluation of the commerciality of the development of the petroleum from within a discovery area. and appraisal exploration the exploration geological play concepts for the extent to which the leads and prospects are identified in and the data reviews seismic surveys and exploration wells planned for the contract area. a brief description of strategy means first tranche petroleum means the quantity of petroleum production defined in subsection 9 of Section 7. force majeure means circumstances beyond the control and without the fault or negligence of the contract operator and the Designated Authority including but not restricted to acts of God or the public enemy perils of navigation fire hostilities war declared or undeclared blockade labor disturbances strikes riots insurrections civil commotion quarantine restrictions epidemics storms earthquakes or acent. natural gas means all gaseous hydrocarbons including wet mineral gas dry mineral gas casinghead gas and residue gas remaining after the extraction of liquid hydrocarbons from wet gas. previous contract means contract numbered 9112 as mentioned in the Recitals.

SECTION 2 TERM OF THIS CONTRACT

2.1 Subject to the provisions of this Section and Section 13 the term of this contract shall commence on the effective date of the Treaty being 20 May 2002 the effective date and shall expire on the last moment of 6 February 2022 the expiration date. Notwithstanding the foregoing all work programmes expenditures and approvals including but not limited to decisions notices returns and audits related thereto and all correspondence written or oral results and submissions in support of such work programmes expenditures approvals decisions notices returns and audits under the previous contract shall be deemed to have occurred under this contract and the contractor shall be entitled to rely upon such. Information supplied by the Contractor under the previous contract is deemed to have been supplied under this contract. Date 2nd April 2003 1230PM 4 [2.2 paragraph deliberately omitted] [2.3 paragraph deliberately omitted] If petroleum is discovered in any block or blocks of the contract area which the 2.4 Designated Authority and the contract operator agree can be produced commercially based on the consideration of all pertinent operating and financial data then as to that particular

block or blocks of the contract area the Designated Authority shall declare a discovery area and the contract operator shall commence development. In other blocks in the contract area the contract operator shall continue exploration. 2.5 If petroleum production has not ceased permanently in and from the contract area by the expiration date the Designated Authority shall give sympathetic consideration to extending the term of this contract until production ceases permanently. In the case of a natural gas project the contract term shall be automatically extended to the end of the term of the natural gas sales contract. 2.6 If petroleum production has ceased permanently in and from the contract area before the expiration date then this contract shall be terminated upon the permanent cessation of production. SECTION 3 RELINQUISHMENT OF BLOCKS [3.1 paragraph deliberately omitted] [3.2 paragraph deliberately omitted] [3.3 paragraph deliberately omitted] [3.4 paragraph deliberately omitted] 3.5 Upon thirty 30 days written notice to the Designated Authority prior to the end of any contract year the contract operator shall have the right to surrender some but not all of the blocks in the contract area provided the conditions of the contract have been met to the satisfaction of the Designated Authority. 3.6 The contract operator shall advise the Designated Authority in advance of the date of relinquishment of the blocks to be relinquished. For the purpose of relinquishments the contract operator and the Designated Authority shall consult with each other regarding which blocks are to be relinquished. So far as is reasonable such blocks shall form an area of sufficient size and convenient shape to enable petroleum activities to be conducted thereon. [3.7 paragraph deliberately omitted] SECTION 4 WORK PROGRAM AND EXPENDITURES Date 2nd April 2003 1230PM 5 The contract operator shall continue with petroleum activities being carried out on the 4.1 effective date. The Designated Authority and the contract operator shall agree to an exploration work program and expenditures for each contract year. [4.2 paragraph deliberately omitted] [4.3 paragraph deliberately omitted] [4.4 paragraph deliberately omitted] [4.5 paragraph deliberately omitted] [4.6 paragraph deliberately omitted] At least two 2 months prior to the beginning of each contract year the contract operator 4.7 shall prepare and submit for approval by the Designated Authority an exploration and appraisal strategy to be adopted for the ensuing

contract year for the contract area. At least one 1 month prior to the beginning of each calendar year the contract operator 4.8 shall prepare and submit for approval by the Designated Authority a work program and budget of operating costs to be carried out during the ensuing calendar year for the contract area. Before work can commence on the development of a petroleum discovery the contract 4.9 operator shall prepare and submit for approval by the Designated Authority a development plan. 4.10 Should the Designated Authority wish to propose a revision to specified aspects of the work program and budget of operating costs the Designated Authority shall specify its reasons for requesting those changes but shall not require the contract operator to undertake more petroleum activities than the minimum work program and expenditure commitments specified in this contract. The Parties shall reach agreement on any changes before they become effective. 4.11 It is recognised by the Designated Authority that the details of the work program and budget of operating costs and the development plan may require changes in the light of existing circumstances and nothing herein contained shall limit the rights of the contract operator to make such changes provided they do not change the general objective quantity and quality of the petroleum activities. 4.12 The Designated Authority shall ensure that every effort is made to avoid delays in approving the exploration and appraisal strategy the work program and budget of operating costs and the development plan.

SECTION 5 RIGHTS AND OBLIGATIONS OF THE PARTIES

The contract operator shall have the rights accorded to it under the Treaty including the 5.1 Petroleum Mining Code and the taxation code and in particular shall Date 2nd April 2003 1230PM 6 a b c subject to paragraph k of subsection 2 of this Section have the right to enter and leave the contract area and move to and from the contract operators facilities wherever located at all times; have the right to have access to and use all geological geophysical drilling well including well location maps production and other information held by the Designated Authority relating to the contract area; and in accordance with the provisions of the Petroleum Mining Code have the right to have access to and use all geological geophysical drilling well production and other information now or in the future held by the Designated Authority relating to the blocks in the Joint Petroleum Development Area

adjacent to the contract area. 5.2 The contract operator shall comply with all of the obligations imposed on it by the Treaty including the Petroleum Mining Code and the taxation code and the regulations and directions issued under the Petroleum Mining Code and in particular shall a b c d e f g h i provide all human financial and technical resources required for the performance of the petroleum activities; carry out petroleum activities in a proper and workmanlike manner and in accordance with good oilfield practice; take the necessary precautions to avoid interference with navigation and fishing; develop an environmental management plan to be approved by the Designated Authority prevent pollution of the marine environment and pay for the costs associated with cleanup of any pollution from any petroleum activities within the contract area; upon the termination of this contract cleanup the contract area and remove all structures equipment and other property brought into the contract area; submit to the Designated Authority copies of all original geological geophysical drilling well production and other data including cores cuttings and samples taken in connection with petroleum activities in the contract area and reports compiled during the term of this contract; appoint and authorise a person to represent the contract operator and communicate with the Designated Authority and that person shall have an office in either Dili or Darwin or both; give preference to goods and services which are produced in Australia or TimorLeste or provided by subcontractors operating out of Australia or TimorLeste provided they are offered on competitive terms and conditions compared with those available from other countries; give preference to the employment of TimorLeste nationals and permanent residents having due regard to safe and efficient activities and good oilfield practice; Date 2nd April 2003 1230PM 7 j k take out and maintain to the Designated Authoritys satisfaction from the effective date of this contract insurance cover to the value of not less than US40 million in accordance with Article 25 of the Petroleum Mining Code; except as otherwise approved by the Designated Authority ensure that all persons equipment and goods do not enter structures in the contract area without first entering Australia or TimorLeste and notify the Designated Authority of all persons vessels aircraft and structures entering or leaving the contract area and of movements within the contract area; and l

make secure and safe all structures in the contract area including the installation of warning lights radar and other appropriate equipment. The contractor shall have the rights accorded under the Treaty including the Petroleum 5.3 Mining Code and the taxation code and in particular shall a b c d have the right to appoint a new contract operator subject to prior approval by the Designated Authority; have the right to transfer all or part of its undivided participating interest in this contract to any affiliated corporation or any other corporation with the approval of the Designated Authority. Such approval shall not be unreasonably withheld provided the corporation taking up those rights and obligations under this contract has in the opinion of the Designated Authority the necessary financial capability and technical knowledge and ability in accordance with Article 11 of the Petroleum Mining Code. have the right during the term of this contract to lift dispose of and export its share of petroleum production subject to Section 7 of this contract and retain abroad the proceeds obtained therefrom; and have the right to retain ownership and control of all property purchased or leased for the purposes of complying with the conditions of this contract and be entitled to freely remove the same from the contract area Australia or TimorLeste provided the conditions of this contract have been met. 5.4 The contractor shall comply with all of the obligations imposed on it by the Treaty including the Petroleum Mining Code and the taxation code and the regulations and directions issued under the Petroleum Mining Code and in particular shall a b be jointly and severally liable to meet the obligations imposed on the contract operator; and be subject to the taxation law of the Contracting States in accordance with Article 5 of the Treaty and Annex G of the Treaty. 5.5 The Designated Authority shall comply with all of the obligations imposed on it by the Treaty including the Petroleum Mining Code and in particular shall be responsible for the management of the petroleum activities contemplated hereunder having regard to the contract operators responsibilities for undertaking the petroleum activities. Date 2nd April 2003 1230PM 8

SECTION 6 OPERATING COSTS GENERAL PROVISIONS The accounting procedures in this Section shall be followed and observed in the 6.1 performance of the contractors obligations under the contract. 6.2 The contractors books and accounts shall be prepared and maintained in

accordance with a generally accepted and recognised accounting system consistent with modern petroleum industry practices and procedures. Books and accounts shall be available for the use of the Designated Authority in order that it may carry out its auditing responsibilities under this contract.

Operating costs means the sum of the following costs incurred in petroleum activities 6.3 undertaken before or at the point of tanker loading a current calendar year exploration costs; b current calendar year noncapital costs; current calendar year depreciation of capital costs; and allowable operating costs incurred in previous calendar years which have not been recovered in accordance with subsection 2 of Section 7 of this contract; c d less e miscellaneous receipts as defined in subsection 8 of this Section. 6.4 All calculations required to determine operating costs shall be done in United States dollars. Where costs are denoted in any other currency they shall be translated into United States dollars at the exchange rate set on the day the cost was incurred by a bank designated by the Designated Authority.

EXPLORATION COSTS Exploration costs means those operating costs incurred which relate directly to the 6.5 current calendar years exploration activities in the contract area and include but are not limited to the following a b costs of exploratory and appraisal drilling in the contract area including labor materials and services used in the drilling of wells with the object of finding unproven reservoirs of petroleum; costs of surveys in the contract area including labor materials and services including desk studies and analysis of survey data used in aerial geological geochemical geophysical and seismic surveys and core hole drilling; and Date 2nd April 2003 1230PM 9 c costs of other exploration directly related to petroleum activities in the contract area including the cost of auxiliary or temporary facilities used in exploration.

NONCAPITAL COSTS 6.6 Noncapital costs means those operating costs incurred that relate directly to the current calendar years activities in the contract area excluding exploration costs and capital costs. Noncapital costs include but are not limited to the following a b c d e f g costs of labor materials and services used in day to day well activities field production facilities activities secondary recovery activities storage handling transportation and delivery activities gas processing auxiliaries and utilities and other operating activities including repairs and maintenance; costs of office services and general

administration directly related to the petroleum activities carried out in the contract area including technical and related services office supplies office rentals and other rentals of services and property and personnel expenses; costs of production drilling in the contract area including labor materials and services used in drilling wells with the object of penetrating a proven reservoir such as the drilling of delineation wells as well as redrilling deepening or recompleting wells; costs of feasibility studies and environmental impact assessments directly related to petroleum activities in the contract area; application fees contract service fees and registration fees directly related to petroleum activities in the contract area; premiums paid for insurance normally required to be carried for the petroleum activities carried out by the contract operator under this contract; closing down costs being those expenditures incurred at the end of the production life of a petroleum pool in the contract area which could include the costs of i removal of all production facilities including the removal of platforms and associated facilities; ii environmental restoration including any feasibility studies; and h costs of purchased geological and geophysical information. CAPITAL COSTS 6.7

Capital costs means expenditures made for items directly related to petroleum activities in the contract area and which normally have a useful life of more than one 1 year. Capital costs include but are not limited to the following Date 2nd April 2003 1230PM 10 a b c d e f costs of construction utilities and auxiliaries workshops power and water facilities warehouses site offices access and communication facilities; costs of production facilities including offshore platforms including the costs of labor fuel hauling and supplies for both the offsite fabrication and onsite installation of platforms and other construction costs in erecting platforms wellhead production tubing sucker rods surface pumps flow lines gathering equipment delivery lines storage facilities all other equipment facilities and modules on platforms oil jetties and anchorages treating plants and equipment secondary recovery systems gas plants and steam systems; costs of pipelines and other facilities for the transporting of petroleum produced in the contract area to the point of tanker loading; costs of movable assets and subsurface drilling and production tools equipment and instruments and miscellaneous equipment used for production in the contract area; costs of floating craft automotive

equipment furniture and office equipment; and if approved by the Designated Authority costs of employee and welfare housing recreational educational health and meals facilities and other similar costs necessary for petroleum activities in the Joint Petroleum Development Area.

MISCELLANEOUS RECEIPTS 6.8 Miscellaneous receipt means the value of property defined in paragraph c below and all monies received by the contractor other than for the disposal of petroleum produced from the contract area which are directly related to the conduct of petroleum activities in the contract area. Miscellaneous receipts include but are not limited to the following a b c d e f any amounts received from the sale or disposal of petroleum produced from production testing activities undertaken in exploration and appraisal wells; any amounts received for the disposal loss or destruction of property the cost of which is an operating cost; the value of property the cost of which is an operating cost when that property ceases to be used in petroleum activities in the contract area; any amounts received by the contract operator under an insurance policy the premiums of which are operating costs in respect of damage to or loss of property; any amounts received as insurance compensation or indemnity in respect of petroleum production lost or destroyed prior to the point of tanker loading; any amounts received from the hiring or leasing of property the cost of which is an operating cost; Date 2nd April 2003 1230PM 11 g h i any amounts received from supplying information obtained from surveys appraisals or studies the cost of which is an operating cost; any amounts received as charges for the use of employee amenities the cost of which is an operating cost; and any amounts received in respect of expenditures which are operating costs by way of indemnity or compensation for the incurring of the expenditure refund of the expenditure or rebate discount or commission in respect of the expenditure. **INELIGIBLE**

COSTS 6.9 The following expenditures are not eligible as operating costs a b c payments of principal or interest on a loan or other borrowing costs unless approved by the Designated Authority under paragraph c of subsection 10 of this Section; payments of interest components of creditpurchase payments; payments of dividends or the cost of issuing shares; d repayments of equity capital; e f g h i j k payments of private override royalties; payments associated with a farmin

agreement; payments of taxes under the taxation law of either Contracting State made in accordance with Article 5 of the Treaty and Annex G of the Treaty; payments of administrative accounting costs and other costs indirectly associated with petroleum activities in the contract area; costs incurred once petroleum production has passed the point of tanker loading; costs incurred as a result of noncompliance by the contract operator with the provisions of this contract the Petroleum Mining Code or the regulations and directions issued under the Petroleum Mining Code; and unless otherwise approved by the Designated Authority costs incurred by contractors other than the contract operator.

ACCOUNTING METHODS TO BE USED TO CALCULATE RECOVERY OF OPERATING COSTS

6.10 The following methods shall be used to calculate the recovery of operating costs.

a Depreciation

Date 2nd April 2003 1230PM 12 Depreciation shall be calculated beginning in the calendar year in which the asset to be depreciated is placed into service. A full years depreciation shall be allowed in that calendar year. In each calendar year the allowable recovery of capital cost depreciation shall be twenty 20 per cent of the individual assets initial capital cost calculated using the straight line method of depreciation.

b c Allocation of overhead costs

General and administration costs such as those listed in paragraph b of subsection 6 of this Section but other than direct charges allocable to petroleum activities in the contract area shall be determined by a detailed study and the method determined by such a study shall be applied each year consistently. The method determined shall require agreement of the Designated Authority and the contractor.

Interest Recovery

Interest on loans obtained by a contractor at rates not exceeding prevailing commercial interest rates on loans for capital investments in development of petroleum pools may be recoverable as an operating cost provided the Designated Authority has given its approval. The Designated Authority may give its approval if it is satisfied that recovery of interest is necessary to ensure the financial viability of the project.

d Gas Costs

The following procedures shall be used to allocate operating costs related to natural gas production.

i ii iii iv Operating costs directly related to the production of natural gas shall be directly chargeable against natural gas revenues in determining the entitlements of the Designated Authority and the contractor under Section 7.

Operating costs incurred for the production of both natural gas and crude oil shall be allocated to natural gas and crude oil revenues based on the relative value of the products produced for the current calendar year. Common support costs shall be allocated on an equitable basis agreed to by both Parties. If after commencement of production the natural gas revenues do not permit full recovery of natural gas costs as outlined above then the excess costs shall be recovered from crude oil revenues. Likewise if there are excess crude oil costs crude oil costs less crude oil revenues this excess shall be recovered from natural gas revenues. If production of either natural gas or crude oil has commenced while the other has not the allocable production costs and common support costs shall be allocated on an equitable basis agreed to by both Parties. Propane and butane fractions extracted from natural gas but not spiked in crude oil shall be deemed as natural gas for the purpose of accounting.

e Inventory Accounting Date 2nd April 2003 1230PM 13 Inventory levels shall be based on normal good oilfield practice. The value of inventory items used outside the contract area or sold the cost of which has been recovered as an operating cost shall be treated as miscellaneous receipts in accordance with subsection 8 of this Section. The costs of items purchased for inventory shall be recoverable as operating costs at such time as the items are landed in the Joint Petroleum Development Area.

f g Insurance and Claims Operating costs shall include premiums paid for insurance normally required to be carried for the petroleum activities relating to the contractors obligations conducted under the contract together with all expenditures incurred and paid in settlement of any and all losses claims damages judgements and other expenses including fees relating to the contractors obligations under the contract.

Apportioning of Costs and Miscellaneous Receipts Where property or any other thing for which an operating cost is allowable or a miscellaneous receipt is assessable is only used partially in conducting petroleum activities in the contract area only that proportion of the cost or the receipt which relates to the conduct of petroleum activities in the contract area shall be allowed as an operating cost or assessed as a miscellaneous receipt.

SECTION 7 RECOVERY OF OPERATING COSTS AND SHARING OF PETROLEUM PRODUCTION The contractor is authorised by the Designated Authority and obliged

to market all 7.1 petroleum produced and saved from the contract area subject to the following provisions. 7.2 Subject to subsections 9 and 10 of this Section to recover operating costs the contract operator shall be entitled to a quantity of petroleum production which is produced and saved hereunder and not used in petroleum activities equal in value to those costs. If in any calendar year the operating costs exceed the value of petroleum produced and saved hereunder and not used in petroleum activities then the unrecovered excess of operating costs shall be carried forward and recovered in succeeding years. 7.3 In each calendar year in which petroleum is produced from the contract area if the investment credit and operating costs recoverable under subsections 10 and 2 of this Section respectively are less than the value of the quantity of petroleum produced from the contract area then of the petroleum production remaining after deducting the quantity of petroleum production equal in value to the investment credit and operating costs the Parties shall be entitled to take and receive the following a the Designated Authority fifty 50 per cent and the contractor fifty 50 per cent for the tranche of 0 to 50000 barrels daily average of all crude oil production from the contract area for the calendar year; Date 2nd April 2003 1230PM 14 b c the Designated Authority sixty 60 per cent and the contractor forty 40 per cent for the tranche of 50001 to 150000 barrels daily average of all crude oil production from the contract area for the calendar year; and the Designated Authority seventy 70 per cent and the contractor thirty 30 per cent for the tranche of more than 150000 barrels daily average of all crude oil production from the contract area for the calendar year. For the purposes of calculating the daily average of all crude oil production in the calendar year when the first commercial production of crude oil from the contract area is produced the daily average production shall be calculated by reference to the number of days in the calendar year from the day when commercial production commenced. In the calendar year when commercial production of crude oil from a contract area is terminated the daily average production shall be calculated by reference to the number of days in the calendar year up to the day on which production is terminated in the contract area. The method of recovering investment credits and operating costs before the entitlements 7.4 are taken by each Party as provided under subsection 3

of this Section shall be subject to the following proration method. For each calendar year the recoverable investment credits and operating costs shall be apportioned for deduction from the production of each of the tranches defined in subsection 3 of this Section using the same ratios as the production from each such tranche over the total production of that calendar year.

7.5 Of the amount of natural gas including propane and butane fractions extracted from natural gas but not spiked in crude oil remaining after recovering investment credits and operating costs associated with natural gas activities the Designated Authority shall be entitled to take and receive fifty 50 per cent and the contractor shall be entitled to take and receive fifty 50 per cent.

7.6 Title to the contractors share of petroleum production under subsections 3 5 and 9 of this Section as well as to the shares of petroleum production exported and sold to recover investment credits and operating costs under subsections 10 and 2 of this Section respectively shall pass to the contractor at the point of tanker loading. The contractor shall use its best reasonable efforts to market petroleum production to the extent markets are available.

7.8 Any natural gas produced from the contract area and not used in petroleum activities hereunder may be flared if the processing and utilisation of the natural gas is not considered by the Parties to be economic. Such flaring shall be permitted to the extent that gas is not required to enable the maximum economic recovery of petroleum by secondary recovery activities including repressuring and recycling.

7.9 Notwithstanding the other provisions of this Section in the initial five 5 calendar years of production from the contract area such period to be determined without regard to whether production commenced under this contract or the previous contract the Parties shall be entitled to take and receive a quantity of petroleum equal to ten 10 per cent of the petroleum production in those years called the first tranche petroleum before any recovery of investment credits and operating costs. In each subsequent calendar year the first tranche petroleum shall be equal to twenty 20 per cent of the petroleum produced in that year. The quantity of first tranche petroleum from crude oil production for each calendar year shall be shared between the Date 2nd April 2003 1230PM 15 Designated Authority and the contractor in accordance with the sharing percentages as provided under subsection 3 of this Section by apportioning it as

applicable to the respective production tranches as therein defined using the same ratios as the production from each such tranche over the total production of that calendar year. The quantity of first tranche petroleum from natural gas production for each calendar year including propane and butane fractions extracted from natural gas but not spiked in crude oil shall be shared between the Designated Authority and the contractor in accordance with the sharing percentages as provided under subsection 5 of this Section. The initial five 5 calendar years of production is to commence on the day when the first commercial production of petroleum is produced and shall end at midnight 2400 hours local time being 1600 hours Greenwich Mean Time on the day preceding the fifth anniversary of this first commercial production from the contract area. Investment credits for exploration and capital costs defined in subsection 5 of Section 6 7.10 and paragraphs b c and d of subsection 7 of Section 6 shall be allowed to the contract operator and in each calendar year shall be recoverable by the contract operator after the sharing of the first tranche petroleum but before the recovery of operating costs. The contract operator shall recover the investment credits as a quantity of petroleum production equal in value to one hundred and twenty seven 127 per cent of such exploration and capital costs incurred. Investment credits not recovered in the calendar year in which the exploration and capital costs were incurred may be carried forward and recovered in subsequent years. 7.11 Notwithstanding the provisions of subsection 1 of this Section which oblige the contractor to market all petroleum produced from the contract area the Designated Authority may market any or all petroleum when the Designated Authority secures a net realized price for the petroleum f.o.b. the contract area which is greater than the price which can be realized by the contractor. The Designated Authority's right to market any or all of the petroleum shall continue for such period as it can secure a net realized price f.o.b. the contract area greater than that which can be realized by the contractor. The contract operator shall coordinate the efficient lifting of the petroleum production including tanker nomination and scheduling.

SECTION 8 VALUATION OF PETROLEUM PRODUCTION

8.1 Petroleum production sold to third parties shall be valued as follows a b c all petroleum production to which the contractor is entitled under this contract and

which is sold to third parties shall be valued at the net realized price f.o.b. the contract area; all petroleum production to which the Designated Authority is entitled under this contract which is sold to third parties shall be valued at the net realized price. f.o.b. the contract area; and where a contract of sale involves other than a net realized price f.o.b. the Designated Authority shall determine a fair and reasonable net f.o.b. price for the purposes of that sale. Petroleum production sold to other than third parties shall be valued by the Designated 8.2 Authority as follows Date 2nd April 2003 1230PM 16 a b by using the weighted average per unit price adjusted as necessary for quality quantity grade and specific gravity of the petroleum production received by the contractor and the Designated Authority from sales to third parties during the three 3 months preceding such sale excluding commissions and brokerages incurred in relation to such third party sales; and if there are no third party sales as defined in paragraph a at prevailing market prices adjusted to take account of quality quantity grade and specific gravity of the petroleum production and taking into consideration any special circumstances with respect to sales of such petroleum production. 8.3 For the purpose of this Section third party sales means sales by the contractor to independent purchasers with whom at the time the sale is made the contractor has no direct or indirect contractual relationship or joint interest. Commissions or brokerages incurred in connection with sales to third parties if any shall 8.4 not exceed the customary and prevailing rate. 8.5 During any calendar year in which petroleum is produced from the contract area the contractor shall be liable to make provisional payments to the Designated Authority equal to the estimated value of petroleum to which the Designated Authority is entitled under Section 7 of this contract. The provisional payments shall be made on a monthly basis unless the Designated Authority and the contractor agree on alternate arrangements. The amount of each provisional payment shall be calculated by the contractor using the estimates of operating costs contained in the work program and budget of operating costs and the contractors estimate of the value of quantities of petroleum sold. During the calendar year the provisional payments may be adjusted having regard to actual operating costs and the actual value of sales of petroleum. Within thirty 30 days after the end of the calendar year adjustments and cash settlements between the

Designated Authority and the contractor shall be made on the basis of the actual amounts of the operating costs and actual value of sales of petroleum made during the calendar year in order to comply with Section 7. Similarly where the Designated Authority markets petroleum production pursuant to subsection 11 of Section 7 the Designated Authority shall be liable to make provisional payments to the contractor in a manner consistent with this subsection. Petroleum production disposed of other than by sale or destruction shall be valued using 8.6 the method defined in subsection 2 of this Section. The contractor shall notify the Designated Authority of quantities and sales prices of all 8.7 petroleum production sold or disposed of before the sales or disposals are made.

SECTION 9 PAYMENTS The contract operator shall make all payments to the Designated Authority for which it is 9.1 liable under this contract in United States dollars or some other currency agreed between the contract operator and the Designated Authority. Payments shall be made to a bank designated by Date 2nd April 2003 1230PM 17 the Designated Authority. Where a payment is made in currency other than United States dollars the exchange rate used to convert the United States dollars liability into that currency shall be the exchange rate set down on the day of payment by a bank designated by the Designated Authority. The Designated Authority shall make all payments to the contract operator in United 9.2 States dollars or some other currency agreed between the contract operator and the Designated Authority. Where a payment is made in currency other than United States dollars the exchange rate used to convert the United States dollar liability into that currency shall be the exchange rate set down on the day of payment by a bank designated by the Designated Authority. Any payments required to be made pursuant to this contract shall be made within ten 10 9.3 days following the end of the month in which the obligation to make such payments is incurred.

SECTION 10 TENDERS FOR PETROLEUM ACTIVITIES The contract operator shall draw invitations to tender or subcontracts to the attention of 10.1 Australian and TimorLeste subcontractors Subject to subsection 4 of this Section all tenders for petroleum activities called by the 10.2 contract operator shall be subject to approval by the Designated Authority. The Designated Authority shall provide its approval or nonapproval within thirty 30 10.3 days of receipt of

the tender details from the contract operator. The tender details to be provided by the contract operator shall include a summary of the tenders received compared against the tender criteria determined by the contract operator and the reasons for the selection of the preferred tender. 10.4 Notwithstanding subsection 2 of this Section the contract may enter into subcontracts without the approval of the Designated Authority where a b the tender for petroleum activities is expected to involve expenditure of less than US two million 2000000; the tender for petroleum activities is expected to involve expenditure of less than US ten million 10000000 and those activities form part of a project for the development of petroleum resources the cost of which is expected to exceed US one hundred million 100000000; or c the tender selected by the contract operator is the lowest cost tender and has been submitted by an Australian or TimorLeste corporation. The contract operator shall provide the Designated Authority for information with full 10.5 financial details of the subcontract irrespective of the amount of the expenditure involved. SECTION 11 TITLE TO EQUIPMENT Date 2nd April 2003 1230PM 18 11.1 Equipment purchased by the contract operator pursuant to the work program and budget of operating costs remains the property of the contractor and shall be used in petroleum activities. SECTION 12 CONSULTATION AND ARBITRATION 12.1 Periodically the Designated Authority and the contract operator shall meet to discuss the conduct of petroleum activities under this contract and shall make every effort to settle amicably any problems arising therefrom. 12.2 Disputes if any arising between the Designated Authority and contractor relating to this contract or the interpretation and performance of this contract which cannot be settled amicably shall be submitted to arbitration. Except as may be otherwise agreed by the Parties arbitration shall be conducted in 12.3 accordance with the Rules of Arbitration of the International Chamber of Commerce. The Designated Authority on the one hand and the contractor on the other hand shall each 12.4 appoint one arbitrator and so advise the other Party and these two arbitrators shall appoint a third. If either Party fails to appoint an arbitrator within thirty 30 days after receipt of a written request to do so such arbitrator shall at the request of the other Party if the Parties do not otherwise agree be appointed by the President of the International Chamber of Commerce. If the

first two arbitrators appointed as aforesaid fail to agree on a third within thirty 30 days following the appointment of the second arbitrator the third arbitrator shall if the Parties do not otherwise agree be appointed at the request of either Party by the President of the International Chamber of Commerce. If an arbitrator fails or is unable to act that arbitrator's successor shall be appointed in the same manner as the arbitrator who is replaced.

12.5 The decision of the majority of the arbitrators shall be final and binding upon the Parties and an award may be enforced in any court having jurisdiction for that purpose. In accordance with paragraph b of Article 4 of the Treaty in the event that the Designated Authority cannot meet an obligation under an arbitral award arising from a dispute under this contract the Contracting States shall contribute the necessary funds in the same proportion as set out in paragraph a of Article 4 of the Treaty to enable the Designated Authority to meet that obligation. The place of arbitration shall be Singapore. The language of arbitration shall be the English language.

12.6

SECTION 13 TERMINATION [13.1 paragraph deliberately omitted] This contract may be terminated at any time by agreement of the Parties or in accordance with Article 48 of the Petroleum Mining Code.

Date 2nd April 2003 1230PM 19

SECTION 14 BOOKS ACCOUNTS AND AUDITS

BOOKS AND ACCOUNTS 14.1 In addition to any requirements pursuant to paragraph b of subsection 4 of Section 5 the contractor shall keep complete books and accounts recording all operating costs as well as monies received from the sale or disposal of petroleum production.

AUDITS 14.2 The Designated Authority may require independent auditing of the contractor's books and accounts relating to this contract for any calendar year and may require the independent auditor to perform such auditing procedures as are deemed appropriate by the Designated Authority. The contractor shall forward a copy of the independent accountants report to the Designated Authority within sixty 60 days following the completion of the audit. The Designated Authority reserves the right to inspect and audit the contractor's books and accounts relating to this contract.

SECTION 15 OTHER PROVISIONS

NOTICES 15.1 Any notices required or given by either Party to the other shall be served in accordance with Article 35 of the Petroleum Mining Code.

15.2 All notices to be served on the contract operator shall be addressed to ConocoPhillips 9112 Pty

Ltd Level3 53 Ord Street West Perth WA 6872 Australia Facsimile 61 8 9423 6675 15.3 All notices to be served on the Designated Authority relating to matters for which the office of the Designated Authority is responsible shall be addressed to Timor Sea Designated Authority for the Joint Petroleum Development Area 8th Floor Northern Territory House 22 Mitchell Street Darwin N.T Australia 0800 Facsimile 61 8 89817365 15.4 All notices to be served on the Designated Authority relating to matters for which the Technical Directorate of the Designated Authority is responsible shall be addressed to Date 2nd April 2003 1230PM 20 Timor Sea Designated Authority for the Joint Petroleum Development Area 8th Floor Northern Territory House 22 Mitchell Street Darwin N.T Australia 0800 Facsimile 61 8 89817365 Either Party may substitute or change the above such address by giving written notice to 15.5 the other. APPLICABLE LAW Subject to the provisions of the Treaty including the Petroleum Mining Code the law of 15.6 England shall apply to this contract. SUSPENSION OF OBLIGATIONS 15.7 Any failure or delay on the part of either Party in the performance of its obligations or duties under the contract shall be excused to the extent that such failure or delay is attributable to force majeure. 15.8 If exploration is delayed curtailed or prevented by force majeure the Designated Authority shall agree to vary the work program and expenditure commitments or exempt the contract operator from part or all of the work program and expenditure commitments during the period of force majeure. 15.9 The Party whose ability to perform its obligations is so affected by force majeure shall immediately notify the other Party in writing stating the cause and both Parties shall do all that is reasonably within their power to discharge their obligations. SECTION 16 EFFECTIVENESS 16.1 This contract shall be deemed to come into effect on 20 May 2002. This contract shall not be amended or modified in any respect except by the mutual 16.2 consent in writing of the Parties. IN WITNESS WHEREOF the Parties hereto have executed this contract in six original copies and in the English language on this 2 day of April 2003. Date 2nd April 2003 1230PM 21 Date 2nd April 2003 1230PM 22 Date 2nd April 2003 1230PM 23 APPENDIX A Description of contract area Commencing at the point of Latitude 105000 South Longitude 1262500 East; proceed east to the point of Latitude 105000 South Longitude 1263100

CONTRACT FOR OFFSHORE AREAS This Contract made this day of between 1. The President of

India acting through the Ministry of Petroleum and Natural Gas hereinafter referred to as the Government of the FIRST PART; AND to XYZ Company a Company incorporated under the laws of hereinafter at referred having XYZ which expression its successors and such assigns as are permitted under Article 28 hereof of the SECOND PART; registered shall office include its as WITNESSETH WHEREAS 1 2 3 4 By virtue of article 297 of the Constitution of India Petroleum in its natural state in the territorial waters and the continental shelf of India is vested in the Union of India; The Oilfields Regulation and Development Act 1948 53 of 1948 hereinafter referred to as the Act and the Petroleum and Natural Gas Rules 1959 made thereunder hereinafter referred to as the Rules make provisions inter alia for the regulation of Petroleum Operations and grant of Licenses and Leases for exploration development and production of Petroleum in India; The Territorial Waters Continental Shelf Exclusive Economic Zone and other Maritime Zones Act 1976 80 of 1976 provides for the grant of a license by the Government to explore and exploit the resources of the continental shelf and exclusive economic zone and any Petroleum Operation under this Contract shall be carried out under a license granted by the Central Government; The above Acts and Rules provide for the grant of License and Lease in respect of any land or mineral underlying the ocean within the territorial waters the continental shelf and exclusive economic zone of India by the Central Government; 1 5 6 7 8 Rule 5 of the Rules provides for an agreement between the Government and the Licensee or Lessee containing additional terms and conditions with respect to the License or Lease; The Government desires that the Petroleum resources which may exist in the territorial waters the continental shelf and the exclusive economic zone of India be discovered and exploited with the utmost expedition in the overall interest of India and in accordance with modern oilfield and petroleum industry practices; XYZ Companies have committed that it has they have or will acquire and make available the necessary financial and technical resources and the technical and industrial competence and experience necessary for proper discharge and or performance of all obligations required to be performed under this Contract in accordance with modern oilfield and petroleum industry practices and will provide guarantees as required in Article 29 for the due

performance of its obligations hereunder; and As a result of discussions between representatives of the Government and XYZ Companies on the proposal of XYZ Companies the Government has agreed to enter into this Contract with XYZ Companies with respect to the Contract Area identified as block and detailed in Appendix A and Appendix B on the terms and conditions herein set forth. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follows 2 FOR ONLAND AREAS This Contract made this day of between 1. The President of India acting through the Ministry of Petroleum and Natural Gas hereinafter referred to as the Government of the FIRST PART; AND to XYZ Company a Company incorporated under the laws of hereinafter referred at having which expression shall include its successors and such assigns as are permitted under Article 28 hereof of the SECOND PART; registered XYZ office its as WITNESSETH WHEREAS 1 2 3 4 5 The Oilfields Regulation and Development Act 1948 53 of 1948 hereinafter referred to as the Act and the Petroleum and Natural Gas Rules 1959 made thereunder hereinafter referred to as the Rules make provision inter alia for the regulation of Petroleum Operations and grant of Licenses and Leases for exploration development and production of Petroleum in India; The Rules provide for the grant of Licenses and Leases in respect of land vested in a State Government by that State Government with the prior approval of the Central Government; Rule 5 of the Rules provides for an agreement between the Central Government and the Licensee or Lessee containing additional terms and conditions with respect to the License or Lease; The Government desires that the Petroleum resources which may exist in India be discovered and exploited with the utmost expedition in the overall interest of India in accordance with modern oilfield and petroleum industry practices; XYZ Companies have committed that it has they have or will acquire and make available the necessary financial and technical resources and the technical and industrial competence and experience necessary for proper discharge and or performance of all obligations required to be performed under this Contract in 3 accordance with modern oilfield and petroleum industry practices and will provide guarantees as required in Article 29 for the due performance of its obligations

hereunder; and 6 As a result of discussions between representatives of the Government and XYZ Companies on the proposal of XYZ Companies the Government has agreed to enter into this Contract with XYZ Companies with respect to the Contract Area identified as block and detailed in Appendix A and Appendix B on the terms and conditions herein set forth. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follows

4 ARTICLE 1 DEFINITIONS In this Contract unless the context requires otherwise the following terms shall have the meaning ascribed to them hereunder

Accounting Procedure means the principles and procedures of accounting set out in Appendix C.

Act means Oilfields Regulation and Development Act 1948 as amended from time to time. Affiliate means a company or a body; a b which directly or indirectly controls or is controlled by a Company which is a Party to this Contract; or which directly or indirectly controls or is controlled by a company which directly or indirectly controls or is controlled by a Company which is a Party to this Contract. For the purpose of this definition it is understood that control means i ii ownership by one company of more than fifty percent50 of the voting securities of the other company; or the power to direct administer and dictate policies of the other company even where the voting securities held by such company exercising such effective control in that other company is less than fifty percent50 and the term controlled shall have a corresponding meaning. Appendix means an Appendix attached to this Contract and made a part thereof. Appraisal Programme means a programme carried out following a Discovery in the Contract Area for the purpose of appraising Discovery and delineating the Petroleum Reservoirs to which the Discovery relates in terms of thickness and lateral extent and determining the characteristics thereof and the quantity of recoverable Petroleum therein. Appraisal Well means a Well drilled pursuant to an Appraisal Programme. Approved Work Programme and Approved Budget means a Work Programme or a Budget that has been approved by the Management Committee pursuant to the provisions of this Contract.

5 1.1 1.2 1.3 1.4 1.5 1.6 1.7 1.8 1.9 1.10 1.11 1.12 1.13 1.14 1.15 1.16 1.17 1.18 Arms Length Sales means sales made freely in the open market in freely convertible currencies between willing and unrelated sellers and buyers and in

which such buyers and sellers have no contractual or other relationship directly or indirectly or any common or joint interest as is reasonably likely to influence selling prices and shall inter alia exclude sales whether direct or indirect through brokers or otherwise involving Affiliates sales between Companies which are Parties to this Contract sales between governments and governmentowned entities counter trades restricted or distress sales sales involving barter arrangements and generally any transactions motivated in whole or in part by considerations other than normal commercial practices. Article means an article of this Contract and the term Articles means more than one Article. Associated Natural Gas or ANG means Natural Gas produced in association with Crude Oil either as free gas or in solution if such Crude Oil can by itself be commercially produced. Barrel means a quantity or unit equal to 158.9074 litres forty two 42 United States gallons liquid measure at a temperature of sixty 60 degrees Fahrenheit 15.56 degrees Celsius and under one atmosphere pressure 14.70 psia. in and below which Basement means any igneous or metamorphic rock or rocks or any stratum of such nature the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of Petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected in accordance with the knowledge generally accepted in the international petroleum industry. Budget means a budget formulated in relation to a Work Programme. Business Day means any of the Calendar Day excluding holidays. Calendar Day means any of the seven 7 days of a week. Calendar Month means any of the twelve 12 months of the Calendar Year. Calendar Quarter or Quarter means a period of three 3 consecutive Calendar Months commencing on the first day of January April July and October of each Calendar Year. Calendar Year means a period of twelve 12 consecutive Months according to the Gregorian calendar commencing with the first 1st day of January and ending with the thirtyfirst 31st day of December. 6 1.19 1.20 1.21 1.22 1.23 1.24 1.25 1.26 1.27 1.28 Commercial Discovery means a Discovery of Petroleum reserves which has been declared as a Commercial Discovery in accordance with the provisions of Article 10 andor Article 21. Commercial Production means production of Crude Oil or Condensate or Natural

Gas or any combination of these from the Contract Area excluding production for testing purposes and delivery of the same at the relevant Delivery Point under a programme of regular production and sale. Company for the purpose of this Contract means a company which is a Party to this Contract and where more than one Company is Party to the Contract the term Companies shall mean all such Companies collectively including their respective successors and permitted assigns under Article 28. Condensate means those low vapour pressure hydrocarbons obtained from Natural Gas through condensation or extraction and refers solely to those hydrocarbons that are liquid at normal surface temperature and pressure conditions provided that in the event Condensate is produced from a Development Area and is segregated and transported separately to the Delivery Point then the provisions of this Contract shall apply to such Condensate as if it were Crude Oil. Contract means this agreement and the Appendices mentioned herein and attached hereto and made an integral part hereof and any amendments made thereto pursuant to the terms hereof. Contract Area means on the Effective Date the area described in Appendix A and delineated on the map attached as Appendix B or any portion of the said area remaining after relinquishment or surrender from time to time pursuant to the terms of this Contract including any additional area as provided under Article 11.3. Contract Costs means Exploration Costs Development Costs and Production Costs as provided in Section 2 of the Accounting Procedure and allowed to be cost recoverable in terms of Section 3 of the Accounting Procedure. Contract Year means a period of twelve 12 consecutive months counted from the Effective Date or from the anniversary of the Effective Date. Contractor means the Companyies. Cost Petroleum means the portion of the total value of Petroleum Produced and Saved from the Contract Area which the Contractor is entitled to take in a particular period for the recovery of Contract Costs as provided in Article 15. 7 1.29 1.30 1.31 1.32 1.33 1.34 Crude Oil or Oil or Crude means all kinds of hydrocarbons and bitumen both in solid and in liquid form in their natural state or obtained from Natural Gas by condensation or extraction including distillate and Condensate when commingled with the heavier hydrocarbons and delivered as a blend at the Delivery Point but excluding Natural Gas. Deepwater Area for deepwater blocksareas means area

falling beyond four hundred 400 metre isobath provided however that for the purposes of this Contract the Contract Area as on Effective Date as described in the AppendixA and AppendixB shall be deemed to be Deepwater Area falling beyond four hundred 400 metre isobath. Delivery Point means except as otherwise herein provided or as may be otherwise agreed between the Parties having regard to international practice the point at which Petroleum reaches the outlet flange of the delivery facility either offshore or onshore and different Delivery Points may be established for purposes of sales. Delivery Points shall be approved by the Management Committee. Development Area means part of the Contract Area which encompasses one or more Commercial Discoveries and any additional area that may be required for proper development of such Commercial Discoveries and established as such in accordance with the provisions of the Contract. Development Costs means those costs and expenditures incurred in carrying out Development Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof. Development Operations means operations conducted in accordance with the Development Plan and shall include but not be limited to the purchase shipment or storage of equipment and materials used in developing Petroleum accumulations the drilling completion and testing of Development Wells the drilling and completion of Wells for Gas or water injection the laying of gathering lines the installation of offshore platforms and installations the installation of separators tankages pumps artificial lift and other producing and injection facilities required to produce process and transport Petroleum into main Oil storage or Gas processing facilities either onshore or offshore including the laying of pipelines within or outside the Contract Area storage at Delivery Points the installation of said storage or Gas processing facilities the installation of export and loading facilities and other facilities required for the development and production of the said Petroleum accumulations and for the delivery of Crude Oil and/or Gas at the Delivery Point and also including incidental operations not specifically referred to herein but required for the most efficient and economic development and production of the said Petroleum

8 1.35 1.36 1.37
1.38 1.39 1.40 1.41 1.42 1.43 accumulations in accordance with modern oilfield and petroleum

industry practices. Development Plan means a plan submitted by the Contractor for the development of a Commercial Discovery which has been approved by the Management Committee or the Government pursuant to Article 10 or Article 21. Development Well means a Well drilled deepened or completed after the date of approval of the Development Plan pursuant to Development Operations or Production Operations for the purposes of producing Petroleum increasing production sustaining production or accelerating extraction of Petroleum including production Wells injection Wells and dry Wells. Directorate General of Hydrocarbons or DGH means an organisation including its successors under the Ministry of Petroleum and Natural Gas. Discovery means the finding during Petroleum Operations of a deposit of Petroleum not previously known to have existed which can be recovered at the surface in a flow measurable by conventional petroleum industry testing methods. Discovery Area means that part of the Contract Area about which based upon Discovery and the results obtained from a Well or Wells drilled in such part the Contractor is of the opinion that Petroleum exists and is likely to be produced in commercial quantities. Effective Date means the later of the date on which this Contract is executed by the Parties or the date of issue of License or date from which License has been made effective by the Central Government or State Governments as the case may be. Environmental Damage means soil erosion removal of vegetation destruction of wildlife pollution of groundwater or surface water land contamination air pollution noise pollution bush fire disruption to water supplies to natural drainage or natural flow of rivers or streams damage to archaeological palaeontological and cultural sites and shall include any damage or injury to or destruction of soil or water in their physical aspects together with vegetation associated therewith aquatic or terrestrial mammals fish avifauna or any plant or animal life whether in the sea or in any other water or on in or under land. Exploration Costs means those costs and expenditures incurred in carrying out Exploration Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof. Exploration Operations means operations conducted in the Contract Area pursuant to this Contract in searching for Petroleum and in the course of an Appraisal Programme and shall include but not be limited to

aerial geological geophysical geochemical palaeontological palynological topographical and seismic surveys analysis studies and their interpretation investigations relating to the subsurface geology including structural test drilling stratigraphic test drilling drilling of Exploration Wells and Appraisal Wells and other related activities such as surveying drill site preparation and all work necessarily connected therewith that is conducted in connection with Petroleum exploration. Exploration Period means the period mentioned in Article 3 during which Exploration Operations may be carried out by the Contractor as provided in Article 3 hereof. Exploration Phase or Phase means any of the periods specified in Article 3 in which the Contractor is required to complete the Minimum Work Programme specified therein. Exploration Well means a Well drilled for the purpose of searching for undiscovered Petroleum accumulations on any geological entity be it of structural stratigraphic facies or pressure nature to at least a depth or stratigraphic level specified in the Work Programme. Field means an Oil Field or a Gas Field or combination of both as the case may be. Financial Year means the period from the first 1st day of April to the thirtyfirst 31st day of March of the following Calendar Year. Foreign Company means a Company within the meaning of Section 591 of the Companies Act 1956. Frontier Area means any area identified demarcated and so notified by the Government or its authorised agencies for the purpose of exploration and exploitation of Oil and Gas which is logistically and technically difficult and lacks infrastructural andor marketing facilities etc. Gas means Natural Gas. Gas Field means within the Contract Area a Natural Gas Reservoir or a group of Natural Gas Reservoirs within a common geological structure or feature. Government or Central Government means Government of India unless otherwise stated. Investment shall have the meaning ascribed to that expression in paragraph 3 of Appendix D. 10 1.44 1.45 1.46 1.47 1.48 1.49 1.50 1.51 1.52 1.53 1.54 1.55 1.56 1.57 1.58 1.59 1.60 1.61 1.62 1.63 1.64 1.65 1.66 Investment Multiple means the ratio of accumulated Net Cash Income to accumulated Investment by the Contractor as determined in accordance with Appendix D. Lease means a petroleum mining lease referred to in the Rules and shall unless otherwise stated therein exclude right for exploration and exploitation of coal lignite bed methane CBM. Lessee means the Contractor to whom a Lease is

issued under the Rules for the purpose of carrying out Petroleum Operations in a Development Area or Contract Area. LIBOR means the London InterBank Offer Rate for sixmonth maturates of United States Dollars as quoted by the International Swaps and Derivative Association or such other bank being a BBA LIBOR contributor panel bank as the Parties may agree. License means a petroleum exploration license referred to in the Rules. Licensee means the Contractor to whom a License is issued under the Rules for the purpose of carrying out Petroleum Operations in the Contract Area. Minimum Work Programme means with respect to each Exploration Phase the Work Programme specified in Article 5 with respect to such Phase. Management Committee means the committee constituted pursuant to Article 6 hereof. Month means Calendar Month. Natural Gas means wet gas dry gas all other gaseous hydrocarbons and all substances contained therein including sulphur carbondioxide and nitrogen but excluding extraction of helium which are produced from Oil or Gas Wells excluding those condensed or extracted liquid hydrocarbons that are liquid at normal temperature and pressure conditions and including the residue gas remaining after the condensation or extraction of liquid hydrocarbons from gas. Net Cash Income shall have the meaning assigned in paragraph 2 of Appendix D. Non Associated Natural Gas or NANG means Natural Gas which is produced either without association of Crude Oil or in association with such quantities of Crude Oil which by itself cannot be commercially produced. 11 1.67 1.68 1.69 1.70 1.71 1.72 1.73 1.74 1.75 1.76 1.77 Oil Field means within the Contract Area an Oil Reservoir or a group of Oil Reservoirs within a common geological structure or feature. Operator means one of the Parties comprising the Contractor appointed as the Operator pursuant to Article 7. Operating Agreement means the constituents of the Contractor in accordance with Article 7 with respect to conduct of Petroleum Operations. the operating agreement entered by Operating Committee means the Committee established by that name in the Operating Agreement pursuant to Article 7. Participating Interest means in respect of each Party constituting the Contractor the undivided share expressed as a percentage of such Partys participation in the rights and obligations under this Contract. Parties means the parties signatory to this Contract including their successors and

permitted assigns under this Contract and the term Party means any of the Parties. Petroleum means Crude Oil and/or Natural Gas existing in their natural condition but excluding helium occurring in association with Petroleum or shale. Petroleum Operations means as the context may require Exploration Operations Development Operations or Production Operations or any combination of two or more of such operations including construction operation and maintenance of all necessary facilities plugging and abandonment of Wells safety environmental protection transportation storage sale or disposition of Petroleum to the Delivery Point Site Restoration and any or all other incidental operations or activities as may be necessary. Petroleum Produced and Saved means gross Petroleum produced minus impurities such as water or solids produced along with Petroleum Petroleum recycled to the reservoir Petroleum used in Petroleum Operations or flared or otherwise unavoidably lost under the provisions of the Contract. Production Costs means those costs and expenditures incurred in carrying out Production Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof. Production Operations means all operations conducted for the purpose of producing Petroleum from the Development Area after the commencement of production from the Development Area including the operation and maintenance of all necessary facilities therefor. 12 1.78 1.79 1.80 1.81 1.82 1.83 1.84 1.85 1.86 1.87 1.88 Profit Petroleum means the total value of Petroleum Produced and Saved from the Contract Area in a particular period as reduced by Cost Petroleum and calculated as provided in Article 16. Recompletion means an operation whereby a completion in one zone is abandoned in order to attempt a completion in a different zone within an existing Well bore. Reservoir means a naturally occurring discrete accumulation of Petroleum. Rules means the Petroleum and Natural Gas Rules 1959 and any amendments made thereto from time to time. Section means a section of the Accounting Procedure. Selfsufficiency means in relation to any Year that the volume of Crude Oil and Crude Oil equivalent of Petroleum products exported from India during that Year either equals or exceeds the volume of Crude Oil and Crude Oil equivalent of Petroleum products imported into India during the same Year as determined by Government. Site Restoration shall mean all

activities required to return a site to its state as of the Effective Date pursuant to the Contractors environmental impact study and approved by the Government or to render a site compatible with its intended afteruse to the extent reasonable after cessation of Petroleum Operations in relation thereto and shall include where appropriate proper abandonment of Wells or other facilities removal of equipment structures and debris establishment of compatible contours and drainage replacement of top soil revegetation slope stabilisation infilling of excavations or any other appropriate actions in the circumstances. Statement or Statements refers to the statements required to be furnished in accordance with AppendixC of this Contract. State Government means any government of a state of the Union of India which has control over the Contract Area for the purpose of grant of Licenses Leases. In case the Contract Area covers more than one state the State Government shall include all such governments of those states. Subcontractor means any company or person contracted by the Contractor or Operator to provide goods or services with respect to Petroleum Operations. US or USD or US Dollar or United States Dollar means the currency of the United States of America. 13 1.89 1.90 Well means a borehole made by drilling in the course of Petroleum Operations but does not include a seismic shot hole. Work Programme means a work programme formulated for the purpose of carrying out Petroleum Operations. 1.91 Year means a Financial Year. 14 ARTICLE 2 PARTICIPATING INTERESTS 2.1 The initial Participating Interest of the Parties comprising the Contractor shall be as follows X Company Y Company Z Company 2.2 Except as provided in this Article or elsewhere in this Contract the rights and obligations of the Parties comprising the Contractor shall include but not be limited to a b c d the right to take Cost Petroleum in accordance with the provisions of Article 15; the right to take its Participating Interest share of Profit Petroleum in accordance with the provisions of Article 16; the right to receive its Participating Interest share of any inental income and receipts arising from Petroleum Operations; and the obligation to contribute its Participating Interest share of costs and expenses including Contract Costs. 15 3.1 3.2 3.3 3.4 3.5 ARTICLE 3 LICENSE AND EXPLORATION PERIOD The Exploration Period shall begin on the Effective Date and shall consist of three Exploration Phases each phase not exceeding three

Contract Years for a total period not exceeding seven 7 consecutive Contract Years eight 8 consecutive Contract Years in case of Deepwater Areas and Frontier Areas unless extended pursuant to the terms of this Contract except that for Deepwater Areas and Frontier Areas the first Exploration Phase may be of four 4 years and correspondingly the Exploration Period may be eight 8 consecutive Contract Years. Except as otherwise provided in this Contract the term of the first Exploration Phase shall not exceed to be taken from the accepted bid and subject to Article 3.1 consecutive Contract Years hereinafter referred to as the first Exploration Phase. Except as otherwise provided in this Contract the term of the second Exploration Phase shall not exceed to be taken from the accepted bid and subject to Article 3.1 consecutive Contract Years from the end of the first Exploration Phase hereinafter referred to as the second Exploration Phase. Except as otherwise provided in this Contract the term of the third Exploration Phase shall not exceed to be taken from the accepted bid and subject to Article 3.1 consecutive Contract Years from the end of the second Exploration Phase hereinafter referred to as the third Exploration Phase. At the expiry of any Exploration Phase of the Exploration Period provided that the Contractor has completed the Minimum Work Programme for that Exploration Phase the Contractor shall have the option exercisable by giving a written notice to the Government at least thirty 30 days prior to the expiry of the relevant Phase either a b to proceed to the next Exploration Phase on presentation of the requisite guarantees as provided for in Article 29; or to relinquish the entire Contract Area except for any Discovery Area and any Development Area and to conduct Development Operations and Production Operations in relation to any Commercial Discovery in accordance with the terms of this Contract and the Contractor shall have no further obligation in respect of the Minimum Work Programme under Article 5 for any subsequent Exploration Phases of the Exploration Period. 16 3.6 3.7 3.8 3.9 3.10 3.11 If neither of the options provided for in paragraphs a and b hereof is exercised by the Contractor this Contract shall terminate at the end of the then current Exploration Phase and the License shall be automatically cancelled. If at the end of an Exploration Phase the Minimum Work Programme for that phase is not completed the time for completion of the said Minimum Work

Programme shall be extended for a period necessary to enable completion thereof but not exceeding six 6 months provided that the Contractor submits his request by giving a written notice to the Government at least thirty 30 days prior to the expiry of the relevant Phase and can show technical or other good reasons for noncompletion of the Minimum Work Programme and the Management Committee gives its consent to the said extension and provided further that the period of such extension shall be subtracted from the next succeeding Exploration Phase if any. In case the Minimum Work Programme of any particular Exploration Phase is completed before stipulated time as provided in the Article 3.2 and 3.3 the time so saved will be added to the next Exploration Phase if so requested by the Contractor giving a notice in writing to the Government thirty 30 days prior to such early completion of the Phase and in that event the provision of the Article 3.5 a shall apply immediately after such early completion of the Phase. If at the end of an Exploration Phase execution of any Work Programme is in progress and which is in addition to the Minimum Work Programme such Exploration Phase shall be extended for a period not exceeding six 6 months to enable completion thereof provided that the Minimum Work Programme for such Phase has been completed and the Management Committee gives its consent to the said extension as provided in the Article 3.6. In the event of an extension as provided for herein the notice referred to in Article 3.5 shall be given at least thirty 30 days prior to the expiry of the relevant extension. Where sufficient time is not available prior to the expiry of the Exploration Period to complete an Appraisal Programme at the request of the Contractor the Government shall extend the Exploration Period for such period not exceeding eighteen 18 months for onland and shallow water blocks and thirty 30 months for deepwater blocks as may be mutually agreed between the Parties for the Appraisal Programme to be carried out and for the Contractor and the Management Committee to comply with the provisions of Article 10 and Article 21. If no Commercial Discovery has been made in the Contract Area by the end of the Exploration Period the Contract shall terminate. If this Contract is terminated in accordance with its terms the License shall be automatically cancelled. If at the expiry of the Exploration Period a development plan for development of a Commercial Discovery and an

application for Lease is under consideration by the 17 Management Committee or Government as the case may be pursuant to Articles 10 11 and 21 respectively the License shall continue in force with respect to that part of the Contract Area to which the application for the Lease relates pending a decision on the proposed development plan and the application for the Lease but shall cease to be in force and effect with respect to the remainder of the Contract Area. 18 4.1 4.2 4.3 4.4 4.5 4.6

ARTICLE 4 RELINQUISHMENT If at the end of the first Exploration Phase the Contractor elects pursuant to Article 3.5 to continue Exploration Operations in the Contract Area in the second Exploration Phase the Contractor shall retain upto seventy five percent 75 of the original Contract Area including any Development Area and Discovery Area in not more than three 3 areas of simple geometrical shapes and relinquish the balance of the Contract Area prior to the commencement of the second Exploration Phase. Notwithstanding the provision of this Article 4.1 in the event the Development Areas and Discovery Areas exceed seventy five percent 75 of the original Contract Area the Contractor shall be entitled to retain to the extent of Development Areas and Discovery Areas. If at the end of the second Exploration Phase the Contractor elects pursuant to Article 3.5 to continue Exploration Operations in the Contract Area in the third Exploration Phase the Contractor shall retain upto fifty percent 50 of the original Contract Area including any Development Area and Discovery Area in not more than three 3 areas of simple geometrical shapes and relinquish the balance of the Contract Area prior to the commencement of the third Exploration Phase. Notwithstanding the provision of this Article 4.2 in the event the Development Areas and Discovery Areas exceed fifty percent 50 of the original Contract Area the Contractor shall be entitled to retain to the extent of Development Areas and Discovery Areas. At the end of the third Exploration Phase the Contractor shall retain only Development Areas and Discovery Areas. If the Contractor exercises the option provided for in paragraph b of Article 3.5 the Contractor shall after any Discovery Areas or Development Areas have been designated relinquish all of the Contract Area not included within the said Discovery Areas or Development Areas. As and when the Contract is terminated under the provisions of Article 3 or in accordance with any other provisions of this Contract the entire Contract

Area remaining with the Contractor shall be deemed to have been relinquished by the Contractor as on the date on which the Contract is terminated. Relinquishment of all or part of the Contract Area or termination of the Contract shall not be construed as absolving the Contractor of any liability undertaken or incurred by the Contractor in respect of the Contract Area during the period between the Effective Date and the date of such relinquishment or termination.

19 4.7 Subject to Article 14.9 the liability of the Contractor shall be limited to any liability undertaken or incurred in respect of relating to or connected with the Contract and/or any claim arising out of or in relation to the act of negligence misconduct commission or omission in carrying out Petroleum Operations during the period between the Effective Date and the date of relinquishment of the Contract Area or termination or expiry of the Contract as the case may be.

20 ARTICLE 5 WORK PROGRAMME

5.1 5.2 The Contractor shall commence Petroleum Operations not later than six 6 months from the Effective Date. During the currency of the first Exploration Phase as per Article 3.2 the Contractor shall complete the following Work Programme

a b a seismic programme consisting of the acquisition processing and interpretation of line kilometres of 2D and/or sq. kms. of 3D seismic data in relation to the exploration objectives; and Exploration Wells shall be drilled to at least one of the following depths

i ii iii metres and geological objective; to Basement; and that point below which further drilling becomes impracticable due to geological conditions encountered and drilling would be abandoned by a reasonable prudent operator in the same or similar circumstances. Abandonment of drilling under this provision by the Contractor would require unanimous approval of the Management Committee.

5.3 During the currency of the second Exploration Phase as per Article 3.3 the Contractor shall complete the following Work Programme

a b a seismic programme consisting of the acquisition processing and interpretation of line kilometres of 2D and/or sq. kms. of 3D seismic data in relation to the exploration objectives; and Exploration Wells shall be drilled to at least one of the following depths

i ii iii metres and geological objective; to Basement; and that point below which further drilling becomes impracticable due to geological conditions encountered and drilling would be abandoned by a reasonable prudent operator in the same or similar circumstances. Abandonment

of drilling under this provision by the Contractor would require unanimous approval of the Management Committee. 21 5.4 During the currency of the third Exploration Phase as per Article 3.4 the Contractor shall complete the following Work Programme Note 5.5 5.6 5.7 a b a seismic programme consisting of the acquisition processing and interpretation of line kilometres of 2D and/or sq. kms. of 3D seismic data in relation to the exploration objectives; and Exploration Wells shall be drilled to at least one of the following depths i metres and geological objective; ii to Basement; and that point below which further drilling becomes impracticable due iii to geological conditions encountered and drilling would be abandoned by a reasonable prudent operator in the same or similar circumstances. Abandonment of drilling under this provision by the Contractor would require unanimous approval of the Management Committee. The details of the work programme to be filled in the Articles 5.2 5.3 and 5.4 shall be as per the bid of Companies and accepted by the Government. The actual depth objective for each of the Wells shall be determined by the Contractor in the light of the advice of the Management Committee before the commencement of the drilling. Each Well which reaches the geological objective for which the depth objective was determined shall be deemed to have been drilled to the depth objective or to actual total depth whichever is greater. The Contractor shall ensure that all relevant subsurface geological geochemical and geophysical information necessary for the attainment of the exploration objectives in accordance with modern oilfield and petroleum industry practices is obtained during exploratory drilling. If the depthgeological objective of the Well is not achieved for any reason a substitute Well shall be drilled of the same specifications as stipulated in and subject to Articles 5.2 5.3 and 5.4 as the case may be. Subject to Article 31 the Contractor undertakes to complete the Minimum Work Programme in accordance with Articles 5.2 5.3 5.4 and 5.6 as the case may be. In the event that the Contractor fails to fulfill the said Minimum Work Programme by the end of the relevant Exploration Phase or early termination of the Contract by the Government for any reason whatsoever each Company constituting the Contractor shall pay to the Government within sixty 60 days following the end of the relevant Exploration Phase or early termination of the Contract as may be the case its Participating

Interest share for an amount which when evaluated in terms of the Minimum Work Programme specified for the relevant Phase is equal to the amount which would be required to complete the said Minimum Work Programme. For determination of this amount available 22 5.8 5.9 5.10 5.11 5.12 relevant information including the Budget and modern oilfield and petroleum industry practices may be taken into account. If the Minimum Work Programme for the third Exploration Phase has been completed earlier than eighteen months from the end of the Phase the Contractor shall meet with the Government to discuss the possibility of early relinquishment unless the Contractor undertakes further work with the approval of the Management Committee. In the event that the Contractor has carried out work in excess of the Minimum Work Programme in any Exploration Phase the excess exploration work done shall be set off against the Minimum Work Programme for the following Exploration Phase. As soon as possible after the Effective Date and thereafter within ninety 90 days before commencement of each following Year the Contractor shall submit to the Management Committee the Work Programmes and the Budgets relating to Petroleum Operations to be carried out during the relevant Year. Work Programme and Budgets for the Exploration Period shall include work sufficient to meet the relevant Minimum Work Programme with respect to each Exploration Phase specified in this Article 5. The Contractor may propose modifications or revisions to the details of a reviewed or an approved Work Programme and Budget as the case may be in the light of the then existing circumstances and shall submit to the Management Committee modifications or revisions to the Work Programme and Budget referred to in Article 5.10. Work Programmes and Budgets and any modifications or revisions thereto relating to Exploration Operations shall be submitted to the Management Committee for review and advice as provided in Article 6.5. Work Programmes and Budgets related to Development Operations and Production Operations and any modifications or revisions thereto shall be submitted for approval as provided in Article 10 and Article 21. 23 6.1 6.2 6.3 6.4 6.5

ARTICLE 6 MANAGEMENT COMMITTEE There shall be constituted a committee to be called the Management Committee with functions as stated herein below. Government shall nominate two 2 members representing Government in the

Management Committee whereas each Company constituting the Contractor shall nominate one 1 member each to represent Company in the Management Committee provided that in case the Contractor constitutes only one Company that Company shall have two 2 members. The Parties shall nominate the members to the Management Committee within thirty 30 days of the Effective Date. Each Party may nominate alternate members with full authority to act in the absence and on behalf of the members nominated under Article 6.2 and may at any time nominate another member or alternate member to replace any member nominated earlier by notice to other members of the Management Committee. One representative of the Government shall be designated as the Chairman of the Management Committee and the second representative of the Government shall be designated as the Deputy Chairman. The member of the Operator or the member designated by the Operator where Operator has two 2 members in the Management Committee shall be designated as the Secretary of the Committee. Operator on behalf of the Contractor with the approval of Operating Committee if constituted under the Article 7.4 or in case of a single Party constituting the Contractor then that Party shall submit following matters to the Management Committee for review and it shall have advisory functions a b c d e f the annual Work Programmes and Budgets in respect of Exploration Operations and any revisions or modifications thereto; annual work progress and costs incurred thereon; proposals for surrender or relinquishment of any part of the Contract Area by the Contractor; proposals for an Appraisal Programme or revisions or additions thereto and the declaration of a Discovery as a Commercial Discovery; any other matter required by the terms of this Contract to be submitted to it for review or advice; and any other matter which the Contractor dees to submit for review or advice including matters concerning interParty relationships. 24 6.6 The following matters shall be submitted by Operator on behalf of the Contractor with the approval of Operating Committee if constituted under the Article 7.4 or in case of single Party constituting the Contractor then by that Party to the Management Committee for approval a b c d e f g h i j Annual Work Programmes and Budgets in respect of Development Operations and Production Operations and any modifications or revisions thereto; proposals for the approval of development plans as may

be required under this Contract or modifications or revisions to a Development Plan; determination of a Development Area; appointment of auditors along with scope of audit approval and adoption of audited report submitted under Article 25.4.3; collaboration with licensees or contractors of other areas; claims or settlement of claims for or on behalf of or against the Contractor in excess of limits fixed by the Management Committee from time to time; proposal about abandonment planSite Restoration as required to be submitted under Article 14.10; any other matter required by the terms of this Contract to be submitted for the approval of the Management Committee; any other matter which the Contractor dees to submit to it; and any matter which Government refers to the Management Committee for its consideration and reasoned opinion. Unless agreed otherwise by all the members of the Management Committee the Management Committee shall meet at least once every six 6 months during the Exploration Period and thereafter at least once every three 3 months or more frequently at the request of any member. The Secretary with the approval of the Chairman shall convene each meeting by notifying the members twenty eight 28 days prior to such a meeting or a shorter period of notice if the members unanimously so agree of the time and place of such meeting and the purpose thereof and shall include in such notice a provisional agenda for such meeting. The Chairman shall be responsible for processing the final agenda for such meeting and the agenda shall include all items of business requested by the members to be included provided such requests are received by the Secretary at least ten 10 days prior to the date fixed for the meeting. The Secretary shall forward the agenda to the members at least seven 7 Business Days prior to the date fixed for the meeting. Matters not included in the agenda may be taken up at the meeting by any member with the unanimous consent of all the members whether present or not present at the meeting. 6.7 6.8 The Chairman or the Deputy Chairman as may be the case shall preside over the meetings of the Management Committee and in their absence any other member representing Government and present shall preside over the meetings. 25 6.9 6.10 6.11 Secretary to the Management Committee shall be responsible inter alia for preparation of the minutes of every meeting in the English language and provision to every member of the Management Committee with

two 2 copies of the minutes approved by the Chairman within three 3 Business Days of the meeting. Unless agreed otherwise by all the members of the Management Committee the minutes of a meeting shall be finalised by the Management Committee within three 3 Business Days thereafter. Members shall notify the Chairman and the other members of their approval of the minutes by putting their signatures on one copy of the minutes and returning the same to the Chairman. Members may suggest any modification to the minutes while returning the signed copy. Members may also communicate with the Chairman through telex cable or facsimile or any other effective mode of communication agreed by all the members of the Management Committee. If the Chairman or any other member does not agree with the modification to the minutes suggested by any member the matter shall be brought to the attention of the other members and resubmitted to the Management Committee at the next meeting and the minutes shall stand approved as to all other matters. If a member fails to respond within the aforesaid three 3 Business Day period unless agreed otherwise by the Management Committee as herein provided the minutes shall be deemed to be approved by such member. Any member shall be entitled if either he or his alternate is unable to attend a meeting to cast his vote by telex cable facsimile transmission or any other effective mode of communication agreed by all the members of the Management Committee and received by the Chairman prior to the date on which the vote is taken in the course of the meeting or by giving a prior written notice to all other members appoint a member with his prior consent representing another Party in the Management Committee as its proxy to attend a meeting and to exercise the appointing members right to vote at the meeting whether as directed by the appointing member or otherwise. A member appointed as a proxy and attending a meeting shall be present in two separate capacities and vote accordingly. All such votes shall have the same effect as if that member had been present and so voted at the meeting. In case of urgency where Operating Committee has made a recommendation together with reasons to the Chairman requiring consideration of a matter by the Management Committee without delay Chairman after being satisfied may waive the requirements of notice period for the meeting and circulation of agenda to

such extent as would be consistent with the urgency and consideration of the matter by the Management Committee. Alternatively Chairman may approve submission of notice and agenda to members by telex or facsimile transmission or any other effective mode of communication agreed by all the members of the Management Committee receipt of which shall be confirmed by telephone by the Chairman requiring the members to confirm their decision by these modes of communication not later than three 3 Business Days from confirmation of 26 6.12 6.13 6.14 6.15 6.16 receipt of notice and agenda by the member. Any member failing to convey the decision within the time limits of three 3 Business Days shall be deemed to have voted in favour of the proposal. The result of any such vote shall be notified by the Chairman to all the members. The meetings of the Management Committee shall be held in India unless otherwise mutually agreed by the members of the Management Committee. All expenses of the members of the Management Committee attending meetings shall be borne by the respective Party and shall in no event be cost recoverable. All matters requiring the approval of the Management Committee shall be generally approved by a unanimous vote of the members of the Management Committee present as well as the views of the members received by some other mode of communication. In case unanimity is not achieved in decision making process within a reasonable period as may be required under the circumstances the decision of the Management Committee shall be approved by the majority Participating Interest of seventy percent 70 or more with Government representative having a positive vote in favour of the decision. There shall be a quorum of the Management Committee for holding a meeting and making decisions with each Party to the Contract represented by at least one of its nominated members in the Management Committee either present in person or represented as per Article 6.10. If there is no quorum in a meeting the meeting shall stand postponed to the same day and time in the next week and if quorum is not present or represented even in the next meeting and subject to a Government member being present the members present and represented will constitute the quorum and take decisions and decisions taken by such quorum shall be final and binding to all the absenting Parties or Parties not represented notwithstanding the provisions of Article 6.13. The

Management Committee if it considers necessary may appoint legal financial or technical subcommittees comprised of such representatives as may be agreed by the Management Committee to consider any matter requiring approval or decision of the Management Committee. Such subcommittee expenses shall form part of Contract Cost with relevant cost classification as decided by the Management Committee pursuant to the Section 2 of the Accounting Procedure and will be cost recoverable. In the event a Party to the Contract is not entitled to vote in the Operating Committee meetings being in default under the Operating Agreement and Operator notifies Chairman of the default by the Party then the issue of exercising voting right by such defaulting Party in the Management Committee meetings shall be discussed by the Management Committee. The Management Committee excluding the defaulting Party after duly hearing the views of the defaulting Party on the matter of their default under Operating Agreement shall 27 take unanimous decision on exclusion or otherwise of the defaulting Party from voting in the Management Committee meetings. For avoidance of any doubt it is clearly understood that unanimous decision by the Management Committee referred to in this Article 6.16 excludes defaulting Party from such decision. Accordingly if the Management Committee decides to exclude the defaulting Party from voting in the Management Committee then the said Party shall not be entitled to vote in the meetings of the Management Committee under Contract. In that event notwithstanding the provisions of Article 6.13 decisions of the Management Committee shall be made by vote of the members of the Management Committee excluding the member appointed by the said Party in default and any vote or purported vote by such member in the Management Committee shall be ignored. The said Party in default shall be bound by all decisions of the Management Committee. The nondefaulting Parties under the Operating Agreement shall indemnify Government against any claims of whatsoever nature which may arise due to exclusion of defaulting Party from voting in the Management Committee. 28

OPERATORSHIP OPERATING AGREEMENT AND OPERATING COMMITTEE ARTICLE 7 7.1 7.2 7.3 7.4 XYZ shall be the Operator for the purpose of carrying out Petroleum Operations pursuant to this Contract during the term of the Contract. No change in the operatorship shall be effected

without the consent of the Government and such consent shall not be unreasonably withheld. The functions required of the Contractor under this Contract shall be performed by the Operator on behalf of all constituents of the Contractor subject to and in accordance with the terms and provisions of this Contract and generally accepted modern oilfield and petroleum industry practices provided however that this provision shall not be construed as relieving the constituents of the Contractor from any of its obligations or liability under the Contract. Within forty five 45 days of the Effective Date or such longer period as may be agreed to by Government the Companies constituting the Contractor shall execute an Operating Agreement. The said agreement shall be consistent with the provisions of this Contract and shall provide for among other things a b c d the appointment resignation removal and responsibilities of the Operator; the establishment of an Operating Committee comprising of an agreed number of representatives of the Companies chaired by a representative of the Operator; functions of the said Operating Committee taking into account the provisions of the Contract procedures for decision making frequency and place of meetings; and contribution to costs default sole risk disposal of Petroleum and assignment as between the Parties to the Operating Agreement. 7.4.1 7.4.2 Operator shall provide to the Government a copy of the duly executed Operating Agreement within thirty 30 days of the Effective Date or such longer period as may be agreed to by the Government. In case a single Company constitutes the Contractor the provisions of Article 7.4 and 7.4.1 shall not be applicable. However in case of increase in the number of constituents of the Contractor the provisions of Article 7.4 and 7.4.1 shall apply from the date of such increase in the number of the constituents. 29 ARTICLE 8 GENERAL RIGHTS AND OBLIGATIONS OF THE PARTIES 8.1 Subject to the provisions of this Contract the Contractor shall have the following rights a b c d e subject to the provisions of Article 12 the exclusive right to carry out Petroleum Operations to recover costs and expenses as provided in this Contract. The right shall exclude exploitation of coalignite bed methane CBM by the Contractor in the Contract Area; the right to use free of charge such quantities of Petroleum produced as are reasonably required for conducting Petroleum Operations in the Contract Area in accordance with generally accepted

modern oilfield and petroleum industry practices; the right to lay pipelines build roads construct bridges ferries aerodromes landing fields radio telephones and related communication and infrastructure facilities and exercise other ancillary rights as may be reasonably necessary for the conduct of Petroleum Operations subject to such approvals as may be required and the applicable laws in force from time to time for the regulation and control thereof; the right to use all available technical data seismic and well information maps samples etc. of the Contract Area as on the Effective Date free of to nominal copyingreproduction costs for further charge subject Petroleum Operations. The Contractor shall submit the list of all data required by them to Directorate General of Hydrocarbons DGH based on the list of data provided in the information docket for the block pertaining to the Contract Area as soon as possible but not later than one hundred and eighty 180 days from the execution of the Contract and the same if available and reproducible shall be made available to the Contractor in the office of DGH within ninety 90 days from the submission of such request for data by the Contractor provided the Effective Date of the Contract has commenced and the Contractor has furnished relevant guarantees under Article 29 of the Contract. such other rights as are specified in this Contract. 8.2 The Government reserves the right to itself or to grant to others the right to prospect for and mine minerals or substances other than Petroleum within the Contract Area; provided however that if after the Effective Date others are issued rights or the Government proceeds directly to prospect for and mine in the Contract Area any minerals or substances other than Petroleum the Contractor shall use its best efforts to avoid obstruction to or interference with such operations within the Contract Area and the third parties and/or the Government 30 as the case may be shall use best efforts to ensure that operations carried out do not obstruct or unduly interfere with Petroleum Operations in the Contract Area. 8.3 The Contractor shall having due regard to modern oilfield and petroleum industry practices a b c d e f g h except as otherwise expressly provided in this Contract conduct all Petroleum Operations at its sole risk cost and expense and provide all funds necessary for the conduct of Petroleum Operations including funds for the purchase or lease of equipment materials or supplies required for Petroleum Operations as well as

for making payments to employees agents and Subcontractors; conduct all Petroleum Operations within the Contract Area diligently expeditiously efficiently and in a safe and workmanlike manner pursuant to the Work Programme formulated in accordance with Contract; ensure provision of all information data samples etc. which may be required to be furnished under the applicable laws or under this Contract; ensure that all equipment materials supplies plant and installations used by the Contractor the Operator and Subcontractors comply with generally accepted standards and are of proper construction and kept in safe and good working order; in the preparation and implementation of Work Programmes and in the conduct of Petroleum Operations follow modern oilfield and petroleum industry practices with such degree of diligence and prudence reasonably and ordinarily exercised by experienced parties engaged in a similar activity under similar circumstances and conditions; the procedure for acquisition of goods and services as of the Effective Date shall be as per the AppendixF of this Contract. Based on economic considerations and generally accepted practices in the international petroleum industry with the objective of ensuring cost and operational efficiency in the conduct of Petroleum Operations the AppendixF to this Contract may be modified or changed with the prior approval of the Management Committee when circumstances so justify; after the designation of a Development Area pursuant to this Contract forthwith proceed to take all necessary action for prompt and orderly development of the Development Area and for the production of Petroleum in accordance with the terms of this Contract; appoint experienced representative and in his absence a suitably qualified replacement therefor who shall be resident in India and who shall have full authority to take such steps as may be necessary to implement this Contract and whose names shall on appointment within ninety 90 days after commencement of the first Contract Year be made known to the Government; sufficiently technically competent and a 31 i j k provide acceptable working conditions living accommodation and access to medical attention and nursing care for all personnel employed in Petroleum Operations; carry out such other obligations as are specified in this Contract in particular those specified in Article 14; and be always mindful of the rights and interests of India in the conduct of Petroleum Operations. 32 ARTICLE 9 GOVERNMENT

ASSISTANCE 9.1 Upon application in the prescribed manner and subject to compliance with applicable laws and relevant procedures the Government or its nominee will a b c use their good offices to provide the right of ingress and egress from the Contract Area and any facilities used in Petroleum Operations wherever located and which may be within their control; use their good offices when necessary to assist the Contractor in procurement or commissioning of facilities required for execution of Work Programmes including necessary approvals permits consents authorisations visas work permits Licenses including Licenses and Leases rights of way easement surface rights and security protection at the Contractors cost required pursuant to this Contract and which may be available from resources within its control; and in the event that onshore facilities are required outside the Contract Area for Petroleum Operations including but not limited to storage loading and processing facilities pipelines and offices use their good offices in assisting the Contractor to obtain from the authorities of the state in which such facilities are required such licenses permits authorizations consents security protection at the Contractors cost surface rights and easements as are required for the construction and operation of the said facilities by the Contractor. 33 ARTICLE

10 DISCOVERY DEVELOPMENT AND PRODUCTION 10.1 If and when a Discovery is made within the Contract Area the Contractor shall a b c forthwith inform the Management Committee and Government of the Discovery; promptly thereafter but in no event later than a period of thirty 30 days from the date of the Discovery furnish to the Management Committee and Government particulars in writing of the Discovery; and promptly run tests to determine whether the Discovery is of potential commercial interest and within a period of sixty 60 days after completion of such tests submit a report to the Management Committee containing data obtained from such tests and its analysis and interpretation thereof together with a written notification of whether in the Contractors opinion such Discovery is of potential commercial interest and merits appraisal. If the Contractor determines to conduct a drill stem or production test in open hole or through perforated casing with regard to any Exploration Well it shall notify the Government of the time of such test at least forty eight 48 hours prior to the proposed test and the Government shall have the right to have a

representative present during such test. If pursuant to Article 10.1 c the Contractor notifies the Management Committee that the Discovery is of potential commercial interest the Contractor shall prepare and submit to the Management Committee within one hundred and twenty 120 days of such notification a proposed Appraisal Programme with a Work Programme and Budget to carry out an adequate and effective appraisal of such Discovery designed to achieve both the following objectives i determine without delay and in any event within the period specified in Article 10.5 whether such Discovery is a Commercial Discovery and ii determine with reasonable precision the boundaries of the area to be delineated as the Development Area. The proposed Appraisal Programme shall be reviewed by the Management Committee within thirty 30 days after submission thereof pursuant to Article 10.3. The said Appraisal Programme together with the Work Programme and Budget submitted by the Contractor which may be revised or modified or amended by the Contractor in light of the Management Committee review shall be adopted as the Appraisal Programme and the Contractor shall promptly commence implementation thereof; and the annual Budget for the Exploration Period adopted pursuant to Article 5 shall be revised accordingly. 34 10.2 10.3 10.4 10.5 10.6 10.7 The Contractor shall in respect of a Discovery of Crude Oil advise the Management Committee by notice in writing within a period of eighteen 18 months for onland and shallow water blocks and thirty 30 months for deepwater blocks from the date on which the notice provided for in Article 10.1 c was delivered whether such Discovery should be declared a Commercial Discovery or not. Such notice shall be accompanied by a report on the Discovery setting forth all relevant technical and economic data including estimated recoverable reserves and production sustainable production expenditures prevailing and forecasted prices and other pertinent technical and economic factors according to modern oilfield and petroleum industry practices as well as all evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or for the Contractor with respect to the Discovery and any other relevant information. If the Contractor is of the opinion that Crude Oil has been discovered in commercial quantities it shall submit the proposal to the Management Committee for review that the Discovery

be declared a Commercial Discovery. In the case of a Discovery of Gas the provisions of Article 21 shall apply. estimated development levels The Management Committee shall within forty 40 days of the date of the notice referred to in Article 10.5 review the proposal of the Contractor and request any other additional information it may reasonably require so as to complete the review of the proposal made by the Contractor. The Contractor shall furnish the additional information within thirty 30 days from the date of the request. The review by the Management Committee shall be made and conveyed to the Contractor within the later of a ninety 90 days from the date of notice referred to in Article 10.5 or b forty 40 days of receipt of such other information as may be required under this Article. If the Contractor declares the Discovery a Commercial Discovery after taking into account the advice of the Management Committee as referred in the Article 10.6 within two hundred 200 days of the declaration of the Discovery as a Commercial Discovery the Contractor shall submit to the Management Committee a comprehensive development plan of the Commercial Discovery which shall a b c relate to the Discovery Area and contain a Reservoir or part thereof and the boundaries of the proposed Development Area; be designed to ensure the most efficient beneficial and timely use of the Petroleum resources discovered; and be prepared in accordance with sound engineering economic safety and environmental principles recognised in the generally accepted modern oilfield and petroleum industry practices. Such plan shall contain detailed proposals by the Contractor for the construction establishment and operation of all facilities and services for and inental to the recovery storage and transportation of the Petroleum from the proposed 35 Development Area to the Delivery Point together with all data and supporting information including but not limited to i ii description of the nature and characteristic of the Reservoir data statistics interpretations and conclusions on all aspects of the geology Reservoir evaluation Petroleum engineering factors Reservoir models estimates of reserve in place possible production magnitude nature and ratio of Petroleum fluids and analysis of producible Petroleum; outlines of the development project andor alternative development projects if any describing the production facilities to be installed and the number of Wells to be drilled under such development project andor

alternative development projects if any; estimate of the rate of production to be established and projection of the possible sustained rate of production in accordance with modern oilfield and petroleum industry practices under such development project and/or alternative development projects if any which will ensure that the area does not suffer an excessive rate of decline of production or an excessive loss of Reservoir pressure; estimates of Development Costs and Production Costs under such development project and/or alternative development projects if any; v Contractors recommendations as to the particular project that it would iii iv 10.8 prefer; vi Work Programme and Budget for development proposals relating to the proposed Development Area; vii anticipated adverse impact on the environment and measures to be taken for prevention or minimisation thereof and for general protection of the environment in conduct of operations; viii measures to be taken for the health and safety of persons employed in Petroleum Operations; the information required in Article 21. ix A proposed development plan submitted by the Contractor pursuant to Article 10.7 may be approved by the Management Committee within one hundred and ten 110 days of submission thereof or eighty 80 days of receipt of any additional information requested by the Management Committee. In case the Management Committee requires any reasonable additional information the same shall be requested by it within eighty 80 days from the submission of the development plan. The Contractor shall provide such additional information within thirty 30 days from the request by the Management Committee. If within a period of one hundred and ten 110 days after submission of a proposed development plan or eighty 80 days from the receipt of any additional information where asked by the Management Committee the Management Committee fails to convey a decision to the Contractor the Contractor shall have option to submit the proposal to the Government. Also where the Management Committee rejects the development plan of the Contractor the Contractor can submit the development 36 10.9 10.10 10.11 10.12 10.13 10.14 plan for the approval of the Government. The Government shall respond on the proposed development plan submitted by the Contractor within one hundred and ten 110 days. In case Government refuses to approve the proposed development plan it shall convey the reasons for such

refusal and the Contractor shall be given opportunity to make appropriate modifications to meet concerns of Government and the provisions of the foregoing Article and resubmit the plan within ninety 90 days from the date of receipt of refusal from the Government. A Development Plan approved by the Management Committee or Government as may be the case from time to time shall commit the Contractor to the obligations stipulated in Articles 10.10 to 10.12. Work Programmes and Budgets for Development and Production Operations shall be submitted to the Management Committee as soon as possible after the approval of a Development Plan under Article 10.8 and thereafter not later than 31st December each Year in respect of the Year immediately following. The Management Committee when considering any Work Programme and Budget may require the Contractor to prepare an estimate of potential production to be achieved through the implementation of the said Work Programme and Budget for each of the three 3 Years following the Year to which the Work Programme and Budget relate. If major changes in yearly estimates of potential production are required these shall be based on evidence necessitating such changes. Not later than the fifteenth 15th of January each Year in respect of the Year immediately following commencement of Commercial Production the Contractor shall determine the Programme Quantity with the approval of the Management Committee. The Programme Quantity for any Year shall be the maximum quantity of Petroleum based on Contractors estimates as approved by the Management Committee which can be produced from a Development Area consistent with modern oilfield and petroleum industry practices and minimising unit production cost taking into account the capacity of the producing Wells gathering lines separators storage capacity and other production facilities available for use during the relevant Year as well as the transportation facilities up to the Delivery Point. Proposed revisions to the details of a Development Plan or an annual Work Programme or Budget in respect of Development and Production Operations shall for good cause and if the circumstances so justify be submitted for approval to the Management Committee. In the event the area encompassing the Commercial Discovery extends beyond the Development Area designated in the Development Plan either within the original Contract Area but subsequently relinquished or outside the original Contract

Area the Management Committee may make recommendations to the Government 37 concerning enlargement of the Development Area provided the same was not awarded to any other company by the Government or is not held by any other party or not on offer by the Government and no application for a License or Lease is pending with the Government. However in case the area is held by any other party or on offer by the Government or application for License or Lease is pending with the Government the Management Committee shall notify the same to the Government for further action on the matter. Government may consider such request for extension at its sole discretion and on terms and conditions which it may consider fit. 38

ARTICLE 11 PETROLEUM MINING LEASE FOR OFFSHORE AREA

11.1 11.2 11.3 11.4 The Contractor shall submit an application for grant of License in respect of the Contract Area as early as possible but not later than fifteen 15 Business Days from the date of execution of this Contract. On submission of a development plan of a Commercial Discovery pursuant to Article 10.7 the Contractor shall submit an application for a Lease in respect of the proposed Development Area. Where a part of a Reservoir in respect of which a Commercial Discovery has been declared extends beyond the Contract Area subject to Article 10.14 such area may be included in the proposed Development Area in relation to which application for a Lease is made on terms and conditions as deemed by the Government; provided that such area is a b c not subject to a license or lease granted to any other person; not the subject of negotiations bidding for a license or lease; and available for licensing i.e. is not an area over which Petroleum Operations are excluded. Where a Development Plan has been approved pursuant to Article 10 and the Contractor has complied with the terms and conditions of the License and this Contract and is not in breach of any of the terms thereof or the provisions of any law and subject to normal Government clearances approvals being obtained by the Contractor as applicable before grant issue of the Lease the Government shall grant to the Contractor a Lease over the Development Area as agreed subject to Article 11.5 to enable the Contractor to carry out Petroleum Operations in the Development Area in accordance with the Development Plan. 11.5 The Lease shall be granted for an initial period of twenty 20 years from the date of grant thereof subject to a b cancellation in

accordance with its terms or for termination of this Contract in accordance with its terms; extension by mutual agreement between the Parties for five 5 years or such period as may be agreed after taking into account the balance recoverable reserve and balance economic life of the FieldDevelopment Area from the expiry of the initial period provided that in the event of a Commercial production of Non Associated Natural Gas the extension may 39 be for a period of ten 10 years or such period as may be mutually agreed between the Parties after taking into account the balance recoverable reserves and balance economic life of the FieldDevelopment Area from the date of expiry of the initial term; and the terms of this Contract and other terms and conditions as set forth in such Lease be consistent with this Contract and the relevant legislation. c 40

ARTICLE 11

PETROLEUM MINING LEASE FOR ONSHORE AREA 11.1 11.2 11.3 11.4 The Contractor shall submit an application for grant of License in respect of the Contract Area as early as possible but not later than fifteen 15 Business Days from the date of execution of this Contract. On submission of a development plan of a Commercial Discovery pursuant to Article 10.7 the Contractor shall submit an application for a Lease in respect of the proposed Development Area to the relevant State Governments. Where a part of a Reservoir in respect of which a Commercial Discovery has been declared extends beyond the Contract Area subject to Article 10.14 such area may be included in the proposed Development Area in relation to which application for a Lease is made on terms and conditions as deed by the Central Government; provided that such area is a b c not subject to a license or lease granted to any other person; not the subject of negotiationsbidding or contract awarded for a license or lease; and available for licensing i.e. is not an area over which Petroleum Operations are excluded. Where a Development Plan has been approved pursuant to Article 10 and the Contractor has complied with the terms and conditions of the License and this Contract and is not in breach of any of the terms thereof or the provisions of any law and subject to normal Government clearancesapprovals being obtained by the Contractor as applicable before grantissue of the Lease the Central Government will assist the Contractor in obtaining the Lease from the relevant State Governments over the Development Area as agreed subject to Article 11.5 to enable

the Contractor to carry out Petroleum Operations in the Development Area in accordance with the Development Plan. 11.5 The Lease shall be granted for an initial period of twenty 20 years from the date of grant thereof subject to a b cancellation in accordance with its terms or for termination of this Contract in accordance with its terms; extension by mutual agreement between the Parties for five 5 years or such period as may be agreed after taking into account the balance recoverable reserve and balance economic life of the FieldDevelopment 41 Area from the expiry of the initial period provided that in the event of a Commercial production of Non Associated Natural Gas the extension may be for a period of ten 10 years or such period as may be mutually agreed between the Parties after taking into account the balance recoverable reserves and balance economic life of the FieldDevelopment Area from the date of expiry of the initial term; and the terms of this Contract and other terms and conditions as set forth in such Lease be consistent with this Contract and the relevant legislation. c 42 12.1 12.2 12.3 ARTICLE 12 UNIT DEVELOPMENT If a Reservoir in a Discovery Area is situated partly within the Contract Area and partly in an area in India over which other parties have a contract to conduct petroleum operations and both parts of the Reservoir can be more efficiently developed together on a commercial basis on receiving information in writing from any party to these contracts or any information on this from any bonafide source the Government may for securing the more effective recovery of Petroleum from such Reservoir by notice in writing to the Contractor require that the Contractor a b c collaborate and agree with such other parties on the joint development of the Reservoir ; submit such agreement between the Contractor and such other parties to the Government for approval within one hundred and eighty 180 days; and prepare a plan for such joint development of the said Reservoir within one hundred and eighty 180 days of the approval of the agreement referred to in b above. If no plan is submitted within the period specified in Article 12.1 c or such longer period as the Government and the Contractor and the other parties referred to in Article 12.1 may agree or if such plan as submitted is not acceptable to the Government and the Parties cannot agree on amendments to the proposed joint development plan the Government may cause to be prepared at the expense of the Contractor

and such other parties a plan for such joint development consistent with generally accepted modern oilfield and petroleum industry practices which shall take into consideration any plans and presentations made by the Contractor and the aforementioned other parties. If the parties are unable to agree on the proposed plan for joint development the Government may call for a joint development plan from an independent agency which agency may make such a proposal after taking into account the position of the parties in this regard. Such a development plan if approved by Government shall be binding on the parties notwithstanding their disagreement with the plan. However the Contractor may in case of any disagreement on the issue of joint development or the proposed joint development plan prepared in accordance with Article 12.2 or within forty five 45 Business Days of the plan approval as aforesaid in this Article notify the Government that it elects to surrender its rights in the ReservoirDiscovery in lieu of participation in a joint development. 43 12.4

12.5 If a proposed joint development plan is agreed and adopted by the parties or adopted following determination by the Government the plan as finally adopted shall be the approved joint development plan and the Contractor shall comply with the terms of the said development plan as if the Commercial Discovery is established. The provisions of Articles 12.1 12.2 and Article 12.3 shall apply mutatis mutandis to a Discovery of a Reservoir located partly within the Contract Area which although not equivalent to a Commercial Discovery if developed alone would be a Commercial Discovery if developed together with that part of the Reservoir which extends outside the Contract Area to the areas subject to contract for petroleum operations by other parties. 44

ARTICLE 13
MEASUREMENT OF PETROLEUM 13.1 13.2 Petroleum used for internal consumption for Petroleum Operations flared saved and sold from the Contract Area shall be measured by methods and appliances generally accepted and customarily used in modern oilfield and petroleum industry practices and approved by the Management Committee and the Government. The Government may at all reasonable times inspect and test the appliances used for measuring the volume and determining the quality of Petroleum provided that any such inspection or testing shall be carried out in such a manner so as not to unduly interfere with Petroleum Operations. 13.3 Before

commencement of production from the Contract Area the Parties shall mutually agree on a methods to be employed for measurement of volumes of Petroleum production; the point or points at which Petroleum shall be measured and the respective shares allocated to the Parties in accordance with the terms of this Contract; the frequency of inspections and testing of measurement appliances and relevant procedures relating thereto; and the consequences of a determination of an error in measurement.

b c d The Contractor shall undertake to measure the volume and quality of the Petroleum Produced and Saved from the agreed measurement point consistent with generally accepted modern oilfield and petroleum industry practices with the frequency and according to procedures agreed pursuant to Article 13.3. The Contractor shall not make any alteration in the agreed method or procedures for measurement or to any of the approved appliances used for that purpose without the written consent of the Management Committee and the Government. the Contract Area at The Contractor shall give the Government timely notice of its intention to conduct measuring operations or any agreed alteration for such operations and the Government shall have the right to be present at and supervise either directly or through authorised representatives such operations.

13.4 13.5 45 13.6 The Contractor shall keep all the records of analysis and measurement of hydrocarbons calibrations and proving of measurement system and make available to Government or its authorized agency such records on request. 46

ARTICLE 14 PROTECTION OF THE ENVIRONMENT

14.1 The Government and the Contractor recognise that Petroleum Operations will cause some impact on the environment in the Contract Area. Accordingly in performance of the Contract the Contractor shall conduct its Petroleum Operations with due regard to concerns with respect to protection of the environment and conservation of natural resources and shall in particular;

a b employ modern oilfield and petroleum industry practices and standards including advanced techniques practices and methods of operation for the prevention of Environmental Damage in conducting its Petroleum Operations; take necessary and adequate steps to i ii prevent Environmental Damage and where some adverse impact on the environment is unavoidable to minimise such damage and the consequential effects thereof on property and

people; ensure adequate compensation for injury to persons or damage to property caused by the effect of Petroleum Operations; and c comply with the requirements of applicable laws and the reasonable requirements of the Government from time to time. If the Contractor fails to comply with the provisions of paragraph bi of Article 14.1 or contravenes any relevant law and such failure or contravention results in any Environmental Damage the Contractor shall forthwith take all necessary and reasonable measures to remedy the failure and the effects thereof. If the Government in accordance with the laws has good reason to believe that any works or installations erected by the Contractor or any operations conducted by the Contractor are endangering or may endanger persons or any property of any person or are causing or may cause pollution or are harming or may harm fauna or flora or the environment to a degree which the Government deems unacceptable the Government may require the Contractor to take remedial measures within such reasonable period as may be determined by the Government and to repair any such damage. If the Government deems it necessary it may also require the Contractor to discontinue Petroleum Operations in whole or in part until the Contractor has taken such remedial measures or has repaired any damage caused.

14.2 14.3 47 14.4 The measures and methods to be used by the Contractor for the purpose of complying with the terms of paragraph bi of Article 14.1 shall be determined in timely consultation with the Government upon the commencement of Petroleum Operations or whenever there is a significant change in the scope or method of conducting Petroleum Operations and shall take into account the international standards applicable in similar circumstances and the relevant environmental impact study carried out in accordance with Article 14.5 below. The Contractor shall notify the Government in writing of the measures and methods finally determined by the Contractor and shall cause such measures and methods to be reviewed from time to time in the light of prevailing circumstances.

14.5 The Contractor shall cause a person or persons with special knowledge on environmental matters to carry out two environmental impact studies in order a b to determine at the time of the studies the prevailing situation relating to the environment human beings and local communities the flora and fauna in the Contract Area and in the adjoining or

neighbouring areas; and to establish the likely effect on the environment human beings and local communities the flora and fauna in the Contract Area and in the adjoining or neighbouring areas in consequence of the relevant phase of Petroleum Operations to be conducted under this Contract and to submit for consideration by the Parties methods and measures contemplated in Article 14.4 for minimising Environmental Damage and carrying out Site Restoration activities. The first of the aforementioned studies shall be carried out in two parts namely a preliminary part which must be concluded before commencement of any field work relating to a seismographic or other survey and a final part relating to drilling in the Exploration Period. The part of the study relating to drilling operations in the Exploration Period shall be approved by Government before the commencement of such drilling operations it being understood that such approval shall not be unreasonably withheld. the aforementioned studies shall be completed before The second of commencement of Development Operations and shall be submitted by the Contractor as part of the Development Plan with specific approval of Government being obtained before commencement of Development Operations it being understood that such approval shall not be unreasonably withheld. The studies mentioned in Article 14.5 above shall contain proposed environmental guidelines to be followed in order to minimize Environmental Damage and shall include but not be limited to the following to the extent appropriate to the respective study taking into account the phase of operations to which the study relates

14.5.1	14.5.2	14.5.3	48	a	b	c	d	e	f	g	h	i	j	k	l	m	n	o	p	q	r	s
--------	--------	--------	----	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---	---

proposed access cutting; clearing and timber salvage; wildlife and habitat protection; fuel storage and handling; use of explosives; camps and staging; liquid and solid waste disposal; cultural and archaeological sites; selection of drilling sites; terrain stabilization; protection of freshwater horizons; blowout prevention plan; flaring during completion and testing of Gas and Oil Wells; abandonment of Wells; rig dismantling and site completion; reclamation for abandonment; noise control; debris disposal; and protection of natural drainage and water flow. 14.5.4 Subject to the provision of all applicable laws and notifications on protection of environment any new project or expansion or modernization projects for petroleum operations for which a proposal is submitted by the Contractor the

Government shall complete the assessment of the project within a period of ninety 90 days from the receipt of the requisite documents and data from the project authorities and completion of public hearing. The decision of the Government on the proposal of the Contractor for environmental clearance shall be conveyed within thirty 30 days thereafter. 14.6 The Contractor shall ensure that a b c Petroleum Operations are conducted in an environmentally acceptable and safe manner consistent with modern oilfield and petroleum industry practices and that such Petroleum Operations are properly monitored; the pertinent completed environmental impact studies are made available to its employees and to its contractors and Subcontractors to develop adequate and proper awareness of the measures and methods of environmental protection to be used in carrying out the Petroleum Operations; and the contracts entered into between the Contractor and its contractors and Subcontractors relating to its Petroleum Operations shall include the provisions stipulated herein and any established measures and methods for the implementation of the Contractors obligations in relation to the environment under this Contract. 49 14.7 14.7.1 14.7.2 14.8 The Contractor shall prior to conducting any drilling activities prepare and submit for review by the Government contingency plans for dealing with Oil spills fires acents and emergencies designed to achieve rapid and effective emergency response. The plans referred to above shall be discussed with the Government and concerns expressed shall be taken into account. In the event of an emergency acent Oil spill or fire arising from Petroleum Operations affecting the environment the Contractor shall forthwith notify the Government and shall promptly implement the relevant contingency plan and perform such Site Restoration as may be necessary in accordance with modern oilfield and petroleum industry practices. In the event of any other emergency or acent arising from the Petroleum Operations affecting the environment the Contractor shall take such action as may be prudent and necessary in accordance with modern oilfield and petroleum industry practices in such circumstances. In the event that the Contractor fails to comply with any of the terms contained in Article 14.7 within a period specified by the Government the Government after giving the Contractor reasonable notice in the circumstances may take any action which may be necessary to ensure compliance with such

terms and to recover from the Contractor immediately after having taken such action all costs and expenditures incurred in connection with such action together with such interest as may be determined in accordance with Section 1.7 of Appendix C of this Contract.

14.9 On expiry or termination of this Contract or relinquishment of part of the Contract Area the Contractor shall a b subject to Article 27 remove all equipment and installations from the relinquished area or former Contract Area in a manner agreed with the Government pursuant to an abandonment plan; and perform all necessary Site Restoration in accordance with modern oilfield and petroleum industry practices and take all other action necessary to prevent hazards to human life or to the property of others or the environment.

14.10 The Contractor shall prepare a proposal for the restoration of site including abandonment plan and requirement of funds for this and the annual contribution. This will be submitted along with the annual Budget for the consideration and approval of the Management Committee. The annual contribution shall be deposited by the Contractor in the Site Restoration fund which will be established in accordance with the scheme notified by the Government.

50 14.11 Subject to Section 3.2 of Accounting Procedure any Site Restoration fund scheme formulated by Government and subject to provisions of this Contract any and all costs incurred by the Contractor pursuant to this Article shall be cost recoverable to sinking funds established for abandonment and restoration of the Contract Area. including but not limited

14.12 In this Article a reference to Government includes the State Government.

14.13 Where the Contract Area is partly located in areas forming part of certain national parks sanctuaries mangroves wetlands of national importance biosphere reserves and other biologically sensitive areas passage through these areas shall generally not be permitted. However if there is no passage other than through these areas to reach a particular point beyond these areas permission of the appropriate authorities shall be obtained.

14.14 The obligations and liability of the Contractor for the environment hereunder shall be limited to damage to the environment which a b occurs after the Effective Date; and results from an act or omission of the Contractor.

51 15.1 15.2 15.3 15.4 15.5 15.6 15.7 15.8

ARTICLE 15 RECOVERY OF COST PETROLEUM

The Contractor shall be entitled to recover Contract Costs out of a

percentage of the total value of Petroleum Produced and Saved from the Contract Area in the Year in accordance with the provisions of this Article. Exploration Costs incurred by the Contractor in the Contract Area upto the date of first Commercial Production shall be aggregated and the Contractor shall be entitled to recover the aggregate of such Exploration Costs out of the Cost Petroleum at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date of such Commercial Production. The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Exploration Costs which it has incurred in any Year after the date of Commercial Production at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date such Exploration Costs are incurred. Development Costs incurred by the Contractor in the Contract Area upto the date of first Commercial Production shall be aggregated and the Contractor shall be entitled to recover out of the Cost Petroleum the aggregate of such Development Costs at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date of such Commercial Production. The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Development Costs which it has incurred after the date of first Commercial Production at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date such Development Costs are incurred. The Contractor shall be entitled to recover in full during any Year the Production Costs incurred in that Year out of the Cost Petroleum. The Contractor shall be entitled to recover in full during any Year the royalty payments to the GovernmentState Governments in that Year out of the Cost Petroleum. If during any Year the Cost Petroleum is not sufficient to enable the Contractor to recover in full the Contract Costs due for recovery in that Year in accordance with the provisions of Articles 15.1 to 15.7 then subject to the provisions of Article 15.12 52 15.9 15.10 15.11 a recovery shall first be made of royalty payments; and b recovery shall next be made of the Production Costs; and c recovery shall next be made of the Exploration Costs; and d recovery shall then be made of the Development Costs. The unrecovered portions of Contract Costs shall be carried forward to the following Year and the Contractor shall be entitled to recover such Contract Costs in such Year or the subsequent

Years as if such Contract Costs were due for recovery in that Year or the succeeding Years until the unrecovered Contract Costs have been fully recovered out of Cost Petroleum from the Contract Area. The maximum amount of Cost Petroleum to which the Contractor shall be entitled in accordance with the provisions of this Article shall be to be taken from the accepted bid X percent X of the total value of the Petroleum Produced and Saved from the Contract Area. For the purposes of this Article as well as Article 16 costs receipts and income shall be converted into production unit equivalents and vice versa viz both in physical and monetary terms using the relevant prices established pursuant to Article 19 for Crude Oil and Article 21 for Natural Gas. Pending completion of the calculations required to establish definitively the Contractors entitlement to Cost Petroleum from the Contract Area in any Year the Contractor shall take delivery provisionally of volumes of Crude Oil or Natural Gas representing its estimated Cost Petroleum entitlement calculated with reference to estimated production quantities costs and prices as established by the Contractor and approved by the Management Committee. Such provisional determination of Cost Petroleum shall be made every Quarter on an accumulative basis. Within ninety 90 days of the end of each Year a final calculation of the Contractors entitlement to Cost Petroleum based on actual production quantities costs and prices for the entire Year as reflected in audited accounts under Article 25.4.3 shall be undertaken and any necessary adjustments to the Cost Petroleum entitlement shall be agreed upon between the Government and the Contractor within thirty 30 days and made within thirty 30 days thereafter.

15.12 Where more than one Party constitutes the Contractor the percentage of the total Cost Petroleum from the Contract Area which shall be available to each such Party in any Year for recovery of its share of Contract Costs shall be determined on the basis of the respective Participating Interest of each such Party.

53 ARTICLE 16 PRODUCTION SHARING OF PETROLEUM

16.1 16.2.1 16.2.2 16.2.3 16.2.4 16.2.5 The Parties to this Contract shall share in the Profit Petroleum in each Year in accordance with the provisions of this Article. A Partys share of Profit Petroleum in any Year shall be calculated on the basis of the Investment Multiple actually achieved by the Contractor at the end of the preceding Year for the Contract Area as provided in

AppendixD. When the Investment Multiple of the Contractor at the end of any Year is less than one and one half 1.5 the Government shall be entitled to take and receive [] percent and the Contractor shall be entitled to take and receive [] percent of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than one and one half 1.5 but is less than two 2.0 the Government shall be entitled to take and receive [] percent and the Contractor shall be entitled to take and receive [] percent of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than two 2.0 but is less than two and one half 2.5 the Government shall be entitled to take and receive [] percent and the Contractor shall be entitled to take and receive [] percent of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than two and one half 2.5 but is less than three 3.0 the Government shall be entitled to take and receive [] percent and the Contractor shall be entitled to take and receive [] percent of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than three 3.0 but is less than three and one half 3.5 the Government shall be entitled to take and receive [] percent and the Contractor shall be entitled to take and receive [] percent of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. 16.2.6 When the Investment Multiple of the Contractor at the end of any Year is equal to or more than three and one half 3.5 the Government shall be entitled to take and receive [] percent and the Contractor shall be entitled to take and receive [] percent of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. These figures shall be as per the bid of the Contractor and accepted by Government. Any balance left to the credit of the Parties in any Site Restoration account opened pursuant to the provision of Article 14.10 after Site Restoration has been done by the Contractor in accordance with the provisions of this Contract and the laws in

this regard shall be shared between the Government and the Contractor as per the Investment Multiple reached at the time of ceasing of production from the Contract Area. Other than ANG or NANG the Government shall have the option to take its entitlement to Profit Petroleum either in cash or in kind in any Year. In case of ANG or NANG as the case may be the Government shall have the option to take its entitlement to Profit Petroleum in cash or in kind and such option shall be exercised at interval of every five 5 Years from the commencement of first Commercial Production from the Contract Area. In accordance with the Article 16.4.1 The Government shall exercise such option by giving a written notice to the Contractor not later than thirtieth 30th June in the preceding Year in which the entitlement is due. Once the Government has exercised its option the same shall continue unless the Government informs the Contractor otherwise. Where the Government has informed the Contractor of its intention to take its share in kind the Parties shall mutually agree on a procedure for delivery of the Governments share of Profit Petroleum and where relevant the composition of the Petroleum which is to be delivered. The value of the Contractors Investment Multiple at the end of any Year in respect of the Contract Area shall be calculated in the manner provided for and on the basis of the net cash flows specified in AppendixD to this Contract. However the amount of Profit Petroleum to be shared between the Government and the Contractor shall be determined for each Quarter on an accumulative basis. Pending finalisation of accounts Profit Petroleum shall be shared between the Government and the Contractor on the basis of provisional estimated figures of Contract Costs production prices receipts income and any other income or allowable deductions and on the basis of the value of the Investment Multiple achieved at the end of the preceding Year. All such provisional estimates shall be approved by the Management Committee. When it is necessary to convert monetary units into physical units of production equivalents or vice versa the price or prices determined pursuant to Articles 19 and 21 for Crude Oil 55 Condensate and Natural Gas respectively shall be used. Within ninety 90 days of the end of each Year a final calculation of Profit Petroleum based on actual costs quantities prices and income for the entire Year shall be completed and any necessary adjustments to the sharing of Petroleum

shall be agreed upon between the Government and the Contractor within thirty 30 days and made within thirty 30 days thereafter. Explanation The Profit Petroleum due to the Government shall be deposited with Pay Accounts officer or its successor Ministry of Petroleum Natural Gas Government of India Shastri Bhavan New Delhi by 10th of the Month following each Quarter 16.6 The Profit Petroleum due to the Contractor in any Year from the Contract Area shall be divided amongst the Parties constituting the Contractor in proportion to their respective Participating Interest. 56

ARTICLE 17 TAXES ROYALTIES RENTALS DUTIES ETC. 17.1 17.2 17.2.1 Companies their employees persons providing any materials supplies services or facilities or supplying any ship aircraft machinery equipment or plant whether by way of sale or hire to the Companies for Petroleum Operations or for any other purpose and the employees of such persons shall be subject to all fiscal legislation in India except where pursuant to any authority granted under any applicable law they are exempted wholly or partly from the application of the provisions of a particular law or as otherwise provided herein. Pursuant to the provisions of section 42 of the Incometax Act 1961 the allowances specified herein shall apply in computing income tax payable by a Company on its profits and gains from the business of Petroleum Operations in lieu of and not in addition to corresponding allowances provided for under the heading Profits and Gains of Business or Profession in the Incometax Act 1961. Any other allowance which are not specified herein shall be treated in accordance with the provisions of Incometax Act 1961. Subject to the provisions herein below deductions at the rate of one hundred percent 100 per annum shall be allowed for all expenditures both capital and revenue expenditures incurred in respect of Exploration Operations and drilling operations. The expenditure incurred in respect of Development Operations other than drilling operations and Production Operations will be allowable as per the provisions of the Incometax Act 1961. The expenses so incurred are subject to the following a where any expenditure is not solely incurred on Petroleum Operations or is incurred as part of or in conjunction with any other business only that proportion of the total expenditure which can be proved to the assessing officer to represent a fair proportionate part thereof having regard to all relevant facts and

circumstances shall be allowed; sections 40A and 44C of the Incometax Act 1961 shall apply. b

17.2.2 A Company shall be entitled for income tax purposes only to deduct all its unsuccessful Exploration Costs in contract areas covered by other contracts from the aggregate value of Petroleum allocable to the Company from any Fields in the Contract Area in the manner as follows a unsuccessful Exploration Costs incurred in contract areas other than the Contract Area where a Commercial Discovery has been made up to the date of commencement of Commercial Production shall be aggregated and 57 17.2.3 17.2.4 17.2.5 b the Company shall be entitled to deduct such costs at the rate of one hundred per cent 100 per annum; unsuccessful Exploration Costs incurred in contract areas other than the Contract Area where a Commercial Discovery has been made after the commencement of Commercial Production shall be deductible at the rate of one hundred per cent 100 per annum of such costs beginning from the Year such costs are incurred. All allowable expenditure incurred prior to the Year in which Commercial Production commences shall be aggregated and the assessed loss for that Year as well as the assessed loss if any incurred in the assessment year relevant to the Year in which Commercial Production commences or in any subsequent assessment year shall be carried forward to succeeding assessment years and set off as provided in the Incometax Act 1961. For any or all accumulated expenditures incurred in respect of Exploration Operations and drilling operations prior to the date of commercial production Companies shall have option to amortize such expenditures over a period of ten 10 years from the date of first commercial production. The profits and gains of the business of the Parties comprising the Contractor consisting of Petroleum Operations shall for the purpose of levy of income tax under the Incometax Act 1961 be computed on the basis of the value determined in accordance with Article 19 of its Participating Interest share of Crude Oil produced and saved and sold or otherwise disposed of from the Contract Area and from any revenue realised on the sale of Associated or Non Associated Natural Gas referred to in Article 21 as well as any other gains or receipts from Petroleum Operations as reduced by the deductions as specified herein and except as herein provided all the provisions of the Incometax Act 1961 shall apply. 17.2.6 Companies shall be

eligible for benefits available under section 80 IA of the Incometax Act 1961 as applicable from time to time.

17.3 For the purposes of Article 17.2 and section 42 of the Incometax Act 1961

17.3.1 The following terms used in section 42 of the Incometax Act 1961 shall have the meanings corresponding to the terms used in this Contract and defined in Article 1 as follows

a b agreement means this Contract as defined in Article 1; commercial production shall have the meaning assigned in Article 1.

17.3.2 The terms assessing officer assessed loss and assessment year shall have the meaning as defined in the Incometax Act 1961.

58 17.3.3 17.4 17.5 17.6 17.7 17.8 17.9 The other terms used herein and defined in Article 1 shall have the meaning therein ascribed.

Companies Lessee shall be required to pay royalty to the Government Lessor for offshore areas at the rate of ten percent 10 of the wellhead value of Crude Oil and Natural Gas. In case of an onshore area Companies shall be required to pay to the State Governments Lessor at the rate of twelve point five zero percent 12.5 of the wellhead value of Crude Oil and ten percent 10 of the wellhead value of Natural Gas. In case of an offshore area falling beyond four hundred 400 metre isobath the rate of royalty payable by Companies Lessee to the Government Lessor shall be at the rate of five percent 5 of the wellhead value of Crude Oil and Natural Gas for the first seven years from the date of commencement of Commercial Production in the Field. The valuation of Crude Oil and Natural Gas shall be as per the Article 19 and Article 21 respectively. The royalty amount due to GovernmentState Governments shall be payable latest by the end of the succeeding Month.

Machinery plant equipment materials and supplies imported by the Contractor and its Subcontractors solely and exclusively for use in Petroleum Operations under this Contract or similar contracts with the Government where customs duty has been exempted by the Government shall be exempt from customs duties and export duties or other charges on reexportation of the said items in accordance with applicable legislation. The Government shall have the right to inspect the records and documents of the physical item or items for which an exemption has been provided pursuant to Article 17.5 to determine that such item or items are being or have been imported solely and exclusively for the purpose for which the exemption was granted. The Government shall also be

entitled to inspect such physical items wherever located to ensure that such items are being used for the purpose herein specified and any item not being so used shall immediately become liable to payment of the applicable customs duties. Subject to Article 27 the Contractor and its Subcontractors may sell or otherwise transfer in India all imported items which are no longer required for Petroleum Operations subject to applicable laws including rules regulations procedures notifications etc. governing customs duties and sale or disposal of such items. Any sales tax or tax of similar nature payable on the sales of Petroleum under this Contract shall be borne/reimbursed by the buyers. Subject to the provisions herein above provided the Contractor shall be liable for payment of annual license charges and rental fees and other charges under the Rules; 59 b c d e f charges payable by specified industries or in connection with Petroleum Operations under applicable legislation; payments for purchase lease or rental of land or land rights in connection with Petroleum Operations; taxes fees or charges for specific services rendered on request or to the public generally; customs duties except for those items subject to exemption as provided in Article 17 applicable at the rates specified from time to time; and stamp duties registration fees license fees taxes such as taxes on property or assets not calculated by reference to income or otherwise exempted or other levies fees or charges of a nondiscriminatory nature and generally applicable in India or in the State where Petroleum Operations are being conducted. If any change in or to any Indian law rule or regulation dealing with income tax or other corporate tax export/import tax excise customs duty or any other levies duties or taxes imposed on Petroleum or dependent upon the value of Petroleum results in a material change to the expected economic benefits accruing to any of the Parties after the date of execution of the Contract the Parties shall consult promptly in good faith to make necessary revisions and adjustments to the Contract in order to maintain such expected economic benefits to each of the Parties provided however that the expected economic benefits to the Parties shall not be reduced as a result of the operation of this Article. 17.10 60

ARTICLE 18 DOMESTIC SUPPLY SALE DISPOSAL AND EXPORT OF CRUDE OIL AND CONDENSATE 18.1 18.2 18.3 18.4 Until such time as the total availability to the Government of

Crude Oil and Condensate from all Petroleum production activities in India meets the total national demand each Company comprising the Contractor shall be required to sell in the domestic market in India all of the Companys entitlement to Crude Oil and Condensate from the Contract Area in order to assist in satisfying the national demand. If during any Year India attains Selfsufficiency the Government shall promptly thereafter but in no event later than the end of the first Quarter of the following Year so advise the Companies by written notice. In such event as from the end of the second Quarter of the following Year or such earlier date as the Parties may mutually agree domestic sale obligation shall be suspended and the Company shall have the right to lift and export its Participating Interest share of Crude Oil and Condensate until such time if any as Selfsufficiency shall have ceased to exist. If Selfsufficiency ceases to exist during a Year the Government shall recover its position to ask Companies under Article 18.1 in respect of the following Year by giving ninety 90 days notice thereof to the Companies to sell Crude Oil and Condensate in the Indian domestic market. Upon India achieving Selfsufficiency the Companies shall be entitled to freely lift and export any Crude Oil and Condensate pursuant to this Article 18 subject to Governments generally applicable destination restrictions to countries with which the Government for policy reasons has severed or restricted trade. No later than sixty 60 days prior to the commencement of production in a Field and thereafter no less than sixty 60 days before the commencement of each Year the Contractor shall cause to be prepared and submitted to the Parties a production forecast setting out the total quantity of Crude Oil that it estimates can be produced from a Field during the succeeding Year based on a maximum efficient rate of recovery of Crude Oil from that Field in accordance with modern oilfield and petroleum industry practices. No later than thirty 30 days prior to the commencement of each Quarter the Contractor shall inform its estimate of production for the succeeding Quarter and shall endeavour to produce the forecast quantity for each Quarter. 18.5 Each Company comprising the Contractor shall throughout the term of this Contract have the right to separately take in kind and dispose of all its share of Cost Petroleum and Profit Petroleum and shall have the obligation to lift the said 61 18.6 18.7 Petroleum on a current basis and in such quantities

so as not to cause a restriction of production or inconvenience to the other Companies. The Government shall throughout the term of this Contract have the right to separately take in kind and dispose of its share of Crude Oil and shall have the obligation to lift the said Oil on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the Contractor. For the purpose of implementing the provisions of this Article a Crude lifting procedure and Crude sales agreement based on generally acceptable international terms shall be agreed upon by the Contractor with buyers no later than six 6 months or such shorter period as may be mutually agreed between the Contractor and buyers with the consent of Government prior to the commencement of production in a Field. Such lifting procedure shall be made available to all the Parties to this Contract. 62 ARTICLE 19 VALUATION OF PETROLEUM 19.1 19.2 19.3 19.3.1 19.4

For the purpose of this Contract the value of Crude Oil Condensate and Natural Gas refer Article 21 shall be based on the price determined as provided herein. A price for Crude Oil shall be determined for each Month or such other period as the Parties may agree hereinafter referred to as the Delivery Period in terms of United States Dollars per Barrel on import parity basis with marine freight being determined on the basis of nearest port to the Contract Area for Crude Oil produced and sold or otherwise disposed of from Contract Area for each Delivery Period in accordance with the appropriate basis for that type of sale or disposal specified below. Subject to the provisions of this Article 19 it is clearly understood that the actual prices received by the Companies from the sales will form the basis for the purposes of cost recovery Profit Petroleum sharing and payment of royalty as provided in the Articles 15 16 and 17 respectively. The basis of valuation given in this Article for the purpose of Article 15 16 and 17 shall apply only where Government is of the view that sale prices realised by the Companies are not consistent with the price realisable at Arms Length Sales. In the event that some or all of a Company's or Contractor's total sales of Crude Oil during a Delivery Period are made to third parties at Arms Length Sales all sales so made shall be valued at the weighted average of the prices actually received by a Company calculated by dividing the total receipts from all such sales at the Delivery Point by the total number of Barrels of the Crude Oil sold

in such sales. Each Company constituting the Contractor shall separately submit to the designated nominee of the Government within fifteen 15 days of the end of each Delivery Period a report containing the actual prices obtained in their respective Arms Length Sales for any Crude Oil. Such reports shall distinguish between term sales and spot sales and itemize volumes customers prices received and credit terms and a Company shall allow the designated nominees of the Government to examine the relevant sales contracts. For the purpose of determining price at Arms Length Sales the price of the Crude Oil at which sale takes place will generally be based on per Barrel of one or more crude oils which at the time of calculation are being freely and actively traded in the international market and are similar in characteristics and quality to the Crude Oil in respect of which the price is being determined selling price to be ascertained from Platts Crude Oil Market Wire daily publication Platts or the spot market for the same crude oils ascertained in the same manner whichever 63 price more truly reflects the current value of such crude oils. For any Delivery Period in which sales take place the price shall be the arithmetic average price per Barrel determined by calculating the average for such Delivery Period of the mean of the high and low FOB prices for each day of the crude oils selected for comparison adjusted for differences in the Crude Oil and the crude oils being compared for quality transportation costs delivery time quantity payment terms and other contract terms to the extent known and other relevant factors. In the event that Platts ceases to be published or is not published for a period of thirty 30 consecutive days the Parties shall agree on an alternative daily publication. The Contractor shall make available all the data pertaining to pricing of Crude to enable Government to see that the proposed sale price by the Contractor each constituents of the Contractor reflects a fair market price for the Crude. In the event that at the relevant time no crude oils of similar quality to the Crude Oil to be sold are being actively traded in the international markets where prices can be ascertained by international publication or the official FOB selling prices and the international spot market price vary widely between producers the Parties shall meet in good faith to determine an appropriate pricing basis. The Contractor shall determine the relevant prices in accordance with this Article and the calculation basis of calculation

and the price determined shall be supplied to the Government and shall be subject to agreement by the Government. In the event that the Parties fail to reach agreement on any matter concerning selection of the crude oils for comparison the calculation the basis of or mechanism for the calculation of the prices the prices arrived at the adjustment of any price or generally about the manner in which the prices are determined according to the provisions of this Article within thirty 30 days or such longer period as may be mutually agreed between the Parties from the date of commencement of Commercial Production or the end of each Delivery Period thereafter any Party may refer the matter or matters in issue for final determination by a sole expert or arbitrator appointed as provided in Article 33. If the matter is referred to the sole expert within ten 10 days of the said appointment the Parties shall provide the expert with all information they deem necessary or as the expert may reasonably require. Within fifteen 15 days from the date of his appointment the expert shall report to the Parties on the issues referred to him for determination applying the criteria or mechanism set forth herein and indicate his decision thereon to be applicable for the relevant Delivery Period for Crude Oil and such decision shall be accepted as final and binding by the Parties.

19.4.1 19.5 19.6 19.6.1 19.6.2 19.6.3 Any price or pricing mechanism agreed by the Parties pursuant to the provisions of this Article shall not be changed retroactively. 64 19.7 19.8 In the event that all sales of Crude Oil in a Delivery Period by a Company constituting the Contractor are to be made to an Affiliate the Parties may agree on an alternative method of valuing the Crude Oil for the purposes of this Contract provided that such alternative method results in an internationally competitive fair market valuation for that Delivery Period. In case of disagreement the decision of the Government on determining a Crude price in case of sales to an Affiliate shall be final and binding. In the event that in any Delivery Period there is more than one type of sales referred to in Articles 19.3 and 19.7 then for the purpose of calculating Cost Petroleum and Profit Petroleum entitlement and royalty payments pursuant to Articles 15 16 and 17 respectively a single price per Barrel of Crude Oil for all the sales for the relevant Delivery Period shall be used. Such single price shall be the weighted average of the prices determined for each type of sale weighted by the respective

volumes of Crude Oil sold in each type of sale in the relevant Delivery Period. 19.9 The provisions specified above for the determination of the price of sales of Crude Oil shall apply mutatis mutandis to Condensates. 19.10 The price of Natural Gas shall be determined as provided in Article 21. 65

ARTICLE 20 CURRENCY AND EXCHANGE CONTROL PROVISIONS 20.1

Subject to the provisions herein and to compliance with the relevant provisions of the laws of general application in India governing currency and foreign exchange and related administrative instructions and procedures issued thereunder on a nondiscriminatory basis each Foreign Company comprising the Contractor shall during the term of this Contract have the right to a b c d e f repatriate abroad in United States Dollars or any other freely convertible currency acceptable to the Government and the Foreign Company the net proceeds of sales of Petroleum in India; receive retain and use abroad the proceeds of any export sales of Petroleum under the Contract; open maintain and operate bank accounts with reputable banks both inside and outside India for the purpose of this Contract; freely import through normal banking channels funds necessary for carrying out the Petroleum Operations; convert into foreign exchange and repatriate sums imported pursuant to d above in excess if any of its requirements; and make payments outside of India for purchases services and loans obtained abroad without the requirement that funds used in making such payments must come from or originate in India. Provided however that repatriation pursuant to subparagraphs a and e and payments pursuant to subparagraph f shall be subject to the provisions of any treaties and bilateral arrangements between the Government and any country with respect to payments to or from that country. 20.2 The rates of exchange for the purchase and sale of currency by the Companies shall be the prevailing rates of general application determined by the Reserve Bank of India or such other financial body as may be mutually agreed by the Parties and for accounting purposes under this Contract these rates shall apply as provided in Section 1.6 of AppendixC. 20.3. A Party other than a Foreign Company comprising the Contractor shall be governed by the relevant currency and foreign exchange laws and related administrative instructions and procedures issued thereunder. 20.4 Indian Companies shall have right to remit their portion of expenditure in foreign currencies in

accordance with the exchange control provisions. 66 ARTICLE 21 NATURAL GAS 21.1 Subject to Article 21.2 the Indian domestic market shall have the first call on the utilisation of Natural Gas discovered and produced from the Contract Area. Accordingly any proposal by the Contractor relating to Discovery and production of Natural Gas from the Contract Area shall be made in the context of the Governments policy for the utilisation of Natural Gas and shall take into account the objectives of the Government to develop its resources in the most efficient manner and to promote conservation measures. 21.2 The Contractor shall have the right to use Natural Gas produced from the Contract Area for the purpose of Petroleum Operations including reinjection for pressure maintenance in Oil Fields gas lifting and captive power generation required for Petroleum Operations. 21.3 For the purpose of sales in the domestic market pursuant to this Article 21 the Contractor shall have freedom to market the Gas and sell its entitlement. 21.4 Associated Natural Gas ANG 21.4.1 21.4.2 In the event that a Discovery of Crude Oil contains ANG the Contractor shall declare in the proposal for the declaration of the said Discovery as a Commercial Discovery as specified in Article 10 whether and by what amount the estimated production of ANG is anticipated to exceed the quantities of ANG which will be used in accordance with Article 21.2 such excess being hereinafter referred to as the Excess ANG. In such an event the Contractor shall indicate whether on the basis of the available data and information it has reasonable grounds for believing that the Excess ANG could be commercially exploited in accordance with the terms of this Contract along with the Commercial Production of the Crude Oil from the Contract Area and whether the Contractor intends to so exploit the Excess ANG. Based on the principle of full utilisation and minimum flaring of ANG a proposed development plan for an Oil Discovery shall to the extent practicable include a plan for utilisation of the ANG including estimated quantities to be flared reinjected and to be used for Petroleum Operations; and if the Contractor proposes to commercially exploit the Excess ANG for sale in the domestic market in accordance with Governments policy or elsewhere the proposed plans for such exploitation. 67 21.4.3 21.4.4 If the Contractor wishes to exploit the Excess ANG subject to Article 21.1 the Contractor shall be free to explore markets for the

commercial exploitation of the said Excess ANG and submit its proposals for such exploitation to the Government in accordance with Article 21.4.2. Where the Contractor is of the view that the Excess ANG cannot be commercially exploited and chooses not to exploit the said Excess ANG or is unable to find a market for the Excess ANG pursuant to Article 21.4.3 the Government shall be entitled to take and utilise such Excess ANG free of any costcharge. 21.4.5 If the Government elects to take the Excess ANG as provided in Article 21.4.4 a b c d e the Contractor shall deliver such Excess ANG to the Government or its nominee free of any costcharge at the downstream flange of the GasOil separation facilities; the Contractor shall based on sound petroleum engineering practices install such facilities as would facilitate insofar as practicable uninterrupted delivery of such Excess ANG to the Government or its nominee; the cost of all facilities installed pursuant to paragraph b above shall be borne by the Government or its nominee; the Government or its nominee shall bear all costs including gathering treating processing and transporting costs beyond the downstream flange of the GasOil separation facilities; and the delivery of such Excess ANG shall be subject to procedures to be agreed between the Government or its nominee and the Contractor prior to such delivery such procedures to include matters relating to timing of offtake of such Excess ANG. Parties shall endeavour that such procedures do not restrict Oil production. 21.4.6 21.4.7 The Excess ANG which is not commercially exploited by the Contractor or taken by the Government or its nominee pursuant to this Article 21 shall be returned to the subsurface structure or flared or otherwise disposed off as approved by the Government in the context of the Development Plan provided that flaring will be resorted to only for small quantities and as a last resort. As soon as practicable after the submission of the proposed development plan the Contractor and the Government or its nominee shall meet to discuss the sale and/or disposal of any ANG discovered with a view to giving effect to the provisions of this Article 21 in a timely manner. 21.5 Non Associated Natural Gas NANG

21.5.1 In the event of a Discovery of NANG in the Contract Area the Contractor shall promptly report such Discovery to the Management Committee and the 68 21.5.2 21.5.3 21.5.4 Government and the provisions of Articles 10.1 and 10.2 shall apply. The remaining provisions of Article 10 would apply

to the Discovery and development of NANG only insofar as they are not inconsistent with the provisions of this Article. Notwithstanding the provisions of Article 3 the Contractor shall be entitled to retain the Discovery Area subject to the provisions of this Article 21. If pursuant to Article 10.1 the Contractor gives notification that the Discovery is of potential commercial interest the Contractor shall submit to the Management Committee within one 1 year from the date of notification of the above said Discovery the proposed Appraisal Programme including a Work Programme and Budget to carry out an adequate and effective appraisal of such Discovery to determine i without delay whether such Discovery is a Commercial Discovery and ii with reasonable precision the boundaries of the area to be delineated as the Development Area. Such proposed Appraisal Programme shall be supported by all relevant data such as Well data Contractors best estimate of reserve range and production potential and shall indicate the date of commencement of the proposed Appraisal Programme. The proposed Appraisal Programme together with the Work Programme and Budget referred to in Article 21.5.2 shall be reviewed by the Management Committee within sixty 60 days of its submission by the Contractor. The Management Committee shall offer its comments within the said period. The said Appraisal Programme together with the Work Programme and Budget submitted by the Contractor as revised or modified or amended in light of the Management Committee review and advice shall be adopted as the Appraisal Programme and the Contractor shall promptly proceed with implementation of the said Programme. If on the basis of the results of the Appraisal Programme the Contractor is of the opinion that NANG has been discovered in commercial quantities it shall submit to the Management Committee as soon as practicable but not later than three 3 years from the date of notification of the aforementioned Discovery a proposal for the declaration of the Discovery as a Commercial Discovery. Such proposal shall take into account the Governments policies on Gas utilization and propose alternative options if any for use or consumption of the NANG and be accompanied by a report on the Discovery supported by inter alia technical and economic data evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or on behalf of the Contractor and other relevant

information. If no proposal is submitted to the Management Committee by the Contractor within three 3 years from the said Discovery the Contractor shall relinquish its rights to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area. 69

21.5.5 21.5.6 21.5.7 21.5.8 Where the Contractor has submitted a proposal for the declaration of a Discovery as a Commercial Discovery the Management Committee shall consider the proposal of the Contractor with reference to commercial utilization or commercial development of the NANG in the domestic market or elsewhere and in the context of Governments policy on Gas utilization and the chain of activities required to bring the NANG from the Delivery Point to potential consumers in the domestic market or elsewhere. The Management Committee may within eighty five 85 days of the submission of the said proposal request the Contractor to submit any additional information on the Discovery the anticipated markets or any other related matter that may reasonably be required to facilitate a review. The Contractor shall submit the required information within thirty 30 days of the request by the Management Committee. The Management Committee will advise the Contractor of its review within one hundred and thirty five 135 days from the submission of proposal or within fifty five 55 days from the receipt of additional information as the case may be on the proposal made by the Contractor to declare the Discovery as a Commercial Discovery. If the Contractor declares the Discovery a Commercial Discovery after taking into account the advice of the Management Committee as referred to in the Article 21.5.5 the Contractor shall within one 1 year of the declaration of the Discovery as a Commercial Discovery submit a development plan for the development of the Discovery to the Management Committee for approval. Such plan shall be supported by all relevant information including inter alia the information required in Article 10.7. from information clarificationsadditional Unless otherwise agreed by the Management Committee it shall consider the proposed development plan and give their approval within one hundred and sixty five 165 days of submission thereof or eighty five 85 days from the receipt of the the Contractor. Any clarificationadditional information required by the Management Committee shall be asked for within eighty five 85 days of receipt of the proposal from the Contractor. The Contractor shall provide such

additional information within thirty 30 days from the receipt of request by the Management Committee. If the Management Committee fails to convey its decision within one hundred and sixty five 165 days from the submission of the development plan or eighty five 85 days from the receipt of the clarificationsadditional information whichever is later the Contractor may submit the development plan for the approval of the Government. Also where the Management Committee rejects the development plan of the Contractor the Contractor can submit the development plan for the approval of the Government. Where the development plan is submitted to the Government for approval pursuant to Article 21.5.7 the Government shall convey its decision within one hundred and fifteen 115 days from the date of receipt of the proposal from the ask it Contractor. Government where necessary may considers 70 21.5.9 21.5.10 21.5.11 21.5.12 clarificationsadditional information from the Contractor within eighty five 85 days and shall convey its decision within fifty five 55 days from the date of receipt of such clarificationsadditional information. If the Government has failed to approve or disapproves the Contractors proposed development plan within one hundred and fifteen 115 days from receipt or within fifty five 55 days from the receipt of clarifications information from the Contractor as mentioned in the Article 21.5.8 the Government shall advise the Contractor in writing of the reasons for such failure or disapproval and the Government and the Contractor shall meet to discuss the said development plan and the reasons for the said failure to approve or disapproval and use their best efforts to agree on appropriate modifications thereto to meet the Governments concerns or objections. Thereafter the Contractor shall have the right to resubmit within eighty five 85 days of communication from the Government the proposed development plan duly amended to meet the Governments concerns. Such right of resubmission of the proposed development plan shall be exercisable by the Contractor only once. The Government will respond to the resubmitted plan within one hundred and fifteen 115 days. If no such plan is submitted to the Government within the above specified period the Contractor shall relinquish its right to develop such Gas Discovery and such Discovery shall be excluded from the Contract Area. In the event that the Management Committee or Government as may be the case approves the

Contractors development plan for the development of such Commercial Discovery with such modifications and amendments as the Management Committee or Government as may be the case may approve the said Gas Discovery shall be promptly developed by the Contractor in accordance with the approved plan which shall be the Development Plan. The Contractor will have a two 2 years period from the date of approval of the Development Plan by the Management Committee or Government to tieup the markets for sale of Nonassociated Natural Gas. In the event the Contractor does not commence development of such Discovery within ten 10 years from the date of the first Discovery Well the Contractor shall relinquish its right to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area.

21.6 Valuation of Natural Gas

21.6.1 21.6.2

The Contractor shall endeavour to sell all Natural Gas produced and saved from the Contract Area at armslength prices to the benefits of Parties to the Contract. Notwithstanding the provision of Article 21.6.1 Natural Gas produced from the Contract Area shall be valued for the purposes of this Contract as follows

71 a b c Gas which is used as per Article 21.2 or flared with the approval of the Government or reinjected or sold to the Government pursuant to Article 21.4.5 shall be ascribed a zero value; Gas which is sold to the Government or any other Government nominee shall be valued on the terms and conditions actually obtained including pricing formula and delivery; and Explanation However it is clarified that this provision would apply only when the sale is made to the Government or Government nominee under the provisions of the Contract Gas which is sold or disposed of otherwise than in accordance with paragraph a or b shall be valued on the basis of competitive arms length sales in the region for similar sales under similar conditions. The formula or basis on which the prices shall be determined pursuant to Article 21.6 shall be approved by the Government prior to the sale of Natural Gas to the consumersbuyers within sixty 60 Business Days from the receipt of proposal or from the date of receipt of clarificationadditional information where asked for by the Government. For granting this approval Government shall take into account the prevailing policy if any on pricing of Natural Gas including any linkages with traded liquid fuels and it may delegate or assign this function to a regulatory authority as and when such an authority is in

existence and in place. 21.7 72 ARTICLE 22 EMPLOYMENT TRAINING AND TRANSFER OF TECHNOLOGY 22.1 22.2 22.3 Without prejudice to the right of the Contractor to select and employ such number of personnel as in the opinion of the Contractor are required for carrying out Petroleum Operations in a safe cost effective and efficient manner the Contractor shall to the maximum extent possible employ and require the Operator and Subcontractors to employ citizens of India having appropriate qualifications and experience taking into account experience required in the level and nature of the Petroleum Operations. The Operator shall offer a mutually agreed number of Indian nationals the opportunity for onthejob training and practical experience in Petroleum Operations during the Exploration Period. Not later than six 6 months after approval of the Development Plan the Operator shall in consultation with the Government establish and implement training programmes for staff positions in each phase and level of Petroleum Operations including skilled technical executive and management positions with a view to ensuring employment of nationals of India and gradual and progressive reduction of foreign personnel. At the request of the Government the Foreign Companies shall separately endeavour to negotiate in good faith technical assistance agreements with the Government or a company nominated by Government for this purpose setting forth the terms by which each Foreign Company constituting the Contractor may render technical assistance and make available commercially proven technical information of a proprietary nature for use in India by the Government or the company nominated by Government. The issues to be addressed in negotiating such technical assistance agreements shall include but not be limited to licensing issues royalty conditions confidentiality restrictions liabilities costs and method of payment.

73 ARTICLE 23 LOCAL GOODS AND SERVICES 23.1 In the conduct of Petroleum Operations the Contractor shall a b c give preference to the purchase and use of goods manufactured produced or supplied in India provided that such goods are available on terms equal to or better than imported goods with respect to timing of delivery quality and quantity required price and other terms; employ Indian Subcontractors having the required skills or expertise to the maximum extent possible insofar as their services are available on comparable standards with those obtained elsewhere and at

competitive prices and on competitive that where no such Subcontractors are available preference shall be given to nonIndian Subcontractors who utilise Indian goods to the maximum extent possible subject however to the proviso in paragraph a above; and ensure that provisions in terms of paragraphs a to b above are contained in contracts between the Operator and its Subcontractors. terms; provided Subject to Article 8.3f the Contractor shall establish appropriate procedures including tender procedures for the acquisition of goods and services which shall ensure that suppliers and Subcontractors in India are given adequate opportunity to compete for the supply of goods and services. The tender procedures shall include inter alia the financial amounts or value of contracts which will be awarded on the basis of selective bidding or open competitive bidding the procedures for such bidding and the exceptions to bidding in cases of emergency and shall be subject to the approval of the Management Committee. 23.2 23.3 Within sixty 60 days after the end of each Year the Contractor shall provide the Government with a report outlining its achievements in utilising Indian resources during that Year in accordance with Section 10 of Appendix C to this Contract. 23.4 In this Article goods means equipment materials and supplies. 74 ARTICLE 24 INSURANCE AND INDEMNIFICATION 24.1 Insurance 24.1.1 The Contractor shall during the term of this Contract maintain and obtain insurance coverage for and in relation to Petroleum Operations for such amounts and against such risks as are customarily or prudently insured in the international petroleum industry in accordance with modern oilfield and petroleum industry practices and shall furnish to the Government certificates evidencing that such coverage is in effect. Such insurance policies shall include the Government as additional insured and shall waive subrogation against the Government. The said insurance shall without prejudice to the generality of the foregoing cover a b c d loss or damage to all installations equipment and other assets for so long as they are used in or in connection with Petroleum Operations; provided however that if for any reason the Contractor fails to insure any such installation equipment or assets it shall replace any loss thereof or repair any damage caused thereto; loss damage or injury caused by pollution in the course of or as a result of Petroleum Operations; loss of property or damage or bodily injury suffered by any third party in the

course of or as a result of Petroleum Operations for which the Contractor may be liable; any claim for which the Government may be liable relating to the loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor is liable to indemnify the Government or the State Government; e with respect to Petroleum Operations offshore the cost of removing wrecks and cleaning up operations following any accident in the course of or as a result of Petroleum Operations; and the Contractors and/or the Operators liability to its employees engaged in Petroleum Operations. f 24.1.2 The Contractor shall require its Subcontractors to obtain and maintain insurance against the risks referred to in Article 24.1.1 relating mutatis mutandis to such Subcontractors. 24.2 Indemnity Subject to Article 4.7 the Contractor shall indemnify defend and hold the Government and the State Government harmless against all claims losses and damages of any nature whatsoever including without limitation claims for loss or damage to property or injury or death to persons caused by or resulting from any Petroleum Operations conducted by or on behalf of the Contractor. 75 25.1 25.2 25.3 25.4.1 25.4.2 25.4.3 25.4.4 25.5 25.6 25.7 ARTICLE 25 RECORDS REPORTS ACCOUNTS AND AUDIT The Contractor shall prepare and maintain in original at an office in India accurate and current books records reports and accounts of its activities for and in connection with Petroleum Operations so as to present a fair clear and accurate record of all its activities expenditures and receipts. Based on generally accepted and recognised accounting principles and modern petroleum industry practices record books accounts and accounting procedures in respect of Petroleum Operations shall be maintained on behalf of the Contractor by the Operator at its business office in India in accordance with the Accounting Procedure to this Contract. The Contractor shall submit to the Government regular Statements and reports relating to Petroleum Operations as provided in AppendixC. The annual audit of accounts shall be carried out on behalf of the Contractor by a qualified independent firm of recognised chartered accountants registered in India. The appointment of auditor and the scope of audit should have prior approval of the Management Committee. The Contractor shall submit the audited accounts to the Management Committee for approval within sixty 60 days from

the end of the Year. The Management Committee shall consider and approve the auditors report within thirty 30 days after the submission of such report. Copy of the auditors report shall be submitted to the Government within thirty 30 days after the approval of the Management Committee. The Government shall have the right to audit the accounting records of the Contractor in respect of Petroleum Operations as provided in the Accounting Procedure. The accounting and auditing provisions and procedures specified in this Contract are without prejudice to any other requirements imposed by any statute in India including without limitation any specific requirements of the statutes relating to taxation of Companies. For the purpose of any audit referred to in Articles 25.5 the Contractor shall make available in original to the auditor all such books records accounts and other documents and information as may be reasonably required by the auditor during normal business hours.

76 ARTICLE 26 INFORMATION DATA CONFIDENTIALITY INSPECTION AND SECURITY

26.1 26.2 26.3 The Contractor shall promptly after they become available in India provide the Government free of cost with all data obtained as a result of Petroleum Operations under the Contract including but not limited to geological geophysical geochemical petrophysical engineering Well logs maps magnetic tapes cores cuttings and production data as well as all interpretative and derivative data including reports analyses interpretations and evaluation prepared in respect of Petroleum Operations hereinafter referred to as Data. Data shall be the property of the Government provided however that the Contractor shall have the right to make use of such Data free of cost for the purpose of Petroleum Operations under this Contract as provided herein. The Contractor may for use in Petroleum Operations retain copies or samples of material or information constituting the Data and with the approval of the Government original material except that where such material is capable of reproduction and copies have been supplied to the Government the Contractor may subject to the right of inspection by the Government export subject to any applicable regulations samples or other original Data for processing or laboratory examination or analysis provided that representative samples equivalent in quality size and quantity or where such material is capable of reproduction copies of equivalent quality have first been delivered to the Government. The

Contractor shall keep the Government currently advised of all developments taking place during the course of Petroleum Operations and shall furnish the Government with full and accurate information and progress reports relating to Petroleum Operations on a daily Monthly Yearly or other periodic basis as Government may reasonably require provided that this obligation shall not extend to proprietary technology. The Contractor shall meet with the Government at a mutually convenient location in India to present the results of all geological and geophysical work carried out as well as the results of all engineering and drilling operations as soon as such Data becomes available to the Contractor.

26.4 All Data information and reports obtained or prepared by for or on behalf of the Contractor pursuant to this Contract shall be treated as confidential and subject to the provisions herein below the Parties shall not disclose the thereof to any third party without the consent in writing of the other Parties.

26.5 The obligation specified in Article 26.4 shall not operate so as to prevent disclosure 77 a b c d e f g to Affiliates contractors or Subcontractors for the purpose of Petroleum Operations; to employees professional consultants advisers data processing centres and laboratories where required for the performance of functions in connection with Petroleum Operations for any Party comprising the Contractor; to banks or other financial institutions in connection with Petroleum Operations; to bonafide intending assignees or transferees of a Participating Interest of a Party comprising the Contractor or in connection with a sale of the stock or shares of a Party comprising the Contractor; to the extent required by any applicable law or in connection with any legal proceedings or by the regulations of any stock exchange upon which the shares of a Party comprising the Contractor are quoted; to Government departments for or in connection with the preparation by or on behalf of the Government of statistical reports with respect to Petroleum Operations or in connection with the administration of this Contract or any relevant law or for any purpose connected with Petroleum Operations; and by a Party with respect to any Data or information which without disclosure by such Party is generally known to the public. Any Data information or reports disclosed by the Parties comprising the Contractor to any other person pursuant to Article 26.5 a to d shall be disclosed on the terms that such Data information or reports

shall be treated as confidential by the recipient. Prompt notice of disclosures made by Companies pursuant to Article 26.5 shall be given to the Government. Any Data information and reports relating to the Contract Area which in the opinion of the Government might have significance in connection with offers by the Government of acreages may be disclosed by the Government for such purpose. Government may also disclose such Data or information for any exploration programme to be conducted by a third party in adjoining areas with the consent of the Contractor for better understanding of regional geological setup and such consent by the Contractor shall not be unreasonably withheld. Where an area ceases to be part of the Contract Area the Contractor shall hand over all the originals and copies of the Data and information with respect to that part to the Government within a period of one 1 year from the date of relinquishment or surrender. The Contractor shall however be allowed to retain one copy of the Data in its possession for its own use where required and shall not use the Data for sale or any other purposes. Subject to the provisions of this Article the Contractor shall keep all Data information confidential. 78 26.6 26.7 26.8 26.9 26.10 26.11 The Government shall at all reasonable times through duly authorised representatives be entitled to observe Petroleum Operations and to inspect all assets books records reports accounts contracts samples and Data kept by the Contractor or the Operator in respect of Petroleum Operations in the Contract Area provided however that the Contractor shall not be required to disclose any proprietary technology. The duly authorised representatives shall be given reasonable assistance by the Contractor for such functions and the Contractor shall afford such representatives reasonable use of all facilities and privileges afforded to its own personnel in the field including the use of office space and housing for a period not exceeding 30 mandays in a Year and thereafter at the cost of Government. The said representatives shall be entitled to make a reasonable number of surveys measurements drawings tests and copies of documents take samples and make reasonable use of the equipment and instruments of the Contractor provided that such functions shall not unduly interfere with the Contractors Petroleum Operations. The Contractor shall give reasonable advance notice to the Government or to any other authority designated by the

Government for such purpose of its programme of conducting surveys by aircraft or by ships indicating inter alia the name of the survey to be conducted approximate extent of the area to be covered the duration of the survey the commencement date and the name of the airport or port from which the survey aircraft or ship will commence its voyage. The Government or the authority designated by the Government for such purpose shall have the right to inspect any aircraft or ship used by the Contractor or a Subcontractor carrying out any survey or other operations in the Contract Area and shall have the right to put on board such aircraft or ship Government officers in such number as may reasonably be necessary to ensure compliance by the Contractor or the Subcontractor with the security requirements of India. 79 27.1 27.2 27.3 27.4 27.5 27.6 27.7

ARTICLE 27 TITLE TO PETROLEUM DATA AND ASSETS The Government is the sole owner of Petroleum underlying the Contract Area and shall remain the sole owner of Petroleum produced pursuant to the provisions of this Contract except as regards that part of Crude Oil Condensate or Gas the title whereof has passed to the Contractor or any other person in accordance with the provisions of this Contract. Title to Petroleum to which the Contractor is entitled under this Contract and title to Petroleum sold by the Companies shall pass to the relevant buyer party at the Delivery Point. The Contractor shall be responsible for all costs and risks prior to and including at the Delivery Point and each buyer party shall be responsible for all costs and risks associated with such buyer partys share after the Delivery Point. Title to all Data specified in Article 26 shall be vested in the Government and the Contractor shall have the right to use thereof as therein provided. Assets purchased by the Contractor for use in Petroleum Operations shall be owned by the Parties comprising the Contractor in proportion to their Participating Interest provided that the Government shall have the right to require vesting of full title and ownership in it free of charge and encumbrances of any or all assets whether fixed or movable acquired and owned by the Contractor for use in Petroleum Operations inside or outside the Contract Area such right to be exercisable at the Governments option upon expiry or earlier termination of the Contract. The Contractor shall be responsible for proper maintenance insurance and safety of all assets acquired for Petroleum

Operations and for keeping them in good repair order and working condition at all times and the costs thereof shall be recoverable as Contract Costs in accordance with AppendixC. So long as this Contract remains in force subject to Article 27.5 the Contractor shall free of any charge for the purpose of carrying out Petroleum Operations hereunder have the exclusive use of assets which have become the property of Government. Equipment and assets no longer required for Petroleum Operations during the term of the Contract shall be sold exchanged or otherwise disposed of by the Contractor provided however that the proceeds of sale shall be credited to Petroleum Operations as provided in Appendix C provided that prior written consent of the Management Committee shall be obtained for each transaction in excess of US 50000 Fifty thousand United States Dollars or such other value 80 as may be agreed from time to time by the Management Committee. The consent of the Management Committee shall not be unreasonably withheld. 81

ARTICLE 28 ASSIGNMENT OF PARTICIPATING INTEREST

28.1 Subject to the terms of this Article and other terms of this Contract any Party comprising the Contractor may assign or transfer a part or all of its Participating Interest with the prior written consent of the Government which consent shall not be unreasonably withheld provided that the Government is satisfied that a b c d the prospective assignee or transferee is of good standing has the capacity and ability to meet its obligations hereunder and is willing to provide an unconditional undertaking to the Government to assume its Participating Interest share of obligations and to provide guarantees in respect thereof as provided in the Contract; the prospective assignee or transferee is not a company incorporated in a country with which the Government for policy reasons has restricted trade or business; the prospective assignor or transferee respectively are willing to comply with any reasonable conditions of the Government as may be necessary in the circumstances with a view to ensuring performance under the Contract; and the assignment or transfer will not adversely affect the performance or obligations under this Contract or be contrary to the interests of India. transferor and assignee or

28.1.1 Subject to Article 28.7 nothing in this Article 28 shall prevent a Party comprising the Contractor from assigning or transferring a part or all of its Participating Interest to an Affiliate with the approval of the

Management Committee provided that; a b c d the assignee provides an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for the amount specified in Article 29.2 in a form provided at AppendixG; the assignee provides a parent financial and performance guarantee issued by the guarantor which furnished the guarantee pursuant to Article 29 in respect of the assignor Partys obligations under this Contract in favour of the Government of the performance of such Affiliate assignee of its obligations under this Contract; the prospective Affiliate is not a company incorporated in a country with which the Government for policy reason has restricted trade or business; and the assignment will not adversely affect the performance or obligations under this Contract or be contrary to the interest of India. 82 28.2 In case of any change in the status of a Company or its shareholding resulting in a change in a b the control of the Company; or its relationship with the companies providing the guarantee under Article 29.1 a and 29.1 b; the Company shall seek the consent of the Government for assigning the Participating Interest under the changed circumstances and the provisions of this Article 28 shall apply mutatis mutandis to be obtaining of such consent. For the purpose of this Article 28.2 control has the same meaning as in Article 1.3. 28.3 An application for consent to assign or transfer shall be accompanied by all relevant information concerning the proposed assignment or transfer including detailed information on the proposed assignee or transferee and its shareholding and corporate structure as was earlier required from the Companies constituting the Contractor the terms of the proposed assignment or transfer and the unconditional undertaking referred to in Article. 28.4 28.5 28.6 28.7 The applicant shall also submit such information relating to the prospective assignee or transferee of the assignment or transfer as the Government may reasonably require to enable proper consideration and disposal of the application. No assignment or transfer shall be effective until the approval of the Government is received or deemed to have been received. Approval may be given by the Government on such terms and conditions as it may deem fit. Provided that such terms and conditions may not increase the obligations of the Parties comprising the Contractor. Upon assignment or transfer of its interest in

this Contract the assignor or transferor shall be released and discharged from its obligations hereunder only to the extent that such obligations are assumed by the assignee or transferee with the approval of the Government. In the event that the Government does not give its consent or does not respond to a request for assignment or transfer by a Party comprising the Contractor within one hundred and twenty 120 days of such request and receipt of all information referred to in Article 28.3 above consent shall be deemed to have been given by the Government. An assignment or transfer shall not be made where the Participating Interest to be retained by the proposed assignor or the percentage interest of assignee shall be less than ten per cent 10 of the total Participating Interest of all the constituents of the recommendations of the Management Committee may in special circumstances so permit. the Contractor except where the Government on 83 28.8 Nothing contained in this Article 28 shall prevent a Party comprising the Contractor from mortgaging pledging charging or otherwise encumbering at its own risk and cost all or part of its Participating Interest for the purposes of security relating to finance to the extent required for performing its obligation under the Contract provided that i ii iii iv v vi the avoidance of doubt such Party shall remain solely liable for all its obligations relating to its Participating Interest to the exclusion of the other participants thereto; the encumbrance shall be expressly subordinated to the rights of the other Parties under this Contract. The obligations occurring from the said encumbrance shall be the sole responsibility of the original Party and shall in no manner compromise the rights of other Parties to the Contract; such Party has given reasonable notice of such encumbrance and furnishes to all other Parties including for the Government a certified copy of the executed instruments evidencing the encumbrances; keeping in view the national interest of India prior consent of the Government shall be required which consent shall not be unreasonably withheld of the list of potential lenders with whom such Party can consider hypothecation; the Party creating the charge shall ensure that such charge shall not in any way affect the interest of other Parties or result in interference with joint operations. In the event of any claims or liabilities imposed on other Parties because of the creation of such charges the Party having created charge on its Participating Interest shall indemnify the other Parties; and in

case of foreclosure or default by a borrowing Party the mortgagee shall not be deemed to have acquired a right to carry on either by itself or through an agent the Petroleum Operation without the written consent of the Government of India. The Parties acknowledge that to obtain financing a Party Borrower will be required to secure for a permitted chargee the right to receive a copy of any notice served on the Borrower and the Parties agree that they shall serve a copy of any such notice on any such permitted chargee in accordance with the provisions of Article 37 at the same time as such notice is served on the Borrower. For the purposes of Article 37 the address for service of notices of the permitted chargee shall be that specified in the instrument or instruments referred to in Article 28.8iii. In case lender elects to participate directly or through a company other than the Borrower under the financing arrangement referred to above the same shall be subject to the rights of Government as contained in Article 28.1 of Contract and the preemptive rights of the Parties as may be contained in Operating Agreement. Any Party which wishes to exercise the said preemptive rights will explicitly assume the obligation on the same terms and conditions as the Borrower. 84

28.8.1 28.8.2 ARTICLE 29 GUARANTEES 29.1 Subject to Article 29.1 d each of the Companies constituting the Contractor shall procure and deliver to the Government within thirty 30 days from the Effective Date of this Contract a b c an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for the amount specified in Article 29.2 in a form provided at AppendixG; financial and performance guarantee in favour of the Government from a parent company acceptable to the Government in the form and substance set out in AppendixE1 or where there is no such parent company the financial and performance guarantee from the Company itself in the form and substance setout in AppendixE2; a legal opinion from its legal advisors in a form satisfactory to the Government to the effect that the aforesaid guarantees have been duly signed and delivered on behalf of the guarantors with due authority and is legally valid and enforceable and binding upon them; d Government Companies as defined in the Companies Act and Companies having a net worth of US one 1 billion or more as per the latest audited account shall not be required to furnish bank

guarantee towards its Minimum Work Programme as specified in Article 5 of this Contract; Note This provision shall be applicable for deep water contracts. OR d Government Companies as defined in the Companies Act and Companies having a net worth of US Five Hundred 500 million or more as per the latest audited account shall not be required to furnish bank guarantee towards its Minimum Work Programme as specified in Article 5 of this Contract. Note This provision shall be applicable for onland and shallow water block contracts. 29.2 The amount of the guarantee referred to in Article 29.1 a above shall be an amount equal to thirty five percent 35 of the Companys Participating Interest share of the total estimated annual expenditure in respect of the Minimum Work Programme to be undertaken by the Contractor in the Contract Area during the relevant Year of a Phase subject to Article 29.3. 85 29.3 The guarantee referred to in Article 29.2 shall provide that; 29.4 29.5 29.6 29.7 a b at the end of each Year it shall be automatically renewed for an amount equal to a Companys Participating Interest share of thirty five percent 35 of the total estimated expenditure in respect of the Minimum Work Programme to be undertaken for the following Year of an Exploration Phase unless the Contractor has terminated the Contract in accordance with the terms thereof. The guarantee shall be renewed at the end of each Year positively thirty 30 days before the expiry of the guarantee period. after the completion and due performance of the Minimum Work Programme of a particular Exploration Phase the guarantee will be released in favour of the Company on presentation to the bank of a certificate from the Government that the obligation of the Contractor has been fulfilled and the guarantee may be released subject to Article 29.4. If the Contractor elects to proceed to the second and third Exploration Phase respectively of the Exploration Period a bank guarantee for the succeeding Exploration Phase in terms of Articles 29.1 a 29.2 and 29.3 shall be delivered to the Government with the notice of such election and if such guarantee is not so delivered the provisions of Article 29.5 shall apply. If any of the documents referred to in Article 29.1 is not delivered within the period specified herein this Contract may be terminated by the Government upon ninety 90 days written notice of its intention to do so. Subject to Article 29.7 notwithstanding any change in the composition or shareholding of the parent company furnishing a

performance guarantee as provided herein it shall not under any circumstances be absolved of its obligations contained in the guarantees provided pursuant to Article 29.1b. If a b c d a Party Assignor assigns all or a part of its Participating Interest to a third party Assignee in accordance with Article 28; the Assignee provides an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for an amount equal to the assignees Participating Interest share of the estimated expenditure of the Minimum Work Programme of the Exploration Phase current at the Effective Date of the assignment; the Assignee provides performance guarantee and legal opinion in terms of this Article; and the addendum to the Contract giving effect to the assignment of Participating Interest is executed by all Parties; 86 then the Government shall release the guarantee given by the assignor under Article 29.1 a to the extent of the amount of the guarantee provided by the assignee and where relevant the guarantee under Article 29.1 b. 87 ARTICLE 30 TERM AND TERMINATION OF THE CONTRACT 30.1 30.2 The term of this Contract shall be for the period of the License and any Lease granted thereunder unless the Contract is terminated earlier in accordance with its terms and shall be deemed to have been terminated if for any reason the Contractor ceases to hold such License or Lease. Subject to the provision of Articles 5 14 and 30.6 and without prejudice to the provisions of Article 30.7 or any other provisions of this Contract the Contractor shall have the right to terminate this Contract a with respect to any part of the Contract Area other than a Development Area then producing or that prior thereto had produced Petroleum upon giving ninety 90 days written notice of its intention to do so; and b with respect to any Development Area in which Petroleum is being produced or that prior thereto had produced Petroleum upon giving at least one hundred and eighty 180 days written notice of its intention to do so. 30.3 This Contract may subject to the provisions herein below and Article 31 be terminated by the Government upon giving ninety 90 days written notice to the other Parties of its intention to do so in the following circumstances namely that the Contractor or a Party comprising the Contractor the Defaulting Party a b c d has knowingly submitted any false statement to the Government in any manner which was a material consideration

in the execution of this Contract; or has intentionally and knowingly extracted or authorised the extraction of hydrocarbon not authorized to be extracted by the Contract or without the authority of the Government except such extractions as may be unavoidable as a result of operations conducted hereunder in accordance with generally accepted modern oilfield and petroleum industry practices which when so extracted were immediately notified to the Government or is adjudged bankrupt by a competent court or enters into or scheme of composition with its creditors or takes advantage of any law for the benefit of debtors; or has passed a resolution to apply to a competent court for liquidation of the Company unless the liquidation is for the purpose of amalgamation or reconstruction of which the Government has been given notice and the Government is satisfied that the Companys performance under this 88 Contract would not be adversely affected thereby and has given its approval thereto; or has assigned any interest in the Contract without the prior consent of the Government as provided in Article 28; or has failed to make any monetary payment required by law or under this Contract by the due date or within such further period after the due date as may thereafter be specified by the Government; or has failed to comply with or has contravened the provisions of this Contract in a material particular; or has failed to comply with any final determination or award made by a sole expert or arbitrators subject to Article 33; or has failed to carry out or observe any of the terms and conditions of the License or Lease or the provisions of the Acts or Rules in force thereunder subject however to Article 31. on notice of termination as provided in Article 29.5. e f g h i j PROVIDED THAT where the Contractor comprises two or more Parties the Government shall not exercise its rights of termination pursuant to Article 30.3 on the occurrence in relation to one or more but not all of the Parties comprising the Contractor of an event entitling the Government to terminate the Contract a b if any other Party or Parties constituting the Contractor the nonDefaulting Party or Parties satisfies the Government that it or they isare willing and would be able to carry out the obligations of the Contractor. where the non Defaulting Party or Parties with the consent of the Government hashave acquired the Participating Interest of the Defaulting Party pursuant to the provisions of the Operating Agreement and hashave procured and delivered to the

Government a guarantee or guarantees as referred to in Article 29.1 in respect of the Participating Interest of the Defaulting Party acquired by the non Defaulting Party or Parties. This Contract may also be terminated by the Government on giving the requisite notice specified above if the events specified in Article 30.3 c and d occur with respect to a company which has given a performance guarantee pursuant to Article 29 subject however to Article 30.5. If the circumstance or circumstances that give rise to the right of termination under Article 30.3f or g or i or Article 30.4 are remedied whether by the Defaulting Company or by another Party or Parties in its behalf within the ninety 90 day period or such extended period as may be granted by the Government following the notice of the Governments intention to terminate the Contract as aforesaid such termination shall not become effective. 89 30.4 30.5 30.6 On termination of this Contract for any reason whatsoever the rights and obligations of the Contractor shall cease but such termination shall not affect any rights of any Party which may have accrued or any obligations undertaken or incurred including obligations under Article 5.7 by the Contractor or any Party comprising the Contractor and not discharged prior to the date of termination. 30.7 In the event of termination pursuant to Articles 30.2 30.3 or 30.4 a b the Government may require the Contractor for a period not exceeding one eighty 180 days from the date of termination to continue for the account and at the cost of the Government Crude Oil or Natural Gas production activities until the right to continue such production has been transferred to another entity; a Foreign Company which is a constituent of the Contractor shall have to remove and export all its property subject to Article 27 and the provisions hereof provided that in the event that ownership of any property is in doubt or disputed such property shall not be exported unless and until the doubt or dispute has been settled in favour of the Foreign Company. 30.8 Within ninety 90 days after the termination of this Contract pursuant to Article 30.2 30.3 or 30.4 or such longer period as the Government may agree the Contractor shall comply with Article 14.9 and any reasonably necessary action as directed by the Government to avoid Environmental Damage or hazards to human life or to the property of others. 90 ARTICLE 31 FORCE MAJEURE 31.1 31.2 31.3 31.4 Any nonperformance or delay in performance by any Party hereto of any of its obligations

under this Contract or in fulfilling any condition of any License or Lease granted to such Party or in meeting any requirement of the Act the Rules or any License or Lease shall except for the payment of monies due under this Contract or under the Act and the Rules or any law be excused if and to the extent that such nonperformance or delay in performance under this Contract is caused by Force Majeure as defined in this Article. For the purpose of this Contract the term Force Majeure means any cause or event other than the unavailability of funds whether similar to or different from those enumerated herein the reasonable control of and unanticipated or unforeseeable by and not brought about at the instance of the Party claiming to be affected by such event or which if anticipated or foreseeable could not be avoided or provided for and which has caused the nonperformance or delay in performance. Without limitation to the generality of the foregoing the term Force Majeure shall include natural phenomena or calamities earthquakes typhoons fires wars declared or undeclared hostilities invasions blockades riots strikes insurrection and civil disturbances but shall not include the unavailability of funds. Where a Party is claiming suspension of its obligations on account of Force Majeure it shall promptly but in no case later than seven (7) days after the occurrence of the event of Force Majeure notify the Management Committee in writing giving full particulars of the Force Majeure the estimated duration thereof the obligations affected and the reasons for its suspension. A Party claiming Force Majeure shall exercise reasonable diligence to seek to overcome the Force Majeure event and to mitigate the effects thereof on the performance of its obligations under this Contract. The Party affected shall promptly notify the Management Committee as soon as the Force Majeure event has been removed and no longer prevents it from complying with the obligations which have been suspended and shall thereafter resume compliance with such obligations as soon as possible. 31.5 The Party asserting the claim of Force Majeure shall have the burden of proving that the circumstances constitute valid grounds of Force Majeure under this Article and that such Party has exercised reasonable diligence and efforts to remedy the cause of any alleged Force Majeure. 91 31.6 31.7 Where a Party is prevented from exercising any rights or performing any obligations under this Contract due to Force

Majeure the time for the performance of the obligations affected thereby and for performance of any obligation or the exercise of any right dependent thereon and the term of any Exploration Phase of the Exploration Period or this Contract may be extended to the extent of Force Majeure period or by such period as may be agreed by the Management Committee. Notwithstanding anything contained herein above if an event of Force Majeure occurs and is likely to continue for a period in excess of thirty 30 days the Parties shall meet to discuss the consequences of the Force Majeure and the course of action to be taken to mitigate the effects thereof or to be adopted in the circumstances. 92

ARTICLE 32 APPLICABLE LAW AND LANGUAGE OF THE CONTRACT 32.1 32.2 32.3

This Contract shall be governed and interpreted in accordance with the laws of India. Nothing in this Contract shall entitle the Contractor to exercise the rights privileges and powers conferred upon it by this Contract in a manner which will contravene the laws of India. The English language shall be the language of this Contract and shall be used in arbitral proceedings. All communications hearing or visual materials or documents relating to this Contract shall be written or prepared in English. 32.4 The laws will also include amendments revisions modifications etc. 93 33.1 33.2 33.3 33.4 33.5

ARTICLE 33 SOLE EXPERT CONCILIATION AND ARBITRATION

The Parties shall use their best efforts to settle amicably all disputes differences or claims arising out of or in connection with any of the terms and conditions of this Contract or concerning the interpretation or performance thereof. Matters which by the terms of this Contract the Parties have agreed to refer to a sole expert and any other matter which the Parties may agree to so refer may be referred to a sole expert who shall be an independent and impartial person of international standing with relevant qualifications and experience appointed by agreement between the Parties and who shall not by virtue of nationality personal connection or commercial interest have a conflict between hisher own interest and hisher duty as a sole expert. In the event that the Parties fail or are unable to agree on a sole expert within thirty 30 days or such longer period as may be mutually agreed by Parties the sole expert shall be appointed by a body or an institution or an agency or a person mutually agreed by Parties. In case there is no agreement on the body or an institution or an agency or a person for appointing sole

expert or such institution or agency or body fails to appoint a sole expert within thirty 30 days or such longer period as may be mutually agreed by Parties the matter shall be referred to arbitration. Any sole expert appointed shall be acting as an expert and not as an arbitrator and the decision of the sole expert on matters referred to him/her shall be final and binding on the Parties and shall not be subject to arbitration. Subject to the provisions of this Contract the Parties hereby agree that any controversy difference disagreement or claim for damages compensation or otherwise hereinafter in this Clause referred to as a dispute arising between the Parties which cannot be settled amicably within ninety 90 days after the dispute arises may except for those referred to in Article 33.2 which may be referred to a sole expert be submitted to conciliation or an arbitral tribunal for final decision as hereinafter provided. The arbitral tribunal shall consist of three arbitrators. Each Party to the dispute shall appoint one arbitrator and the Party or Parties shall so advise the other Parties. The two arbitrators appointed by the Parties shall appoint the third arbitrator. Any Party may after appointing an arbitrator request the other Parties in writing to appoint the second arbitrator. If such other Party fails to appoint an arbitrator within thirty 30 days of receipt of the written request to do so such arbitrator may at the request of the first Party be appointed in accordance with Arbitration and Conciliation Act 1996. 94 33.6 33.7 33.8 33.9 33.10 33.11 33.12 33.13 33.14 If the two arbitrators appointed by or on behalf of the Parties fail to agree on the appointment of the third arbitrator within thirty 30 days of the appointment of the second arbitrator and if the Parties do not otherwise agree at the request of either Party the third arbitrator shall be appointed in accordance with Arbitration and Conciliation Act 1996. If any of the arbitrators fails or is unable to act his successor shall be appointed by the Party or person who originally appointed such in the manner set out in this Article as if he was the first appointment. The decision of the arbitral tribunal shall be pronounced within four 4 months unless otherwise extended by the Parties and in case of difference among the arbitrators the decision of the majority shall be final and binding on the Parties. The arbitration agreement contained in this Article 33 shall be governed by the Arbitration and Conciliation Act 1996 Arbitration Act. Arbitration proceedings shall be conducted in accordance with the rules for

arbitration provided in Arbitration Act. The right to arbitrate disputes under this Contract shall survive expiry or the termination of this Contract. Prior to submitting a dispute to arbitration the Parties may by mutual agreement submit the matter for conciliation in accordance with Part III of the Arbitration and Conciliation Act 1996. No arbitration proceedings shall be instituted while conciliation proceedings are pending provided that a Party may initiate arbitration proceedings in the event that dispute has not been resolved by conciliation within sixty 60 days of the date of agreement by the Parties to submit such dispute to conciliation. The venue of the sole expert conciliation or arbitration proceedings pursuant to this Article unless the Parties agree otherwise shall be New Delhi India and shall be conducted in the English language. Insofar as practicable the Parties shall continue to implement the terms of this Contract notwithstanding the initiation of proceedings before a sole expert conciliator or arbitral tribunal and any pending claim or dispute. The fees and expenses of a sole expert or conciliator appointed by the Parties shall be borne equally by the Parties. The cost and expenses of arbitrator appointed by a Party in accordance with the provision of this Article shall be borne by the respective Party and the cost and expenses of third arbitrator and other incidental expenditure in relation to arbitration and liability thereof shall be at the discretion of the arbitrators. Notwithstanding anything contrary contained herein above in the event of dispute among Government Companies and with the Government such disputes shall be settled in accordance with guidelines issued on the subject by Government from time to time.

95 ARTICLE 34 CHANGE OF STATUS OF COMPANIES 34.1 The Parties comprising the Contractor shall notify the Government of any change in the management or control of a Companies or the relationship with any guarantor of the Companies.

96 ENTIRE AGREEMENT AMENDMENTS WAIVER AND MISCELLANEOUS ARTICLE 35 35.1 This Contract supersedes and replaces any previous agreement or understanding between the Parties whether oral or written on the subject matter hereof prior to the execution date of this Contract. 35.2 35.3 35.4 35.5 This Contract shall not be amended modified varied or supplemented in any respect except by an instrument in writing signed by all the Parties which shall state the date upon which the amendment or modification shall become

effective. No waiver by any Party of any one or more obligations or defaults by any other Party in the performance of this Contract shall operate or be construed as a waiver of any other obligations or defaults whether of a like or of a different character. The provisions of this Contract shall inure to the benefit of and be binding upon the Parties and their permitted assigns and successors in interest. In the event of any conflict between any provisions in the main body of this Contract and any provision in the Appendices the provision in the main body shall prevail. 35.6 The headings of this Contract are for convenience of reference only and shall not be taken into account in interpreting the terms of this Contract. 35.7 35.8 Reference to any law or regulation having the force of law includes a reference to that law or regulation as from time to time may be amended extended or reenacted. A reference in this Contract to the word including shall also mean including but not limited to. 97

ARTICLE 36 CERTIFICATES 36.1 A Company shall furnish prior to execution of this Contract a duly authorised copy of a resolution properly and legally passed by the Board of Directors of the Company authorising its President or any VicePresident or any other representative to execute this Contract along with a certificate duly signed by the Secretary or an Assistant Secretary of the Company under its seal in this regard and to the effect that the Company has the power and authority to enter into this Contract and to perform its obligations thereunder and has taken all necessary action to authorise the execution delivery and performance of the Contract. 98 ARTICLE

105 ACCOUNTING PROCEDURE SECTION 1 GENERAL PROVISIONS 1.1
Purpose Generally the purpose of this Accounting Procedure is to set out principles and procedures
of accounting which will enable the Government of India to monitor effectively the Contractors costs
expenditures production and income so that the Governments entitlement to Profit Petroleum can be
accurately determined pursuant to the terms of the Contract. More specifically the purpose of the
Accounting Procedure is to classify costs and expenditures and to define which costs and
expenditures shall be allowable for cost recovery and profit sharing and participation purposes;
specify the manner in which the Contractors accounts shall be prepared and approved; and address
numerous other accounting related matters. This Accounting Procedure is intended to apply to the
provisions of the Contract and is without prejudice to the computation of income tax under
applicable provisions of the IncomeTax Act 1961 as amended.

1.2 Definitions For purposes of this
Accounting Procedure the terms used herein which are defined in the Contract shall have the same
meaning when used in this Accounting Procedure.

1.3 Inconsistency In the event of any
inconsistency or conflict between the provisions of this Accounting Procedure and the other
provisions of the Contract the other provisions of the Contract shall prevail.

1.4 Documentation and
Statements to be submitted by the Contractor

1.4.1 Within ninety 90 days of the Effective Date of
the Contract the Contractor shall submit to and discuss with the Government a proposed outline of
charts of accounts operating records and reports which outline shall reflect each of the categories
and subcategories of costs and income specified in Sections 2 and 3 106 and shall be in
accordance with generally accepted standards and recognized accounting systems and consistent
with normal petroleum industry practice and procedures for joint venture operations. Within ninety 90

days of receiving the above submission the Government shall either provide written notification of its approval of the proposal or request in writing revisions to the proposal. Within one hundred and eighty 180 days from the Effective Date of the Contract the Contractor and the Government shall agree on the outline of charts of accounts records and reports which shall also describe the basis of the accounting system and procedures to be developed and used under this Contract. Following such agreement the Contractor shall expeditiously prepare and provide the Government with formal copies of the comprehensive charts of accounts records and reports and allow the Government to examine the manuals and to review procedures which are and shall be observed under the Contract.

1.4.2 Notwithstanding the generality of the foregoing the Contractor shall make regular Statements relating to the Petroleum Operations as follows i ii iii Production Statement see Section 5 of this Accounting Procedure. Value of Production and Pricing Statement see Section 6 of this Accounting Procedure. Statement of Costs Expenditures and Receipts see Section 7 of this Accounting Procedure. iv Cost Recovery Statement see Section 8 of this Accounting Procedure. v vi Profit Sharing Statement see Section 9 of this Accounting Procedure Local Procurement Statement see Section 10 of this Accounting Procedure vii End of Year Statement see Section 11 of this Accounting Procedure. viii Budget Statement see Section 12 of this Accounting Procedure. All reports and Statements shall be prepared in accordance with the Contract and the laws of India and where there are no relevant provisions in either of these in accordance with generally accepted practices in the international petroleum industry. Each of the entities constituting the Contractor shall be responsible for maintaining its own accounting records in order to comply with all legal requirements and to support all returns or any other accounting reports required by any Government authority in relation to the Petroleum Operations. However for the purposes of giving effect to this Accounting Procedure the Party constituting the Contractor who is the Operator shall be responsible for maintaining at its business office in India on behalf of the Contractor all the

1.4.3 1.4.4 107 accounts of the Petroleum Operations in accordance with the provisions of the Accounting Procedure and the Contract.

1.5 Language and Units of Account 1.6 1.6.1 All accounts records

books reports and Statements shall be maintained and prepared in the English language using mercantile basis of accounting. The accounts shall be maintained in United States Dollars which shall be the controlling currency of account for cost recovery and profit sharing purposes. Metric units and Barrels shall be employed for measurements required under the Contract. Where necessary for clarification the Contractor may also maintain accounts and records in other languages currencies and units. Currency Exchange Rates For conversion purposes between United States Dollars and Indian Rupees or any other currency the monthly average of the daily mean of the buying and selling rates of exchange as quoted by the State Bank of India or any other financial body as may be mutually agreed by the Parties for the Month in which the revenues costs expenditures receipts or income are recorded shall be used. However in the case of any single nonUS Dollar transaction in excess of the equivalent of fifty thousand 50000 US Dollars the conversion into US Dollars shall be performed on the basis of the average of the applicable exchange rates for the day on which the transaction occurred. 1.6.2 Any realized or unrealized gains or losses from the exchange of currency in respect of Petroleum Operations shall be credited or charged to the accounts. A record of the exchange rates used in converting Indian Rupees or any other currencies into United States Dollars as specified in Section 1.6.1 shall be maintained by the Contractor and shall be identified in the relevant Statements required to be submitted by the Contractor in accordance with Section 1.4.2. 1.7 Payments 1.7.1 1.7.2 1.7.3 Subject to Article 20.3 of the Contract and the foreign exchange laws and regulations prevailing from time to time all payments between the Parties shall unless otherwise agreed be in United States Dollars and shall be made through a bank designated by each receiving Party. Unless otherwise specified all sums due under the Contract shall be paid within forty five 45 days from the date on which the obligation to pay was incurred. All sums due by one Party to the other under the Contract during any Month shall for each day such sums are overdue during such Month bear interest compounded daily at the applicable LIBOR plus two 2 percentage points. 108 1.8 Arms Length Transactions 1.9 1.9.1 1.9.2 1.9.3 Unless otherwise specifically provided for in the Contract all transactions giving rise to

revenues costs or expenditures which will be credited or charged to the accounts prepared maintained or submitted hereunder shall be conducted at arms length or on such a basis as will assure that all such revenues costs or expenditures will not be lower or higher as the case may be than would result from a transaction conducted at arms length on a competitive basis with third parties. Audit and Inspection Rights of the Government Without prejudice to statutory rights the Government upon at least twenty 20 Business Days advance written notice to the Contractor shall have the right to inspect and audit during normal business hours all records and documents supporting costs expenditures expenses receipts and income such as the Contractors accounts books records invoices cash vouchers debit notes price lists or similar documentation with respect to the Petroleum Operations conducted hereunder in each Year within two 2 years or such longer period as may be required in exceptional circumstances from the end of such Year. The Government may undertake the conduct of the audit either through its own representatives or through a qualified firm of recognised chartered accountants registered in India or a reputed consulting firm appointed for the purpose by the Government and the costs of audit in case of Government auditors shall be borne by the Government where as for outside auditors this shall be borne by the Contractor as a General and Administrative Cost. In conducting the audit the Government or its auditors shall be entitled to examine and verify at reasonable times all charges and credits relating to the Contractors activities under the Contract and all books of account accounting entries material records and inventories vouchers payrolls invoices and any other documents correspondence and records considered necessary by the Government to audit and verify the charges and credits. The auditors shall also have the right in connection with such audit to visit and inspect at reasonable times all sites plants facilities warehouses and offices of the Contractor directly or indirectly serving the Petroleum Operations and to physically examine other property facilities and stocks used in Petroleum Operations wherever located and to question personnel associated with those operations. Where the Government requires verification of charges made by an Affiliate the Government shall have the right to obtain an audit certificate from an

internationally recognized firm of public accountants acceptable to both the Government and the Contractor which may be the Contractors statutory auditor. Submission of the audit certificate shall in no way relieve or diminish the 109 1.9.4 1.9.5 1.9.6 1.9.7 responsibility of the Contractor for the compliance with the obligations under the Contract. Any audit exceptions shall be made by the Government in writing and notified to the Contractor within one hundred and twenty 120 days following completion of the audit in question. The Contractor shall answer any notice of exception under Section 1.9.4 within one hundred and twenty 120 days of the receipt of such notice. Where the Contractor has after the said one hundred and twenty 120 days failed to answer a notice of exception the exception shall prevail and deemed to have been agreed to by the Contractor. All agreed adjustments resulting from an audit and all adjustments required by prevailing exceptions under Section 1.9.5 shall be promptly made in the Contractors accounts and any consequential adjustments to the Governments entitlement to Petroleum shall be made within thirty 30 days therefrom. Notwithstanding any reference to a Sole Expert or Arbitration in accordance with the provisions of the Contract in case any amount is claimed as due to the Government resulting from the audit exception but not accepted or settled by the Contractor then the Contractor shall deposit such claimed amount in a escrow account to be opened with a financial institution failing mutually agreed agreement with State Bank of India within thirty 30 days from the date when the amount is disputed by the Contractor. The amount in escrow account shall be appropriated or adjusted in accordance with the decision or award of the Sole Expert or Arbitral Tribunal as may be or otherwise as mutually agreed to between the Parties. 1.9.8 If the Contractor and the Government are unable to reach final agreement on proposed audit adjustments either Party may refer any dispute thereon to a sole expert as provided for in the Contract. So long as any issues are outstanding with respect to an audit the Contractor shall maintain the relevant documents and permit inspection thereof until the issue is resolved. 1.10 Revision of the Accounting Procedure By mutual agreement between the Government and the Contractor this Accounting Procedure may be revised from time to time in writing signed by the Parties stating the date upon which the amendments shall become effective.

110 SECTION 2 CLASSIFICATION DEFINITION AND ALLOCATION OF COSTS AND

EXPENDITURES 2.1 Segregation of Costs Costs shall be segregated in accordance with the

purposes for which such expenditures are made. All costs and expenditures allowable under Section

3 relating to Petroleum Operations shall be classified defined and allocated as set out below in this

Section. 2.2 Exploration Costs Exploration Costs are all direct and allocated indirect expenditures

incurred in the search for Petroleum in an area which is or was at the time when such costs were

incurred part of the Contract Area including expenditures incurred in respect of 2.2.1 Aerial

geophysical geochemical palaeontological geological topographical and seismic surveys analysis

and studies and their interpretation. 2.2.2 Core hole drilling and water Well drilling. 2.2.3 2.2.4 2.2.5

2.2.6 2.2.7 Labour materials supplies and services used in drilling Wells with the object of finding

Petroleum or in drilling Appraisal Wells provided that if such Wells are completed as producing Wells

or injection Well for enhancing Oil recovery the costs of completion thereof shall be classified as

Development Costs. Facilities used solely in support of the purposes described in Sections 2.2.1

2.2.2 and 2.2.3 above including access roads all separately identified. Any Service Costs and

General and Administrative Costs directly incurred on exploration activities and identifiable as such

and a portion of the remaining Service Costs and General and Administrative Costs allocated to

Exploration Operations determined by the proportionate share of total Contract Costs excluding

General and Administrative Costs and Service Costs represented by all other Exploration Costs.

Geological and geophysical information purchased or acquired in connection with Exploration

Operations. Any other expenditures incurred in the search for Petroleum not covered under Sections

2.3 or 2.4. 111 2.3 Development Costs 2.3.1 2.3.2 2.3.3 2.3.4 Development Costs are all direct and

allocated indirect expenditures incurred with respect to the development of discoveries within the

Contract Area including expenditures incurred on account of Geological and Geophysical

Development Operations. information acquired in connection with Drilling Development Wells

whether these Wells are dry or producing and drilling Wells for the injection of water or Gas to

enhance recovery of Petroleum. Completing of Exploration Wells by way of installation of casing or

equipment or otherwise or for the purpose of bringing a Well into use as a producing Well or as a Well for the injection of water or Gas to enhance recovery of Petroleum. Purchase installation or construction of production transport and storage facilities for production of Petroleum such as pipelines flow lines production and treatment units wellhead equipment subsurface equipment enhanced recovery systems offshore and onshore platforms export terminals and piers harbours and related facilities and access roads for production activities.

2.3.5 Engineering and design studies for facilities referred to in Section 2.3.3.

2.3.6 Any Service Costs and General and Administrative Costs directly incurred in Development Operations and identifiable as such and a portion of the remaining Service Costs and General and Administrative Costs allocated to development activities determined by the proportionate share of total Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Development Costs.

2.4 Production Costs Production Costs are expenditures incurred on Production Operations after the start of production from the Field which are other than Exploration and Development Costs. The balance of General and Administrative Costs and Service Costs not allocated to Exploration Costs or Development Costs shall be allocated to Production Costs.

2.5 Service Costs Service Costs are direct and indirect expenditures incurred in support of Petroleum Operations including expenditures on the Contract Area warehouses piers marine vessels vehicles motorized rolling equipment aircraft fire and security stations workshops water and sewerage plants power plants housing community and recreational facilities and furniture and tools and in 112 equipment used in these activities. Service Costs in any Year shall include the costs incurred in such Year to purchase and/or construct the said facilities as well as the annual costs of maintaining and operating the same each to be identified separately. All Service Costs shall be regularly allocated as specified in Sections 2.2.5 2.3.5 and 2.4 to Exploration Costs Development Costs and Production Costs and shall be separately shown under each of these categories. Where Service Costs are made in respect of shared facilities the basis of allocation of costs to Petroleum Operations hereunder shall be specified.

2.6 General and Administrative Costs

2.6.1 2.6.2 incurred on general General and

Administrative Costs are expenditures administration and management primarily and principally related to Petroleum Operations in or in connection with the Contract Area and shall include main office field office and general administrative expenditures in India including supervisory accounting and employee relations services; an annual overhead charge for services rendered by the parent company or an Affiliate to support and manage Petroleum Operations under the Contract and for staff advice and assistance including financial legal accounting and employee relations services but excluding any remuneration for services charged separately under this Accounting Procedure provided that i for the period from the Effective Date until the date on which the first Development Plan under the Contract is approved by the Government this annual charge shall be the Contractors verifiable expenditure but shall in no event be greater than the following percentages of the total Contract Costs incurred during the Contract Year in or in connection with the Contract Area and qualifying for recovery pursuant to Section 3 Contract costs in any Contract year in million US

Annual overhead charge	Over 25	Over 5	3 US 60000	2 of Contract Costs in excess of US 2 million.	US 120000	1 of Contract Costs in excess of US 5 million
02	Over 25	Over 5	3	US 60000	2	of Contract Costs in excess of US 2 million.
US 120000	1	of Contract Costs in excess of US 5 million	ii	from the date on which the first Development Plan is approved	the charge shall be at an amount or rate to be agreed on between the Parties and stated in the Development Plan.	2.6.3 All General and Administrative Costs shall be regularly allocated as specified in Sections 2.2.5 2.3.5 and 2.4 to Exploration Costs Development Costs and Production Costs respectively and shall be separately shown under each of these cost categories.

113 SECTION 3 COSTS EXPENSES EXPENDITURES AND INCIDENTAL INCOME OF THE CONTRACTOR

3.1 Costs Recoverable and Allowable Without Further Approval of the Government Costs incurred by the Contractor on Petroleum Operations as per reviewed or approved Work Programme and Budget by the Management Committee as the case may be pursuant to the Contract as classified under the headings referred to in Section 2 shall be allowable for the purposes of the Contract except to the extent provided in Section 3.2 or elsewhere in this Accounting Procedure and subject to audit as referred to in Articles 25.4.1 to 25.4.4 and Article 25.5 as provided for herein. Further the reviewedapproved Work Programme and Budget as the case

may be or reappropriation of costs shall be submitted to the Management Committee for reviewapproval as the case may be within thirty 30 days from end of the relevant Financial Year and subject to the audit and other provisions of the Contract such costs shall be allowable for the purposes of the Contract. in case of variation in costs over 3.1.1 Surface Rights All direct costs necessary for the acquisition renewal or relinquishment of surface rights acquired and maintained in force for the purposes of the Contract except as provided in Section 3.1.9. 3.1.2 Labour and Associated Labour Costs a Contractors locally recruited employees based in India Costs of all the Contractors locally recruited employees who are directly engaged in the conduct of Petroleum Operations under the Contract in India. Such costs shall include the costs of employee benefits and Government benefits for employees and levies imposed on the Contractor as an employer transportation and relocation costs within India of the employee and such members of the employees family as per the personnel policy of the employer as required by law or customary practice in India. If such employees are engaged in other activities in India in addition to Petroleum Operations the cost of such employees shall be apportioned on a time sheet basis according to sound and acceptable accounting principles. b Assigned Personnel 114 Costs of salaries and wages including bonuses of the Contractors employees directly and necessarily engaged in the conduct of the Petroleum Operations under the Contract whether temporarily or permanently assigned irrespective of the location of such employees it being understood that in the case of those personnel only a portion of whose time is wholly dedicated to Petroleum Operations under the Contract only that pro rata portion of applicable salaries wages and other costs as specified in Sections 3.1.2c d e f and g shall be charged and the basis of such pro rata allocation shall be specified. The Contractors costs regarding holiday vacation sickness and disability benefits and living and housing and other customary allowances applicable to the salaries and wages chargeable under Section 3.1.2b above. Expenses or contributions made pursuant to assessments or obligations imposed under the laws of India which are applicable to the Contractors cost of salaries and wages chargeable under Section 3.1.2b above. The Contractors cost of established plans for

employees group life insurance hospitalization pension retirement and other benefit plans of a like nature customarily granted to the Contractors employees provided however that such costs are in accordance with generally accepted standards in the international petroleum industry applicable to salaries and wages chargeable to Petroleum Operations under Section 3.1.2b above. Personal income taxes where and when they are paid by the Contractor to the Government of India for the employee in accordance with the Contractors standard personnel policies. c d e f g Reasonable transportation and travel expenses of employees of the Contractor including those made for travel and relocation of the expatriate employees including their dependent family and personal effects assigned to India whose salaries and wages are chargeable to Petroleum Operations under Section 3.1.2b above. Transportation cost as used in this Section shall mean the cost of freight and passenger service and any accountable inental expenditures related to transfer travel and authorized under the Contractors standard personnel policies. The Contractor shall ensure that all expenditures related to transportation costs are equitably allocated to the activities which have benefited from the personnel concerned. 3.1.3 Transportation Costs The reasonable cost of transportation of equipment materials and supplies within India and from outside India to India necessary for the conduct of Petroleum Operations under the Contract including directly related costs such as unloading charges dock fees and inland and ocean freight charges. 115 3.1.4 Charges for Services i Third Parties The actual costs of contract services services of professional consultants utilities and other services necessary for the conduct of Petroleum Operations under the Contract performed by third parties other than an Affiliate of the Contractor provided that the transactions resulting in such costs are undertaken pursuant to Section 1.8 of this Accounting Procedure. ii Affiliates of Contractor a Professional and Administrative Services and Expenses Cost of professional and administrative services provided by any Affiliate for the direct benefit of Petroleum Operations including but not limited to services provided by the production exploration legal financial insurance accounting and computer services divisions other than those covered by Section 3.1.4 iib which the Contractor may use in lieu of having its own employees. Charges shall be

equal to the actual cost of providing their services shall not include any element of profit and shall not be any higher than the most favourable prices charged by the Affiliate to third parties for comparable services under similar terms and conditions elsewhere and will be fair and reasonable in the light of prevailing modern oilfield and petroleum industry practices.

b Scientific or Technical Personnel Cost of scientific or technical personnel services provided by any Affiliate of the Contractor for the direct benefit of Petroleum Operations which cost shall be charged on a cost of service basis. Charges therefor shall not exceed charges for comparable services currently provided by outside technical service organizations of comparable qualifications. Unless the work to be done by such personnel is covered by an Approved Budget and Work Programme the Contractor shall not authorize work by such personnel without approval of the Management Committee.

c the Equipment facilities and property owned and furnished by Contractors Affiliates at rates commensurate with the cost of ownership and operation provided however that such rates shall not exceed those currently prevailing for the supply of like equipment facilities and property on comparable terms in the area where the Petroleum Operations are being conducted. The equipment and facilities referred to herein shall exclude major investment items such as but not limited to drilling rigs producing platforms oil treating facilities oil and gas loading and transportation systems storage and terminal facilities and other major facilities rates for which shall be subject to separate agreement with the Government.

3.1.5 Communications Cost of acquiring leasing installing operating repairing and maintaining communication systems including radio satellite link and microwave facilities between the Contract Area and the Contractors nearest base facility.

3.1.6 Office Shore Bases and Miscellaneous Facilities Net cost to the Contractor of establishing maintaining and operating any office suboffice shore base facility warehouse housing or other facility directly serving the Petroleum Operations. If any such facility services contract areas other than the Contract Area or any business other than Petroleum Operations the net costs thereof shall be allocated on an equitable and consistent basis.

3.1.7 Environmental Studies and Protection Costs incurred in conducting the environmental impact assessment studies for the Contract Area and in taking environmental

protection measures including abandonment cost or contribution to abandonment funds as may be created for abandonment and Site Restoration pursuant to the terms of the Contract.

3.1.8 Materials and equipment i General So far as is practicable and consistent with efficient and economical operation only such material shall be purchased or furnished by the Contractor for use in the Petroleum Operations as may be required for use in the reasonably foreseeable future and the accumulation of surplus stocks shall be avoided. Material and equipment held in inventory shall only be charged to the accounts when such material is removed from inventory and used in Petroleum Operations. Costs shall be charged to the accounting records and books based on the First in First out method. ii Warranty In the case of defective material or equipment any adjustment received by the Contractor from the suppliers or manufacturers or their agents in respect of any warranty on material or equipment shall be credited to the accounts under the Contract. iii Value of materials charged to the accounts under the Contract 117 a Except as otherwise provided in subparagraph b below materials purchased by the Contractor for use in the Petroleum Operations shall be valued to include invoice price less trade and cash discounts if any purchase and procurement fees plus freight and forwarding charges between point of supply and point of shipment freight to port of destination insurance taxes custom duties consular fees other items chargeable against imported material and where applicable handling and transportation costs from point of importation to warehouse or operating site and these costs shall not exceed those currently prevailing in normal arms length transactions on the open market. b Material purchased from or sold to Affiliates or transferred to or from activities of the Contractor other than Petroleum Operations under the Contract aa bb cc new material hereinafter referred to as condition A shall be valued at the current international price which shall not exceed the price prevailing in normal arms length transactions on the open market; used material which is in sound and serviceable condition and is suitable for reuse without reconditioning hereinafter referred to as condition B shall be priced at not more than seventy five per cent 75 of the current price of the above mentioned new materials; used material which cannot be classified as condition B but which after reconditioning will be further serviceable for

original function as good secondhand condition B material or is serviceable for original function but substantially not suitable for reconditioning hereinafter referred to as condition C shall be priced at not more than fifty per cent 50 of the current price of the new material referred to above as condition A. The cost of reconditioning shall be charged to the reconditioned material provided that the condition C material value plus the cost of reconditioning does not exceed the value of condition B material. Material which cannot be classified as condition B or condition C shall be priced at a value commensurate with its use. Material involving erection expenditure shall be charged at the applicable condition percentage referred to above of the current knockeddown price of new material referred to above as condition A. 118 When the use of material is temporary and its service to the Petroleum Operations does not justify the reduction in price in relation to materials referred to above as conditions B and C such material shall be priced on a basis that will result in a net charge to the accounts under the Contract consistent with the value of the service rendered. Duties Fees and Other Charges 3.1.9 Any duties levies fees charges and any other assessments levied by any governmental or taxing authority in connection with the Contractors activities under the Contract and paid directly by the Contractor except corporate income tax payable by the constituents of the Contractor. 3.1.10 Insurance and Losses Insurance premia and costs incurred for insurance pursuant to Article 24 of the Contract provided that such insurance is customary affords prudent protection against risk and is at a premium no higher than that charged on a competitive basis by insurance companies which are not Affiliates. Except as provided in Sections 3.2 ix Section 3.2x and Section 3.2xi actual costs and losses incurred shall be allowable to the extent not made good by insurance. Such costs may include but are not limited to repair and replacement of property in the Contract Area resulting from damages or losses incurred by fire flood storm theft acent or such other cause. 3.1.11 Legal Expenses All reasonable costs and expenses except Section 3.2 xi resulting from the handling investigating asserting defending or settling of any claim or legal action necessary or expedient for the procuring perfecting retention and protection of the Contract Area and in defending or prosecuting lawsuits involving the Contract Area or any third party claim arising out of

Petroleum Operations under the Contract or sums paid in respect of legal services necessary for the protection of the joint interest of Government and the Contractor shall be allowable. Such expenditures shall include attorneys fees court costs costs of investigation and procurement of evidence and amounts paid in settlement or satisfaction of any such litigation and claims provided such costs are not covered elsewhere in the Accounting Procedure. Where legal services are rendered in such matters by salaried or regularly retained lawyers of the Contractor or an Affiliate such compensation shall be included instead under Section 3.1.2 or 3.1.4 ii above as applicable.

3.1.12 Training Costs All costs and expenses incurred by the Contractor in training as is required under Article 22 of the Contract. 119 3.1.13 General and Administrative Costs The costs described

in Section 2.6.1 and the charge described in Section 2.6.2 of this Accounting Procedure. Royalty License fee surface rentals etc. 3.1.14 Royalty License fee surface rentals dead rents and other

levies and taxes paid to the Government of India or State Government or local Government bodies or authority or agency except income tax paid to the Government. Costs not recoverable and not

allowable under the Contract 3.2 The following costs and expenses shall not be recoverable or allowable whether directly as such or indirectly as part of any other charges or expense for cost

recovery and profit sharing purposes under the Contract i ii iii iv v vi costs and charges incurred before the Effective Date including costs in respect of preparation signature or ratification of this

Contract; expenditures in respect of any financial transaction to negotiate float or otherwise obtain or secure funds for Petroleum Operations including but not limited to interest commission brokerage

and fees related to such transactions as well as exchange losses on loans or other financing whether between Affiliates or otherwise; costs of marketing or transportation of Petroleum beyond

the Delivery Point; expenditures incurred in obtaining furnishing and maintaining the guarantees required under the Contract and any other amounts spent on indemnities with regard to

nonfulfillment of contractual obligations; attorneys fees and other costs and charges in connection with arbitration proceedings and sole expert determination pursuant to the Contract; fines interest

and penalties imposed by Courts of law of the Republic of India; donations and contributions; vii viii

expenditures on creation of any partnership or joint venture arrangement; ix x amounts paid with respect to nonfulfillment of contractual obligations; costs incurred as a result of failure to insure where insurance is required pursuant to the Contract or of failure to follow procedures laid down by an insurance policy or where the Contractor has elected to self insure or has underinsured; costs and expenditures incurred as a result of misconduct or negligence of the Contractor; and expenses of the members of the Management Committee as per Article 6.12. xi xii 3.3 Other costs recoverable and allowable only with Management Committee approval 120 Any other costs and expenditures not included in Section 3.1 or 3.2 of this Accounting Procedure but which have been incurred by the Contractor for the necessary and proper conduct of Petroleum Operations shall be allowed to be recovered only with the express prior approval in writing of the Management Committee. 3.4 Inental Income and Credits All inental income and proceeds received from Petroleum Operations under the Contract including but not limited to the items listed below shall be credited to the accounts under the Contract and shall be taken into account for cost recovery and Profit Petroleum sharing purposes in the manner described in Articles 15 and 16 of the Contract i ii The proceeds of any insurance or claim or judicial awards in connection with Petroleum Operations under the Contract or any assets charged to the accounts under the Contract where such operations or assets have been insured and the premia charged to the accounts under the Contract; Revenue received from third parties for the use of property or assets the cost of which has been charged to the accounts under the Contract; from the by suppliersmanufacturers or their agents in connection with defective material the cost of which was previously charged by the Contractor to the accounts under the Contract; the Contractor adjustment received iii Any v iv Rentals refunds or other credits received by the Contractor which apply to any charge which has been made to the accounts under the Contract; Prices originally charged to the accounts under the Contract for materials subsequently exported from the Republic of India without being used in Petroleum Operations under the Contract; Proceeds from the sale or exchange by the Contractor of assets plant or facilities the acquisition costs of which have been charged to the accounts under the Contract; vi vii Legal costs charged to

the accounts under Section 3.1.11 of this Accounting Procedure and subsequently recovered by the Contractor. 3.5 NonDuplication of Charges and Credits Notwithstanding any provision to the contrary in this Accounting Procedure it is the objective of the Parties that there shall be no duplication of charges or credits to the accounts under the Contract. 121 SECTION 4 RECORDS AND INVENTORIES OF ASSETS 4.1 4.1.1 Records The Contractor shall keep and maintain detailed records of property and assets in use for or in connection with Petroleum Operations under the Contract in accordance with normal practices in exploration and production activities of the international petroleum industry. Such records shall include information on quantities location and condition of such property and assets and whether such property or assets are leased or owned. 4.2 4.2.1 Inventories The Contractor shall a b not less than once every twelve 12 Months with respect to movable assets; and not less than once every three 3 Years with respect to immovable assets take an inventory of the assets used for or in connection with Petroleum Operations in terms of the Contract and address and deliver such inventory to the Government together with a written statement of the principles upon which valuation of the assets mentioned in such inventory has been based. The Contractor shall give the Government at least thirty 30 days notice in writing in the manner provided for in the Contract of its intention to take the inventory referred to in Section 4.2.1 and the Government shall have the right to be represented when such inventory is taken. When an assignment of rights under the Contract takes place a special inventory shall be taken by the Contractor at the request of the assignee provided that the cost of such inventory is borne by the assignee and paid to the Contractor. In order to give effect to Article 27 of the Contract the Contractor shall provide the Government with a comprehensive list of all relevant assets when requested by the Government to do so. 4.2.2 4.2.3 4.2.4 122 SECTION 5 PRODUCTION STATEMENT 5.1 5.1.1 5.1.2 5.1.3 5.1.4 5.1.5 5.1.6 5.1.7 5.1.8 5.1.9 From the date of first production of Petroleum from the Contract Area the Contractor shall submit a monthly Production Statement to Government showing the following information separately of each producing Field and in aggregate for the Contract Area The quantity of Crude Oil and Condensate produced and saved.

The quality and characteristics of such Crude Oil and Condensate produced and saved. The quantity of Associated Natural Gas and Non Associated Natural Gas produced and saved. The quality characteristics and composition of such Natural Gas produced and saved separately. The quantities of Crude Oil Condensate and Natural Gas used for the purposes of carrying on drilling and production operations and pumping to field storage as well as quantities reinjected. The quantities of Crude Oil Condensate and Natural Gas unavoidably lost. The quantities of Natural Gas flared and vented. The size of Petroleum stocks held on the first day of the Month in question. The size of Petroleum stocks held on the last day of the Month in question. 5.1.10 The quantities of Natural Gas reinjected into the Petroleum Reservoir. 5.1.11 The number of days in the Month during which Petroleum was produced from each Field. 5.1.12 The GasOil ratio for each Reservoir and Field for the relevant Month. 5.1.13 Water production water injection and Reservoir pressure data for each Reservoir and Field. 123 5.2 5.3 5.4 5.5 All quantities shown in this Statement shall be expressed in both volumetric terms barrels of Oil and cubic metres of Gas and in the case of Oil in weight metric tonnes. For the purpose of reporting Field production quantities pursuant to this Section the Contractor shall agree with the Management Committee on the exact area to be designated as Development Area. The Government may direct in writing that the Contractor include other reasonable particulars relating to the production of Petroleum in its monthly Production Statement and the Contractor shall comply with such direction. The Production Statement for each Month shall be submitted to Government no later than fifteen 15 days after the end of such Month. 124 6.1 6.1.1 6.1.2 6.1.3 6.1.4 6.1.5 6.1.6 6.1.7 6.2 SECTION 6 VALUE OF PRODUCTION AND PRICING STATEMENT The Contractor shall for the purposes of Article 19 of the Contract prepare a Statement providing calculations of the value of Crude Oil and Condensate produced and saved during each Month. This Statement shall contain the following information The quantities prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and Condensate to third parties made during the Month in question. The quantities prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and Condensate made during the Month in question

other than to third parties if any. The quantities of Crude Oil and Condensate appropriated by the Contractor to refining or other processing without otherwise being disposed of in the form of Crude Oil or Condensate. The value of stocks of Crude Oil and Condensate on the first day of the Month in question. The value of stocks of Crude Oil and Condensate on the last day of the Month in question. The percentage volume of total sales of Crude Oil and Condensate made by the Contractor during the Month that are Arms Length Sales to third parties. Information available to the Contractor insofar as required for the purposes of Article 19 of the Contract concerning the prices of competitive crude oils produced by the main petroleum producing and exporting countries including contract prices discounts and premia and prices obtained on the spot markets. The Contractor shall for the purpose of Article 21 of the Contract prepare a Statement providing calculations of the value of Associated Natural Gas and Non Associated Natural Gas produced flared internally used saved and sold during each Month. This Statement shall contain all information of the type specified in Section 6.1 for Crude Oil as is applicable to Gas and such other relevant information as may be required by Government.

125 6.3 6.4 The Statements required pursuant to Sections 6.1 and 6.2 shall include a detailed breakdown of the calculation of the prices of Crude Oil Condensate Associated Natural Gas and Non Associated Natural Gas pursuant to the provisions of Articles 19 and 21. The Value of Production and Pricing Statement for each Month shall be submitted to Government not later than thirty 30 days after the end of such Month.

126 SECTION 7 STATEMENT OF COSTS EXPENDITURES AND RECEIPTS 7.1 7.1.1 7.1.2 7.1.3 7.1.4 7.2 The Contractor shall prepare with respect to each Quarter a Statement of Costs Expenditures and Receipts under the Contract using mercantile basis of accounting. The Statement shall distinguish between Exploration Costs Development Costs and Production Costs and shall separately identify all significant items of costs and expenditure as itemised in Section 3 of this Accounting Procedure within these categories. The Statement of receipts shall distinguish between income from the sale of Petroleum and inental income of the sort itemised in Section 3.4 of this Accounting Procedure. If the Government is not satisfied with the degree of disaggregation within the categories it shall be entitled to request a more

detailed breakdown. The Statement shall show the following Actual costs expenditures and receipts for the Quarter in question. Cumulative costs expenditures and receipts for the Year in question. Latest forecast of cumulative costs expenditures and receipts at the Year end. Variations between budget forecast and latest forecast and explanations thereof. The Statement of Costs Expenditures and Receipts of each Quarter shall be submitted to Government not later than thirty 30 days after the end of such Quarter.

127 SECTION 8 COST RECOVERY STATEMENT 8.1 The Contractor shall prepare with respect to each Calendar Quarter a Cost Recovery Statement containing the following information

8.1.1 Unrecovered Contract Costs carried forward from the previous Quarter if any.

8.1.2 Contract Costs for the Quarter in question.

8.1.3 Total Contract Costs for the Quarter in question Section 8.1.1 plus Section 8.1.2.

8.1.4 Quantity and value of Cost Petroleum taken and disposed of by the Contractor for the Quarter in question.

8.1.5 Contract Costs recovered during the Quarter in question as per Article 15.

8.1.6 Total cumulative amount of Contract Costs recovered up to the end of the Quarter in question.

8.1.7 Amount of Contract Costs to be carried forward into the next Quarter.

8.2 The Cost Recovery Statement for each Quarter shall be submitted to Government not later than thirty 30 days after the end of such Quarter.

128 SECTION 9 PROFIT SHARING STATEMENT 9.1 9.1.1 The Contractor shall prepare with respect to each Quarter a Profit Sharing Statement containing the following information The calculation of the applicable net cash flows as defined in Appendix D for the Quarter in question.

9.1.2 The value of the Investment Multiple applicable in the Quarter in question.

9.1.3 9.1.4 9.1.5 9.1.6 9.1.7 9.2 Based on Section 9.1.2 and Article 16 the appropriate percentages of Profit Petroleum for the Government and the Contractor in the Quarter in question. The total amount of Profit Petroleum to be shared between the Government and the Contractor in the Quarter in question. Based on Sections 9.1.3 and 9.1.4 the amount of Profit Petroleum due to the Government and the Contractor as well as to each constituent of the Contractor in the Quarter in question. The actual amounts of Petroleum taken or payment received by Government and the Contractor as well as by each constituent of the Contractor during the Quarter in question to satisfy their entitlements pursuant to Section 9.1.5. Adjustments to be made if

any in future Quarters in the respective amounts of Profit Petroleum due to the Government and the Contractor as well as to each constituent of the Contractor on account of any differences between the amounts specified in Sections 9.1.5 and 9.1.6 as well as any cumulative adjustments outstanding from previous Quarters. The Profit Sharing Statement shall be submitted to Government not later than thirty 30 days after the end of such Quarter. Any amount due or adjustment required in profit sharing among the Parties shall be made within thirty 30 days from the submission of the Statement to the Government.

129 SECTION 10 LOCAL PROCUREMENT STATEMENT 10.1 In furtherance of the obligation in Article 23 of the Contract for the Contractor to give preference to the procurement of Indian goods and services the Contractor shall prepare in respect of each Year a local procurement statement containing the following information a b c d e The amount of expenditure incurred by the Contractor directly or indirectly through its Subcontractors on goods supplied produced or manufactured in India; the amount of expenditure incurred by the Contractor directly or indirectly through its Subcontractors on services provided by Indian entities; the respective percentages that the expenditures recorded under items a and b above represent of the Contractors total expenditures; a detailed description of the procedures adopted during the Year to identify and purchase goods and services from Indian suppliers; and a detailed exposition of how the local purchases for the Year as recorded under items a and b above compared with the projected purchases included in the budget statement for that Year pursuant to Section 12.1.3 with explanations for any significant variations; 10.2 The local procurement statement shall be submitted to the Government within sixty 60 days after the end of each Year.

130 SECTION 11 END OF YEAR STATEMENT 11.1 The Contractor shall prepare a definitive End of Year Statement. The Statement shall contain aggregated information in the same format as required in the Production Statement Value of Production and Pricing Statement Statement of Costs Expenditures and Receipts Cost Recovery Statement and Profit Sharing Statement but shall be based on actual quantities of Petroleum produced income received and costs and expenditures incurred. Based upon this Statement any adjustments that are necessary shall be made to the transactions concerned under

the Contract. [Explanation End of year Statement shall further contain the item wise justification for the variation between the actual costs and expenditure incurred and included in the statement of costs expenditure and receipts visvis the Budgets for corresponding line items.] 11.2 The End of Year Statement for each Year shall be submitted to Government within ninety 90 days of the end of such Year.

131 SECTION 12 BUDGET STATEMENT 12.1 The Contractor shall prepare a Budget Statement for each Year. This Statement shall distinguish between budgeted Exploration Costs Development Costs and Production Costs and shall show the following 12.1.1 Forecast costs expenditures and receipts for the Year in question. 12.1.2 12.1.3 12.2 A schedule showing the most important individual items of total costs expenditures and receipts for the said Year. Estimated amounts to be spent in the Year on procuring goods and services in India. The Budget Statement shall be submitted to Government with respect to each Year not less than ninety 90 days before the start of the said Year provided that in the case of the Year in which the Effective Date falls the Budget Statement shall be submitted within ninety 90 days of the Effective Date.

132 APPENDIXD CALCULATION OF THE INVESTMENT MULTIPLE FOR PRODUCTION SHARING PURPOSES 1. In accordance with the provisions of Article 16 the share of the Government and the Contractor respectively of Profit Petroleum from the Contract Area in any Year shall be determined by the Investment Multiple earned by the Contractor from the then Petroleum Operations at the end of the preceding Year. These measures of profitability shall be calculated on the basis of the appropriate net cash flows as specified in this Appendix D. 2. The Net Cash Income of the Contractor from their Petroleum Operations in any particular Year is the aggregate value for the Year of the following i Cost Petroleum entitlement of the Contractor as provided in Article 15; plus ii Profit Petroleum entitlement of the Contractor as provided in Article 16; plus iii the Contractors all inental income of the type specified in section 3.4 of the Accounting Procedure arising from Petroleum Operations; less iv the Contractors Production Costs and royalty payments Article 17 incurred on or in the Contract Area; 3. The Investment made by the Contractor in the Contract Area in any particular Year is the aggregate value for the Year of i the Contractors Exploration Costs incurred on or in the

Contract Area pursuant to Article 15 plus ii the Contractors Development Costs incurred on or in the Contract Area. 4. For the purposes of the calculation of the Investment Multiple costs or expenditures which are not allowable as provided in the Accounting Procedure shall be excluded from Contract Costs and be disregarded. 133 5. 6. The Investment Multiple ratio earned by the Contractor as at the end of any Year shall be calculated by dividing the aggregate value of the addition of each of the annual Net Cash Incomes accumulated without interest up to and including that Year starting from the Year in which Production Costs were first incurred or Production first arose by the aggregate value of the addition of each of the annual Investments accumulated without interest up to and including that Year starting from the Year in which Exploration and Development Costs were first incurred. Profit Petroleum from the Contract Area in any Year shall be shared between the Government and the Contractor in accordance with the value of the Investment Multiple earned by the Contractor as at the end of the previous Year pursuant to Articles 16.2 to 16.5. 134

APPENDIXE1 FORM OF PARENT COMPANY FINANCIAL AND PERFORMANCE GUARANTEE to be furnished pursuant to Article 29.1 b of the Contract WHEREAS a company duly organised and existing under the laws of having its registered office at hereinafter referred to as the Guarantor which expression shall include its successors and assigns is [the indirect owner of one hundred percent 100 of the capital stock of XYZ Company and direct owner of its parent company;] and of an offshore WHEREAS XYZ Company is signatory to a Production Sharing Contract in as Block respect onshore the to as Contract made between the Government of India hereinafter referred to as the Government and XYZ Company hereinafter referred to as XYZ which expression shall include its successors and permitted assigns; and area hereinafter identified referred WHEREAS the Guarantor wishes to guarantee the performance of XYZ Company or its Affiliate Assignee under the Contract as required by the terms of the Contract; NOW THEREFORE this Deed hereby provides as follows The Guarantor hereby unconditionally and irrevocably guarantees to the Government that it will make available or cause to be made available to XYZ Company or any other directly or indirectly owned Affiliate of XYZ Company to which any part or all of XYZ Companys rights or interest under

the Contract may subsequently be assigned Affiliate Assignee financial technical and other resources required to ensure that XYZ Company or any Affiliate Assignee can carry out its obligations as set forth in the Contract. The Guarantor further unconditionally and irrevocably guarantees to the Government the due and punctual compliance by XYZ Company or any Affiliate Assignee of any obligations of XYZ Company or any Affiliate Assignee under the Contract. The Guarantor hereby undertakes to the Government that if XYZ Company or any Affiliate Assignee shall in any respect fail to perform its obligations under the Contract or commit any breach of such obligations then the Guarantor shall fulfil or cause to be fulfilled the said obligations in place of XYZ Company or any Affiliate Assignee and will indemnify the Government against all losses 1. 2. 3. 135 4. 5. 6. 7. damages costs expenses or otherwise which may result directly from such failure to perform or breach on the part of XYZ Company. This guarantee shall take effect from the Effective Date and shall remain in full force and effect for the duration of the said Contract and thereafter until no sum remains payable by XYZ Company or its Affiliate Assignee under the Contract or as a result of any decision or award made by any expert or arbitral tribunal thereunder. This guarantee shall not be affected by any change in the articles of association and byelaws of XYZ Company or the Guarantor or in any instrument establishing the Company or Guarantor. The liabilities of the Guarantor shall not be discharged or affected by a any time indulgence waiver or consent given to XYZ Company; b any amendment to the Contract or to any security or other guarantee or indemnity to which XYZ Company has agreed; c the enforcement or waiver of any terms of the Contract or of any security other guarantee or indemnity; or d the dissolution amalgamation reconstruction or reorganisation of XYZ Company. This guarantee shall be governed by and construed in accordance with the laws of India. IN WITNESS WHEREOF its duly authorised the Guarantor representatives has caused its seal to be duly affixed hereto and this guarantee to be duly executed the day of 200. through 136 APPENDIXE2 FORM OF COMPANY FINANCIAL AND PERFORMANCE GUARANTEE to be furnished pursuant to Article 29.1 b of the Contract WHEREASXYZ Company duly organised and existing under the laws of having its registered office at hereinafter referred to as

the Guarantor which expression shall include its successors and assigns is signatory to a Production Sharing Contract in respect of an offshore onshore area identified as Block hereinafter referred to as the Contract made between the Government of India hereinafter referred to as the Government and XYZ Company hereinafter referred to as XYZ which expression shall include its successors and permitted assigns; and WHEREAS the Guarantor wishes to guarantee its performance under the Contract as required by the terms of the Contract; NOW THEREFORE this Deed hereby provides as follows The Guarantor hereby unconditionally and irrevocably guarantees to the Government that it will make available or cause to be made available financial technical and other resources required to ensure that XYZ Company can carry out its obligations as set forth in the Contract. The Guarantor further unconditionally and irrevocably guarantees to the Government the due and punctual compliance by it of any obligations under the Contract. The Guarantor hereby undertakes to the Government that it shall fulfill or cause to be fulfilled all its obligations under the Contract and if it fails to perform its obligations under the Contract or commits any breach of such obligations then it shall indemnify the Government against all losses damages costs expenses or otherwise which may result directly from such failure to perform or breach on its part. This guarantee shall not be affected by any change in the articles of association and byelaws of XYZ Company or in any instrument establishing the Company. The liabilities of the Guarantor shall not be discharged or affected by a any time indulgence waiver or consent given to XYZ Company; b any amendment to the Contract or to any security or other guarantee or indemnity to which XYZ Company has agreed; c the enforcement or waiver of any terms of the Contract or of any security other guarantee or indemnity. This guarantee shall be governed by and construed in accordance with the laws of India. IN WITNESS WHEREOF its duly authorised the Guarantor representatives has caused its seal to be duly affixed hereto and this guarantee to be duly executed the day of 200.

OBJECTIVES The objectives of these procedures are to a ensure that the goods and services acquired by the Operator for carrying out the Petroleum Operations are acquired at the optimum cost taking into consideration all relevant factors including price quality delivery time and the reliability of potential suppliers. b ensure that goods and services are delivered in a timely manner taking into consideration the consequences of delays in the acquisition of these goods and services on the project as a whole. c ensure that the provisions of Article 23 of the Contract are implemented.

II PRINCIPLES The principles upon which these procedures are based are a The Parties must be satisfied that the Operator is working to an agreed procedure for acquiring goods and services which is auditable and in accordance with the provisions of the Contract. b The Operator must have the ability to acquire goods and services expeditiously so that the project schedules in respect of Approved Work Programmes are maintained. **III PROCEDURES** The procedures to be adopted by

the Operator for the acquisition of goods and services shall be as follows Applicable to Exploration Appraisal Development and Production operations Procedure A 50000 to less than 200000 Procedure B 200000 to less than 500000 Procedure C Equal to or more than 500000 139 For

contracts valued at less than US 5000 The Operator will be at liberty to determine the procurement procedures and methods to procure goods and services valued at less than US Dollars five thousand US5000. For Contracts valued at US 5000 and above but less than US 50000 The Operator will be at liberty to determine the preferred method of acquiring goods and services valued at US Dollars five thousand US 5000 and above but less than US Dollars fifty thousand US 50000 provided that at least three 3 quotations from selected suppliers including at least one 1 Indian supplier will be obtained. For items valued at greater than US Dollars twenty thousand US 20000

Operator is required to report to the Operating Committee if the quote accepted exceed the lowest quote by more than twenty 20 percent. Operator will promptly report to the Operating Committee the Operators reasons for not selecting the lowest quote. Procedure A Operator shall 1 2 3 4 5 6 7

provide the constituents of the Contractor with a list of all the entities approved by the Operating

Committee as per AppendixF V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender; add to such list the entities whom other Party requests for adding within five 5 Business Days on receipt of such lists; if and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with AppendixFIV to perform under the contract; complete the tendering process within a reasonable period of time; circulate to all constituents of the Contractor a comparative bid analysis stating Operators choice of the entity for award of contract. Provide also reasons for such choice in case entity chosen is not the lowest bidder; inform all the constituents of the Contractor of the entities to whom the contract has been awarded; and upon the request of a Party provide such Party with a copy of the final version of the contract awarded. Procedure B Operator shall 1 provide the Parties with a list of all the entities approved by the Operating Committee as per AppendixF V for the applicable category of the contract 140 along with other entities if any from whom the Operator proposes to invite tender; add to such list the entities whom a Party requests for adding within five 5 Business Days on receipt of such list; if and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with AppendixF IV to perform under the contract; complete the tendering procedure within a reasonable period of time; circulate to all constituents of the Contractor a comparative bid analysis stating Operators choice of the entity for award of contract. Provide also reasons for such choice in case the entity chosen is not the lowest bidder. If the bid selected is not the lowest bid obtain prior approval of the Operating Committee for award of contract; award the contract accordingly and inform all the members of the Management Committee of the entities to whom the contract has been awarded; and upon the request of a Party provide such Party with a copy of the final version of the contract awarded. 2 3 4 5 6 7 Procedure C Operator shall 1 2 3 4 5 6 7 publish invitations for parties to prequalify for the proposed contract in at least three 3 daily national Indian newspaper. Provide to NonOperating Companies a list of responding parties and an analysis of their qualifications for the

contract being contemplated to be awarded. Include those who qualify as per the prequalification criteria approved as per AppendixF IV in the list of entities from whom Operator proposes to invite tender for the said contract; provide the members of the Management Committee with a total list of all the entities selected as 1 above and all the entities approved by the Operating Committee as per AppendixFV for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender; add to such entities whom a Party requests for adding within five 5 Business Days on receipt of such list; if and when any Party so requests Operator shall evaluate any entity listed in 2 and 3 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with AppendixFIV to perform under the contract; prepare and dispatch the tender documents to the entities as finally listed and to Parties; after the expiration of the period allowed for tendering consider and analyse the details of all bids received; prepare and circulate to the constituents of the Contractor a comparative bid analysis stating Operators recommendation as to the entity to whom the contract 141 should be awarded the reasons therefor and the technical commercial and contractual terms to be agreed upon; obtain the approval of the Operating Committee to the recommended bid. However failing Operating Committee approval any Company may refer the issue to the Management Committee for decision; and award the contract accordingly and upon the request of a Party provide such Party with a copy of the final version of the contract; 8 9 IV. V. A set of vendor qualifications criteria for each major category contractsupply shall be proposed by the Operator and approved by the Operating Committee within thirty 30 days of its submission. In the event the Operating Committee fails to approve vendor qualification criteria within thirty 30 days of the date the same is first submitted by the Operator the matter shall be referred to the Management Committee for decision. The Operating Committee may revise the qualification criteria. It is anticipated that in order to expedite joint operations contracts will be awarded to qualified vendorscontractors who are identified as approved vendors for the specified activities. A list of such approved vendors shall first be established as follows Operator shall 1 2 3 provide the constituents of the Contractor with a list of the entities from whom Operator proposes to invite tender

for contracts; and add to such list entities whom a Company requests for adding within fourteen 14 days on receipt of such list; and obtain approval of the Operating Committee. Such list shall thereafter be maintained by the Operator. The Operating Committee may add to or delete vendors from such list. 142 1. 2. APPENDIXG PERFORMA OF BANK GUARANTEE TO BE PROVIDED

PURSUANT TO ARTICLE 29 In consideration of Government of India hereinafter referred to as Government having entered into a Production Sharing Contract for the block dated hereinafter referred to as Contract which expression shall include all the amendments agreed to between the Government and the Contractor thereto with Ms having its registered office at hereinafter referred to as which expression unless repugnant to the context or meaning thereof include all its successors administrators executors and assigns which is a constituent of the Contractor and the Government have agreed that the Company shall furnish to Government a bank guarantee hereinafter referred to as Guarantee towards its obligations as provided in the Contract for USfor Foreign CompaniesUS equivalent in Indian Rupees for Indian Companies for the performance of its obligations under the Contract. We name of the Bank registered under the Law of and having its registered office at hereinafter referred to as the Bank which expression shall unless repugnant to the context or meaning thereof includes all its successors administrators executors and assigns do hereby guarantee and undertake to pay immediately on the fist demand in writing and anyall moneys to the extent of Indian RupeesUS in figures and Indian RupeesUS in words without any demur reservation contest or protest andor without any reference to the Company. Notwithstanding any thing contained herein above our liabilities under this Guarantee is limited to Indian RupeesUS in figures Indian RupeesUS in words and our Guarantee shall remain in force upto and including sixty 60 days after the expiry dateextended date. Any claim under this Guarantee must be received before the expiry of sixty 60 days or before the expiry of sixty 60 days from the extended date if any. If no such claim has been received by us within sixty 60 days after the said dateextended date the Governments

right under this will cease. However if such a claim has been received by us within and upto sixty 60 days after the said dateextended date all the Governments rights under this Guarantee shall be valid and shall not cease until we have satisfied that claim. 144 In witness whereof the Bank through its authorised officers has set its hand and stamp on this day of 200 at . The seal of was hereto duly affixed by this day of 200 in accordance with its byelaws and this Guarantee was duly signed by and as required by the said byelaws. Secretary President Director Witness 145 Licence P2516 Petroleum Act 1998 SEAWARD PRODUCTION LICENCE THE OIL AND GAS AUTHORITY and PARKMEAD EP LIMITED PHARIS ENERGY LTD LICENCE to search and bore for and get petroleumSs Licence P2516 For the purposes of section 41e of the Petroleum Act 1998 the model clauses applicable to this licence are the model clauses set out in The Petroleum Licensing Production Seaward Areas Regulations 2008 as amended by The Petroleum and Offshore Gas Storage and Unloading Licensing Amendment Regulations 2017. This Licence made 5 MAGA 2024 between the Oil and Gas Authority of the one part and the companies listed in Schedule 4 of the other part witnesseth as follows Interpretation etc. 1. 1 In this licence the following expressions have the following meanings the Act means the Petroleum Act 1998; Block means an area comprised in this licence which is delineated on the reference map deposited at the principal office of the OGA and to which a reference number was assigned at the date of this licence; Development Scheme has the meaning given by clause 27; Early Surrender Area means the area if any specified as such in Schedule 5 to this licence; Early Surrender Period means the period if any specified as such in Schedule 5 to this licence; Fragmented Licensed Area means a Licensed Area consisting in two or more areas any one or more of which is separated from the others; Half Year means the period from 1st January to 30th June in any year and the period from 1st July to 31st December in any year; Initial Licensed Area means the area described in Schedule 1 to this licence on the date it was granted; Initial Term means the period beginning with the date on which this licence is granted and ending on the last day of Phase C; Licensed Area means the area for the time being in which the Licensee may exercise the rights granted by this licence; the Licensee means the person or persons

to whom this licence is granted his personal representatives and any person or persons to whom the rights conferred by this licence may lawfully have been assigned; Mandatory Surrender Area means the area specified as such in Schedule 5 to this licence; the Minister means the Secretary of State for Business Energy and Industrial Strategy; the OGA means the Oil and Gas Authority; Oil Field has the meaning given in clause 27; Petroleum includes any mineral oil or relative hydrocarbon and natural gas existing in its natural condition in strata but does not include coal or bituminous shales or other stratified deposits from which oil can be extracted by destructive distillation; Phase A means the period if any of the Initial Term specified as such in Schedule 5 to this licence; Phase B means the period if any of the Initial Term specified as such in Schedule 5 to this licence; Phase C means the period of the Initial Term specified as such in schedule 5 to this licence; Second Term means the period specified as such in Schedule 5 to this Page 2 of 37GS Licence P2516 licence; Section means a part of a Block comprising an area bounded by minute lines of latitude and longitude one minute apart respectively; Start Date means the date specified as such in Schedule 5 to this licence; Third Term means the period specified as such in Schedule 5 to this licence; Well includes borehole; Work Programme means the programme set out in Schedule 3 to this licence.

2 Any obligations which are to be observed and performed by the Licensee shall at any time at which the Licensee is more than one person be joint and several obligations.

Grant of Licence 2. In consideration of the payments hereinafter provided for and the performance and observance by the Licensee of all the terms and conditions hereof the OGA in exercise of the powers conferred upon it by the Act hereby grants to the Licensee exclusive licence and liberty during the continuance of this licence and subject to the provisions hereof to search and bore for and get Petroleum in the sea bed and subsoil under the area described in Schedule 1 to this licence provided that nothing in this licence shall affect the right of the OGA to grant a methane drainage licence in respect of the whole or any part of the Licensed Area or affect the exercise of any rights granted under any such methane drainage licence.

Term of Licence 3. 1 This licence shall commence on the date on which it is granted. 2 Unless sooner determined under any of its provisions this licence shall continue a for the Initial Term

subject to clause 10 and where applicable clauses 4 and 5; b for the Second Term subject to clauses 6 and 10; c for the Third Term subject to clauses 8 and 10. 3 On expiry of the Third Term this licence shall determine unless extended in accordance with clause 9. Initial Term 4. 1 Where a Phase A is specified but no Phase B is specified this licence shall unless the OGA in its discretion dees otherwise automatically cease and determine on the expiry of Phase A in the event of failure by the Licensee before expiry of that phase to a take the actions that are described in the section of the Work Programme applicable to Phase A; 6 undertake to complete before the expiry of Phase C the work described in the section of the Work Programme applicable to Phase C; and c demonstrate to the satisfaction of the OGA whose decision shall be final i the financial capacity of the Licensee to meet the obligations undertaken under subparagraph b in addition to all of the obligations imposed by this licence; and Page 3 of 37S Licence P2516 ii the competence of the relevant persons to organise and supervise any of the operations of searching or boring for Petroleum. 2 Where no Phase A is specified but a Phase B is specified this licence shall unless the OGA in its discretion dees otherwise automatically cease and determine on the expiry of Phase B in the event of failure by the Licensee before expiry of that phase to a take the actions that are described in the section of the Work Programme applicable to Phase B; b undertake to complete before expiry of Phase C the work described in the section of the Work Programme applicable to Phase C; and c demonstrate to the satisfaction of the OGA whose decision shall be final i the financial capacity of the Licensee to meet the obligations undertaken under subparagraph b in addition to all of the obligations imposed by this licence; and ii the competence of the relevant persons to organise and supervise any of the operations of searching or boring for Petroleum. 3 Where both a Phase A and a Phase B are specified a this licence shall unless the OGA in its discretion dees otherwise automatically cease and determine on the expiry of Phase A in the event of failure by the Licensee before expiry of that phase to i take the actions that are described in the section of the Work Programme applicable to Phase A; and ii undertake to complete before the expiry of Phase B the work described in the section of the Work Programme applicable to Phase B; and b if this licence continues to Phase B

this licence shall unless the OGA in its discretion dees otherwise automatically cease and determine on the expiry of Phase B in the event of failure by the Licensee before expiry of that phase to i take the actions that are described in the section of the Work Programme applicable to Phase B; ii undertake to complete before the expiry of Phase C the work described in the section of the Work Programme applicable to Phase C; and iii demonstrate to the satisfaction of the OGA whose decision shall be final aa the financial capacity of the Licensee to meet the obligations undertaken under paragraph ii in addition to all of the obligations imposed by this licence; and bb the competence of the relevant persons to organise and supervise any of the operations of searching or boring for Petroleum. 4 Where a deadline specified in the Work Programme for any action to be taken does not coine with the date of expiry of any of Phases A B and C this licence shall unless the OGA in its discretion dees otherwise automatically cease and determine on the expiry of that deadline in the event of failure by the Licensee to take the action required by that deadline. 5 The OGA may dee that this licence shall not automatically cease and determine in accordance with paragraphs 1 to 4 of this clause only if the Licensee Page 4 of 37Ss Licence P2516 consents. 6 The relevant persons referred to in paragraphs 1cii 2cii and 3biiibb of this clause are a any persons nominated by the Licensee for approval under clause 24 of this licence; or b the Licensee where the Licensee is one person and the Licensee has not nominated anybody for such approval. 4A. Amendments to the Work Programme 1 This clause applies to any amendment to be made to the of the Work Programme including to the deadline for taking an action. 2 At any time not later than three months before the deadline for taking an action in the Work Programme the Licensee may give notice in writing to the OGA that the Licensee desires an amendment regarding that action and the notice shall describe the proposed amendment. 3 The OGA may in its discretion permit a shorter notice period than the period of three months specified in paragraph 2. 4 Where notice is given the OGA may in its discretion direct in writing that the Work Programme be amended as proposed. Surrender during Initial Term 5. 1 This clause shall apply where an Early Surrender Area and an Early Surrender Period are specified. 2 No later than one month before the expiry of the Early

Surrender Period the Licensee may give notice in writing to the OGA indicating a that he will determine this licence in relation to a part of the Licensed Area which when taken together with any one or more areas previously surrendered in accordance with clause 10 is no less than the Early Surrender Area; and b the date no later than the expiry of the Early Surrender Period on which the surrender of that part of the Licensed Area shall take effect. 3 This licence shall automatically cease and determine on the expiry of the Early Surrender Period unless a the Licensee has given notice in accordance with paragraph 2; or b at the request of the Licensee the OGA has directed that the licence shall continue without such notice having been given. Option to continue licence into a Second Term 6. 1 At any time not later than one month before the expiry of Phase C of the Initial Term or such shorter notice period as the OGA in its discretion may permit the Licensee may a subject to payment of the sums specified in Schedule 2 and to performance of the terms and conditions contained in this licence including without limitation those conditions set out in paragraph 3 of this clause; and Page 5 of 37S Licence P2516 b conditional upon due performance by the Licensee of the Work Programme before the expiry of Phase C of the Initial Term give notice in writing to the OGA in the manner hereinafter provided that he desires this licence to continue in force in relation to part of the Licensed Area the Continuing Part. 2 Where the Licensee gives notice to the OGA in accordance with paragraph 1 of this clause such notice must indicate that he will determine this licence in relation to such part of the Licensed Area as shall be described by the Licensee in the notice the Surrendered Part in accordance with the requirements of paragraph 3 of this clause. 3 Subject to paragraph 4 of this clause the Surrendered Part must consist in an area which when taken together with any one or more areas previously surrendered is no less than the Mandatory Surrender Area. 4 The Licensee shall not be obliged to surrender so much of the Licensed Area that following such surrender the Licensed Area comprises less than thirty Sections. 5 Any notice served in accordance with paragraph 1 of this clause shall specify a date not later than the expiry of Phase C of the Initial Term on which the Surrendered Part is to be surrendered. 6 This licence shall upon the option conferred by this clause being duly exercised but subject to the

provisions of clause 3 of this licence continue in respect of the Continuing Part for the Second Term.

Extension of the Initial or Second Term 7. 1 This clause applies to an extension to be made to Phase A or as the case may be to Phase B or Phase C of the Initial Term or to the Second Term the relevant phase or term. 2 At any time not later than three months before the expiry of the relevant phase or term or such shorter notice period as the OGA in its discretion permit the Licensee may subject to the payment of the sums specified in Schedule 2 and to performance of the terms and conditions herein contained give notice in writing to the OGA that the Licensee desires that phase or term to be extended for a further period. 3 Where such notice is given the OGA may in its discretion direct in writing that the relevant phase or term be extended; and paragraph 2 of this clause shall apply to that phase or term as extended. 4 Any extension shall be for a period and subject to such conditions as the OGA may determine. 5 Where Phase C of the Initial Term or where the Second Term is extended clause 3 shall apply in respect of the Initial Term or the Second Term as extended. 6 Where Phase A or Phase B of the Initial Term is extended by a period the subsequent phase of the Initial Term shall without prejudice to paragraph 2 be reduced by the same amount.

Page 6 of 37 Licence P2516 7 Where Phase C of the Initial Term is extended by a period the Second Term shall without prejudice to paragraph 2 be reduced by the same amount. 8 Where the Second Term is extended by a period the Third Term shall be reduced by the same amount. Option to continue the Licence into a Third Term 8. 1 At any time not later than three months before the expiry of the Second Term or such shorter notice period as the OGA may in its discretion permit the Licensee may subject to payment of those sums specified in Schedule 2 and to performance of the terms and conditions herein contained give notice in writing to the OGA that he desires this licence to continue as to a part of the Licensed Area the Producing Part. 2 Such notice shall describe the Producing Part which shall be an area that comprises no Section that is not wholly or in part the subject of a consent approval or programme described in paragraph 3 of this clause. 3 If such notice is given this licence shall continue in force after the expiry of the Second Term as provided by the following paragraphs of this clause in the event that before such expiry a the OGA has given a

consent in pursuance of clause 171 of this licence and such consent is still in force upon expiry of the Second Term; or b the OGA has in pursuance of clause 174 of this licence approved a programme submitted to it in pursuance of clause 172 and such approval is still in force upon expiry of the Second Term; or c the OGA has served a programme on the Licensee in pursuance of clause 176 of this licence and such programme is still in force upon expiry of the Second Term. 4 Where this licence continues in force by virtue of this clause it shall subject to the provisions of clause 3 of this licence so continue during the Third Term. Power further to extend term of Licence 9. 1 Where this Licence is continued in force by virtue of clause 8 of this Licence to the end of the Third Term the OGA on application being made to it in writing not later than three months before the expiry of such period may in its discretion agree with the Licensee that this Licence shall continue in force thereafter for such further period as the OGA and the Licensee may agree and subject to such modification of the terms and conditions of this licence which modification may include making provision for any further extension of the term of this licence as the OGA and the Licensee may then agree is appropriate. 2 The OGA may in its discretion accept an application for extension of this licence made less than three months before the expiry of the Third Term. Right of Licensee to determine Licence or surrender part of Licensed Area 10. Without prejudice to any obligation or liability imposed by or incurred under the terms hereof the Licensee may at any time by giving to the OGA not less than one Page 7 of 37S Licence P2516 months notice in writing to that effect determine this licence or surrender any part of the Licensed Area being a part which complies with clause 11 hereof. Areas surrendered 11. 1 Any area surrendered by the Licensee pursuant to clause 5 6 or 10 of this licence and any area accordingly retained by him shall unless the OGA has otherwise agreed in writing before the date on which the appropriate notice is given by the Licensee to the OGA a be bounded by minute lines of latitude extending not less than two minutes of longitude and minute lines of longitude extending not less than two minutes of latitude; b consist of not less than thirty Sections; and c subject always to paragraph 2 of this clause have boundaries which whether they run north and south or east and west either coine with the corresponding

boundaries of the Block or are not less than two Sections distant from those boundaries. 2 The surrender by the Licensee of any area pursuant to clause 5 6 or 10 of this licence shall not unless the OGA has otherwise agreed in writing before the date on which the appropriate notice is given by the Licensee to the OGA result in the creation of a Fragmented Licensed Area. 3 Upon the date on which any determination of this licence or any surrender of part of the Licensed Area in the manner provided for by any clause of this licence is to take effect the rights granted by this licence shall cease in respect of the Licensed Area or of the part so surrendered as the case may be but without prejudice to any obligation or liability imposed upon the Licensee or incurred by him under the terms of this licence prior to that date. Payment of consideration for Licence 12. 1 The Licensee shall make to the OGA as consideration for the grant of this Licence payments in accordance with Schedule 2 to this Licence. 2 The Licensee shall not by reason of determination of this Licence or surrender of any part of the Licensed Area be entitled to be repaid or allowed any sum payable to the OGA pursuant to this licence before the date of determination or surrender. Provision of contact details to OGA 13. 1 A notice direction or other document authorised or required in whatever terms to be given to the Licensee by virtue of this licence is treated as given to the Licensee if it is given to the person specified by the Licensee under paragraph 2 at the address so specified. 2 The Licensee must supply the OGA with the name and address of a person to whom notices directions and other documents are to be given. 3 The Licensee must ensure that where there is a change in the person to whom or the address to which information should be sent in accordance with paragraph 2 the OGA is notified of the change as soon as is reasonably practicable. Page 8 of 37 Licence P2516 4 If the Licensee fails to comply with paragraph 2 the OGA may give the Licensee a notice which a requires the Licensee to comply with paragraph 2 within the period of 30 days beginning with the date of the notice; and b states that if the Licensee fails to do so the Licensee will be treated as having supplied under paragraph 2 the name and address specified by the OGA in the notice. Measurement of Petroleum obtained from the Licensed Area 14. 1 The Licensee shall measure or weigh by a method or methods customarily used in good oilfield practice and from time to time

approved by the OGA all Petroleum won and saved from the Licensed Area. 2 If and to the extent that the OGA so directs the duty imposed by paragraph 1 of this clause shall be discharged separately in relation to Petroleum won and saved a from each part of the Licensed Area which is an Oil Field for the purposes of the Oil Taxation Act 1975; b from each part of the Licensed Area which forms part of such an Oil Field extending beyond the Licensed Area; and c from each Well producing Petroleum from a part of the Licensed Area which is not within such an Oil Field. 3 If and to the extent that the OGA so directs the preceding provisions of this clause shall apply as if the duty to measure or weigh Petroleum included a duty to ascertain its quality or composition or both; and where a direction under this paragraph is in force the following provisions of this clause shall have effect as if references to measuring or weighing included references to ascertaining quality or composition. 4 The Licensee shall not make any alteration in the method or methods of measuring or weighing used by him or in any appliances used for that purpose without the consent in writing of the OGA and the OGA may in any case require that no alteration shall be made save in the presence of a person authorised by the OGA. 5 The OGA may from time to time direct that any weighing or measuring appliance shall be tested or examined in such manner upon such occasions or at such intervals and by such persons as may be specified by the OGAs direction. 6 If any measuring or weighing appliance shall upon any such test or examination as is mentioned in paragraph 5 of this clause be found to be false or unjust the same shall if the OGA so determines after considering any representations in writing made by the Licensee be deemed to have existed in that condition during the period since the last occasion upon which the same was tested or examined pursuant to paragraph 5 of this clause.

Keeping of accounts 15. 1 The Licensee shall keep within the United Kingdom full and correct accounts in a form from time to time approved by the OGA of a the quantity of Petroleum in the form of gas won and saved; b the quantity of Petroleum in any other form won and saved; c the name and address of any person to whom any Petroleum has been

Page 9 of 37S Licence P2516 supplied by the Licensee the quantity so supplied the price thereof or other consideration therefor and the place to which the Petroleum was

conveyed pursuant to the agreement for such supply; and d such other particulars as the OGA may from time to time direct.

2 The quantities of Petroleum stated in such accounts may exclude any water separated from the Petroleum and shall be expressed as volumes in cubic metres measured at or calculated as if measured at a temperature of 15 Celsius and a pressure of 1.0132 bar but if the OGA serves notice in writing on the Licensee determining any other manner in which any quantity of Petroleum or any quantity of any form of Petroleum is to be expressed that quantity shall be so expressed.

3 Such accounts shall state separately the quantities of petroleum used for the purposes of carrying on drilling and production operations and pumping to field storage and quantities not so used and in the case of Petroleum not in the form of gas shall state the specific gravity of the Petroleum and if Petroleum of different specific gravities has been won and saved the respective quantities of Petroleum of each specific gravity.

4 The Licensee shall within two months after the end of each Half Year in which this licence is in force and within two months after the expiration or determination of this licence deliver to the OGA an abstract in a form from time to time approved by the OGA of the accounts for that Half Year or for the period prior to such expiration or determination as the case may be.

Working obligations

16. 1 The Licensee shall before the expiry of Phase C of the Initial Term carry out the Work Programme.

2 If at any time the OGA serves a notice in writing on the Licensee requiring him to submit to the OGA before a date specified in the notice an appropriate programme for exploring for Petroleum in the Licensed Area during a period so specified the Licensee shall comply with the notice; and for the purposes of this paragraph an appropriate programme is one which any person who if he a were entitled to exploit the rights granted by this licence; and b had the competence and resources needed to exploit those rights to the best commercial advantage; and c were seeking to exploit those rights to the best commercial advantage could reasonably be expected to carry out during the period specified in the notice and that period must be within the term of this licence.

3 If a programme is submitted to the OGA in consequence of a notice served by it in pursuance of paragraph 2 of this clause then a it shall not be entitled to revoke this licence on the ground that the programme does not satisfy the requirements

of that paragraph the Relevant Requirements; but b if it is of the opinion that the programme does not satisfy the Relevant Requirements it may serve a notice in writing on the Licensee stating its opinion and the reasons for it. 4 Where notice in respect of a programme is served on the Licensee in pursuance Page 10 of 37S Licence P2516 of paragraph 3 of this clause the Licensee shall either a within 28 days beginning with the date of service of the notice refer to arbitration in the manner provided by clause 43 of this licence the question whether the programme satisfies the Relevant Requirements; or b within a reasonable period beginning with the date of service of such notice submit to the OGA a further programme which satisfies the Relevant Requirements and where it is determined in consequence of any reference to arbitration in pursuance of subparagraph a of this paragraph that the programme in question does not satisfy the Relevant Requirements the Licensee shall submit to the OGA as soon as possible after the date of the determination a further programme which satisfies the Relevant Requirements. 5 The Licensee shall carry out any programme submitted by him in pursuance of this clause as to which either a the OGA serves notice in writing on the Licensee stating that the OGA approves the programme; or b it is determined in consequence of any reference to arbitration in the manner provided by clause 43 of this licence that the programme satisfies the Relevant Requirements and any programme approved by the OGA in pursuance of this paragraph shall be deemed for the purposes of this licence to satisfy the Relevant Requirements. 6 Where in consequence of any breach or nonobservance by the Licensee of any provision of paragraph 2 4 or 5 of this clause the OGA has power by virtue of paragraph 1 of clause 41 of this licence to revoke this licence it may if it thinks fit exercise that power in relation to such part only of the Licensed Area as it may specify; and where it does so the rights granted by this licence shall cease in respect of the specified part of that area without prejudice to any obligation or liability imposed upon the Licensee or incurred by him under the terms of this licence. 7 Where the Licensee has a duty by virtue of this clause to carry out a programme during a part of the term of this licence the OGA may serve notice in pursuance of paragraph 2 of this clause in respect of another part of that term. Development and production programmes 17. 1 The Licensee shall not a

erect or carry out any Relevant Works either in the Licensed Area or elsewhere for the purpose of getting Petroleum from that area or for the purpose of conveying to a place on land Petroleum got from that area; or b get Petroleum from that area otherwise than in the course of searching for Petroleum or drilling Wells except with the consent in writing of the OGA or in accordance with a programme which the OGA has approved or served on the Licensee in pursuance of the following provisions of this clause.

2 The Licensee shall prepare and submit to the OGA in such form and by such time and in respect of such period during the term of this licence as the OGA may direct a programme specifying

Page 11 of 37 Licence P2516

a the Relevant Works which the Licensee proposes to erect or carry out during that period for either of the purposes mentioned in paragraph 1a of this clause; b the proposed locations of the works the purposes for which it is proposed to use the works and the times at which it is proposed to begin and to complete the erection or carrying out of the works; c the maximum and minimum quantities of Petroleum in the form of gas and the maximum and minimum quantities of Petroleum in other forms which i in each calendar year; or ii in each such period of more or less than one calendar year as may be specified by the OGA the Licensee proposes to get as mentioned in paragraph 1b of this clause.

3 If the OGA directs the Licensee

a to prepare different programmes in pursuance of paragraph 2 of this clause in respect of Petroleum from such different parts of the Licensed Area as are specified in the direction; or b where a programme approved or served in pursuance of this clause relates to a particular period during the term of this licence to prepare a programme or programmes in pursuance of paragraph 2 of this clause in respect of a further period or further periods during that term the Licensee shall comply with the direction.

4 It shall be the duty of the OGA expeditiously to consider any programme submitted to it in pursuance of paragraph 2 of this clause and when it has done so to give notice in writing to the Licensee stating

a that the OGA approves the programme; or b that the OGA approves the programme subject to the condition that such of the Relevant Works as are specified in the notice shall not be used before the expiration of the period so specified in relation to the works or shall not be used without the consent in writing of the OGA; or c that the OGA rejects the

programme on one or both of the following grounds namely i that the carrying out of any proposals included in the programme in pursuance of paragraph 2 of this clause would be contrary to good oilfield practice; ii that the proposals included in the programme in pursuance of the subparagraph c of the said paragraph 2 are in the opinion of the OGA not in the national interest and a notice in pursuance of subparagraph b of this paragraph may contain different conditions in respect of different works but shall not be given unless the OGA is satisfied that the condition mentioned in the notice is required in the national interest. 5 Where the OGA gives notice of rejection of a programme in pursuance of subparagraph c of paragraph 4 of this clause then a if the grounds of the rejection consist of or include the ground mentioned in paragraph i of that subparagraph it shall include in the notice a statement of the matters in consequence of which it rejected the programme on that ground; and b if the grounds of the rejection consist of or include the ground mentioned Page 12 of 37 Licence P2516 in paragraph ii of that subparagraph it shall include in the notice a statement of the rates at which it considers that in the national interest Petroleum should be got from the area to which the programme relates; and c the Licensee shall prepare and submit to the OGA before the time specified in the notice i where the notice contains such a statement as is mentioned in subparagraph a above modifications of the programme which ensure that the carrying out of the programme with those modifications would not be contrary to good oilfield practice; ii where the notice contains such a statement as is mentioned in subparagraph b above modifications of the programme which ensure the getting of Petroleum from the area to which the programme relates at the rates specified in the statement and which except so far as may be necessary in order to get Petroleum at those rates are not such that the carrying out of the programme with those modifications would be contrary to good oilfield practice but the Licensee shall not be required by virtue of paragraph i of this subparagraph to submit modifications if it is determined in consequence of any reference to arbitration in the manner provided by clause 43 of this licence that the carrying out of the programme without modifications would not be contrary to good oilfield practice. 6 If the OGA gives notice in writing to the Licensee that the OGA approves the modifications of a

programme which have been submitted to it in pursuance of subparagraph c of paragraph 5 of this clause the programme with those modifications shall be deemed to be approved by the OGA; but if the Licensee fails to perform the duty imposed on him by that subparagraph the OGA may if it thinks fit instead of revoking this licence in consequence of the failure serve on the Licensee such a programme as the OGA considers that the Licensee should have submitted to it in respect of the area and period to which the rejected programme related. 7 Where the OGA proposes to approve a programme subject to a condition in pursuance of paragraph 4b of this clause or to reject a programme in pursuance of paragraph 4c of this clause or to serve a programme on the Licensee in pursuance of paragraph 6 of this clause it shall before doing so a give the Licensee particulars of the proposal and an opportunity to make representations to the OGA about the technical and financial factors which the Licensee considers are relevant in connection with the proposal; and b consider any such representations then made to it by the Licensee. 8 The Licensee shall carry out any programme approved or served on him by the OGA in pursuance of this clause or if such a programme is varied in pursuance of clause 18 of this licence the programme as so varied except in so far as the Licensee is authorised in writing by the OGA to do otherwise or is required to do otherwise by such a condition as is mentioned in paragraph 4b of this clause; but if it is necessary to carry out certain works in order to comply with provisions included in a programme by virtue of paragraph 5c of this clause or provisions of a programme served on the Licensee in pursuance of paragraph 6 of this clause or provisions of a programme as varied in pursuance of clause 18 of this licence then notwithstanding anything in the programme as to the time when those provisions are to be complied with the Licensee shall not be treated as having failed to comply with those provisions before the expiration of the period reasonably required for carrying out the works. Page 13 of 37 Licence P2516 9 In this clause Relevant Works means any structures and any other works whatsoever which are intended by the Licensee to be permanent and are neither designed to be moved from place to place without major dismantling nor intended by the Licensee to be used only for searching for Petroleum. Provisions supplementary to clause 17 18. 1 A consent given by the

OGA in pursuance of clause 171 of this licence may be given subject to such conditions as are specified in the document signifying the consent and may in particular without prejudice to the generality of the preceding provisions of this paragraph be limited to a period so specified. 2 Where a the OGA gives notice in respect of a programme in pursuance of paragraph 4a or b or paragraph 6 of clause 17 of this licence or serves a programme in pursuance of the said paragraph 6; or b it is determined in consequence of any reference to arbitration in the manner provided by clause 43 of this licence that the Licensee is not required by virtue of paragraph i of clause 175c of this licence to submit modifications of a programme in respect of which notice of rejection containing such a statement as is mentioned in the said paragraph i was given by the OGA in pursuance of clause 174c of this licence the OGA may give to the Licensee with the notice given or the programme served as mentioned in subparagraph a of this paragraph or in a case falling within subparagraph b of this paragraph within the period of three months beginning with the date of the arbitrators or arbiters determination a notice hereafter in this clause referred to as a Limitation Notice authorising the OGA by a further notice given to the Licensee from time to time after the expiration of the period specified in the Limitation Notice to provide that the programme to which the Limitation Notice relates shall have effect while the further notice is in force with the substitution for any quantity of Petroleum or any period specified in the programme in pursuance of clause 172c of this licence of a different quantity of Petroleum or a different period specified in the further notice. 3 A quantity or period specified in such a further notice as that to be substituted for a quantity or period which is specified in the programme in question shall be such as to secure that the expenditure to be incurred by the Licensee in complying with the further notice in a case where an effect of the notice is to increase the quantity of Petroleum which the Licensee is required to get from the Licensed Area in any period is less than the cost of drilling a new Well in the Licensed Area at the time when the further notice is given. 4 Where the OGA proposes to give a Limitation Notice or any such further notice as aforesaid it shall before doing so a give the Licensee particulars of the proposal and an opportunity to make representations to the OGA about the technical and financial factors which the

Licensee considers are relevant in connection with the proposal; and b consider any such representations then made to it by the Licensee and the OGA shall not give such a further notice of which an effect is to increase the quantity of Petroleum which the Licensee is required to get from the Licensed Area Page 14 of 37S Licence P2516 during any period unless the OGA is satisfied that the notice is required by reason of a national emergency and shall not give any other such further notice as aforesaid unless it is satisfied that the notice is required in the national interest. 5 A Limitation Notice or any such further notice as aforesaid may specify any quantity or period by reference to such factors as the OGA thinks fit; and b in the case of such a further notice contain provisions as to i the date when the notice is to come into force; ii the date when the notice is to cease to be in force and specify different dates in pursuance of this subparagraph for different provisions of the notice and the OGA may revoke such a further notice at a particular time by serving on the Licensee a notice in writing stating that the further notice is revoked at that time. 6 Any question arising under clause 17 of this licence or this clause as to what is or is not or is required in the national interest or as to what is or is not or is required by reason of a national emergency shall be determined by the OGA. 7 The Licensee shall ensure that any conditions to which an approval is subject in pursuance of clause 174b of this licence or to which a consent is subject in pursuance of paragraph 1 of this clause are complied with. 8 If in respect of part of the Licensed Area a consent has been given in pursuance of paragraph 1 of clause 17 of this licence; or b the Licensee has submitted to the OGA in accordance with a direction given by virtue of paragraph 3a of that clause a programme in pursuance of paragraph 2 of that clause i as respects which the OGA has served notice in pursuance of paragraph 4a or b or paragraph 6 of that clause; or ii in consequence of which the OGA has served a programme on the Licensee in pursuance of the said paragraph 6; or iii in respect of which it has been determined in consequence of any reference to arbitration in the manner provided by clause 43 of this licence that the Licensee is not required by virtue of paragraph 5ci of that clause to submit modifications paragraph 1 of clause 41 of this licence shall not authorise the OGA to revoke this licence in relation to that part of the Licensed Area in consequence of any

breach or nonobservance while the consent is in force or during the period to which the programme relates of any provision of the said clause 17 in connection with a different part of the Licensed Area. 9 Where in consequence of any breach or nonobservance by the Licensee of any provision of clause 17 of this licence the OGA has power by virtue of paragraph 1 of clause 41 of this licence to revoke this licence or in consequence of paragraph 8 of this clause to revoke it in respect of part only of the Licensed Area it may if it thinks fit a in a case where it has power to revoke this licence exercise the power in relation to such part only of the Licensed Area as it may specify; and b in a case where by virtue of the said paragraph 8 it has power to revoke Page 15 of 37S Licence P2516 it in respect of part only of the Licensed Area exercise the power in relation to such portion only of that part as it may specify and where in consequence of the said paragraph 8 or by virtue of the preceding provisions of this paragraph the OGA revokes this licence in respect of a part or portion of the Licensed Area the rights granted by this licence shall cease in respect of that part or portion without prejudice to any obligation or liability imposed upon the Licensee or incurred by him under the terms of this licence.

Commencement and abandonment and plugging of Wells 19. 1 The Licensee shall not commence or recommence the drilling of any Well without the consent in writing of the OGA. 2 Subject to paragraph 6 the Licensee shall not abandon any Well without the consent in writing of the OGA. 3 The Licensee shall ensure compliance with any conditions subject to which any consent under either of the foregoing paragraphs is given. 4 If any such condition under paragraph 1 of this clause relates to the position depth or direction of the Well or to any casing of the Well or if any condition under either paragraph 1 or paragraph 2 of this clause relates to any plugging or abandoning of the Well the OGA may from time to time direct that the Well and all records relating thereto shall be examined in such manner upon such occasions or at such intervals and by such person as may be specified by the OGAs direction and the Licensee shall pay to any such person or to the OGA such fees and expenses for such examination as the OGA may specify. 5 The plugging of any Well shall be done in accordance with a specification approved by the OGA applicable to that Well or to Wells generally or to a class of Wells to which that Well belongs and

shall be carried out in an efficient and workmanlike manner. 6 The OGA may at any time give the Licensee a notice requiring a well drilled pursuant to this licence to be plugged and abandoned in accordance with paragraph 5 within the period specified in the notice but this paragraph is subject to paragraphs 8 and 9. 7 The Licensee shall comply with any notice under paragraph 6. 8 A notice under paragraph 6 may not be given less than one month before the expiry or determination of the Licensees rights under this licence in relation to the area or the part of the area in which the well is drilled. 9 A notice under paragraph 6 may be given only in relation to a well from which the Licensee has not extracted any petroleum within the period of one month ending with the day on which the notice is given. 10 Subject to paragraphs 6 to 7 and 11 and 12 of this clause any Well drilled by the Licensee pursuant to this licence shall be plugged and abandoned in accordance with paragraphs 2 3 4 and 5 of this clause not less than one month before the expiry or determination of the Licensees rights in respect of the Page 16 of 37S Licence P2516 area or part thereof in which that Well is drilled. 11 A direction by the OGA may be given by notice in writing to the Licensee not less than one month before the Licensees rights in respect of the area or part thereof in which the Well is situate expire or determine so as to relieve the Licensee of the obligation imposed by paragraph 10 of this clause to plug and abandon the Well. 12 Where the OGA revokes this licence any Well drilled by the Licensee pursuant to this licence shall a be plugged and abandoned in accordance with paragraphs 2 3 4 and 5 of this clause as soon as reasonably practicable; or b if the Minister so directs at the time of revocation be left in good order and fit for further working together with all casings and any Well head fixtures the removal whereof would cause damage to such Wells. 13 Any well that pursuant to a direction by the OGA under paragraph 11 of this clause has not been plugged and abandoned shall be left in good order and fit for further working together with all casings and any Well head fixtures the removal whereof would cause damage to such wells. 14 All casings and fixtures forming part of a Well and left in position at the expiry or determination whether by revocation or otherwise of the Licensees rights in respect of the area or part thereof in which that Well is drilled or at the completion of any works required of the Licensee under paragraph 12 of this

clause whichever is the later shall be the property of the OGA. Distance of Wells from boundaries of Licensed Area 20. No Well shall except with the consent in writing of the OGA be drilled or made so that any part thereof is less than one hundred and twentyfive metres from any of the boundaries of the Licensed Area. Control of Development Wells 21. 1 The Licensee shall not suspend work on the drilling of a Development Well or having suspended it in accordance with this paragraph shall not begin it again except with the consent in writing of the OGA and in accordance with the conditions if any subject to which the consent is given. 2 When work on the drilling of a Development Well is suspended in accordance with paragraph 1 of this clause the Licensee shall forthwith furnish the OGA with such information relating to the Well as the OGA may specify. 3 The Licensee a shall not do any Completion Work in respect of a Well in the Licensed Area except in accordance with a programme of Completion Work approved by the OGA in respect of the Well b shall furnish to the OGA in accordance with the provisions of such a programme particulars of any Completion Work done by him in respect of a Well in the Licensed Area; and c shall not remove or alter any casing or equipment installed by way of Completion Work in respect of a Well except with the consent in writing of the OGA and in accordance with the conditions if any subject to which the Page 17 of 37S Licence P2516 consent is given. 4 In this clause Completion Work in relation to a Well means work by way of the installation of a casing or equipment or otherwise after the Well has been drilled for the purpose of bringing the Well into use as a Development Well; and Development Well means a Well which the Licensee uses or intends to use in connection with the getting of Petroleum in the Licensed Area other than a Well which for the time being he uses or intends to use only for searching for Petroleum. Provision of storage tanks pipes pipelines or other receptacles 22. The Licensee shall use methods and practice customarily used in good oilfield practice for confining the Petroleum obtained from the Licensed Area in tanks gasholders pipes pipelines or other receptacles constructed for that purpose. Avoidance of harmful methods of working 23. 1 The Licensee shall maintain all apparatus and appliances and all Wells in the Licensed Area which have not been abandoned and plugged as provided by clause 19 of this licence in good repair and condition and

shall execute all operations in or in connection with the Licensed Area in a proper and workmanlike manner in accordance with methods and practice customarily used in good oilfield practice and without prejudice to the generality of the foregoing provision the Licensee shall take all steps practicable in order a to control the flow and to prevent the escape or waste of Petroleum discovered in or obtained from the Licensed Area; b to conserve the Licensed Area for productive operations; c to prevent damage to adjoining Petroleumbearing strata; d to prevent the entrance of water through Wells to Petroleumbearing strata except for the purposes of secondary recovery; and e to prevent the escape of Petroleum into any waters in or in the vicinity of the Licensed Area. 2 The Licensee shall comply with any instructions from time to time given by the Minister or the OGA in writing relating to any of the matters set out in the foregoing paragraph. If the Licensee objects to any such instruction on the ground that it is unreasonable he may within fourteen days from the date upon which the same was given refer the matter to arbitration in manner provided by clause 43 of this licence. 3 Notwithstanding anything in the preceding provisions of this clause the Licensee shall not a flare any gas from the Licensed Area; or b use gas for the purpose of creating or increasing the pressure by means of which Petroleum is obtained from that area except with the consent in writing of the OGA and in accordance with the conditions if any of the consent. 4 An application for consent in pursuance of paragraph 3 of this clause must be made in writing to the OGA and must specify the date on which the Licensee Page 18 of 37Ss Licence P2516 proposes to begin the flaring or use in question; and subject to paragraph 5 of this clause that date must not be before the expiration of the period of two years beginning with the date when the OGA receives the application. 5 If the OGA gives notice in writing to the Licensee stating that in consequence of plans made by the Licensee which the OGA considers are reasonable the OGA will entertain an application for consent in pursuance of paragraph 3 of this clause which notice specifies a date after the expiration of a period mentioned in the notice which is shorter than the period mentioned in paragraph 4 of this clause an application made in consequence of the notice may specify as the date on which the applicant proposes to begin the flaring or use in question a date after the expiration of that shorter

period. 6 Before doing to withhold consent or to grant it subject to conditions in pursuance of paragraph 3 of this clause the OGA shall give the Licensee an opportunity to make representations in writing to the OGA about the technical and financial factors which the Licensee considers are relevant in connection with the case and shall consider any such representations then made to it by the Licensee. 7 Consent in pursuance of paragraph 3 of this clause shall not be required for any flaring which in consequence of an event which the Licensee did not foresee in time to deal with it otherwise than by flaring is necessary in order a to remove or reduce the risk of injury to persons in the vicinity of the Well in question; or b to maintain a flow of Petroleum from that or any other Well but when the Licensee does any flaring which is necessary as aforesaid he shall forthwith inform the OGA that he has done it and shall in the case of flaring to maintain a flow of Petroleum stop that flaring upon being directed by the OGA to do so. 8 The Licensee shall give notice to the OGA of any event causing the escape or waste of Petroleum damage to Petroleumbearing strata or the entrance of water through Wells to Petroleumbearing strata except for the purposes of secondary recovery forthwith after the occurrence of that event and shall forthwith after the occurrence of any event causing the escape of Petroleum into the sea give notice of the event to the Chief Inspector of Her Majesty's Coastguard. 9 The Licensee shall comply with any reasonable instructions from time to time given by the OGA with a view to ensuring that funds are available to discharge any liability for damage attributable to the release or escape of Petroleum in the course of activities connected with the exercise of rights granted by this licence; but where the OGA proposes to give such instructions it shall before giving them a give the Licensee particulars of the proposal and an opportunity to make representations to the OGA about the proposal; and b consider any representations then made to it by the Licensee about the proposal.

Appointment of operators 24. 1 The Licensee shall ensure that another person including in the case where the Licensee is two or more persons any of those persons does not exercise any function of organising or supervising all or any of the operations of searching or Page 19 of 37S Licence P2516 boring for or getting Petroleum in pursuance of this licence unless that other person is a person approved in writing by the OGA and

the function in question is one to which that approval relates. 2 The OGA shall not refuse to give its approval of a person in pursuance of paragraph 1 of this clause if that person is competent to exercise the function in question but where an approved person is no longer competent to exercise that function the OGA may by notice in writing given to the Licensee revoke its approval. Fishing and navigation 25. The Licensee shall not carry out any operations authorised by this licence in or about the Licensed Area in such manner as to interfere unjustifiably with navigation or fishing in the waters of the Licensed Area or with the conservation of the living resources of the sea. Training 26.

1 The Minister or the OGA may from time to time give to the Licensee instructions in writing as to the training of persons employed or to be employed whether by the Licensee or by any other person in any activity which is related to the exercise of the rights granted by this licence and the Licensee shall ensure that any instructions so given are complied with. 2 The Minister or the OGA shall not give instructions in pursuance of paragraph 1 of this clause unless the Minister or the OGA as applicable has consulted as to the provisions proposed to be included in such instructions the Petroleum Industry Training Board or such other body of a like nature as may from time to time be carrying on activities of a substantially similar kind to those at present performed by the said Board.

3 The Licensee shall furnish the Minister or the OGA with such information relating to the training of persons referred to in paragraph 1 of this clause as the Minister or the OGA may from time to time request. Unit development 27. 1 If at any time at which this licence is in force the OGA shall be

satisfied that the strata in the Licensed Area or any part thereof form part of a single geological Petroleum structure or Petroleum field hereinafter referred to as an Oil Field other parts whereof are formed by strata in areas in respect of which other licences granted in pursuance of the Act are then in force and the OGA shall consider that it is in the national interest in order to secure the maximum ultimate recovery of Petroleum and in order to avoid unnecessary competitive drilling that the Oil Field should be worked and developed as a unit in cooperation by all persons including the Licensee whose licences extend to or include any part thereof the following provisions of this clause shall apply. 2 Upon being so required by notice in writing by the OGA the Licensee shall cooperate with

such other persons being persons holding licences under the Act in respect of any part or parts of the Oil Field hereinafter referred to as the other Licensees as may be specified in the said notice in the preparation of a scheme hereinafter referred to as a Development Scheme for the working and development of the Oil Field as a unit by the Licensee and the other Licensees in cooperation and shall jointly with the other Licensees submit such scheme for the approval of the OGA. 3 The said notice shall also contain or refer to a description of the area or areas in respect of which the OGA requires a Development Scheme to be submitted and shall state the period within which such scheme is to be submitted for approval by the OGA. 4 If a Development Scheme is not submitted to the OGA within the period so stated or if a Development Scheme so submitted is not approved by the OGA the OGA may itself prepare a Development Scheme which shall be fair and equitable to the Licensee and all other Licensees and the Licensee shall perform and observe all the terms and conditions thereof. 5 If the Licensee objects to any such Development Scheme prepared by the OGA he may within 28 days from the date on which notice in writing of the said scheme shall have been given to him by the OGA refer the matter to arbitration in the manner provided by clause 43 of this licence. 6 Any such Development Scheme or the award of any arbitrator or arbiter in relation thereto shall have regard to any direction pursuant to clause 28 of this licence in force at the date of such scheme.

Directions as to Oil Fields across boundaries

28. 1 Where the OGA is satisfied that any strata in the Licensed Area or any part thereof form part of an Oil Field other parts whereof are in an area to which the OGAs powers to grant licences pursuant to the Act do not apply and the OGA is satisfied that it is expedient that the Oil Field should be worked and developed as a unit in cooperation by the Licensee and all other persons having an interest in any part of the Oil Field the OGA may from time to time by notice in writing give to the Licensee such directions as the OGA may think fit as to the manner in which the rights conferred by this licence shall be exercised. 2 The Licensee shall observe and perform all such requirements in relation to the Licensed Area as may be specified in any such direction. 3 Any such direction may add to vary or revoke the provisions of a Development Scheme.

Licensee to keep records

29. 1 The

Licensee shall keep accurate records in a form from time to time approved by the OGA of the drilling deepening plugging or abandonment of all Wells and of any alterations in the casing thereof. Such records shall contain particulars of the following matters a the site of and number assigned to every Well; b the subsoil and strata through which the Well was drilled; c the casing inserted in any Well and any alteration to such casing; d any Petroleum water mines or workable seams of coal encountered in the course of such activities; and e such other matters as the OGA may from time to time direct.

Page 21 of 37

37Ss Licence P2516 2 The Licensee shall keep within the United Kingdom accurate geological plans and maps relating to the Licensed Area and such other records in relation thereto as may be necessary to preserve all information which the Licensee has about the geology of the Licensed Area.

3 The Licensee shall deliver copies of the said records plans and maps referred to in the two foregoing paragraphs to the OGA when requested to do so either a within any time limit specified in the request; or b if there is no time limit specified within four weeks of the request.

Returns 30. 1 The Licensee shall furnish to the OGA on the first anniversary of the Start Date and at intervals of three months thereafter during the period in which this licence is in force a return in a form from time to time approved by the OGA of the progress of his operations in the Licensed Area. Such return shall contain a a statement of all geological work including surveys and tests which has been carried out and the areas in which and the persons by whom the work has been carried out and the results thereof; b the number assigned to each Well and in the case of any Well the drilling of which was begun or the number of which has been changed during such period of three months the site thereof; c a statement of the depth drilled in each Well; d a statement of any Petroleum water mines or workable seams of coal or other minerals encountered in the course of the said operations; and e a statement of all Petroleum won and saved.

2 Within two months after the end of each calendar year which falls wholly or partly within the period in which this licence is in force and within two months after the expiration or determination of this licence or any renewal thereof the Licensee shall furnish to the OGA an annual return in a form from time to time approved by the OGA of the operations conducted in the Licensed Area during that year or the period prior to

such expiration or determination as the case may be together with a plan upon a scale approved by the OGA showing the situation of all Wells. The Licensee shall also indicate on the said plan all development and other works executed by him in connection with searching boring for or getting Petroleum. 3 The Licensee shall furnish the OGA with such information as the OGA may from time to time request about any aspect of activities of the Licensee which are attributable directly or indirectly to the grant of this licence except that the Licensee shall not by virtue of this paragraph be required to furnish information in respect of his activities in connection with any crude oil after he has appropriated it for refining by him. 3A The functions of the OGA under paragraph 3 shall be exercisable concurrently by the Chancellor of the Exchequer. 4 The Licensee shall comply with any request for information made in accordance with paragraph 3 above either a within any time limit specified in the request; or b if there is no time limit specified within four weeks of the request. Page 22 of 37S Licence P2516 Licensee to keep samples 31. 1 As far as reasonably practicable the Licensee shall correctly label and preserve for reference for a period of five years samples of the sea bed and of the strata encountered in any Well and samples of any Petroleum or water discovered in any Well in the Licensed Area. 2 The Licensee shall not dispose of any sample after the expiry of the said period of five years unless a he has at least six months before the date of the disposal given notice in writing to the OGA of his intention to dispose of the same; and b the OGA has not within the said period of six months informed the Licensee in writing that it wishes the sample to be delivered to it. 3 The OGA shall be entitled at any time a to inform the Licensee in writing that it wishes the whole or any part of any sample preserved by the Licensee to be delivered to it; or b to inspect and analyse any sample preserved by the Licensee. 4 The Licensee shall forthwith comply with any request for the delivery of the whole or any part of any sample which is made in accordance with the preceding provisions of this clause. Reports to be treated as confidential 32. All records returns plans maps samples accounts and information in this clause referred to as the specified data which the Licensee is or may from time to time be required to furnish under the provisions of this licence shall be supplied at the expense of the Licensee and

shall not except with the consent in writing of the Licensee which shall not be unreasonably withheld be disclosed to any person not in the service or employment of the OGA or the Crown Provided that a the OGA shall be entitled at any time to make use of any of the specified data for the purpose of preparing and publishing such returns and reports as may be required of the OGA by law; b the OGA shall be entitled at any time to furnish any of the specified data to the Natural Environment Research Council and to any other body of a like nature as may from time to time be carrying on activities of a substantially similar kind to the geological activities at present carried on by the said Council; c the OGA the said Council and any such other body shall be entitled at any time to prepare and publish reports and surveys of a general nature using information derived from any of the specified data; d the OGA the said Council and any other such body shall be entitled to publish any of the specified data of a geological scientific or technical kind either i after the expiration of the period of three years beginning with the date when the data were due to be supplied to the OGA in accordance with clause 29 or 30 of this licence or if earlier the date when the OGA received those data; ii after the licence ceases to have effect whether because of its determination revocation or the effluxion of time; or Page 23 of 37S Licence P2516 iii after the expiration of such longer period as the OGA may determine after considering any representations made to it by the Licensee about the publication of data in pursuance of this subparagraph. Inspection of records etc. 33. The Licensee shall a permit any person who is appointed by the OGA for the purpose to inspect and to take copies of and make notes from all books papers maps and other records of any kind kept by the Licensee in pursuance of this licence or in connection with activities about which the OGA is entitled to obtain information in pursuance of clauses 263 and 303 of this licence; and b furnish that person at reasonable times with such information and provide him at reasonable times with such reasonable assistance as he may request in connection with or arising out of an inspection in pursuance of this clause. Rights of access 34. Any person or persons authorised by the Minister or the OGA shall be entitled at all reasonable times to enter into and upon any of the Licensees installations or equipment used or to be used in connection with searching boring for or getting

Petroleum in the Licensed Area for the purposes hereinafter mentioned a to examine the installations Wells plant appliances and works made or executed by the Licensee in pursuance of the licence and the state of repair and condition thereof; and b to execute any works or to provide and install any equipment which the OGA may be entitled to execute or provide and install in accordance with the provisions hereof. Power to execute works 35. If the Licensee shall at any time fail to perform the obligations arising under the terms and conditions of any of clauses 14 19 22 or 23 of this licence the OGA shall be entitled after giving to the Licensee reasonable notice in writing of its intention to execute any works and to provide and install any equipment which in the opinion of the OGA may be necessary to secure the performance of the said obligations or any of them and to recover the costs and expenses of so doing from the Licensee. Right of distress 36. 1 This clause applies in respect of any part of the Licensed Area situated within the English or Northern Irish areas as defined in article 12 of the Civil Jurisdiction Offshore Activities Order 1987. 2 If and whenever any of the payments mentioned in clause 121 of this licence or any part thereof shall be in arrear or unpaid for 28 days next after any of the days whereon the same ought to be paid whether the same shall have been legally demanded or not then and so often as the same may happen the OGA may as an additional remedy and without prejudice to any other rights and remedies to which it would be entitled enter into and upon any of the Licensees installations and equipment used or to be used in connection with searching boring for or getting Page 24 of 37 Licence P2516 Petroleum in the Licensed Area and may seize and distrain and sell as a landlord may do for rent all or any of the stocks of Petroleum engines machinery tools implements chattels and other effects belonging to the Licensee which shall be found in or upon or about any of the Licensees installations and equipment so entered upon and out of the moneys arising from the sale of such distress may retain and pay all the arrears of the said payments and also the costs and expenses of and inent to such distress and sale and shall pay the surplus if any to the Licensee. Diligence 37. 1 This clause applies in respect of any part of the Licensed Area situated within the Scottish area as defined in article 12 of the Civil Jurisdiction Offshore Activities Order 1987. 2 If and whenever any of the payments mentioned in

clause 121 of this licence or any part thereof shall be in arrear or unpaid for 28 days next after any of the days whereon the same ought to be paid whether the same shall have been legally demanded or not then and so often as the same may happen the OGA may as an additional remedy and without prejudice to any other rights and remedies to which it would be entitled do diligence in respect thereof in like manner as a landlord may do diligence in respect of unpaid arrears of rent and such diligence shall be effectual to attach all or any of the stocks of Petroleum engines machinery tools implements and other effects belonging to the Licensee which shall be found on or about any of the Licensees installations and equipment used or to be used in connection with searching boring for or getting Petroleum in the Licensed Area and where in pursuance of such a diligence a sale of such effects as shall have been attached thereby takes place the OGA may out of the proceeds thereof retain and pay all the arrears of the said payments and also the expenses of such inent to such diligence and sale and shall pay the surplus thereof if any to the Licensee.

Indemnity against third party claims 38. The Licensee shall at all times keep the OGA effectually indemnified against all actions proceedings costs charges claims and demands whatsoever which may be made or brought against the OGA by any third party in relation to or in connection with this licence or any matter or thing done or purported to be done in pursuance thereof. Advertisements prospectuses etc. 39. No statement shall be made either in any notice advertisement prospectus or other document issued by or to the knowledge of the Licensee or in any other manner claiming or suggesting whether expressly or by implication that the OGA has formed or expressed any opinion that the Licensed Area is from its geological formation or otherwise one in which Petroleum is likely to be obtainable. Restrictions on assignment etc. 40. 1 The Licensee shall not except with the consent in writing of the OGA and in accordance with the conditions if any of the consent do anything whatsoever whereby under the law including the rules of equity of any part of the European Union or of any other place any right granted by this licence or derived from a right so granted becomes exercisable by or for the benefit of or in accordance with the Page 25 of 37 Licence P2516 directions of another person. 2 An agreement permitting the carrying out of geological surveys by

physical or chemical means in the Licensed Area is not prohibited by paragraph 1 of this clause if the person by whom such surveys are to be carried out is a the holder of a licence granted by the OGA of the right in common with all other persons to whom the like right may have been granted to search for Petroleum in respect of an area which would include the Licensed Area but for a proviso therein excluding the exercise of such right in the Licensed Area without the consent of the Licensee; or b the holder of a licence granted by the OGA to search and bore for and get Petroleum in an area adjacent to the Licensed Area and if the information intended to be obtained by such survey is reasonably necessary to enable that holder more efficiently to exercise the rights granted by the licence which he holds from the OGA. 3 The Licensee shall not enter into any agreement providing for a person other than the Licensee to become entitled to or to any proceeds of sale of any Petroleum which at the time when the agreement is made has not been but may be won and saved from the Licensed Area unless the terms of the agreement have been approved in writing by the OGA either unconditionally or subject to conditions but the preceding provisions of this paragraph do not apply to a an agreement for the sale of such Petroleum under which the price is payable after the Petroleum is won and saved; and b an agreement in so far as it provides that after any Petroleum has been won and saved from the Licensed Area it shall be exchanged for other Petroleum. 4 The Licensee shall not without the consent of the OGA dispose of any Petroleum won and saved in the Licensed Area or any proceeds of sale of such Petroleum in such a manner that the disposal does to the knowledge of the Licensee or without his knowing it fulfil or enable another person to fulfil obligations which a person who controls the Licensee or a person who is controlled by a person who controls the Licensee is required to fulfil by an agreement which if the person required to fulfil the obligations were the Licensee would be an agreement of which the terms require approval by virtue of paragraph 3 of this clause; and for the purposes of this paragraph whether a person has control of another person is to be determined as if sections 4502 to 4 and 4511 to 5 of the Corporation Tax Act 2010 apply subject to the following modifications a for the words the greater part wherever they occur in section 4503 there are substituted the words onethird

or more; b in section 4514 and 5 for the word may there is substituted the word must; and c in section 4514 and 5 any reference to an associate of a person is to be construed as including only i a relative as defined in section 4482 of that Act of the person; ii a partner of the person; and iii a trustee of a settlement as defined in section 620 of the Income Tax Trading and Other Income Act 2005 of which the person is a beneficiary.

5 Where the Licensee is two or more persons then without prejudice to the Page 26 of 37GS Licence P2516 preceding provisions of this clause none of those persons shall enter into an agreement with respect to the entitlement of any of them to a the benefit of any right granted by this licence; or b any Petroleum won and saved from the Licensed Area; or c any proceeds of sale of such Petroleum unless the terms of the agreement have been approved in writing by the OGA but the preceding provisions of this paragraph do not apply to an agreement for the sale or for the proceeds of such sale of such Petroleum under which the price is payable after the Petroleum is won and saved and an agreement in so far as it provides that after any Petroleum has been won and saved from the Licensed Area it shall be exchanged for other Petroleum.

Power of revocation 41. 1 If any of the events specified in the following paragraph shall occur then and in any such case the OGA may revoke this licence and thereupon the same and all the rights hereby granted shall cease and determine but subject nevertheless and without prejudice to any obligation or liability incurred by the Licensee or imposed upon him by or under the terms and conditions hereof.

2 The events referred to in the foregoing paragraph are a any payments mentioned in clause 121 of this licence or any part thereof being in arrear or unpaid for two months next after any of the days whereon the same ought to have been paid; b any breach or nonobservance by the Licensee of any of the terms and conditions of this licence; c in Great Britain the bankruptcy or sequestration of the Licensee; d in Great Britain the making by the Licensee of any arrangement or composition with his creditors; e in Great Britain if the Licensee is a company the appointment of a receiver or administrator or any liquidation whether compulsory or voluntary; f in a jurisdiction other than Great Britain the commencement of any procedure or the making of any arrangement or appointment substantially corresponding to any of those mentioned in

subparagraphs c to e of this paragraph; g any breach or nonobservance by the Licensee of the terms and conditions of a Development Scheme; h if the Licensee is a company the Licensees ceasing to direct and control either i its operations under the licence; or ii any commercial activities in connection with those operations from a fixed place within the United Kingdom; i any breach of a condition subject to which the OGA gave its approval in pursuance of clause 403 of this licence; j any breach of clause 405 of this licence and where two or more persons are the Licensee any reference to the Licensee in subparagraphs c to h of this paragraph is a reference to any of those persons.

3 The OGA may revoke this licence with the like consequences as are mentioned in paragraph 1 of this clause if a the Licensee is a company; and Page 27 of 37S Licence P2516 b there is a change in the control of the Licensee; and c the OGA serves notice in writing on the Licensee stating that the OGA proposes to revoke this licence in pursuance of this paragraph unless such a further change in the control of the Licensee as is specified in the notice takes place within the period of three months beginning with the date of service of the notice; and d that further change does not take place within that period.

4 There is a change in the control of the Licensee for the purposes of paragraph 3b of this clause whenever a person has control of the Licensee who did not have control of the Licensee when this licence was granted or if there has been an assignment or assignation of rights conferred by this licence when those rights were assigned to the Licensee; and sections 4502 to 4 and 4511 to 5 of the Corporation Tax Act 2010 shall apply for the purpose of determining whether for the purposes of this paragraph a person has or had control of the Licensee with the modifications specified in clause 404 of this licence.

5 Where two or more persons are the Licensee and any of them is a company paragraphs 3 and 4 of this clause shall have effect as if a subparagraph a of paragraph 3 were omitted; b in subparagraph b of that paragraph after the word of there were inserted the words any company included among the persons who together constitute; and c for the word Licensee in any other provision of those paragraphs there were substituted the word company.

Power of partial revocation 42. 1 This clause applies in a case where two or more persons are the Licensee and a an event mentioned in clause 412c d e f or h occurs in relation to

one of those persons; or b the conditions specified in clause 413 are satisfied in relation to one of those persons. 2 Where this clause applies the OGA may exercise the power of revocation in clause 41 to revoke the licence in so far as it applies to the person mentioned in paragraph 1a or b. 3 If the OGA exercises the power in paragraph 2 the rights granted to the person under this licence cease but without prejudice to any obligation or liability incurred by the person or imposed under the terms and conditions of this licence. 4 Where this licence is revoked in relation to one person under this clause it continues to have effect in respect of the other person who constitutes or persons who together constitute the Licensee and in relation to whom it is not revoked.

Arbitration 43. 1 If at any time any dispute difference or question shall arise between the Minister or the OGA and the Licensee as to any matter arising under or by virtue of this licence or as to their respective rights and liabilities in respect thereof then the same shall except where it is expressly provided by this licence that the matter or Page 28 of 37S Licence P2516 thing to which the same relates is to be determined deed directed approved or consented to by the Minister or the OGA be referred to arbitration as provided by the following paragraphs. 2 The arbitration referred to in the foregoing paragraph shall be by a single arbitrator who in default of agreement between the Minister or the OGA and the Licensee and in the case of arbitration in relation to a Development Scheme other Licensees affected by that scheme as to his appointment shall be appointed by the Lord Chief Justice of England for the time being. 3 To the extent that this clause applies to any part of the Licensed Area situated within the Scottish area as defined in article 12 of the Civil Jurisdiction Offshore Activities Order 1987 this clause shall have effect as if a for the word arbitrator wherever it occurs in paragraphs 2 and 5 of this clause there were substituted the word arbiter; and b for the words the Lord Chief Justice of England in paragraph 2 there were substituted the words the Lord President of the Court of Session. 4 To the extent that this clause applies to any part of the Licensed Area situated within the Northern Irish area as defined in article 12 of the Civil Jurisdiction Offshore Activities Order 1987 this clause shall have effect as if for the words the Lord Chief Justice of England in paragraph 2 there were substituted the words the Lord Chief Justice of Northern Ireland.

5 In the case of any such arbitration which relates to a Development Scheme the Licensee shall unless the arbitrator otherwise determines perform and observe the terms and conditions of the Development Scheme pending the decision of the arbitrator. Ministry of Defence 44. 1 The Licensee shall give the Ministry of Defence six months prior notice of any installation movements within a Block. 2 The Licensee shall give the Ministry of Defence six weeks prior notice of any seismic survey within a Block. 3 The Licensee shall at his own expense install and maintain underwater sonar beacons to Ministry of Defence specifications on any structures that may be temporarily within a Block provided that there shall be no requirement to fit such beacons to fixed and charted installations. Relationship with fishing industry 45. 1 The Licensee shall appoint a fisheries liaison officer who shall agree suitable arrangements with the seismic survey and supply vessel owners employed by the Licensee their masters and the organisations which represent the local fishing industry in order to promote good working relationships between the various parties. The setting up of the arrangements shall be the responsibility of the Licensee. In particular the Licensee shall a consult the organisations which represent the local fishing industry about the sea routes to be used by supply vessels; b after informing the OGA of the result of such consultations agree with it Page 29 of 37S Licence P2516 which routes shall be used to minimise interference with fishing activities without thereby unreasonably increasing transit times; c ensure that the agreed routes are used unless safety of navigation or security of cargo considerations dictate otherwise; and d take all reasonable steps to ensure that a responsible person who is fluent in English is a member of the crew of the supply vessel. 2 The Licensee shall make every effort to locate and remove without unreasonable delay any debris resulting from the licensed activities. The Licensee shall consult the relevant fishing organisations on the method of clearance and inform the OGA of the result of such consultation. If as a result of such consultation the OGA determines that the method of clearance of debris should be modified such modifications shall be observed by the Licensee. 3 Claims for damage to or loss of gear or loss of fishing time arising from reported debris shall be dealt with promptly by the Licensee. Straight to Second Term Licence 46. 1 If no Initial Term is specified in

Schedule 5 to this licence this licence applies with the following modifications. 2 In clause 11 the following definitions are omitted a Early Surrender Area; b Early Surrender Period; c Initial Licensed Area; d Initial Term; e Mandatory Surrender Area; f Phase A; g Phase B; h Phase C; and i Work Programme. 3 For clause 32 there is substituted 2 Unless sooner determined under any of its provisions this licence shall continue a for the Second Term subject to clause 10; b for the Third Term subject to clauses 8 and 10. 4 The following clauses are omitted a clause 4 b clause 4A c clause 5 and d clause 6. 5 For clause 7 there is substituted 7 Extension of the Second Term 1 This clause applies to an extension to be made to the Second Term. 2 At any time not later than three months before the expiry of the Second Term or such shorter notice period as the OGA may in its discretion permit the Licensee may subject to payment of the sums specified in Schedule 2 and to performance of the terms and Page 30 of 37S Licence P2516 conditions herein contained give notice in writing to the OGA that the Licensee desires that term to be extended for a further period. 3 Where such notice is given the OGA may in its discretion direct in writing that the Second Term be extended; and paragraph 2 of this clause shall apply to that term as extended. 4 Any extension shall be for a period and subject to such conditions as the OGA may determine. 5 Where the Second Term is extended clause 3 shall apply in respect of that term as extended. 6 Where the Second Term is extended by a period the Third Term shall be reduced by the same amount. 6 In clause 11 1 and 2 5 6 or is omitted. 7 Clause 161 is omitted. Minister to grant Petroleum Prospecting Licences and Petroleum Production Licences 43 Section 10 of the Act authorizes the Minister to enter into an agreement with any j Petroleum Agreement Government of Guyana Ratio v5 6 Y 8 person with respect to inter alia the grant of a Licence the conditions to be included in a Licence the procedure to be followed by the Minister while exercising any discretion conferred upon him by or under the Act and the manner in which the discretion shall be exercised and any matter incidental to or connected therewith; Ratio Energy has submitted to the Government a Proposal the proposal for a Production Sharing Agreement in respect of a certain offshore area of Guyana on terms and conditions specified in the proposal; GGMC has been authorized by the Minister to negotiate this Agreement subject to the provisions of the Act and Regulations and to the final written approval of the Minister of its execution thereof and to assist in the administration and implementation thereof; Ratio Energy will have or will acquire the financial resources the managerial technical and industrial competence and the experience to carry out Petroleum Operations and will provide a guarantee in accordance with section 13 of the Act Pursuant to the aforesaid recitals Ratio Energy made an application to the Minister for a Petroleum Prospecting Licence in accordance with regulation 13 of the Regulations as hereinafter defined over the area described in Annex A and shown on the map attached as Annex B subject to the terms and conditions herein set forth and subject to the provisions of the Act and Regulations and Ratio Energy has agreed by execution of this Agreement to accept the said Licence on the said terms and conditions and provisions. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follows Petroleum Agreement Government of Guyana Ratio Article 1 Definitions 1.1 In this Agreement unless the context otherwise requires . SA Accounting Procedure means the procedure set out in Annex C; Act means the Petroleum Exploration and Production Act No.3 of 1986; Affiliated Company in relation to the Contractor means a company or corporation; i which is directly or indirectly controlled by the Contractor; or ii which directly or indirectly controls the Contractor; or iii which is directly or indirectly controlled by a company or corporation that also directly or indirectly controls the Contractor. For the

purpose of this definition control means the right to exercise a vote of fifty per cent 50 or more of all the voting shares; Agreed Interest Rate means interest computed on a monthly basis at the rate per annum equal to the average London Interbank Offer Rate LIBOR for six 6 months United States dollar deposits as published by the Wall Street Journal on the first Business Day of such month being calculated plus three 3 percentage raisal Programme means a programme carried out following a discovery of eum in the Contract Area for the purpose of delineating the Petroleum rvoir as defined in the Act to which that discovery relates in terms of kness and lateral extent and estimating the quantity of recoverable Petroleum erein prior to declaration of commerciality; Appraisal Well means a well drilled for the purpose of an Appraisal Programme; Article means an Article of this Agreement; Associated Gas means all Natural Gas produced from any Petroleum Reservoir of which the predominant production is Crude Oil and includes the gascap which overlies and is in contact with Crude Oil; Barrel means a quantity consisting of fortytwo 42 United States gallons liquid measure measured at standard conditions of atmospheric pressure and temperature 14.7 lbssq. inch absolute or 1 Kgsq. cm. absolute and corrected to a temperature of sixty 60 degrees Fahrenheit or fifteen 15 degreesCelsius bs Petroleum Agreement Government of Guyana RatioBusiness Day means a day on which the banks in Georgetown Guyana are customarily open for business. Calendar Month or Month means any of the twelve months of the Calendar Year; Calendar Quarter or Quarter means a period of three 3 consecutive months beginning on the first day of January April July or October; Calendar Year or Year means a period of twelve 12 consecutive Months commencing on January and ending on the succeeding December 31 provided however that a Year of a term of a Licence shall be the period specified in section 2 2 b of the Act; Commercial Discovery means any discovery which the Contractor in its sole judgement considers economic to develop and produce pursuant to the terms of the Agreement; Contract Area means G on the Effective Date the area described in Annex A and shown on the map in Annex B and the subject of the Petroleum Prospecting Licence granted to the Contractor pursuant to Article 3; and thereafter any areas which at any particular time are subject to the Petroleum Prospecting Licence

or Petroleum Production Licences granted to the Contractor under Article 8; Cost Gas has the meaning assigned in Article 11; Cost Oil has the meaning assigned in Article 11; Crude Oil or Oil means crude mineral oil asphalt ozokerite distillates condensates and all kinds of hydrocarbons and bitumens both in solid and liquid forms at standard conditions of temperature and pressure 60 degrees Fahrenheit or 15 degrees Celsius and 14.7 lbssq. in or Kgsq. cm; Delivery Point means in the case of Crude Oil the inlet flange of the lifting tankship; in the case of Natural Gas shall be the sales point and the point at which custody transfers from seller to buyer. In the case of LNG sales the Delivery Point shall be the inlet loading flange for the LNG tanker. In the case of pipeline deliveries the Delivery Point shall be the inlet flange to buyers pipeline or 4 Petroleum Agreement Government of Guyana Ratiodistribution system or the inlet to a third partys pipeline transporting buyers Natural Gas. The Delivery Point for LPGs shall be the sales point and the point at which custody transfers from seller to buyer. In the case of LPG exports the Delivery Point shall be the inlet loading flange for the LPG tanker or truck. In the case of pipeline deliveries of LPGs the Delivery Point shall be the inlet flange to buyers pipeline or distribution system or the inlet to a hi Wipeline transporting buyers LPGs; or in any case such other economically viable point for export of Petroleum in the Republic Of Guyana which shall be agreed to by the Contractor and the Minister; Development Costs means the expenditure so categorized in Annex C Development Plan means the plan referred to in Article 8.4; Development Well means any well drilled as part of a Development Plan; Discovery Area means an area which is part of a Prospecting Area consisting of a Discovery Block or Blocks in respect of which the Minister has been informed under section 30 of the Act; xpatriate Employee means any employee other than a Guyanese citizen not permanently resident in Guyana who is engaged under a contract of service for the purpose of Petroleum Operations; Exploration Costs means those expenditures so categorized in Annex C; Exploration Period means the initial period andor the first renewal period andor the second renewal period referred to in Article 4.1 as the case may be; Exploration Well means a well drilled which is not a Development Well with the objective of exploring for Petroleum on a geological entity he it of

structural stratigraphic facies or pressure nature to a depth or stratigraphic level specified in the work programme for the exploration work programme or such other depth or stratigraphic level resulting from information encountered during the drilling of such well; Field means an area within the Contract Area consisting of a Petroleum Reservoir or multiple Petroleum Reservoirs all grouped on or related to the same individual geological structural features or stratigraphic conditions from which 5 Petroleum Agreement Government of Guyana Ratio Petroleum may be produced commercially; General and Administrative Costs and Annual Overhead Charge means the expenditures so categorised in Annex C; Geologic Basement means any igneous or metamorphic rock or any stratum in and below which the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected; Government means the Government of the Republic of Guyana and its ministries and agencies; GGMC means the Guyana Geology and Mines Commission established under section 3 of the Guyana Geology and Mines Commission Act 1979; GGMC Act means the Guyana Geology and Mines Commission Act 1979 Licence means the Petroleum Prospecting Licence and/or the Petroleum Production Licences or both as the context requires; Lifting Entitlement means the quantity of Crude Oil to which a Party shall be entitled in any given period pursuant to Article 11; Minister means the Minister assigned responsibility for Petroleum or where there is no such Minister the President; Natural Gas or Gas means all hydrocarbons which at standard conditions of temperature and pressure 60 degrees Fahrenheit or 15 degrees Celsius and 14.7 psia gas dry mineral gas and casing head gas all substances contained therein including helium which are produced from an oil or gas well in their natural state residue gas remaining after extraction of NGLs from wet gas. For purposes of 4 Agreement Natural Gas shall also include liquefiable hydrocarbons obtained from Natural Gas by condensation or extraction including ethane propane butane pentanes and heavies Natural Gas Liquids or NGLs. Liquefied methane shall not be considered an NGL but rather Natural Gas in the liquid state. . NonAssociated Gas means Natural Gas or Gas other than

Associated Gas; NonResident SubContractor shall mean a SubContractor the control and management of whose business are exercised outside Guyana. Operating Costs means those costs so categorized in Annex C; Petroleum Agreement Government of Guyana Ratio¹⁴ Operator shall have the meaning assigned to it in Article 2.2a; Parties means the Government Ratio Energy and Ratio Guyana and includes their successors and permitted assignees and a Party shall mean any of the Parties; Petroleum Operations mean Prospecting Operations and/or Production Operations as defined in the Act; Petroleum Prospecting Licence means a Licence issued by the Government under the Act and the Regulations to Licensee for carrying out Prospecting Operations and set forth in Form C of the schedule as specified in the Regulations; Petroleum Production Licence means a Licence to be issued by the Government under the Act and the Regulations to Licensee for carrying out Production Operations and set forth in Form D of the schedule as specified in the Regulations; Profit Gas has the meaning assigned in Article 1] Profit Oil has the meaning assigned in Article 11; SubContractor means any company or entity which provides services to the Contractor in connection with Petroleum Operations; Third Party Sales means third party arms length sales made by i Contractor or ii Affiliated Company of Contractor to a third party for an armslength price which is disclosed to the Minister. The words and terms used in this Agreement but not defined herein shall if meanings have been assigned to them under section 2 of the Act have for the purposes of this Agreement the same meanings. The provision of this Agreement relating to the Petroleum Prospecting Licence shall be read as part of the provisions of such Licence. The provision of this Agreement relating to any Petroleum Production Licence shall be read as part of the provisions of such Licence. 7 Petroleum Agreement Government of Guyana Ratio^{1.5} The provisions in the Act and Regulations dealing with rights and obligations of the Contractor shall be read as part of but not nullify the provisions of this Agreement and any Licence issued to the Contractor. Petroleum Agreement Government of Guyana RatioArticle 2 Agreement the Operator Liabilities and indemnities 2.1 2.4 Agreement This Agreement constitutes an agreement made under section 10 of the Act consistent with the Act and the Regulations and is a production sharing agreement the

objective of which is the exploration for development and production of Petroleum in the Contract Area by the Contractor subject to the terms hereof and the provisions of the Act and Regulations under which the Contractor shall have an economic interest in the development of Petroleum from the Contract Area. The Operator a Ratio Guyana shall be the Operator charged with conducting the day to day activities of the Contractor under this Agreement. No transfer of operatorship to another party not being one of the Parties comprising the Contractor shall take effect unless it has been approved by the Minister which approval shall not be unreasonably withheld. The Minister shall be notified of any change of operatorship to another party not being one of the Parties comprising the Contractor in writing. The Contractor shall provide the Minister with a memorandum summarizing the operating arrangements between the Operator and the Contractor including any Party comprising the Contractor for the conduct of Petroleum Operations which will include inter alia a provision whereby the Operator agrees to conduct the Petroleum Operations in accordance with this Agreement the Licences and any applicable laws of Guyana. Liability The duties obligations and liabilities of the Parties comprising the Operator and the Contractor under this Agreement and under any Licence issued pursuant hereto shall be joint and several. Indemnity The Contractor shall at all times keep Government indemnified against all actions claims and the demands that may be brought or made against Government by a third party by reason of negligence any act or omission or reckless disregard of harmful consequences which results in damage to a third party by the Contractor or the Operator in the exercise or purported exercise of the rights of the Contractor under the Act or the Licence provided however that nothing in this Article shall require the Contractor to give the said indemnity for any claim or demand in respect of Petroleum taken by the Minister pursuant to 9 Petroleum Agreement Government of Guyana RatioArticle 1] after title has passed to the Minister at the Delivery Point or in respect of assets acquired by the Minister pursuant to Article 20 from and after the date of acquisition. Liability by the Contractor to the Government for damages in respect of Petroleum Operations under this Agreement is limited to insurance required in accordance with Article 20.2 a provided however that the Contractor shall not be liable to the

Government for indirect punitive or consequential damages including but not limited to production or loss of profits. 10 Petroleum Agreement Government of Guyana RatioArticle 3 Petroleum Prospecting Licence and Guarantee 3.1 Petroleum Prospecting Licence a On the date of this Agreement the Minister in accordance with the Act the Regulations and the terms of this Agreement shall grant to the Contractor the Petroleum Prospecting Licence for an initial period of four 4 years commencing three 3 months from the Effective Date over the area described in Annex A and shown on the map attached as Annex B hereto. b Subject to Article 4 and the other terms of this Agreement such Petroleum Prospecting Licence may be renewed but not more than twice at the election of the Contractor for consecutive periods of up to three 3 years each in accordance with the provisions of the Act and the Regulations. Guarantee The Contractor shall on or before the Effective Date during year one 1 of the initial period in accordance with Article 4.1 hereunder and thereafter no later than ninety 90 days after the commencement of all subsequent work commitment periods as specified in Article 4.1 provide an Affiliated Company guarantee or other form of guarantee acceptable to the Minister in the amount of ten 10 of the budget submitted by the Contractor pursuant to Article 7.1 for each specific work commitment period but not more than for one year each time. Notwithstanding the foregoing if the Contractor exceeds its minimum work commitment in any phase specified in Article 4.1 the completion of such work commitment shall constitute a waiver of such proportion of the requirement of the guarantee for any subsequent period by the Minister which is the equivalent of the excess work previously completed but which is applicable to the subsequent work commitment phase. If the guarantees are Affiliated Company guarantees they shall be in lieu of and satisfy any obligation to provide a guarantee and/or bond pursuant to the Act Regulations or this Agreement on the part or on behalf of the Contractor. il Petroleum Agreement Government of Guyana RatioArticle 4 Exploration Programme and Expenditure Obligation 4.1 Exploration Programme Subject to the provisions of this Agreement in discharge of its obligations to carry out Prospecting Operations in the Contract Area the Contractor shall carry out the minimum work commitments during the periods into which Prospecting Operations are divided hereunder a

The initial period of four 4 years shall be divided into two 2 phases. Each phase shall consist of twenty four 24 months duration. i Phase One 24 months During phase one 1 of the initial period the Contractor shall acquire all available 2D seismic data from previous surveys conducted over the Contract Area process and/or reprocess as necessary and interpret same. At the end of phase one 1 of the initial period the Contractor shall either elect to relinquish the entire Contract Area except for any Discovery Area in respect of which the Minister is informed under section 30 of the Act and the area contained in any Petroleum Production Licence or subject to Article 5. relinquish twenty five 25 percent of the Contract Area and commit to the Work Programme in phase two 2. Phase two 24 months During phase two 2 of the initial period the Contractor shall conduct a survey to acquire a minimum one thousand 1000 line kilometers of new marine 2D seismic and/or five hundred square kilometers 500 sq. km of new 3D seismic over the Contract Area process and interpret same. At the end of the initial period of four 4 years the Contractor shall elect either to relinquish the entire Contract Area or subject to Article 5 relinquish twenty percent 20 of the Contract Area except for any Discovery Area in respect of which the Minister is informed under section 30 of the Act and the area contained in any Petroleum Production Licence and renew the Petroleum Prospecting Licence for a further period of three 3 years. b The first renewal period of three 3 years shall be considered a single phase. 4 During the first renewal period the Contractor shall drill one 1; 12 Petroleum Agreement Government of Guyana Ratioexploration well in accordance with Article 4.2 within the Contract Area. At the end of the first renewal period of three 3 years the Contractor shall elect either to relinquish the entire Contract Area except for any Discovery Area in respect of which the Minister is informed under section 30 of the Act and the area contained in any Petroleum Production Licence or subject to Article 5 relinquish twenty percent 20 of the Contract Area and renew the Petroleum Prospecting Licence for a second period of three 3 years. c Second renewal period of three 3 years. The second renewal period of three 3 years shall be divided into two 2 phases. Phase one 1 will consist of twelve 12 months duration while phase two 2 will consist of twentyfour 24 months duration i Phase one 1 12 months During phase one the Contractor shall review the outcome from the

Exploration Well drilled in the previous period analyze all data therefrom and determine the merits for drilling .a second Exploration Well in the Contract Area for which planning to drill shall commence where sound merit for such drilling is established. At the end of phase one 1 of the second renewal period the Contractor shall elect either to relinquish the entire Contract Area except for any Discovery Area in respect of which the Minister is informed under section 30 of the Act and the area contained in any Petroleum Production Licence or commit to the Work Programme in phase two 2. i Phase two 2 24 months During phase two 2 of the second renewal period the Contractor shall drill one 1 Exploration Well in accordance with Article 4.2 within the Contract Area. At the end of the second renewal period of three 3 years. the Contractor shall relinquish the entire Contract Area except for i any Discovery Area in respect of which the Minister is informed under section 30 of the Act and ii the area contained in any Petroleum Production Licence and any other portion of the Contract Area on which the Minister agrees to permit the Contractor to conduct further exploration activities. ad The minimum work commitment for a given phase or period referred to in Article 4.1a b and c may be undertaken in an earlier phase or period 13 Petroleum Agreement Government of Guyana Ratio4.2 in whole or in part and in such a case the work commitment with respect to the subsequent period shall be deemed to be satisfied accordingly in whole or in part as the case may be. Contractor may conduct additional work beyond the minimum work commitment in accordance with the terms and conditions of this Agreement which shall be subject to Cost ARecovery. . or e Subject to Article 24 herein and section 43 of the Act the Minister may extend any Exploration Period pursuant to a showing of good cause by the Contractor. No Exploration Well drilled by the Contractor shall be treated as discharging any obligation of the Contractor to drill such Exploration Well unless either it has been drilled to the depth or formation agreed with the Minister and specified in the annual work programme or before reaching such depth or formation provided however that a the Contractor has expended on such well and any substitute well drilled pursuant to Article 4.2 d below the amount for such work commitment in the budget submitted by the Contractor and approved by the Minister as specified in Article 7.1; or b the Geologic Basement is encountered or c

a Discovery is made and the Minister is informed thereof; or d if insurmountable technical problems are encountered which in accordance with good oilfield practice make further drilling impractical provided that if the said Well is abandoned owing to the said problems before reaching the Geologic Basement the Contractor shall drill a substitute well in the Contract Area to the same minimum depth as aforesaid unless otherwise agreed with the Minister or until the amount in Article 4.2 a less any amounts actually expended on the abandoned well is reached or one of the criteria listed at Articles 4.2 b to d is satisfied and the Contractor shall be entitled to a reasonable extension of time considering the availability of drilling equipment manpower and materials to complete the minimum work commitment accordingly in order to drill the substitute Well.

Expenditure Obligation The sum actually spent in fulfillment of the work obligation in a specific phase or period shall be deemed to have satisfied the Contractor's minimum expenditure obligation for that phase or period. For the avoidance of doubt, in the event the Contractor has performed its work obligations; for an amount less than the amount specified in an annual work programme and budget submitted under the Petroleum Agreement Government of Guyana Ratio Article 7 Contractor shall be deemed to have fulfilled its expenditure obligation for that phase or period. Petroleum Agreement Government of Guyana Ratio Article 5 Relinquishment of Areas Or b) If prior to the end of the first phase of the initial period of the Petroleum Prospecting Licence issued to the Contractor under Article 3.1 the Contractor elects not to relinquish the entire Contract Area Contractor shall relinquish twentyfive 25 percent of the Contract Area less the exclusions provided for in Article 5.4 If prior to the end of the initial period of the Petroleum Prospecting Licence issued to the Contractor under Article 3.1 an application is made by the Contractor for renewal of the Licence under section 24 1 of the Act the Contractor shall relinquish at the end of the initial period an area equal to at least twenty percent 20 of the Contract Area less the exclusions provided for in Article 5.4 If prior to the end of the first renewal period of the Petroleum Prospecting Licence an application is made by the Contractor for a second renewal of the Licence under section 241 of the Act the Contractor shall then relinquish at the end of this first renewal period an area equal to at least twenty percent 20 of the Contract Area

less the exclusions provided for in Articles 5.4 The areas to be relinquished pursuant to Articles 5.1 5.2 and 5.3 shall a comprise Blocks as defined in the Act; b exclude any Discovery Area together with a reasonable area of protective acreage surrounding the Discovery Area; c exclude any Production Area; be selected by Contractor so that the area relinquished shall comprise one 1 discrete area having regard to any representations made by the Minister with respect to location shape and size; the Blocks to be retained for and during the remainder of the initial period and the first renewal period pursuant to Articles 5.1 5.2 and 5.3 shall constitute one 1 discrete area unless otherwise agreed to by the Minister. In the event that an area or areas cannot be identified for relinquishment in accordance with this Article without including in such area or areas in whole or in part a subsisting Discovery Area or Production Area or the Minister is of the opinion that the areas to be relinquished will not enable licensing separately or jointly with contiguous unlicensed areas then the Minister and Contractor shall 16 Petroleum Agreement Government of Guyana Ratioconsult together with a view to agreeing on the areas to be relinquished in the light of the circumstances then prevailing. If after sixty 60 days from receiving notice of the Contractor's proposed relinquishments the Parties cannot agree on a proposed relinquishment the Parties shall refer the matter to a sole expert pursuant to Article 26. 5.6 For the purpose of this Article a Discovery Area shall not include any Discovery Block which relates to a Discovery in respect of which the Contractor has notified the Minister that the Discovery is not of potential commercial interest pursuant to section 31 1 of the Act unless such Discovery Block forms a part and only to that extent of another subsisting Discovery Area. 5.7 If a Petroleum Prospecting Licence ceases to have effect with respect to Discovery Blocks pursuant to section 32 1 of the Act such reduction in size of the Contract Area shall be treated as an advance relinquishment under this Article and shall reduce the area next required to be relinquished accordingly. 5.8 Without prejudice to the obligations undertaken in Article 4 the Contractor may at any time during the period of the Petroleum Prospecting Licence on giving the Minister no less than three 3 months notice in writing of its intention to do so relinquish any Block or Blocks in the Contract Area pursuant to section 28 of the

Act and in accordance with Articles 5.5 and 5.6. Any such relinquishment shall count towards any subsequent mandatory relinquishments required under Articles 5.1 5.2 or 5.3 above as the case may be.

Petroleum Agreement Government of Guyana Ratio

Article 6 Delegation; Cooperation between Contractor and GGMC

6.1 6.4 The Minister may subject to the provisions of the Act or any other law delegate any person to exercise and perform any of the Ministers functions under this Agreement and anything done by the delegate in pursuance of the delegation shall have the same validity and effect as it would have if done by the Minister. The Minister has delegated GGMC the Delegate to perform inter alia the following functions

- a to monitor in consultation and coordination with the Operator and/or the Contractor the Petroleum Operations carried out by the Contractor;
- b to review any proposed exploration work programme and budgets presented by Contractor under Article 7 and any Appraisal Programme presented by the Contractor under Article 8;
- c to review any Development Plan submitted by the Contractor in connection with an application for a Petroleum Production Licence pursuant to section 34 of the Act to ensure the maintenance and availability for inspection of operating records and reports for Petroleum Operations maintained in accordance with good oilfield practice ; to ensure the Parties compliance with the provisions of this Agreement Petroleum Act and Regulations. The Contractor and the Delegate shall cooperate in good faith in order to enable the Delegate the exercise of the Ministers functions delegated pursuant to this Article and the Contractor shall keep the Delegate advised periodically of all relevant activities taking place during the course of Petroleum Operations and shall provide the Delegate with all available relevant information relating to Petroleum Operations as the Minister or the Delegate may reasonably require. Towards this end the Delegate and the Contractor shall meet at regular intervals but at least once every year to review the progress and results of the Petroleum Operations and to discuss the work programme and other activities to be undertaken in the ensuing months With respect to the matters to be reviewed pursuant to Article 6.3 should the Delegate wish to make any specific proposals or revisions thereto the Delegate shall so notify the Contractor in writing specifying its reasons therefor;

within 18 Petroleum Agreement Government of Guyana Ratio

6.5 6.6

6.7 reasonable time thereafter the Contractor and the Delegate shall meet and endeavour to agree on the proposals or revisions. The Contractor shall consider and take into account the proposals of the Delegate and shall attempt in good faith to reach agreement on such proposals. If the Contractor and the Delegate fail to agree within sixty 60 days of submission by the Contractor the exploration work programme and budget including as appropriate any minimum work programme to be undertaken pursuant to Article 4 submitted pursuant to Article 7 and the Appraisal Programme except in the case of Gas to which the provision of Article 12 shall apply submitted pursuant to Article 8 revised in accordance with any amendments or additions thereto agreed by the Delegate and the Contractor shall] be deemed adopted. Nothing herein above provided shall preclude the right of the Minister to delegate any additional function to the Delegate or subject to Article 6.1 to delegate from time to time any functions including those herein contained to any other agency of Government. A delegation shall not increase the obligations or liabilities of the Contractor and written notice of any delegation shall be given promptly to the Contractor. Any approvals required by the Minister or delegates of the Minister shall not be unreasonably withheld or delayed. If the Contractor requests required approval from the Minister or delegates of the Minister such approval shall be deemed as granted if no response is provided within sixty 60 days of the request. In the event due to operational constraints an approval is required within less than sixty 60 days the Delegate upon the request of the Contractor. will make every reasonable effort so that the Minister will favorably consider granting such approval within the required shortened timetable. The Minister and the Delegate shall upon request either provide to the Contractor or assist the Contractor in obtaining the assistance required for the following approvals and/or permits to facilitate the Contractor to fulfill requirements of the contract including but not limited to the following a all approvals to be issued by Government agencies or local government institutions which are required to conduct Petroleum Operations including. without derogating from the generality of the aforesaid. chartering supply boats and allowing them to sail to and from the License Area hiring helicopters and allowing them to fly to and from the License Area use of explosives as well as approvals

necessary to import goods and services free from duties and taxes; approvals for easements and rightofway to enable Contractors to conduct operations; c approvals for security for field operations and personnel 19 Petroleum Agreement Government of Guyana Ratio f g h i G permission for entry and exit visas and working permits for Contractors employees subcontractors and their dependents; supply reports analyses samples geological geophysical and production data necessary to Contractor from areas inside and outside the Contract Area; approvals to export hydrocarbons. and use essential infrastructure necessary for the economic export of hydrocarbons at normal commercial terms. Environmental approvals required in order to conduct Petroleum Operations in the License area or which are required to conduct operations elsewhere that are associated with said Petroleum Operations; Communications permits to allow for international communications from the License area including mobile phones land line phones highspeed internet connections facsimile transmissions. etc.; Permits to erect refining facilities. laying pipes for transporting oil and gas and erecting LNG facilities; In the event pursuant to Section 59 of the Act the Minister grants any person the right to carry on geological geophysical surveys and investigations in any block included in the License area the raw data of those surveys and investigations will promptly after their completion be made available without any charge to the Contractor. 20 Petroleum Agreement Government of Guyana RatioArticle 7 Annual Work Programme and Budget 7.1 Within sixty 60 days after the Effective Date. the Contractor shall prepare and submit to the Minister in detail a work programme and budget setting forth the Prospecting Operations which the Contractor proposes to carry out including as appropriate any minimum work obligations to be undertaken pursuant to Article 4 during the remaining portion of the Calendar Year. In subsequent years no less than one 1 month before the beginning of the Calendar Year the Contractor shall prepare and submit to the Minister a work programme and budget setting forth Petroleum Operations which the Contractor proposes to conduct during the upcoming Calendar Year. The Contractor may. for good cause amend the details of any work programme ur budget submitted to the Minister pursuant to Article 7.1 provided that a notice of the details of the reasons for the amendments is given to the Minister; b such amendments

shall not have the effect of reducing the minimum work obligations undertaken under Article 4 without the prior consent in writing of the Minister; c any proposed amendment shall be subject to review pursuant to Article 6. Petroleum Agreement Government of Guyana RatioArticle 8 Discovery and Development 8.1 Where pursuant to section 30 of the Act notice has been given to the Minister of a Discovery in the Contract Area the Contractor shall forthwith inform the Minister of the steps it proposes to take to satisfy the requirements of section 30 1 a iii of the Act. 8.2 Where the Contractor pursuant to section 31 1 of the Act has informed the Minister that in its opinion the Discovery is of potential commercial interest the Contractor shall as soon as practicable thereafter submit for the consideration of the Minister its proposals for an Appraisal Programme to meet the requirements of section 30 1 b of the Act. 8.3. Where an Appraisal Programme has been adopted by the Contractor pursuant to Article 8.2 the Minister may on application by the Contractor pursuant to section 31 2 of the Act. stating reasons therefor extend the period within which application may be made by the Contractor for a Petroleum Production License. 8.4 Where the Contractor has made an application to the Minister for a Petroleum Production Licence in respect of any part of the Contract Area in accordance with section 34 1 of the Act such application shall be accompanied by the proposals required under section 34 3 of the Act hereinafter referred to as the Development Plan and shall satisfy the provisions of section 36 of the Act and in consultation with GGMC prepare and implement a programme for g and employment of Guyanese nationals in each phase and level of pum Operations and for the development of management and technical or the safe and efficient conduct of Petroleum Operations. fhe application and GGMC and Contractor shall meet to discuss the application with a view to ensuring that the requirements of Article 8.4 are met. In the event that the Parties are unable to agree on amendments to the application to meet such requirements within sixty 60 days from the date of aforesaid application or such longer period as the Parties shall agree. or where the Minister fails to respond to or act on the aforesaid application within sixty 60 days. the Contractor may refer the matter to a sole expert pursuant to Article 26 for determination within sixty 60 days of appointment of such expert or such other time period as may be agreed between the

Contractor and the Minister. 8.6 Where the Minister considers that the aforesaid application has met the requirements of Article 8.4 he shall within sixty 60 days of receipt thereof so notify the Contractor. In such event or where in the event of a dispute it is 22 Petroleum Agreement Government of Guyana Ratio 8.7 8.8 determined by the sole expert pursuant to Article 26 that the Contractor has made an application which meets the requirements of Article 8.4 provided the Contractor is not in default under this Agreement the Minister shall grant within sixty 60 days of such notification or determination as the case may be to Contractor a Petroleum Production Licence in the Form D of the schedule as specified in the Regulations over the area for which the application has been made on terms and conditions consistent with this Agreement and the Act and Regulations which will enable the Contractor to carry on Petroleum Operations in the Production Area in accordance with the Development Plan wherein the level of production set shall be consistent with the maximum efficient rate of production which conforms to sound reservoir engineering principles in accordance with good international petroleum industry practice. In the event the Minister imposes policybased production limits on production below those consistent with maximum efficiency rates for the field or fields any such production limits will be imposed countrywide and shall be allocated proportionately based upon demonstrable verifiable field production capacities. While the Contractor holds a Petroleum Prospecting Licence or has made an application pursuant to Article 8.4 and in accordance with section 34 1 of the Act the Minister shall not grant a Petroleum Production Licence in respect of all or part of the Contract Area or area covered by such application whether on a geographical or geological basis to any third party. Where the Contractor pursuant to section 31 1 of the Act has served notice on the Minister that in its opinion a Discovery made in the Contract Area is not of potential commercial interest the provisions of section 32 1 of the Act shall apply. The Contractor may apply for a renewal of a Petroleum Production Licence for a maximum ten 10 years. The application for renewal shall be granted as long as the Contractor is in good standing under the Licence. Natural Gas. In the event of any NonAssociated Gas discovery within the Contract Area in recognition of the fact that Natural Gas

projects enerally have much longer lead times from discovery to first commercial roduction than is the case for Crude Oil projects the Minister shall grant ontractors request for the maximum ten 10 year Petroleum Production icence renewal so long as Contractor is in good standing under the a7 Licence. oO The Minister shail not refuse to grant the renewal of a Petroleum Production Licence under section 401 of the Act without first providing the Contractor; ii Notice stating the grounds of the intended refusal and Petroleum Agreement Goverment of Guyana RatioGi Ninety 90 calendar days following the date of the notice referenced in Article 8.9bi to respond to or remedy the stated grounds for refusal. Petroleum Agreement Goverment of Guyana RatioArticle 9 Records Reports and Information; Confidentiality 9.1 Records Reports and Information a b f The Contractor shall at all times while this Agreement is in force maintain and submit to the Minister in accordance with the provisions of the Act and the Regulations the Petroleum Production Licence and this Agreement full and accurate reports. records retums and accounts of Petroleum Operations in the Contract Area. All data well logs maps magnetic tapes cuts of cores and cutting samples and all other geological and geophysical information obtained by the Contractor in the course of carrying out Petroleum Operations hereunder and all geological technical financial and economic reports studies and analyses generated in relation thereto hereinafter referred to as Petroleum Data shall be submitted to the Minister in accordance with the Regulations. The Contractor may freely export for processing or laboratory examination or analysis samples or other origina materials constituting Petroleum Data provided that samples equivalent in size and quality or where such material is capable of reproduction copies of equivalent quality have first been delivered to the Minister. Petroleum Data shall be the joint property of the Minister and the Contractor but shall become the sole property of the Minister with respect to any area which ceases to be part of the Contract Area whether as result of relinquishment or expiry surrender or termination of a Licence or otherwise in accordance with the Act from the date on which such area ceases to be part of the Contract Area. The Minister through duly appointed representatives upon providing the Contractor with at least seven 7 days written notice shall be entitled to observe the Petroleum Operations conducted by the Contractor at his sole

cost and expense and at all reasonable times to inspect all assets records and data kept by the Contractor relating to such Petroleum Operations. In the exercise of such rights under this paragraph the Minister shall not unduly interfere with the Contractors Petroleum Operations under this Agreement. Nothing in this Article shall be construed as requiring the Contractor or any of the Parties comprising the Contractor to disclose any of its proprietary technology or that of its Affiliated Companies which is not acquired in the course of Petroleum Operations under this Agreement. 25

Petroleum Agreement Government of Guyana Ratio9.2 Confidentiality a All Petroleum Data information and reports obtained or prepared by the Contractor hereunder shall so long as they relate to any part of the Contract Area be treated as confidential and each of the Parties undertakes not to publish reproduce or otherwise deal with such Petroleum Data or to disclose the same or the thereof to any other person without the consent in writing of the other Parties such consent not to be unreasonably withheld provided however that subject to Article 9.2 b this Article shall not i prevent disclosure by the Contractor aa bb ce dd ee Petroleum Agreement Government of Guyana Ratio to an Affiliated Company or employees of an Affiliated Company; to consultants professional advisers data processing centres laboratories and SubContractors where disclosure is essential to work for Contractor; to a bank or other financial institution where disclosure is essential to obtain financing for Contractor or Affiliated Company of Contractor; to the extent required by any applicable law or the regulations of any stock exchange upon which the shares of the Contractor or an Affiliated Company are quoted by applicable law or by governmental order decree regulation or rule or to the extent required under any legal proceeding or any court order binding on Contractor or Affiliated Company of Contractor; to bona fide prospective assignees or transferees of an interest hereunder of the Licence or of the Contractor or in connection with merger consolidation or a sale of stock of the Contractor or an Affiliated Company thereof in connection with data trades of data information and reports already known to the Operator or the Contractor or Affiliated Company prior to the Effective Date; or of data information and reports acquired independently from a third party that represents that it has the right to disseminate such data at the time it is acquired by the 26b c d e Petroleum

Agreement Government of Guyana Ratio Contractor or Affiliated Company; ii prevent disclosure pursuant to section 4 of the Act provided however that neither the Minister nor Contractor shall disclose Petroleum Data relating to any area subject to a Licence to a competitor of the Contractor without the prior written consent of the other Party; or iii be construed as imposing on any Party any obligation hereunder with respect to any petroleum data information or reports which are without disclosure by such Party generally known to the public. Any petroleum data information or reports disclosed by the Operator or the Contractor pursuant to this Article shall be disclosed on terms which ensure that the data information or reports aforesaid are treated as confidential by the recipient except for disclosures made pursuant to Article 9.2 a i dd and prompt notice of all disclosures shall be given to the Minister. All petroleum data which becomes the sole property of the Minister pursuant to Article 9.1 d shall continue to be treated as confidential by the Contractor for a period of one 1 year from the date on which it became the sole property of the Minister but may be used by the Contractor in connection with data trades with the prior written consent of the Minister such consent not to be unreasonably withheld subject however to Article 9.2 b. Where a Licence ceases to be in force with respect to any area except if Contractor was granted a Petroleum Production Licence with respect to part of such Licence area. the Contractor shall deliver to the Minister originals of all petroleum data and other information relating 10 such areu pursuant to regulation 26 of the Regulations provided however that. un application duly made to him pursuant to regulation 28 of the Regulations the Minister shall permit the Contractor to retain copies of petroleum data and information relating to the Contract Area subject to Article 9.2 b. Notwithstanding the provisions of Article 9.1 d all the Contractors proprietary technology except technology for which the cost of development has been approved as Recoverable Contract Cost under this Agreement shall remain of the Contractor. Article 10 Annual Licence Rental Charge The Contractor shall pay to the Government without demand on the Effective Date of this Agreement in the first astance and in each subsequent year thereafter on the anniversary date of the Petroleum Prospecting Licence or the date of grant of any Petroleum Production Licence as the case may be

so long as the said Licence remains in force an annual Licence rental charge of two hundred thousand United States Dollars US200000. in respect of the Contract Area for the entire Exploration Period and such payments shall apply to those areas remaining after taking into account any relinquishments pursuant to Article 5 as specified below. Payments under this Article 10 shall be paid directly into bank accounts held and controlled by GGMC. Contractor shall verify such bank accounts and GGMC agrees to cooperate. assist and provide Contractor any information it requires to conduct such verification.

28 Petroleum Agreement Government of Guyana Ratio

Article 11 Cost Recovery and Production Sharing

11.1 Subject to the terms and conditions of this Agreement the Contractor shall bear and pay all Contract Costs incurred in carrying out Petroleum Operations and shall recover Contract Costs only from Cost Oil and/or Cost Gas as herein provided.

11.2 All Recoverable Contract Costs incurred by the Contractor shall, subject to the terms and conditions of any agreement relating to Non-Associated Gas made pursuant to Article 12 be recovered from the value determined in accordance with Article 13 of Crude Oil hereinafter referred to as Cost Oil and/or Natural Gas Cost Gas produced and sold from the Contract Area and limited in any Month to an amount which equals seventy-five percent 75 of the total production from the Contract Area for such Month excluding any Crude Oil and/or Natural Gas used in Petroleum Operations or which is lost.

Recoverable Contract Costs means such costs as the Contractor is permitted to recover as from the date they have been incurred. pursuant to the provisions of Annex C. To the extent that in any Month Recoverable Contract Costs exceed the value of Cost Oil and/or Cost Gas determined in accordance with Article 13 and/or Article 12 the unrecoverable amount shall be carried forward and subject to the limitation stipulated in Article 11.2 shall be recoverable in the immediately succeeding Month and to the extent not then recovered in the subsequent Month recoverable Contract Costs have been satisfied to the extent aforesaid hereinafter referred to as Profit Oil and/or Profit Gas as the case may be shall be shared between the Government and the Contractor for each Field in the following proportions Contractor fifty percent 50 and Minister fifty percent 50.

11.5 The quantity of Cost Oil and/or Cost Gas actually utilized in satisfying the Recoverable Contract Costs may be

allocated by the Contractor to production costs and be calculated as specified in Section 11.9 below.

11.6 Subject to the provision of Article 14, the Profit Oil and Profit Gas shall be shared between the Government and Contractor on a Monthly basis according to their respective entitlements as set

out in Article 11.4. 11.7 . To the extent that the actual quantities and costs required to determine

Cost Oil and Cost Gas and Profit Oil and Profit Gas for the Month in question are not known

Crude Oil and Natural Gas sharing shall be calculated on an interim basis each Month using the

following 29 Petroleum Agreement Government of Guyana Ratio a unrecovered Recoverable

Contract Cost; b estimated current Recoverable Contract Cost by reference to the agreed work

programme and budget supplemented by any other relevant documents or information which are

accepted by Contractor and Minister as being reliable indicators of the actual position for the Month

in question; c estimated production for the Month in question; d Crude Oil and Natural Gas price

from the previous Month. 12.8 Retroactive adjustments shall be made to the Crude Oil and Natural

Gas entitlements and shall be agreed with the Minister based on recalculations utilizing actual

quantities of Crude Oil and Natural Gas produced and saved and Recoverable Contract Costs.

Any revised entitlements shall be made subject to any applicable lifting agreements as soon as

practicable after such elements have definitely been determined. 11.9 The Contractor shall have the

right to use in any Petroleum Operations as much of the production as may reasonably be required

by it therefor and the quantities so used or lost shall be excluded from any calculations of Cost Oil

and Cost Gas and Profit Oil and Profit Gas entitlement. Petroleum Agreement Government of

Guyana Ratio Article 12 Associated and Non Associated Gas. 12.1 Associated Gas a The

Associated Gas produced from any Oil Field within the Contract Area shall be insofar as practical

from technical or environmental considerations with priority used for the purposes related to the

operations of production and production enhancement of Oil Fields such as Gas Injection Gas

Lifting and power generation. b Based on the principle of full utilisation of the Associated Gas

provided that such utilisation is commercially viable and with no impediment to normal production of

Crude Oil a plan of utilisation of the Associated Gas shall be included in the Development Plan of

each Oil Field. If there is any excess Associated Gas in the Oil Field after utilisation pursuant to Article 12.1 a the Contractor shall carry out a feasibility study regarding the utilisation of such excess Associated Gas of such Oil Field. Such feasibility study if carried out before submission of the Development Plan of an Oil Field shall be included in the Development Plan. In the event that the Contractor conducts a further feasibility study of the utilisation of the excess Associated Gas of such Oil Field such further feasibility study shall be submitted to the GGMC for review and discussion. If the excess Associated Gas in any Oil Field is utilized the construction of facilities or such utilisation and the production of excess Associated Gas shall be carried out while a Petroleum Production Licence continues in force. If the Contractor believes that excess Associated Gas of an Oil Field has commercial value the Contractor shall be entitled, but not required, to make further investment to utilise such excess Associated Gas subject to terms at least as attractive as those established for Crude Oil in Article 11 including but not limited to cost recovery for such further investment. If the Contractor believes improved terms are necessary the Parties shall carry out friendly negotiations in a timely manner to find a new solution to the utilisation of the said excess Associated Gas and reach an agreement in writing. a If the Contractor does not believe that the Associated Gas has commercial value but the Minister believes the Associated Gas does have commercial value the Government may utilise the Associated Gas provided there is no impediment to normal production of Crude Oil. All handling from the point of separation of Crude Oil shall be at the sole risk and expense of the Government and will not affect the amount of Cost Oil and Profit Oil due to Contractor. . e Expenses incurred by the Contractor in the production and use of the Associated Gas of an Oil Field as stipulated in Article 12.1 and those 31 Petroleum Agreements Government of Guyana Ratiof incurred in carrying out any feasibility study on the utilisation of the excess Associated Gas shall be charged to the development cost of the Oil Field and shall be cost recoverable. If the Parties agree that the excess Associated Gas of an Oil Field has no commercial value then such Gas shall be disposed of by the Contractor provided that there is no impediment to normal production of the Crude Oil in the most economic manner consistent with good international

petroleum industry practice. 12.2. Non Associated Gas a When the Contractor in accordance with Article 8.2 has informed the Minister of any Non Associated Gas discovery within the Contract Area that is of potential commercial interest the Contractor shall inform the Minister whether Contractor believes such discovery is potentially commercial under the current Agreement terms. If the Contractor believes that the fiscal terms will have to be revised in order to economically commercialize the NonAssociated Gas discovery the Contractor shall propose revisions to the fiscal terms as the basis for entering into good faith negotiations to reach mutually acceptable terms for developing the NonAssociated Natural Gas discovery. The agreement which shall form an annex to this Agreement. shall be based on and include the following principles For a period of six 6 months from the date of the notice delivered to the Minister under Article 8.2 the Contractor and the Minister shall engage in good faith negotiations of such revisions to Article 11 that would be necessary in order to provide the Contractor with project economics that will provide the Contractor with an annual rate of return of not less than eighteen percent 18. The Parties recognize that in order to achieve an economically viable development of NonAssociated Natural Gas different fiscal regimes may have to be considered. In the event the Parties cannot agree upon the necessary revisions to Article 11 a sole expert shall be engaged pursuant to Article 26.3. Once the sole expert renders its decision the Contractor shall review the decision and shall notify the Minister as to whether it shall proceed with the development of the NonAssociated Gas discovery under the terms of the sole expert decision. In the event the Contractor elects not to proceed the Contractor shall relinquish the nonAssociated Gas discovery to the Government. iii The time period between the notice of discovery provided for in section 311 of the Act and the application for grant of a Petroleum Production Licence shall be extended pursuant to 32 Petroleum Agreement Government of Guyana Ratiosection 312 of the Act if necessary to provide reasonable time as agreed between the Parties to conduct an Appraisal Programme develop a Gas market and design and construct facilities necessary to commercialize the Natural Gas. b Following the signature of the agreement pursuant to subparagraph a above the Contractor shall work out an Appraisal Programme for the discovered

Gas Field according to the terms and conditions determined in the said agreement and submit it to the GGMC for review pursuant to Article 6.4. The Contractor shall carry out the Appraisal Programme which was reviewed and agreed upon with GGMC. The expenses incurred in carrying out the said Appraisal Programme by the Contractor shall be charged to the Exploration Costs of the Contract Area and shall be cost recoverable as permitted under the terms of Annex C. c After completion of the Appraisal Programme of a Gas Field. the Contractor shall submit a report on the Appraisal Programme to GGMC for its review and discussion. If the Contractor retains a Gas Field beyond the expiration of the Exploration Period pursuant to Article 12.2 the Contractor shall pay to the Minister at the commencement of each year of the retention period an annual rental to be arrived at through friendly negotiations but which shall be no less than Twentyfive thousand United States Dollars US25000. The holding fee shall be refunded to Contractor on a pro rata daily basis in the event the Contractor relinquishes the Gas Field or declares such Gas discovery to be a commercial discovery prior to the end of such year. 2.3 General Conditions Applicable to Natural Gas a Subject to the Governments election to take its production in kind and. reserving its rights to market its own production the Contractor shall have the sole responsibility for marketing all the available Natural Gas from the Contract Area and for negotiating for the sale thereof on a joint basis at fair market prices and terms common to both the Minister and the Contractor in accordance with Third Party Sales principles. The Contractor will pursue markets both within and outside Guyana and seek to market Natural Gas to the highest realization outlets afier deduction of development. production and transportation costs. Insofar as possible. depending upon the market for natural gas and the cost of development production and processing thereof the Contractor will seek to recognize Natural Gas potential value at the international value of alternative fuels in the end user market of the buyers. b The Contractor shall have the right but not the obligation to process 22 33 Petroleum Agreement Government of Guyana RatioNatural Gas for conversion to liquids chemicals or similar Gas utilisation projects and Contractor shall have the right to dispose of the liquids or products therefrom. The Contractor shall have the right to process Natural Gas for recovery of the liquids

contained therein. Natural Gas Liquids NGLs recovered and sold shall be valued based upon the international value of such products 48 published in Platts and adjusted to reflect the fair market value of such products FOB Guyana. In addition the Contractor shall have the right to liquefy the Natural Gas for sale as LNG and/or the right to compress the Natural Gas to accommodate sales as compressed natural gas CNG. c The Contractor shall have the right to use Natural Gas both Associated Gas and NonAssociated Gas as may be required for Oil Field and Gas Field operations including the right to reinject for pressure maintenance and enhanced recovery without charge fee or royalty.

12.4 General Conditions Related to Petroleum Operations

a Subject to the approvals of appropriate governmental authorities which approvals shall not be unreasonably withheld, the Contractor shall have the right to construct operate and maintain roads, drill water wells and to place and/or construct onshore and offshore fixtures and installations necessary to conduct the Petroleum Operations including but not limited to storage tanks trunk pipelines shipment installations pipelines floating or fixed platforms cables or similar lines liquefaction processing and compression located inside or outside the Contract Area as well as construct operate and maintain or lease facilities for the transportation of Crude Oil and Natural Gas from the Contract Area. Any required governmental approvals may be conditional on the use by other producers of the excess capacity if any of those facilities for a price to be agreed upon from time to time by the Contractor. Where the Minister and Contractor agree that a mutual economic benefit can be achieved by constructing and operating common facilities the Contractor shall use its reasonable efforts to reach agreement with other producers on the construction and operation of such common facilities.

b Subject to negotiations on a reasonable price and available capacity rights the Contractor may have access to and use of any export facility or pipeline or other facilities or infrastructure built by the Government or by any wholly or partially owned Guyana state enterprises on terms no less favorable than those of any other party having access or use of such facility.

c Subject to negotiations as to a reasonable price and ownership interest in the facilities the Contractor may have the right to participate in the construction ownership and operation of any of the types of facilities

34 Petroleum Agreement Government of

Guyana Ratiodescribed in subclause 12.4a above that are built by the Government or by any wholly or partially owned state enterprises or by any third parties on terms no less favorable than those of any other party participating therein. as JO Petroleum Agreement Government of Guyana RatioArticle 13 Valuation of Crude Oil or Natural Gas 13.1 Where one hundred percent 100 of the sales of Crude Oil or Natural Gas made by the Contractor during a Calendar Month are Third Party Sales then the price shall be determined as the net realized price i.e. after deducting commissions and brokerages for that sale at the F.O.B. point of delivery. Where Crude Oil or Natural Gas is sold by the Contractor other than in one hundred percent 100 Third Partv Sales during a Calendar Month then that Crude Oil or Natural Gas shall be valued at the following applicable price b the prices aforesaid shall be determined as follows i in the event that fifty percent 50 or more of the total volume of sales by the Contractor during the Calendar Month of Crude Oil or Natural Gas of a given quality produced hereunder from a Field were Third Party Sales as hereinafter defined the price of all Crude Oil or Natural Gas from such Field of that quality shall be deemed to be the simple arithmetic average price actually realised. calculated by dividing the total receipts from all such sales calculated FOB the Delivery Point by the total number of Barrels of Crude Oil or Mcfs of Natural Gas sold from such Field in such sales; in the event that less than fifty percent 50 of the total volume of sales by the Contractor during the Calendar Month of Crude Oil or Natural Gas of a given quality produced hereunder from a Field were Third Party Sales the price of all Crude Oil or Natural Gas from such Field of that quality will be determined by the arithmetic average of aa The simple arithmetic average price actually realised in the Third Party Sales during the Calendar Month of such Crude Oil produced hereunder if any calculated by dividing the total receipts from all such sales calculated FOB at the Delivery Point by the total number of barrels of Crude Oil sold in such sales from such Field; and bb The simple arithmetic average price per barrel at which one or more crude oils of similar qualitiv to the Crude Oil are being sold. such price being determined by calculating the average for the Month in which production takes place uf the mean of the high and low FOB price or prices for each day of those crude oils as quoted in Platts Crude Oil Market Wire daily publication. In

the event that Platts 36 Petroleum Agreement Government of Guyana Ratio ceases to be published or is not published for a period of thirty 30 consecutive days then the Parties shall agree on an appropriate alternative publication. In determining the final price account shall be taken of any differences between the Crude Oil and the crude oils quoted in Platts for quality API gravity sulphur pour point product yield as well as differences in quantity delivery time payment and other contract terms to the extent known. Allowance will also be made to take account of the market area into which the Crude Oil is sold should it be different from the area used for Platts. The selected crude oils will be agreed between Contractor and the Minister in advance for each Calendar Year and in making the selection preference will be given to crude oils of similar quality to Crude Oil from the relevant Field. The arithmetic average aforesaid will be determined by the percentage volume of total sales of Crude Oil by Contractor that are and that are not as the case may be Third Party Sales during the Calendar Month in question. In the case of Natural Gas, the Contractor and the Minister shall agree on a methodology for valuation of Natural Gas under this Article 13.1bii which represents the fair market value of the calorific value of alternative fuels in the end user market of the buyers such as Natural Gas FOB Guyana taking into account composition of the Natural Gas. This methodology will be reviewed annually and modified if necessary. iii all such prices will be adjusted to FOB Delivery Point. iv for the purposes of this Article Third Party Sales of Crude Oil or Natural Gas made by the Contractor shall include any Third Party Sales made by the Contractor or an Affiliated Company of Contractor on the Minister's behalf pursuant to Article 14 but shall exclude aa Petroleum Agreement Government of Guyana Ratio sales whether direct or indirect through brokers or otherwise of any seller to any Affiliated Company of such seller unless at demonstrably arm's length price for example where an Affiliated Company of Contractor buys and then resells to a third party at an arm's length price which is disclosed to the Minister; and b Crude Oil or Natural Gas exchanges barter deals or restricted aa distress transactions or any Crude Oil or Natural Gas transaction which is motivated in whole or in part by considerations other than the usual economic incentives for commercial arm's length crude oil or natural gas sales; and c Government

to government sales. Contractor shall be responsible for determining the relevant prices for sales of Crude oil or Natural Gas that are not Third Party Sales in accordance with this Article. The calculation basis of calculation and the price arrived at shall be supplied to the Minister and shall be subjected to agreement by the Minister before it is finally determined. Pending final determination the last established average Crude Oil or Natural Gas price shall be used. During the first Calendar Year of production from the Contract Area the Contractor and the Minister will meet in order to establish a provisional selection of the crude oils and an appropriate mechanism for the purposes of giving effect to Article 13.1 bii1 above. This selection will be reviewed annually and modified if necessary. In the event of any difference or dispute between the Contractor and the Minister concerning selection of the crude oils or natural gas the calculation or the basis of calculation of the prices and the prices arrived at or generally about the manner in which the prices are determined according to the provisions of this Article the matter or matters in issue shall finally be resolved by a sole expert appointed pursuant to Article 26.3. For the purposes of this Article. in determining the quality of a Crude Oil regard shall be given to all relevant characteristics including but not limited to gravity sulphur and metal pour point and product yield. In the case of Natural Gas quality of the Natural Gas shall be determined based on its composition.

Petroleum Agreement Government of Guyana

Article 14 Disposal of Production 14.1 14.2 14.3 Each of the Parties shall have the right to take in kind at the Delivery Point and separately dispose of its share of the total quantities of production available under this Agreement. The Contractor shall have the right to use as much production as may be needed in any Petroleum Operations within the Contract Area and also within the transportation and terminal system. In the event of third party usage of the transportation terminal systems the quantities so used or lost outside the Contract Area shall be proportionate to. aggregate use of that transportation and terminal system. All quantities so used or lost shall be excluded from any calculations of entitlement pursuant to Article 11. Unless the Government requests the Contractor to sell the Governments share of Profit Oil or Profit Gas as provided in Section 14.3 below the quantity of production to which the Government is entitled pursuant to Article

11 shall be measured and delivered to the Government at the Delivery Point and the Government shall be responsible for all costs and risks associated with the Government's Lifting Entitlement from and after the Delivery Point. Within twelve 12 months after the Minister's approval of a Development Plan or within a later period as may be agreed between the Parties but in any event no longer than three 3 months before the first scheduled lifting of Crude Oil the Contractor shall propose to the Minister off taking procedures to govern the method whereby the Parties will nominate and lift their respective shares of Crude Oil. The details of such procedures shall be discussed and agreed upon between Minister and Contractor. The major principles of such procedures shall include the following Lifting shall be carried out so as to avoid interference with Petroleum Operations. In the event that any Party shall find itself unable for any reason to lift such quantities of Crude Oil as are to be lifted in accordance with procedures it shall forthwith notify the other Party to that effect. Such procedures shall include such deterrents as the Parties may agree to prevent a Party from delaying the lifting of any quantities of Crude Oil not so lifted. to a later period. c In the absence of any agreement to the contrary between the Parties the Contractor and the Minister shall share in each type of grade of Crude Oil in proportion to their respective Lifting Entitlement. The Contractor shall if requested by the Minister use reasonable efforts to market abroad on competitive terms all or part of the Minister's Lifting Entitlement subject to payment by Minister of costs normally borne by a seller in such transactions and on other terms to be agreed including an agreed marketing fee in respect thereof. The Minister shall provide the Contractor with at least 39 Petroleum Agreement Government of Guyana 6 months notice before changing between receiving payments in kind as provided under Article 14.1 and seeking the Contractor to market the Minister's Lifting Entitlement under this Article. 14.4 Subject to the provisions of Article 17 hereof the Contractor shall have the right to export at the export point chosen for this purpose all Petroleum to which it is entitled under this Agreement free of any duty tax or other financial impost and to receive and retain abroad all proceeds from the sale of such Petroleum. 14.5 The Contractor agrees to abide by the laws regulations orders directives and notifications of Guyana which shall also apply to its Affiliated

Companies engaged in Petroleum Operations in Guyana. 40 Petroleum Agreement Government of Guyana

Article 15 Taxation and Royalty

15.1 Subject to Article 32 and except as provided in Article 15.2 15.8 and except as otherwise set forth in this Article 15.1 no tax other than tax on income and corporate tax which shall be paid for by the Minister in accordance with Section 15.4 below value added tax excise tax duty fee charge or other impost shall be levied at the date hereof or from time to time thereafter on the Contractor any of its shareholders members partners parties comprising the Contractor or Affiliated Companies in respect of income derived from Petroleum Operations or in respect of any property held transactions undertaken or activities performed for any purpose authorised or contemplated hereunder other than a subject to the provisions of Article 21 import duties at the rates specified from time to time in the Customs Act Cap. 8201; b taxes duties fees or other imposts for income derived from specific services performed by the Contractor for the public or commercial enterprises and which is unrelated to income derived from Petroleum Operations under this Agreement; c rent due to Government in respect of any land rights granted or assigned to the Contractor annual licence rental charges due under Article 10; subject to Article 15.7 local government rates or taxes being rates or taxes not calculated by reference to income under laws of general application and which are nondiscriminatory are commercially reasonable and do not result in a rate or tax to Contractor in excess of those generally applicable in Guyana; i stamp duties ii registration fees. 111 licence fees. and iv any other similar duty. fee or other impost of a minor nature. provided the above referenced categories are imposed under laws of general application.

15.2 Except as provided in this Article 15 Contractor Affiliated Companies Sub Contractors and individuals who are expatriates shall be subject to the income tax laws of Guyana including the Income Tax Act of Guyana Cap. 8101 and the Corporation Tax Act of Guyana Cap. 8103 and shall separately comply with the requirements of those laws in particular with respect to filing returns assessment of tax and keeping and showing of books and records. co 7A us The taxable income of the Operator and the Contractor arising in each year of assessment under this Agreement for purposes of the income tax laws of Guyana including the Income Tax Act and the

Corporation Tax Act referred to in Article 15.2 shall include the amounts of Contractors income tax and corporation tax 4] Petroleum Agreement Government of Guyana Ratio15.4 15.5 paid pursuant to Article 15.4. The Minister hereby agrees a that a sum equivalent to the tax assessed pursuant to Article 15.2 and 15.3 will be grossed up so that Operator and the Contractor will not be liable to pay any tax in excess of the tax paid on their behalf by the Minister hereunder and the grossed up amount will be paid by the Minister to the Commissioner General Guyana Revenue Authority on behalf of the Contractor and that the amount of such sum will be considered income of the Contractor; and b that the appropriate portion of the Governments share of Profit Oil delivered in accordance with the provisions of this Agreement shall be accepted by the Minister as payment in full by the Contractor of Contractors share of each of the following levies whatsoever the applicable rate of such levies may be which the Minister shall then pay and such levies shall be deemed paid on behalf of the Contractor under Article 15.4 a to the Commissioner General. Guyana Revenue Authority a the share of royalty payable by Contractor pursuant to Article 15.6; ii the Contractors and Operators share of the income taxes imposed by the laws of Guyana including but not limited to income tax imposed by the Income Tax Act and corporation tax imposed by the Corporation Tax Act and payable at the date hereof or from time to time thereafter and any other levy or charge on income or profits which may become payable from time to time under any laws acts. statutes regulations or orders by the Government and iii any other similar charge imposed and payable in respect of Petroleum Operations at the date hereof or from time to time hereafter except charges of the type specified in Article 15.1 ab. The Operator and the Contractor shall provide the Minister with the Operators and the Contractors income tax returns to be submitted by the Minister to the Commissioner General Guyana Revenue Authority so the Minister can pay income tax on behalf of the Operator and the Contractor as provided under Article 15.4 a. On such returns the Minister shall note that he is paying the income taxes on behalf of the Operator and the Contractor. so that the Commissioner General Guyana Revenue Authority can properly prepare the receipts required under this Article 15.5. Within one hundred and eighty 180 days following the end of each year of

assessment the Minister shall furnish to Operator and the Contractor proper tax certificates in the Operators and the Contractors name from the Commissioner General Guyana Revenue Authority evidencing the payment 42 Petroleum Agreement Government of Guyana Ratio of the Operators and the Contractors income tax under the Income Tax Act and corporation tax under the Corporation Tax Act. Such certificates shall state the amount of tax paid individually on behalf of Operator Contractor or parties comprising the Contractor and other particulars customary for such certificates.

15.6 The Governments share of Profit Oil specified in Article 11 includes royalty payable by the Contractor at the rate of one percent 1 of Crude Oil produced and sold and delivery to the Minister pursuant to Article 14 of his share of Profit Oil equivalent to royalty shall constitute payment of such royalty in kind. Within one hundred and eighty 180 days following the end of each year of assessment receipts evidencing payment of Contractors royalty shall be furnished by the Minister to the Contractor stating the amount and other particulars customary for such receipts.

15.7 Subject to the conditions of section 49 of the Act the Minister may remit in whole or in part or defer payment of any royalties payable by Contractor.

15.8 Nothing in this Agreement shall be construed to place an obligation on the Government to file a tax return declaring its share of production or profit share or to regard such profit share as income within the meaning of section 5 of the Income Tax Act Cap 8101 or section 4 of the Corporation Tax Act Cap 8103

Sees BES The Minister hereby agrees that the Contractor and the Operator shall be exempted from the Property Tax Act pursuant to section 51 of the Act and any other act which amends or replaces in part or in whole the Property Tax Act. Minister agrees that for the duration of the Exploration Period and for any area within the Contract Area where exploration activity is in progress the provisions of section 10b of the Corporation Tax Act Cap 8103 including any successor provisions to section 10b of the Corporation Tax Act Cap 8103 Shall not apply to the Contractor with respect to any payments made to any Affiliated Companies or SubContractors. Notwithstanding any provision to the contrary in this Article. Affiliated Companies or NonResident SubContractors shall not be subject to the provisions of the Income Tax Act of Guyana Cap. 81.0 and the Corporation Tax Act of Guyana Cap 8103 during the Exploration Period on

income earned in Guyana for any given tax year if the Affiliated Company or NonResident Sub Contractor has conducted business in Guyana for not more than one hundred eighty three 183 days on a cumulative basis in the tax year of assessment. 15.11 There shall be no tax duty fee withholding charge or other. impost applicable on interest payments dividends deemed dividends transfer of profits or deemed remittance of profits from Contractors or parties comprising the Contractor Affiliated Companies or NonResident SubContractors branch in Guyana to its foreign or head office or to Affiliated companies 43 Petroleum Agreement Government of Guyana Ratio15.12 The Expatriate employees of the Operator the Contractor Affiliate companies and the Subcontractor shall be liable to pay personal income tax in Guyana on income earned in Guyana. Guyana represented herein by the Minister shall cause the proper authorities to issue appropriate tax certificates to expatriate employees when required. a If an expatriate employee is liable to pay income tax in Guyana on income earned in Guyana such expatriate employee shall pay such income tax at a rate equal to the current income tax rate of Guyana; Gi Notwithstanding any provision to the contrary in this Article expatriate employees of Operator Contractor Affiliated Companies or NonResident SubContractors shall not be subject to the provisions of the Income Tax Act of Guyana Cap. 81:01 and shall not be liable for personal income tax in Guyana on income earned in Guyana for any given tax year if the expatriate is physically present in Guyana for not more than one hundred eighty three 183 days on a cumulative basis in the tax year of assessment. 15.13 Notwithstanding any provision to the contrary in this Article assignments of any kind between Contractor and Affiliated Companies as well as any assignment of any kind made in accordance with this Agreement including one to an unrelated party shall be exempt from any duty or taxes including Capital Gains Tax payable in such respect and shall be subject to a fee payable to the GGMC upon approval of the assignment for the amount of one hundred thousand United States Dollars US\$100,000. 15.14 An Order shall promptly be made giving effect to the provisions of this Article in statutory form and language as specified in section 1 of the Act. 44 Petroleum Agreement Government of Guyana RatioArticle 16 Contracts and Assignments 16.1. The Contractor shall upon

request provide to the Minister copies of a contracts with respect to the sale or disposal of Petroleum including invoices issued thereunder; b any deed of assignment of an interest of the Contractor under this Agreement pursuant to Article 25; c any instrument by which the Contractor pledges mortgages. encumbers or hypothecates its interest or any of its rights under this Agreement or the Contract Area. 45 Petroleum Agreement Government of Guyana RatioArticle 17 Domestic Supply Obligation 17.1. Terms for Crude Oil. a If the Crude Oil requirements of the domestic market in Guyana the Crude Oil Domestic Demand exceed the Ministers total entitlement from all Crude Oil production in Guyana then the Contractor shall be obliged together with any third parties which produce Crude Oil in Guyana to supply and sell a volume of Crude Oil to be used for such Crude Oil requirements in Guyana calculated on the basis of the ratio which the Contractors Lifting Entitlement to Crude Oil bears to the sum of Contractors Lifting entitlement plus the total entitlement of all other producers in Guyana subject to Article 17.1c. The volume of Crude Oil which the Contractor shall be required to sell under this Article shall not exceed the Contractors share of Profit Oil. The Minister shall give the Contractor notice on or prior to April of the year preceding the Calendar Year in which the Government will have the said requirement and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. For the purpose of this Agreement Crude Oil Domestic Demand shall consist of those quantities of Crude Oil i used to produce refined products or petrochemicals in Guyana for end use by business and residential consumers in Guyana or 11 used to produce power in Guyana for end use by business and residential customers in Guyana the amounts for which shall be based upon independent verifiable government statistics. Crude Oil refined products petrochemicals or fuel for power generation that are exported from Guyana shall not be considered part of Crude Oil Domestic Demand. The Contractor shall in any Year have a right to supply out of Contractors Lifting Entitlement the proportion of the Crude Oil requirements of Guyana that the quantity produced from the Contract Area bears to the total production at the time in Guyana to the extent that such requirement is not satisfied from any contract entered into prior to the date of commencement of production from the Contract Area. For the purpose of this paragraph

the term the Crude Oil requirements of Guyana means the amount by which in any Year Crude Oil Domestic Demand exceeds the Ministers total entitlement to all Crude Oil produced in Guyana. The Contractor shall give the Minister notice on or prior to April 1 of the Calendar Year preceding the Calendar Year in respect of which Contractor wishes to exercise the aforesaid right and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. Notwithstanding the foregoing the Contractor shall have the right to supply the total amount calculated pursuant to the foregoing provisions.

46 Petroleum Agreement Government of Guyana Ratioc The price payable for the sale of Crude Oil pursuant to this Article shall be paid to Contractor in freely transferrable United States dollars or other currency as may be agreed at a place specified by the Contractor within thirty 30 days of receipt of the Contractors invoice by the Minister and shall be determined by agreement between the Minister and the Contractor or failing such agreement within thirty 30 days of the Ministers notice of Crude Oil Domestic Demand the price shall then be determined in accordance with Article 13. Should the Minister fail to pay within thirty 60 days of receipt of the Contractors invoice by the Minister the Contractors obligations in respect of the Domestic Supply Obligations of this Article 17 shall be suspended until payment is made good after which time deliveries shall be resumed subject to any alternative commitments that may have been reasonably entered into by Contractor to dispose of the Crude Oil during the period of default in payment. Contractor shall recover any amount due and unpaid by the Government plus interest at the Agreed Interest Rate from the Governments Lifting Entitlement of Crude Oil. d Any sale of Crude Oil as provided for in Article 17.1a c shall occur at the Delivery Point or such other point as the Minister and the Contractor may mutually agree. Ajl terms and conditions for the sale of Crude Oil pursuant to this Article shall be specified in a contract of sale entered into between the Minister and Contractor. s for Natural Gas. If the Natural Gas requirements of the domestic market in Guyana the Natural Gas Domestic Demand exceed the Ministers total entitlement from all Natural Gas production in Guyana then the Contractor shall be obliged together with any third parties which produce Natural Gas in Guyana to supply and sell a volume of Natural Gas to be used for such Natural Gas Domestic

Demand in Guyana. calculated on the basis of the ratio which the Contractors Lifting Entitlement to Natural Gas bears to the sum. of Contractors Lifting entitlement plus the total entitlement of all other producers in Guyana subject to Article 17.2c. The volume of Natural Gas which the Contractor shall be required to sell under this Article shall not exceed the Contractors share of Profit Gas. The Minister shall give the Contractor notice on or prior to April 1 of the year preceding the Calendar Year in which the Government will have the said requirement and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. For the purpose of this Agreement Natural Gas Domestic Demand shall consist of those quantities of Natural Gas used for domestic residential 47 Petroleum Agreement Government of Guyana Ratiocommercial and industrial consumption including fuel used for domestic power generation. Natural Gas liquefied or compressed in Guyana for export or used as feedstock for petrochemical exports such as methanol and fertilizer shall not be considered part of Natural Gas Domestic Demand. Any sales of Natural Gas to the domestic market shall be priced at the international value of alternative fuels in the end user market of the buyers plus freight to Georgetown. In the event of a failure to reach agreement on the price volume andor terms of sale either Party may submit the dispute for sole expert determination pursuant to Article 26.3. b The Contractor shall in any Year have a right to supply out of Contractors Lifting Entitlement the proportion of the Natural Gas requirements of Guyana that the quantity produced from the Contract Area bears to the total production at the time in Guyana to the extent that such requirement is not satisfied from any contract entered into prior to the date of commencement of production from the Contract Area. For the purpose of this paragraph the term the Natural Gas requirements of Guyana means the amount by which in any Year Domestic Demand exceeds the Ministers total entitlement to all Natural Gas produced in Guyana. The Contractor shall give the Minister notice on or prior to April 1 of the Calendar Year preceding the Calendar Year in respect of which Contractor wishes to exercise the aforesaid right and the term of the supply shall be on a Calendar Year basis unJless otherwise agreed. Notwithstanding the foregoing the Contractor shall have the right to supply the toial amount calculated pursuant to the foregoing provisions. The price

payable for the sale of Natural Gas pursuant to this Article shall be paid to Contractor in freely transferrable United States dollars or other currency as may be agreed at a place specified by the Contractor within thirty 30 days of receipt of the Contractors invoice by the Minister and shall be determined by agreement between the Minister and the Contractor pursuant to Article 17.2 a. Should the Minister fail to pay within thirty 30 days of receipt of the Contractors invoice by the Minister, the determined amount in accordance with Article 17.2a. Contractors obligations in respect of the Domestic Supply Obligations of this Article 17 shall be suspended until payment is made good after which time deliveries shall be resumed subject to any alternative commitments that may have been reasonably entered into by Contractor to dispose of the Natural Gas during the period of default in payment. Contractor shall recover any amount due and unpaid by the Government plus interest at the Agreed Interest Rate from the Governments Lifting Entitlement of Natural Gas. d Any sale of Natural Gas as provided for in Article 17.2a c shall occur 48 Petroleum Agreement Government of Guyana Ratio at the Delivery Point or such other point as the Minister and the Contractor may mutually agree. e All terms and conditions for the sale of Natural Gas pursuant to this Article shall be specified in a contract of sale entered into between the Minister and Contractor.

49 Petroleum Agreement Government of Guyana Ratio Article 18 Guyana Resources 18.1 In the conduct of Petroleum Operations pursuant to this Agreement the Contractor shall require that the Operator give preference to a the purchase of Guyanese goods and materials provided that such goods and materials are available on a timely basis of the quality and in the quantity required by Operator at competitive prices; and . b the employment of Guyanese SubContractors in so far as they are commercially and professionally competitive and satisfy the Operators financial and technical requirements and meet the requirements of Article 18.1 a. 18.2 The Contractor shall establish appropriate tender procedures when relevant for the acquisition of goods materials and services which shall ensure that Guyanese suppliers and SubContractors are given adequate opportunity to compete for the supply of goods and services. 18.3. Within ninety 90 days after the end of each Calendar Year the Contractor shall provide the Minister with a report outlining its

achievements in utilising Guyanese resources during that Calendar Year. Petroleum Agreement Government of Guyana Ratio

Article 19 Employment and Training

19.1 Subject to the requirements of any law relating to immigration Government shall provide the necessary work permits and other approvals required by the Contractor for employment of Expatriate Employees in Guyana for the purpose of Petroleum Operations.

19.2 Without prejudice to the right of the Contractor to select employees and determine the number thereof in the conduct of Petroleum Operations the Contractor shall require the Operator to employ and encourage SubContractors to employ Guyanese citizens having appropriate qualifications and experience whenever and wherever possible.

19.3 During each year of the term of the Petroleum Prospecting Licence or any renewal thereafter the Contractor shall pay to GGMC the amounts of Initial Period US\$60,000 First Renewal Period US\$60,000 Second Renewal Period US\$60,000 For one or more of the purposes mentioned in Article 19.3 ad. Payments under this Article 19.3 shall be paid directly into bank accounts held and controlled by the GGMC. Contractor shall verify such bank accounts and GGMC agrees to provide Guyanese personnel nominated by GGMC with on-the-job training in Contractor's operations in Guyana and overseas and/or practical training at institutions abroad. particularly in the areas of logistical interpretation economic analysis petroleum accounting and contract administration; en

NGPA b to send qualified Guyanese personnel selected by GGMC and approved by the Contractor on courses at universities colleges or other training institutions selected by GGMC and approved by Contractor; c to send Guyanese personnel selected by GGMC and approved by the Contractor. to conferences and seminars related to the petroleum industry d to purchase for GGMC advanced technical books professional publications scientific instruments or other equipment required by GGMC and approved by the Contractor. Petroleum Agreement Government of Guyana Ratio

Article 20 Rights to Assets and Insurance

20.1 Rights to Assets a The Contractor shall have the right to use free of charge assets previously installed by the Contractor in relinquished areas which are required for its operations in the remaining portion of the Contract Area provided that in the event of relicensing of the relinquished area such licence shall exclude the aforesaid assets. ob Subject to

Article 20.1 c upon expiry or termination of this Agreement in accordance with the provisions hereof. the Contractor shall upon notification by GGMC pursuant to Article 20.1 d 1 i deliver to the Minister free of charge in good order and condition fair wear and tear excepted all installations works pipelines pumps casings tubings engines and other equipment machinery or assets of a fixed or permanent nature constructed used or employed by the Contractor or the Operator in the Contract Area for which costs have been fully recovered in accordance with Annex C herein. Where costs have not been fully recovered the provisions of Article 20.1 biii shall apply deliver to the Minister free of charge any fixed assets relating to Petroleum Operations outside the Contract Area and movable assets owned by the Contractor or Operator and used or employed in connection with Petroleum Operations and located in Guyana for which costs have been fully recovered in accordance with Annex C herein; where costs have not been fully recovered the provisions of Article 20.1 biii shall apply; iii sell to the Minister and the Minister will purchase from the Contractor. any other assets owned by the Contractor or Operator and used or employed by the Contractor or Operator in the Contract Area or elsewhere in Guyana in connection with Petroleum Operations at a price equivalent to the depreciated unrecovered cost of the assets. c The above provisions of Article 20.1 b shall not apply to i assets which are still required by the Contractor or Operator for use in respect of an area in Guyana subject to another petroleum agreement at the time of expiry or termination of this Agreement 41 equipment and other assets rented or leased by Contractor in Guyana; 52 Petroleum Agreement Government of Guyana Ratioa ii Gy v vi equipment and other assets rented or leased by Contractor and imported in Guyana for use in Petroleum Operations and subsequently exported therefrom; equipment and any other assets owned or leased by a SubContractor; household goods and vehicles which are the personal property of employees of the Contractor and SubContractor; equipment and assets otherwise not owned by Contractor or Operator. d The Contractor shall notify the Minister of all assets acquired as provided in section 4 of Annex C to this Agreement. i Petroleum Agreement At least six 6 Calendar Months before expiry of the term of this Agreement. within three 3 Calendar Months following notice at termination of this Agreement or promptly

following cancellation of all Licences GGMC shall notify the Contractor of the assets to be delivered or sold to the Government. Subject to the terms and the provisions of this Article the Contractor shall not within one 1 year of the date upon which it estimates that termination of this Agreement will occur remove from the Contract Area or sell any assets of a fixed or permanent nature which might be deliverable to the Government under this Article without the consent of the Minister. such consent not to be unreasonably withheld or delayed. Abandonment Programme and Budget aa Within sixty 60 days after the expiration of the term of this Agreement or the sooner relinquishment of some or all of the Contract Area the Contractor shall carry out to the Ministers satisfaction an abandonment programme agreed with the Minister for all installations and pipelines provided by Contractor under this Agreement that the Minister elects not to have delivered up to him in accordance with Article 20.1b. With respect to the area being relinquished and facilities thereon such abandonment programme shall comply with and be limited to internationally accepted standards prevailing at the time of abandonment. bb Concurrent with the submission of a Development Plan as provided in Article 8.4 the Contractor shall submit for the 53 Government of Guyana Ratified ee ff Petroleum Agreement Government of Guyana Ratio Ministers approval a proposed abandonment programme and budget covering all such installations and pipelines provided by Contractor under this Agreement. The abandonment programme and budget may be revised from time to time with the agreement of the Minister to account . for any changes in the Development Plan. The Minister shall act without unreasonable delay in reaching a decision on the Contractors proposal under Article 20.1diiibb and may approve or modify or impose conditions thereon. Before modifying or imposing conditions on the proposal the Minister shall notify the Contractor of the proposed modification or conditions and give the Contractor the opportunity to make written representations within sixty 60 days thereafter about the proposed modifications or conditions. After taking into consideration such representations the Minister and the Contractor shall make their best efforts to mutually agree on the proposed modifications or conditions of the abandonment programme and budget. In the event that the Minister and Contractor cannot mutually

agree on the proposed abandonment programme and budget. either Party may by written notice to the other Party propose that the dispute be referred for determination in accordance with the provisions of Article 26. In the event that the Contractor does not present a timely proposal to the Minister under Article 20.1diiibb the Minister after giving thirty 60 days notice to the Contractor of his intention to do so may prepare an abandonment programme and budget for the Contract Area if the Contractor does not present a proposal by the end of the thirty 30 day period. When the Minister has so prepared the abandonment programme and budget it shall have the same effect as if it had been submitted by the Contractor and approved by the Minister. Contractor shall have the right on an annual basis to propose a revised abandonment programme and budget. Such proposal shall be subject to the approval process in Article 20.1d aii cc. Any revisions to the abandonment programme and budget shall result in a revision to the guarantee referred to in Article 20. 1d iiis hh All funds required to carry out the approved abandonment programme shall be made available by Contractor when the costs for abandonment are incurred. 54gg All costs included in the approved abandonment programme and budget shall be recoverable as operating costs on a unit of production basis commencing during the period when the abandonment programme and budget is approved. The amount to be recovered in a respective period shall be calculated by dividing the approved abandonment budget by the estimated ultimate recoverable reserves which may be revised from time to time based upon the actual performance of the Fields and multiplying the result by the units produced in the period. hh Contractor shall deliver to the Minister within seven 7 days after the date the abandonment programme and budget are approved an undertaking from Contractors immediate parent company stating that such parent company shall ensure provision of financial and technical resources necessary to conduct the approved abandonment programme. The amount of the financial undertaking shall be equal to the amount recovered under Article 20.1dGiigg less any amounts spent under the approved abandonment programme. i Notwithstanding the provisions of Article 20.1duff in the event the Minister elects to have all or a portion of the facilities delivered up to him in accordance with Article 20.1b the Contractor shall pay

the Minister at the time of transfer the amounts stipulated in the latest approved abandonment budget for the transferred facilities. Upon transfer and receipt of the funds the Minister shall assume all responsibilities for the transferred facilities and their abandonment and shall hold the Contractor harmless against any liability with respect thereto accruing after the date of such transfer to the Minister.

iv Subject to Article 20.1 c in the event that the Government acquires any assets pursuant to this Article the Government shall assume all] liabilities with respect to such assets, arising from and after the date of acquisition and shall not direct the Contractor to remove or abandon any such assets pursuant to regulation 1 n of the Regulations. The Government shall indemnify and hold Contractor harmless for any and all costs and claims which may arise from the use or abandonment of any asset from and after the date of acquisition by the Government.

v Assets not acquired by the Government pursuant to this Article may be sold or otherwise freely disposed of by the Contractor subject to Article 21.2 and the Regulations.

55 Petroleum Agreement Government of Guyana

Ratio 20.2 Insurance a b c The Contractor shall effect at all times during the term of this Agreement insurance as required by applicable laws rules and regulations and of such type and in such amount as is customary in the international petroleum industry in accordance with good oil field practice appropriate for Petroleum Operations in progress in respect of but not limited to

i loss or damage to all assets used in Petroleum Operations

ii pollution caused in the course of Petroleum Operations for which the Contractor or the Operator may be held responsible

iii loss or damage to property or bodily injury suffered by any third party in the course of Petroleum Operations for which the Contractor may be liable to provide an indemnity pursuant to Article 2.4;

iv the Contractor's and/or Operators liability to its employees engaged in Petroleum Operations. To the extent permitted by applicable laws, rules and regulations such insurance may be provided through Contractor's affiliate insurance company. Subject to the Minister's approval which shall not be unreasonably withheld the Contractor notwithstanding the provisions of Article 20.2a shall have the right to self-insure all or part of the aforementioned insurances in Article 20.2a. The Contractor shall require the Operator to carry and to endeavour to have its SubContractors carry insurance of such type and in such amount as

1S customary in the international petroleum industry in accordance with good oil field practices.

Petroleum Agreement Government of Guyana RatioArticle 21 Import Duties 21.1 21.3 The Contractor and the SubContractors engaged in Petroleum Operations shall be permitted to import free of duty VAT or all or any other duties taxes levies or imposts all equipment and supplies required for Petroleum Operations including but not limited to drill ships aircraft platforms vessels geophysical tools communications equipment explosives radioactive sources vehicles oilfield supplies lubricants consumable items other than foodstuffs or alcoholic beverages or fuel as well as all items listed on Annex D. The aforementioned items including but not limited to the items listed on Annex D shall be deemed approved and certified by the Chief Inspector to be for use solely in carrying out Petroleum Operations. The Contractor shall give prior notification to the Minister of SubContractors engaged in Petroleum Operations. a Subject to Article 21.1 and for as long as this Petroleum Agreement remains in force the Contractor and SubContractors engaged in Petroleum Operations hereunder shall be required to pay to the relevant authority the prevailing excise tax rate or ten percent 10 excise tax whichever is less on any fuel imports where such imports have been certified by the Chief Inspector to be used solely in carrying out Petroleum Operations in any area within the Contract Area. . ject to Article 20 any of the items imported into Guyana may if no longer required for Petroleum Operations hereunder. be freely exported at any time by the importing party. without the payment of any export duty or impos. provided. however that on the sale or transfer by the importer of any such item to any person in Guyana other than the Government import duty shall be payable by the importer on the value thereof at the date of such sale or transfer as determined by the Customs and Excise Department in accordance with their applicable rules. Each Expatriate Employee of the Contractor including any Affiliated Company and of SubContractors who have been assigned to work in Guyana for the Contractor or its SubContractors shall be permitted subject to the limitations and conditions set out in the Customs Act to import into Guyana free of import duty and taxes within six 6 months on first arrival household goods. clothing. for their personal consumption and vehicles all of which are the personal property of employees of the Contractor and

SubContractor provided however that no property so imported by the employee shall be sold by him in Guyana except in accordance with Government regulations and upon the payment of the prescribed customs duties. Any importation or replacement of motor vehicles by Expatriate Employees of the Contractor Including any Affiliated Company and of Sub Contractors shall be a matter for consultation with the Minister. the Principal Contractis made on the 21st day of April 1999 by and between the MALAYSIATHAILANDJOINT AUTHORITY hereinafter referred to as MTJA an authority dulyestablished under the MalaysiaThailand Joint Authority Act 1990 of Malaysia andThailandMalaysia Joint Authority Act B.E. 2533 1990 of the Kingdom ofThailand and the Agreement between the Government of Malaysia and theGovernment of the Kingdom of Thailand on the Constitution and Other MattersRelating to the Establishment of the MalaysiaThailand Joint Authority dated 30May 1990 and having its office at 27th Floor Empire Tower City Square Centre182 Jalan Tun Razak 50400 Kuala Lumpur Malaysia of the first part; andPETRONAS CARIGALI JDA SDN. BHD. a company duly incorporated and existingunder the laws of Malaysia and having its registered office at Tower 1 PETRONASTwin Towers Persiaran KLCC 50450 Kuala Lumpur Malaysia hereinafter referredto as CARIGALI TRITON OIL COMPANY OF THAILAND a company duly incorporatedand existing under the laws of the State of Texas United States of America andhaving its registered office at 6688 North Central Expressway Suite 1400Dallas Texas 75206 United States of America and having its local branchoffice at 7th Floor Kin Gwan Building 1 140 Wireless Road Bangkok 10330Thailand and Suite 13.01 13th Floor Menara Tan amp; Tan 207 Jalan Tun Razak50400 Kuala Lumpur Malaysia hereinafter referred to as TRITON and TRITONOIL COMPANY OF THAILAND JDA LIMITED a company incorporated under the laws ofthe Cayman Islands and having its statutory office in Dallas Texas UnitedStates of America and having its local registered branch office at Suite 13.0113th Floor Menara Tan amp; Tan 207 Jalan Tun Razak 50400 Kuala Lumpur Malaysiahereinafter referred to as TRITON JDA of the second part. The parties ofthe first and second part shall hereinafter be referred to individually asParty and collectively as Parties.WHEREAS Article 2.4 Paragraph 4 of the Principal Contract provides that any SubBlock which is not defined as a Development Area and any area which is not a GasField as defined in accordance with Article 8.1 at the end of five 5 yearsfrom the Effective Date hereinafter referred to as the Unexplored Areasshall be deemed to be relinquished to MTJA and cease to be part of the ContractArea;AND WHEREAS CARIGALI TRITON and TRITON JDA hereinafter referred to as

the Contractors request MTJAs permission to retain the Unexplored Areas for an additional three 3 years for further exploration after the end of the five 5 years from the Effective Date; AND WHEREAS MTJA agrees not to invoke the abovementioned Article 2.4 Paragraph 4 and further agrees to the request of the Contractors to retain the Unexplored Areas in consideration of additional work commitments to be undertaken by the same. NOW THEREFORE it is hereby stipulated and agreed as follows:

- i. The Contractors shall retain the Unexplored Areas for an additional three 3 years commencing on the fifth anniversary of the Effective Date hereinafter referred to as the Retention Period for further exploration subject to the following minimum work commitments and conditions:
The Contractors shall carry out subsurface studies to redefine and reevaluate the hydrocarbon prospectivity in the Unexplored Areas and drill two 2 Wildcat Wells at an aggregate drilled footage of not less than five thousand 5000 metres.
- ii. The amount to be expended by Contractors in carrying out their exploration activities in the Unexplored Areas during the Retention Period shall in the aggregate be not less than ten million four hundred sixty thousand United States Dollars USD 10,460,000 which aggregate amount includes the MTJA training bonus of seventy thousand United States Dollars USD 70,000 per year.
- iii. The Retention Period shall not affect the existing fixed term of thirty five 35 years of the Principal Contract set out in Article 2.1 thereof. Any new discovery of a Gas Field within the Unexplored Areas during the Retention Period will yield a shorter gas holding period commencing from the date of agreement between the Parties on the extent of the Gas Field and its reserve area as set out in Article 8.1 of the Principal Contract and ending 20 April 2004. The periods for development and production of the Gas Field shall remain the same.
- iv. When Crude Oil is discovered in a Commercial Quantity in any Subblock or Subblocks within the Unexplored Areas during the Retention Period that Subblock or Subblocks shall be automatically converted into a Development Area and the provisions of Article 2.4 Paragraph 1 of the Principal Contract shall apply. If Contractors fail to produce Crude Oil commercially directly or indirectly from such Subblock or Subblocks prior to 20 April 2004 such Subblock or Subblocks shall be deemed to be relinquished to MTJA and cease to be part of the Contract Area.

2. Except as expressly provided in this

Supplementary Contract No. 1 thePrincipal Contract is not otherwise waived amended and supplemented hereby andthe terms therein shall remain in full force and effect.3. Any terms that are defined terms in the Principal Contract shall have thesame meaning when used in this Supplementary Contract No. 1 unless hereinothetwice expressly provided.IN WITNESS WHEREOF MTJA CARIGALI TRITON and TRITON JDA have by theirrespective duly authorised officers executed this Supplementary Contract No. 1on the day and year first herein above written.Signed by For and on behalf of MALAYSIATHAILAND JOINT AUTHORITY In the presence of Signed by For and on behalf of PETRONAS CARIGALI JDA SDN. Mount Bruce Agreement [s. 2] [Heading amended No. 19 of 2010 s. 4.] THIS AGREEMENT under Seal made the 10th day of March One thousand nine hundred and seventytwo BETWEEN THE HONOURABLE JOHN TREZISE TONKIN M.L.A. Premier of the State of Western Australia acting for and on behalf of the said State and Instrumentalities thereof from time to time hereinafter called the State of the one part and MOUNT BRUCE MINING PTY. LIMITED a company incorporated under the Companies Act 1961 of the said State and having its registered office at 191 St. Georges Terrace Perth hereinafter called the Company which expression will include the successors and assigns of the Company of the other part. WHEREAS a The Company and Hamersley are satisfied from investigations which prior to 1971 cost over three million dollars 3000000 that the mining areas defined in clause 1 hereof contain iron ore of tonnages and grades sufficient to warrant economic recovery and marketing; b The Company agrees that investigations should be made with a view to the establishment of a plant for the production of metallised agglomerates or a plant for the production of steel with a view to its being in a position to submit to the State proposals for such establishment as are hereinafter provided. NOW THIS AGREEMENT WITNESSETH 1. In this Agreement subject to the context approve approval consent or direct means approve approval consent or direct in writing as the case may be; associated company means a any company notified in writing by the Company to the Minister which is incorporated in the United Kingdom the page 6 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement United States of America or the Commonwealth of Australia and which is i ii iii iv a subsidiary of the Company within the meaning of the term subsidiary in section 6 of the Companies Act 1961; promoted by the Company for all or any of the purposes of this Agreement and in which the Company holds not less than two million dollars 2000000 of the issued ordinary share capital; a company in which the Company or Hamersley holds not less than twenty per cent 20 of the issued ordinary share capital; or a company which is related within the meaning of that term in the aforesaid section to the Company or to any company in which the Company holds not less than twenty per cent 20 of the issued ordinary share

capital; and b any company approved in writing by the Minister for the purposes of this Agreement which is associated directly or indirectly with the Company in its business or operations hereunder; associated company of Hamersley means a company defined as an associated company within the meaning of the Agreement a copy of which is set out in the First Schedule to the Iron Ore Hamersley Range Agreement Act 1963 1968; or b any company approved in writing by the Minister as an associated company of Hamersley for the purposes of this Agreement; the commencement date means the 30th day of June 1972. Commonwealth means the Commonwealth of Australia and includes the Government for the time being thereof; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 7 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Companys wharf means any wharf constructed by or on behalf of the Company pursuant to this Agreement for the shipment of ore from the mineral lease any wharf established by Hamersley at Dampier in the said State or any temporary wharf for the time being approved by the Minister as the Companys wharf for the purposes hereof during the period to which such approval relates; Dampier includes East Intercourse Island; direct shipping ore means iron ore which has an average pure iron of not less than sixty per cent 60 which will not pass through a one half inch mesh screen and which is sold without concentration or other beneficiation other than crushing and screening; financial year means a year commencing on and including the 1st day of July; fine ore means iron ore which has an average pure iron of not less than sixty per cent 60 which will pass through a one half inch mesh screen and which is sold without concentration or other beneficiation other than crushing and screening; fines means iron ore not being direct shipping ore or fine ore which will pass through a one half inch mesh screen; f.o.b. revenue means the price for iron ore from the mineral lease the subject of any shipment or sale which is payable by the purchaser thereof to the Company or an associated company less all export duties and export taxes of all kinds whatsoever and less all costs and charges properly incurred and payable by the Company to the State or a third party from the time the ore shall be placed on ship at the Companys wharf to the time the same is delivered and accepted by the purchaser including 1 ocean freight; 2

marine insurance; 3 port and handling charges at the port of discharge; page 8 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 4 costs of delivering the ore from port of discharge to the smelter; 5 weighing sampling assaying inspection and representation costs incurred on discharge or delivery; 6 shipping agency charges; 7 8 import taxes by the country of the port of discharge; and such other costs and charges at the Minister may in his discretion consider reasonable in respect of any shipment or sale. For the purposes of this definition a The Minister may in respect of costs or charges as set out in items 1 to 7 inclusive of this definition notify the Company in writing that in respect of any shipment or sale he does not regard a cost or charge as having been properly incurred and in such case the Company may refer the matter to arbitration hereunder and unless and until such matter is resolved in favour of the Company such cost or charge shall not be deemed to have been properly incurred. b Notwithstanding anything contained in this definition to the contrary a cost or charge as set out in items 1 to 7 inclusive of this definition shall not unless the Minister so determines in accordance with the provisions of paragraph c of this definition be deemed to be properly incurred if such charge is directly or indirectly imposed upon or incurred by the Company or an associated company pursuant to an arrangement entered into between the Company and the State. c Costs or charges other than those set out in items 1 to 7 inclusive of this definition and costs and charges to which paragraph b of this definition applies shall be deemed to be properly incurred if the Minister in his discretion so determines and in making his determination the Minister shall have regard to such As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 9 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement matters as the parties to and the bona fide nature of the transaction resulting in the cost or charge. Hamersley means Hamersley Iron Pty. Limited a company incorporated under the Companies Act 1961 of the State of Victoria; integrated iron and steel industry means an industry for the manufacture of iron and steel or for the manufacture of steel from iron ore by a process which does not necessarily involve the production of pig iron or basic iron in

the production of steel; iron ore concentrates means products whether in pellet or other form resulting from secondary processing but does not include metallised agglomerates; Land Act means the Land Act 1933; mineral lease means the mineral lease referred to in subclause 2 of clause 4 hereof and includes any renewal thereof; Mining Act means the Mining Act 1904; mining areas means the areas delineated and coloured red on the plan marked A initialled by or on behalf of the parties hereto for the purpose of identification; Minister means the Minister in the Government of the said State for the time being responsible under whatsoever title for the administration of the Ratifying Act and pending the passing of that Act means the Minister for the time being designated in a notice from the State to the Company and includes the successors in office of the Minister; metallised agglomerates means products resulting from the reduction of iron ore or iron ore concentrates by any method whatsoever and having an iron of not less than eightyfive percent 85; month means calendar month; notice means notice in writing; ore means iron ore; page 10 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement person or persons includes bodies corporate; port means the port or harbour developed or to be developed pursuant to this Agreement and shall include such adjacent land area to serve the Companys wharf but shall not include the port established by Hamersley at Dampier nor such adjacent land as is leased by Hamersley to serve that port; port townsite means the townsite determined pursuant to this Agreement to be expanded and developed near the port; Ratifying Act means the Act to ratify this Agreement and referred to in clause 3 hereof; said State means the State of Western Australia; secondary processing means concentration or other beneficiation of iron ore other than by crushing or screening and includes thermal electrostatic magnetic and gravity processing and pelletisation and the production of metallised agglomerates; special lease means a special lease or licence to be granted in terms of this Agreement under the Ratifying Act the Land Act or the Jetties Act 1926 and includes any renewal thereof; this Agreement hereof and hereunder include this Agreement as from time to time added to varied or amended; steel means steel in the form of steel billets or

manufactured steel products; ton means a ton of two thousand two hundred and forty 2240 lbs. net dry weight; townsite means a townsite or townsites established by the Company on or near the mining areas pursuant to this Agreement; wharf includes any jetty structure; year 1 means the year next following the commencement date and year followed immediately by any other numeral has a corresponding meaning; reference in this Agreement to an Act shall include the amendments to such Act for the time being in force and also any Act passed in As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 11 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement substitution therefor or in lieu thereof and the regulations for the time being in force thereunder; power given under any clause of this Agreement other than clause 52 hereof to extend any period or date shall be without prejudice to the power of the Minister under the said Clause 52; marginal notes shall not affect the interpretation or construction hereof 4; Initial Obligations of State 4 2. The State shall a b introduce and sponsor a Bill in the Parliament of Western Australia to ratify this Agreement and endeavour to secure its passage; to the extent reasonably necessary for the purposes of this Agreement allow the Company to enter upon Crown lands including land the subject of a pastoral lease and survey possible sites for a port wharf railways townsites plants for the production or iron ore concentrates metallised agglomerates pig iron foundry iron and steel an integrated iron and steel industry and stockpiling processing and other areas required for the purposes of this Agreement. Ratification and Operation 4 1 Subclause 2 of clause 3 hereof and the subsequent clauses other 3. than clauses 52 54 and 55 of this Agreement shall not operate unless and until a the Bill to ratify this Agreement as referred to in paragraph a of clause 2 hereof is passed as an Act before the 30th day of June 1972 or such later date if any as the parties hereto may mutually agree upon; and b Bills to ratify each of the agreements referred to in the First Schedule hereto are passed as Acts before the 30th day of June 1972 or such later date if any as the parties hereto may mutually agree upon. page 12 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement If the said Bills are not

passed before that date or later date or dates as the case may be this Agreement will then cease and determine and neither of the parties hereto will have any claim against the other of them with respect to any matter or thing arising out of done performed or omitted to be done or performed under this Agreement save as provided in clause 22 of this Agreement. 2 The following provisions of this Agreement shall notwithstanding the provisions of any Act or law operate and take effect namely a b c d the provisions of clauses 4 and 7 the proviso to paragraph a of subclause 1 of clause 12 subclause 2 of clause 12 clauses 15 16 17 18 24 25 26 27 29 44 46 47 51 52 53 54 and 55; subject to paragraph a of this subclause the State and the Minister respectively shall have all the powers discretions and authorities necessary or requisite to enable them to carry out and perform the powers discretions authorities and obligations conferred or imposed upon their respectively hereunder; no future Act of the said State will operate to increase the Companys liabilities or obligations hereunder with respect to rents or royalties; and the State may as for a public work under the Public Works Act 1902 resume any land or any estate or interest in land required for the purpose of this Agreement and may lease or otherwise dispose of the same to the Company. Obligation of State Rights of Occupancy 4 4. 1 The State shall forthwith subject to the surrender of the rights of occupancy as referred to in subclause 2 of clause 2 of the Agreement firstly referred to in the First Schedule hereto cause to be granted to the Company and to the Company alone rights of occupancy for the purposes of this Agreement including the sole right to search and prospect for iron ore over the whole of the mining areas under Section 276 of the Mining Act at a rental at a rate of eight dollars 8 per square mile per annum payable quarterly in advance for the period expiring on the 31st day of December 1972 and shall then and thereafter subject to the continuance of this Agreement cause to be granted to the Company as may be necessary successive renewals of such last mentioned As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 13 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement rights of occupancy each renewal for a period of twelve 12 months at the same rental and on the same terms the last of which renewals shall notwithstanding its currency expire i ii on the date of grant of a

mineral lease to the Company under subclause 2 of this clause; or on the determination of this Agreement pursuant to its terms whichever shall first happen.

Mineral lease 4 2 The Company may at any time after the grant to it of the said rights of occupancy and before the end of year 2 apply for a mineral lease of any part or parts not exceeding in total area three hundred 300 square miles and in the shape of a rectangular parallelogram or rectangular parallelograms or as near thereto as is practicable of the mining areas and thereupon the State shall cause any necessary survey to be made of the land so applied for the cost of which survey to the State will be recouped or repaid to the State by the Company on demand after completion of the survey and shall cause to be granted to the Company a mineral lease of the land so applied for notwithstanding the survey in respect thereof has not been completed but subject to such corrections as may be necessary to accord with the survey when completed for iron ore in the form of the Second Schedule hereto for a term which subject to the payment of rents and royalties hereinafter mentioned and to the performance and observance by the Company of its obligations under the mineral lease and otherwise under this Agreement shall be for a period of twentyone 21 years therefor with rights to successive renewals of twentyone 21 years upon the same terms and conditions but subject to earlier determination upon the cessation or determination of this Agreement PROVIDED HOWEVER that the Company may from time to time without abatement of any rent then paid or payable in advance surrender to the State any portion or portions of reasonable size and shape of the mineral lease.

3 If by the end of year 2 the Company has not applied for a mineral lease as hereinbefore provided this Agreement shall cease and determine subject however to the provisions of subclause 13 of clause 5 and clause 22 hereof.

Proposals of the Company 4 1 The Companys obligations to submit proposals under 5. subclause 3 of this clause and its obligations under clause 6 paragraph n of subclause 1 of clause 12 and clause 13 hereof shall all be subject to the page 14 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement condition precedent that hereafter either of the following events occurs namely a b that at least fiftyone per cent 51 of the issued ordinary share capital of the

Company ceases to be held by any one or more of Hamersley an associated company of Hamersley or associated companies of Hamersley at a time when the Company is the holder of the rights of occupancy required to be granted under subclause 1 of clause 4 hereof or after a mineral lease has been granted under subclause 2 of the said clause 4 at a time when the Company is the holder of the said mineral lease; or the said rights of occupancy cease to be held by the Company or any one or more of Hamersley an associated company of Hamersley or associated companies of Hamersley otherwise than by reason of the expiry thereof or after the said mineral lease has been granted as aforesaid the said mineral lease ceases to be held by the Company or any one or more of Hamersley an associated company of Hamersley or associated companies of Hamersley. 2 If hereafter either of the events mentioned in subclause 1 of this clause occurs then a Insofar as has not already been done to the satisfaction of the Minister the Company will commence forthwith and carry out at its expense with the assistance of experienced consultants where appropriate i ii iii a reconnaissance of sites of proposed operations pursuant to the Agreement together with the preparation of suitable maps and drawings; an engineering investigation of the route for a railway from the mining areas to the port or to connect with Hamersleys existing railway as the case may be; a study of the technical and economic feasibility of the mining transporting handling and shipping of ore from the mining areas; iv the planning of a suitable townsite and the development of the port townsite in consultation with As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 15 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement the State and having due regard for use by others as well as the Company; v the investigation in areas approved by the Minister of suitable water supplies for mining industrial and townsite purposes; vi metallurgical and market research. b The Company shall collaborate with and keep the State fully informed with quarterly reports as to the progress and results of the Companys operations under paragraph a of this subclause. The Company shall furnish the Minister with copies of all reports received by it from consultants in connection with the matters referred to in paragraph a of this subclause and with copies of all findings made and reports

prepared by it. c If the State concurrently carries out its own investigations and reconnaissances in regard to all or any of the matters mentioned in paragraph a of this subclause or any port site the Company shall cooperate with the State therein and so far as reasonably practicable will consult with the representatives or officers of the State and make full disclosures and expressions of opinion regarding matters referred to in this subparagraph. d The Company will employ or retain or ensure that experienced consultant engineers approved by the Minister are employed or retained to investigate report upon and make recommendations in regard to the sites reasonably required by the Company under this Agreement for the overall development of a suitable port if necessary for the Companys operations hereunder including the Companys wharf areas for installations stockpiling and other purposes in the port but in such regard the Company will require such engineers to have full regard for the general development of the port with a view to the reasonable use by others of the port and the Company will furnish to the State copies of such report and recommendations. When submitting to the Minister detailed proposals as referred to in subclause 3 of this clause hereof in regard to the matters mentioned in this page 16 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement paragraph the Company will so far as reasonably practicable ensure that the detailed proposals i ii iii do not materially depart from the report and recommendation of such engineers; provide for the best overall development of the port so far as the same relates to the Companys activities; and disclose any conditions of user and where alternative proposals are submitted the Companys preferences in regard thereto. 3 If hereafter either of the events mentioned in subclause 1 of this clause occurs but subject to the provisions of subclause 10 of this clause the Company shall by the end of the period of three 3 years after the occurrence of that event or such extended date if any as the Minister may approve and subject to the provisions of this Agreement unless and to the extent otherwise agreed by the Minister submit to the Minister to the fullest extent reasonably practicable its detailed proposals including plans where practicable and specifications where reasonably required by the Minister with respect to the mining

by the Company of iron ore from the mining areas or so much thereof as shall be comprised within the mineral lease with a view to the transport and shipment of the iron ore mined including where applicable the location area layout design number materials and time programme for the commencement and completion of construction or the provision as the case may be of each of the following matters namely a i if the Company proposes initially to utilise for the shipment of iron ore the port established by Hamersley at Dampier aforesaid provisions for expansion of that port if necessary; or ii if the Company proposes initially to utilise for the shipment of iron ore some other port provision for the port and port development including dredging and depositing of spoil the provision of navigational aids the Companys wharf the plans and specifications for which wharf shall be submitted to and be subject to the approval of the State the berth and swinging basin for the Companys use and port installations facilities and services all of which shall permit of adaptation so as to enable the use of the Companys wharf by As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 17 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement vessels having an ore carrying capacity of not less than sixty thousand 60000 tons; b the railway from the mining areas to the port of to connect with Hamersleys existing railway as the case may be and its proposed operation including joint user conditions if any fencing if any crossing places and grade separation where appropriate or other forms of acceptable protection at intersections with public roads; c townsite and port townsite development and services and facilities in relation thereto; d housing; e water supply; f generation transmission and distribution of electricity; g roads; h mining crushing screening handling transport and storage of i j ore; air fields; any leases licences or other tenures of land required from the State; k disposal of waste materials; l drainage; m dust control; and n any other works services or facilities proposed or desired by the Company. 4 The Company shall have the right to submit to the Minister its detailed proposals aforesaid in regard to a matter or matters the subject of any of the subparagraphs numbered a to n inclusive of subclause 3 of this clause as and when the detailed proposals become finalised by the Company PROVIDED THAT where any such matter is the subject of any one of those provisions

which refer to more than one subject matter the detailed proposals will relate to and cover each of the matters mentioned in that provision. page 18 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 5 If the Company proposes initially to utilise for the shipment of iron ore some port other than the said port established by Hamersley it shall notwithstanding subclause 4 of this clause submit as its first proposals proposals for the site for that port and the Minister will within two 2 months after receipt of the proposals give to the Company notice of his approval thereof or otherwise. If the Minister does not approve the proposals then he shall within three 3 months after the giving of his notice submit alternative proposals for another site for the port. If the said site proposed by the Minister is not within two 2 months accepted by the Company by notice to the State the State shall as hereinafter provided permit the development and use inter alia for the purpose of this Agreement of a port at Legendre and the Company may within three 3 months after the expiration of the period of two 2 months last mentioned submit to the Minister proposals for the development an use of a port at Legendre as aforesaid including proposals as to the matters mentioned in subparagraph ii of paragraph a of subclause 3 of this clause and including proposals if required by the Minister or desired by the Company as to user of a port at Legendre in conjunction with others including terms and conditions involving the participation in such development and use by another party or other parties nominated in the proposals. Within two 2 months after receipt of the proposals the Minister shall give to the Company notice of his approval or otherwise in respect thereof and shall be at liberty to specify in such notice such alterations to the proposals as are fair and reasonable having regard to the interests of the Company and any other party nominated as aforesaid including alterations which are fair and reasonable as aforesaid and which involve the participation in such development and use by another party or other parties nominated by the Minister. If the Minister specifies any such alterations then the Company may subject to the provisions of subclause 6 of this clause elect by notice to the State to refer to arbitration and then two 2 months thereafter shall refer to arbitration as

provided in clause 53 hereof any dispute as to whether the alterations specified by the Minister are fair and reasonable as aforesaid. If the Company refers to arbitration any such dispute but by the award on arbitration the question is decided in favour of the Minister the Company may if it considers and it can demonstrate to the reasonable satisfaction of the Minister who shall not act unreasonably that the alterations to the proposals found by the award to have been fair and reasonable nevertheless would render the Company's participation in the development and use of a port at Legendre not feasible from the point of view of the Company for any reason whatsoever whether technical economic or otherwise by notice to the State given within two 2 months after the award withdraw its said proposals and in that event the parties shall continue to negotiate with a view to agreeing upon a site for the port either at Legendre or elsewhere and the terms As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 19 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement and conditions fair and reasonable for the development and use of the port. If the parties have not reached agreement within three 3 months then either party can terminate the negotiations. If by the award on arbitration the dispute is decided in favour of the Company the Minister shall be deemed to have approved the Company's proposal without the alteration or alterations in question. Notwithstanding the foregoing the Company may at any time prior to the time i ii iii agreement is reached as aforesaid as to a site for the port other than at Legendre; proposals submitted as aforesaid in relation to a port at Legendre are approved without alteration or are deemed to have been so approved; or two 2 months after the Minister specifies alterations to proposals submitted as aforesaid in relation to Legendre if the Company fails to refer to arbitration as aforesaid any dispute in relation thereto or the Company having referred such a dispute to arbitration after the award on arbitration as the case may be whichever is the earliest elect by notice to the State to utilise for the shipment of iron ore the port established by Hamersley at Dampier aforesaid and thereupon but without prejudice to the provisions of subclause 9 of this clause subclauses 3 and 7 of this clause shall be read and construed as if the Company had initially proposed so to utilise the said port established by Hamersley and the Company shall submit to the

Minister its detailed proposals as required pursuant to subclause 3 of this clause. 6 Notwithstanding anything contained in this Agreement the Ministers determination in respect of the Companys proposals relating to the location of the port and the proposals relating to the development of the port insofar as such development proposals concern the development of the port for use by or in conjunction with others and the location of the port townsite shall be final and no such determination shall be referred to arbitration by the Company. Consideration of Companys Proposals 4 7 Within two 2 months after receipt of any of the detailed proposals required to be submitted by the Company pursuant to subclause 3 of this clause other than a proposal of the kind mentioned in subclause 5 of this page 20 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement clause the Minister shall give to the Company notice either of his approval of the proposals submitted or of alterations desired thereto and in the latter case shall afford to the Company opportunity to consult with and to submit new proposals to the Minister. Within two 2 months of the receipt of the notice the Company may elect by notice to the State to refer to arbitration and within two 2 months thereafter shall refer to arbitration as provided in clause 53 hereof any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the dispute is deed against the Company then unless the Company within three 3 months after delivery of the award satisfies and obtains the approval of the Minister as to the matter or matters the subject of the arbitration this Agreement shall on the expiration of that period of three 3 months cease and determine save as provided in subclause 13 of clause 5 and clause 22 hereof but if the question is deed in favour of the Company the decision will take effect as a notice by the Minister that he is so satisfied with and approves the matter or matters the subject of the arbitration. Extension of time 4 8 The arbitrator arbitrators or umpire as the case may be of any submission to arbitration hereunder is hereby empowered upon application by either party hereto to grant any interim extension of time or date referred to herein which having regard to the circumstances may reasonably be required in order to preserve the rights of either or both the parties hereunder and an award in favour of the Company may in the name of

the Minister grant any further extension of time for that purpose. 9 Notwithstanding that under the preceding provisions of this clause any detailed proposals submitted by the Company pursuant to subclause 3 of this clause are approved by the Minister or determined by arbitration award unless each and every such proposal is so approved or determined by the end of a period of three 3 years and five 5 months after the occurrence of either of the events mentioned in subclause 1 of this clause or by such extended date if any as shall be granted pursuant to the provisions hereof then at any time after the end of the said period or last such extended date as the case may be the Minister may give to the Company twelve 12 months notice of intention to determine this Agreement and unless before the expiration of the said twelve 12 months period all such proposals are so approved or determined this Agreement shall cease and determine subject however to the provisions of subclause 13 of clause 5 and clause 22 hereof. 10 If the Company desires to mine transport and ship iron ore from the mining areas prior to the occurrence of either of the events mentioned in As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 21 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement subclause 1 of this clause the Company shall submit to the Minister detailed proposals as aforesaid as to all of the matters mentioned in subclause 3 of this clause and its time schedule for the implementation thereof and the provisions of subclause 5 and subclause 7 of this clause shall mutatis mutandis apply to the approval or determination of those proposals provided that if agreement is not reached as to any matter submitted as mentioned in the said subclause 5 and subclause 7 and the Company is not entitled to or fails to refer to arbitration any dispute in relation thereto or does so refer the dispute but by the award on arbitration the question is deed in favour of the Minister and if within two 2 months after the decision of the Minister or the award on arbitration the Company notifies the Minister that it does not accept the decision or award then the proposals shall be deemed not to have been approved or determined and this Agreement shall continue as if the Company had never submitted any proposals under this subclause without prejudice to the Companys right to submit further proposals under this subclause. To the extent to which the company submits proposals under this

subclause and those proposals are approved or determined as aforesaid the Company shall be relieved from the obligations it might hereafter have under the said subclause 3 to submit proposals to the Minister and to the extent to which the Company complies with those proposals it shall be relieved from the obligation it might thereafter have under clause 6 hereof. 11 The Company may at any time after it has submitted proposals either in compliance with its obligations under subclause 3 of this clause or pursuant to subclause 10 of this clause which have been approved or determined under this clause and under which the Company proposes initially to utilise for the shipment of iron ore the port established by Hamersley at Dampier aforesaid submit to the Minister detailed proposals as aforesaid for the utilisation for the shipment of iron ore of some other port including proposals as to the matters mentioned in subparagraph ii of paragraph a of the said subclause 3 the provisions of subclause 5 of this clause other than the last sentence thereof and the provisions of subclause 7 of this clause in both cases as modified by the proviso to the first sentence of subclause 10 of this clause shall mutatis mutandis apply to the approval or determination of those proposals. 12 The Company shall except to the extent agreed with the Minister comply with proposals submitted under subclause 10 or subclause 11 of this clause and approved or determined aforesaid. 13 Notwithstanding the preceding provisions of this clause if under any arbitration under subclause 7 of this clause the dispute is decided against page 22 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement the Company and subsequently this Agreement ceases and determines pursuant to the said subclause 7 or to subclause 9 of this clause the State will not for a period of three 3 years after such determination enter into a contract with any other party for the mining transport and shipment of iron ore from the mining areas on terms more favourable on the whole to the other party than those which would have applied to the Company hereunder if the question had been determined in favour of the Company. Subject to the provisions of subclause 10 of clause 5 hereof the 6. Company shall by the end of the period of two 2 years after the last of the proposals submitted under subclause 3 of clause 5 hereof is approved or determined as aforesaid

and in accordance therewith but subject to any variation approved pursuant to clause 47 hereof and at a cost of not less than fifty million dollars 50000000 construct install provide and do all things necessary to enable it to mine from the mineral lease and to transport by rail to the Companys wharf and to commence shipment therefrom in commercial quantities at an annual rate of not less than one million 1000000 tons of iron ore and without lessening the generality of this provision the Company shall be the end of the said period of two 2 years a b c construct install and provide upon the mineral lease or in the vicinity thereof mining plant and equipment crushing screening stockpiling and car loading plant and facilities a power house a workshop and other things of a design and capacity adequate to enable the Company to mine handle load and deal with not less than three thousand 3000 tons of iron ore per day; actually commence to mine and transport by rail iron ore from the mineral lease so that the average annual rate during the first two 2 years shall not be less than one million 1000000 tons; subject to the State having assured to the Company all necessary rights in or over Crown lands available for the purpose construct in a proper and workmanlike manner and in accordance with recognised standards of railways of a similar nature operating under similar conditions and along a route approved or determined under this clause but subject to the provisions of the Public Works Act 1902 to the extent that they are applicable the railway the subject of proposals determined or approved under this clause having a four feet As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 23 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement eight and onehalf inch 4ft. 8in. gauge and including inter alia any necessary deviations loops spurs sidings crossings points bridges signalling switches and other works and appurtenances and shall provide for crossing places grade separation where appropriate or other protective devices including flashing lights and boom gates at major road crossings or intersections with existing railways and operate such railway with sufficient and adequate locomotives freight cars and other railway stock and equipment to haul at least one million 1000000 tons of iron ore per annum; and d carry out such other works as are proposed to be carried out under the proposals as approved or determined under clause 5 hereof. Further Obligations of

State 4 7. 1 As soon as conveniently may be after any proposals have been approved or determined under this Agreement the State shall in accordance with such of those proposals as require the State to accept obligations a grant to the Company a lease or leases under the Mining Act or if mutually agreed a lease or leases under the Land Act notwithstanding any of the provisions of those Acts of such area of land for any railway proposed to be constructed under the proposals as the Company shall require at a peppercorn rental and for such term or period and on such terms and conditions including renewal rights as shall be reasonable having regard to the requirements of the Company hereunder and to the provisions of this Agreement the Mining Act being deemed to be so amended varied and modified as to enable such lease or leases to be granted; Lands 4 b grant to the Company for such terms or periods and on such terms and conditions including renewal rights as subject to the proposals shall be reasonable having regard to the requirements of the Company hereunder and to the overall development and access to and use by others of lands the page 24 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement subject of any grant to the Company and of services and facilities provided by the Company at peppercorn rental special leases of Crown lands for the purposes of the townsite or railway proposed to be constructed or provided under the proposals; and at rentals as prescribed by law or as are otherwise reasonable leases rights mining tenements reserves and licences in on or under Crown lands under the Mining Act the Jetties Act 1926 or under the provisions of the Land Act modified as in subclause 3 of this clause provided as the case may require as the Company reasonably requires for its works and operations hereunder including the construction or provision of railways wharves plants for the production of iron ore concentrates metallised agglomerates pig iron foundry iron and steel an intergrated iron and steel industry airstrips roads water supplies and stone and soil for construction purposes; and Services and Facilities 4 c provide any services or facilities subject to the Company bearing and paying the capital cost involved if reasonably attributable to or resulting from the Companys project and operations hereunder and reasonable charges for maintenance and

operation except operation charges in respect of education hospital and police services and except where and to the extent that the State otherwise agrees subject to such terms and conditions as may be approved or determined as aforesaid PROVIDED THAT from and after the twentieth anniversary of the date hereof the Company will in addition to the rentals already referred to in this paragraph pay to the State during the currency of this Agreement after such anniversary as aforesaid a rental which if the Company so requests shall be allocated in respect of such one or more of the special leases or other leases granted to the Company hereunder and remaining current equal to twentyfive 25 cents per ton on all iron ore and iron ore concentrates in respect of which royalty is payable under paragraph h of subclause 1 of clause 12 hereof in any financial year such additional rental to be paid within three 3 months after shipment sale or use as the case may be of the iron ore and iron ore concentrates SO NEVERTHELESS that the additional rental to be paid under this proviso shall be not less than three hundred thousand dollars As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 25 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 300000 in respect of any such year and the Company will within three 3 months after expiration of that year pay to the State as further rental the difference between three hundred thousand dollars 300000 and the additional rental actually paid in respect of that year but any amount so paid in respect of any financial year in excess of the rental payable for that year at the rate of twentyfive 25 cents per ton as aforesaid shall be offset by the Company against any amount payable by them to the State above the minimum amounts payable to the State under this paragraph in respect of the two 2 financial years immediately following the financial year in respect of which the said minimum sum was paid. Other Rights 4 2 The State shall on application by the Company cause to be granted to it such machinery and tailings leases including leases for the dumping of overburden and such other leases licences reserves and tenements under the Mining Act or under the provisions of the Land Act modified as in subclause 3 of this clause provided as the Company may reasonably require and request for its purposes under this Agreement on or near the mineral lease. 3 For the purposes of paragraph b of subclause 1 and

subclause 2 of this clause section 81D of the Transfer of Land Act 1893 shall not apply and the Land Act shall be deemed to be modified by a the substitution for subsection 2 of section 45A of the following subsection 2 Upon the Governor signifying approval pursuant to subsection 1 of this section in respect of any such land the same may subject to this section be leased; b the deletion of the proviso to section 116; c the deletion of section 135; d the deletion of section 143; e the inclusion of a power to offer for leasing land within or in the vicinity of any townsite notwithstanding that the townsite has not been constituted a townsite under section 10; and f the inclusion of a power to grant leases or licences for terms or periods and on such terms and conditions including

page 26 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement renewal rights and in forms consistent with the provisions of this Agreement in lieu of for the terms or periods and upon the terms and conditions and in the forms referred to in the Act and upon application by the Company in forms consistent as aforesaid in lieu of the forms referred to in the Act. 4 The provisions of subclause 3 of this clause shall not operate so as to prejudice the right of the State to determine any lease licence or other right or title in accordance with the other provisions of this Agreement. 5 The State further covenants with the Company that the State Noninterference with Companys rights

4 a shall not during the currency of this Agreement register any claim or grant any lease or other mining tenement under the Mining Act or otherwise by which any person other than the Company or an associated company will obtain under the laws relating to mining or otherwise any rights to mine or take the natural substances other than petroleum as defined in the Petroleum Act 1967 within the mineral lease unless the Minister reasonably determines that it is not likely to unduly prejudice or to interfere with the operations of the company hereunder assuming the taking by the Company of all reasonable steps to avoid the interference; No resumption 4 b subject to the provisions of subclause 2 of clause 18 hereof and subject to the performance by the Company of its obligations under this Agreement shall not during the currency hereof without the consent of the Company resume nor suffer nor permit to be resumed by any State instrumentality or by any local or other authority of the

said State any of the works installations plant equipment or other property for the time being belonging to the Company and the subject of or used for the purposes of this Agreement nor any of the lands the subject of any lease or licence granted to the Company in terms of this Agreement AND without such consent which shall not be unreasonably withheld the State will not create or grant or permit or suffer to be created or As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 27 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement granted by any instrumentality or authority of the State as aforesaid any road rightofway or easement of any nature or kind whatsoever over or in respect of any such lands which may unduly prejudice or interfere with the Companys operations hereunder; Labour requirements 4 c shall if so requested by the Company and so far as its powers and administrative arrangements permit use reasonable endeavours to assist the Company to obtain adequate and suitable labour for the construction and the carrying out of the works and operations referred to in this Agreement including suitable immigrants for that purpose; No discriminatory rates 4 d except as provided in this Agreement shall not impose nor permit nor authorise any of its agencies or instrumentalities or any local or other authority of the State to impose discriminatory taxes rates or charges of any nature whatsoever on or in respect of the titles property or other assets products materials or services used or produced by or through the operations of the Company in the conduct of the Companys business hereunder nor will the State take or permit to be taken by any such State authority any other discriminatory action which would deprive the Company of full enjoyment of the rights granted and intended to be granted under this Agreement; Rights to other minerals 4 e shall where and to the extent reasonably practicable on application by the Company from time to time grant or assist in obtaining the grant to the Company of prospecting rights and mining leases with respect to limestone dolomite and other minerals reasonably required by the Company for its purposes under this Agreement; and Consents to improvements on leases 4 f shall as and when required by the Company but without prejudice to the foregoing provisions of this Agreement page 28 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount

Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement relating to the approval or determination of proposals submitted hereunder consent in writing where and to the extent that the Minister considers to be reasonably justified to the Company making improvements for the purpose of this Agreement on the land comprised in any lease granted by the State to the Company pursuant to this Agreement PROVIDED THAT the Company shall also obtain any other consents legally required in relation to such improvements. 6 The Company shall not have any tenant rights in improvements made by the Company on the land comprised in any lease granted by the State to the Company pursuant to this Agreement in any case where pursuant to clause 23 hereof such improvements will remain or become the absolute property of the State. Iron Ore Concentrates 4 1 The Company shall before the end of year 4 or within such 8. extended period not exceeding a further two 2 years as the Company satisfies the Minister that the Company reasonably requires and the Minister approves and such further or other extended period as may be determined by arbitration as hereinafter provided a b c submit to the Minister detailed proposals for the establishment within the said State of a plant for the production of iron ore concentrates; in accordance with those proposals as finally approved or determined as hereinafter in this clause provided complete the construction of that plant at a total cost of not less than forty million dollars 40000000; and actually commence to produce iron ore concentrates from that plant and export those iron ore concentrates over the Companys wharf at an average annual rate during the two 2 years next following the date on which the Company first exports such iron ore concentrates in commercial quantities of not less than one million 1000000 tons and the Company will by the end of year 9 or by the end of such extension of that period as is equal to the aggregate of any extension approved by the Minister pursuant to the preceding provisions of this subclause and any extension determined by arbitration as hereinbefore mentioned in this subclause increase As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 29 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement the productive capacity of such plant to a minimum to three million 3000000 tons or iron ore concentrates per annum. 2 The Minister shall

within two 2 months of the receipt of such proposals give to the Company notice either of his approval of the proposals which approval shall not be unreasonably withheld or of any objections raised or alterations desired thereto and in the latter case shall afford to the Company an opportunity to consult with and to submit new proposals to the Minister. If within two 2 months of receipt of such notice agreement is not reached as to the proposals the Company may within a further period of two 2 months elect by notice to the State to refer to arbitration as hereinafter provided any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the question is deed in favour of the Company the Minister shall be deemed to have then approved the proposals of the Company. 3 The arbitrator arbitrators or umpire as the case may be of any submission to arbitration hereunder is hereby empowered upon application by either party hereto to grant any interim extension of time or date referred to herein which having regard to the circumstances may reasonably be required in order to preserve the rights of either or both parties hereunder and an award in favour of the Company may in the name of the Minister grant any further extension of time for that purpose. 4 The Company may at any time notify the Minister that it desires to reduce or limit the capacity of the plant hereinbefore referred to in this clause to a capacity of five hundred thousand 500000 tons of iron ore concentrates per annum and upon the Company so notifying the Minister a subclause 1 of this clause shall be read construed and take effect as if the words and figures forty million 40000000 and one million 1000000 where firstly and secondly appearing therein were twentyfive million dollars 25000000 and five hundred thousand 500000 respectively and as if the words and figures and the Company will by the end of year 9 or by the end of such extension of that period as is equal to the aggregate of any extension approved by the Minister pursuant to the proceeding provisions of this subclause and any extension determined by arbitration as hereinbefore mentioned in this subclause increase the productive capacity of such plant to page 30 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement a minimum of three million 3000000 tons of iron ore concentrates per annum were deleted therefrom; and b any

proposals in relation to the said plant submitted and/or approved or determined pursuant to this clause prior to the Company so notifying the Minister shall be read construed and take effect as if they were correspondingly amended; and c clause 10 hereof shall come into operation. 5 Notwithstanding anything hereinbefore contained in this clause if the Company can demonstrate to the satisfaction of the Minister that it is able to construct the said plant for the production of iron ore concentrates in accordance with proposals submitted pursuant to this clause as approved or determined for a sum less than forty million dollars 40000000 or if the Company has notified the Minister pursuant to subclause 4 of this clause for a sum less than twentyfive million dollars 25000000 the Minister may in his discretion approve a lesser sum which shall then be substituted for the sum of forty million dollars 40000000 or the sum of twentyfive million dollars 25000000 as the case may be. 6 Notwithstanding anything to the contrary contained or implied in this Agreement if the capacity of Hamersleys existing pelletising plant is or from time to time hereafter increases beyond two million 2000000 tons per annum a each of the capacities mentioned in subclause 1 and subclause 4 of this clause shall from time to time be reduced by the amount of the excess above two million 2000000 tons to the intent inter alia that i if prior to the end of the period first mentioned in subclause 1 of this clause as extended as therein provided the capacity of Hamersleys said plant is or hereafter increases to at least two million five hundred thousand 2500000 tons per annum and whether before or after such increase the Company notifies the Minister pursuant to the said subclause 4 the Company shall not have any obligation whatsoever under this clause; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 31 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement ii iii if prior to the end of the period last mentioned in subclause 1 of this clause as extended as therein provided the capacity of Hamersleys said plant is or hereafter increases to at least three million 3000000 tons per annum but not to five million 5000000 tons per annum but the Company does not notify the Minister pursuant to the said subclause 4 the only obligation of the Company under this clause will be to complete within the said State and by the end of the said period extended as aforesaid the construction of a plant for

the production of iron ore concentrates having a productive capacity equal to the difference between the annual capacity of Hamersleys said plant as increased from time to time and five million 5000000 tons per annum; and if prior to the end of the period last mentioned in subclause 1 of this clause as extended as therein provided the capacity of Hamersleys said plant is or hereafter increases to at least five million 5000000 tons per annum then the Company will not have any obligation whatsoever under this clause notwithstanding that it does not notify the Minister pursuant to the said subclause 4; b each of the amounts of forty million dollars 40000000 and twentyfive million 25000000 previously mentioned in this clause shall be reduced by such amount as is mutually agreed or failing agreement as is determined by arbitration pursuant to clause 53 hereof; and this clause shall be read construed and take effect accordingly. Company may make use of certain plant and facilities established by Hamersley 4 Notwithstanding anything to the contrary contained or implied in this 9. Agreement any proposals submitted pursuant to clause 5 hereof may be proposals involving as may be agreed by the Company with Hamersley the use of all or any of the following namely the port established by Hamersley at Dampier in the said State the channel wharf berth swinging basin port page 32 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement installations airstrip townsite road facilities and services established or to be established by Hamersley at Dampier the whole or part of Hamersleys existing railway from Tom Price to Dampier including any extension thereof from Tom Price to Paraburdoo and any locomotives freight cars and other railway stock or equipment now or thereafter provided by Hamersley and subject to approval or determination of such proposals under clause 5 hereof the obligations of the Company under the said clause 5 shall be modified accordingly. Substitution of 1000000 tons metallised agglomerates capacity for 2500000 tons iron ore concentrates capacity 4 If the Company gives notice to the Minister as provided in subclause 4 10. of clause 8 hereof then 1 The Company will before the end of year 6 or such extended date if any as the Minister may approve submit to the Minister detailed proposals for the establishment within the said State of plant for the production of

metallised agglomerates containing provision that such plant will by the end of year 8 or by the end of such extension of that period approved by the Minister pursuant to the preceding provision of this subclause have the capacity to produce not less than one million 1000000 tons of metallised agglomerates annually. Such capacity shall be additional to the respective capacities in respect of which the Company may be obliged to submit proposals pursuant to clause 32 hereof. 2 The Minister shall within two 2 months of receipt of proposals pursuant to subclause 1 of this clause give to the company notice either of his approval of those proposals which approval shall not unreasonably be withheld or of any objections raised or alterations desired thereto and in the latter case shall afford the Company an opportunity to consult with and to submit new proposals to the Minister. If within two 2 months of receipt of such notice agreement is not reached as to the proposals the Company may within a further period of two 2 months elect by notice to the State to refer to arbitration as provided in clause 53 of this Agreement any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the question is deed in favour of the Company the Minister shall be deemed to have approved of the proposals of the Company. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 33 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 3 The Company will except to the extent otherwise agreed with the Minister and subject always to clause 33 hereof before the end of the time specified in subclause 1 of this clause complete the construction of plant in accordance with the Companys proposals as finally approved or determined under this clause. 4 The arbitrator arbitrators or umpire as the case may be of any submission to arbitration hereunder is hereby empowered upon application by either party hereto to grant any interim extension of time or date referred to herein which having regard to the circumstances may reasonably be required in order to preserve the rights of either or both the parties hereunder and an award in favour of the Company may in the name of the Minister grant any further extension of time for that purpose. Additional Proposals 4 11. 1 In the event that the Company desires a to expand its activities beyond those specified in the Companys proposals as approved pursuant to clause 5 hereof; or b to undertake

secondary processing; or c to undertake the production of steel the Company shall so notify the Minister who may consequent upon the outcome of the negotiations of the parties pursuant to subclause 2 of this clause require the Company to submit proposals in respect of all or any of the matters referred to in paragraphs a to n of subclause 3 of clause 5 hereof and in clauses 19 and 20 hereof and the Company shall to the extent of such requirement submit such proposals. The provisions of clauses 5 19 and 20 hereof shall so far as they are applicable apply to such proposals mutatis mutandis. 2 The extent to which the Company will be required to provide or contribute towards the capital costs of services and facilities and the maintenance thereof pursuant to clauses 19 and 20 hereof in consequence of such proposed expansion or undertaking shall be determined by the Minister following negotiations on such matters and in making his determination the Minister shall have regard inter alia to the current and anticipated composition of the town and the extent to which the ordinary responsibilities of the State page 34 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement with respect to the provision of the capital cost of such services and facilities are to be assumed by it in the light of the States then current capital resources. Obligations of Company 4 1 Throughout the continuance of this Agreement the Company 12. shall Operation of railway 4 a operate any railway constructed by it in a safe and proper manner and where and to the extent that it can do so without unduly prejudicing or interfering with its operations hereunder allow crossing places for roads stock and other railways and also transport the passengers and carry the freight of the State and of third parties on the railway subject to and in accordance with bylaws which shall include provision for reasonable charges from time to time to be made altered and repealed as provided in subclause 2 of this clause and subject thereto or if no such bylaws are made or in force then upon reasonable terms and at reasonable charges having regard to the cost of the railway to the Company PROVIDED THAT in relation to its use of the railway the Company shall not be deemed to be a common carrier at common law or otherwise; Compliance with Laws 4 b in the construction operation maintenance and use of any work

installation plant machinery equipment service or facility provided or controlled by the Company comply with and observe the provisions hereof and subject thereto the laws for the time being in force in the said State; Maintenance 4 c at all times keep and maintain in good repair and working order and condition and where necessary replace all such works installations plant machinery and equipment and any railway the Companys wharf roads other than the public roads referred to in clause 15 hereof and water and power supplies for the time being the subject of this Agreement; Shipment of and price for ore 4 As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 35 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement d subject to the provisions of this Agreement ship from the companys wharf all ore mined from the mineral lease and sold and use its best endeavours to obtain therefor the best price possible having regard to market conditions from time to time prevailing and will not sell any direct shipping ore as fine ore or fines PROVIDED THAT this paragraph shall not apply to ore used for the production of iron ore concentrates or in a plant for the production of metallised agglomerates or steel in any part of the said State lying north of the twentysixth parallel of latitude; Access through mining areas 4 e allow the State and third parties to have access with or without stock vehicles and rolling stock over the mineral lease by separate route road or railway PROVIDED THAT such access over shall not unduly prejudice or interfere with the Companys operations hereunder. Protection for inhabitants 4 f subject to and in accordance with bylaws which shall include provision for reasonable charges from time to time to be made and altered as provided in subclause 2 of this clause and subject thereto or if no such bylaws are made or in force then upon reasonable terms and at reasonable charges having regard to the cost thereof to the Company allow the inhabitants for the time being of the townsite being employees licencees or agents of the Company or persons engaged in providing a legitimate and normal service to or for the company or its employees licencees or agents to make use of the water power recreational health and other services or facilities provided or controlled by the Company; Use of local labour and materials 4 g so far as reasonably and economically practicable use labour available within the said State and give

preference to bona fide Western Australian manufacturers and contractors in the placement of orders for works materials plant equipment and supplies where price quality delivery and service are equal to or better than that obtainable elsewhere. In calling tenders and/or letting contracts for works material plant equipment page 36 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement and supplies required by the Company the Company will so call tender quotations or by other methods of procurement make provision that bona fide Western Australian manufacturers and contractors are given reasonable opportunity to tender quote or otherwise be properly considered for such works materials plant equipment and supplies; Royalties 4 h pay to the State royalty on all iron ore from the mineral lease shipped or sold other than iron ore shipped solely for testing purposes or in the circumstances mentioned in subparagraph iv of this paragraph on iron ore concentrates produced from iron ore from the mineral lease or on other iron ore from the mineral lease used as mentioned in subparagraph iv of this paragraph as follows i ii on direct shipping ore and on fine ore and fines where such fine ore or fines are not sold or shipped separately as such not being locally used ore at the rate of seven and one half per centum 7 of the f.o.b. revenue computed at the rate of exchange prevailing on date of receipt by the Company of the purchase price in respect of ore shipped or sold hereunder PROVIDED NEVERTHELESS that such royalty shall not be less than sixty 60 cents per ton subject to subparagraph vi of this paragraph in respect of ore the subject of any shipment or sale; on fine ore sold or shipped separately as such not being locally used ore at the rate of three and three quarter per centum 3 of the f.o.b. revenue computed as aforesaid PROVIDED NEVERTHELESS that such royalty shall not be less than thirty 30 cents per ton subject to subparagraph vii of this paragraph in respect of ore the subject of any shipment or sale; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 37 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement iii iv v vi vii on fines sold or shipped separately as such not being locally used ore at the rate of fifteen 15 cents per ton; on locally used ore not being iron ore used for producing iron ore concentrates and on iron ore

concentrates produced from locally used ore and shipped or sold or used in plant for the production of steel or in an integrated iron and steel industry or in plant for the production of metallised agglomerates other than iron ore concentrates shipped solely for testing purposes at the rate of fifteen 15 cents per ton; on all other iron ore not being locally used ore at the rate of seven and one half per centum 7 of the f.o.b. revenue computed as aforesaid without any minimum royalty; if the amount ascertained by multiplying the total tonnage of direct shipping ore shipped or sold and liable to royalty under subparagraph i of this paragraph in any financial year by sixty 60 cents is less than the total royalty which would be payable in respect of that ore but for the operation of the proviso to that subparagraph then that proviso shall not apply in respect of direct shipping ore shipped or sold in that year and at the expiration of that year any necessary adjustments shall be made accordingly; if the amount ascertained by multiplying the total tonnage of fine ore shipped or sold separately as such and liable to royalty under subparagraph ii of this paragraph in any financial year by thirty 30 cents is less than the total royalty which would be payable in respect of that ore but for the operation of the proviso to that subparagraph then that proviso shall not apply in respect of fine ore shipped or sold separately as such in that year and at the expiration of that year any necessary adjustments shall be made accordingly; page 38 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement viii ix the royalty at the rate of fifteen 15 cents per ton referred to in subparagraphs iii and iv of this paragraph shall be adjusted up or down as the case may be as at the first day of January 1969 and as at the beginning of every fifth year thereafter in accordance with any variation in the average of the basic prices of foundry pig iron c.i.f. Australian capital city ports as announced by The Broken Hill Proprietary Company Limited or any subsidiary thereof from time to time during the calendar year immediately preceding the date at which the adjustment is required to be made as compared with such average for the calendar year 1963; for the purpose of this paragraph locally used ore means iron ore used by the Company or an associated company both within the Commonwealth and within the limits referred to in paragraph m of this clause for secondary

processing or in an integrated iron and steel industry or in plant for the production of steel and includes iron ore used by any other person or company north of the twentysixth parallel of latitude in the said State for secondary processing or in an integrated iron and steel industry or in plant for the production of steel; and x where iron ore concentrates are produced from an admixture of iron ore from the mineral lease and other iron ore a portion and a portion only of the iron ore concentrates so produced being equal to the proportion which the amount of iron in the iron ore from the mineral lease used in the production of those iron ore concentrates bears to the total amount of iron in the iron ore so used shall be deemed to be produced from iron ore from the mineral lease; Payment of Royalties 4 i within fourteen 14 days after the quarter days the last days of March June September and December in each year furnish to the Minister a return showing the quantity of all iron ore and iron ore concentrates the subject of royalty hereunder As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 39 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement and shipped sold or used as the case may be during the quarter immediately preceding the due date of the return and shall not later than two 2 months after such due date pay to the Minister the royalty payable in respect of iron ore and iron ore concentrates used and in respect of all iron ore and iron ore concentrates shipped or sold pay to the Minister on account of the royalty payable hereunder a sum calculated on the bases of invoices or provisional invoices as the case may be rendered by the Company to the purchaser which invoices the Company shall render without delay simultaneously furnishing copies thereof to the Minister of such iron ore and iron ore concentrates and shall from time to time in the next following appropriate return and payment make by the return and by cash all such necessary adjustments and give to the Minister full details thereof when the f.o.b. revenue realised in respect of the shipments shall have been ascertained; Rent for Mineral Lease 4 j by way of rent for the mineral lease pay to the State annually in advance a sum equal to thirtyfive 35 cents per acre of the area for the time being the subject of the mineral lease commencing on and accruing from the commencement of its term PROVIDED THAT after production is commenced in commercial quantities within the said State

from a plant constructed by the Company for secondary processing or for iron and steel manufacture or steel manufacture whichever is first constructed pursuant to this Agreement if and during the period that the total area for the time being comprised within the mineral lease i ii is not more than one hundred 100 square miles the annual rent shall be twenty 20 cents per acre; is over one hundred 100 square miles but not more than one hundred and fifty 150 square miles the annual rent shall be twentyfive 25 cents per acre; and page 40 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement iii is over one hundred and fifty 150 square miles but not more than two hundred 200 square miles the annual rent shall be thirty 30 cents per acre; Other rentals 4 k pay to the State the rental referred to in the proviso to subclause 1 of clause 7 hereof if and when such rental shall become payable; Inspection 4 l permit the Minister or his nominee to inspect at all reasonable times the books of account and records of the Company relative to any shipment sale or use of ore hereunder including sale contracts and to take copies or extracts therefrom and for the purposes of determining the f.o.b. revenue payable in respect of any shipment of ore hereunder the Company will take reasonable steps to satisfy the State either by certificate of a competent independent party acceptable to the State or otherwise to the Ministers reasonable satisfaction as to all relevant weights and analyses and will give due regard to any objection or representation made by the Minister or his nominee as to any particular weight or assay of ore which may affect the amount of royalty payable hereunder; and Export to places outside the Commonwealth 4 m ensure that unless with the prior written approval of the Minister to do otherwise all ore from the mineral lease shipped pursuant to this Agreement will be offloaded at a place outside the Commonwealth without such prior written approval the Company shall forthwith on becoming aware thereof give to the State notice of the fact and pay to the State in respect of the ore the subject of the shipment such further and additional rental calculated at a rate not exceeding one dollar 1 per ton of the ore as the Minister shall demand without prejudice however to any other rights and remedies of the State hereunder arising from the breach by the Company of the provisions

hereof. If ore is shipped in a vessel not owned by the Company or an associated company or any other company in which the Company has a

As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 41 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement controlling interest and such ore is offloaded in the Commonwealth the Company will not be or be deemed to be in default hereunder if it takes appropriate action to prevent a recurrence of such an offloading PROVIDED FURTHER that the foregoing provisions of this paragraph shall not apply in any case including any unforeseeable diversion of the vessel for necessary repairs or arising from force majeure or otherwise where the Company could not reasonably have been expected to take steps to prevent that particular offloading PROVIDED ALSO that the provisions of this paragraph shall not apply i ii iii to ore used in secondary processing or in an integrated iron and steel industry or in plant for the production of steel by the Company or an associated company within the said State; to ore so used by the Company or an associated company within the Commonwealth but outside the said State to the extent that the tonnage of ore so used does not in any year exceed fifty per centum 50 of the total quantity of ore used in secondary processing or in an integrated iron and steel industry or in plant for the production of steel by the Company or an associated company within the State; or to ore so used by the Company or an associated company within the Commonwealth but outside the said State in excess of fifty per centum 50 of the total quantity of ore used in secondary processing or in an integrated iron and steel industry or in plant for the production of steel by the Company or an associated company within the said State with the prior approval of the Minister as aforesaid. Port townsite air field 4 n pay to the State or local authority concerned a sum or sums to be agreed as a fair and reasonable proportion of the cost of expanding the capacity of any existing air field near the port townsite to cater for the additional air traffic resulting from the implementation of the Companys proposals hereunder. page 42 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Other works and facilities 4 o in accordance with the Companys approved proposals and as may be further required

pursuant to clause 11 hereof provide any other works services facilities building or equipment necessary for carrying out the Companys obligations hereunder. Bylaws 4 2 The Governor in Executive Council may upon recommendation by the Company make alter and repeal bylaws for the purpose of enabling the Company to fulfil the obligations under paragraph a of subclause 1 of this clause and under clause 14 hereof and unless and until the port townsite is declared a townsite pursuant to section 10 of the Land Act under paragraph f of subclause 1 of this clause and under clauses 17 and 18 hereof upon terms and subject to conditions including terms and conditions as to user charging and limitation of the liability of the Company as set out in such bylaws consistent with the provisions hereof. Should the State at any time consider that any bylaw made hereunder has as a result of altered circumstances become unreasonable or inapplicable then the Company shall recommend such alteration or repeal thereof as the State may reasonably require or in the event of there being any dispute as to the reasonableness of such requirement then as may be deed by arbitration hereunder. Port and Companys Wharf 4 13. 1 The Company shall develop the port construct the Companys wharf and carry out all necessary dredging of approach channels swinging basin and berth at the Companys wharf and provide all necessary buoys beacons markers navigational aids lighting equipment and services and facilities in accordance with the Companys relevant approved proposal hereunder. 2 Notwithstanding the provisions of subclause 1 of this clause the parties recognise that it may be advantageous for the State to provide all or any of the works thereunder mentioned and in such case the parties hereto shall together with other users and potential users of the port confer as to the manner in and the conditions upon which the State should provide such works to the mutual advantage of all. The Company shall pay to the State a sum or sums to be agreed not exceeding the amount that would have been payable had the As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 43 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Company carried out the said works towards the cost of the said works provided by the State. Use of Wharf and Facilities 4 1 The Company shall subject to and in accordance with bylaws 14. which shall include provision

for reasonable charges from time to time to be made and altered as provided in subclause 2 of clause 12 hereof and subject thereto or if no such bylaws are made or in force then upon reasonable terms and at reasonable charges having regard to the cost thereof to the Company allow the State and third parties to use the Companys wharf and port installations wharf machinery and equipment and wharf and port services and port facilities constructed or provided by it PROVIDED THAT such use shall not unduly prejudice or interfere with the Companys operations hereunder and that such use shall be subject to the prior approval of the Company. 2 Subject to the provisions of clause 24 hereof nothing in this Agreement shall be construed to limit the application of the Shipping and Pilotage Act 1967. Roads 4 15. 1 The Company shall subject to the State having assured to the Company all necessary rights in or over Crown lands or reserves available for the purpose at its own cost and expense and in accordance with its proposals as approved hereunder construct such new roads as the Company may reasonably require for the purposes of this Agreement such roads to be of such widths of such materials with such gates and warning devices crossings level or grade separated where warranted and passovers for cattle and for sheep and along such routes as the parties hereto shall agree after consideration of the requirements of the respective shire councils through whose districts any such roads may pass and after prior consultation with the Minister. Except to the extent that the Companys relevant proposal as finally approved or determined under clause 5 hereof otherwise provides the Company shall allow the public to use free of charge any roads constructed or upgraded under this subclause PROVIDED THAT such use shall not unduly prejudice or interfere with the Companys operations hereunder. 2 The Company shall have the right to use any public roads that may from time to time exist in the area of its operations under this Agreement both prior to the commencement date and also in the course of the Companys operations hereunder. If the exercise by the Company of such right results in or page 44 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement is likely to result in intensive use of any public road whereby excessive damage or deterioration is caused thereto or

whereby that road becomes inadequate for use by the Company and the public the Company will upon demand except where and to the extent that the Commissioner of Main Roads or the local or other authority agrees to bear the whole or part of such cost pay to the State or the local authority concerned or other authority having control of such road the cost of preventing or making good such damage or deterioration or of upgrading the road to a standard commensurate with the increased traffic. 3 If required by the Company the State shall at the Companys cost and expense except where and to the extent that the Commissioner of Main Roads agrees to bear the whole or any part of the cost widen upgrade or realign any public road existing from time to time which the Company desires to use for its operations hereunder over which the State has control subject to the prior approval of the Commissioner of Main Roads to the proposed work. Liability of Company 4 16. It is hereby agreed and declared that a for the purposes of determining whether and to the extent to which i ii the Company is liable to any person or body corporate other than the State; or an action is maintainable by any such person or body corporate in respect of the death or injury of any person or damage to any property arising out of the use of any of the roads for the maintenance of which the Company is responsible hereunder and for no other purpose the Company shall be deemed to be a municipality and the said roads shall be deemed to be streets under the care control and management of the Company; b for the purposes of this paragraph the terms municipality street and care control and management shall have the meanings which they respectively have in the Local Government Act 1960. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 45 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Water 4 1 The Company shall give to the State not less than two 2 years 17. notice of its estimated water consumption at the port and port townsite which amounts or such other amounts as shall be agreed between the parties hereto are hereinafter called the Companys coastal water requirements. 2 Upon receipt of such notice the State shall in collaboration with the Company and in accordance with a mutually agreed programme and budget at the expense of the Company search for suitable subterranean water sources in areas agreed to by the parties hereto. 3 In the event that

the search referred to in subclause 2 of this clause identifies and proves subterranean water sources which are mutually agreed to be adequate to supply the Companys coastal water requirements the State shall in accordance with a mutually agreed programme and budget construct or arrange to have constructed at the Companys expense all bores valves pipelines meters tanks equipment and appurtenances necessary to supply the Companys coastal water requirements. 4 If within six months of the commencement of the respective negotiations between the parties pursuant to subclause 2 and subclause 3 of this clause towards agreeing a programme and budget the parties have not reached agreement then the latest proposal of the State with respect to such programme and budget shall be deemed to be mutually agreed for the purposes of this clause PROVIDED such agreement shall not prejudice the Companys right to require the State to undertake supplementary water studies in the areas agreed pursuant to subclause 2 of this clause as the Company may require and at the Companys expense. 5 The State may in its discretion construct the water supply facilities or any related works or appurtenances mentioned in subclause 3 of this clause to achieve a capacity greater than that needed to meet the Companys coastal water requirements and in that event the Company shall pay to the State a sum or sums to be agreed between the parties hereto as being the Companys fair share of the cost of providing the said facilities works or appurtenances. 6 The State shall supply to the Company from sources developed by the State pursuant to subclauses 3 and 5 of this clause water up to an amount and at a rate not less than that set forth in the notice given pursuant to subclause 1 and of this clause PROVIDED HOWEVER that should such sources prove hydrologically inadequate to meet the Companys coastal water requirements the State may limit the amount of water which may be taken from page 46 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement such sources at any one time or from time to time to the maximum which such sources are hydrologically capable of meeting as aforesaid. 7 The Company shall give to the State not less than six 6 months notice in respect of its requirements of water both at the townsite and within the mineral lease to implement

its obligations hereunder which amounts or such other amounts as shall be agreed between the parties hereto are hereinafter called the Companys inland water requirements. 8 The Company shall in collaboration with the State search for and make investigations to establish the availability of suitable subterranean water sources within the mineral lease or at other locations approved by the State and will employ and retain experienced ground water consultants where appropriate and will furnish the Minister with copies of the consultants reports or alternatively if so requested by the Company the State shall carry out the said search and investigations at the Companys expense. 9 The Company shall provide and construct at its own expense to standards and in accordance with designs approved by the State in accordance with its relevant proposals all necessary bores valves pipelines meters tanks equipment and appurtenances necessary to draw transport use and dispose of water drawn from sources licensed to the Company. 10 The Company shall make application to the State for a licence to draw water up to an amount and at a rate not less than that set forth in the notice given pursuant to subclause 7 hereof from suitable subterranean water sources identified pursuant to the search and investigation referred to in subclause 8 of this clause and as are agreed to be adequate and the State shall grant to the Company such licence PROVIDED HOWEVER that should such sources prove hydrologically inadequate to meet the Companys inland water requirements the State may limit the amount of water which may be taken from such sources at any one time or from time to time to the maximum which such sources are hydrologically capable of meeting as aforesaid. 11 If during the currency of a licence granted under the provisions of this clause the Minister is of the opinion that it would be desirable for water conservation purposes or water management purposes that sources of water licensed to the Company be controlled and operated by the State as part of a regional water supply scheme the Minister may on giving six 6 months prior notice to the Company of his intention revoke the licence and take over the Companys water supply facilities in each case without payment of compensation. Immediately from the revocation of such licence the State shall

As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au

Agreement subject only to the continued hydrological availability of water from such sources commence and thereafter continue to supply water to an amount and at a rate required by the Company being the amount and rate to which the Company was entitled under such revoked licence and the proviso of subclause 10 of this clause shall in like manner apply to this subclause.

12 The State may in its discretion develop any district or regional water supply and for the purposes thereof construct any works of the kind mentioned in subclause 9 of this clause to a greater capacity than that required to supply the Companys inland water requirements but in that event the cost of the works as so enlarged shall be shared by the parties hereto in such manner as may be agreed to be fair in all the circumstances. 13 The Company shall design and construct its plant and facilities for the mining handling processing and transportation of ore so that as far as practicable non potable water may be used therein. 14 The Company shall pay to the State for water supplied by it pursuant to subclause 6 and subclause 11 of this clause a fair price to be negotiated between the parties hereto having regard to the actual cost of operating and maintaining the supply and provision for replacement of the water supply facilities. Notwithstanding the foregoing in respect of water supplied by the State to the Company as aforesaid for domestic purposes the Company shall pay to the State therefor charges as levied from time to time pursuant to the provisions of the Country Areas Water Supply Act 1947. 15 The State may grant to a third party rights to draw water from sources from which the Company draws water always provided however that a where the Company has paid in whole or in part any moneys in respect of the investigation proving development and utilization of such sources as provided pursuant to this clause the State shall require as a condition of such grant that where such third party is or will be a substantial user of water that party shall reimburse to the Company a proportion of such moneys as the Minister determines is fair and reasonable having regard inter alia to the proportion which that partys actual or potential requirements for water bears to the total capacity of such sources; and b where the Company draws water from a source developed wholly at its expense pursuant to this clause the State shall ensure that it is a condition of such grant to third parties that

page 48 Version 02a005 Published on

www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement in the event that the capacity of the source is reduced such reduction shall be first applied to such third parties and thereafter if further reduction is necessary the States and the Companys requirements shall be reduced in such proportion as may be agreed. 16 Without prejudice to the provision of subclause 10 of this clause the Company shall collaborate with the State in an investigation of surface water catchments and storage dams should water supplies from available underground sources prove insufficient to meet the Companys coastal water requirements and the Companys inland water requirements and the Company shall if it proposes to utilise such water catchments and/or storage dams pay to the State a sum or sums to be agreed towards the cost of such investigation and towards the cost of constructing any water storage dam or dams and reticulation facilities required PROVIDED THAT the State may in its sole discretion elect to construct a water storage dam or dams and reticulation facilities having a capacity in excess of that required to supply the Companys needs and in that event the Companys contribution shall be limited to a fair and reasonable proportion of the total cost of constructing such water storage dam or dams and reticulation facilities. 17 Any reference in this clause to a licence is a reference to a licence under the Rights in Water and Irrigation Act 1914 and the provisions of that Act relating to water rights and licences shall except where inconsistent with the provisions of this Agreement apply to any water sources developed for the Companys purposes under this Agreement. Electricity 4 1 The Company shall in accordance with its proposals as approved 18. construct without cost or expense to the State facilities for the generation and transmission of electricity needed to enable the Company to carry out its obligations hereunder and design and construct its electrical generation plant equipment and transmission system so as to facilitate the ultimate connection of such plant equipment and transmission system with facilities owned by the State Electricity Commission or other third parties. 2 The State may at any time give to the Company twelve months notice of its intention to acquire and may thereafter acquire the Companys electrical generation plant equipment and transmission system or any of them up to the first point of voltage

breakdown or such other appropriate point as may be agreed at a price to be agreed between the parties and the Company will take all As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 49 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement such steps as may be necessary to give effect to the acquisition. The State undertakes that in such event the Company shall have first priority for its purposes hereunder on the power generated by such plant and equipment or capable of being transmitted along such systems and the State guarantees subject only to its inability to supply power for any of the reasons set forth in clause 51 hereof to supply the Company with power for all its purposes hereunder up to the normal continuous full load capacity of such plant and equipment and the State undertakes that in the event of such inability to supply power the State shall take all possible steps to restore such supply regardless of the time or day when such inability to supply power arises and may call upon the Company to provide employees for that purpose. 3 In the event of the State acquiring the Companys facilities or any of them as provided by subclause 2 of this clause the Company shall pay to the State Electricity Commission the cost of all electricity supplied to the Company by the Commission at a rate equal to the standard tariff applying from time to time to the Commissions system less the difference if any between the Commissions standard tariff in force at the time of the States acquisition of the facilities pursuant to subclause 2 of this clause and the Companys costs of operating those facilities including inter alia appropriate capital charges at the time of the said acquisition. The Commissions rate for electricity calculated as aforesaid shall apply to an amount of electricity equal to the continuous full load capacity of the facilities so acquired and the Company shall pay for all electricity supplied to it by the Commission in excess of such amount at the Commissions standard tariff applicable from time to time. Townsite 4 19. 1 The Company shall collaborate with the State in the planning location and development of the townsite and shall employ an experienced town planner to prepare a town plan for initial and longterm town development which town plan shall be submitted by the Company as part of proposals pursuant to clause 53c hereof. 2 The Company shall at its cost in accordance with the relevant approved proposal provide

and maintain at the townsite and make available i at such prices rentals or charges and upon such terms and conditions as are fair and reasonable under the circumstances housing accommodation services and works including sewerage reticulation and treatment works water supply works main drainage works and civic facilities; and page 50 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement ii without charge public roads and buildings and other works and equipment required for educational hospital medical police recreation fire or other services to the extent to which any of the foregoing are necessary to provide for the needs of persons and the dependants of such persons engaged in connection with the Companys operations hereunder whether or not employed by the Company. 3 The Company shall at its cost equip the buildings referred to in subclause 2 of this clause to a standard normally adopted by the State in similar types of buildings in comparable townsites. 4 The Company shall provide at its cost adequate housing accommodation for married and single staff directly connected with the educational hospital medical and police services referred to in subclause 2ii of this clause. 5 The extent of the obligations of the Company pursuant to subclauses 3 and 4 of this clause shall be determined by the proportion which the Companys contribution to the cost of the facilities and services set forth in subclause 2 of this clause bears to the total cost of such facilities and services. Existing Towns 4 20. The Company shall as the occasion may require enter into negotiations with the State with a view to achieving the assimilation into a suitable existing coastal town of such of the Companys work force at the port or any other workers employed by the Company including the dependants of such persons as shall reside at or near or shall frequent the port. Subject to the provisions of clause 11 hereof the Company shall pay to the State or the appropriate authority the capital cost of establishing and providing additional services and facilities and associated equipment including sewerage and water supply schemes main drains education police and hospital services to the extent to which those additional works and services are made necessary in that town as a result of the operations of the Company. The additional services works and associated equipment referred to in this clause shall

be provided by the State to a standard normally adopted by the State in providing new services works and associated equipment in similar cases in comparable towns. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 51 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Determination of Agreement 4 21. In any of the following events namely if the Company shall make default in the due performance or observance of any of the covenants or obligations to the State herein or in any lease sublease licence or other title or document granted or assigned under this Agreement on its part to be performed or observed and shall fail to remedy that default within reasonable time after notice specifying the default is given to it by the State or if the alleged default is contested by the Company and promptly submitted to arbitration within a reasonable time fixed by the arbitration award where the question is deed against the Company the arbitrator finding that there was a bona fide dispute and that the Company had not been dilatory in pursuing the arbitration if the Company shall abandon or repudiate its operations under this Agreement or if the Company shall go into liquidation other than a voluntary liquidation for the purpose of reconstruction then and in any of such events the State may by notice to the Company determine this Agreement and the rights of the Company hereunder and under any lease licence easement or right granted hereunder or pursuant hereto or if the Company shall surrender the entire mineral lease as permitted under subclause 2 of clause 4 hereof this Agreement and the rights of the Company hereunder and under any lease licence easement or right granted hereunder or pursuant hereto shall thereupon determine; PROVIDED HOWEVER that if the Company shall fail to remedy and default other than any default under any of clauses 8 10 32 33 34 and 35 hereof after such notice or within the time fixed by the arbitration award as aforesaid the State instead of determining this Agreement as aforesaid because of such default may itself remedy such default or cause the same to be remedied for which purpose the State by agents workmen or otherwise shall have full power to enter upon lands occupied by the Company and to make use of all plant machinery equipment and installations thereon and the costs and expenses incurred by the State in remedying or causing to be remedied such default shall be a

debt payable by the Company to the State on demand. Effect of determination of Agreement 4 22. On the cessation or determination of this Agreement i except as otherwise agreed by the Minister the rights of the Company to in or under this Agreement and the rights of the Company or of any assignee of the Company or any mortgagee to in or under the mineral lease and any other lease licence easement or right granted hereunder or pursuant hereto shall thereupon cease and determine but without prejudice to the liability of either of the page 52 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement ii iii parties hereto in respect of any antecedent breach or default under this Agreement or in respect of any indemnity given hereunder; the Company shall forthwith pay to the State all moneys which may then have become payable or accrued due; the Company shall forthwith furnish to the State complete factual statements of the investigations referred to in recital a hereof and of any work research surveys and reconnaissances carried out by the Company pursuant to the provisions of this Agreement if and insofar as such statements may not have been furnished provided that the Company shall not be obliged to supply technical information of a confidential nature with respect to processes that have been developed by the Company alone or with others or acquired from other sources and that is not generally available to the iron ore industry or financial and economic information of a confidential nature that if disclosed could unduly prejudice the contractual or commercial arrangements between the Company and third parties; iv save as aforesaid and as provided in subclause 13 of clause 5 hereof and in clause 23 hereof neither of the parties hereto shall have any claim against the other of them with respect to any matter or thing in or arising out of this Agreement. Effect on determination of lease 4 23. On the cessation or determination of any lease licence or easement granted hereunder by the State to the company or except as otherwise agreed by the Minister to an associated company or other assignee of the Company under clause 43 hereof of land for any wharf port installation railway or housing at any townsite near any such port constructed or established by the Company pursuant to this Agreement the improvements and things other than plant equipment and removable buildings

erected on the relevant land and provided for in connection therewith shall remain or become the absolute property of the State without compensation and freed and discharged from all mortgages and encumbrances and the Company will do and execute such documents and things including surrenders as the State may reasonably require to give effect to this provision. In the event of the Company immediately prior to such expiration or determination or subsequent thereto deing to remove locomotives rolling stock plant equipment and removable buildings owned by the Company or any of them from any land it shall not do so without first notifying the State in As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 53 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement writing of its decision and thereby granting to the State the right or option exercisable within three 3 months thereafter to purchase at valuation in situ the said plant equipment and removable buildings or any of them. Such valuation shall be mutually agreed or in default of agreement shall be made by such competent valuer as the parties may appoint or failing agreement as to such appointment then by two competent valuers one to be appointed by each party or by an umpire appointed by such valuers should they fail to agree.

No charge for the handling of cargoes 4 24. The State covenants that subject to the Company at its own expense providing all works buildings dredging and things of a capital nature reasonably required for its operations hereunder at or in the vicinity of the port no charge or levy shall be made by the State or by any State authority in relation to the loading of outward or the unloading of inward cargoes from the Companys wharf whether such cargoes shall be the property of the Company or of any other person or corporation but the State accepts no obligations to undertake such loading or unloading and may make the usual charges from time to time prevailing in respect of services rendered by the State or by any State agency or instrumentality or other local or other authority of the State and may charge vessels using the Companys wharf ordinary light conservancy and tonnage dues. Zoning 4 25. The State covenants that the mineral lease and the lands the subject of any lease licence or easement granted to the Company under this Agreement shall be and remain zoned for use or otherwise protected during the currency of this Agreement so that the operations of

the Company hereunder may be undertaken and carried out thereon without any interference or interruption by the State by any State agency or instrumentality or by any local or other authority of the State on the ground that such operations are contrary to any zoning bylaw regulation. Rentals and Evictions 4 26. The State covenants that any State legislation for the time being in force in the said State relating to the fixation of rentals shall not apply to any houses belonging to the Company in the port townsite and the townsite and that in relation to each such house the Company shall have the right to include as a condition of its letting thereof that the Company may take proceedings for eviction of the occupant if the latter shall fail to abide by and observe the terms page 54 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement and conditions of occupancy or if the occupant shall cease to be employed by the Company. Labour conditions 4 27. The State covenants that during the currency of this Agreement and subject to compliance with its obligations hereunder the Company shall not be required to comply with the labour conditions imposed by or under the Mining Act in regard to the mineral lease. Subcontracting 4 28. Without affecting the liabilities of the parties under this Agreement either party shall have the right from time to time to entrust to third parties the carrying out of any portions of the operations which it is authorised or obliged to carry out hereunder. Rating 4 29. The State shall ensure that notwithstanding the provisions of any Act or anything done or purported to be done under any Act the valuation of all lands whether of a freehold or leasehold nature the subject of this Agreement except as to any part upon which a permanent residence shall be erected or which is occupied in connection with that residence and except as to any part upon which there stands any improvements that are used in connection with a commercial undertaking not directly related to the mining treatment transportation shipment and processing of ore and products derived therefrom which excepted parts shall be subject to the provisions of the Local Government Act shall for rating purposes be deemed to be on the unimproved value thereof and no such lands shall be subject to any discriminatory rate PROVIDED THAT nothing in this clause shall prevent the Company making the election provided for

by Section 533B of the Local Government Act 1960. Environmental Protection 4 30. Nothing in this Agreement shall be construed to exempt the Company from compliance with any requirement in connection with the protection of the environment arising out of or incidental to the Company's operations hereunder that may be made pursuant to any Act from time to time in force by the State or by any State agency or instrumentality or any local or other authority or statutory body of the State. Company to elect whether to produce metallised agglomerates or steel 4 As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 55 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 31. Before the end of year 6 or such extended date if any as the Minister may approve the Company shall either a b give to the Minister notice that it proposes to comply with the provisions of clause 32 hereof; or give to the Minister notice that it proposes to comply with the provisions of clause 34 hereof. Metallised agglomerates 4 If pursuant to clause 31 hereof the Company gives to the Minister notice 32. that it proposes to comply with the provisions of this clause then 1 the company will a b c before the end of year 6 or such extended date if any as the Minister may approve submit to the Minister detailed proposals for the establishment within the said State of plant for the production of metallised agglomerates containing provision that such plant will by the end of year 8 or such extended date if any as the Minister may approve have the capacity to produce not less than one million 1000000 tons of metallised agglomerates annually; before the end of year 8 or such extended date if any as the Minister may approve submit to the Minister detailed proposals for the expansion of the productive capacity of such plant to not less than two million 2000000 tons of metallised agglomerates annually by the end of year 10 or such extended date if any as the Minister may approve; and before the end of year 10 or such extended date if any as the Minister may approve submit to the Minister detailed proposals for the further expansion of the productive capacity of such plant to not less than three million 3000000 tons of metallised agglomerates annually by the end of year 12 or such extended date if any as the Minister may approve. If Minister gives notice clauses 35 to 39 and 41 to operate 4 2 The Minister may at any time after receipt of the notice referred to in clause 31a hereof and

before the expiration of two 2 months after the page 56 Version 02a005 Published on
www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First
Schedule Iron Ore Mount Bruce Agreement receipt of any proposals submitted pursuant to
subclause 1 of this clause give to the Company notice that notwithstanding the Companys proposal
to comply with the provisions of this clause the State requires the provisions of clauses 35 36 37 39
and 41 hereof to apply and upon the giving of such notice a the provisions of subclauses 1 3 4 and 5
of this clause shall cease to operate and neither the Company nor the Minister shall have any
further or continuing obligation thereunder; and b the provisions of clauses 35 36 37 39 and 41
hereof shall come into operation. 3 If the Minister does not give to the Company notice pursuant to
subclause 2 of this clause then the Minister shall within two 2 months of the receipt of each of the
proposals referred to in subclause 1 of this clause give to the Company notice either of his approval
of those proposals which approval shall not unreasonably be withheld or of any objections raised or
alterations desired thereto and in the latter case shall afford the Company an opportunity to consult
with and to submit new proposals to the Minister. If within two 2 months of receipt of such notice
agreement is not reached as to the proposals the Company may within a further period of two 2
months elect by notice to the State to refer to arbitration as provided in clause 53 of this Agreement
any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the
question is deed in favour of the Company the Minister shall be deemed to have approved the
proposals of the Company. 4 The Company will except to the extent otherwise agreed with the
Minister and subject always to clause 33 hereof within the respective times specified in paragraphs
a b and c of subclause 1 of this clause complete the construction of plant in accordance with such
proposals as finally approved or determined under this clause. 5 The arbitrator arbitrators or umpire
as the case may be of any submission to arbitration hereunder is hereby empowered upon
application by either party hereto to grant any interim extension of time or date referred to herein
which having regard to the circumstances may reasonably be required in order to preserve the rights
of either or both parties hereunder and an award in favour of the Company may in the name of the

Minister grant any further extension of time for that purpose. If metallised agglomerates not feasible

4 As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 57 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 1 If the Company at any time considers that the construction of plant 33. for the production of metallised agglomerates as required to be proposed under clause 9 or clause 32 hereof or as required pursuant to any proposals finally approved or determined under those clauses hereinafter called the metallising operation is for any technical economic andor other reason not feasible then the Company may without prejudice to its rights if any under clause 51 of this Agreement submit to the Minister the reasons why it considers the metallising operation is not feasible together with supporting data and other information. 2 Within two 2 months after receipt of a submission from the Company under subclause 1 of this clause the Minister shall notify the Company whether or not he agrees with its submission. 3 If the Minister notifies the Company that he does not agree with its submission then at the request of the Company made within two 2 months after receipt by the Company of the notification from the Minister the Minister will appoint a tribunal hereinafter called the Tribunal of three persons one of whom shall be a Judge of the Supreme Court of Western Australia or failing him a Commissioner appointed pursuant to section 49 of the Supreme Court Act 1935 and the others of whom shall have appropriate technical or economic qualifications to dee whether or not the metallising operation is feasible and the Tribunal in reaching its decision shall take into account inter alia the Companys submission the amount of capital required for the metallising operation the availability of that capital at that time on reasonable terms and conditions the likelihood of the Company being able to sell metallised agglomerates at sufficient prices and in sufficient quantities and for a sufficient period to justify the metallising operation having regard to the amount and rate of return on total funds that would be involved in or in connection with the production and sale of metallised agglomerates by the Company and the comparable amount and rate of return on total funds employed in comparable metallurgical processes in Australia. 4 If the Minister notifies the Company that he agrees with its submission of if on reference to the Tribunal

the Tribunal dees that the metallising operation is not feasible then a the Company will not have any obligation or further obligation to submit proposals in respect of the metallising operation as provided in clause 10 or clause 32 hereof or to carry out such proposals in respect thereof as may have been finally approved or determined pursuant to those clauses; page 58 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement b the Minister and the Company will forthwith confer with a view to agreeing on the substitution for the Companys obligations in respect of the metallising operation the obligation to carry out some other feasible operation related directly to the mining and metallurgical industry representing an economic development within the said State approximately equivalent to the metallising operation. 5 If within two 2 months after the Minister notifies the Company that he agrees with its submission or as the case may be within two 2 months after the Tribunal has announced its decision that the metallising operation is not feasible the Minister and the Company have not reached agreement under subclause 4b of this clause then the Minister will instruct the Tribunal to dee whether any and if so what other feasible operation of the kind referred to in that subclause is capable of being and should be undertaken by the Company and the Tribunal in reaching its decision thereon shall have regard to any submissions made to it by the Minister and by the Company and also inter alia to the amount of capital required for such other operation the availability of that capital at that time on reasonable terms and conditions the likelihood of the Company being able to sell the product of such operation at sufficient prices and in sufficient quantities and for a sufficient period to justify the same having regard to the amount and rate of return on total capital that would be involved in or in connection with that other operation and the comparable amount and rate of return on total funds employed in comparable processes in Australia. 6 If the Minister and the Company reach agreement under subclause 4b of this clause or if on reference to the Tribunal under subclause 5 of this clause the Tribunal dees that some other feasible operation is capable of being and should be undertaken by the Company then this Agreement shall be altered to give effect to that agreement or as the case may be that decision and

the Company shall be obliged to comply with the obligations imposed on it as a result of such alteration. 7 If the Company makes a submission to the Minister under subclause 1 of this clause then the period from the time of making that submission to the time when the Minister notifies the Company that he does not agree with its submission or if the Company requests the Minister as provided in subclause 3 of this clause to the time if any when the Tribunal dees that the metallising operation is feasible shall be added to the respective times by which the Company is required to comply with any of its obligations under clause 10 or as the case may be under clause 32 hereof. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 59 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 8 The Company may invoke the foregoing provision of this clause at any time and from time to time in respect of all or any of its obligations arising under clause 10 or clause 32 hereof and the references to the metallising operation in those provisions shall as the case may require be read and construed as referring to the one or more of those obligations in respect of which those provisions are invoked by the Company. PROVIDED THAT the Company may not without the consent of the Minister invoke the foregoing provisions of this clause in respect of its obligations under clause 32 hereof until it has pursuant to that clause constructed plant having the capacity to produce not less than one million 1000000 tons of metallised agglomerates annually. If the Minister does not give such consent within one 1 month after application therefor by the Company the provisions of subclause 2 of clause 32 hereof shall operate as if the Minister had given notice to the Company pursuant to that subclause and the Minister shall be deemed to have given such notice accordingly and the Company shall be released from any obligations pursuant to this clause and clause 32 hereof accordingly. Production of steel if Company elects to produce steel 4 If pursuant to clause 31 hereof the Company gives to the Minister notice 34. that it proposes to comply with the provisions of this clause then 1 The Company will before the end of year 17 submit to the Minister detailed proposals for the establishment within the said State of plant for the production of steel containing provision that such plant will by the end of year 22 have the capacity to produce not less than five hundred thousand

500000 tons of steel annually and will by the end of year 27 have the capacity to produce not less than one million 1000000 tons of steel annually. 2 The Minister shall within two 2 months of receipt of such proposals give to the Company notice of his approval of those proposals which approval shall not unreasonably be withheld or of any objections raised or alterations desired thereto and in the latter case shall afford the Company an opportunity to consult with and to submit new proposals to the Minister. If within two 2 months of receipt of such notice agreement is not reached as to the proposals the Company may within a further period of two 2 months elect by notice to the State to refer to arbitration as provided in clause 53 of this Agreement any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the question is decided in favour of the Company the page 60 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Minister shall be deemed to have approved the proposals of the Company. 3 The Company will except to the extent otherwise agreed with the Minister before the end of the respective times specified in subclause 1 of this clause complete the construction of plant in accordance with the Companys proposals as finally approved or determined under this clause. 4 The arbitrator arbitrators or umpire as the case may be of any submission to arbitration hereunder is hereby empowered upon application by either party hereto to grant any interim extension of time or date referred to herein which having regard to the circumstances may reasonably be required in order to preserve the rights of either or both the parties hereunder and an award in favour of the Company may in the name of the Minister grant any further extension of time for that purpose. Production of steel if Minister requires Company to produce steel 4 1 The provisions of this clause and of clauses 36 37 38 39 and 41 35. hereof shall not operate unless and until the Minister has given notice or is deemed to have given notice to the Company pursuant to subclause 2 of clause 32 hereof. 2 The Company will in due course investigate the feasibility of establishing an integrated iron and steel industry within the said State and will from time to time review this matter with a view to its being in a position before the end of year 17 to submit to the Minister detailed proposals for such industry

capable ultimately of producing one million 1000000 tons of steel per annum containing provision that a b by the end of year 22 productive capacity will be at an annual rate of not less than and during year 23 production will be not less than five hundred thousand 500000 tons of pig iron foundry iron or steel hereinafter together referred to as product of which not less than two hundred and fifty thousand 250000 tons will be steel; production will progressively increase so that by the end of year 26 productive capacity will be at an annual rate of not less than and during year 27 production will be not less than one million 1000000 tons of product of which not less As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 61 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement than five hundred thousand 500000 tons will be steel and by the end of year 28 productive capacity will be at an annual rate of not less than and during year 29 production will be not less than one million 1000000 tons of steel; and c the capital cost involved will be not less than eighty million dollars 80000000 unless the Company utilises a less expensive but at least equally satisfactory method of manufacture than any at present known to either party. 3 If before the end of year 17 such proposals are submitted by the Company to the Minister the Minister shall within two 2 months of the receipt thereof give to the Company notice either of his approval of the proposals which approval shall not unreasonably be withheld or of any objections raised or alterations desired thereto and in the latter case shall afford to the Company an opportunity to consult with and to submit new proposals to the Minister. If within thirty 30 days of receipt of such notice agreement is not reached as to the proposals the Company may within a further period of thirty 30 days elect by notice to the State to refer to arbitration as hereinafter provided any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the question is deed in favour of the Company the Minister shall be deemed to have then approved the proposals of the Company. 4 If such proposals are not submitted by the Company to the Minister before the end of year 17 or if such proposals are so submitted but are not approved by the Minister within two 2 months after receipt thereof then subject to any extension of time granted under subclause 3 of clause 8 hereof if by the end of year 20 or extended date if any

the State gives to the Company notice that some other company or party hereinafter referred to as the Third Party has agreed to establish an integrated iron and steel industry within the said State using iron ore from the mineral lease on terms not more favourable on the whole to the Third Party than those proposed by or available to the Company hereunder then this Agreement will subject to the provisions of clauses 22 and 23 and clauses 38 and 41 hereof cease and determine at the end of year 27 or at the date by which the Third Party has substantially established that industry whichever is the later. 5 If by the end of year 20 or extended date if any the State has not given to the Company any such notice as is referred to in subclause 4 of this clause that subclause shall thereupon cease to have effect except that to the page 62 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement extent that they can from time to time operate the provisions of subclause 4 of this clause shall revive for a period of three 3 years at the end of year 30 and at the end of each successive period of thirteen 13 years thereafter in such a way that each year referred to in that subclause shall be read as the year 13 or as the case may require a multiple of thirteen 13 years thereafter subject to extensions of dates if any as aforesaid. 6 The Company may at any time after the end of year 17 submit proposals for an integrated iron and steel industry if at that time it has not received any notice under subclause 4 of this clause and the provisions of subclauses 2 and 3 of this clause shall apply to such proposals. 7 Except as provided in subclause 4 of this clause this Agreement will continue in operation subject to compliance by the Company with its obligations hereunder and with such proposals by the Company as are approved by the Minister. 8 Notwithstanding anything contained herein no failure by the Company to submit to the Minister proposals as aforesaid nor any nonapproval by the Minister of such proposals shall constitute a breach of this Agreement by the Company and the only consequences arising from such failure or nonapproval as the case may be will be those set out in subclause 4 of this clause. Substantial establishment 4 36. The Third Party shall have substantially established a plant for an integrated iron and steel industry when and not before that party's integrated iron and steel industry has the

capacity to produce one million 1000000 tons of steel per annum and the Minister has notified the Company that he is satisfied that that party will proceed bona fide to operate its plant or industry. Terms not more favourable 4 In doing whether for the purposes of clause 35 hereof the terms 37. granted by the State to some company or party are not more favourable on the whole than those proposed by or available to the Company regard shall be had inter alia to all the obligations that would have continued to devolve on the Company had it proceeded with iron and steel manufacture or steel manufacture including its obligations in regard to secondary processing and its obligations to establish or construct works and facilities for the mining transportation by rail and shipment of iron ore and restrictions relating thereto and its obligations to pay rent additional rental and royalty and also to the need for the other company As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 63 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement or party to pay on a fair and reasonable basis for or for the use of property accruing to the State under clause 23 hereof and made available by the State to that company or party but also to any additional or equivalent obligations to the State assumed by that company or party. Supply of iron ore by others 4 38. If at the date upon which this Agreement ceases and determines pursuant to clause 35 hereof the Company remains under any obligation for the supply of iron ore arising out of a contract or contracts entered into by the Company with the consent of the Minister the Company may give notice to the Minister that it desires the State to ensure that the Third Party is obligated to discharge such remaining obligations. Forthwith upon receipt of such notice the State will ensure that the Third Party is obligated to discharge such obligations in accordance with such contract or contracts on a basis that is fair and reasonable as between the Company and the Third Party or if desired to supply iron ore to the Company into ships on such fair and reasonable basis. Supply of iron ore to others 4 39. The Company covenants and agrees with the State that should the Company remain in possession of the mineral lease for any period during which the Third Party is operating or is ready to operate a plant for an integrated iron and steel industry and have available to it facilities for the purpose then during such period

whenever commencing the Company will supply the Third Party with iron ore from the mineral lease not exceeding in all five million 5000000 tons per annum unless otherwise agreed i at such rates and grade as may reasonably be available and be required; ii at such points on the Companys railway; iii at such price; and iv on such other terms and conditions as may mutually be agreed between the Company and the State or failing agreement deed by arbitration between them PROVIDED ALWAYS that the price shall unless otherwise agreed between them be equivalent to the total cost of production and transport incurred by the Company including reasonable allowance for depreciation and all overhead expenses plus ten per centum 10 of such total cost. page 64

Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement Acceleration of Companys steel obligations 4 If before the first day of January 1977 the State gives to the Company 40. notice that it is willing to supply the Company at all times from the commencement of the first day of January 1986 and thereafter during the continuance in operation of this Agreement with all the Companys requirements for electrical power anywhere within a radius of thirty 30 miles from the Post Office at Dampier and anywhere within a radius of thirty 30 miles from the northernmost point of Cape Lambert in the said State including all electrical power from time to time required by the Company for secondary processing for the production of iron andor steel and for all ancillary purposes including crushing screening and loading and the operation of any port or ports but not including electrical power from time to time required by the Company for any townsite or townsites established or to be established by the Company at a total cost to the Company of six tenths of a cent 0.6c per kilowatt hour and supplied by the State at points reasonably adjacent to the respective places at which it is from time to time required by the Company then the State and the Company will forthwith enter into an agreement for the supply of such electrical power accordingly and from and after the date when such agreement is entered into and so long as the State complies with all its obligations under the said agreement clauses 34 and 35 hereof shall be read construed and take effect as if each numeral appearing therein immediately after the word year were a numeral six 6

less than each such numeral. If by the end of the year first referred to in subclause 2 of clause 35 41. hereof or any later time to which that time has been extended by the Minister detailed proposals for an integrated iron and steel industry as referred to in subclause 2 of clause 35 hereof are not submitted by the Company to the Minister then the Minister may at any time before the expiration of two 2 months after the end of that year or as the case may be that later time give to the Company notice that the provisions of clauses 35 36 37 38 and 39 hereof are to cease to operate and upon the giving of such notice all those provisions will cease to operate and should any notice have by then been given by the Minister to the Company pursuant to subclause 4 of clause 35 hereof such last mentioned notice shall cease to have and shall be deemed not to have had any force or effect.

Indemnity 4 42. The Company will indemnify and keep indemnified the State and its servants agents and contractors in respect of all actions suits claims demands or As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 65 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement costs of third parties arising out of or in connection with any work carried out by the Company pursuant to this Agreement or relating to its operations hereunder or arising out of or in connection with the construction maintenance or use by the Company or its servants agents contractors or assignees of any wharf railway or other works or services the subject of this Agreement or the plant apparatus or equipment installed in connection therewith and will also indemnify and keep indemnified the State against all actions suits compensation claims demands or costs by third parties under the Ratifying Act the Public Works Act 1902 the Land Act or any other Act in respect of or as a consequence of the resumption or deprivation of the use of any land where such resumption or deprivation of the use of any land where such resumption or deprivation of use is made or done by the State for the purpose of granting to the Company a lease right mining tenement easement reserve or licence pursuant to subclause 2 of clause 4 and subclause 1 of clause 7 hereof. Assignment 4 1 43. time Subject to the provision of this clause the Company may at any a b assign mortgage charge sublet or dispose of to an associated company or associated companies as of right and to any other company or

companies or person or persons with the consent in writing of the Minister the whole or any part of the rights of the Company hereunder including its rights to or as the holder of any lease licence easement grant or other title and of the obligations of the Company hereunder; and appoint as of right an associated company or associated companies or with the consent of the Minister any other company or companies or person or persons to exercise all or any of the powers functions and authorities which are or may be conferred on the Company hereunder; subject however to the assignee or assignees or as the case may be the appointee or appointees executing in favour of the State a deed of covenant in a form to be approved by the Minister to comply with observe and perform the provisions hereof on the part of the Company to be complied with observed or performed in regard to the matter or matters so assigned or as the case may be the subject of the appointment.

2 Notwithstanding anything contained in or anything done under or pursuant to subclause 1 of this clause the Company shall at all times during page 66 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement the currency of this Agreement be and remain liable for the due and punctual performance and observance of all the covenants and agreements on its part contained herein and in any lease licence easement grant or other title the subject of an assignment under the said subclause 1.

44. Notwithstanding the provisions of section 82 of the Mining Act and of regulations 192 and 193 made thereunder and of section 81D of the Transfer of Land Act 1893 insofar as the same or any of them may apply a no mortgage or charge in a form commonly known as a floating charge made or given pursuant to clause 43 hereof over any lease licence reserve or tenement granted hereunder or pursuant hereto by the Company or any assignee or appointee who has executed and if for the time being bound by a deed of covenant made pursuant to clause 43 hereof; b no transfer or assignment made or given at any time in exercise of any power of sale contained in any such mortgage or charge; shall require any approval or consent other than such consent as may be necessary under clause 43 hereof and no such mortgage or charge shall be rendered ineffectual as an equitable charge by the absence of any approval or consent otherwise

that as required by clause 43 hereof or because the same is not registered under the provisions of the Mining Act. 45. The Company may arrange for any obligation undertaken by the Company hereunder including any obligation to erect a plant or plants for the production of or any obligation to produce iron ore concentrates metallised agglomerates pig iron foundry iron or steel and any obligation arising out of proposals being approved deemed to have been approved or determined under this Agreement to construct a railway and/or to provide locomotives freight cars and other railway stock and equipment therefor to be undertaken either wholly or partially by any associated company or associated companies or with the Ministers consent which consent shall not be unreasonably withheld by any other company or companies and fulfilment of any such obligation in whole or in part by such associated company or associated companies or by that other company or companies shall be deemed to be fulfilment wholly or partially as the case may be of that obligation by the Company hereunder. Where such associated company or associated companies or such other company or companies now has or at some future time has installed or provided a plant or plants for the production of iron ore concentrates metallised agglomerates pig As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 67 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement iron foundry iron or steel or a railway or other facilities any increase in the capacity of carried out under arrangements made by the Company with such associated company or associated companies or with the prior consent of the Minister as aforesaid with such other company or companies shall to the extent of the increase reduce or as the case may be extinguish any obligation of the Company to provide such capacity.

Variation 4 1 The parties hereto may from time to time by agreement in writing 46. add to substitute for cancel or vary all or any of the provisions of this Agreement or of any lease licence easement or right granted hereunder or pursuant hereto for the purpose of implementing or facilitating any of the objects of this Agreement. 2 Where in the opinion of the Minister an agreement made pursuant to subclause 1 of this clause would constitute a material or substantial alteration of the rights or obligations of either party hereto the Agreement shall contain a provision to that effect and the

Minister shall cause that agreement to be laid on the table of each House of Parliament within twelve sitting days of the date of its execution. 3 If either House does not pass a resolution disallowing the agreement within twelve sitting days of that House after the agreement has been laid before it the agreement shall have effect from and after the last day on which the agreement might have been disallowed. Variation of Proposals 4 47. The Minister may from time to time at the request of the Company approve variations in the detailed proposals relating to any railway or port site and/or port facilities or dredging programme or townsite or town planning or any other facilities or services or other plans specifications or proposals which may have been approved pursuant to this Agreement and in considering such variation shall have regard to any changes consequent upon joint user proposals of any such works facilities or services and other relevant factors arising after the date hereof. Where the variation referred to in this clause constitutes a material or substantial alteration to the rights and/or obligations of either party as set out in this Agreement the provisions of clause 46 shall apply. Joint user 4 page 68 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement 1 The Company shall be entitled at any time and from time to time 48. with the prior approval in writing of the Minister to enter into an agreement with any third party for the joint construction maintenance and user or for the joint user only of any work constructed or agreed to be constructed by the Company pursuant to the terms of this Agreement or by such other party pursuant to any agreement entered into by it with the State and in any such event any amount expended in or contributed to the cost of such construction by the Company shall for the purpose of the calculation of the sum agreed to be expended on that work by the Company under this Agreement and if so approved by the Minister be taken and accepted as an amount equal to the total amount expended whether by the Company or the said third party or by them jointly in the construction of such work. 2 When any agreement entered into by the Company with some other company or person results in that other company or person discharging all or any of the obligations undertaken by the Company under this Agreement or renders it unnecessary for the Company to

discharge any obligation undertaken by it hereunder the Minister will discharge or temporarily relieve the Company from such part of its obligations as is reasonable having regard to the extent of any period for which the other company or person actually effects the discharge of those obligations.

Alteration of works 4 It at any time the State finds it necessary to request the Company to alter 49. the situation of any of the installations or other works other than the Companys wharf erected constructed or provided hereunder and gives to the Company notice of the request the Company shall within a reasonable time after receipt of the notice but at the expense in all things including increased running costs of the State unless the alteration is rendered necessary by reason of a breach by the Company of any of its obligations hereunder alter the situation thereof accordingly.

Export Licence 4 50. 1 On request by the Company the State shall make representations to the Commonwealth for the grant to the Company of a licence or licenses under Commonwealth law for the export of ore in such quantities and at such rate or rates as shall be reasonable having regard to the terms of this Agreement the capabilities of the Company and to maximum tonnages of ore for the time being permitted by the Commonwealth for export from the said State and in a manner or terms not less favourable to the Company except as to rate or quantity than As at 06 Dec 2013

Version 02a005 Published on www.legislation.wa.gov.au page 69 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement the State has given or intends to give in relation to such licence or licenses to any other exporter of ore from the said State. 2 If at any time the Commonwealth limits by export licence the total permissible tonnage of ore for export from the said State then the Company will at the request of the State and within three 3 months of such request inform the State whether or not it intends to export to the limit of the tonnage permitted to it under Commonwealth licences in respect of the financial year next following and if it does not so intend will cooperate with the State in making representation to the Commonwealth with a view to some other producer in the said State being licensed by the Commonwealth to export such of the tonnage permitted by the Commonwealth in respect of that year as the Company does not require and such other producer may require. Such procedure shall continue to be followed year by year

during such time as the Commonwealth limits by export licence the total permissible tonnage of ore for export from the said State. 3 The Company shall be in default hereunder if at any time it fails to obtain any licence or licences under Commonwealth law for the export of ore as may be necessary for the purpose of enabling the Company to fulfil its obligations hereunder or if any such licence is withdrawn or suspended by the Commonwealth and such failure to obtain or such withdrawal or suspension as the case may be is due to some act or default by the Company or to the Company not being bona fide in its application to the Commonwealth or otherwise having failed to use its best endeavours to have the licence granted or restored as the case may be but save as aforesaid if at any time any necessary licence is not granted or any licence granted to the Company shall be withdrawn or suspended by the Commonwealth and so that as a result thereof the Company is not for the time being permitted to export at least the tonnage it has undertaken with the State it will export then the Company shall not be obliged to export that tonnage during the period such licence is not granted or is withdrawn or suspended. The State shall at all times be entitled to apply on behalf of the Company and is hereby authorised by the Company so to do for any licence or licences under Commonwealth law for the export of ore as may from time to time be necessary for the purposes of this Agreement. Delays 4 51. This Agreement shall be deemed to be made subject to any delays in the performance of obligations under this Agreement and to the temporary suspension of continuing obligations hereunder which may be occasioned by or arise from circumstances beyond the power and control of the party responsible page 70 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 First Schedule Iron Ore Mount Bruce Agreement for the performance of such obligations including delays or any such temporary suspension as aforesaid caused by or arising from Act of God force majeure floods storms tempests washaways fire unless caused by the actual fault or privity of the Company act of war act of public enemies riots civil commotion strikes lockouts stoppages restraint of labour or other similar acts whether partial or general shortages of labour or essential materials reasonable failure to secure contractors delays of contractors and inability

common in the iron ore export industry to profitably sell iron ore inability common in the iron ore concentrates export industry to profitably sell iron ore concentrates or inability to profitably sell metallised agglomerates or factors due to overall world economic conditions or factors which could not reasonably have been foreseen PROVIDED ALWAYS that the party whose performance of obligations is affected by any of the said causes shall minimise the effect of the said causes as soon as possible after the occurrence. Power to extend periods 4 52. M.L.A. Premier of the State of Western Australia acting for and on behalf of the said State and Instrumentalities thereof from time to time hereinafter called the State of the one part and MOUNT BRUCE MINING PTY. LIMITED a company incorporated under the Companies Act of the said State and having its registered office at 191 St. Georges Terrace Perth hereinafter called the Company which expression will include the successors and assigns of the Company of the other part WHEREAS it is desired to amend the provisions of the principal Agreement as hereinafter defined; NOW THIS AGREEMENT WITNESSETH 1. In this Agreement subject to the context principal Agreement means the Agreement of which a copy is set out in the Schedule to the Iron Ore Mount Bruce Agreement Act 1972; words and phrases to which meanings are given under clause 1 of the principal Agreement other than words or phrases to which meanings are given in the foregoing provisions of this clause shall have the same respective meanings in this Agreement as are given to them under clause 1 of the principal Agreement. 2. The State shall introduce and sponsor a Bill in the Parliament of Western Australia to ratify this Agreement and endeavour to secure its passage as an Act. The subsequent clauses of this Agreement shall not operate unless and 3. until 1 The Bill to ratify this Agreement as referred to in clause 2 hereof is passed as an Act before the 30th day of November 1976 or such

later date if any as the parties hereto may mutually agree upon; and As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 77 Iron Ore Mount Bruce Agreement Act 1972 Second Schedule 1976 Variation Agreement 2 a Bill to ratify the Agreement referred to in the Schedule hereto is passed as an Act before the 30th day of November 1976 or such later date if any as the parties hereto may mutually agree upon. 4. The principal Agreement is hereby varied as follows 1 as to clause 1 a by inserting after the definition of Hamersley the following definition Hamersley Amending Agreement means the agreement of which a copy is set out in the Third Schedule to the Iron Ore Hamersley Range Agreement Act 1963 1972 as amended by the Agreement of which a copy is set out in the Fourth Schedule to that Act and as further amended by the Agreement dated the 5th day of October 1976 between the State of the one part and Hamersley Iron Pty. Limited of the other part; and b by inserting after the definition of metallised agglomerates the following definition metallised agglomerate production commencement date means the date upon which Hamersley pursuant to the provisions of clause 9 of the Hamersley Amendment Agreement first commences to produce metallised agglomerates in commercial quantities; ; 2 by adding after clause 10 a new clause 10A as follows 10A. If Hamersley pursuant to subclause 1 of clause 8A of the Hamersley Amending Agreement submits detailed proposals to the State for the establishment within the said State of a plant for the production of iron ore concentrates then the operation of clauses 8 and 10 hereof shall be suspended until either a Hamersley complies with its obligations under subclauses 1 and 2 of the said clause 8A in which event this Agreement shall thenceforth be read and construed as page 78 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 1976 Variation Agreement Second Schedule if the said clauses 8 and 10 were deleted herefrom; or b Hamersley commits a breach of its obligations under the said subclauses 1 and 2 in which event the said clauses 8 and 10 shall recommence to operate but thereafter shall be read and construed as if i ii iii the reference year 4 in subclause 1 of the said clause 8 read year 8; the reference year 9 wheresoever appearing in the said clause 8 read year 13; and the reference year 6 in subclause 1

of the said clause 10 read year 10 and the reference year 8 in that subclause read year 12. ; 3 as to clause 31 by substitution for the passage end of year 6 in line one the passage expiry of one 1 year from the metallised agglomerate production commencement date; 4 a as to subclause 1 of clause 32 i ii by substituting for the passage end of year 6 in line one the passage expiry of one 1 year from the metallised agglomerate production commencement date; and by substituting for the passages the end of year 8 the end of year 10 and the end of year 12 wheresoever appearing the passages the expiry of three 3 years from the metallised agglomerate production commencement date the expiry of five 5 years from the metallised agglomerate production commencement date and the expiry of seven 7 years from the metallised As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 79 Iron Ore Mount Bruce Agreement Act 1972 Second Schedule 1976 Variation Agreement agglomerate production commencement date respectively; and b as to subclause 2 of clause 32 by adding after the words pursuant to in line four the passage paragraph a of. THE SCHEDULE. THE Agreement of even date herewith between THE HONOURABLE SIR CHARLES WALTER MICHAEL COURT O.B.E. M.L.A. Premier of the State of Western Australia acting for and on behalf of the said State and the Instrumentalities thereof of the first part and HAMERSLEY IRON PTY. LIMITED of the second part. IN WITNESS WHEREOF these presents have been executed the day and the year first hereinbefore written. CHARLES COURT SIGNED by the said THE HONOURABLE SIR CHARLES WALTER MICHAEL COURT O.B.E. M.L.A. in the presence of ANDREW MENSAROS MINISTER FOR INDUSTRIAL DEVELOPMENT THE COMMON SEAL of MOUNT BRUCE MINING PTY. LIMITED was hereunto affixed in the presence of [C.S.] Director. DONALD S. STEWART Secretary. C. J. S. RENWICK [Second Schedule inserted No. 94 of 1976 s. 5.] page 80 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement Third Schedule 1987 Variation Agreement [s. 2] [Heading inserted No. 26 of 1987 s. 7; amended No. 19 of 2010 s. 4.] THIS AGREEMENT is made the 28th day of May 1987 BETWEEN THE HONOURABLE BRIAN THOMAS BURKE M.L.A. Premier of the State of Western Australia acting

for and on behalf of the said State and its instrumentalities from time to time hereinafter called the State of the one part and MOUNT BRUCE MINING PTY. LIMITED a company incorporated in Western Australia and having its registered office at 191 St. Georges Terrace Perth hereinafter called the Company which expression shall include the successors and assigns of the Company of the other part. WHEREAS a b c d the State and the Company are the parties to the agreement dated the 10th day of March 1972 which agreement was ratified by and is scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as varied by the agreement dated the 5th day of October 1976 ratified by the Iron Ore Mount Bruce Agreement Act Amendment Act 1976 which agreement as so varied is referred to in this Agreement as the Principal Agreement; the obligations of the Company under clauses 8 and 10 of the Principal Agreement have been satisfied pursuant to the provisions of paragraph a of clause 10A of the Principal Agreement by the construction by Hamersley Iron Pty. Limited of the plant for the production of iron ore concentrates referred to in that clause; the Principal Agreement contains other provisions with regard to the secondary and further processing of iron ore intended where feasible to further the economic development of the State; and the parties consistent with the above intention but in the light of changed world circumstances with respect to the secondary and further processing of iron ore have agreed to vary certain of the provisions of the Principal Agreement in relation thereto and to broaden the scope for substitution of alternative investments. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 81 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement

NOW THIS AGREEMENT WITNESSETH 1. 2. 3. Subject to the context the words and expressions used in this Agreement have the same meanings respectively as they have in and for the purpose of the Principal Agreement. The State shall introduce and sponsor a Bill in the Parliament of Western Australia to ratify this Agreement and endeavour to secure its passage as an Act. The subsequent clauses of this Agreement shall not operate unless and until a the Bill to ratify this Agreement referred to in clause 2 hereof; and b a Bill to ratify the Agreement referred to in the Schedule hereto are passed as Acts before the 30th day of June 1987 or such later date if any as the parties may

agree. 4. The Principal Agreement is hereby varied as follows 1 Clause 1 a by inserting before the definition of approve the following definition alternative investments means investments in the said State which are within the ability and competence of the Company or of corporations which are related to the Company for the purposes of the Companies Western Australia Code and which are approved by the Minister from time to time as alternative investments for the purpose of this Agreement which approval shall not be unreasonably withheld in the case of an investment which would add value or facilitate the addition of value beyond mining to the mineral resources of the said State;; b in the definition of associated company by deleting section 6 of the Companies Act 1961 and substituting the following section 7 of the Companies Western Australia Code; page 82 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement c by deleting the definitions of Hamersley Amending Agreement and metallised agglomerate production commencement date. 2 Clause 7 subclause 1 by deleting in the proviso payable by them and substituting the following payable by it. 3 By deleting clauses 8 10 and 10A. 4 Clause 21 by deleting other than any default under any of clauses 8 10 32 33 34 and 35 hereof and substituting the following other than any default under clause 41A or clause 41B hereof 5 By deleting clauses 31 to 41 inclusive. 6 By inserting before clause 42 the following clauses 41A. 1 a The Company shall subject to subclause 5 of this clause and to clause 41B of this Agreement on or before the 31st day of December 1991 submit to the Minister detailed proposals for the establishment within the said State of plant for the production of steel containing provision that such plant will by the 31st day of December 1994 have the capacity to produce not less than five hundred thousand 500000 tons of steel annually and will by the 31st day of December 1999 have the capacity to produce not less than one million 1000000 tons of steel annually. b If the Company reasonably requires an additional period for the purpose of submitting adequate proposals under this subclause or making a contract for the sale of steel products then the company may apply to the Minister before the 31st day of December 1991 for an extension of time beyond that date in order to complete the preparation of its proposals and As at 06

Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 83 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement the Minister will grant such extension of time being not less than twelve months as he considers warranted in the circumstances. 2 The provisions of clause 51 hereof shall not apply to subclause 1 of this clause. 3 The Minister shall within two 2 months of receipt of such proposals give to the Company notice of his approval of those proposals which approval shall not be unreasonably withheld or of any objections raised or alterations desired thereto and in the latter case shall afford the Company an opportunity to consult with and to submit new proposals to the Minister. If within two 2 months of receipt of such notice agreement is not reached as to the proposals the Company may within a further period of two 2 months elect by notice to the State to refer to arbitration as provided in clause 53 of this Agreement any dispute as to the reasonableness of the Ministers decision. If by the award on arbitration the question is deed in favour of the Company the Minister shall be deemed to have approved the proposals of the Company. 4 The Company shall except to the extent otherwise agreed with the Minister before the end of the respective times specified in subclause 1 of this clause complete the construction of plant in accordance with the Companys proposals as finally approved or determined under this clause. 5 a The Company may at any time before the time for submission of proposals pursuant to subclause 1 of this clause apply to the Minister for approval that the carrying out by the company of alternative investments be accepted by the State in lieu of all or some part of the Companys obligations in respect of the establishment of plant for the production of steel pursuant to this clause. page 84 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement b Where the Minister approves a request under paragraph a of this subclause the Company shall implement the investments in accordance with that approval and upon completion thereof or earlier with the agreement of the Minister the provisions of subclause 1 of this clause or that part of those provisions which pursuant to the said approval are to be satisfied by those investments shall cease to apply. 41B. 1 If the Company at any time considers that the

establishment of plant for the production of steel or as the case may be the expansion of the productive capacity of such plant as required to proposed or as required pursuant to any proposals finally approved or determined pursuant to clause 41A hereof hereinafter called the steel operation is for any technical economic or other reason not feasible whether in whole or in part then the Company may submit to the Minister the reasons why it considers the steel operation is not feasible together with supporting data and such other relevant information as the Minister may require. 2 Within two 2 months after receipt of a submission from the Company under subclause 1 of this Clause the Minister shall notify the Company whether or not he agrees with its submission. 3 a If the Minister notifies the company that he does not agree with its submission than at the request of the Company made within two 2 months after receipt by the Company of the notification from the Minister the Minister will refer the matter to arbitration pursuant to clause 53 hereof to decide whether or not the steel operation is feasible. b If the Company does not request a reference to arbitration under paragraph a of this subclause or if on a reference to arbitration it is decided that the steel operation is feasible the As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 85 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement Company shall comply with its obligations under clause 41A hereof provided that the period from the time that the Company made its submission under subclause 1 of this clause to the time when the Minister notified the Company that he did not agree with its submission or the time when it was decided by arbitration that the steel operation was feasible as the case may be shall be added to the respective times by which the Company is required to comply with those obligations. 4 If the Minister notifies the Company that he agrees with its submission or if on reference to arbitration it is decided that all or part of the steel operation is not feasible then a The Company shall not have any obligation or b further obligation to submit proposals in respect of so much of the steel operation as has been found not to be feasible or to carry out the relevant part of any proposals in respect thereof that may have been finally approved or determined pursuant to clause 41A hereof; and the Company shall thenceforth be obliged to identify and investigate

potential alternative investments which would either alone or in the aggregate with other alternative investments represent economic development within the said State approximately equivalent to the steel operation or relevant part thereof. 5 In carrying out its obligations under subclause 4b of this clause the Company shall take account of and investigate to the extent reasonable under the circumstances having regard inter alia to the expertise of the Company and related corporations any potential alternative investments which are prim facia feasible and which are formally referred to the Company by the Minister from time to time. page 86 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement 6 The Company shall submit to the Minister in detail its programme for the identification and investigation of potential alternative investments pursuant to paragraph b of subclause 4 and subclause 5 of this clause not later than two 2 months after receiving the notice from the Minister or the decision on arbitration as the case may be referred to in subclause 4 of this clause which programme shall specify the potential alternative investments it is investigating and any potential alternative investments it intends to investigate and shall set forth the Companys proposed timetable for its investigations of those investments and the feasibility thereof. 7 a Within two 2 months after receipt of a programme from the Company under subclause 6 of this clause the Minister shall notify the Company of any investments referred to in the programme which he would be prepared to approve as alternative investments and forthwith after such a notice the Company and the Minister shall meet to agree upon a programme including timing for studies by the Company into the feasibility of those investments. b The Company shall duly investigate the feasibility of any potential alternative investments referred to in paragraph a of this subclause and report to the Minister thereon in accordance with the programme agreed pursuant thereto or determined by arbitration hereunder. c Where any such potential alternative investment is accepted by the Minister as an alternative investment and agreed by the Company and the Minister or found on arbitration to be feasible the Company and the Minister shall forthwith meet to agree on a date by which the Company shall submit detailed proposals for that alternative investment. As at 06 Dec

2013 Version 02a005 Published on www.legislation.wa.gov.au page 87 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement d The Company shall report to the Minister on its progress in performing its obligations under paragraphs b and c of this subclause at such intervals as the Minister may require but not more frequently in respect of any such matter than once in every three 3 months for summary reports and once in every twelve 12 months for detailed written reports. 8 a The Company shall submit its detailed proposals for any alternative investment referred to in subclause 7c of this clause not later than the date agreed pursuant to that subclause. b The provisions of subclause 3 of clause 41A hereof shall apply mutatis mutandis to the approval or determination of proposals made under this subclause. The Company shall implement proposals so approved or determined in accordance with the terms thereof. 9 a The obligations of the Company under subclause 4b of this clause shall continue until the parties agree or it is found on arbitration that alternative investments representing economic development within the said State approximately equivalent to the steel operation or relevant part thereof as provided for in that subclause have become the subject of proposals approved or determined in accordance with subclause 8 of this clause. So long as the Company has continuing obligations under subclause 4b of this clause the Company shall as and when it identified any potential alternative investment forthwith submit to the Minister a programme for the investigation of that investment and the feasibility thereof by the Company including its proposed timetable for the investigations. b page 88

Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement 10 c The provisions of subclauses 7 and 8 of this clause shall mutatis mutandis apply to a programme submitted under paragraph b of this subclause as if it were a programme under subclause 6 of this clause. The Company may invoke the foregoing provisions of this clause at any time and from time to time in respect of all or any of its obligations arising under or pursuant to clause 41A hereof and the references to the steel operation in those provisions shall as the case may require be read and construed as referring to the one or more of those obligations in respect of which those provisions are invoked by the

Company.. 7 Clause 51 by deleting inability common in the iron ore concentrates export industry to profitably sell iron ore concentrates or inability to profitably sell metallised agglomerates and substituting the following inability to profitably sell steel or the product of any production facility required to be established pursuant to this Agreement. 8 Clause 53 a b by inserting after the clause designation 53 the subclause designation 1; by deleting the arbitration of two arbitrators one to be appointed by each party the arbitrators to appoint their umpire before proceeding in the reference and every such arbitration shall be conducted in accordance with the provisions of the Arbitration Act 1895 PROVIDED THAT and substituting the following and settled by arbitration under the provisions of the Commercial Arbitration Act 1985 Provided That a notwithstanding sections 6 and 7 of that Act the matter unless the parties agree on the appointment of a specific single arbitrator shall be referred to and settled by arbitration under that Act by a tribunal of As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 89 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement three 3 arbitrators of whom the State shall appoint one the Company shall appoint one and those two arbitrators shall appoint the third; and b notwithstanding section 201 of that Act each party may be represented by a duly qualified legal practitioner or other representative and PROVIDED FURTHER THAT; c by inserting the following subclauses 2 The arbitrator or arbitrators as the case may be 3 determining any submission to arbitration under this Agreement shall have power upon application by either party to grant any interim extension of time or date referred to herein which having regard to the circumstances may reasonably be required in order to preserve the rights of either or both of the parties hereunder and an award in favour of the Company may in the name of the Minister grant any further extension of time for that purpose. In deing issues of economic feasibility the arbitrator or arbitrators as the case may be shall have regard to any submissions made by the Minister and by the Company and also inter alia to the amount of capital required for the investment the availability of that capital at that time on reasonable terms and conditions the likelihood of the investment being able to generate sufficient cash flow for a sufficient period to justify the same having regard to the amount and rate of

return of total capital that would be involved in or in connection with the investment and the weighted average cost of capital to the Company.. 9 Clause 54 by deleting in writing and substituting the following or writing page 90 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Third Schedule 1987 Variation Agreement THE SCHEDULE The Agreement of even date with this Agreement between THE HONOURABLE BRIAN THOMAS BURKE M.L.A. LTD. ACN 008 714 010 IRON ORE MOUNT BRUCE AGREEMENT 1972 RATIFIED VARIATION AGREEMENT [Solicitors details] page 92 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement THIS AGREEMENT is made this 17th day of November 2010 BETWEEN THE HONOURABLE COLIN JAMES BARNETT MLA. Premier of the State of Western Australia acting for and on behalf of the said State and instrumentalities thereof from time to time State AND MOUNT BRUCE MINING PTY. LIMITED ACN 008 714 010 of Level 22 Central Park 152158 St Georges Terrace Perth Western Australia Company. RECITALS A. The State and the Company are the parties to the agreement dated 10 March 1972 ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 and which

as subsequently added to varied or amended is referred to in this Agreement as the Principal Agreement. B. The State and the Company wish to vary the Principal Agreement. THE PARTIES AGREE AS FOLLOWS 1. 2. Subject to the context the words and expressions used in this Agreement have the same meanings respectively as they have in and for the purpose of the Principal Agreement. The State shall introduce and sponsor a Bill in the Parliament of Western Australia to ratify this Agreement and shall endeavour to secure its passage as an Act prior to 31 December 2010 or such later date as the parties may agree. 3. a Clause 4 does not come into operation unless or until an Act passed in accordance with clause 2 ratifies this Agreement. b If by 30 June 2011 or such later date as may be agreed pursuant to clause 2 clause 4 has not come into operation then unless the parties hereto otherwise agree this Agreement shall cease and determine and neither party shall have any claim against the other party with respect to any matter or thing arising out of or done or As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 93 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement performed or omitted to be done or performed under this Agreement. 4. The Principal Agreement is hereby varied as follows 1 in clause 1 a b by deleting the current definitions of direct shipping ore fine ore fines and f.o.b. revenue; by inserting in the appropriate alphabetical positions the following new definitions agreed or determined means agreed between the Company and the Minister or failing agreement within three months of the Minister giving notice to the Company that he requires the value of a quantity of iron ore to be agreed or determined as determined by the Minister following if requested by the Company consultation with the Company and its consultants in regard thereto and in agreeing or determining a fair and reasonable market value of such iron ore assessed on an arms length basis the Company and/or the Minister as the case may be shall have regard to i in the case of iron ore initially sold at cost pursuant to paragraph B of the proviso to clause 121d the prices for that type of iron ore prevailing at the time the price for such iron ore was agreed between the arms length purchaser referred to in paragraph Biii of that proviso and the seller in relation to the type of sale and the relevant international seaborne iron ore

market into which such iron ore was sold and where prices beyond the deemed f.o.b. point are being considered the deductions mentioned in the definition of f.o.b. value; and ii in any other case the prices for that type of iron ore prevailing at the time the price for such iron ore was agreed between the Company and the purchaser in relation to the type of sale and the market into which such iron ore was sold and where prices beyond the page 94 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement deemed f.o.b. point are being considered the deductions mentioned in the definition of f.o.b. value; approved proposal means a proposal approved or determined under this Agreement; beneficiated ore means iron ore that has been concentrated or upgraded otherwise than solely by crushing screening separating by hydrocycloning or a similar technology which uses primarily size as a criterion washing scrubbing trommelling or drying or by a combination of 2 or more of those processes by the Company in a plant constructed pursuant to a proposal approved pursuant to an Integration Agreement or in such other plant as is approved by the Minister after consultation with the Minister for Mines and beneficiation and beneficiate have corresponding meanings; deemed f.o.b. point means on ship at the relevant loading port; deemed f.o.b. value means an agreed or determined value of the iron ore as if the iron ore was sold f.o.b. at the deemed f.o.b. point as at a in the case of iron ore the property of the Company which is shipped out of the said State the date of shipment; and b in any other case the date of sale transfer of ownership disposal or use as the case may be; EP Act means the Environmental Protection Act 1986 WA; fine ore means iron ore not being beneficiated ore which is screened and will pass through a 6.3 millimetre mesh screen; f.o.b. value means i subject to paragraph ii in the case of iron ore shipped and sold by the Company the price which is payable for the iron ore by the purchaser thereof to As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 95 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement the Company or an associated company or where the Minister considers following advice from the appropriate Government department that the price payable in respect of the iron ore does not represent a fair

and reasonable market value for that type of iron ore assessed on an arms length basis such amount as is agreed or determined as representing such a fair and reasonable market value less all export duties and export taxes payable to the Commonwealth on the export of the iron ore and all costs and charges properly incurred and payable by the Company from the time the iron ore shall be placed on ship at the relevant loading port to the time the same is delivered and accepted by the purchaser including 1 ocean freight; 2 marine insurance; 3 4 5 6 7 8 port and handling charges at the port of discharge; all costs properly incurred in delivering the iron ore from port of discharge to the smelter and evidenced by relevant invoices; all weighing sampling assaying inspection and representation costs; all shipping agency charges after loading on and departure of ship from the relevant loading port; all import taxes by the country of the port of discharge; and such other costs and charges as the Minister may in his discretion consider reasonable in respect of any shipment or sale; ii in the case of iron ore initially sold at cost pursuant to paragraph B of the proviso to clause 121d the price which is payable for the iron ore by the arms length purchaser as referred to in paragraph Biii of page 96 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement that proviso or where the Minister considers following advice from the appropriate Government department that the price payable in respect of the iron ore does not represent a fair and reasonable market value for that type of iron ore assessed on an arms length basis in the relevant international seaborne iron ore market such amount as is agreed or determined as representing such a fair and reasonable market value less all duties taxes costs and charges referred to in paragraph i above; iii in all other cases the deemed f.o.b. value. For the purpose of subparagraph i of this definition it is acknowledged that the consideration payable in an arms length transaction for iron ore sold solely for testing purposes may be less than the fair and reasonable market value for that iron ore and in this circumstance where the Minister in his discretion is satisfied such consideration represents the entire consideration payable the Minister shall be taken to be satisfied that such entire consideration represents the fair and reasonable market value; Government agreement has the meaning given in

the Government Agreements Act 1979; Integration Agreement means a b c d the agreement approved by and scheduled to the Iron Ore Hamersley Range Agreement Act 1963 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Robe River Agreement Act 1964 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Hamersley Range Agreement Act Amendment Act 1968 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; or As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 97 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement e f g h i j k the agreement ratified by and scheduled to the Iron Ore Hope Downs Agreement Act 1992 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Yandicoogina Agreement Act 1996 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Mount Newman Agreement Act 1964 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Mount Goldsworthy Agreement Act 1964 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore GoldsworthyNimingarra Agreement Act 1972 as from time to time added to varied or amended; or the agreement authorised by and as scheduled to the Iron Ore McCameys Monster Agreement Authorisation Act 1972 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Marillana Creek Agreement Act 1991 as from time to time added to varied or amended; Integration Proponent means in relation to an Integration Agreement the Company or the Joint Venturers as the case may be as defined in and for the purpose of that Integration Agreement; iron ore includes without limitation beneficiated ore; laws relating to native title means laws applicable from time to time in the said State in respect of native title and includes the Native Title Act 1993 Commonwealth; loading port means a the Port of Dampier; or b Port Walcott; or page 98 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth

Schedule 2010 Variation Agreement c the Port of Port Hedland; or d any other port constructed after the variation date under an Integration Agreement; or e such other port approved by the Minister at the request of the Company from time to time for the shipment of iron ore from the mineral lease; lump ore means iron ore not being beneficiated ore which is screened and will not pass through a 6.3 millimetre mesh screen; Minister for Mines means the Minister in the Government of the said State for the time being responsible under whatsoever title for the administration of the Mining Act 1978 WA; Related Entity means a company in which a as at 21 June 2010; and b after 21 June 2010 with the approval of the Minister a direct or through a subsidiary or subsidiaries within the meaning of the Corporations Act 2001 Commonwealth indirect shareholding of 20 or more is held by c Rio Tinto Limited ABN 96 004 458 404; or d BHP Billiton Limited ABN 49 004 028 077; or e those companies referred to in paragraphs c and d in aggregate; variation date means the date on which clause 4 of the variation agreement made on or about 17 November 2010 between the State and the Company comes into operation; washing means a process of separation by water using only size as a criterion; c in the definition of alternative investments by deleting or of corporations which are related to the Company for the purposes of the Companies Western Australia Code; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 99 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement d e f g h i in the definition of Companys wharf by inserting and in clauses 121d and 141 also any additional wharf constructed by the Company pursuant to this Agreement; in the definition of metallised agglomerates by deleting or iron ore concentrates; in the definition of mineral lease by inserting and any areas added to it pursuant to clause 20B before the semi colon; in the definition of secondary processing by deleting concentration or other beneficiation of iron ore other than by crushing or screening and substituting beneficiation of iron ore; in the sentence beginning marginal notes by inserting and clause headings after marginal notes; and by inserting after that sentence the following new paragraphs Nothing in this Agreement shall be construed a b to exempt the Company from compliance with any requirement in connection with the protection of the environment arising out of or inental to its

activities under this Agreement that may be made by or under the EP Act; or to exempt the State or the Company from compliance with or to require the State or the Company to do anything contrary to any laws relating to native title or any lawful obligation or requirement imposed on the State or the Company as the case may be pursuant to any laws relating to native title; or c to exempt the Company from compliance with the provisions of the Aboriginal Heritage Act 1972 WA.; 2 by inserting after subclause 4 of clause 5 the following new subclauses page 100 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 4a A proposal may with the consent of the Minister except in relation to an Integration Agreement and that of any parties concerned being in respect of an Integration Agreement the Integration Proponent for that agreement provide for the use by the Company of any works installations or facilities constructed or established under a Government agreement. 4b At the time when the Company submits the said proposals it shall submit to the Minister details of any services including any elements of the project investigations design and management and any works materials plant equipment and supplies that it proposes to consider obtaining from or having carried out or permitting to be obtained from or carried out outside Australia together with its reasons therefore and shall if required by the Minister consult with the Minister with respect thereto.; 3 in clause 55 by a b c inserting or where required to be assessed under Part IV of the EP Act within 2 months after the service on him of an authority under section 457 of the EP Act after 2 months after receipt of the proposals; inserting subject to the EP Act after State shall as hereinafter permit; deleting the fourth sentence and substituting the following new sentence The provisions of paragraphs a except subparagraph iv b c and the proviso to and second sentence of paragraphd of subclause 7 shall apply mutatis mutandis to such proposals provided that in his notice to the Company of his decision in respect of the proposals the Minister shall also be at liberty to specify in such notice such alterations to the proposals as are fair and reasonable having regard to the interests of the Company and any other party nominated as aforesaid including participation in such development and use by another party or other parties nominated by the

Minister.; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 101 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 4 by deleting the heading to subclause 8 of clause 5 and renumbering that subclause as subclause 6a; 5 by deleting subclause 7 of clause 5 and substituting the following new subclause 7 a In respect of each proposal pursuant to subclause 3 of this clause the Minister shall i subject to the limitations set out below refuse to approve the proposal whether it requests the grant of new tenure or not if the Minister is satisfied on reasonable grounds that it is not in the public interest for the proposal to be approved; or ii approve of the proposal without qualification or reservation; or iii defer consideration of or decision upon the same until such time as the Company submits a further proposal or proposals in respect of some other of the matters mentioned in subclause 3 not covered by the said proposal; or iv require as a condition precedent to the giving of his approval to the said proposal that the Company make such alteration thereto or comply with such conditions in respect thereto as he thinks reasonable and in such a case the Minister shall disclose his reasons for such conditions PROVIDED ALWAYS that where implementation of any proposals hereunder has been approved pursuant to the EP Act subject to conditions or procedures any approval or decision of the Minister under this clause shall if the case so requires incorporate a requirement that the Company make such alterations to the proposals as may be necessary to make them accord with those conditions or procedures. page 102 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement In considering whether to refuse to approve a proposal the Minister is to assess whether or not the implementation of the proposal by itself or together with any one or more of the other submitted proposals will A detrimentally affect economic and orderly development in the said State including without limitation infrastructure development in the said State; or B be contrary to or inconsistent with the planning and development policies and objectives of the State; or C detrimentally affect the rights and interests of third parties; or D detrimentally affect access to and use by others of the lands the subject of any grant or proposed grant to the Company. The right to refuse to approve a

proposal conferred by subparagraph i of paragraph a may only be exercised in respect of a proposal where the Minister is satisfied on reasonable grounds that a purpose of the proposal is the integrated use of works installations or facilities as defined in subclause 7 of clause 20C for the purpose of that clause as contemplated by clause 20C. It may not be so exercised in respect of a proposal if pursuant to clause 11B5 the Minister prior to the submission of the proposal advised the Company in writing that the Minister has no public interest concerns as defined in that clause with the single preferred development as referred to in clause 11B5a the subject of the submitted proposals and those proposals are consistent as to their substantive scope and with the information provided to the Minister pursuant to clause 11B5 in respect of that single preferred development. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 103 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement b c d The Minister shall within 2 months after receipt of proposals pursuant to subclause 3 give notice to the Company of his decision in respect to the proposals PROVIDED THAT where a proposal is to be assessed under Part IV of the EP Act the Minister shall only give notice to the Company of his decision in respect to the proposal within 2 months after service on him of an authority under section 457 of the EP Act. If the decision of the Minister is as mentioned in either of subparagraphs i iii or iv of paragraph a the Minister shall afford the Company full opportunity to consult with him and should it so desire to submit new or revised proposals either generally or in respect to some particular matter. If the decision of the Minister is as mentioned in either of subparagraphs iii or iv of paragraph a and the Company considers that the decision is unreasonable the Company within 2 months after receipt of the notice mentioned in subclause 2 may elect to refer to arbitration in the manner hereinafter provided the question of the reasonableness of the decision PROVIDED THAT any requirement of the Minister pursuant to the proviso to paragraph a shall not be referable to arbitration hereunder. A decision of the Minister under subparagraph i of paragraph a of this subclause shall not be referable to arbitration under the Agreement. e An award made on an arbitration pursuant to this subclause 7 shall except as otherwise provided in subclause 5 have the force and effect as follows i if by the

award the dispute is deed against the Company then unless the Company within 3 months after delivery of the award gives notice to the Minister of its acceptance of the award this Agreement shall on the expiration of that period of 3 months cease and determine; and page 104 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement ii if by the award the dispute is deed in favour of the Company then decision shall take effect as a notice by the Minister that he is so satisfied with and approves the mater or matters the subject of the arbitration.; 6 by inserting after subclause 13 of clause 5 the following new subclauses 14 The Company shall implement the approved proposals in accordance with the terms thereof. 15 Notwithstanding clause 46 the Minister may during the implementation of approved proposals approve variations to those proposals.; 7 in clause 71b by a inserting or cause to be granted after grant; b inserting after the paragraph beginning at peppercorn rental the following new paragraph at commercial rentals licence or easement fees as applicable leases licences or easements within the port as defined in clause 1 or other port within which the Company is permitted to construct works installations or facilities inserting the Port Authorities Act 1999 WA after 1926; and inserting installations or facilities after Company reasonably requires for its works; c d 8 by inserting after subclause 4 of clause 7 the following new subclause; 4a The provisions of subclauses 1 and 2 of this clause shall not operate so as to require the State to grant or vary or cause to be granted or varied any lease licence or other right or title until all processes necessary under any laws relating to native title to enable that grant or variation to proceed have been completed.; 9 in clause 111 by As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 105 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement a in paragraph a inserting other than under clause 20E after activities beyond; and b in the second sentence i inserting subclauses 3 to 6 hereof and of after provisions; and ii inserting 11A before 19; 10 by inserting after subclause 2 of clause 11 the following new subclauses 3 A proposal may with the consent of the Minister except in relation to an Integration Agreement and that of any parties concerned being in respect of an Integration Agreement the

Integration Proponent for that agreement provide for the use by the Company of any works installations or facilities constructed or established under a Government agreement. 4 Each of the proposals pursuant to subclause 1 may with the approval of the Minister or shall if so required by the Minister be submitted separately and in any order as to any matter or matters in respect of which such proposals are required to be submitted. 5 At the time when the Company submits the said proposals it shall submit to the Minister details of any services including any elements of the project investigations design and management and any works materials plant equipment and supplies that it proposes to consider obtaining from or having carried out or permitting to be obtained from or carried out outside Australia together with its reasons therefor and shall if required by the Minister consult with the Minister with respect thereto. 6 The Company may withdraw its proposals pursuant to subclause 1 at any time before approval thereof or where any decision in respect thereof is referred to arbitration as referred to in clause 11A within 3 months after the award by notice to the Minister that it shall not be proceeding with the same.; page 106 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 11 by inserting after clause 11 the following new subclauses

Consideration of Companys proposals under clause 11 11A. 1 In respect of each proposal pursuant to subclause 1 of clause 11 the Minister shall a b c d subject to the limitations set out below refuse to approve the proposal whether it requests the grant of new tenure or not if the Minister is satisfied on reasonable grounds that it is not in the public interest for the proposal to be approved; or approve of the proposal without qualification or reservation; or defer consideration of or decision upon the same until such time as the Company submits a further proposal or proposals in respect of some other of the matters mentioned in clause 11 not covered by the said proposal; or require as a condition precedent to the giving of his approval to the said proposal that the Company make such alteration thereto or comply with such conditions in respect thereto as he thinks reasonable and in such a case the Minister shall disclose his reasons for such conditions PROVIDED ALWAYS that where implementation of any proposals hereunder has been approved pursuant to the EP Act

subject to conditions or procedures any approval or decision of the Minister under this clause shall if the case so requires incorporate a requirement that the Company make such alterations to the proposals as may be necessary to make them accord with those conditions or procedures. In considering whether to refuse to approve a proposal the Minister is to assess whether or not the As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 107 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement implementation of the proposal by itself or together with any one or more of the other submitted proposals will i ii iii iv detrimentally affect economic and orderly development in the said State including without limitation infrastructure development in the said State; or be contrary to or inconsistent with the planning and development policies and objectives of the State; or detrimentally affect the rights and interests of third parties; or detrimentally affect access to and use by others of the lands the subject of any grant or proposed grant to the Company. The right to refuse to approve a proposal conferred by paragraph a may only be exercised in respect of a proposal where the Minister is satisfied on reasonable grounds that a purpose of the proposal is the integrated use of works installations or facilities as defined in subclause 7 of clause 20C for the purpose of that clause as contemplated by clause 20C. It may not be so exercised in respect of a proposal if pursuant to clause 11B5 the Minister prior to the submission of the proposal advised the Company in writing that the Minister has no public interest concerns as defined in that clause with the single preferred development as referred to in clause 11B5a the subject of the submitted proposals and those proposals are consistent as to their substantive scope and with the information provided to the Minister pursuant to clause 11B5 in respect of that single preferred development. 2 The Minister shall within 2 months after receipt of proposals pursuant to clause 111 give notice to the Company of his decision in respect to the proposals page 108 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement PROVIDED THAT where a proposal is to be assessed under Part IV of the EP Act the Minister shall only give notice to the Company of his decision in respect to the proposal within 2

months after service on him of an authority under section 457 of the EP Act. If the decision of the Minister is as mentioned in either of paragraphs a c or d of subclause 1 the Minister shall afford the Company full opportunity to consult with him and should it so desire to submit new or revised proposals either generally or in respect to some particular matter. If the decision of the Minister is as mentioned in either of paragraphs c or d of subclause 1 and the Company considers that the decision is unreasonable the Company within 2 months after receipt of the notice mentioned in subclause 2 may elect to refer to arbitration in the manner hereinafter provided the question of the reasonableness of the decision PROVIDED THAT any requirement of the Minister pursuant to the proviso to subclause 1 shall not be referable to arbitration hereunder. A decision of the Minister under paragraph a of subclause 1 shall not be referable to arbitration under this Agreement. If by the award made on the arbitration pursuant to subclause 4 the dispute is deed in favour of the Company the decision shall take effect as a notice by the Minister that he is so satisfied with and approves the matter or matters the subject of the arbitration. The Company shall implement the approved proposals in accordance with the terms thereof. Notwithstanding clause 46 the Minister may during the implementation of approved proposals approve variations to those proposals. 3 4 5 6 7

Notification of possible proposals As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 109 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 11B.1 If the Company upon completion of a prefeasibility study in respect of any matter that would require the submission and approval of proposals pursuant to this Agreement being proposals which will have as their purpose or one of their purposes the integrated use of works installations or facilities as contemplated by clause 20C for the matter to be undertaken intends to further consider the matter with a view to possibly submitting such proposals it shall promptly notify the Minister in writing giving reasonable particulars of the relevant matter. 2 Within one 1 month after receiving the notification the Minister may if the Minister so wishes inform the Company of the Ministers views of the matter at that stage. 3 4 If the Company is informed of the Ministers views it shall take them into account in deing whether or not to proceed with its

consideration of the matter and the submission of proposals. Neither the Ministers response nor the Minister choosing not to respond shall in any way limit prejudice or otherwise affect the exercise by the Minister of the Ministers powers or the performance of the Ministers obligations under this Agreement or otherwise under the laws from time to time of the said State. 4 a This subclause applies where the Company has settled upon a single preferred development a purpose of which is the integrated use of works installations or facilities as defined in subclause 7 of clause 20C for the purpose of that clause as contemplated by clause 20C. b For the purpose of this subclause public interest concerns means any concern that implementation of the single preferred development or any part of it will page 110 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement i ii iii iv detrimentally affect economic and orderly development in the said State including without limitation infrastructure development in the said State; or be contrary to or inconsistent with the planning and development policies and objectives of the State; or detrimentally affect the rights and interests of third parties; or detrimentally affect access to and use by others of lands the subject of any grant or proposed grant to the Company. c At any time prior to submission of proposals the Company may give to the Minister notice of its single preferred development and request the Minister to confirm that the Minister has no public interest concerns with that single preferred development. d The Company shall furnish to the Minister with its notice reasonable particulars of the single preferred development including without limitation i ii iii as to the matters that would be required to be addressed in submitted proposals; and its progress in undertaking any feasibility or other studies or matters to be completed before submission of proposals; and its timetable for obtaining required statutory and other approvals in relation to the submission and approval of proposals; and iv its tenure requirements. As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 111 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement e If so required by the Minister the Company will provide to the Minister such further information regarding the single preferred development as the Minister may require from time to time for the

purpose of considering the Company's request and also consult with the Minister or representatives or officers of the State in regard to the single preferred development. f Within 2 months after receiving the notice or if the Minister requests further information within 2 months after the provision of that information the Minister must advise the Company i ii that the Minister has no public interest concerns with the single preferred development; or that he is not then in a position to advise that he has no public interest concerns with the single preferred development and the Minister's reasons in that regard. g If the Minister gives the advice mentioned in paragraph f ii the Company may should it so desire give a further request to the Minister in respect of a revised or alternate single preferred development and the provisions of this subclause shall apply mutatis mutandis thereto.; 12 in clause 121 by deleting paragraph d and substituting the following new paragraphs d ship or procure the shipment of all iron ore mined from the mineral lease and sold i from the Company's wharf; or page 112 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement ii from any other wharf in a loading port which wharf has been constructed under an Integration Agreement; or iii with the Minister's approval given before submission of proposals in that regard from any other wharf in a loading port which wharf has been constructed under another Government agreement excluding the Integration Agreements and use its best endeavours to obtain therefor the best price possible having regard to market conditions from time to time prevailing PROVIDED THAT A B this paragraph shall not apply to iron ore used for the production of iron ore concentrates or in a plant for the production of metallised agglomerates or steel in any part of the said State lying north of the twenty sixth parallel of latitude; and iron ore from the mineral lease may be sold by the Company prior to or at the time of the shipment under this Agreement at a price equal to the production costs in respect of that iron ore up to the point of sale if i ii iii the Minister is notified before the time of shipment that the sale is to be made at cost providing details of the proposed sale; and the Minister is notified of the proposed arms length purchaser in the relevant international seaborne iron ore market of the iron ore the subject of the proposed sale at cost; and there is included in the return

lodged pursuant to clause 121i particulars of the transaction in which the ore sold at cost was subsequently purchased in the relevant international seaborne iron ore market by an arms length purchaser specifying the purchaser the seller the price and the date As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 113 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement when the sale was agreed between the arms length purchaser and the seller; and iv the arms length purchaser referred to in iii above is not then a designated purchaser as referred to in subclause 1da; Designated purchaser da if required by notice in writing from the Minister provide the Minister within 30 days after receiving the notice with evidence that the transaction as included in the return pursuant to paragraph Biii of subclause 1d was a sale in the relevant international seaborne iron ore market to an independent participant in that market. If no evidence is provided or the Minister is not so satisfied on the evidence provided or other information obtained the Minister may by notice to the Company designate the purchaser to be a designated purchaser and that designation will remain in force unless and until lifted by further notice from the Minister to the Company. For the avoidance of doubt the parties acknowledge that marketing entities forming part of the corporate group including the Company or part of the parallel corporate group if the Company is part of a duallisted corporate structure are not independent participants for the purposes of this subclause;; 13 in paragraph h of clause 121 by deleting all the words after solely for testing purposes and substituting the following i ii on lump ore and on fine ore not sold or shipped separately as such at the rate of 7.5 of the f.o.b. value; on fine ore sold or shipped separately as such at the rate of 5.625 of the f.o.b. value; iii on beneficiated ore at the rate of 5 of the f.o.b. value; and iv and on all other iron ore at the rate of 7.5 of the f.o.b. value. Where beneficiated ore is produced from an admixture of iron ore from the mineral lease and other iron ore a portion and a portion only of beneficiated ore so produced being equal to the proportion page 114 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement that the amount of iron in the iron ore from the mineral lease used in the production of beneficiated ore bears to the total amount of

iron in the iron ore so used shall be deemed to be produced from iron ore from the mineral lease. Where for the purpose of determining f.o.b. value it is necessary to convert an amount or price to Australian currency the conversion is to be calculated using a rate excluding forward hedge or similar contract rates that has been approved by the Minister at the request of the Company and in the absence of such request as determined by the Minister to be a reasonable rate for the purpose. The provisions of regulation 85AA Effect of GST etc on royalties of the Mining Regulations 1981 WA shall apply mutatis mutandis to the calculation of royalties under this clause.; 14 in clause 121i by a inserting and also showing such other information in relation to the abovementioned iron ore as the Minister may from time to time reasonably require in regard to and to assist in verifying the calculation of royalties in accordance with paragraph h after due date of the return; and b deleting all the words after calculated on the basis of and substituting a colon followed by i ii in the case of iron ore initially sold at cost pursuant to paragraph B of the proviso to subclause 1d at the price notified pursuant to paragraph Biii of that proviso; in any other case invoices or provisional invoices as the case may be rendered by the Company to the purchaser which invoices the Company shall render without delay simultaneously furnishing copies thereof to the Minister of such iron ore or on the basis of estimates as agreed or determined and shall from time to time in the next following appropriate return and payment make by the return and by cash all such necessary adjustments and give to the Minister full details thereof when the f.o.b. value shall have been finally calculated agreed or determined;; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 115 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 15 by deleting paragraph l of clause 121 and substituting the following new paragraph l permit the Minister or his nominee to inspect at all reasonable times the books records accounts documents including contracts data and information of the Company stored by any means relating to any shipment or sale of iron ore the subject of royalty hereunder and to take copies or extracts in whatever form therefrom and for the purpose of determining the f.o.b. value in respect of any shipment sale transfer or other disposal or use or production of iron ore the subject of royalty

hereunder the Company will take reasonable steps i to provide the Minister with current prices for iron ore and other details and information that may be required by the Minister for the purpose of agreeing or determining the f.o.b. value and ii to satisfy the State either by certificate of a competent independent party acceptable to the State or otherwise to the Ministers reasonable satisfaction as to all relevant weights and analyses and will give due regard to any objection or representation made by the Minister or the Ministers nominee as to any particular weight or assay of iron ore which may affect the amount of royalty payable hereunder;; 16 by in clause 121 deleting the full stop at the end of paragraph o substituting a semi colon and inserting the following new paragraph Production of books etc in Perth p shall cause to be produced in Perth in the said State all books records accounts documents including contracts data and information of the kind referred to in paragraph l to enable the exercise of rights by the Minister or the Ministers nominee under paragraph l regardless of the location in which or by whom those books records accounts documents including contracts data and information are stored from time to time.; 17 by inserting after clause 20 the following new clauses

Blending of iron ore page 116 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 20A. 1 The Company may blend iron ore mined from the mineral lease with any a b c d iron ore mined from a mining tenement or other mining title granted under or pursuant to an Integration Agreement; or iron ore mined from a Mining Act 1978 mining lease located in or proximate to the Pilbara region of the said State which is held by a Related Entity alone or with a third party or parties excluding any mining lease granted pursuant to or held under a Government agreement; or with the prior approval of the Minister iron ore mined in or proximate to the Pilbara region of the said State under a Government agreement excluding an Integration Agreement; or with the prior approval of the Minister iron ore mined by a third party from a Mining Act 1978 mining lease located in or proximate to the Pilbara region of the said State excluding under a Government agreement which has been purchased by an Integration Proponent from the third party. 2 The authority given under subclause 1 is subject to the Minister being reasonably satisfied that there are in place adequate

systems and controls for the correct apportionment of the quantities of iron ore being blended as between each of the sources referred to in subclause 1 which systems and controls monitor production processing transportation stockpiling and shipping of all such iron ore. If at any time the Minister ceases to be so satisfied he may after consulting the Company and provided the Company has not within three 3 months after the commencement of such consultation addressed the matters of concern to the As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 117 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement Minister to his satisfaction by notice in writing to the Company suspend the above authority in respect of the relevant blending arrangements until he is again satisfied in terms of this subclause 2. 3 If any blending of iron ore occurs as contemplated by this clause then for the purposes of paragraphs h and i of clause 121 a portion of the iron ore so blended being equal to the proportion that the amount of iron ore from the mineral lease used in the admixture of iron ore bears to the total amount of iron ore so blended shall be deemed to be produced from the mineral lease. Additional areas 20B. 1 Notwithstanding the provisions of the Mining Act or the Mining Act 1978 the Company may from time to time during the currency of this Agreement apply to the Minister for areas held by the Company or an associated company under a mining tenement granted under the Mining Act 1978 to be included in the mineral lease but so that the total area of the mineral lease any land that may be included in the mineral lease pursuant to this Agreement and of any other mineral lease or mining lease granted under or pursuant to this Agreement as aggregated shall not at any time exceed 777 square kilometres. The Minister shall confer with the Minister for Mines in regard to any such application and if they approve the application the Minister for Mines shall upon the surrender of the relevant mining tenement include the area the subject thereof in the mineral lease by endorsement subject to such of the conditions of the surrendered mining tenement as the Minister for Mines determines but otherwise subject to the same terms covenants and conditions as apply to the mineral lease with such apportionment of rents as is necessary and notwithstanding that the survey of such additional land has not been completed but subject to page 118 Version 02a005 Published

on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement correction to accord with the survey when completed at the Companys expense. 2 The Minister may approve upon application by the Company from time to time for the total area referred to in subclause 1 to be increased up to a limit not exceeding 1000 square kilometres. 3 The Company shall not mine or carry out other 4 activities other than exploration bulk sampling and testing on any area or areas added to the mineral lease pursuant to subclause 1 of this clause unless and until proposals with respect thereto are approved or determined pursuant to the subsequent provisions of this clause. If the Company desires to commence mining of iron ore or to carry out any other activities other than as aforesaid on the said areas it shall give notice of such desire to the Minister and shall within 2 months of the date of such notice or thereafter within such extended time as the Minister may allow as hereinafter provided and subject to the provisions of this Agreement submit to the Minister to the fullest extent reasonably practicable its detailed proposals which proposals shall include plans where practicable and specifications where reasonably required by the Minister with respect to such mining or other activities as additional proposals pursuant to clause 11. Integrated use of works installations or facilities under the Integration Agreements 20C. 1 Subject to subclauses 2 to 7 of this clause and to the other provisions of this Agreement the Company may during the continuance of this Agreement a use any existing or new works installations or facilities constructed or held i under this Agreement; or As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 119 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement ii under any other Integration Agreement which are made available for such use and during the continuance of such Integration Agreement; or iii with the approval of the Minister under a Government agreement excluding an Integration Agreement which are made available for such use and during the continuance of that agreement wholly or in part in the activities of the Company carried on by it pursuant to this Agreement including without limitation as part of those activities transporting by railway and shipping from a loading port and undertaking any ancillary and inental activities in doing

so including without limitation blending permitted by clause 20A of A iron ore mined from a Mining Act 1978 mining lease located in or proximate to the Pilbara region of the said State which is held by a Related Entity alone or with a third party or parties excluding any mining lease granted pursuant to or held under a Government agreement; B with the prior approval of the Minister iron ore mined in or proximate to the Pilbara region of the said State under a Government agreement excluding an Integration Agreement; C with the prior approval of the Minister iron ore mined by a third party from a Mining Act 1978 mining page 120 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement lease located in or proximate to the Pilbara region of the said State excluding under a Government agreement which has been purchased by the Company from the third party; D iron ore mined under an Integration Agreement; b make any existing or new works installations or facilities constructed or held under this Agreement available for use wholly or partly by another Integration Proponent during the continuance of its Integration Agreement in the activities of that Integration Proponent carried on by it pursuant to its Integration Agreement including without limitation as part of those activities transporting by railway and shipping from a loading port and undertaking any ancillary and inental activities in doing so including without limitation blending permitted by that Integration Agreement of i iron ore mined from a Mining Act 1978 mining lease located in or proximate to the Pilbara region of the said State which is held by a Related Entity alone or with a third party or parties excluding any mining lease granted pursuant to or held under a Government agreement; ii with the prior approval of the Minister as defined in that Integration Agreement iron ore mined in or proximate to the Pilbara region of the said State under a Government agreement excluding an Integration Agreement; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 121 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement iii with the prior approval of the Minister as defined in that Integration Agreement iron ore mined by a third party from a Mining Act 1978 mining lease located in or proximate to the Pilbara region of the said State excluding under a Government agreement which

has been purchased by that Integration Proponent from the third party; iv iron ore mined under an Integration Agreement; c make any existing or new works installations or facilities constructed or held under this Agreement available for use wholly or partly in connection with operations under i a Mining Act 1978 mining lease located in or proximate to the Pilbara region of the said State for iron ore which is held by a Related Entity alone or with a third party or parties excluding any mining lease granted pursuant to or held under a Government agreement; or ii with the approval of the Minister a Government agreement other than an Integration Agreement for the mining of iron ore in or proximate to the Pilbara region of the said State; subject to subclause 2 under this Agreement and for the purpose of any use or making available for use referred to in paragraph a b or c connect any existing or new works installations or facilities constructed or held under this Agreement to any existing or new works installations or d page 122 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement e f g 2 a facilities constructed or held under another Integration Agreement; subject to subclause 2 under this Agreement and for the purpose of any use or making available for use referred to in paragraph a b or c or making of any connection referred to in paragraph d construct new works installations or facilities and expand modify or otherwise vary any existing and new works installations or facilities constructed or held under this Agreement; allow a railway or rail spur line not being a railway or rail spur line constructed or held under an Integration Agreement to be connected to a railway or rail spur line or other works installations or facilities constructed or held under this Agreement for the delivery of iron ore to an Integration Proponent for transport by railway and shipping from a loading port together with any ancillary and inental activities in doing so as part of its activities under its Integration Agreement; and allow an electricity transmission line not being an electricity transmission line constructed or held under an Integration Agreement to be connected to an electricity transmission line constructed or held under this Agreement for the supply of electricity permitted to be made under an Integration Agreement. A connection referred to in clause 1d or construction expansion modification or other variation referred

to in subclause 1e by the Company shall to the extent not already authorised under this Agreement as at the variation date be regarded as a As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 123 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement significant modification expansion or other variation of the Companys activities carried on by it pursuant to this Agreement and may only be made in accordance with proposals submitted and approved or determined under this Agreement in accordance with clauses 11 and 11A or clause 20E as the case may require and otherwise in compliance with the provisions of this Agreement and the laws from time to time of the said State. For the avoidance of doubt the parties acknowledge that any use or making available for use contemplated by subclause 1a 1b or 1c shall not otherwise than as required by this paragraph a require the submission and approval of further proposals under this Agreement. b The Company shall not be entitled to i ii submit proposals to develop a port or harbour otherwise than as permitted by clause 5 or to establish harbour or port works installations or facilities or to expand modify or otherwise vary harbour or works installations or facilities other than within the boundaries of the port as defined by clause 1 or as permitted by clause 5; or generate and supply power take and supply water or dispose of water otherwise than in accordance with the other clauses of this Agreement and subject to any restrictions contained in those clauses; or iii without limiting subparagraphs i and ii submit proposals to construct or establish works installations or page 124 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement iv v facilities of a type or to make expansions modifications or other variations of works installations or facilities of a type which in the Ministers reasonable opinion this Agreement immediately before the variation date did not permit or contemplate the Company constructing establishing or making as the case may be otherwise than for integration use as contemplated by subclauses 1a 1b or 1c or as permitted by clause 20E; or submit proposals to make a connection as referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e otherwise than on tenure granted under or pursuant to this Agreement from time to time or held pursuant to

this Agreement from time to time; or submit proposals to make a connection referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e for the purpose of use as contemplated by subclause 1ci if in the reasonable opinion of the Minister the activity which is the subject of the proposals would give to the holder or holders of the relevant Mining Act 1978 mining lease the benefit of rights or powers granted to the Company under this Agreement over and above the right of access to As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 125 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement vi vii and use of the relevant works installations or facilities; or submit proposals to make a connection as referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e for the purpose of use as contemplated by subclause 1c and involving the grant of tenure without the prior approval of the Minister; or submit proposals to assign sublet transfer or dispose of any works installations or facilities constructed or held under this Agreement or any leases licences easements or other titles under or pursuant to this Agreement for any purpose referred to in this clause. Notwithstanding the provisions of clauses 11A and 20E the Minister may defer consideration of or a decision upon a proposal submitted by the Company for a connection as referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e for the purpose of use or making available for use as referred to in subclauses 1a or 1b until relevant corresponding proposals under the relevant Integration Agreement have been submitted and those proposals can be approved under that Integration Agreement concurrently with the Ministers approval under this Agreement of the Companys proposal.

c 3 Any use or making available for use as referred to in subclause 1 or submission of proposals as page 126 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement referred to in subclause 2 in respect of a Related Entity shall be subject to the Company first confirming with the Minister that the Minister is satisfied that the relevant company is a Related Entity.

4 The Company shall give the Minister prior written notice of

any significant change other than a temporary one for maintenance or to respond to an emergency proposed in its use or in it making available for use works installations or facilities as referred to in this clause a b from that authorised under this Agreement immediately before the variation date; and subsequently from that previously notified to the Minister under this subclause as soon as practicable before such change occurs. The Company shall also keep the Minister fully informed with respect to any proposed connection as referred to in subclause 1f or 1g or request of the Company for such connection to be allowed. 5 Nothing in this Agreement shall be construed to a b exempt another Integration Proponent from complying with or the application of the provisions of its Integration Agreement; or restrict the Companys rights under clause 43. For the avoidance of doubt the approval of proposals under this Agreement shall not be construed as authorising another Integration Proponent to undertake any activities under this Agreement or under another Integration Agreement. 6 Nothing in this clause shall be construed to exempt the Company from complying with or the application of the other provisions of this As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 127 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement Agreement including without limitation clause 43 and of relevant laws from time to time of the said State. 7 For the purpose of this clause works installations or facilities means any a b c d e f harbour or port works installations or facilities including without limitation stockpiles reclaimers conveyors and wharves; railway or rail spur lines; track structures and systems associated with the operation and maintenance of a railway including without limitation sidings train control and signalling systems maintenance workshops and terminal yards; train loading and unloading works installations or facilities; conveyors; private roads; g mine aerodrome and associated aerodrome works installations and facilities; h iron ore mining crushing screening beneficiation or other processing works installations or facilities; i mine administration buildings including without limitation offices workshops and medical facilities; j k borrow pits; accommodation and ancillary facilities including without limitation construction camps and in townsites constructed pursuant to and held under any Integration Agreement; page 128 Version 02a005 Published on

Transfer of rights to shared works installations or facilities 20D. 1 For the purposes of this clause Relevant Infrastructure means any works installations or facilities as defined in clause 20C7 a b c constructed or held under another Integration Agreement; which the Company is using in its activities pursuant to this Agreement; which the Minister is satisfied after consulting with the Company and the Integration Proponent for that other Integration Agreement i are no longer required by that other Integration Proponent to carry on its activities pursuant to its Integration Agreement because of the cessation of the Integration Proponents mining operations in respect of which such Relevant Infrastructure was constructed or held or because of any other reason acceptable to the Minister; and ii are required by the Company to continue to carry on its activities pursuant to this Agreement; and d in respect of which that other Integration Proponent has notified the Minister it As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 129 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement consents to the Company submitting proposals as referred to in subclause 2. 2 The Company may as an additional proposal pursuant to clause 11 propose a b that it be granted a lease licence or other title over the Relevant Infrastructure pursuant to this Agreement subject to and conditional upon the other Integration Proponent surrendering wholly or in part and upon such terms as the Minister considers reasonable including any variation of terms to address environmental issues its lease licence or other title over the Relevant Infrastructure; or that the other Integration Proponents lease licence or other title not being a mineral lease mining lease or other right to mine title granted under a Government agreement the Mining Act 1904 or the Mining Act 1978 to the Relevant Infrastructure be transferred to this Agreement to be held by the Company pursuant to this Agreement with such surrender of land from it and variations of its terms as the Minister considers reasonable for that title

to be held under this Agreement including without limitation to address environmental issues and outstanding obligations of that other Integration Proponent under its Integration Agreement in respect of that Relevant Infrastructure. The provisions of clause 11A shall mutatis mutandis apply to any such additional proposal. In addition the Company acknowledges that the Minister may require variations of the other Integration Agreement and/or proposals under it or of this Agreement in order to give effect to the matters contemplated by this clause. page 130 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement 3 This clause shall cease to apply in the event the State gives any notice of default to the Company pursuant to clause 21 and while such notice remains unsatisfied. Miscellaneous Licences for Railways 20E. 1 In this clause subject to the context Additional Infrastructure means a Train Loading Infrastructure; b Train Unloading Infrastructure; c a conveyor train unloading and other infrastructure necessary for the transport of iron ore freight goods or other products from the Railway directly or indirectly to port facilities within a loading port in each case located outside a Port; LAA means the Land Administration Act 1997 WA; Lateral Access Roads has the meaning given in subclause 3aiv; Lateral Access Road Licence means a miscellaneous licence granted pursuant to subclause 6a(ii) or subclause 6b as the case may be and according to the requirements of the context describes the area of land from time to time the subject of that licence; Port means any port the subject of the Port Authorities Act 1999 WA or the Shipping and Pilotage Act 1967 WA; Private Roads means Lateral Access Roads and the Companys access roads within a Railway Corridor; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 131 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement Rail Safety Act means the Rail Safety Act 1998 WA; Railway means a standard gauge heavy haul railway or railway spur line located or to be located as the case may be in or proximate to the Pilbara region of the said State but outside the boundaries of a Port for the transport of iron ore freight goods and other products together with all railway track associated track structures including sidings turning loops over or under track structures supports including supports

for equipment or items associated with the use of a railway tunnels bridges train control systems signalling systems switch and other gear communication systems electric traction infrastructure buildings excluding office buildings housing and freight centres workshops and associated plant machinery and equipment and including rolling stock maintenance facilities terminal yards depots culverts and weigh bridges which railway is or is to be as the case may be the subject of approved proposals under subclause 4 and includes any expansion or extension thereof outside a Port which is the subject of additional proposals approved in accordance with subclause 5; Railway Corridor means prior to the grant of a Special Railway Licence the land for the route of the Railway the subject of that licence access roads other than Lateral Access Roads areas from which stone sand clay and gravel may be taken temporary accommodation facilities for the railway workforce water bores and Additional Infrastructure if any which is the subject of a subsisting agreement pursuant to subclause 3a and after the grant of the Special Railway Licence the land from time to time the subject of that Special Railway Licence; Railway Operation means the construction and operation under this Agreement of the relevant page 132 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement Railway and associated access roads and Additional Infrastructure if any within the relevant Railway Corridor and of the associated Lateral Access Roads in accordance with approved proposals; Railway spur line means a standard gauge heavy haul railway spur line located or to be located in or proximate to the Pilbara region of the said State but outside a Port connecting to a Railway for the transport of iron ore freight goods and other products upon the Railway to directly or indirectly a loading port; Railway Operation Date means the date of the first carriage of iron ore freight goods or other products over the relevant Railway other than for construction or commissioning purposes; Railway spur line Operation Date means the date of the first carriage of iron ore freight goods or other products over the relevant Railway spur line other than for construction or commissioning purposes; Special Railway Licence means the relevant miscellaneous licence for railway and if applicable other purposes granted to the Company pursuant

to subclause 6ai as varied in accordance with subclause 6h or subclause 6i and according to the requirements of the context describes the area of land from time to time the subject of that licence; Train Loading Infrastructure means conveyors stockpile areas blending and screening facilities stackers reclaimers and other infrastructure reasonably required for the loading of iron ore freight goods or other products onto the relevant Railway for transport directly or indirectly to a loading port; and Train Unloading Infrastructure means train unloading infrastructure reasonably required for the unloading of iron ore from the Railway to be As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 133 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement processed or blended with other iron ore at processing or blending facilities in the vicinity of that train unloading infrastructure and with the resulting iron ore products then loaded on to the Railway for transport directly or indirectly to a loading port. Company to obtain prior Ministerial inprinciple approval 2 a If the Company wishes from time to time during the continuance of this Agreement to proceed under this clause with a plan to develop a Railway it shall give notice thereof to the Minister and furnish to the Minister with that notice an outline of its plan. b The Minister shall within one month of a notice under paragraph a advise the Company whether or not he approves inprinciple the proposed plan. The Minister shall afford the Company full opportunity to consult with him in respect of any decision of the Minister under this paragraph. c The Ministers inprinciple approval in respect of a proposed plan shall lapse if the Company has not submitted detailed proposals to the Minister in respect of that plan in accordance with this clause within 18 months of the Ministers inprinciple approval. Railway Corridor 3 a If the Minister gives inprinciple approval to a plan of the Company to develop a Railway it shall consult with the Minister to seek the agreement of the Minister as to i ii where the Railway will begin and end; and a route for the Railway access roads to be within the Railway Corridor and page 134 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement the land required for that route as well as Additional Infrastructure if any including without limitation areas from which stone sand clay and gravel may be

taken temporary accommodation facilities for the railway workforce and water bores; and in respect of Additional Infrastructure if any the nature and capacity of such Additional Infrastructure; and the routes of and the land required for roads outside the Railway Corridor and also outside a Port for access to it to construct the Railway such roads as agreed being Lateral Access Roads. iii iv In seeking such agreement regard shall be had to achieving a balance between engineering matters including costs the nature and use of any lands concerned and interests therein and the costs of acquiring the land all of which shall be borne by the Company. The parties acknowledge the intention is for the Company to construct the Railway the access roads for the construction and maintenance of the Railway which are to be within the Railway Corridor and the relevant Additional Infrastructure if any along the centreline of the Railway Corridor subject to changes in that alignment to the extent necessary to avoid heritage environmental or poor ground conditions that are not identified during preliminary investigation work and recognise the width of the Railway Corridor may need to vary along its route to accommodate Additional Infrastructure if any access roads areas from which stone sand clay and gravel may As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 135 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement b be taken temporary accommodation facilities for the railway workforce and water bores. The provisions of clause 53 shall not apply to this subclause. If the date by which the Company must submit detailed proposals under subclause 4a as referred to in subclause 2c is extended or varied by the Minister pursuant to clause 52 any agreement made pursuant to paragraph a before such date is extended or varied shall unless the Minister notifies the Company otherwise be deemed to be at an end and neither party shall have any claim against the other in respect of it. c The Company acknowledges that it shall be responsible for liaising with every title holder in respect of the land affected and for obtaining in a form and substance acceptable to the Minister all unconditional and irrevocable consents of each such title holder to and all statutory consents required in respect of the land affected for i ii the grant of the Special Railway Licence for the construction operation and maintenance within the Railway Corridor of the Railway access roads

and Additional Infrastructure if any to be within the Railway Corridor; and the grant of Lateral Access Road Licences for the construction use and maintenance of Lateral Access Roads over the routes for the Lateral Access Roads agreed pursuant to paragraph a; and page 136 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement iii the inclusion of additional land in the Special Railway Licence as referred to in subclause 6h or subclause 6i in accordance with this clause. For the purposes of this subclause 3c title holder means a management body as defined in the LAA in respect of any part of the affected land a person who holds a mining petroleum or geothermal energy right as defined in the LAA in respect of any part of the affected land a person who holds a lease or licence under the LAA in respect of any part of the affected land a person who holds any other title granted under or pursuant to a Government agreement in respect of any part of the affected land a person who holds a lease or licence in respect of any part of the affected land under any other Act applying in the said State and a person in whom any part of the affected land is vested immediately before the provision of such consents to the Minister as referred to in subclause 4eii including as applying pursuant to subclause 5d. Company to submit proposals for Railway 4 a The Company shall subject to the EP Act the provisions of this Agreement agreement at that time subsisting in respect of the matters required to be agreed pursuant to subclause 3a submit to the Minister by the latest date applying under subclause 2c to the fullest extent reasonably practicable its detailed proposals including plans where practicable and specifications where reasonably required by the Minister and any other details normally required by a local government in whose area any works are to be situated with respect to the undertaking of the relevant Railway Operation which As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 137 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement proposals shall include the location area layout design materials and time program for the commencement and completion of construction or the provision as the case may be of each of the following matters namely i the Railway including fencing if any and crossing places within the Railway Corridor; ii

Additional Infrastructure if any within the Railway Corridor; iii temporary accommodation and ancillary temporary facilities for the railway workforce on or in the vicinity of the Railway Corridor and housing and other appropriate facilities elsewhere for the Companys workforce; iv water supply; v energy supplies; vi access roads within the Railway Corridor and Lateral Access Roads both along the routes for those roads agreed between the Minister and the Company pursuant to subclause 3a; vii any other works services or facilities desired by the Company; and viii use of local labour professional services manufacturers suppliers contractors and materials and measures to be taken with respect to the engagement and training of employees by the Company its agents and contractors.

b Proposals pursuant to paragraph a must specify the matters agreed for the purpose

page 138 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement pursuant to subclause 3a and must not be contrary to or inconsistent with such agreed matters.

c Each of the proposals pursuant to paragraph a may with the approval of the Minister or must if so required by the Minister be submitted separately and in any order as to the matter or matters mentioned in one or more of subparagraphs i to viii of paragraph a and until all of its proposals under this subclause have been approved the Company may withdraw and may resubmit any proposal but the withdrawal of any proposal shall not affect the obligations of the Company to submit a proposal under this subclause in respect of the subject matter of the withdrawn proposal.

d The Company shall whenever any of the following matters referred to in this subclause are proposed by the Company whether before or during the submission of proposals under this subclause submit to the Minister details of any services including any elements of the project investigations design and management and any works materials plant equipment and supplies that it proposes to consider obtaining from or having carried out or permitting to be obtained from or carried out outside Australia together with its reasons therefor and shall if required by the Minister consult with the Minister with respect thereto.

e At the time when the Company submits the last of the said proposals pursuant to this subclause it shall i furnish to the Ministers reasonable satisfaction evidence of all accreditations under the Rail

Safety Act which are required to be held by As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 139 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement the Company or any other person for the construction of the Railway; and

ii furnish to the Minister the written consents referred to in subclause 3ci and 3cii. f The provisions of clause 11A shall apply mutatis mutandis to detailed proposals submitted under this subclause.

Additional Railway Proposals 5 a b If the Company at any time during the currency of a Special Railway Licence desires to construct a Railway spur line connecting to the Railway the subject of that Special Railway Licence or desires to significantly modify expand or otherwise vary its activities within the land the subject of the Special Railway Licence that are the subject of this Agreement and that may be carried on by it pursuant to this Agreement other than by the construction of a Railway spur line beyond those activities specified in any approved proposals for that Railway it shall give notice of such desire to the Minister and furnish to the Minister with that notice an outline of its proposals in respect thereto including without limitation such matters mentioned in subclause 4a as are relevant or as the Minister otherwise requires. If the notice relates to a Railway spur line or to the construction of Train Loading Infrastructure or Train Unloading Infrastructure on land outside the then Railway Corridor the Minister shall within one month of receipt of such notice advise the Company whether or not he approves in principle the proposed construction of such spur line Train Loading Infrastructure or page 140 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement Train Unloading Infrastructure. If the Minister gives in principle approval the Company may but not otherwise submit detailed proposals in respect thereof provided that the provisions of subclause 3 shall mutatis mutandis apply prior to submission of detailed proposals in respect thereof. c Subject to the EP Act the provisions of this Agreement and agreement at that time subsisting in respect of any matters required to be agreed pursuant to subclause 3a as referred to in paragraph b the Company shall submit to the Minister within a reasonable timeframe as determined by the Minister after receipt of the notice referred to in paragraph a or in the case of a notice referred

to in paragraph b the giving of the Ministers in principle consent as referred to in that paragraph detailed proposals in respect of the proposed construction of such Railway spur line Train Loading Infrastructure Train Unloading Infrastructure or other proposed modification expansion or variation of its activities including such of the matters mentioned in subclause 4a as the Minister may require. d The provisions of subclause 4 with the date for submission of proposals being read as the date or time determined by the Minister under paragraph c and the reference in subclause 4eii to subclause 3ci being read as a reference to subclause 3ciii and of clause 11A shall mutatis mutandis apply to detailed proposals submitted pursuant to this subclause. Grant of Tenure 6 a On application made by the Company to the Minister in such manner as the Minister may As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 141 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement determine not later than 3 months after all its proposals submitted pursuant to subclause 4a have been approved or deemed to be approved and the Company has complied with the provisions of subclause 4e the State notwithstanding the Mining Act 1978 shall cause to be granted to the Company i a miscellaneous licence to conduct within the Railway Corridor and in accordance with its approved proposals all activities including the taking of stone sand clay and gravel the provision of temporary accommodation facilities for the railway workforce and subject to the Rights in Water and Irrigation Act 1914 WA the operation of water bores necessary for the planning design construction commissioning operation and maintenance within the Railway Corridor of the Railway access roads and Additional Infrastructure if any the Special Railway Licence such licence to be granted under and subject to except as otherwise provided in this Agreement the Mining Act 1978 in the form of the Third Schedule hereto and subject to such terms and conditions as the Minister for Mines may from time to time consider reasonable and at a rental calculated in accordance with the Mining Act 1978 A prior to the Railway Operation Date as if the width of the Railway Corridor were 100 metres; and B on and from the Railway Operation Date at the rentals page 142 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation

Agreement from time to time prescribed under the Mining Act 1978; and ii a miscellaneous licence or licences to allow the construction use and maintenance of Lateral Access Roads within the routes agreed for those Lateral Access Roads under subclause 3a each a Lateral Access Road Licence each such licence to be granted under and subject to except as otherwise provided in this Agreement the Mining Act 1978 in the form of the Fourth Schedule hereto and subject to such terms and conditions as the Minister for Mines may from time to time consider reasonable and at the rentals from time to time prescribed under the Mining Act 1978. b On application made by the Company to the Minister in such manner as the Minister may determine not later than 3 months after its proposals submitted pursuant to subclause 5a for the construction of Lateral Access Roads for access to the Railway Corridor to construct a Railway spur line have been approved or deemed to be approved and the Company has complied with the provisions of subclause 4e as applying pursuant to subclause 5d the State notwithstanding the Mining Act 1978 shall cause to be granted to the Company a miscellaneous licence or licences to allow the construction use and maintenance of Lateral Access Roads within the routes agreed for those Lateral Access Roads under subclause 3a as applying pursuant to subclause 5b each a Lateral Access Road Licence each such licence to be granted under and subject to except as As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 143 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement otherwise provided in this Agreement the Mining Act 1978 in the form of the Fifth Schedule hereto and subject to such terms and conditions as the Minister for Mines may from time to time consider reasonable and at the rentals from time to time prescribed under the Mining Act 1978. c Notwithstanding the Mining Act 1978 the term of the Special Railway Licence shall subject to the sooner determination thereof on the cessation or sooner determination of this Agreement be for a period of 50 years commencing on the date of grant thereof. d Notwithstanding the Mining Act 1978 the term of any Lateral Access Road Licence shall subject to the sooner determination thereof on the cessation or sooner determination of this Agreement be for a period of 4 years commencing on the date of grant thereof. e Notwithstanding the Mining Act 1978 and except

as required to do so by the terms of the Special Railway Licence the Company shall not be entitled to surrender the Special Railway Licence or any Lateral Access Road Licence or any part or parts of them without the prior consent of the Minister. f i The Company may in accordance with approved proposals take stone sand clay and gravel from the Railway Corridor for the construction operation and maintenance of the Railway constructed within or approved for construction within the Railway Corridor. ii Notwithstanding the Mining Act 1978 no royalty shall be payable under the page 144 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement Mining Act in respect of stone sand clay and gravel which the Company is permitted by subparagraph i to obtain from the land the subject of the Special Railway Licence. g For the purposes of this Agreement and without limiting the operation of paragraphs a to f inclusive above the application of the Mining Act 1978 and the regulations made thereunder are specifically modified; i in section 911 by A B C deleting the mining registrar or the warden in accordance with section 42 as read with section 92 and substituting the Minister; deleting any person and substituting the Company as defined in the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; deleting for any one or more of the purposes prescribed and substituting for the purpose specified in clause 20E6ai clause 20E6aai or clause 20E6b of the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; ii in section 913a by deleting prescribed form and substituting As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 145 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement form required by the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; iii by deleting sections 916 919 9110 and 91B; iv in section 92 by deleting Sections 41 42 44 46 46A 47 and 52 apply and inserting Section 46A excluding in subsection 2a the mining registrar the warden or applies and by deleting in those provisions and inserting in that provision; v by deleting the full stop at the end of the section 941 and inserting except to the extent otherwise

provided in or to the extent that such terms and conditions are inconsistent with the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; vi by deleting sections 942 3 and 4; vii in section 961 by inserting after miscellaneous licence the words not being a miscellaneous licence granted pursuant to the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; viii by deleting mining regulations 372 373 42 and 42A; and ix by inserting at the beginning of mining regulations 41c and f the words page 146 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fourth Schedule 2010 Variation Agreement h i subject to the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended. If additional proposals are approved in accordance with subclause 5 for the construction of a Railway spur line outside the then Railway Corridor the Minister for Mines shall include the area of land within which such construction is to occur in the Special Railway Licence by endorsement. The area of such land may be included notwithstanding that the survey of the land has not been completed but subject to correction to accord with the survey when completed at the Companys expense. If additional proposals are approved in accordance with subclause 5 for the construction of Train Loading Infrastructure or Train Unloading Infrastructure outside the then Railway Corridor the Minister for Mines shall include the area of such land within which such infrastructure is approved for construction in the Special Railway Licence by endorsement. The area of such land may be included notwithstanding that the survey of the land has not been completed but subject to correction to accord with the survey when completed at the Companys expense. j The provisions of this subclause shall not operate so as to require the State to cause a Special Railway Licence or a Lateral Access Road Licence to be granted or any land included in the Special Railway Licence as mentioned above until all processes necessary under any laws relating to native title to enable that grant or inclusion of land to proceed have been completed. BETWEEN THE HONOURABLE COLIN JAMES BARNETT MLA. Premier of the State of Western

Australia acting for and on behalf of the said State and instrumentalities thereof from time to time

State AND MOUNT BRUCE MINING PTY. LTD. ACN 008 714 010 of Level 22 Central Park 152158

St Georges Terrace Perth Western Australia Company. RECITALS A. The State and the Company are the parties to the agreement dated 10 March 1972 ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 and which as subsequently added to varied or amended is referred to in this Agreement as the Principal Agreement. B. The State and the Company wish to vary the Principal Agreement. THE PARTIES AGREE AS FOLLOWS

1. Interpretation Subject to the context the words and expressions used in this Agreement have the same meanings respectively as they have in and for the purpose of the Principal Agreement.

2. Ratification and Operation

1 The State shall introduce and sponsor a Bill in the State Parliament of Western Australia prior to 31 December 2011 or such later date as may be agreed between the parties hereto to ratify this Agreement. The State shall endeavour to secure the timely passage of such Bill as an Act.

2 The provisions of this Agreement other than this clause and clause 1 will not come into operation until the day after the day on which the As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 167 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement Bill referred to in subclause 1 has been passed by the State Parliament of Western Australia and commences to operate as an Act.

3 If by 30 June 2012 the said Bill has not commenced to operate as an Act then unless the parties hereto otherwise agree this Agreement will then cease and determine and no party hereto will have any claim against any other party hereto with respect to any matter or thing arising out of done performed or omitted to be done or performed under this Agreement.

4 On the day after the day on which the said Bill commences to operate as an Act all the provisions of this Agreement will operate and take effect despite any enactment or other law.

3. Variation of Principal Agreement The Principal Agreement is varied as follows

1 in clause 1 by a inserting in the appropriate alphabetical positions the following new definitions

Eligible Existing Tenure means a i a miscellaneous licence or general purpose lease granted to the Company under the Mining Act 1978; or ii a lease or easement granted to the Company under the LAA and not clearly to the satisfaction of the Minister granted under or pursuant to or held pursuant to this Agreement; or b an application by the Company for the grant to it of a tenement referred to in

paragraph ai which application has not clearly to the satisfaction of the Minister been made under or pursuant to this Agreement and as the context requires the tenement granted pursuant to such an application where that tenure was granted or that application was made as the case may be on or before 1 October 2011; page 168 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement LAA means the Land Administration Act 1997 WA; Relevant Land in relation to Eligible Existing Tenure or Special Advance Tenure means the land which is the subject of that Eligible Existing Tenure or Special Advance Tenure as the case may be; second variation date means the date on which clause 3 of the variation agreement made on or about 7 November 2011 between the State and the Company comes into operation; Special Advance Tenure means a a miscellaneous licence or general purpose lease requested under clause 73b to be granted to the Company under the Mining Act 1978; or b an easement or a lease requested under clause 73b to be granted to the Company under the LAA and as the context requires such tenure if granted; b inserting after the words reference in this Agreement to an Act shall include the amendments to such Act for the time being in force and also any Act passed in substitution therefor or in lieu thereof and the regulations for the time being in force thereunder the words and for the avoidance of doubt this principle subject to the context and without limitation to its application to other Acts may apply in respect of references to the Land Act and the Mining Act notwithstanding references in this Agreement to the LAA and the Mining Act 1978; 2 in clause 71 by inserting after paragraph c the following new paragraph Notwithstanding clause 20C2biv detailed proposals may refer to activities on tenure which is proposed to be granted pursuant to this subclause 1 as if that tenure was granted pursuant to this Agreement but this does not limit the powers or discretions of the Minister under this Agreement or the Minister responsible for the administration of any relevant Act with respect to the grant of the tenure.; As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 169 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement 3 by inserting after clause 73 the following new subclauses Application for Eligible Existing Tenure to be held pursuant

to this Agreement 3a a The Minister may at the request of the Company from time to time made during the continuance of this Agreement approve Eligible Existing Tenure becoming held pursuant to this Agreement on such conditions as the Minister sees fit including without limitation and notwithstanding the Mining Act 1978 and the LAA as to the surrender of land the submission of detailed proposals and the variation of the terms and conditions of the Eligible Existing Tenure including for the Eligible Existing Tenure to be held pursuant to this Agreement and for the more efficient use of the Relevant Land and the Minister may from time to time vary such conditions in order to extend any specified time for the doing of any thing or otherwise with the agreement of the Company. b Eligible Existing Tenure the subject of an approval by the Minister under this subclause will be held by the Company pursuant to this Agreement i ii iii if the Ministers approval was not given subject to conditions on and from the date of the Ministers notice of approval; unless paragraph iii applies if the Ministers approval was given subject to conditions on the date on which all such conditions have been satisfied; and if the Ministers approval was given subject to a condition requiring that the Company submit detailed proposals in accordance with this Agreement on the later of the date on which the Minister approves proposals submitted in discharge of that specified condition and the date upon which all other specified conditions have been satisfied but page 170

Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement the Company is authorised to implement any approved proposal to the extent such implementation is consistent with the then terms and conditions of the Eligible Existing Tenure pending the satisfaction of any conditions relating to the variation of the terms or conditions of the Eligible Existing Tenure. Where this paragraph iii applies prior to any approval of proposals and satisfaction of other conditions the relevant tenure will be treated for but only for the purposes of clause 20C2biv as tenure held pursuant to this Agreement. Application for Special Advance Tenure to be granted pursuant to this Agreement 3b Without limiting clause 72 the Minister may at the request of the Company from time to time made during the continuance of this Agreement approve Special Advance Tenure being

granted to the Company pursuant to this Agreement if a b the Company proposes to submit detailed proposals under this Agreement other than under clause 20E to construct works installations or facilities on the Relevant Land and the Companys request is so far as is practicable made unless the Minister approves otherwise no less than 6 months before the submission of those detailed proposals; and the Minister is satisfied that it is necessary and appropriate that Special Advance Tenure rather than tenure granted under or pursuant to the other provisions of this Agreement be used for the purposes of the proposed works installations or facilities on the Relevant Land and if the Minister does so approve c notwithstanding the Mining Act 1978 or the LAA the appropriate authority or instrumentality of the State shall obtain the consent of the Minister to the form As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 171 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement d and substance of the Special Advance Tenure prior to its grant which for the avoidance of doubt neither the State nor the Minister is obliged to cause to the Company; and if the Company does not submit detailed proposals relating to construction of the relevant works installations or facilities on the Relevant Land within 24 months after the date of the Ministers approval or such later time subsequently allowed by the Minister or if submitted the Minister does not approve such detailed proposals the Special Advance Tenure if then granted shall be surrendered at the request of the Minister. 3c The decisions of the Minister under subclauses 3a and 3b shall not be referable to arbitration and any approval of the Minister under this clause shall not in any way limit prejudice or otherwise affect the exercise by the Minister of the Ministers powers or the performance of the Ministers obligations under this Agreement or otherwise under the laws from time to time of the said State.; 4 in clause 7 by a b deleting in subclause 4 subclause 3 and substituting subclauses 3 3a and 3b; and deleting in subclause 4a and 2 and substituting 2 3a and 3b; 5 by inserting after clause 11B the following new clauses Community development plan 11C. 1 In this clause the term community and social benefits includes a assistance with skills development and training opportunities to promote work readiness and employment for persons living in the Pilbara region of the said State; page 172 Version 02a005

Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement b regional development activities in the Pilbara region of the said State including partnerships and sponsorships; c contribution to any community projects town services or facilities; and d a regionally based workforce. 2 The Company acknowledges the need for community and social benefits flowing from this Agreement. 3 The Company agrees that a b it shall prepare a plan which describes the Companys proposed strategies for achieving community and social benefits in connection with its activities under this Agreement; and the Company shall not later than 3 months after the second variation date submit to the Minister the plan prepared under paragraph a and confer with the Minister in respect of the plan. 4 The Minister shall within 2 months after receipt of a plan submitted under subclause 3b either notify the Company that the Minister approves the plan as submitted or notify the Company of changes which the Minister requires be made to the plan. If the Company is unwilling to accept the changes which the Minister requires it shall notify the Minister to that effect and either party may refer to arbitration hereunder the question of the reasonableness of the changes required by the Minister. 5 The effect of an award made on an arbitration pursuant to subclause 4 shall be that the relevant plan submitted by the Company pursuant to subclause 3b shall with such changes required by the Minister under subclause 4 as the arbitrator determines to be reasonable with or without As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 173 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement modification by the arbitrator be deemed to be the plan approved by the Minister under this clause. 6 At least 3 months before the anticipated submission of proposals relating to a proposed development pursuant to any of clauses 5 11 or 20E the Company must unless the Minister otherwise requires give to the Minister information about how the proposed development may affect the plan approved or deemed to be approved by the Minister under this clause. This obligation operates in relation to all proposals submitted on or after the date that is 4 months after the date when a plan is first approved or deemed to be approved under this clause. 7 The Company shall at least annually report to the

Minister about the Companys implementation of the plan approved or deemed to be approved by the Minister under this clause. 8 At the request of either of them made at any time and from time to time the Minister and the Company shall confer as to any amendments desired to any plan approved or deemed to be approved by the Minister under this clause and may agree to amendment of the plan or adoption of a new plan. Any such amended plan or new plan will be deemed to be the plan approved by the Minister under this clause in respect of the development to which it relates. 9 During the currency of this Agreement the Company shall implement the plan approved or deemed to be approved by the Minister under this clause. Local participation plan 11D.

1 In this clause the term local industry participation benefits means a b the use and training of labour available within the said State; the use of the services of engineers surveyors architects and other professional page 174 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement consultants experts specialists project managers and contractors available within the said State; and c the procurement of works materials plant equipment and supplies from Western Australian suppliers manufacturers and contractors. 2 The Company acknowledges the need for local industry participation benefits flowing from this Agreement. 3 The Company agrees that it shall not later than 3 months after the second variation date prepare and provide to the Minister a plan which contains a b a clear statement on the strategies which the Company will use and require a third party as referred to in subclause 7 to use to maximise the uses and procurement referred to in subclause 1; detailed information on the procurement practices the Company will adopt and require a third party as referred to in subclause 7 to adopt in calling for tenders and letting contracts for works materials plant equipment and supplies stages in relation to a proposed development and how such practices will provide fair and reasonable opportunity for suitably qualified Western Australian suppliers manufacturers and contractors to tender or quote for works materials plant equipment and supplies; c detailed information on the methods the Company will use and require a third party as referred to in subclause 7 to use to have their respective procurement officers promptly introduced to Western

Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement d suppliers manufacturers and contractors seeking such introduction; and details of the communication strategies the Company will use and require a third party as referred to in subclause 7 to use to alert Western Australian engineers surveyors architects and other professional consultants experts specialists project managers and consultants and Western Australian suppliers manufacturers and contractors to services opportunities and procurement opportunities respectively as referred to in subclause 1. It is acknowledged by the Company that the strategies of the Company referred to in subclause 3a will include strategies of the Company in relation to supply of services labour works materials plant equipment or supplies for the purposes of this Agreement. 4 At the request of either of them made at any time and from time to time the Minister and the Company shall confer as to any amendments desired to any plan provided under this clause and may agree to the amendment of the plan or the provision of a new plan in substitution for the one previously provided. 5 At least 6 months before the anticipated submission of proposals relating to a proposed development pursuant to any of clauses 5 11 or 20E the Company must unless the Minister otherwise requires give to the Minister information about the implementation of the plan provided under this clause in relation to the proposed development. This obligation operates in relation to all proposals submitted on or after the date that is 7 months after the date when a plan is first provided under this clause. 6 During the currency of this Agreement the Company shall implement the plan provided under this clause. page

Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement 7 The Company shall a in every contract entered into with a third party where the third party has an obligation or right to procure the supply of services labour works materials plant equipment or supplies for or in connection with a proposed development ensure that the contract contains appropriate provisions requiring the third party to undertake procurement activities in accordance with the plan provided under this clause; and b use reasonable endeavours to ensure that the third party complies with

those provisions.; 6 in clause 121 by a deleting in paragraph a allow crossing places for roads stock and other railways and also; b inserting after paragraph a the following new paragraph Crossings over Railway aa for the purposes of livestock and infrastructure such as roads railways conveyors pipelines transmission lines and other utilities proposed to cross the land the subject of the Companys railway the Company shall i if applicable give its consent to or otherwise facilitate the grant by the State or any agency instrumentality or other authority of the State of any lease licence or other title over land the subject of the Companys railway so long as such grant does not in the Ministers opinion unduly prejudice or interfere with the activities of the Company under this Agreement; and ii on reasonable terms and conditions allow access for the construction and operation of As at 06 Dec 2013 Version 02a005 Published on www.legislation.wa.gov.au page 177 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement such crossings and associated infrastructure provided that in forming his opinion under this clause the Minister must consult with the Company;; and c deleting paragraph hii and substituting the following subparagraph ii on fine ore sold or shipped separately as such at the rate of A B 5.625 of the f.o.b. value for ore shipped prior to or on 30 June 2012; 6.5 of the f.o.b. value for ore shipped during the period from 1 July 2012 to 30 June 2013 inclusive of both dates; and C 7.5 of the f.o.b. value for ore shipped on or after 1 July 2013;; and 7 in clause 20E by a deleting in subclause 1 LAA means the Land Administration Act 1997 WA; b inserting after subclause 3c the following new paragraph d Without limiting subclause 9 the Minister may waive the requirement under this clause for the Company to obtain and to furnish the consent of a title holder if the title holder has refused to give the required consent and the Minister is satisfied that i the title holders affected land is or was subject to a miscellaneous licence granted under the Mining Act 1978 for the purpose of a railway to be constructed and operated in accordance with this Agreement; and ii in the Ministers opinion the title holders refusal to give the required consent is not page 178 Version 02a005 Published on www.legislation.wa.gov.au As at 06 Dec 2013 Iron Ore Mount Bruce Agreement Act 1972 Fifth Schedule 2011 Variation Agreement reasonable in all the circumstances including having regard to

A the rights of the Company in relation to the affected land as the holders of the miscellaneous licence relative to their rights as the holders of the sought Special Railway Licence or Lateral Access Road Licence as the case may be; and B the terms of any agreement between the Company and the title holder.; c deleting in subclause 4a the comma after the provisions of this Agreement and substituting and; and d in subclause 7 i ii deleting all words in paragraph c after at the date of such inclusion; and inserting after paragraph k the following new paragraph l The provisions of clause 121aa shall apply mutatis mutandis to any Railway or Railway spur line constructed pursuant to this clause.. contractor desires to join and assist the Government in accelerating the exploration and development of the potential Petroleum within the contract area; and WHEREAS the contractor has the financial ability technical competence and professional skills necessary to carry out the upstream petroleum operations hereinafter described; and WHEREAS in accordance with the Petroleum Exploration Development and Production Act enacted by the Parliament of the Republic of Kenya agreements in the form of production sharing contracts may be entered into between the Government and contractors; 5 P a g e NOW THEREFORE the Parties hereby agree as follows

PART I INTERPRETATION AND SCOPE 1. Scope 1 This contract is a production sharing contract made pursuant to the Act and regulations. 2 Subject to this contract the contractor shall a have the exclusive right to carry on upstream petroleum operations for the duration of the contract at its sole cost risk and expense; and shall therefore have an economic interest in the development of petroleum in the contract area; b provide all capital machinery equipment facilities technology and personnel necessary for the conduct of upstream petroleum operations; c as further provided in this contract share in the petroleum from the contract area; and d be responsible to the Government for the execution of upstream petroleum operations in accordance with the provisions of this contract. e Without prejudice to the contractors position as an independent contractor hereunder the extent and character of such work to be done by the contractor shall be subject to the general supervision review and approval by the Cabinet Secretary to whom the contractor shall report and be responsible as set forth herein and in the Act and regulations. 3 The contractor is not authorized to carry on upstream petroleum operations in any part of Kenya outside the contract area other than in accordance with an authorization granted under the provisions of the Act. 4 This contract does not authorize the contractor to process and conduct upstream petroleum operations beyond the delivery point. 6 P a g e 2. Interpretation 1 In this contract words in the singular include the plural and vice versa and except where the context otherwise requires accounting procedure means the accounting procedures and requirements set out in Appendix B attached hereto and made an integral part hereof; Act means the Petroleum Exploration Development and Production Act; affiliate means a

person directly or indirectly controlling or controlled by or under direct or indirect common control with another person; appointee means a body corporate wholly owned or controlled by the Government and appointed for the purposes of this contract; arms length price means arms length price as defined in the Income Tax Act; associated natural gas means i any natural gas dissolved in crude oil under reservoir conditions and ii any residue gas remaining after the extraction of crude oil from a reservoir; Authority means the Authority established under the Act for the regulation of the upstream petroleum operations; barrel means a quantity consisting of 158.987 litres at standard atmospheric pressure of 1.01325 bars and temperature of fifteen degrees centigrade 15C; best petroleum industry practices means such practices methods standards and procedures generally accepted and followed internationally by prudent diligent skilled and experienced operators in the upstream petroleum operations including practices methods standards and procedures intended to a conserve petroleum by maximizing recovery of petroleum in a technically and economically sustainable manner; b promote operational safety and prevention of accidents; and c protect the environment by maximizing the impact of upstream petroleum operations; 7 P a g e block means acreage as defined by specific geographic coordinates for purposes of upstream petroleum operations as provided by section 51 of the Act; brine means all saline geological formation water resulting from obtained from or produced in connection with exploration drilling well stimulation production of oil or gas or plugging of a well. Cabinet Secretary means the Cabinet Secretary for the time being responsible for petroleum; calendar quarter or quarter means a period of three 3 consecutive months commencing with the first day of January April July and October; calendar year means a period of twelve 12 consecutive months commencing with the first day of January in any year and ending the last day of December in that year according to the Gregorian calendar; commercial assessment period means the period commencing at the request of the contractor at the time when report regarding the evaluation work programme relating to the discovery of nonassociated natural gas has been submitted by the contractor; commercial discovery means a discovery of petroleum which has been duly evaluated in accordance with the provisions of clause 28

and which can be produced commercially according to best petroleum industry practice after the consideration of all pertinent technical and economic data; commercial production means the quantity of petroleum produced on a regular basis from a commercial field saved and not used in upstream petroleum operations; commercial field means the geological structure or feature which hosts one or more reservoirs from which petroleum production may be commercially undertaken through a defined set of facilities; conservation of petroleum resources means prevention and minimization of wastage of petroleum protection of correlative rights and maximization of ultimate economic recovery. Constitution means the Constitution of the Republic of Kenya; 8 P a g e contract area means the area covered by this contract and described in Appendix A and any such area as may be modified in accordance with the terms of this contract including through amendments surrender withdrawal extension or otherwise; contract year means twelve 12 consecutive calendar months from the effective date or from the anniversary thereof; contractor means the contractor as defined in the Act; control in relation to any person means the possession directly or indirectly of the power to direct or cause the direction of the management by that person whether through the ownership of shares voting securities partnership or other ownership or participation interests agreements or otherwise; crude oil means all hydrocarbons regardless of gravity which are produced at the wellhead in liquid state at atmospheric conditions of temperature and pressure and the liquid hydrocarbons known as distillates or condensate or natural gas liquids obtained from natural gas by condensation or extraction; decommissioning means abandonment recovery and removal and disposal or if applicable redeployment of wells flow lines pipelines facilities infrastructure and assets related to upstream petroleum operations; decommissioning costs means all the costs and expenditures incurred by the contractor when carrying out decommissioning operations including those defined in the accounting procedure; decommissioning plan means the plan for the decommissioning abandonment recovery and removal or if applicable redeployment of wells flow lines pipelines facilities infrastructure and assets related to upstream petroleum operations; delivery point means the point at which petroleum passes through the intake valve of the

pipeline vessel vehicle or craft at a terminal refinery processing plant in Kenya or such other point as may be agreed by the Government and the contractor with such point to be specified in the production sharing contract; development area means the area delimited in a development plan adopted under clause 29 hereof; 9 P a g e development costs means all the costs and expenditures incurred by the contractor when carrying out development operations including those defined in the accounting procedure; drilling permit means a permit issued by the Authority which allows the contractor to conduct drilling operations of an individual well that includes construction of a well a well site and access road to the well site and the ability of the contractor to move and use facilities equipment supplies and materials to the well site during drilling monitoring appraisal and evaluation activities of upstream petroleum operations; economic limit means that point in the life of the field where expected revenue to the contractor from upstream petroleum operations is insufficient to cover the operating costs to continue upstream petroleum operations in accordance with the requirements of the contract; effective date means the date falling ninety days after this Contract has been executed by the contractor and the Government when the contractor shall commence operations; equity participant means any person who is for the time being a component of the contractor and its successors or any assignees of its interest in the contract or under this contract provided that the assignment of any such interest is accomplished pursuant to the provisions of clause 47 hereof; execution date means the date this contract has been signed by the contractor and the Government; exploration and appraisal costs means all the costs and expenditures incurred by the contractor when carrying out exploration or appraisal operations including those defined in the accounting procedure; exploration operations include geological geochemical and geophysical surveys and analysis aerial mapping investigations of subsurface geology stratigraphic test drilling drilling exploratory wells mud and wireline logging and work necessarily connected therewith; exploratory well means a well drilled in search of petroleum to test a geological feature which has not been determined to contain petroleum in commercial quantities; 10 P a g e facility includes a any structure device roads or other associated installations or infrastructure including wells flow lines

pipelines separators storage tanks drilling rigs gas processing plants rail stations pump stations compressor stations and equipment constructed placed or used in order to carry out petroleum operations; b vessel vehicle or craft when stationary and used for drilling or support of ongoing upstream petroleum operations; and c vessel vehicle or craft for transportation of petroleum in bulk when connected to a facility for loading of petroleum; first production means with respect to a development area the moment when commercial production of crude oil or nonassociated natural gas as the case may be first commences from that development area by flowing at the rate forecast in the development plan without interruption for a minimum of fortyeight 48 hours; fiscal year means a period of twelve 12 consecutive months corresponding to the year of income as defined in the Income Tax Act; flow line or gathering line means those segments of pipe complete with equipment such as pumping or compressor stations separators storage tanks communication systems and valves for transporting petroleum from the wellhead in the contract area to the junction of a trunk pipeline or a transmission pipeline; Income Tax Act means the Income Tax Act of Kenya as amended from time to time; LIBOR means the London Interbank Offered Rate for one month deposits of US Dollars displayed on page LIBOR01 of the Reuters Money Rates Service or any other page that replaces page LIBOR01 for the purposes of displaying the British Bankers Association BBA interest settlement rates for such deposits of US Dollars in the London Interbank market on the date of determination or in the event the Reuters Money Rates Service or a successor thereto no longer provides such information such other service as may be agreed by the parties hereto that provides the BBA interest settlement rates for such deposits of US Dollars in the London Interbank market and any other required information previously provided on page LIBOR01; 11 P a g e local means the use of Kenyan local expertise goods and services people businesses and financing for the systematic development of national capacity and capabilities for the enhancement of the Kenyan economy; Market Evaluation Report means a report for a potentially commercial natural gas discovery by the contractor identifying potential market for natural gas expected volumes for such market infrastructure potentially required to access such market and expectations of price

for the natural gas supplied to such market; maximum efficient rate means the rate at which the maximum ultimate economic petroleum recovery is obtained from a commercial field without excessive rate of decline in reservoir pressure and consistent with best petroleum industry practice; ministry means the Ministry for the time being responsible for petroleum in Kenya; natural gas means hydrocarbons that are in a gaseous phase at atmospheric conditions of temperature and pressure including wet mineral gas dry mineral gas casing head gas and residue gas remaining after the extraction or separation of liquid hydrocarbons from wet gas and nonhydrocarbon gas produced in association with liquid or gaseous hydrocarbons; nonassociated natural gas means any natural gas that is not associated natural gas; operator means the designated entity that is responsible for managing the day to day operation of oil and gas exploration development and production; person means any natural or juridical person; petroleum means all hydrocarbons and includes crude oil and natural gas whether capable of being produced from conventional and unconventional reservoirs including shale oil oil shale shale gas coal bed methane gas tar sands and other sources of hydrocarbon reserves; petroleum agreement means the agreement contract license or other arrangement between the National Government and a contractor to conduct upstream petroleum operations in accordance with the provisions of the Act. petroleum costs means expenditure made and obligations incurred and paid by the contractor in carrying out upstream petroleum operations hereunder determined in 12 P a g e accordance with the accounting procedure attached hereto in Appendix B and made a part hereof; upstream petroleum operations means all or any of the operations related to the exploration development production separation and treatment storage and transportation of petroleum up to the agreed delivery point; plugging and abandonment permit means a permit issued by the Authority which allows the contractor to conduct plugging and abandonment operations of an individual well which includes the proper methodology as approved by the Authority and complete restoration of the individual well site and well site access road and removal of all equipment supplies and materials used during the drilling and production licensed upstream petroleum operations; production costs means all the costs and expenditures incurred by

the contractor when carrying out production operations including those defined in the accounting procedure; production permit means a permit issued by the Authority which allows the contractor to conduct production operations of an individual well and includes and not limited to the system of production facilities such as tank batteries production units flow lines and gathering lines and other equipment as deemed necessary to conduct production activities; production sharing contract means a petroleum agreement between the Government of the Republic of Kenya and a contractor which enables the contractor to explore develop and produce petroleum within a contract area; regulations means the Regulations made under the Act as from time to time amended; revenue means the expected revenues derived from the conveyance and sale of petroleum at the delivery point together with any firm tariff income earned by the field facilities if any; semester means a period of six 6 consecutive months commencing with the first day of January or the first day of July of a calendar year. 13 P a g e underground injection control well or UIC well means an individual noncommercial existing well that is converted to a brine injection well for the sole purpose of disposal of brine and liquid waste and includes all facilities necessary to conduct safe injection operations. underground injection control well permit means a permit issued by the Authority which allows the contractor to convert an individual existing well to a brine injection well for the disposal of brine and liquid waste and includes all facilities necessary to conduct safe injection operations. well means any borehole whether drilled or bored within Kenya for production extraction or injection of any petroleum or liquids excluding fresh water to be used as such but including natural or artificial brines and well treatment chemicals. PART II TERM EXPLORATION OBLIGATIONS AND

TERMINATION 3. Term 1 The contractor is authorized to conduct exploration operations within the contract area during an initial exploration period of .. contract years from the effective date. 2 The contractor shall begin exploration operations on the effective date. 3 Upon written application by the contractor made not later than thirty 30 days prior to the expiry of the initial exploration period the Cabinet Secretary shall if the contractor has fulfilled its work and expenditure obligations under this contract grant a first additional exploration period of ..contract years. 4 Upon written application by

the contractor made not later than thirty 30 days prior to the expiry of the first additional exploration period hereof the Cabinet Secretary shall if the contractor has fulfilled its work and expenditure obligations under this contract grant a second additional exploration period of contract years. 5 In order to enable the contractor to complete the drilling and testing of an exploratory well actually being drilled or tested at the end of the second additional exploration period the Cabinet Secretary shall on written application by the contractor made not later than ninety 14 P a g e 90 days before the expiry of that exploration period grant an extension for such period as may be necessary for the contractor to complete the drilling and testing of the well which the contractor shall carry out continuously and diligently which in any event shall not extend such period by more than one hundred and twenty 120 days. 6 Unless extended in accordance with the provisions of clause 3 this contract shall expire automatically at the end of the initial exploration period or at the end of any additional exploration period except as to any development area. However if the contractor reports pursuant to subclause 288 hereof that a commercial discovery has been made before the expiry of the initial exploration period stipulated in subclause 31 hereof or any additional exploration period thereof this contract shall not expire in respect to the relevant development area but shall continue as to such development area for a term of up to twenty five 25 years from the date of the development plan for that development area is adopted under subclause 294 hereof. 7 In the event that the contractor has fulfilled all its obligations for the specified term of the contract the contractor may request an extension of the development area for a further period not exceeding ten 10 years. The Cabinet Secretary shall consider such a request in accordance with the provisions of the Act. 1 The contractor shall surrender 4. Contract Area Surrender a At least twenty five percent 25 of the net area determined by subtracting the development areas from the original contract area at or before the end of the initial exploration period; b An additional of at least twenty five percent 25 of the net area determined by subtracting the development areas from the remaining part of the original contract area at or before the end of the first additional exploration period; and c At or before the end of the second additional exploration period all of the remaining contract area that is not a

development area. 15 Page 2 The contractor may surrender a part of the contract area and such a voluntary surrender shall be credited against the next surrender obligation of the contractor under subclause 41. 3 The shape and size of an area surrendered shall be in a contiguous area of which its longer side shall not be more than three times its shorter side and shall be approved by the Cabinet Secretary approval which shall not be unreasonably withheld. 4 The contractor shall give one year's written notice of surrender in respect of a producing field and thirty days written notice of surrender in respect of any other part of the contract area. In case of a surrender of the entire contract area the contract shall terminate. 5 No surrender made in accordance with this clause shall relieve the contractor of; a its obligations to comply with the minimum exploration work and expenditure required in clause 5; or b any other obligations which may have accrued prior to the date of surrender. 6 Upon surrender of any contract area the contractor shall perform all necessary cleanup activities and undertake all necessary restoration and reclamation measures in accordance with the best petroleum industry practices and the relevant laws. 7 It shall be a requirement for the portion surrendered under this clause to have geological and geophysical data which the contractor shall be under obligation to submit at the time of surrender.

5. Minimum Exploration Work and Expenditure Obligations

1 The contractor shall carry out the following minimum work and expenditure obligations;

a during the initial exploration period of contract years i in the event this contract relates to an onshore block carry out geological geochemical and geophysical studies comprising;

a. b. c. the compilation of a technical database; the performance of a remote sensing study and a field visit to verify initial geological geochemical and geophysical work and remote sensing results and plan for two dimensional seismic acquisition;

16 Page ii carry out a data search for existing data specific to the contract area including a. well data if available; b. c. seismic data and gravity data if available; and reprocess seismic data gravity and magnetic data if available;

iii ..kms of seismic with a minimum expenditure of U.S. dollars .; iv drilling of .. exploratory wells to a minimum depth of 3000 meters per well with a minimum expenditure of U.S. dollars for each well; b during the first additional exploration period of.. contract years drilling of . exploratory wells to a

minimum depth of . meters per well with minimum expenditure of U.S.dollars . for each well; c during the second additional exploration period of .contract years drilling of . exploratory wells to a minimum depth of . meters per well with a minimum expenditure of U.S. dollars . for each well. 2 The fulfillment of all work obligations shall not relieve the contractor of the corresponding expenditure obligation therein. 3 If the drilling of an exploratory well is discontinued prior to reaching the minimum depth herein specified because that well has encountered the basement an impenetrable substance or any condition which in accordance with best petroleum industry practice would make it unsafe or impractical to continue drilling the minimum depth obligation in respect of that well shall be deemed to be fulfilled. 4 An appraisal well drilled to appraise and evaluate a commercial discovery under an Appraisal Work Programme pursuant to subclauses 282and 4 shall not be considered to be an exploratory well for the purpose of fulfilling the required number of exploratory wells. 17 P a g e 5 The minimum exploration expenditure set forth in subclause 51 are expressed in U.S. dollars of the year of the effective date. In any contract year of either the initial exploration period or of any additional exploration period for the purpose of comparison of the actual costs incurred and paid by the contractor with the minimum exploration expenditure the actual costs incurred and paid by the contractor for seismic operations and the drilling of exploratory wells during that contract year shall be converted into constant U.S. dollars by dividing the costs by the discount rate which is the sum of one 1 and the decimal equivalent of the percentage increase in the United States Consumer Price Index as reported for the first time in the monthly publication International Financial Statistics of the International Monetary Fund between the month of the effective date and the month when such costs were incurred. 6 The contractor shall submit a revised programmed and a budget in the event that the contractor may incur additional expenditure in relation to the initial minimum expenditure obligation. 7 On or before the commencement of the initial exploration period or of any additional exploration period the contractor shall provide a security of 50 Bank Guarantee and another 50 by the parent company in a form acceptable to the Cabinet Secretary guaranteeing the contractors minimum work and expenditure obligations under subclause51 hereof. 8 If at the end of either the

initial exploration period or of any additional exploration period or upon the date of termination of this contract whichever occurs first the contractor has not fulfilled its minimum work obligations under subclause 51 hereof and/or its minimum expenditure obligations under subclauses 51 and 55 hereof the contractor shall pay to the Government the minimum monetary obligation in respect of the work not carried out multiplied by the discount rate as defined in subclause 55 and calculated on the last month of that exploration period and/or the shortfall if any between the amount expended in accordance with subclause 55 and the minimum monetary obligation for that exploration period multiplied by the discount rate as defined herein above.

6. Surface Fees and Signature Bonus

1 The contractor shall pay on or before the beginning of the relevant contract year to the Government the following surface fees:

- i. U.S. dollars per square kilometre per year for the initial exploration period;
- ii. U.S. dollars . per square kilometre per year for the first additional exploration period;
- and iii. U.S. dollars per square kilometre per year for the second additional exploration period or any extension thereof.

2 The said payments shall be calculated on the basis of the surface area of the contract area on the date those payments are due.

3 A fee payable under subclause 6.1 is not refundable and a late payment shall attract interest in accordance with subclause 4.62 hereof.

4 A signature bonus of U.S. dollars . shall be payable to the Ministry by the contractor upon execution of the contract by the Cabinet Secretary.

7. Termination

1 Subject to the provisions of the Act the Cabinet Secretary may terminate this contract by giving the contractor written notice if the contractor:

- a fails to make any payment to the Government as required under this contract for a period exceeding thirty (30) days;
- b becomes insolvent makes a composition with creditors or goes into liquidation other than for reconstruction or amalgamation; or
- c fails to provide or maintain the security and insurance stipulated in this contract; or
- d is in material breach of any other obligation under the Act, regulations or this contract.

2 The period of notice in respect of subclauses 7.1a and c hereof shall be thirty (30) days and in any other case ninety (90) days but if the contractor remedies the breach within the period of the notice the Cabinet Secretary shall withdraw the notice. Where the Cabinet Secretary reasonably believes that the contractor is using its best efforts to remedy the

default the Cabinet Secretary may withdraw the notice accordingly. 19 Page 3 When this contract is terminated or expires in whole or in part the contractor shall conclude the upstream petroleum operations in the area as to which this contract has terminated or expired in an orderly manner minimizing harm to the Government and third parties. 4 Where control over one of the entities constituting the contractor is changed the continuation of the contract shall be subject to the consent of the Cabinet Secretary which shall not be unreasonably withheld and for the purpose of this subclause 74 the term control shall have the same meaning as set forth in the definition of an affiliate in clause 2.

PART III RIGHTS AND OBLIGATIONS OF THE CONTRACTOR

8. Rights of the Contractor

1 The contractor shall have the right to carry out the upstream petroleum operations within the contract area subject to the provisions of this contract and applicable law for the term hereof. 2 The contractor is granted the right subject to applicable law to enter upon the contract area and conduct upstream petroleum operations there but permission may be granted to other persons to search for and mine minerals other than petroleum so long as they do not unreasonably interfere with the upstream petroleum operations and easements and rights of way may be granted to other persons for the benefit of land adjacent to the contract area. 3 The Cabinet Secretary shall recommend to the relevant authorities to grant the necessary permit to the contractor to access i water in the contract area for the purpose of the upstream petroleum operations but the contractor shall not unreasonably deprive the users of land domestic settlement or cattle watering place of the water supply to which they are accustomed; ii security within the contract area and; iii any other services the contractor may require in performance of upstream operations. 4 The contractor may for the purpose of the upstream petroleum operations use gravel sand clay and stone in the contract area but not without consent or license granted under the relevant law. 20 Page 5 Further to the provisions of section 110 of the Act and subject to the provisions of the Constitution and any written laws the contractor may exercise all rights granted to it by this contract.

9. General Standards of Conduct

1 The contractor shall carry out the upstream petroleum operations diligently and in accordance with the provisions of this contract best petroleum industry practice and applicable law.

2 Without limiting the foregoing the contractor shall in accordance with the Act and regulations a maintain adequate financial technical and professional capacity throughout the contract period; b at all times ensure that any subcontractor or agent of the contractor acting on its behalf possesses the necessary skills and qualifications to perform the work; c ensure that all facilities such as machinery plant equipment materials supplies and installations used by the contractor in connection with the upstream petroleum operations are of proper and accepted construction standard and are kept in good repair; d use the resources of the contract area as productively as possible and ensure that petroleum discovered and produced are properly contained during upstream petroleum operations and brine drilling fluids mud or any other liquids solids or waste substances are properly contained and disposed of during upstream petroleum operations; e prevent damage to producing formations and to adjacent strata which bear petroleum brine or fresh water and prevent brine fresh water and petroleum entering through wells into strata bearing petroleum except where i approved brine and liquid waste injection well operations and ii secondary and tertiary recovery operations are being conducted; f properly confine petroleum and brine in steel storage tanks constructed for that purpose and not place petroleum brine and drilling fluids in open drilling pits and earthen reservoirs for storage or drilling completions and production operations except temporarily in an emergency; 21 P a g e g dispose of oil brine salt water and other liquid and solid waste in accordance with best petroleum industry practice to avoid damage to the environment and pollution; and h comply with the applicable laws of environment protection health and safety. 10. Joint Liability and Indemnity 1

Where the contractor consists of more than one person their liability shall be joint and several. 2 The contractor shall cause as little damage as possible to the surface and subsurface of a contract area including domestic animals wildlife trees crops buildings roads surface waters underground water aquifers soils facilities and infrastructure and other property thereon and shall forthwith repair any loss or damage caused and shall pay full and reasonable compensation for any loss suffered as determined by an internationally recognized independent expert appointed by both parties. 3 The Cabinet Secretary may if he has reasonable cause to believe that the upstream petroleum

operations may endanger persons or property cause pollution harm marine life or interfere with navigation and fishing order the contractor to take reasonable remedial measures or order the contractor to discontinue the relevant upstream petroleum operations until such measures or mutually agreed alternatives thereto are implemented. 4 The contractor shall maintain appropriate and adequate third party liability insurance and workmens compensation insurance and shall provide the Cabinet Secretary with evidence of those insurances before the upstream petroleum operations begin. 5 The contractor shall indemnify defend and render the Government free from all claims and damage which but for the conduct of the upstream petroleum operations by the contractor or a subcontractor would not have arisen or occurred. 11. Wells and Surveys 1 Unless such notice is waived the contractor shall not drill a well or borehole or recommence drilling after a one hundred and eighty 180 days cessation without thirty 30 days prior notification to the Cabinet Secretary and the Authority which notice shall set forth the 22 P a g e contractors reasons for undertaking such drilling and shall contain a copy of the drilling programme. 2 The design and construction of a well or borehole and the conduct of drilling shall be in accordance with the drilling permit issued by the Authority and best petroleum industry practice. 3 No borehole or well in a contract area shall be drilled without a drilling permit from the Authority which may give special considerations of the distance of the contract boundary area. 4 Production of a well shall be in accordance with the production permit issued by the Authority and the contractor shall produce the well using best petroleum industry practice and conservation of petroleum resources principles; 5 Conversion and operation of a well to an underground injection control well shall be in accordance with the underground injection control well permit issued by the Authority and the contractor shall only inject brine and liquid waste into the well as permitted using best petroleum industry practice; 6 Plugging and abandonment of a well shall be in accordance with the plugging and abandonment permit issued by the Authority using best petroleum industry practice; 7 The contractor shall not a plug and abandon a well or remove any permanent form of casing therefrom without giving forty eight 48 hours prior notification to the Authority and an abandoned well shall be securely plugged to

prevent environmental damage pollution subsea damage or water entering or escaping from the strata penetrated; or b commence drilling reenter or plug a well unless a representative of the Authority has been given a reasonable opportunity to be present. 8 The contractor shall state in its application to plug and abandon a well on land whether that well is capable of providing fresh water supply. 9 The contractor shall within sixty 60 days of termination or expiry of this contract or the surrender of part of the contract area deliver up all productive wells in the said surrendered 23 P a g e area in good repair and working order together with all casings and installations which cannot be moved without damaging the well but the Authority may require the contractor to plug and abandon the well at the contractors expense by notifying the contractor within thirty 30 days after such termination or expiry is effected or at least ninety 90 days prior to surrender of a development area. 10 Where the contractor applies to permanently plug and abandon an exploratory or an appraisal well in which petroleum of potentially commercial significance has not been found the Cabinet Secretary in consultation with the Authority may request the contractor to deepen or sidetrack that well and to test the formations penetrated as a result of such operation or to drill another exploratory or appraisal well within the same prospect area subject to the following provisions a any such additional upstream petroleum operations shall be at the sole cost risk and expense of the Cabinet Secretary and shall be paid for in accordance with the accounting procedure. The Government shall advance to the contractor the funds necessary to conduct the operations; b the contractor shall not undertake such additional work if it will interfere with the conduct of the contractors upstream petroleum operations or if it is not commercially technically or operationally feasible; c in the event that the upstream petroleum operations undertaken under this subclause 1110 result in a commercial discovery which the contractor elects to evaluate and/or develop as a commercial field the contractor shall reimburse the Government six hundred per cent 600 of the costs and expenses incurred by the Government for the conduct of the operations and such sum shall be paid within thirty 30 days of the notification made by the contractor. If the contractor does not make such election the Government shall have the right to continue the petroleum operation on this commercial discovery at the sole

cost risk and expense of the Government. 11 The contractor shall give the Cabinet Secretary and Authority thirty 30 days notice of any proposed seismic and/or geophysical surveys which notice shall contain complete details of the programme to be conducted. At the request of the contractor the Cabinet Secretary may waive the notice period. 24 P a g e 12.

12. Offshore Operations 1 The contractor shall ensure that facilities erected offshore in Kenya's territorial waters and exclusive economic zone shall be a constructed placed marked buoyed equipped and maintained so that there are safe and convenient channels for shipping; b fitted with navigational aids approved by the Cabinet Secretary; c illuminated between sunset and sunrise in a manner approved by the Kenya Ports Authority and Kenya Maritime Authority; and d kept in good repair and working order. 2 The contractor shall pay compensation as determined by expert for any damage to and/or any interference with including but not limited to fishing rights caused by the upstream petroleum operations. 13. Upstream Petroleum Operations Facilities 1 With the written consent of the Cabinet Secretary which consent shall not be unreasonably withheld the contractor shall have the right to construct access roads drill water wells and to place facilities necessary to conduct the upstream petroleum operations including but not limited to storage tanks flow lines shipment installations transmission pipelines water pipelines and cables located inside or outside the contract area. Such consent of the Cabinet Secretary may be conditional on the use by other contractors of the excess capacity if any of those facilities. Where the Cabinet Secretary and the contractor agree that a mutual economic benefit can be achieved by constructing and operating common facilities the contractor shall use its best efforts to reach agreement with other contractors on the construction and operation of such common facilities. 2 Other contractors may use the facilities of the contractor on payment of a reasonable compensation which includes a reasonable return on investment to the contractor and provided that the use does not unreasonably interfere with the contractor's upstream petroleum operations. 25 P a g e 3

The Cabinet Secretary may after consultation with the Authority and contractor consent to the placement of facilities such as flow lines transmission pipelines water pipelines and cables in the contract area by other persons but those facilities shall not unreasonably interfere with the upstream petroleum

operations of the contractor. 4 Subject to clause 17 on termination or expiration of this contract or surrender of part of the contract area the contractor shall remove all petroleum operation facilities from the contract area or the part surrendered other than those that are situated in or related to a development area or at the option of the Cabinet Secretary the contractor shall transfer them at no cost to the Government in their current condition in which case the Government shall be responsible for operating maintaining plugging and abandoning and decommissioning of such facilities. 5 When the rights of the contractor in respect of a development area terminate expire or are surrendered the contractor shall transfer to the Government at no cost the upstream petroleum operations facilities that are situated in the development area or that are related thereto unless such facilities are or may be utilized by the contractor in upstream petroleum operations under this contract but the Government may require the contractor to remove the facilities at the cost of the contractor in accordance with clause 17.

14. Data and Samples 1 The contractor shall keep logs and records of the well construction drilling deepening perforations production plugging and abandonment of boreholes and wells in accordance with best petroleum industry practice and containing particulars of a the strata and subsoil through which the borehole or well was drilled; b the casing tubing and downhole equipment and alterations thereof inserted in a borehole or well; c petroleum fresh water aquifers brine and workable mineral or mine workings encountered; and d any other matter related to upstream petroleum operations required by the Cabinet Secretary and Authority.

26 P a g e 2 The contractor shall record in an original or reproducible form of good quality and on seismic tapes where relevant all geological geochemical geophysical and engineering information and data relating to the contract area obtained by the contractor and shall deliver in electronic and hard copies of that information and data the interpretations thereof and the logs and records of boreholes and wells to the Authority in a reproducible form as soon as is practicable after that information those interpretations and those logs and records come into the possession of the contractor. 3 The contractor may remove for the purpose of laboratory examination or geological analysis petrological specimens and samples of petroleum brine and fresh water encountered in a borehole and/or well

and as soon as practicable shall without charge give the Authority a representative part of each specimen and/or sample removed but no specimen or sample shall be exported from Kenya without prior notification to the Authority. 4 The contractor shall keep records of and supply data and information concerning the upstream petroleum operations as requested by the Authority. 5 The contractor shall provide data information and samples to the Authority in a form and manner as prescribed in the Act and regulations. 15. Reports 1 The contractor shall supply to the Cabinet Secretary and Authority daily reports on drilling completions and production operations and weekly reports on exploration including seismic and geophysical operations. 2 The contractor shall report in writing to the Cabinet Secretary and Authority the progress of the upstream petroleum operations according to the following schedule a within thirty 30 days from the last day of March June September and December covering the previous ninety 90 days; b within ninety 90 days of the last day of December covering the previous year; c within ninety 90 days of the date of expiry or termination of this contract. 3 A report under subclause 15.2 shall contain in respect of the period which it covers 27 P a g e a details of the upstream petroleum operations carried out and the factual information obtained; b a description of the area in which the contractor has operated; c an account of the expenditure on upstream petroleum operations in accordance with the accounting procedure; d a plat map including a record of coordinates including all pits boreholes wells and facilities used for upstream petroleum operations; e on expiry or termination of this agreement details of the upstream petroleum operations including all the matters described in paragraphs a to d; and f all information required by clause 14 not hitherto supplied. 16. Environmental Provisions 1 During the performance of the upstream petroleum operations the contractor shall comply with environmental principles and safeguards prescribed in the Environmental Management and Coordination Act and regulations made thereunder and all other relevant laws and shall take reasonable measures to ensure the protection of the environment and prevention of pollution in accordance with the best petroleum industry practice in similar physical and ecological environments. 2 Prior to surrendering a portion of the contract area the contractor shall take reasonable measures to abandon the area to be

surrendered in accordance with best petroleum industry practice in similar physical and ecological environments. Such measures shall include removal and closure of facilities material and equipment together with reasonable measures necessary for the preservation of fauna flora and ecosystems all in accordance with best petroleum industry practice in similar physical and ecological environments. The contractor shall only be responsible for site restoration or environmental damage to the extent the same pertains solely and directly to upstream petroleum operations conducted pursuant to this contract. 3 The contractor shall take reasonable precautions and measures in accordance with the Kenyan laws and best petroleum industry practice in similar physical and ecological environments to prevent any pollution which may arise directly or indirectly as a result of the upstream 28 P a g e petroleum operations and to protect the environment fauna and flora water sources and any other natural resources when carrying out upstream petroleum operations. 4 The contractor shall in accordance with best petroleum industry practice in similar physical and ecological environments respect the preservation of property agricultural areas and fisheries when carrying out upstream petroleum operations. 5 The contractor shall conduct a strategic environmental and social impact assessment and submit the report thereof to the National Environmental Management Authority within one hundred and eighty 180 days after the effective date. Such environmental and social impact assessment shall establish the effect of upstream petroleum operations to be undertaken under this contract on the environment human beings livestock wildlife or marine life and shall include emergency and acent response plans. 6 The contractor shall take reasonable measures to minimize any adverse material impact on national parks and nature reserves which may arise directly as a result of the upstream petroleum operations in accordance with best petroleum industry practice in similar physical and ecological environments. 7 If a contractors failure to comply with the requirements of this clause 16 results in pollution the contractor shall in accordance with best petroleum industry practice promptly take all necessary measures to control the pollution. If such pollution results directly from the gross negligence or willful misconduct of the contractor the cost of cleanup and repair activities shall be borne by the contractor and shall not be included as petroleum

costs under this contract. 8 The contractor shall notify the Authority within forty eight 48 hours in writing in the event of any emergency or major accident and shall take such action as may be prescribed by the Government's emergency procedures the contractor's emergency and accident response plans developed pursuant to subclause 165 and by best petroleum industry practices. 9 If the contractor does not act promptly so as to control clean up or repair any pollution or damage the Authority may after giving the contractor reasonable notice under the circumstances take any actions that are necessary in accordance with best petroleum industry 29 P a g e practices and the costs and expenses of such actions shall be borne by the contractor and shall not be cost recoverable. 10 The contractor is not responsible for any preexisting environmental conditions or any acts of unrelated third parties. 17. Plugging and Abandonment and Decommissioning Operations 1 Decommissioning Costs a The decommissioning plan is to form part of the development plan and shall include a schedule for the amortization of costs and recovery of costs which are estimated to be incurred when the development is decommissioned. b The contractor shall exercise its judgment in good faith to book sufficient accruals for future plugging and abandonment and decommissioning operations to cover the expenses which are expected to be incurred under the decommissioning plan. The contractor shall examine on an annual basis the estimated costs of plugging and abandonment and decommissioning operations and if appropriate revise them and submit them to the Authority for approval. c The contractor shall commence booking accruals for plugging and abandonment and decommissioning costs in the first calendar quarter in which the ratio of cumulative production to overall recoverable reserves reaches fifty 50 percent or ten years before the expiry of the production permit whichever is earlier. d All plugging and abandonment and decommissioning costs allocated to the decommissioning fund shall be recoverable as petroleum costs at the time that the accrual is entered in the books. 30 P a g e e The contractor shall book an accrual on a calendar quarter basis for the amount of future plugging and abandonment and decommissioning costs according to the following formula Where FTA is the amount to be accrued for future plugging and abandonment and decommissioning costs in respect of the relevant calendar

quarter. ECA is the total estimated cost of plugging and abandonment and decommissioning operations established pursuant to this clause 17. CPP is the volume of petroleum produced during the calendar quarter in which the plugging and abandonment and decommissioning accrual was booked. PRR is the contractors estimated remaining recoverable reserves at the end of the calendar quarter in which the plugging and abandonment and decommissioning accrual was booked; as such estimates may be revised by contractor from time to time. AFB is the accrued decommissioning fund at the end of the previous calendar quarter including accrued interest on the escrow account established under subclause 17.5.

2 Commencement of plugging and abandonment and decommissioning operations

a Plugging and abandonment and decommissioning shall be scheduled to occur after a producing field reaches its economic limit.

b On or before the start of the 720 calendar day period prior to the expected start date of plugging and abandonment and decommissioning the Authority shall notify the contractor which of the facilities and assets identified in the development plan shall not be plugged and abandoned and decommissioned but which shall revert to the ownership of the Government in accordance with clause 13 of this contract. No further funds to cover plugging and abandonment and decommissioning costs shall be reserved or accrued for 31 P a g e the facilities and assets so identified and a corresponding adjustment shall be made if necessary by the contractor.

c If the Cabinet Secretary in consultation with the authority elects not to use the facilities and assets identified in the development plan in subclause 17.2b of this contract the Authority shall have the right to require the contractor to remove them at the contractors expense in accordance with the decommissioning plan it being understood that the plugging and abandonment and decommissioning operations shall be carried out by the contractor in accordance with best petroleum industry practice this contract and in accordance with the time schedule and conditions defined in the decommissioning plan which shall have been approved.

3 Plugging and abandonment and decommissioning upon termination of development area

a If the contractor recommends plugging and abandonment and or decommissioning of facilities assets or wells belonging to it in connection with a termination of a development area pursuant to clause 44 of this contract the

Government may elect to take ownership of and continue using such facilities assets and wells by giving the contractor written notice of such decision within sixty 60 calendar days of the Governments receipt of the contractors notice of relinquishment. Upon so notifying the contractor which notification is effective as of the effective date of the contractors relinquishment the Government shall take ownership of and be responsible for plugging and abandonment and decommissioning of such facilities assets and wells. b If the Government does not elect to continue using such facilities assets or wells the contractor shall be responsible for their plugging and abandonment and decommissioning upon termination of this contract or of the development area within the corresponding development area. The contractor may in consultation with Government defer the plugging and abandonment and decommissioning operations for a reasonable length of time if this would result in operational efficiencies which minimize the cost for all parties. 32 P a g e 4

Facilities assets and wells which the Government continues to use With respect to any facilities assets or wells which the Government elects to own pursuant to this contract a The Government shall conduct such continued use and/or plug and abandon or decommission in accordance with best petroleum industry practice and in such a manner that does not interfere with continuing upstream petroleum operations; and b The Government may plug and abandon and decommission such facilities assets and wells as and when the Government dees. 5 Disbursements of funds for plugging and abandonment and decommissioning costs a The Contractor shall advise the Government on an annual basis its best estimate of the projected date of plugging and abandonment of individual wells and decommissioning of the producing field based on the then current estimate of when the economic limit will be reached according to the then current production forecast and realized petroleum prices. b As and when the contractor commences booking accruals pursuant to these provisions the Contractor and the Government shall cause the accrued costs of plugging and abandonment and decommissioning operations to be set aside in a separate USDollar interest bearing escrow account in the joint names of the contractor and the Government established at a mutually acceptable financial institution in Nairobi Kenya to be used solely for

paying the decommissioning costs. The account is to be funded on a quarterly basis by the contractor and the Government where the Government is participating in proportion to the contractors then current participating interest under this contract and out of its share of ongoing cost petroleum and profit petroleum attributable to the contractor and the Government entities or by cash payment if production is insufficient. A final reconciliation shall be submitted to all entities and the Government following completion of all plugging and abandonment and decommissioning operations and adjustments made in accordance with subclause 176 below.

6 Adjustments to accruals for plugging and abandonment and decommissioning costs

a If excess accruals which were booked in the decommissioning fund for plugging and abandonment and decommissioning costs remain following completion of all plugging and abandonment and decommissioning operations then such excess funds shall be distributed to the contractor and the Government where the Government has participating interest as if such funds represented profit petroleum in the calendar quarter in which plugging and abandonment and decommissioning is completed.

b Any plugging and abandonment and decommissioning cost accruals which have been booked in the decommissioning fund for purposes of removing facilities or assets that the Government deems should not be removed shall be paid by the contractor to the Government where the Government has participating interest concurrently with the transfer of ownership of such facility asset or well to the Government. The Government represents that the transferred funds shall only be used in respect of its plugging and abandonment and decommissioning operations.

c If the amounts accrued for plugging and abandonment and decommissioning costs are insufficient to complete the plugging and abandonment and decommissioning activities additional funds for such activities shall be provided from a portion of crude oil or natural gas which the contractor is entitled to receive under this contract from any development area or if no production is available by cash payment by the contractor and the Government where the Government has participating interest in the same ratio as would be applicable for distribution of excess amounts under subclause 176a.

18. Insurance

1 The contractor shall take up and maintain in respect of upstream petroleum operations

all insurance required by applicable Kenyan law and as the Government and the contractor may agree from time to time. Such insurance shall be of the type and in such amount as is required by applicable law and is customary in accordance with best petroleum industry practices and at least include insurance against the following risks a loss or damage to all installations and equipment which are owned or used by the contractor in the upstream petroleum operations; b pollution caused in the course of the upstream petroleum operations by the contractor for which the contractor may be held responsible; 34 P a g e c property loss or damage or bodily injury suffered by any third party in the course of the upstream petroleum operations by the contractor for which it may be liable to indemnify the Government; d the cost of removing damaged facilities and cleaning up operations following an accident in the course of the upstream petroleum operations by the contractor; and e the contractors liability for its employees engaged in the upstream petroleum operations. 2 The contractor shall give preference to Kenyan insurance companies. 3 In relation to development and production operations the contractor shall submit to the Government a programme for the provision of an All Risks insurance which may inter alia cover physical damage to the facilities under construction and installation as well as legal liabilities arising out of the development and production operations. 4 The contractor shall require its subcontractors to carry equivalent insurance of the type and in such amount as is required by applicable law and is customarily in accordance with best petroleum industry practice. 5 Any insurance policy relating to this contract shall name the Government as an additional insured party and shall include a waiver of subrogation protecting the Government against any claim loss and damage resulting from any petroleum operation conducted by or on behalf of the contractor under this contract to the extent that the contractor is liable for such claim loss or damage under this contract. The contractor shall not be liable for any claims arising from negligence or willful misconduct of the Government. 6 Upon its written request the Government shall be provided with insurance certificates including necessary details for any insurance policy maintained by the contractor which relates to this contract. 35 P a g e PART IV LOCAL . Adherence to Laws and Regulations 1 The contractor shall comply with all the Kenyan local policies laws and

regulations as amended from time to time.

20. Employment and Training of Kenyans

1 In accordance with the provisions of the Act and regulations the contractor and its subcontractors shall employ Kenyans in the upstream petroleum operations and shall until the expiry or termination of this contract conduct training courses and programmes that will progressively increase employment of Kenyans.

2 The training courses and programmes in subclause 201 above shall be established and conducted in consultation with the Cabinet Secretary.

3 The contractor shall ensure that Kenyan nationals are selected and trained consistent with contractors performance standards in relation to activities referred at subclause 233.

21. Training Fund

1 In addition to the obligation under subclause 201 and commencing on the effective date the contractor shall for the purposes of section 88 of the Act contribute to the Government a minimum of U.S. dollars .. per year for the Government training fund established under section 882 of the Act.

2 The contractors obligation under subclause 211 shall be increased to a minimum of U.S dollars per year commencing with the adoption of the first development plan under subclause 293.

3 The Training Fund shall be managed by the Cabinet Secretary in accordance with the Energy and Petroleum Policy the Act and regulations.

36 P a g e

22. Preference for Kenyan Goods and Services

1 The contractor and its subcontractors shall maximize to the satisfaction of the Authority the usage of Kenyan goods and services businesses and financing.

2 The contractor and its subcontractors shall give preference to Kenyan materials and supplies for use in upstream petroleum operations in accordance with the provisions of the Act and regulations.

3 The contractor and its subcontractors shall give preference to Kenyan contractors for services connected with upstream petroleum operations in accordance with the provisions of the Act and regulations.

4 The contractor and its subcontractors shall procure supplies and services from locations in Kenya where practicable in accordance with the provisions of the Act and regulations.

5 The contractor shall a on or before the beginning of each calendar year to which it applies submit to the Cabinet Secretary and Authority a tentative schedule of the contemplated services and supply contracts with an estimated value exceeding the equivalent of U.S. dollars per contract to be let during the forthcoming calendar year showing the

anticipated tender date and approximate value and the goods and services to be provided; b for contracts with an estimated value exceeding the equivalent of U.S. dollar . per contract undertake to select its contractors and subcontractors from adequately qualified indigenous Kenyan companies by means of competitive bidding or by another appropriate method in accordance with best petroleum industry practice; c as soon as practicable after their execution provide to the Cabinet Secretary and the Authority a copy of each contract requiring a payment in US dollars or equivalent and a brief description of the efforts made to find a Kenyan supplier or service contractor; d the minimum amount specified under this subclause 225 may be changed from time to time by the regulations made under the Act.

37 P a g e 6

The contractor shall give equal treatment to local enterprises by ensuring access to all tender invitations and by including high weighting on local value added in the tender evaluation criteria.

23. Technology Transfer

1 The contractor and its subcontractors shall develop a Technology Transfer Programme in accordance with the Energy and Petroleum Policy the Act and regulations to promote the transfer of technology and skills on upstream petroleum operations to indigenous Kenyan employees and government officials.

2 The Technology Transfer Programme shall be aimed at building and developing in Kenya specialized technical management and professional skills relevant to upstream petroleum operations and any necessary facilities requisite for advancement of technical skills in upstream petroleum operations.

3 The contractor shall transfer to Kenyans technology and business expertise in all areas of upstream petroleum operations including but not limited to i Fabrication; ii Information Technology support including seismic data acquisition processing and interpretation support; iii Operations and maintenance support; iv Maritime services; v Business support services including insurance accounting human resource services consulting marketing legal and contract negotiations; vi Financing; vii Trading;

4 In addition to the requirements in subclause 233 above the contractor shall develop indigenous Kenyans to take more value added analytical and decision making roles in areas such as i a technical or professional nature including general management design engineering project management seismic data processing human resource development legal economics

auditing and accounting; and 38 P a g e ii business strategic skills including leadership business development executive management commercial analytical negotiating strategy development and trading know how and acumen. 24. Record Keeping and Reports 1 In accordance with its obligations under the Energy and Petroleum Policy the Act and regulations the contractor shall maintain records to facilitate the determination of the local of expenditure incurred in respect of upstream petroleum operations. 2 These records shall include supporting documentation certifying the cost of local materials labour and services used and shall be subject to audit by the Authority. 3 Pursuant to subclause 241 the contractor shall prepare and submit reports to the Authority in accordance with the specified timeframe in the regulations. PART V RIGHTS AND OBLIGATIONS OF THE GOVERNMENT 25. Rights of the Government 1 The Government may acquire a part of the contract area for a public purpose other than searching for or extracting petroleum but not to the extent that will prevent the carrying out of upstream petroleum operations within the contract area and the Government shall not without good cause acquire a part of the contract area on which upstream petroleum operations are in progress. 2 The contractor shall not carry out upstream petroleum operations on such an acquired part but may a enter upon that part but not materially interfere with the public purpose; and b carry out directional drilling from an adjacent part. 3 The Cabinet Secretary and the Authority or a person authorized by the Cabinet Secretary or the Authority in writing may at all reasonable times inspect any upstream petroleum operations and any records of the contractor relating thereto and the contractor shall provide where available facilities similar to those applicable to its own or to subcontractors staff for 39 P a g e transport to the upstream petroleum operations subsistence and accommodation and pay all reasonable expenses directly connected with the inspection. 4 The Cabinet Secretary may require the contractor to perform an obligation under this contract by giving reasonable written notice and if the contractor fails to comply with the notice the Cabinet Secretary may execute the obligation for which the contractor shall pay forthwith amounts expended by the Cabinet Secretary in the execution of the obligations. The Cabinet Secretary may give written notice to perform an obligation at any time but

not later than ninety 90 days after the termination or expiry of this contract or the surrender of a part of the contract area.

26. Obligations of the Government

1 The Government may at the request of the contractor make available to the contractor such land as the contractor may reasonably require for the conduct of upstream petroleum operations in accordance with Chapter Five⁵ of the Constitution and the relevant land laws and where the land is private land the Government may subject to section 118 of the Act acquire the land in accordance with the applicable laws.

2 The contractor shall pay or reimburse the Government any reasonable compensation that may be required for the setting apart use or acquisition of any land for the upstream petroleum operations.

3 Where the contractor has occupied Community Land for the purpose of the upstream petroleum operations before that land has been set apart the contractor shall notify the Cabinet Secretary in writing of the need to set apart such land as provided for under Chapter Five of the Constitution and any other applicable land laws.

4 The Government shall grant or cause to be granted to the contractor its contractors and subcontractors such wayleaves easements temporary occupation or other permissions within and without the contract area as are necessary to conduct the upstream petroleum operations and in particular for the purpose of laying operating and maintaining pipelines and cables and passage between the contract area and the point of delivery of petroleum.

40 P a g e

5 The Government shall at all times give the contractor the right of ingress to and egress from the contract area and the facilities wherever located for the conduct of upstream petroleum operations.

6 Subject to the national security requirements and the Kenyan Immigration Laws and Regulations the Government shall not unreasonably refuse to issue and/or renew entry and work permits for technicians and managers employed in the upstream petroleum operations by the contractor or its subcontractors and their dependants.

PART VI WORK PROGRAMME DEVELOPMENT AND PRODUCTION

27. Exploration Work Programme and Detailed Budget

1 The contractor shall submit in writing and make a presentation to the Cabinet Secretary thirty 30 days after the effective date a detailed report of the exploration work programme and detailed budget for the first contract year.

2 The contractor shall submit in writing and make a presentation to the Cabinet Secretary ninety 90

days before the end of each contract year a detailed report of the exploration work programme and a detailed budget for the next contract year. 3 The Cabinet Secretary may submit to the contractor within thirty 30 days of the receipt of the annual exploration work programme and budget suggested modifications and revisions thereof. The contractor shall consider the inclusion of such suggested modifications and revisions in light of best petroleum industry practice and shall provide the Cabinet Secretary with the exploration work programme and budget which the contractor has adopted. 4 After adoption of the annual exploration work programme and budget the contractor may make changes to that annual exploration work programme and budget if those changes do not materially affect the original objectives of that exploration work programme and budget and shall state the reasons for those changes to the Cabinet Secretary. 5 The agreed final work programme and budget shall be approved by the Cabinet Secretary in writing. 41 P a g e 28.

Discovery and Appraisal Work Programme 1 The contractor shall in accordance with section 641 of the Act notify the Cabinet Secretary of a discovery of petroleum and shall forthwith submit an initial discovery report with all relevant information to the Cabinet secretary not later than thirty 30 days after completion and testing of such exploration well. 2 If the contractor considers that the discovery merits appraisal it shall submit and orally present to the Cabinet Secretary within ninety 90 days following the date of submission of the discovery report a detailed statement of the appraisal work programme and budget which shall provide for the expeditious appraisal of the discovery and the provisions of subclauses 273 and 274 shall apply to the appraisal work programme and budget. 3 The Cabinet Secretary shall review the submitted appraisal programme and within ninety 90 days of submission the Cabinet Secretary may request for amendment of the appraisal programme. 4 After the appraisal work programme and budget have been adopted by the Cabinet Secretary the contractor shall within ninety 90 days evaluate the discovery and where appraisal warrants more time then the Cabinet secretary may upon request by the contractor extend such time for a period reasonably required to expeditiously complete appraisal work. 5 In the event of a discovery in the last year of the second additional exploration period the Cabinet Secretary shall at the request of the

contractor extend the term of the second additional exploration period in respect to the prospective area of the discovery and for the period of time reasonably required to expeditiously complete the adopted appraisal work programme and budget with respect to such discovery and to determine whether or not the discovery is commercial but in any event such extension to the second additional exploration period shall not exceed.. months. 6 The contractor shall not more than ninety 90 days after the appraisal is completed report to the Cabinet Secretary the commercial prospects of the discovery including all relevant technical and economic data. Including but not limited to location areal extent lateral extent thickness estimate of inplace and recoverable petroleum and their determination of whether 42 P a g e the discovery is commercial or whether further appraisal is required by submitting for approval to the cabinet secretary a supplementary appraisal report. 7 If the appraisal report relating to a particular discovery states that the contractor is of the opinion that the discovery is noncommercial the contractor and the Cabinet Secretaryshallmeet to discuss in good faith ways in which it might be possible to proceed with the development of such discovery on a commercial basis with the possibility of amending the terms of this contract but for avoidance of doubt the Cabinet Secretaryshall be under no obligation whatsoever to agree to any such amendments proposed by the contractor or vice versa. 8 If the contractor reports under subclause 286 that the discovery is a commercial discovery a development plan shall be submitted to the Cabinet Secretary for approval within one hundred and eighty 180 days of the completion of the appraisal work programme unless otherwise agreed and upon written application of the contractor the term of this contract shall be extended by the Cabinet Secretary ifnecessary in respect of the area of that commercial discovery provisionally established in accordance with the adoption of a development plan. 29. The Development Plan and Annual Work Programme and Budget 1 The field development plan shall be submitted by the contractor to the Authority for review which shall advice Cabinet Secretary for approval.This fielddevelopment plan shall bebased on sound engineering and economic principles and in accordance with best petroleum industry practice and considering the Maximum Efficient Rate of production appropriate to the commercial discovery. 2 The Development

Plan submitted by the contractor to the Cabinet Secretary shall contain details of the proposed development area relating to the commercial discovery which shall correspond as closely as possible to the extension of the discovered accumulation in the contract area as determined by the analysis of all the relevant available information. 3 Except with the consent of the Cabinet Secretary and without prejudice to the generality of subclause 291 the development plan shall include a

A description of the proposed commercial discovery in the development area that is identified for the development and management programme;

43 P a g e b Details of the following upstream petroleum operations

- i geologic seismic and geophysical exploration analysis and appraisal including production simulation profiles;
- ii proposed well locations and production treatment storage and transportation facilities to be located in the development area;
- iii spacing well construction drilling process casing and cement programs well logs completion methods and production operations of the wells required for production of petroleum in the development area;
- iv facilities for transporting petroleum from the Development Area to the Crude Oil Delivery Point and the Natural Gas Delivery Point;
- v identification of any alternative markets and sales of all petroleum resources especially natural gas;

c The initial production profiles for all petroleum reserves in the commercial discovery including the production life the commencement of production and the anticipated daily rates of petroleum production;

d The decommissioning plan in such detail as the Authority requires including in accordance with clause 17 a calculation of the quarterly accrual charges to be paid by the contractor to the decommissioning fund for individual well plugging and abandonment operations and overall field decommissioning costs;

e A detailed environmental impact assessment for the commercial discovery which identifies current and possible environmental issues and concerns and a plan for ensuring environmental compliance during the life of the field;

f A contractors proposal for ensuring the safety health security and welfare of persons and facilities in or about the proposed upstream petroleum operations;

g The contractors proposals for stimulating local including i maximizing the procurement and use of Kenyan goods and services inupstream petroleum operations to local communities;

44 P a g e ii identifying specific skills training programs and

technical courses that shall directly translate to the employment of citizens of Kenya and shall ensure occupational health and safety requirements fairness in gender practices and career advancement opportunities; iii coordination with stakeholders and local communities in open and timely posting of job descriptions and minimum skills requirements for employment to fully address local issues and concerns; h The contractors complete finance program for the Annual Development Work Programme and Budget; i Details and copies of all contracts agreements and arrangements for the sale of petroleum at the identified delivery point; j Such other data and information as the law requires and as the Cabinet Secretary otherwise requires and is relevant to the development plan. 4 The Authority and the contractor shall jointly consider the development plan within ninety 90 days of submission thereof and the Authority may within that period unless otherwise agreed submit suggested modifications justifications and revisions thereof. The contractor shall consider the inclusion of such suggested modifications and revisions in the light of best petroleum industry practice and the development plan shall be adopted by mutual agreement. 5 Where the Authority proposes no modifications and revisions the development plan of the contractor shall be adopted ninety 90 days after its submission unless it is adopted by mutual agreement of the parties before that period has elapsed. The ninety 90 days period for analysing the proposed development plan shall be extended for an additional period of up to ninety 90 days if the Authority so notifies the contractor. 6 After a development plan has been adopted the contractor shall proceed promptly and without undue delays to implement the development plan in accordance with best petroleum industry practice. The Annual Development Work Programme and Budget shall commence within one hundred and eighty 180 days from the date of adoption of the development plan. 7 In connection therewith the contractor shall submit and make a detailed presentation to the Cabinet Secretary and Authority prior to the first day of October of each year following the 45 P a g e adoption of the development plan a detailed report of the Annual Development Work Programme and Budget for the next calendar year and the provisions of subclauses 273 and 274 shall apply mutatis mutandis to any proposed revision to the development plan and to the Annual Development

Work Programme and Budget. 8 Where the development operations extend into the area to which the commercial discovery relates provided that the extension lies wholly within the contract area at that date subject to the advice by the Authority the Cabinet Secretary shall adjust the relevant development area to include that extension as determined by the analysis of all the relevant available data and information. 30. Unitization Where a petroleum deposit in a contract area extends beyond the said contract area the same shall be developed pursuant to a unitization agreement in accordance with section 72 of the Act. 31. Marginal and Noncommercial Discoveries 1 Where the contractor determines that a discovery is marginal or noncommercial the contractor may propose a modification to this contract based on an alternative economic evaluation and after consideration the Cabinet Secretary may accept or reject the proposed modification. 2 Unless otherwise agreed if the contractor fails to commence the evaluation of a commercial discovery within two 2 years following the notice of a commercial discovery or if within two 2 years following the completion of an evaluation work programme the contractor considers the commercial discovery does not merit development the Cabinet Secretary may request the contractor to surrender the area corresponding to such commercial discovery and the contractor shall forfeit any rights relating to any production therefrom. The area subject to such surrender shall not exceed the extension of the discovered accumulation as determined by the structural closure of the prospective horizon and all other relevant available information. Any such surrender by the contractor shall be credited in accordance with subclause 42 hereof. 46 P a g e 32. Natural Gas 1 The contractor shall have the right to use natural gas extracted from reservoirs within the contract area for the upstream petroleum operations in the contract area included but not limited to power generation pressure maintenance and recycling and reinjection operations. 2 The terms and conditions relating to the use and production of associated natural gas shall be as follows a In the event the contractor elects to process and sell associated natural gas the contractor shall notify the Government and for the purposes of cost recovery and entitlement of production such associated natural gas shall be treated by the parties in the same manner as other natural gas. b In the event the contractor elects

not to process and sell associated natural gas and where that natural gas is not used for the purposes specified in subclause 321 the Government may at the field separator process and utilize that natural gas without compensation but the Government shall pay for all costs and expenses related thereto which shall include but not be limited to any engineering studies new facilities and equipment required for the gathering transport processing and utilization thereof and the operations and maintenance of the same shall be at the sole risk cost and expense of the Government; provided that such offtake does not significantly disrupt or delay the conduct of the upstream petroleum operations. c The contractor may return associated natural gas not used for the purposes specified in subclause 321 taken by the Government pursuant to subclause 322b or sold by the contractor pursuant to subclause 322a to the subsurface structure and the costs of such reinjection shall be recoverable to the extent that such reinjection is included in the development plan. 3 The terms and conditions relating to the evaluation work programme and the commercial assessment of the production and sale of nonassociated natural gas shall be as follows a On completion of an evaluation work programme relating to a discovery of nonassociated natural gas made by the contractor the commercial assessment period in respect of such discovery shall if requested by the contractor commence for a period of years 47 P a g e exercisable at the sole option of the contractor. An extension may be granted upon application by the contractor to the Government for a second period of up to years. An appraisal report submitted under this clause 32 shall include the estimated recoverable reserves projected delivery rate and pressure quality specifications and other technical and economic factors relevant to the determination for available market for such nonassociated natural gas. The contractor shall at any time during the commercial assessment period inform the Government by notice that the petroleum reservoir located in any discovery of nonassociated natural gas made by the contractor in respect of which an appraisal report has been submitted is commercial. b If the contractor does not request for a commercial assessment period pursuant to clause 323a above within ninety 90 days from the date on which the appraisal report was submitted the contractor shall inform the Government by notice whether any discovery of

nonassociated natural gas made by the contractor in respect of which an appraisal report has been submitted is commercial. c Where the contractor pursuant to this clause 32 gives notice that any discovery of nonassociated natural gas made by the contractor is commercial that notice shall for the purpose of this contract be a notice of commercial discovery and processing and utilization shall follow a development plan approved in accordance with clause 29. 4 The commercial assessment period shall end on the first to occur of a the date following that on which the contractor gives a notice of commercial discovery under subclause 323; or b the date that the contractor voluntarily surrenders that portion of the contract area to which the commercial assessment period relates; or c expiry of the period to which contractor is entitled to under subclause 323. 5 The contractor shall be deemed to have relinquished all rights to the discovery of nonassociated natural gas if it has not given a notice of commercial discovery under subclause 323 by the end of the commercial assessment period or the earlier relinquishment of that portion of the contract area. 6 Where the discovery is a natural gas discovery the contractor shall 48 P a g e a prepare a report Market Evaluation Report identifying potential market for natural gas expected volumes for such market infrastructure potentially required to access such market expectations of price for the natural gas supplied to such market and identify options including time frames for marketing the natural gas within three 3 years after the discovery evaluation is completed. b be responsible for investigating market opportunities and shall seek to develop a market for nonassociated natural gas produced from any development area and shall sell such nonassociated natural gas on a joint dedicated basis on terms common to all the parties constituting the contractor. Every contract for the sale of such nonassociated natural gas made by the contractor under this clause 32 shall be subject to approval by the Cabinet Secretary. In applying for such approval the contractor shall demonstrate to the Cabinet Secretary that the prices and other terms of sale of such nonassociated natural gas represents the market value obtainable for such nonassociated natural gas taking into consideration a fair market cost for transporting such nonassociated natural gas from the delivery point to the purchaser and having regard to the alternative uses and markets that can be developed for such

nonassociated natural gas. 7 With its application for approval of any gas sales contract pursuant to subclause 325 the contractor may apply in respect of any development area from which nonassociated natural gas will be produced for sale under that gas sales contract for an extension of the development period specified in subclause 36 and where such extension is necessary to facilitate the sale of gas under any such gas sales contract the Cabinet Secretary shall grant such necessary extension. 8 Flaring of natural gas a Flaring of natural gas in the course of the activities provided for under this contract is prohibited except i shortterm flaring necessary for production testing ii when required for emergency or safety reasons or iii with the prior authorization of the Authority in each case in accordance with the Act regulations and best petroleum industry practices.

49 P a g e b The contractor shall submit such request to the Authority which shall include an evaluation of reasonable alternatives to flaring that have been considered along with information on the amount and quality of natural gas involved and the duration of the requested flaring. 33.

Production Levels and Annual Production Programme 1 The contractor shall produce petroleum at the maximum efficient rate and follow conservation of petroleum resources principles in accordance with best petroleum industry practice. 2 Prior to the first day of October of each year following the commencement of commercial production the contractor shall submit and orally present to the Cabinet Secretary and the Authority a detailed statement of the annual production programme and budget for the next calendar year and the provisions of subclause 273 and 4 shall apply to the Annual Production Programme and Budget. 3 The contractor shall endeavor to produce in each calendar year the forecast quantity estimated in the annual production programme. 4 The crude oil shall be run to storage constructed maintained and operated by the contractor and petroleum shall be metered or otherwise measured as required to meet the purpose of this contract in accordance with clause 34. 34. Measurement of Petroleum 1 The contractor shall prior to installation submit to the Authority for approval the processes procedures systems and technologies for determining the volume and quality of petroleum produced. 2 The instruments used for measuring petroleum produced shall be calibrated in accordance with the Weights and Measures Act. 3 The volume and

quality of petroleum produced and saved from the contract area shall be measured by methods and equipment customarily used in best petroleum industry practice and approved by the Authority. 50 P a g e 4 The Authority shall approve and inspect the methods and equipment used for measuring the volume and determining the quality of petroleum and shall appoint an inspector to supervise the measurement of volume and determination of quality of petroleum. 5 Where the method of measurement has caused an overstatement or understatement of a share of the production the error shall be presumed to have existed since the date of the last calibration of the measurement devices unless the contrary is shown and an appropriate adjustment shall be made for the period of error. 6 The Cabinet Secretary and the contractor shall determine when approving the development plan related to a commercial field the measurement point at which production shall be measured and the respective shares of petroleum allocated.

35. Valuation of Crude Oil and Natural Gas

1 The value of crude oil for all purposes under this contract shall be denominated in USDollars and shall be calculated each calendar year on a quarterly basis adjusted at the Crude Oil Delivery Point as follows a where there have been sales of crude oil produced from the contract area to third parties at arms length during that calendar quarter the value shall be the weighted average per unit price actually paid in those sales at the F.O.B. point of export or at the point that title and risk pass to the buyer adjusted for grade gravity and quality of such crude oil as well as for transportation costs and other appropriate adjustments for grade gravity and quality of such crude oil transaction where the seller and the buyer are independent of one another and do not have directly or indirectly any common interest; or b where there have been no sales of crude oil produced from the contract area to third parties at arms length during that calendar quarter the value shall be the fair market value determined as the average per unit prevailing market price actually paid during that calendar quarter in arms length sales for export under term contracts of at least ninety 90 days between unrelated purchasers and sellers for crude oil produced in Kenya and in the major crude oil producing countries and adjusted for grade gravity and quality of such crude oil as well as for transportation costs and any other appropriate adjustments. If necessary a value of crude oil shall be determined

separately for each crude oil or crude 51 P a g e oil mix and for each point of delivery. The value of crude oil shall be mutually agreed at the end of each calendar quarter and applied to all transactions that took place during the quarter. 2 Where the Cabinet Secretary and the contractor cannot reach an agreement on the value of crude oil within thirty 30 days of the end of any calendar quarter such determination shall be made by an internationally recognized expert appointed by the Cabinet Secretary in consultation with the Authority and the contractor but if they fail to agree within thirty 30 days on the appointment of such expert then by the Secretary General of the International Chamber of Commerce. The expert shall report his determination within twenty 20 days of his appointment and his determination shall be final and binding upon the Government and the contractor. 3 Pending the determination of the value of crude oil for a calendar quarter the value of crude oil determined for the preceding calendar quarter shall be provisionally applied to make calculation and payment during such calendar quarter until the applicable value for that calendar quarter is finally determined pursuant to subclause 351. Any adjustment to provisional calculation and payment if necessary shall be made within thirty 30 days after such applicable value is finally determined. 4 Natural gas shall be valued based on the actual proceeds received for sales provided that for sales of natural gas between the contractor and any affiliate the value of such natural gas shall not be less than the then prevailing fair market value for such sales of natural gas taking into consideration to the extent possible such factors as the market the quality and quantity of natural gas and other relevant factors reflected in natural gas pricing. The Cabinet Secretary shall have the right to review and approve natural gas sales contracts. 5 The Contractor shall deliver to the Cabinet Secretary and Authority monthly statements showing calculations of the value of petroleum produced and sold from the contract area which statement shall include but not limited to the following information a quantities of crude oil sold by the contractor during the preceding month constituting arms length sales together with corresponding sale prices; 52 P a g e b quantities of crude oil sold by the contractor during the preceding month to the contractor's related parties together with the corresponding sale prices; c inventory in storage belonging to the contractor at the beginning and at the end of the month; and d

quantities of natural gas sold by the contractor and the Government together with sale prices realized.

PART VII COST RECOVERY PRODUCTION SHARING TAXATION GOVERNMENT PARTICIPATION AND DOMESTIC SUPPLY OBLIGATIONS

36. Cost Recovery and Uplift

1 Subject to the provisions of this contract the contractor shall be entitled to recover the petroleum costs incurred and paid by the contractor pursuant to the provisions of this contract and duly entered in the contractor's books of accounts supplemented by the Uplift referred to in subclause 36.3 by taking and separately disposing of an amount equal in value to a maximum of sixty percent (60%) of each category of all petroleum produced from the contract area during that fiscal year and not used in upstream petroleum operations. Such cost recovery petroleum including the recovered Uplift is hereinafter referred to as Cost Petroleum consisting of two (2) categories: Cost Oil and Cost Gas.

2 The petroleum costs may be recovered in the following manner:

a The petroleum costs with the exception of development costs incurred in respect of the contract area shall be recoverable either in the fiscal year in which these costs are incurred or the fiscal year in which commercial production occurs whichever is the later; and

b Development costs incurred in respect of each development area shall be recoverable in five (5) fiscal years at an annual rate of twenty percent (20%) by straightline amortization at that rate starting either in the fiscal year in which such development costs are incurred or the fiscal year in which commercial production from that development area commences whichever is the later.

3 Paragraph c For the purpose of this clause development costs shall have the meaning referred to in the Accounting Procedure Appendix B.

d The development costs and production costs incurred in respect of a development area shall not be recoverable until commercial production from that development area commences.

e To the extent that in a fiscal year the petroleum costs and Uplift that are recoverable according to subclauses 36.2a, 36.2b and 36.3 exceed the value of all Cost Oil or Cost Gas for such fiscal year under subclause 36.1 the excess shall be carried forward for recovery by the contractor in the next succeeding fiscal year or fiscal years until fully recovered but in no case after the termination of this contract.

f To the extent that in a Fiscal Year the petroleum costs and the Uplift that are recoverable according to subclauses 36.2a, 36.2b and

363 are less than the maximum value of the Cost Petroleum as specified in subclause 361 the excess shall become part of and be included in the profit petroleum as provided for in subclause 37 hereafter. g For the purpose of valuation of Cost Oil and Cost Gas the relevant provisions of clause 35 hereof shall apply. h The cost recovery of petroleum and Uplift shall be recovered in the following priority order 1. Production Costs 2. Exploration Costs 3. Development Costs 4. Uplift 5. Decommissioning Costs i For the application of this contract the contractor shall keep detailed accounts of Cost Petroleum classified into Exploration Costs Development Costs Production Costs and Decommissioning Costs in accordance with the Accounting Procedure. j The petroleum costs under this contract are not recoverable against other contract areas held by the contractor in Kenya. k In the event that the contractor produces crude oil and natural gas from the contract area the petroleum costs incurred by the contractor shall be classified in the accounts as Cost Oil and 54 P a g e Cost Gas when required in accordance with the principles provided for in the Accounting Procedure. 3 An amount equal to fifteen percent 15 of the development costs related to a development area incurred and paid during a given fiscal year shall be referred to as Uplift for that development area and fiscal year. Such Uplift regarding the development costs of one fiscal year shall be recoverable under subclauses 361 and 362 in five 5 equal installments starting in the fiscal year in which the related development costs are incurred or the fiscal year in which commercial production for that development area commences whichever is the later. The Uplift shall be applicable only to the development costs incurred in the first five 5 fiscal years of an approved development plan starting the fiscal year of its date of approval. 37. Profit Petroleum Sharing and RFactor 1 Each category of the total petroleum produced and saved from the contract area and not used in upstream petroleum operations or commercial production less the Cost Petroleum as specified in subclauses 361 and 362 shall be referred to as the profit petroleum and each category of profit petroleum shall be shared taken and disposed of separately by the Government and the contractor on a quarterly basis according to the value of the RFactor in respect of the contract area as determined at the end of the preceding Calendar Quarter; or Petroleum Profit Commercial

Production Cost Petroleum i. The RFactor at a given date shall be calculated as follows whereby X is equal to the Contractors Cumulative Cash Inflows at the end of the preceding Calendar Quarter and Y is equal to the Contractors Cumulative Cash Outflows at the end of the preceding Calendar Quarter 55 P a g e or For purposes of the Rfactor determination in subclause 3711 Cumulative Cash Inflows at the end of the preceding Calendar Quarter are equal to Cumulative Contractor Cost Petroleum or Cost Petroleum from the Effective Date to the end of the preceding Calendar Quarter; plus Cumulative Contractor Profit Petroleum or Profit Petroleum from the Effective Date to the end of the preceding Calendar Quarter; minus Cumulative Production Costs or Production Costs from the Effective Date to the end of the preceding Calendar Quarter; minus Cumulative Decommissioning Costs or Decommissioning Costs from the Effective Date to the end of the preceding Calendar Quarter. or s Cumulative Cash Outflows at the end of the preceding Calendar Quarter are equal to Cumulative Exploration Costs or Exploration Costs from the Effective Date to the end of the preceding Calendar Quarter; plus Cumulative Development Costs or Development Costs from the Effective Date to the end of the preceding Calendar Quarter or 56 P a g e Cumulative Cash Outflows Exploration Costs Development Costs [Note the following calculation]; Development Costs 20 per year x 5 years [in subclause 362b] ii. The share of each category of Profit Petroleum to which each Party shall be entitled during a Calendar Quarter in relation to the value of the RFactor determined at the end of the preceding Calendar Quarter shall be equal to the quantities of crude oil and natural gas resulting from the application of the relevant percentage indicated below

Governments share	Contractors share	Rfactor
Less than 1.0	Equal to	or greater than 1.0 and less than 2.5
50	65	Equal to or greater than 2.5 [75]
50	35	[25]

iii. For each Quarter starting from the Quarter commercial production starts the contractor shall calculate the RFactor applicable to the relevant Quarter within thirty 30 days of the beginning of such Quarter and submit the determination to the Cabinet Secretary; iv. In the event that the contractor is unable to calculate the RFactor for the relevant Quarter before an allocation of Profit Oil or Profit Gas for such Quarter must be made then the percentage for allocation of Profit Oil and/or Profit Gas as the case may be for the previous

Quarter shall be used for the relevant Quarter; v. If the allocation of Profit Oil or Profit Gas as the case may be in the previous Quarter and the relevant Quarter is the same then no adjustment shall be made; vi. If the allocation of the Profit Oil or Profit Gas as the case may be in the two Quarters is different then the contractor shall make any adjustments to the Parties respective shares of Profit Oil or Profit Gas as the case may be to restore them to the position that they would have been in had the RFactor for the relevant Quarter been available from the start of such Quarter; and vii. If at any time an error occurs in the calculation of the RFactor resulting in a change in the percentage share of Profit Oil and/or Profit Gas the necessary correction shall be made and any adjustments shall apply from the Quarter in which the error occurred. The party having benefited from a surplus of Profit Petroleum shall surrender such surplus to the other Party beginning from the first day of the Quarter following the Quarter in which the error was recognized.

38. Production Sharing

1 Crude oil and natural gas production shall be respectively disaggregated into Cost Oil and Profit Oil and Cost Gas and Profit Gas using the relevant percentage calculated quarterly for Cost Petroleum in accordance with subclause 361 and for Profit Petroleum in accordance with subclause 364.

2 Cost Petroleum and Profit Petroleum calculations respectively disaggregated into Cost Oil Cost Gas Profit Oil and Profit Gas shall be done quarterly on an accumulative basis during a given fiscal year. To the extent that actual quantities costs and expenses are not known provisional estimates of such data based on the adopted annual production Work Programme and Budget under clause 33 shall be used.

3 Within sixty 60 days of the end of each Fiscal Year a final calculation of each category of Cost Petroleum and Profit Petroleum based on actual crude oil production and natural gas production in respect of that Fiscal Year and recoverable petroleum costs and Uplift shall be prepared and any necessary adjustments shall be promptly made.

4 If so directed by the Cabinet Secretary the contractor shall be obligated to lift and market part or the entire Government share of each category of Profit Petroleum and any Government or Appointee Participating Interest share of petroleum in a development area.

5 If any party fails to lift and market their share of petroleum the contractor may lift and market such party's share on its behalf.

6 When

the Cabinet Secretary elects not to take and receive in kind any part of a category of the Government share of Profit Oil the Cabinet Secretary shall notify the contractor three 3 months before the commencement of each semester of a calendar year specifying the quantity of production and such notice shall be effective for the ensuing semester. Any sale by the contractor of the Government share of Profit Oil shall not be for a term of more than one 1 year without 58 P a g e the Cabinet Secretarys consent. The contractor shall have the right and obligation to market the Governments share at the then prevailing fair market price. 7 The price paid by the contractor for the Government share of Profit Oil shall be the price established according to clause 35. The contractor shall pay the Government on a monthly basis such payments to be made within thirty 30 days after the end of the month in which the production occurred. 8 In the event of commercial production of natural gas the parties shall agree when the development plan related to such commercialization is adopted on the rules applicable to the disposal of the Government share of Profit Gas. 9 At a reasonable time prior to the scheduled date of commencement of commercial production the parties shall agree to procedures covering the scheduling storage and lifting of petroleum produced from and sold at the agreed upon Crude Oil Delivery Point and Natural Gas Delivery Point. 39. Taxation 1 The Contractor shall be subject to and shall comply with the requirements of the tax laws in force in Kenya. 2 In the event of any assignment or transfer of a participating interest under clause 47 the contractor or the entity within the contractor assigning or transferring an interest under this contract shall comply with the requirements of the income tax laws in force in Kenya imposing taxes on capital gains. 3 It is understood and agreed that the portion of each category of the Profit Petroleum which the Government is entitled to take and receive for a given fiscal year and which is calculated under clause 37 shall be exclusive of all taxes payable by the contractor. 4 The contractor agrees to pay and discharge as and when due such taxes due on its profit oil. The contractor shall prepare and file tax returns as provided for in the tax laws. The receipts shall be issued by the duly constituted authority for the collection of Kenya taxes. 5 In accordance with the laws of Kenya where the contractor consists of more than one entity the tax liabilities of each entity under this clause 39

shall be individual notwithstanding clause 59 Page 10 and the provisions of this clause 39 shall apply mutatis mutandis to each such entity including for filing an individual tax return or complying with any tax liabilities in respect of an assignment of an interest in the contract by a person.

40. Title and Risk to Petroleum

1 The title in the contractors share of petroleum shall pass to the contractor and risk therein shall remain with the contractor when it is delivered at the Crude Oil Delivery Point and the Natural Gas Delivery Point. Title in the Governments share of petroleum taken by the contractor pursuant to subclauses 386 5 6 and 7 shall pass to the contractor when it is delivered at the Crude Oil Delivery Point and the Natural Gas Delivery Point.

2 Notwithstanding subclause 401 petroleum shall be at the risk of the contractor until it is delivered at the Crude Oil Delivery Point and the Natural Gas Delivery Point. The contractor shall defend indemnify and hold harmless the Government from all claims asserted in respect of petroleum wherein the risk is with the contractor.

41. Government Participation

1 The Government may elect to participate in the upstream petroleum operations in any development area and acquire an interest of up to per cent . hereinafter referred to as Participating Interest of the total interest in that development area. The Government may participate either directly or through a National Oil Company.

2 The Government shall exercise the right to participate by giving notice to the contractor within one hundred and eighty 180 days from the date the development plan for a development area is adopted under subclause 294. Such notice shall specify the Participating Interest that the Government has elected in that development area. If the Government exercises its option to participate the contractor or each entity constituting the contractor prorata shall transfer to the Government that percentage interest specified by the Government. The Governments participation shall be effective from the date the development plan hereof is adopted.

3 If the Government exercises its right to participate in a development area the Government and the contractor shall execute the Participation Agreement in a format as prescribed in 60 Page Appendix C and made a part hereof within ninety 90 days after notice to the contractor under subclause 412.

4 The Government shall in exercise of its right to participate in a development area have the right to a vote in proportion to its participating interest with respect to all decisions

taken under the Participation Agreement; b own and separately take and dispose of its share in the petroleum produced and saved to which the contractor is entitled under this contract corresponding to its participating interest in that development area. The contractor shall not be obligated to market the Governments share of petroleum corresponding to the Governments participating interest in that development area; c assume its share of costs expenses and obligations incurred in respect of that development area from the effective date of its participation as defined in subclause 41.2 prorata in its participating interest; d own a participating interest share in all assets acquired for upstream petroleum operations in or related to the development area; e reimburse the contractor without interest prorata to the Government participating interest its share of all costs expenses and expenditure incurred in respect of the development area from the date the development plan for that development area has been adopted to the date the Government exercises its right to participate in that development area. This reimbursement shall be made within ninety 90 days after the Government exercises its right to participate.

42. Domestic Supply Obligations

1 The contractor shall have the obligation to supply in priority crude oil and/or natural gas for domestic consumption in Kenya and shall sell to the Government that portion of the contractors share of production which is necessary to satisfy the domestic supply requirement in accordance with the following provisions

2 In each calendar year the Cabinet Secretary shall notify the contractor not less than ninety 90 days prior to the beginning of that calendar year of the domestic supply requirement.

61 Page

The maximum amount of crude oil and/or natural gas that the Government may require from the contractors share of production shall be calculated each calendar quarter and shall be equal to the excess of total crude oil and/or natural gas domestic consumption in Kenya multiplied by a fraction the numerator of which is the average crude oil and/or natural gas production from the contract area and the denominator of which is the total crude oil and/or natural gas production from all producers in Kenya over the amount of crude oil and/or natural gas available to the Government from the contract area as in the form of Government share of production under clause 38 and in the form of Government participation share under clause 41. For the purpose of this subclause domestic

consumption does not include crude oil and/or natural gas refined in Kenya for export. 3 When the contractor is obligated to supply crude oil or natural gas for domestic consumption in Kenya the price paid by the Government shall be calculated in accordance with clause 35. Such sales to the Government shall be invoiced monthly and shall be paid within sixty 60 days of receipt of the invoice unless other terms and conditions are mutually agreed. 4 With the written consent of the Cabinet Secretary the contractor may comply with this clause by importing crude oil or natural gas and recovery of the same amount from subsequent production but appropriate adjustments shall be made in price and volume to reflect transportation costs differences in quality gravity and terms of sale. 5 In this clause Government includes an Appointee as defined herein and contractor does not include the Government where the Government has participated under clause 41. 6 In the event that natural gas can be produced from the contract area the obligation of the contractor to supply natural gas to the domestic market shall be agreed upon by the parties when approving the development plan related to such gas production after taking into consideration to the extent possible principles similar to those provided for in subclauses 421 and 2. 62 P a g e BOOKS ACCOUNTS AUDITS IMPORTS EXPORTS AND FOREIGN EXCHANGE PART VIII 43. Books Accounts and Audits 1 The contractor shall keep books and accounts in accordance with the accounting procedure and shall submit to the Cabinet Secretary and Authority a statement of those accounts not more than ninety 90 days after the end of each calendar year. 2 The contractor shall appoint an independent auditor of international standing approved by the Government to audit annually the books and accounts of the contractor and report thereon; and the cost of such audit shall be at the charge of the contractor and considered as recoverable cost. 3 The Government may audit the books and accounts within seven 7 calendar years of the period to which they relate and shall complete that audit within two 2 calendar years. 4 In the absence of an audit within seven 7 calendar years or in the absence of notice to the contractor of a discrepancy in the books and accounts within eight 8 calendar years of the period to which the audit relates the contractor's books and accounts shall be deemed correct. 5 Nothing in this clause shall be construed as limiting the right of the Government or Officer of

Government or a Government Agency pursuant to any power granted by law to audit or cause to be audited the books of any contractor or operator. 44. Exports and Imports 1 Save for the petroleum to be delivered to the Government pursuant to the terms of this contract the contractor shall own and receive its share of petroleum produced from the contract area and shall be entitled to export such petroleum or to otherwise dispose of the same subject to the limitations and conditions set out in the East African Community Customs Management Act 2004; the Customs and Excise Act; the Value Added Tax Act; and any other tax law in force in Kenya. The change of ownership of crude oil will occur at the Crude Oil Delivery Point and the change of ownership of natural gas will occur at the Natural Gas Delivery Point. 63 P a g e 2 The contractor and its subcontractors engaged in carrying out upstream petroleum operations under this contract shall be permitted subject to the limitations and conditions set out in East African Community Customs Management Act 2004 the Customs Excise Act and the Value Added Tax Act to import into Kenya all materials equipment and supplies including but not limited to machinery vehicles consumable items movable property and any other articles to be used solely in carrying out upstream petroleum operations under this contract. However the contractor and its subcontractors shall give preference to Kenyan goods and services in accordance with clause 22 hereof. In relation to materials equipment and supplies imported or to be imported pursuant to subclause 44.2 when the Authority or his representative has certified that they are to be used solely in carrying out upstream petroleum operations under this contract the contractor and its subcontractors shall make such imports subject to a approval of import licence; b exchange control approval subject to the provisions of clause 45 hereof; or f independent inspection outside of Kenya by general superintendence or other inspecting body appointed by the Government. 3 The actual costs of contracts for technical and other services entered into by the contractor for upstream petroleum operations and for materials purchased by the contractor for use in upstream petroleum operations shall be recoverable provided that those services and materials are reasonably required for upstream petroleum operations and provided further that the prices paid by the contractor are no higher than those currently prevailing in normal arms length transactions of

the open market for comparable services and materials. 4 The contractor and its subcontractors may sell in Kenya all imported items which are no longer needed for upstream petroleum operations. However if such imports were exempt from customs duty and VAT the seller shall fulfill all formalities required in connection with the payment of duties taxes fees and charges imposed on such sales. 5 Subject to subclauses 134 and 135 a contractor and its contractors and subcontractors may export from Kenya subject to applicable tax laws all previously imported items which are no longer required for the conduct of upstream petroleum operations under this contract. 64 P a g e 6 In the event that equipment and materials are required for subsequent upstream petroleum operations by another contractor in another contract area other than the contract area for which they were imported a permit may be issued by the relevant authority upon application by the contractor for such equipment and materials to be used for the purpose stated. 7 Customs duties as that term is used herein shall include all duties taxes on imports except those charges paid to the Government for actual services rendered which are payable as a result of the importation of the item or items under consideration. 45. Exchange and Currency Controls 1 As long as the contractor meets its obligations to the Government in terms of tax payments or any other payments contemplated by this contract and as long as the contractor complies with subclause 452 hereafter and is not in a material breach with this contract the Government shall by appropriate legal notice grant the contractor upon the effective date of this contract the freedom to a open and freely maintain accounts inside Kenya and foreign bank accounts outside Kenya in accordance with Central Bank of Kenya the Bank laws and regulations issued under the Exchange and Currency control laws of Kenya; b receive retain outside Kenya and freely dispose of foreign currencies received by it outside Kenya including the proceeds of sales of petroleum hereunder and a contractor shall not be obligated to remit such proceeds to Kenya with the exception of those proceeds as may be needed to meet in Kenya its expenses and payments to the Government; c pay directly outside Kenya for purchases of goods and services necessary to carry out upstream petroleum operations hereunder; d pay its expatriate employees working in Kenya in foreign currencies outside of Kenya. Such expatriate employees shall be only

required to bring into Kenya such foreign exchange as required to meet their personal living expenses and to meet payments of Kenyan taxes; 65 P a g e e freely repatriate abroad all proceeds from the contractors upstream petroleum operations in Kenya including but not limited to proceeds from the sale of assets and Petroleum; and f have rates of exchange for purchase or sale of currency in Kenya not less favourable to the contractor than those granted to any investor in Kenya.

2 In order to keep the Government and the the Bank informed of its prospective and actual foreign exchange transactions the contractor shall inform the Government and the Bank in writing and in such form and detail as the Government or the Bank may request a of the location of the contractors bank accounts in Kenya and abroad which latter accounts shall be opened in banks approved by the Bank; b annually before the commencement of each calendar year of the contractors estimated receipts and disbursements of foreign exchange by principal headings during the year which statement may be amended from time to time if this appears necessary; and c quarterly within thirty 30 days of the end of each calendar quarter of the contractors actual receipts and disbursements of foreign exchange by principal headings during the preceding quarter. 3 Subject to the obligation to give preference to Kenyan goods and services as stipulated under clause 22 the contractor shall have the right to enter all contracts and subcontracts necessary to carry out upstream petroleum operations without prior approval by the Bank or any other Government agency. The Government reserves the right to inspect the records or documentation related to such contracts and subcontracts and in accordance with clause 43 to appoint independent auditors to examine the accounts of the contractor and the contractor shall provide a copy of such contracts within thirty 30 days after their execution provided however that where the Government disputes anything in the contracts the value in dispute shall not be included until the dispute has been resolved in respect of a the qualifying expenditure under the Income Tax laws and regulations; b the Certificate of Approved Enterprise; and d the qualifying payment under the Exchange and Currency control laws and regulations. 66 P a g e 4 The Government shall grant to the contractor a Certificate of Approved Enterprise in accordance with the Foreign Investments Protection laws of Kenya. The amount

recognized by the certificate as having been invested shall be the actual amount for the time being invested by the contractor as set forth in its books of account maintained and audited in accordance with this contract provided however that the contractor shall not repatriate any proceeds of sale of an asset forming part of either a qualifying expenditure under the Income Tax laws and regulations; b any asset subject to a Certificate of Approved Enterprise without written approval and the necessary amendments to the relevant certificate. Proceeds arising from any other source may be repatriated after the Government has certified that such repatriation is in order. PART IX GENERAL

46. Payments 1 All sums due to the Government or the contractor shall be paid in USD or other currency agreed to by the Government and the contractor. 2 Any late payment due to the Government shall attract interest at the rate of LIBOR plus three percent 3 per annum. 47.

Assignment 1 After notice to the Cabinet Secretary the contractor may assign part or all of its rights and obligations under this contract to an affiliate with the prior approval of the Cabinet Secretary provided such assignment shall result in the assignor and the assignee being jointly and severally liable for all of the assignors obligations hereunder. 2 The contractor may assign to a person other than an affiliate part or all of its rights and obligations under this contract and other direct and indirect transfers of interest or participation in the contract may be transferred in each case with the consent of the Cabinet Secretary which consent shall not be unreasonably withheld and which shall be granted or refused within ninety90 days of receipt by the Cabinet Secretary of notice from the 67

P a g e contractor that it intends to make such an assignment but the Cabinet Secretary may require such an assignee to provide a guarantee for the performance of the obligations of the contractor. 3 The contractor shall report to the Cabinet Secretary any material changes in the corporate structure ownership and financial position of the contractor and its parent company. 4 The contractor shall report to the Cabinet Secretary any Change in Control in its corporate structure including a Change in Control outside Kenya arising by acquisition or exchange of shares which shall be deemed and treated as an assignment within Kenya for the purposes of clause 47. Any Change in Control shall be subject to the prior consent of the Cabinet Secretary. 5 The contractor shall furnish to the

Cabinet Secretary copies of all agreements and deeds related to an assignment. 6 At any time at which the contractor is constituted by more than one entity the reference in clause 47 to the Contractor shall be construed as a reference to each one of those entities. 7 Any assignment pursuant to this clause shall be fully disclosed by the assignor to the Kenyan tax authority. Any tax arising from any assignment pursuant to the Income Tax Act shall be paid by the assignor in the manner specified in the Income Tax Act. 8 An assignment under clause 47 means any assignment or transfer sale or merger directly or indirectly including by Change in Control of any right power or interest in the contract area and this contract.

48. Manager Advocate and Joint Operation Agreement

1 The contractor shall notify the Cabinet Secretary before the upstream petroleum operations begin of the name and address of the person resident in Kenya who will supervise the upstream petroleum operations and prior notice of any subsequent change shall be given to the Cabinet Secretary.

2 The contractor shall appoint an advocate resident in Kenya with power of representation in all matters relating to this contract of which appointment the Cabinet Secretary shall be notified before the upstream petroleum operations begin and prior notice of any subsequent change shall be given to the Cabinet Secretary.

68 P a g e

3 Where the contractor consists of more than one person the contractor shall deliver to the Cabinet Secretary a copy of the Joint Operating Agreement between those persons.

4 The appointment of an operator by a contractor and any change in operator shall be subject to prior approval by the Cabinet Secretary.

49. Confidentiality

1 All information including the data samples and reports referred to in clauses 14 and 15 which the contractor may supply to the Government under this contract shall be supplied at the expense of the contractor.

2 The parties shall keep the information that the other party may supply under this contract confidential and shall not disclose it to any other person other than to a person employed by or on behalf of the party except where such information is required to be published in accordance with the provisions of the Constitution or by a lawful order issued by a court of competent jurisdiction to disclose except with the consent of the other party which consent shall not unreasonably be withheld.

3 Notwithstanding subclause 49.2 the Cabinet Secretary may use any information supplied

for the purpose of preparing and publishing reports and returns required by law and for the purpose of preparing and publishing reports and surveys of a general nature. 4 The Cabinet Secretary may publish any information which relates to a surrendered area at any time after the surrender and in any other case three 3 years after the information was received unless the Cabinet Secretary determines after presentation by the contractor that a longer period shall apply. 5 This contract is a public document and the Government shall have the right to publish and keep it publicly available. The Government may publish such information concerning this contract as may be required by the laws of Kenya including for purposes of obtaining ratification of the contract by Parliament in accordance with Article 71 of the Constitution or in accordance with internationally accepted standards and norms concerning transparency in the extractive industries.. 69 P a g e 50. Force Majeure 1 In this clause force majeure means an occurrence beyond the reasonable control of the Cabinet Secretary or the Government or the Authority or the contractor which prevents any of them from performing their obligations under this contract. 2 Where the Cabinet Secretary the Government or the contractor is prevented from complying with this contract by force majeure the person affected shall promptly give written notice to the other and the obligations of the affected person shall be suspended provided that that person shall do all things reasonably within its power to remove such cause of force majeure. Upon cessation of the force majeure event the person no longer affected shall promptly notify the other persons. 3 Where the person not affected disputes the existence of force majeure that dispute shall be referred to arbitration in accordance with clause 53. 4 Where an obligation is suspended by force majeure for more than one 1 year the parties may agree to terminate this contract by notice in writing without further obligations. 5 Subject to subclause 504 the term of the contract shall be automatically extended for the period of the force majeure. 51. Waiver A waiver of an obligation of the contractor shall be in writing signed by the Cabinet Secretary and no waiver shall be implied if the Cabinet Secretary does not exercise a remedy under this contract. 52. Governing Law 1 This contract shall be governed by interpreted and construed in accordance with the Laws of Kenya. 2 The contractor agrees that it shall obey and

abide by all laws and regulations in force in Kenya. 3 If after the effective date of this contract the economic benefits of a party are substantially affected by the promulgation of new laws and regulations or of any amendments to the applicable laws and regulations of Kenya the parties shall agree to make the necessary 70 P a g e adjustments to the relevant provisions of this contract observing the principle of the mutual economic benefits of the parties. 4 Nothing in this clause shall be interpreted as imposing any limitation or constraint on the scope or due and proper enforcement of the laws of Kenya of general application and which are in the interest of health safety conservation or the protection of the environment for the regulation of any category of property or activity carried on in Kenya; provided however that the Government shall at all times during the conduct of upstream petroleum operations ensure in accordance with clause 16 that measures taken in the interest of health safety conservation or the protection of the environment are in accordance with best petroleum industry practices. 5 The decisions of the Cabinet Secretary under the contract shall be taken and made in accordance with the provisions of the Act and regulations.

Amicable Settlement 53. Dispute Resolution 1 Except as otherwise provided in this contract any difference or dispute arising out of or in relation to or in connection with this contract shall as far as possible be settled amicably. If any difference or dispute remains unresolved either party shall have the right to serve upon the other party a detailed statement stating the issues in dispute. Within fourteen 14 days of receipt of the statement or other mutually agreed period the Cabinet Secretary and the chief executive of the contractor shall meet to resolve the difference or dispute. Where no settlement is reached within thirty 30 days from the date of the meeting either party shall have the right subject to clause 2 to have such difference or dispute be resolved through arbitration in accordance with UNCITRAL arbitration rules adopted by the United Nations Commission on International Trade Law. Expert Determination 2 In lieu of resorting to arbitration the Cabinet Secretary and the contractor where they consider appropriate by mutual agreement may refer the dispute for determination by a sole expert to be appointed by agreement of the parties. In such case the parties shall agree on the terms of reference for the expert determination schedule and other

procedural matters. The decision of the sole expert shall be final and binding. The sole expert shall make a determination within ninety 90 days of his appointment. Where the sole expert fails to make a determination within the allotted time either party may call for the matter to be resolved through arbitration as provided herein below.

Arbitration 3 The arbitration procedure shall commence by a written request of either party applicant party to the UNCITRAL with a simultaneous notification to the other party. The arbitration proceedings shall commence within sixty 60 days of the date of receipt of that request by the UNCITRAL.

4 The number of arbitrators shall be three 3 and shall be appointed as follows a each party shall appoint one 1 arbitrator and so notify the other party and the Secretariat of the UNCITRAL of such appointment within thirty 30 days of the expiry of the period specified in subclause 533. b where the applicant party fails to appoint its arbitrator within the thirty 30 day period it shall be deemed to have abandoned its application. c where the defending party has not appointed its arbitrator within thirty 30 days following the receipt of the notice the applicant party may request the UNCITRAL to appoint an arbitrator within thirty 30 days of the date of receipt of that request by the UNCITRAL. d within forty five 45 days after the appointment of the last arbitrator the two arbitrators shall select by mutual agreement a third arbitrator who shall be designated as the chairman of the arbitral tribunal. e where the two arbitrators fail to select the third arbitrator either party may request in writing the Secretary General of the International Centre for Settlement of Investment Disputes to appoint the third arbitrator. The Secretary General shall forthwith send a copy of that request to the other party. The Secretary General shall comply with the request within thirty 30 days from the receipt thereof or such longer period as the parties may agree. The Secretary General shall promptly notify the parties of any appointment or designation made by him pursuant to the aforesaid request.

72 P a g e 5 The arbitrators shall not be of the same nationality as either of the parties. If any arbitrator fails or is unable to act his successors shall be appointed in the same manner as the arbitrator whom he succeeds.

6 The arbitrators shall hear and determine the matter within ninety 90 days of the appointment of the third arbitrator. The decision of the majority of the arbitrators shall be final and binding on the parties and shall be enforceable under

the laws of the Republic of Kenya. Any party may apply to a court of competent jurisdiction for enforcement of such award. The arbitration award may take the form of an order to pay a sum of money or to perform an act or to refrain from an act or any combination of such orders. Notwithstanding the foregoing a party is entitled to seek preliminary injunctive relief or interim or conservatory measures from any court of competent jurisdiction pending the final decision or award of the arbitrators. 7 The place of arbitration proceedings shall be Nairobi Kenya. The language used for the proceedings shall be English language. 8 The applicable laws shall be the laws of the Republic of Kenya and the provisions of this contract shall be interpreted in accordance with those laws. 9 Each party shall pay for its own counsel and other costs however the cost of the arbitral tribunal shall be allocated in accordance with the decision of the arbitral tribunal. The costs of the sole expert shall be borne equally by both parties. The costs incurred in arbitration or the sole expert determination shall not be recoverable costs under the contract. 10 The parties shall continue to perform their respective obligations under the contract during any sole expert or arbitration proceedings. 11 The right to arbitrate differences or disputes arising out of this contract shall survive the termination of this contract.

1. PART I GENERAL PROVISIONS The purpose of this accounting procedure is to establish methods and rules of accounting for upstream petroleum operations and the principles set forth herein shall apply to upstream petroleum operations pursuant to the production sharing contract hereinafter referred to as the Contract to which this Appendix is attached.

1.1. INTERPRETATION 1.1.1. DEFINITIONS controllable material means material which the operator subjects to record control and inventory. A list of types of such material shall be furnished to the Government and nonoperators; joint account means the set of accounts maintained by the operator to record all expenditure and other transactions under the provisions of the contract. Such accounts will distinguish between exploration evaluation development decommissioning and production costs. After adoption of a development plan a separate joint account shall be maintained for each development area; joint property means all property acquired and held in connection with upstream petroleum operations under the contract; material means personal property including supplies and equipment acquired and held for use in upstream petroleum operations; 78 P a g e nonoperators means the entities constituting the contractor other than the operator and the Government when it participates. Words not defined herein but which are defined in the contract shall have the meanings ascribed to them therein.

1.1.2. PRECEDENCE OF DOCUMENT In the event of conflict between the provisions of this accounting procedure and the provisions of the contract the provisions of the contract shall prevail.

1.2. ACCOUNTING OBLIGATIONS OF THE CONTRACTOR 1.2.1. The contractor shall maintain financial accounts necessary to record in reasonable detail the transactions relating to upstream petroleum operations which shall be prepared in accordance with the International Financial Reporting Standards IFRS. 1.2.2. Within ninety 90 days after the Effective Date the contractor shall submit for approval to the Cabinet Secretary and discuss with the Cabinet Secretary and the Kenyan tax authorityies a proposed outline of a chart of accounts detailed classification of costs costs centres books records statements

and reports to be established in accordance with the Contract and this accounting procedure. Following such discussion and approval the contractor shall provide copies of the comprehensive charts of accounts and the manuals to be used which may be revised from time to time by mutual agreement. 1.2.3. The contractor shall provide details of the financial accounts in the form of monthly statements which shall a reflect all charges and credits related to upstream petroleum operations; b be prepared on an accrual basis so that expenditure is recorded as incurred when title to goods passes or when work is executed; and c present the total accounts for the contract area and each development area and the share of each nonoperator. 1.2.4. In addition when the contractor is constituted by more than one entity each such entity shall provide details of its financial accounts related to the upstream petroleum operations. 79 P a g e 1.3. LANGUAGE AND UNITS

OF ACCOUNTS 1.3.1. All books and accounts shall be maintained in the English language United States Dollars and Kenya Shillings provided that the United States Dollar accounts will prevail in case of conflict. Where necessary for clarification the contractor may also maintain accounts and records in other language and currencies. 1.3.2. It is the intent of this accounting procedure that neither the Government nor the contractor should experience an exchange gain or loss at the expense of or to the benefit of the other. However should there be any gain or loss from exchange of currency it shall be credited or charged to the accounts under the contract. 1.4. AUDITS AND

INSPECTION RIGHTS OF THE GOVERNMENT 1.4.1. The Government upon thirty 30 days advance written notice to the contractor shall have the right at its sole expense to audit the joint account and related records for any calendar year or portion thereof within the seven 7 year period following the end of such year. Notice of any exception to the contractors accounts of any calendar year must be submitted to the contractor within eight 8 years from the end of such year. 1.4.2. For purposes of auditing the Government may examine and verify at reasonable times all charges and credits relating to the upstream petroleum operations such as books of account accounting entries material records and inventories vouchers payrolls invoices and any other documents correspondence and records necessary to audit and verify the charges and credits. Furthermore the

auditors shall have the right in connection with such audit to visit and inspect at reasonable times all sites plants facilities warehouses and offices of the contractor directly or indirectly serving the upstream petroleum operations including visiting personnel associated with those operations. 1.4.3.

All agreed adjustments resulting from an audit shall be rectified promptly in the contractors accounts and any consequential adjustments to payments due to the contractor or the Government as the case may be shall be made promptly. Any unresolved dispute arising in connection with an audit shall be referred to arbitration in accordance with clause 53 of the contract and until such dispute is resolved the contractor shall maintain the relevant documents in connection with such unresolved dispute and shall permit inspection thereof. 1.4.4. Disputes relating to tax shall be resolved through the tax disputes resolution processes as provided in the relevant tax laws. 1.4.5.

The contractor shall appoint an independent auditor of international standing approved by the Cabinet Secretary to audit annually the accounts and records of upstream petroleum operations and report thereon and the cost of such audit and report shall be chargeable to the joint account. 1.5.

REVISION OF ACCOUNTING PROCEDURE 1.5.1. By mutual agreement between the Government and the contractor this accounting procedure may be revised from time to time by an instrument in writing signed by both the parties. 1.5.2. The parties agree that if any procedure established herein proves unfair or inequitable to any party the parties shall meet and in good faith agree on the changes necessary to correct that unfairness or inequity. 2. **PART II CLASSIFICATION OF EXPENDITURES AMONG COST CENTRES**

2.1. The detailed categories of petroleum costs shall be agreed pursuant to subclause 1.2.2 of this Annex B and shall include the following main categories 2.1.1. exploration costs incurred for exploration operations; 2.1.2. development costs incurred for development operations; 2.1.3. production costs incurred for production operations; 2.1.4. decommissioning costs incurred for decommissioning operations; 2.1.5. Uplift. 2.2. Exploration costs in respect of the contract area are those costs which relate to exploration operations incurred in accordance with an approved annual exploration and appraisal work programmes and budget. They include for the purposes of accounting the evaluation operations in

respect of a discovery. 81 P a g e 2.3. Development costs in respect of a development area are those costs incurred in respect of the activities carried out in accordance with an approved development plan and the relevant annual development work programmes and budgets and consists of 2.3.1. Before the commencement of commercial production in a development area those costs whether of a capital or operating nature which relate to development operation; and 2.3.2. From the commencement of commercial production in a development area those costs of a capital nature only which relate to the continuation of the development of the commercial discovery and investments for the recovery of petroleum from such discovery. 2.4. Production costs in respect of a development area are those costs of an operating nature only excluding development costs and decommissioning costs which relate to production operations carried out from the commencement of commercial production in respect of such development area in accordance with approved annual production work programmes and budgets. 2.5. Decommissioning costs in respect of a development area are those costs or contributions to the decommissioning fund related to abandonment and decommissioning operations set out in clause 17 of the Contract. 2.6. The Petroleum costs in each category of costs that cannot be related to a certain area and the general and administrative costs referred to in Part III shall be allocated to categories of costs and to area in accordance with the approved methods set out in subclause 2.7 and 2.8. 2.7. The petroleum costs shall be allocated among the categories of upstream petroleum operations in the following manner 2.7.1. Exploration operations subdivided further into 2.7.1.1. Aerial geological geochemical and other surveys; 2.7.1.2. Each individual seismic survey; 2.7.1.3. Each individual exploratory well or appraisal well; 2.7.1.4. Infrastructure such as roads airstrips; 82 P a g e 2.7.1.5. Support facilities such as warehouses including an allocation of common service costs costs related to various upstream petroleum operations; 2.7.1.6. An allocation of the general and administrative costs; and 2.7.1.7. The exploration operations; 2.7.2. Development operation up to the delivery points subdivided further into 2.7.2.1. Aerial geological geochemical geophysical and other surveys; 2.7.2.2. Each individual development well; 2.7.2.3. Flow lines and gathering lines; 2.7.2.4. Field facilities; 2.7.2.5. Tank farms

and other storage facilities for petroleum; 2.7.2.6. Pipelines and trunks; 2.7.2.7. Infrastructure; 2.7.2.8. Support facilities including an allocation of common service costs costs related to various upstream petroleum operations; 2.7.2.9. An allocation of the general and administrative costs; and 2.7.2.10. Other development operations including engineering and design studies. 2.7.3. Production operations subdivided in the same manner as development operations. 2.7.4. Decommissioning operations subdivided in the same manner as development operations. 2.8. Petroleum costs shall be allocated to crude oil and natural gas where both products are being produced and saved. Such allocation shall be made in accordance with the following principles 2.8.1. Where costs are exclusively related to either crude oil or natural gas such costs shall be allocated completely to the respective category. 2.8.2. Where costs can be attributed to both crude oil and natural gas the costs shall be allocated pursuant to the method agreed by the parties in accordance with best petroleum industry practices.

83 P a g e

3. PART III COSTS EXPENSES EXPENDITURE AND CREDITS OF THE CONTRACTOR AND NONRECOVERABLE COSTS

Subject to the provisions of the contract the contractor shall bear and pay the following costs and expenses necessary to conduct upstream petroleum operations. Such petroleum costs are recoverable by the contractor in accordance with the provisions of the contract when incurred under approved annual Work Programmes and Budgets and duly entered in the Joint Account.

3.1. LABOUR AND RELATED COSTS

3.1.1. Salaries and wages of employees of the operator and its affiliates for portion of their time spent performing management administrative legal accounting treasury tax employee relations computer services engineering geological geophysical and all other functions for the benefit of petroleum operation whether temporarily or permanently assigned to the contract area as well as the cost of employee benefits customary allowances and personal expenses incurred under the usual practice of the operator and its affiliates and amounts imposed by governmental authorities which are applicable to such employees.

3.2. MATERIAL

3.2.1. The cost of material equipment and supplies purchased or furnished by the operator for use in upstream petroleum operations shall be charged to the joint account on the basis set forth below. So far as it is reasonably practical and consistent with efficient

and economical operations only such material shall be purchased for or transferred to the joint property as may be required for immediate use and/or for approved work programmes and the accumulation of surplus stock shall be avoided. 3.2.1.1. Except as otherwise provided in subclause 3.2.1.2 below material purchased leased or rented shall be charged at the actual net cost incurred by the operator. Net cost shall include but shall not be limited to such items as vendors invoice price transportation duties fees and applicable taxes less all discounts actually received. 3.2.1.2. Material purchased or transferred from the contractor or its affiliates shall be charged at the prices specified here below 84 P a g e 3.2.1.2.1. New material condition A shall be valued at the current international net cost which shall not exceed the price prevailing in normal arms length transactions on the open market; 3.2.1.2.2. Used material conditions B C and D 3.2.1.2.2.1. material which is in sound and serviceable condition and is suitable for reuse without reconditioning shall be classified as condition B and priced at seventyfive per cent 75 of the current price of new material defined in clause 3.2.1.2.1 above; 3.2.1.2.2.2. material which cannot be classified as condition B but which after reconditioning will be further serviceable for its original function shall be classified as condition C and priced at fifty percent 50 of the current price of new material as defined in clause 3.2.1.2.1 above. The cost of reconditioning shall be charged to the reconditioned material provided that the value of condition C material plus the cost of reconditioning do not exceed the value of condition B material; 3.2.1.2.2.3. material which cannot be classified as condition B or condition C shall be classified as condition D and priced at a value commensurate with its use. 3.2.2. INVENTORIES 3.2.2.1. At reasonable intervals inventories shall be taken by the operator of allcontrollable material. The operator shall give ninety 90 days written notice of intention to take such inventories to allow the Cabinet Secretary and nonoperators to be represented when any inventory is taken. Failure of any party to be represented after due notice given shall bind such party to accept the inventory taken by the operator. 3.2.2.2. The operator shall clearly state the principles upon which valuation of the inventory has been based. 3.2.2.3. Whenever there is a sale or change of interest in the joint property a special inventory may be taken by the operator provided the seller and/or purchaser of

such interest agrees to bear all of the expense thereof. In such cases both the seller and the purchaser shall be entitled to be represented and shall be governed by the inventory so taken. 85 P a g e

3.3. TRANSPORTATION AND EMPLOYEE RELOCATION COSTS

3.3.1. Transportation of material and other related costs such as origin services expediting crating dock charges forwarders charges surface and air freight and customs clearance and other destination services.

3.3.2. Transportation of employees as required in the conduct of upstream petroleum operations including employees of the operators affiliates whose salaries and wages are chargeable under subclause 3.1.1 and 3.4.2.

3.3.3. Relocation costs of the contract area vicinity of employees permanently or temporarily assigned to upstream petroleum operations. Relocation costs from the contract area vicinity except when an employee is reassigned to another location classified as a foreign location by the operator. Such costs include transportation of employees families and their personal and household effects and all other relocation costs in accordance with the usual practice of the operator and its affiliates.

3.4. SERVICES

3.4.1. The actual costs of contract services professional consultants and other services performed by third parties other than services provided by the contractor or its affiliates but the prices paid by the contractor shall not be higher than those generally charged for comparable services.

3.4.2. Costs of technical services such as but not limited to engineering and related data processing performed by the contractor and its affiliates for the direct benefit of upstream petroleum operations engineering and related data processing performed by the contractor provided such costs shall not exceed those currently prevailing if performed by third parties in normal arms length transaction for like services.

3.4.3. Costs of use of equipment and facilities for the direct benefit of the upstream petroleum operations furnished by contractor or its affiliates at rates commensurate with the cost of ownership or rental and the cost of operation thereof but such rates shall not exceed those currently prevailing in the general vicinity of the contract area in normal arms length transactions on the open market for like services and equipment.

86 P a g e

3.5. DAMAGES AND LOSSES TO JOINT PROPERTY

3.5.1. All costs or expenses necessary for the repair or replacement of joint property resulting from damages or losses

incurred by fire flood storm theft accident or any other cause except insofar as those costs and expenses are caused by the willful misconduct of the operator. The operator shall furnish the Government and nonoperators written notice of damages or losses for each damage or loss in excess of fifty thousand U.S. dollars U.S.50000 as soon as the loss has come to the notice of the contractor.

3.6. INSURANCE 3.6.1. Premiums for insurance required under the contract provided that a party not participating in such insurance shall not share in the costs unless such insurance is compulsory under the laws of Kenya and provided further that if such insurance is wholly or partly placed with an affiliate of the contractor such premiums shall be recoverable only to the extent generally charged by competitive insurance companies other than an affiliate of the contractor.

3.7. LEGAL EXPENSES 3.7.1. All costs or expenses of litigation or legal services otherwise necessary or expedient for the protection of the joint property or other interest in the contract area including but not limited to legal counsels salaries and fees court costs and cost of investigation or procuring evidence. These services may be performed by the operators legal staff or an outside firm as necessary.

3.8. DUTIES AND TAXES 3.8.1. All duties taxes except taxes based on income profit or gains fees and governmental assessments of every kind and nature which have been paid by the contractor with respect to the Contract unless specifically excluded under this Contract.

3.9. OFFICES CAMPS AND MISCELLANEOUS FACILITIES 3.9.1. Cost of establishing maintaining and operating the offices suboffices camps warehouses housing and other facilities directly serving upstream petroleum operations. The costs shall be allocated to the operations served on an equitable basis.

87 P a g e

3.10. GENERAL AND ADMINISTRATIVE EXPENSES 3.10.1. This charge shall be made monthly for services of all personnel and officers of the operator and its affiliates outside Kenya and those not otherwise provided herein. It shall include services and related office costs of personnel performing management administrative legal accounting treasury tax employee relations computer services purchasing engineering geological geophysical and all other functions for the direct benefit of upstream petroleum operations. General and administrative expenses incurred wholly and exclusively for the Kenyan operations are wholly deductible. General

and administrative expenses which have not been incurred wholly and exclusively incurred for Kenyan operations will be charged on an allocation criteria provided by the contractor subject to approval of the Cabinet Secretary and Kenyan Tax Authorities. 3.10.2. Within ninety 90 days following the end of each quarter the operator shall determine the actual costs incurred in performing such services and shall charge or credit the joint account for the difference between the actual cost incurred for the quarter and the provisional rate charged during the quarter. 3.10.3. On request of the Government or a nonoperator the operator shall make available at its Kenyan office all supporting documents used for the determination of the charges. Such documents shall include but shall not be limited to time allocation reports prepared by employees providing services described in part cash vouchers supporting cash expenses included in the overhead pool intercompany billings supporting charges for services provided by operators affiliates e.g. building rentals telecommunications paid by the operators parent company summary or impersonalized computer run supporting salaries wages and employee benefits and other such documents as may be mutually agreed. 3.11. OTHER EXPENDITURE 3.11.1. Other reasonable expenditure not covered or dealt with in the foregoing provisions which are incurred by the operator and its affiliates for the necessary proper economical and efficient conduct of upstream petroleum operations only with the approval by the Cabinet Secretary. 88 P a g e 3.11.2. Interest and financing charges incurred on loans or other forms of financial accommodation raised by the contractor for expenditure in upstream petroleum operations under the contract shall be nonrecoverable costs in accordance with subclause 3.14 below. 3.12. CREDITS UNDER THE CONTRACT 3.12.1. The net proceeds of the following transactions shall be credited to the account for cost recovery purposes under the contract 3.12.1.1. the net proceeds of any insurance or claim in connection with the upstream petroleum operations or any assets charged to the accounts under the contract; 3.12.1.2. revenue received from other parties for the use of property or assets charged to the accounts under the contract; 3.12.1.3. any adjustment received by the contractor from the suppliersmanufacturers or their agents in connection with defective equipment or material the cost of which was previously

charged by the contractor under the contract; 3.12.1.4. rentals refunds or other credits received by the contractor which apply to any charge which has been made to the accounts under the contract; 3.12.1.5. proceeds from all sales of surplus material or assets charged to the account under the contract; and 3.12.1.6. the prices originally charged to the accounts under the contract for inventory materials subsequently exported from Kenya. 3.13. NO DUPLICATION OF CHARGES AND CREDITS 3.13.1. Notwithstanding any provision to the contrary in this accounting procedure it is the intention that there shall be no duplication of charges or credits in the accounts under the contract.

89 P a g e 3.14. NONRECOVERABLE COSTS AND EXPENSES 3.14.1. Costs and expenses not specifically identified as recoverable in this clause shall not be recoverable by the contractor. Such nonrecoverable costs and expenses include but are not limited to the following 3.14.1.1. taxes on income or profit paid to any Government authority except taxes and duties that may be included in the costs of material and equipment purchased for upstream petroleum operations; 3.14.1.2. any payment made to the Government by reason of the failure of the contractor to fulfill its minimum work and expenditure obligations in respect of the initial exploration period the first additional exploration period or the second additional exploration period under the contract; 3.14.1.3. the cost of any letter of guarantee if any required under the contract; 3.14.1.4. the signature bonus set out in clause 6 of the contract; 3.14.1.5. the surface fees set out in clause 6 of the contract; 3.14.1.6. training fees and other related costs. 3.14.1.7. costs of marketing or transportation of petroleum beyond the delivery point; 3.14.1.8. interest arrangement costs and any foreign exchange costs relating to loans or other financing arrangements raised by the contractor for capital expenditure in upstream petroleum operations under the contract; 3.14.1.9. any accounting provision for depreciation andor amortization excluding any depreciation andor amortization expressly permitted under the contract; 3.14.1.10. costs incurred before the Effective Date; 3.14.1.11. Any foreign exchange and currency hedging costs; 3.14.1.12. Donations or charitable contributions andor services relating to public relations; 3.14.1.13. Costs that were not incurred within an approved Annual Work Program and Budget as revised or are of a category not permitted by this Contract; 90

P a g e 3.14.1.14. Decommissioning Costs actually incurred which have been effectively funded from the Decommissioning Fund through contributions made to such Fund which are already recovered when those Costs are incurred; 3.14.1.15. Costs in excess of those in line with the international market price for goods or services of similar quality supplied on similar terms prevailing at the time such goods or services were obtained or ordered by the contractor; 3.14.1.16. Any costs not reasonably required for the upstream petroleum operations; 3.14.1.17. Expenditures on research and development of new equipment materials and techniques; 3.14.1.18. Costs for which the records do not exist or which are not adequately documented; 3.14.1.19. Costs of arbitration and expert determination pursuant to clauses 35 and 53 of the Contract in respect of any dispute under this Contract; 3.14.1.20. Fines and penalties imposed under the laws of Kenya; 3.14.1.21. Costs due to a violation to this Contract or the laws and regulations applicable to the upstream petroleum operations including any amount spent on indemnities or penalties arising from the nonfulfillment of contractual obligations such as any payment made to the Government by reason of the failing of the contractor to fulfill its minimum exploration work and expenditure obligations under the Contract; 3.14.1.22. Costs incurred as a result of willful misconduct or negligence of the contractor its agents or subcontractors including any payments for damages under the Contract; 3.14.1.23. The acquisition costs or any other payments or charges in relation with the transfer of an interest in accordance with clause 47 of the Contract including but not limited to any payments of considerations private overriding royalties net profits and interests; 3.14.1.24. Corporate Social Responsibility Costs or Social Infrastructure Costs; and 3.14.1.25. any recoverable costs recovered elsewhere under the Kenyan laws. 91 P a g e 4. PART IV FINANCIAL REPORTS TO THE

CABINET SECRETARY 4.1. The reporting obligations provided for in this Part shall unless the contrary is stated apply to the operator. 4.2. The operator shall submit annually to the Cabinet Secretary the following 4.2.1. the annual work programme and budget three 3 months before the beginning of the year to which they apply and the budget shall be analyzed by item within the exploration programme evaluation programme development programme production programme and

decommissioning programme and show for each major budget item with reasonable detail the following 4.2.1.1. latest forecast of cumulative petroleum costs anticipated at the start of the budget year; 4.2.1.2. cumulative expenditure anticipated at the end of each quarter of the budget year; and 4.2.1.3. expenditure anticipated in future years to complete the budget item. 4.2.2. a schedule of the service and supply contracts to be let during the forthcoming year which require payment in foreign currency exceeding the equivalent of two hundred thousand U.S. Dollars USD200000.00 per contract showing the anticipated tender date and approximate value and the goods or services to be provided; 4.2.3. the audit report required by subclause 1.4.5. of this accounting procedure stating whether in the opinion of the auditors of the contract 4.2.3.1. the last annual expenditure report and records reflect a true and fair view of the actual expenditure of the contractor in accordance with the provisions of the contract; 4.2.3.2. the reports on petroleum revenue submitted truly and fairly determine the arms length value of disposals of Petroleum during the year. 4.3. The operator shall submit quarterly within thirty 30 days of each quarter to the Cabinet Secretary 4.3.1. a report of expenditure and receipts under the contract analyzed by budget item showing 4.3.1.1. actual expenditure and receipts for the quarter in question; 4.3.1.2. actual cumulative Petroleum cost to date; 92 P a g e 4.3.1.3. latest forecast cumulative cost at the year end; 4.3.1.4. variations between budget costs and actual costs and explanations thereof; and 4.3.1.5. with effect from adoption of the development plan the total payroll costs segregated between Kenyan and nonKenyan personnel and the total expenditure segregated between Kenyan and nonKenyan goods and services; 4.3.2. a cost recovery statement containing the following information disclosing costs incurred and recovered as attributed to either exploration development production or decommissioning activities 4.3.2.1. recoverable petroleum costs carried forward from the previous quarter if any; 4.3.2.2. recoverable petroleum costs incurred and paid during the quarter; 4.3.2.3. total recoverable petroleum costs for the quarter 4.3.2.1 plus 4.3.2.2 above; 4.3.2.4. quantity and value of cost Petroleum taken and separately disposed of by the contractor for the quarter; 4.3.2.5. volume and value of Petroleum recovered for the quarter; 4.3.2.6. amount of recoverable petroleum costs to be carried forward into

the next quarter if any; and 4.3.2.7. value of Governments share of production taken by the contractor pursuant to clause 38 of the contract. 4.4. A copy of each contract for goods or services valued in excess of Five Hundred Thousand U.S. Dollars USD 500000.00 shall be provided to the Cabinet Secretary as soon as practicable after its execution together with a contract summary containing 4.4.1. a description of the goods or services to be provided; 4.4.2. the approximate consideration for the contract; 4.4.3. the names of proposed bidders contractors or suppliers; and 4.4.4. a brief description of the efforts made to find a Kenyan supplier or contractor including the names of businesses considered and the reasons for rejecting them. 93 P a g e 4.5. After the commencement of production the operator shall within fifteen 15 days after the end of each month submit a production report to the Cabinet Secretary showing for each development area the quantity of petroleum 4.5.1. held in stocks at the beginning of the month; 4.5.2. produced during the month; 4.5.3. lifted and by whom during the month; 4.5.4. lost and consumed in upstream petroleum operations during the month; and 4.5.5. held in stocks at the end of the month. 4.6. A lifting party shall submit within fifteen 15 days after the end of each month a report to the Cabinet Secretary stating 4.6.1. the quantities and sales value of arms length petroleum sales made in that month; 4.6.2. the quantities sales value and arms length value of disposals of petroleum other than by sale at arms length during the month; and 4.6.3. the total petroleum revenue for that month. 4.7. The Contractor shall deliver to the Cabinet Secretary monthly statements showing calculations of the value of Petroleum produced and sold from the Contract Area and each Development Area which statements shall include inter alia the following information 4.7.1. Quantities of crude oil and/or natural gas sold by the contractor during the preceding month constituting arms length sales together with corresponding sale prices; 4.7.2. Quantities of crude oil and/or natural gas sold by the contractor during the preceding month that did not constitute arms length sales together with corresponding sale prices; 94 P a g e APPENDIX C PARTICIPATION AGREEMENT . Accounting procedure 95 P a g e PARTICIPATION AGREEMENT This Participation Agreement made and

entered into on this day of 20 by and between the Government of the Republic of Kenya hereinafter referred to as the Government represented for the purpose of this agreement by the Cabinet

Secretary for the time being responsible for petroleum hereinafter referred to as the Cabinet Secretary and incorporated under the laws of Kenya and having established a place of business at

Kenya hereinafter referred to as the Contractor. WHEREAS the Government and the contractor

have entered into a production sharing contract referred to as the Contract which expression includes its successors and assigns to which this Appendix is attached; WHEREAS the Government

may decide to exercise its option under clause 41 of the Contract; and WHEREAS the Parties wish to set forth the terms and conditions under which the Government has agreed to participate in the

upstream petroleum operations in each case such option is exercised; NOW THEREFORE the Parties agree as follows 1. Interpretation 1.1. In this Participation Agreement words in the singular

include the plural and vice versa and except where the context otherwise requires AFE means an authorization for expenditure; Government includes an appointee as defined in the Contract; joint

account means the accounts maintained by the operator to record all transactions related to operations in the participation area under this Participation Agreement; joint property means all

property acquired and held for use in connection with operations under this Participation Agreement; nonoperator means a party other than the operator; 96 P a g e operating committee means the

committee established by clause 4 hereof; operator means the party designated to conduct the upstream petroleum operations pursuant to clause 3 hereof and its successors and assignees;

participating interest means the respective undivided interest of each of the parties as it may exist at any given time in the participation area and under this Participation Agreement; participation area

means a development area in which the Government elects to participate under the Contract;

participation dates means the effective date of participation by the Government as defined in subclause 41.2 of the Contract; participation work programme means a programme of the upstream petroleum operations under this Participation Agreement; parties means collectively the Government and the entities constituting the contractor their respective successors or assignees; party means anyone of the parties; year means calendar year. 1.2. Words not defined in this Participation Agreement but which are defined in the Contract have the meanings given to them in the Contract.

1.3. In the event of any conflict between the Contract and this Participation Agreement the Contract shall prevail and this Participation Agreement shall be deemed amended accordingly. 2.

Participation Interests and Commencement 2.1. When and if the Government elects pursuant to clause 41 of the contract to participate in upstream petroleum operations in a participation area each entity constituting the contractor shall assign proportionately to the Government a part of its interest in the development area so that the rights interest and obligations of the contractor and the Government in such area shall be owned and borne as of the participation date in undivided interests as follows 97 P a g e Government.. per cent or such lesser amount as may be elected in accordance with clause 41 of the Contract; and Contractor .. per cent or such greater amount as may remain after the Governments election. 2.2. In the event a party shall transfer in whole or in part

its participating interest pursuant to clause 47 of the Contract and clause 9 of this Participation Agreement the participating interest of the parties therein shall be revised accordingly. 3. Operator

and duties of the Operator 3.1. The operator shall be the party acting as operator on the participation date and the operator shall have the rights and obligations of a nonoperator in respect of its participating interest. 3.2. The operator shall serve as operator until it resigns or is removed pursuant to the provisions of this clause or until it ceases to hold a participating interest hereunder.

In the event that an operator assigns the whole of its participating interest hereunder to one of its affiliates such affiliate shall become operator hereunder in the formers place. 3.3. Upon the affirmative vote of all the nonoperators the operator shall be removed as operator in case of any one of the following 3.3.1. bankruptcy of the operator or its parent company; 3.3.2. assignment for the

benefit of the operators creditors; 3.3.3. appointment of a receiver or manager with respect to the whole or any part of the property or assets of the operator; 3.3.4. entitlement of any person other than an affiliate of the operator to appoint a majority of the members of the board of directors of the operator by reason of any act default or neglect of the operator; 3.3.5. failure without justification by the operator to pay a sum due to or in the name of the joint account for more than sixty 60 days; 98 P a g e 3.3.6. the operators material breach of this Participation Agreement which remains without a remedy for more than thirty 30 days after the operator is notified by nonoperators of such breach; or 3.3.7. reduction in the operators participating interest to per cent .. or less. 3.4. An operator may at any time resign as operator by giving to the other parties notice in writing of such resignation. Such resignation shall be effective one hundred and eighty 180 days after the date of notice thereof or on the date on which a successor operator appointed by the parties other than the operator shall be ready and able to assume the obligations of operator in accordance with all the provisions of this Participation Agreement whichever shall first occur. 3.5. Should an operator so resign or be removed a successor operator shall immediately be appointed by the operating committee. A party having been removed as operator may not vote to succeed itself as operator. Such appointment shall be made by a vote of at least two 2 of the remaining parties holding not less than the percentage figure of the remaining participating interests set out in clause 4.6. For the purpose of this clause 3.5 operator includes any of its affiliates holding a participating interest in this Participation Agreement. 3.6. Removal or resignation of an operator shall not in any way affect its rights or obligations as a nonoperator party to this Agreement. On the effective date of removal or resignation the operator shall deliver to the successor operator any and all funds equipment materials appurtenances books records data interpretations information and rights acquired by and in the custody of the operator for the joint account of the parties including available petroleum not delivered to the parties shall with the successor operator prepare an inventory of joint property adjusting the joint account accordingly and shall cooperate as far as possible in effecting a smooth transfer of operating responsibilities. 3.7. An operator that is removed under Article 3.3.7 hereof may

charge to the joint account all reasonable and necessary expenditure incurred in demobilizing and repatriating personnel and equipment. 99 P a g e 3.8. The operator shall have control of the upstream petroleum operations in the participation area and shall have exclusive custody of all materials equipment and other property acquired thereof and shall perform the duties under this Participation Agreement diligently and in accordance with best petroleum industry practice and sound and accepted engineering management and accounting principles. The operator shall not be liable to any nonoperator for any acts or omissions claims damages losses or expenses in connection with or arising out of this Participation Agreement or the contract or upstream petroleum operations save those caused by gross negligence or willful misconduct of the operator. 3.9. The operator shall 3.9.1. consult with nonoperators and advise them of all matters arising from the upstream petroleum operations; 3.9.2. comply with the decisions of the operating committee; 3.9.3. keep the participating interests and all property acquired or used free from liens except for those authorized by clause 6 hereof; and 3.9.4. pay the costs of the upstream petroleum operations under this Participation Agreement promptly and make proper charges to nonoperators. 3.10. The operator shall submit a copy of an AFE to the nonoperators for each budget item of capital expenditure in the approved participation work programme and budget that costs more than U.S. dollars U.S.D. Where it is necessary to complete an expenditure in a budget item in the approved participation work programme the operator may exceed the budget for the budget item by the lesser of ten per cent 10 thereof or U.S. dollars. U.S.D and shall report promptly such excess expenditure to the nonoperators. The operator may spend not more than U.S.dollars U.S.D.....on upstream petroleum operations in the participation area not included in an approved participation work programme provided that such expenditure shall not be for items previously rejected by the operating committee. The operator shall report promptly that expenditure to the nonoperators and if it is approved in accordance with clause 46 the operator may make further 100 P a g e expenditurethereon or on other items not exceeding U.S. dollars. U.S.D.....in that year. The limits in this subsection may be changed from time to time by the operating committee. In the case of

emergency the operator may make such immediate expenditure and take such immediate action as may seem necessary for the protection of life or property or the prevention of pollution and such emergency expenditure shall be reported promptly to the parties by the operator. 3.11. A nonoperator may inspect the participation area theupstream petroleum operations and the books records and other information of the operator pertaining thereto. The operator shall supply to a nonoperator by telephone telefax email registered post or courier daily reports on drilling and such other reports in writing normally provided by an operator to a nonoperator in the international petroleum industry including but not limited to reports on well tests and core analysis and copies of drilling logs well surveys and velocity surveys. The operator shall furnish any other information reasonably requested by nonoperator if such information is readily available. 3.12. The operator shall obtain and maintain all insurance required by law and such other insurance as the operating committee may from time to time determine provided that in respect of such other insurance any party may elect not to participate provided such party gives notice to that effect to the operator. The cost of insurance in which all the parties are participating shall be for the joint account and the cost of insurance in which less than all the parties are participating shall be charges to such parties individually. The operator shall in respect of any insurance 3.12.1. promptly inform the parties participating therein when it is taken out and supply them with copies of the relevant policies when the same are issued; 3.12.2. arrange for the parties participating therein according to their respective participating interests to be named as coinsureds on the relevant policies with waivers of subrogation in favour of the parties; and 101 P a g e 3.12.3. duly file all claims and take all necessary and proper steps to collect any proceeds and if all the parties are participating therein credit them to the joint account or if less than all the parties are participating therein credit them to the participating parties. Subject as stipulated above any of the parties may obtain such insurance as it deems advisable for its own account at its own expense providing such insurance is acceptable under the applicable law. If the operator is unable to obtain such other insurance required by the operating committee it shall so advise the parties and thereafter it shall be discharged of its

obligation to obtain such insurance. The operator shall take all reasonable steps to ensure that all contractors including subcontractors performing work in respect of the upstream petroleum operations and the joint property obtain and maintain all insurance required by the law and obtain from their insurers a waiver of subrogation in favour of the parties. 3.13. The operator may prosecute defend and settle claims and litigations arising out of the upstream petroleum operations and may compromise or settle such claims or litigations which involve an amount not exceeding the equivalent of one hundred thousand U.S. dollars US 100000.00 without the approval of the operating committee. Any claim or litigation involving an amount in excess of the equivalent of one hundred thousand U.S. dollars U.S. 100000.00 shall be reported promptly to the nonoperators and a nonoperator shall have the right to be represented by its own counsel at its expense in the compromise settlement or defense of such claims or litigation. 3.14. The operator shall fulfill the reporting obligations of the Contractor unless otherwise stipulated in this Participation Agreement and the Contract. 4. Operating Committee and Work Programmes 4.1. The parties shall establish an operating committee to supervise and control the upstream petroleum operations. The operating committee shall consist of one representative appointed by each of the parties provided always that more than one of the parties may appoint the same representative who shall represent them separately. 102 P a g e 4.1.1. Each party shall as soon as possible after the date of this Participation Agreement give notice to all the other parties of the name of its representative and of an alternate on the operating committee. Such representative may be replaced from to time by like notice. Representatives may bring to meetings of the operating committee such advisers as they consider necessary. The representative of a party or in the absence of the representative his alternate shall be deemed authorized to represent and bind such party with respect to any matter which is within the powers of the operating committee. The representative of the party which is the operator shall be the chairman of the operating committee and shall report the proceedings. 4.2. Except as otherwise provided in this Participation Agreement the powers and duties of the operating committee shall include 4.2.1. the consideration and determination of all matters relating to general

policies procedures and methods of operation hereunder; 4.2.2. the approval of any public announcement or statement regarding this Participation Agreement or the upstream petroleum operations; 4.2.3. the consideration revision and approval or disapproval of all proposed participation work programmes budgets and AFEs prepared and submitted to it pursuant to the provisions of this Participation Agreement; 4.2.4. the determination of the timing and location of all wells drilled under this Participation Agreement and any change in the use or status of a well; 4.2.5. the determination of whether the operator will represent the parties regarding any matters or dealings with the Cabinet Secretary any other governmental authorities or third parties in so far as the same relate to the upstream petroleum operations provided that there is reserved to each party the unfettered right to deal with the Cabinet Secretary or any other governmental authorities in respect of matters relating to its own participating interest; and 4.2.6. the consideration and if so required the determination of any other matter relating to the upstream petroleum operations which may be referred to it by the parties or any of them or which is otherwise designated under this Participation Agreement for reference to it. 103 P a g e 4.3. The operator shall when requested by a representative of any party call a meeting of the operating committee. The operator may do so at any time to keep the parties informed on the upstream petroleum operations. 4.4. A request to call a meeting of the operating committee shall state the purpose of that meeting and except in an emergency the operator shall give the parties at least fifteen 15 days written notice with an agenda of the meeting but where a meeting is called in an emergency the operator shall give as much notice thereof as possible by telephone or email and except with the consent of all the parties the business of a meeting shall be only that for which it was called. 4.5. The operator may instead of calling a meeting submit matters to the parties by written notice upon which each party may vote within the period prescribed in the notice which shall not be less than three 3 days or more than fifteen 15 days from the date notice is received. Failure of a party to vote within the above time limits shall be deemed a negative vote. 4.6. Each party shall have a voting interest equal to its participating interest. Unless otherwise provided in this Participation Agreement all decisions of the operating

committee shall be made by the affirmative vote of at least two 2 parties holding not less than .per cent of the participating interests. 4.7. The operator shall at least one hundred and twenty 120 days before the end of each year submit to the parties for approval a participation work programme and budget which shall contain details of the upstream petroleum operations to be carried out in the next year and allocation of funds therefor including administrative overheads and third party expenditure in accordance with the accounting procedure attached to this Participation Agreement as exhibit A. 4.8. Unless unanimously agreed at least sixty 60 days prior to the beginning of the year the operator shall call a meeting of the operating committee to discuss and approve a participation work programme and budget for the ensuing year and such work programme and budget shall be approved not later than thirty 30 days prior to the commencement of such year and the decision of the operating committee shall bind the parties. Upon 104 P a g e approval of such work programme and budget the operator is hereby authorized and obliged to proceed with it in accordance with such approval. 4.9. Such approved participation work programme and budget may be reviewed and revised from time to time by the operating committee. Any party may in writing request a review of an approved participation work programme or budget or of a project within a programme if that project costs more than U.S. dollars U.S.D and the request shall state the objections of the party which shall be considered by the operating committee who may amend the participation work programme or budget. 5. Costs and Expenses 5.1. Except as otherwise specifically provided in the contract and this Participation Agreement all cost and expenses incurred by the operator in the conduct of operations hereunder shall be borne by the parties in proportion to their respective participating interests set forth in clause 2. 5.2. All costs and expenses incurred by the operator in the conduct of upstream petroleum operations hereunder shall be determined and settled in accordance with best internationally accepted accounting practice consistent with the provisions of the contract and its accounting procedure as complemented by the provisions of exhibit A to this Participation Agreement and the operator shall keep its records of costs and expenses in accordance therewith. 6. Payments to the Operator 6.1. A nonoperator shall pay its share of an

expenditure relating to the petroleum operation within fifteen 15 days of receipt of the account of the operator. 6.2. The operator may upon twenty 20 days written notice request a nonoperator to advance a share of the estimated expenditure for the following month stipulating the due date of payment provided however that such due date of payment shall not be before the first banking day of that month and the operator shall include with such notice an estimate of the cash calls for the next ninety 90 days Operators estimate of expenditure shall not 105 P a g e exceed the approved years budget. The operator may at any time upon fifteen 15 days written notice request additional advances to cover unforeseen expenditure. 6.3. Cash requirements shall be specified by the operator in the currencies required for the upstream petroleum operations and the nonoperators shall advance their shares in the currencies specified. 6.4. If any nonoperators advances for a given month exceed its share of cash disbursements for the same month the next succeeding cash advance after such determination shall be reduced accordingly. However nonoperators may request that excess advances be refunded. The operator shall make such refund within fifteen 15 days after date of such notice. 6.5. Where a party is in default of payment the operator and the nondefaulting parties shall have as security for amounts due hereunder from a defaulting nonoperator a lien on the participating interest share the interest in material and equipment acquired for the upstream petroleum operations and upon the proceeds from the sale of petroleum of that nonoperator and a nonoperator shall have for amounts due hereunder a similar lien on the same interests and property of the operator. 6.6. A lien may be exercised by a nondefaulting party by collecting the amount due from a purchaser of Petroleum and the statement of the operator of the amount due shall be proof thereof. 6.7. A late payment shall attract at LIBOR plus three per cent 3 or per cent whichever is the greater compounded monthly and calculated from the due date of payment. A payment not received within seventytwo 72 hours of the due date shall accrue interest from the due date and the nonpaying party shall be deemed to be in default from the due date of the payment. 6.8. A party which remains in default for five 5 days shall have no right to vote at any operating committee meeting held during the period of the default but shall be bound by all decisions of the operating

committee made during such period and the defaulting party's participating interest shall be deemed to be vested pro rata in the nondefaulting parties for voting purposes during the continuation of the default.

106 P a g e

6.9. Where a party fails to pay an amount required to be paid hereunder and remains in default for ninety 90 days the participating interest share of the defaulting party may be declared forfeit by the nondefaulting parties unless the amount due is an advance and the defaulting party provides an irrevocable letter of credit or other security acceptable to the operator for the amount due.

6.10. When the participating interest share of a defaulting party is declared forfeited the operator shall give notice thereof to all the parties and that share shall vest ratably unless otherwise agreed in the nondefaulting parties without payment of compensation and the defaulting party shall at its sole expense take all steps necessary to vest that share accordingly and the defaulting party hereby appoints the operator to act as its advocate to execute any and all documents required to effect such transfer. Notwithstanding the transfer of a defaulting party's participating interest share in accordance with the foregoing the defaulting party shall remain liable for its proportionate share of the commitments incurred before its rights lapsed.

6.11. Where a party is in default of payment the remaining parties shall advance the operator on demand a share of that payment in proportion to the participating interests of those parties. Any payments received from a defaulting party shall be credited to the accounts of the nondefaulting parties who advanced funds on behalf of the defaulting party.

7. Materials and Equipment

7.1. All materials and equipment acquired by the operator for upstream petroleum operations hereunder shall be owned by the parties in undivided shares in the proportion of their respective participating interests.

7.2. Except as may be otherwise approved by the operating committee the operator shall purchase for the joint account of the parties only such materials and equipment as are reasonably required in the conduct of operation provided for in approved participation work programmes or revisions thereof the operator shall not stockpile materials or equipment for future use without the approval of the operating committee.

7.3. Jointly acquired materials or equipment declared by the operator to be surplus shall be disposed of in such manner as the operating committee may direct; or if the book

value 107 P a g e thereof does not exceed U.S. dollars U.S.D the operator shall dispose of same in such manner as the operator shall deem appropriate; provided however that each Party may if practicable separately take or sell and dispose of its interest in such materials or equipment or may by notice in writing and subject to revocation at will authorize the operator for a period or periods of not more than one 1 year each to sell such materials and equipment for the account of the party or parties giving such authorization. Each party shall have the right to purchase at the prevailing market price in the area materials or equipment which the operator has declared to be surplus and which the operator intends to dispose of on the open market. 7.4. Subject to the provisions of clause 13 of the Contract upon termination of this Participation Agreement the operator shall salvage for the joint account all jointly owned materials and equipment which can reasonably be salvaged to be disposed of as provided in clause 7.3 hereof. 8. Relationship of the Parties and Tax Provisions 8.1. The parties declare that it is not their intention by entering into this Participation Agreement to create or be considered as a partnership or any other similar entity. 8.2. Each party shall be responsible for and shall pay its own taxes to the Kenyan authorities on its operations hereunder subject to the provisions of clause 39 of the Contract recognizing that a party hereunder may be subject to the laws of its place of incorporation in addition to the laws of Kenya. 9. Surrenders and Transfers 9.1. Any party desiring that all of the participation area be surrendered voluntarily shall notify the other parties in writing accordingly specifying its reasons therefor and thereafter 9.1.1. each party shall within thirty 30 days after receipt of the notice inform the other parties in like manner whether it concurs in or opposes the proposed surrender; 9.1.2. if all the parties concur in the proposed surrender the participation area shall be surrendered as soon as possible under the Contract; 9.1.3. if one or more of the parties oppose the proposed surrender the party or parties desiring to surrender shall upon request by the opposing parties transfer and convey without 108 P a g e warranty of title free and clear of all liens charges and encumbrances and without right to compensation all of its or their interests in the participation area and material left thereon to said opposing party or parties each in the proportion that its or their participating interests hereunder

bears to the sum of the participating interests of all the opposing parties or as otherwise agreed by the opposing parties. The transferring party or parties shall bear 9.1.3.1. its or their participating interest shares of costs expenses and liabilities incurred hereunder which are attributable to the participation area for the period prior to the effective date of such transfer of interest; 9.1.3.2. its or their participating interest shares of all costs and expenses incurred by the operator after such date under any contracts entered into by the operator in execution of a participation work programme theretofore approved by the operating committee; and 9.1.3.3. its or their participating interest shares of any accrued obligations under the contract which are not included in 9.1.3.1 or 9.1.3.2 above but shall thereafter have no further rights or other obligations in connection therewith; and 9.1.4. a transfer under clause 9.1.3 above shall be effective as among the parties thirty 30 days after the opposing parties receipt of the transferring partys first mentioned notice proposing surrender. Thereafter until such transfer has received whatever approvals may be necessary under the provisions of the Contract or applicable law the transferring party or parties shall hold at most legal but not equitable title to the interests transferred for the benefit of the opposing party or parties. The transferring party or parties receiving the interests transferred shall execute and deliver such documents and do such other acts as may be necessary to give legal effect to such transfer to obtain all approvals thereof as may be required from the Cabinet Secretary and otherwise to effectuate the purposes of this clause; 9.1.5. notwithstanding the foregoing if the operating committee determines that per cent or more of the estimated discovered and recoverable reserves under the participation area have been produced no party shall be allowed to surrender or 109 P a g e required transfer of interest in this Participation Agreement and the Contract without the unanimous consent of all parties. 9.2. No transfer of any interest under this Participation Agreement and the Contract shall be made by any party otherwise than in respect of an undivided interest in all or part of its participating interest in this Participation Agreement and the Contract and in accordance with the following provisions of this clause 9. 9.3. If any party receives a bona fide offer for the purchase of all or a portion of an offereepartys participating interest in this Participation

Agreement and the participation area which the offereeparty is willing to accept the offeree party shall give notice thereof in writing to the other parties 9.3.1. such notice shall set forth the identity of the offeror the terms and conditions including monetary and other considerations offered in good faith and all other relevant particulars; 9.3.2. for a period of thirty 30 days next following the receipt of such notice the otherparties shall have an option to purchase the entire interest proposed to be sold on the same terms offered by the offeror as set forth in the respective offer; 9.3.3. if more than one of the parties should exercise its right to purchase said interest each shall have the right to acquire such interest in the proportion that the participating interest hereunder of such party bears to the sum of the participating interests of all the parties exercising such right except as they may otherwise agree; 9.3.4. if within such a period of thirty 30 days none of the other parties shall exercise its rights to purchase said interest the sale to said offeror may be made under the terms and conditions set forth in the notice given; provided that the sale shall be consummated within six 6 months from the date of such notice and that the sale and any transfer shall be in accordance with the Contract and applicable laws; 9.3.5. for the purposes of this paragraph an offer to purchase shall also include an acceptance of an entitys offer to sell. 9.4. The limitations of clause 9.3 shall not apply to a transfer of a participating interest by a party to an affiliate of such party or by the Government to an appointee or from an appointee to another appointee nor shall they apply to a transfer of a participating interest effected as a result of merger consolidation reorganization or sale of capital stock of the parent company of a party. 9.5. Every transfer of a participating interest in the participation area shall be made expressly subject to this Participation Agreement and shall include a corresponding interest in jointly acquired equipment and facilities. No transfer of an interest hereunder shall be effective unless made by an instrument in writing duly executed by the parties thereto in accordance with applicable law and until the same has received all consents required under this Participation Agreement and the Contract. A transfer shall provide that the transferor remains liable for obligations incurred before the date of transfer and such obligations shall in addition become the obligations of the transferee. Where after the transfer the

transferee or transferor owns a participating interest of less than five per cent 5 they shall be jointly represented. 9.6. A transfer other than to an affiliate of an appointee shall be of sufficient financial standing to meet its participating interest share of its obligations under the Contract and this Participation Agreement. In the event of a transfer of a participating interest to an affiliate of a party the transferor party shall remain responsible for the full performance by the affiliate of the obligations undertaken by the said party under this Participation Agreement and the Contract and if such affiliate ceases to be an affiliate the participating interest shall be transferred back to the party. 9.7. In this Article transfer means a transfer assignment sale or other disposal of the interest of a party.

10. Disposal of Production 10.1. Each party shall separately own take in kind and dispose of its participating interest share of that portion of the petroleum produced and saved from the participation area to which the contractor is entitled under clause 38 of the Contract. 10.2. Within six 6 months following the signing of this Participation Agreement the parties shall in accordance with the provisions of the Contract and in light of the gathering and transportation facilities available under the adopted development plan in good faith establish a set of rules governing the scheduling lifting and other necessary provisions for 111 P a g e the crude oil offtakes of the parties consistent with best petroleum industry practice which shall provide among other things such detailed terms and procedures as required for 10.2.1. shortterm production forecasts; 10.2.2. nominations and calculation of entitlements; 10.2.3. scheduling of deliveries; 10.2.4. lifting tolerances; 10.2.5. underlift overlift and makeup provisions; 10.2.6. passage of title and risk; 10.2.7. penalties assessable to the parties which cause shutin or reductions of production; and 10.2.8. other related matters. Whatever is mutually agreed by the parties shall be deemed to form part of this Participation Agreement. The above terms and procedures shall apply separately to each grade of crude oil that is segregated and separately stored for offtake. 10.3. The contractor if so directed by the Cabinet Secretary shall be obligated to lift and market part or all of the Government's share of profit crude oil and/or profit natural gas. When the Cabinet Secretary elects not to take and receive in kind any part of the Government's share of profit crude oil and/or profit natural gas the Cabinet Secretary shall notify the contractor

ninety 90 days before the commencement of each half year specifying the quantity of production and such notice shall be effective for the ensuing half year. Any sale by the contractor of the Governments share of profit crude oil and/or profit natural gas shall not be for a term of more than one 1 year without the Cabinet Secretarys consent. 10.4. In the event of production of associated natural gas or of any discovery of natural gas the parties shall agree upon appropriate procedures for disposal of any natural gas available under this Participation Agreement and the Contract. 112 P a g e 11. Sole Risk Operations 11.1. Any party may undertake upstream petroleum operations at sole risk hereinafter referred to as sole risk project in a participation area subject to the provisions of this Article. 11.2. The following types of sole risk project may be proposed 11.2.1. the drilling of a well or the deepening sidetracking completing plugging backtesting or reworking of an existing well drilled for the joint account of the parties in order to test a formation in which no jointly owned well has been completed as a well producing or capable of producing petroleum; 11.2.2. the installation of production and transportation facilities. 11.3. The conduct of a project in a development area may not be the subject of a sole risk notice under this clause until after it has been proposed in complete form to the operating committee for consideration pursuant to clause 4 hereof and has not been approved within the period therein provided. In the event that such project fails to obtain the requisite approval of the operating committee then any party may serve notice on the other parties of its intention to carry out that project at sole risk. The other parties may give counternotice that they wish to participate in the project within sixty 60 days after receipt thereof but where a drilling rig is on the location and has not been released the period is reduced to seventytwo 72 hours after receipt thereof. The periods set forth in this subsection shall be extended for any period of time mutually agreed by the parties as necessary or desirable for acquiring or developing additional information on the sole risk project. 11.4. If all the other parties elect to participate in the project identified in the proposing partys notice within the period thereof provided such project is considered as being approved by the operating committee and the provisions of clause 4.8 of this Participation Agreement shall apply. 11.5. In the event that less than all the parties elect to participate in the

project the parties which elected to participate hereinafter referred to as sole risk parties shall be entitled to have the sole risk project carried out. The interest of each sole risk party in a sole risk project shall be in proportion to its participating interest in this Participation Agreement or in such other proportion as the sole risk parties may agree. Any sole risk project shall be carried out at the sole risk cost and expense of the sole risk parties in the proportion of their respective interests.

11.6. A sole risk project shall be carried out by the operator on behalf of the sole risk parties under the provisions of this participation agreement. No sole risk project may be commenced after one hundred and eighty 180 days following the expiration of the notice period prescribed in subclause 11.3 but the operator shall commence work as promptly as reasonably possible if the notice period of seventytwo 72 hours set forth in subclause 11.3 applies. The operator shall complete the sole risk project with due diligence provided that it does not jeopardize hinder or unreasonably interfere with upstream petroleum operations carried out under the Contract and adopted by the operating committee pursuant to clause 4 of this Participation Agreement. The sole risk parties may use for the sole risk project any production handling processing and/or transporting facilities which are joint property subject to a determination by the operating committee as to usage fees availability of capacity and production compatibility.

11.7. In connection with any sole risk project

11.7.1. the sole risk project will be carried out under the overall supervision and control of the sole risk parties in lieu of the operating committee;

11.7.2. the computation of costs and expenses of the sole risk project incurred by the sole risk parties shall be made in accordance with the principles set out in exhibit A attached hereto;

11.7.3. the operator carrying out the sole risk project shall maintain separate books records and accounts including bank accounts for the sole risk project which shall be subject to the same right of examination and audit by the sole risk parties;

11.7.4. the costs and expenses of the sole risk project shall not be reflected in the statements and billings rendered by the operator for upstream petroleum operations under the Participation Agreement; and

11.7.5. if the operator is carrying out a sole risk project on behalf of the sole risk parties the operator shall be entitled to request the sole risk parties in connection with the sole risk

project to advance their share of the estimated expenditure and shall not use joint account 114 P a g e funds or be required to use its own funds for the purpose of paying the costs and expenses of the sole risk project; furthermore the operator shall not be obliged to commence or having commenced to continue the sole risk project unless and until relevant advances have been received from the sole risk parties. 11.8. The sole risk parties shall indemnify and hold harmless the other parties against all actions claims demands and proceedings whatsoever brought by any third party arising out or in connection with the sole risk project and shall further indemnify the other parties against all damages costs losses and expenses whatsoever directly or indirectly caused to or incurred by them as a result of anything done or omitted to be done in the course of carrying out such sole risk project. 11.9. Subject to the provisions of subclause 11.10 below the sole risk project including data and information is wholly owned by the sole risk parties in accordance with the provisions of the Contract but the sole risk parties shall keep the other parties informed about the project. In the event that such project results in an increase of production of petroleum from the participation area the portion of such increase which is available to the contractor under the Contract shall be owned solely by the sole risk parties. Each of them shall have the right and obligation to take in kind and separately dispose of its proportional share of supplementary petroleum production. 11.10. Any party or parties which are not participating in the sole risk project may by giving thirty 30 days notice to the sole risk parties become participants in such project at any time after the sole risk parties have recovered from the supplementary petroleum production the following sums of money to which they are entitled on the project In the case of a project under clause 11.2.1 hereof per cent of the sole risk cost of such project plus one hundred per cent 100 of the cost of operating such well incurred by the sole risk parties In the case of a project under clause 11.2.2 hereof per cent of the sole risk cost of such project plus one hundred percent 100 of the cost of operating such facilities. The value of the supplementary production to which a sole risk party is entitled shall be the market value in sales at arms length determined in accordance with clause 35 of the Contract. 115 P a g e From and after the election of any party or parties to become participants in such project all relevant

wells facilities equipment and other property appurtenant thereto shall be owned jointly by the participating parties and each of the participating parties shall be entitled to receive its proportional share of the supplementary petroleum production.

12. Confidentiality

12.1. All information related to the upstream petroleum operations shall be confidential and shall not be disclosed to a person other than a party except to

12.1.1. an affiliate;

12.1.2. the Government and other public authorities to the extent necessary for the purpose of any applicable law;

12.1.3. a stock exchange to which a party is obliged to make disclosure;

12.1.4. contractors consultants legal counsels or arbitrators of a party where disclosure is essential;

12.1.5. a bona fide prospective purchaser of an interest of a party in the Contract but that purchaser shall undertake to treat that information as confidential;

12.1.6. a lender where disclosure is essential; or

12.1.7. a person to whom disclosure has been agreed by the parties.

12.2. A party making a disclosure to a person described in clause 12.1.5 or 12.1.6 shall give ten 10 days written notice thereof to the other parties.

12.3. The parties shall consult with each other prior to the release of any public statement or press release and except to the extent required by law rule or regulation of any governmental authority or stock exchange no party shall make any public statement or press release without the approval of all the other parties which shall not be unreasonably withheld. The operator shall utilize its best efforts to coordinate all such public statements to the end that all parties may effect simultaneous press releases.

12.4. The obligations of the parties under this clause 12 are continuing obligations and any party ceasing to be a party to this Agreement shall remain bound by this clause until this 116 P a g e Agreement is no longer in force between any remaining parties and the Contract has expired.

13. Liability

13.1. The parties shall be severally liable in accordance with their respective participating interests to third parties.

13.2. Where the Government has nominated an appointee as defined in the Contract and the appointee defaults the Government shall be liable.

13.3. If because of the operation of the joint and several liability provisions contained in the Contract anyone of the parties hereto shall be required to pay in full to the Government or any other party any sum which if the liability were several would be required separately from each of the parties or from one other party only then the parties shall

notify forthwith and request immediate payment of the parties proportionate share according to its participating interest. If within ten 10 days from receipt of said notice the other parties shall fail to make payment as provided above such parties shall be in default and the provisions of clause 6 above shall apply this being without prejudice to any other legal remedies available to the nondefaulting parties against the defaulting parties. 14. Governing Law 14.1. This Participation Agreement shall be governed by and be construed in accordance with the laws of Kenya. 15. Arbitration 15.1. A dispute under this Participation Agreement shall be referred to arbitration in accordance with clause 53 of the Contract. 16. Force Majeure 16.1. In this clause 16 force majeure means an occurrence beyond the reasonable control of any of the parties which prevents any of them from performing their obligations under this Participation Agreement. 16.2. Where a party is prevented from performing an obligation under this Participation Agreement by force majeure that party shall give written notice to the other parties and the obligation of the affected party shall be suspended for the period of the force majeure. 16.3. The affected party shall promptly notify the other parties when the period of force majeure terminates. 16.4. No party may claim force majeure as a reason for the failure to timely pay any monies pursuant to this Participation Agreement. 16.5. Where any Party disputes the existence of force majeure that dispute may be referred to arbitration as provided in clause 53 of the Contract. 17. Notices 17.1. All notice and other communication under this Participation Agreement shall be in writing and shall be delivered by hand sent by registered post certified post or fax to the following address of the other To the Government Ministry of Energy and Petroleum FAO Hon Cabinet Secretary Kenyatta Avenue P.O. Box 3058200100 Nairobi.Kenya. Fax 25420240910 Email csenergymin.go.ke To the Contractor .. 17.2. A notice shall be effective on receipt. 17.3. Any notice if sent by facsimile shall be deemed received by the party to whom it was addressed on the first business day after the day upon which the facsimile was received. Any notice if by personal delivery to any party shall be deemed to be received by the addressee on the date of delivery if that date is a business day or otherwise on the next business day following. In the event that a notice sent by facsimile includes a

request for confirmation of the receipt thereof such a confirmation shall be sent no later than one 1 business day after receipt of the notice. The contractor may at any time and from time to time change its authorized representative or its address herein on giving the Government ten 10 days notice in writing to such effect. 18. Term 18.1. This Participation Agreement shall come into force on the participation date and shall remain in force until 18.1.1. it is terminated by the written consent of all the parties; 18.1.2. all the Participating Interests are vested in one party; or 18.1.3. the expiration or termination of the Contract. 18.2. Before this Participation Agreement is terminated there shall be a final accounting and settlement of the joint account. 19. Final Provisions 19.1. Headings are inserted in this Participation Agreement for convenience only and shall not affect the construction for interpretation hereof. 19.2. This Participation Agreement shall not be amended modified or supplemented except by an instrument in writing signed by the parties. 19.3. Subject to the provisions hereof this Participation Agreement shall inure to the benefit of and be binding upon the successors and assignees of the parties hereto and each of them respectively. IN WITNESS WHEREOF the parties hereto have signed this Participation Agreement 119 P a g e on the day and year first above written. 120 P a g e EXHIBIT A ACCOUNTING PROCEDURE Attached to and made a part of the Participation Agreement. SECTION I GENERAL PROVISIONS 1.1. Interpretation. 1.2. Statements billings and adjustments. 1.3. Advances and payments. 1.4. Audits. SECTION II CHARGEABLE COSTS EXPENDITURE AND CREDITS 1. Section I General Provisions The purpose of this accounting procedure is to establish equitable methods for determining charges and credits applicable to operations under the Agreement. It is the intent of the parties that no party shall lose or profit by reason of its duties and responsibilities as either operator or as nonoperator and that no duplicate charges to the joint account for the same work shall be made. The parties agree that if any procedure established herein proves unfair or inequitable to any party the parties shall meet and in good faith endeavour to agree on the changes necessary to correct that unfairness or inequity. 1.1.1 In this Exhibit 1.1 Interpretation i the Agreement means the Participation Agreement of which this Exhibit forms part; ii the Contract means the production

sharing contract to which the Agreement is attached; iii words and expressions defined in the Agreement the Contract and its appendices have the meanings therein ascribed to them. 121 P a g e 1.1.2 In the event of any conflict between the provisions of the Agreement and this exhibit the provisions of the Agreement shall prevail. 1.1.3 By mutual agreement between the parties this accounting procedure attached to the Agreement may be revised from time to time by an instrument in writing signed by the parties. 1.2 Statements Billings and Adjustments 1.2.1 The operator shall maintain financial accounts and records necessary to record in reasonable details the transactions relating to upstream petroleum operations under the Agreement which shall be prepared in accordance with generally accepted standards of the International Petroleum Industry. The operator shall upon request by a party furnish a description of its accounting classifications. 1.2.2 Each party to the Agreement is responsible for preparing its own accounting and tax reports and paying of its own tax obligations to meet Kenyan requirements. The operator shall furnish the nonoperators with all reports statements billings and accounting documents necessary to maintain their own accounting records. 1.2.3 The operator shall bill the nonoperators on or before the last day of each month for their proportionate share of expenditure for the preceding month. Such billings shall be accompanied by statements of all charges and credits to the joint account summarized in reasonable detail by appropriate accounting classifications indicative of the nature thereof except that items of controllable material and unusual charges and credits shall be detailed. 1.2.4 The operator shall upon request by nonoperators furnish a description of such accounting classifications. 1.2.5 Amounts included in the billings shall be expressed in the currency in which the operators records are maintained. In the conversion of currencies when accounting for advances or payments in different currencies as provided for in clause 1.3 or any other currency transactions affecting operations under the Agreement it is the intent that none of the parties shall experience an exchange gain or loss at the expense of or to the benefit of the other parties. It is agreed that any loss or gain to the joint account resulting from the exchange of currency required for operations under the Agreement or from the translations required shall be charged or credited to the joint

account. The operator shall furnish the parties with a 122 P a g e description of the procedure applied by the operator to accomplish said translation or exchange of currencies and provide currency exchange data sufficient to enable nonoperators to translate the billings to the currency of the nonoperators accounts. 1.2.6 Payment of billings by nonoperators shall not prejudice the right of any nonoperators to protest or question the correctness thereof; however all bills and statements rendered to nonoperators by the operator during any year shall conclusively be presumed to be true and correct after twentyfour 24 months following the end of any such year unless within the said twentyfour 24 month period a nonoperator takes written exception thereto and makes claim on the operator for adjustment. No adjustment favourable to the operator shall be made unless it is made within the same prescribed period. The provisions of this subsection shall not prevent adjustments resulting from a physical inventory of the joint property or from a third party claim. 1.3 Advances and Payments 1.3.1 If an operator so requests nonoperators shall advance to the operator the nonoperators share of estimated cash requirements for the succeeding months operation in accordance with clause 6 of the Agreement. The operator shall make written request for the advance to nonoperators at least twenty 20 days prior to the first banking day of such succeeding month. The advance shall not be due and payable before the first banking day of the month for which the advance is requested. The request shall set out the funds in the currencies to be expended as estimated by the operator to be required. The nonoperators shall on or before the due date make corresponding advances in the currencies requested by depositing such funds to operators account at a bank as may be from time to time designated by the operator. 1.3.2 Should the operator be requested to pay any large sums of money for operations under the Agreement which were unforeseen at the time of providing the nonoperators with said monthly estimates of its requirements the operator may make a written request to the nonoperators for special advances covering the nonoperators share of such payments. Nonoperators shall advance to operator their share of such advances within fifteen 15 days after date of such notice. 123 P a g e 1.3.3 If nonoperators advances exceed their share of actual expenditure the next succeeding cash advance

after such determination shall be reduced accordingly. However nonoperators may request that excess advances be refunded. The operator shall make such refund within fifteen 15 days after date of such notice.

1.3.4 If nonoperators advances are less than their share of actual expenditure the deficiency shall at operators option be added to subsequent cash advance requirements or be paid by nonoperators within fifteen 15 days following operators billing to nonoperators of such deficiency.

1.3.5 If the operator does not request nonoperators as provided in clause 1.3.1 to advance their share of estimated cash requirements nonoperators shall pay their share of actual expenditure within fifteen 15 days following date of operators billing.

1.3.6 Payments of advances or billings shall be made on or before the due date; and if not so paid the unpaid balance shall be treated as provided under clause 6 of the Agreement.

1.4 Audits

1.4.1 A nonoperator upon at least thirty 30 days advance written notice to the operator and other nonoperators shall have the right at its sole expenses to audit the joint account and related records for any year or portion thereof within the twentyfour 24 month period following the end of such year; however the conducting of an audit shall not extend the time for the taking of written exception to and the adjustment of accounts as provided for in clause 1.2.5. The operator shall make every reasonable effort to cooperate with the nonoperators and the nonoperators shall make every reasonable effort to conduct audits in a manner which shall result in minimum inconvenience to the operator.

1.4.2 All adjustments resulting from an audit agreed between the operator and the nonoperator conducting the audit shall be rectified promptly in the joint account by the operator and reported to the other nonoperator. Any unresolved dispute arising in connection with an audit shall be referred to arbitration in accordance with clause 53 of the Contract.

1.4.3 Except as otherwise provided in the Contract the cost of any audit or verification of the joint account that is for the benefit of all parties shall be chargeable to the joint account if the parties mutually agree.

124 P a g e 2

Section 2 Chargeable Costs Expenditure and Credits

The operator shall charge the joint account for all those costs and expenditure necessary to conduct upstream petroleum operations under the Agreement pursuant to the provisions of clauses 3.1 to 3.11 of appendix B to the contract. The operator shall credit the joint account for all the

proceeds resulting from upstream petroleum operations under the Agreement pursuant to the provisions of clause 3.12 of appendix B to the Contract.

STRATEGIC ALLIANCE AGREEMENT BETWEEN NIGERIAN PETROLEUM DEVELOPMENT COMPANY LIMITED AND SEPTA ENERGY NIGERIA LIMITED FOR THE DEVELOPMENT AND PRODUCTION OF OMLS 438 AND 41.

b TFFRFE.FSTRATEGIC ALUANCE AGREEMENT BETWEEN IGERIAN PETROLEUM DEVELOPMENT CO PAN ITED and SEPTA ENERGY NIGERIA LIMITED for DEVELOPMENT AND PRODUCTION OF OML. B AND 41 of the one part; day of .. 2010 THIS AGREEMENT is made this BETWEEN NIGERIAN PETROLEUM DEVELOPMENT COMPANY LIMITED a company incorporated under ihe laws of the Federal Republic of Nigeria whose

registered office is at 62 Sapele Road Benin City hereinafter referred to as NPDC which expression shall where the context so admits include its successors and assigns AND SEPTA ENERGY NIGERIA LIMITED a company incorporated under the laws of the Federal Republic of Nigeria whose registered office is at Plot 99 Ajose Adeogun Street Victoria Island Lagos hereinafter referred to as SEPTA which expression shall where the context so admits include its successors and assigns of the other part. WHEREAS the Federal Government of Nigeria Government has granted consent vide a Deed of Assignment dated 16 September 2010 for the Nigeria National Petroleum Corporation NNPC] to assign its fifty five per cent 55 equity interest in the Contract Area to NPDC WHEREAS SEPTA has offered to carry NPDC's equity interest share of Petroleum Operation Costs and provide technical expertise as and when required in relation to Petroleum Operations in the Contract Area; WHEREAS Government in consideration of the huge capital outlay and other resources required for Petroleum Operations in the aforementioned areas has approved that NPDC enter into a strategic alliance with SEPTA for the provision WHEREAS NPDC and SEPTA warrant that they have the right power and authority to enter into this Agreement; e WHEREAS SEPTA represents that it has technical competence, professional skills and funds both local and foreign necessary to support NPDC in Petroleum Operations for the Contract Area and has agreed to provide the funds for carrying out Petroleum Operations and further agreed to support NPDC with technical expertise. NOW THEREFORE in consideration of the premises and mutual covenants herein contained the Parties hereby agree as follows ARTICLE 1 1.0 DEFINITIONS 1.1 In this Agreement including the recitals and the Annexes attached hereto unless the context otherwise requires words and expressions used shall bear the meanings stated herein Accounting Procedure means the rules and procedures set forth in Annex C attached hereto and forming part of this Agreement; Affiliate or Affiliated Company means a company or other entity that controls or is controlled by a Party or a company or other entity which controls or is controlled by a company or other entity which controls a Party; and for the purpose of this definition control means ownership by one company or entity of at least fiftyone per cent 51 of the voting stock if the other company is

company issuing stock or the controlling rights or interest if the other entity is not a company.

Available Crude Oil means the Crude Oil won saved and allocated to NPDC from the Contract Area.

Available Natural Gas means the non associated natural gas won saved and allocated to NPDC from the Contract Area.

Barrel means a quantity or unit of Crude Oil equal to fortytwo 42 United States gallons at the temperature of sixty degrees 60 Fahrenheit at normal atmospheric pressure.

Barrels of Oil Equivalent or BOE means the amount of energy equivalent contained in a barrel of crude oil 5.8×10^6 BTU.

BCF means billion cubic feet of Natural Gas.

Budget means the cost estimate of items included in Work Programme.

CAPEX means the costs referred to in Article 1 paragraph 2 of Annex C of this Agreement.

Agreement means this Strategic Alliance Agreement including the Annexes attached hereto.

Contract Area means the area covered by Oil Mining Leases OMLs 438 and 41 and any subdivisions arising therefrom in compliance with the relinquishment provisions of Paragraph 12 of the first schedule to the Petroleum Act.

The Coordinates of the Contract Area is as described in Annex A hereto.

Term of Agreement means the period referred to in Article 3.

Companies Income Tax or CIT means the tax obligations arising from the utilization of natural gas as defined in the Companies Income Tax Act Cap C20 LFN 2004 as amended CITA.

Contract Year means a period of twelve 12 consecutive calendar months from the Effective Date of this Agreement or from the anniversary of the Effective Date.

Cost Oil means the quantum of Available Crude Oil allocated to the Parties to enable the Parties to generate the proceeds to recover their respective costs incurred in carrying out Petroleum Operations under this Agreement.

Cost Gas means the quantum of non associated gas allocated to the Parties to enable the Parties to generate the proceeds to recover their respective costs incurred in carrying out Petroleum Operations with respect to non associated gas under this Agreement.

Crude Oil means mineral oil in its natural state before it has been refined or treated excluding basic sediments and water or other foreign substances.

Crude Oil Proceeds means the amount in Dollars determined by multiplying the Official Selling Price by the number of Barrels of Available Crude Oil lifted by either Party.

US.

Development means Petroleum Operations undertaken in the Contract Area for the purpose of

putting the Contract Area into production pursuant to any development programme approved in accordance with Article 9 hereof. cost not limited to Development Costs means the of developmental activities which includes but is not limited to drilling completing capping plugging and abandoning appraisal development water injection or gas injection wells the construction and installation the production storage transportation and delivery and evacuation of Crude Oil and Natural Gas as well as the installation of secondary recovery facilities. Development Costs Incremental Production activities. facilities and equipment required for Incurred include during shall cost also of Effective Date means the date of the execution of this Agreement by the Parties hereto being the day and year first above written Financial Year means a period of twelve 12 calendar months from the 1 January to the 31 December. Fixed Assets means immovable property and includes movable property which has been affixed installed constructed or attached to immovable property as part of the facilities utilised for carrying out Petroleum Operations. Foreign Exchange means currency other than acceptable to both NPDC and SEPTA. that of Nigeria that is Gross Negligence means any act of failure to act by the Operator or SEPTA which was intended to cause or which was in reckless disregard or wanton indifference to the harmful consequence that the Operator or SEPTA knew or should have known such act or failure would have on (a) safety of life or property or (b) Petroleum Operations or (c) books and accounts particularly of industry accounting standards and procedures. Incremental Production means monthly production of Crude oil or Natural Gas over and above Proven Developed and Producing reserves attributable to capital contributions by SEPTA 5 LIBOR means the seven day term London InterBank Offer Rate for U.S. Dollars for similar amounts to the sums in question quoted by Barclays Bank in London at 1100 a.m. on the first business day of the relevant period. Management Committee means the committee established by NPDC and SEPTA to carry out the functions set out in Article 7 of this Agreement Market Price means official selling price in a given month of the Crude Oil and non associated Natural Gas produced from the Contract Area in US Dollars per Barrel shall be related to Dated Brent Differential NNPC in accordance with the NNPCs monthly published price for the different grades of Crude Oil. MCF means million cubic feet of

Natural Gas. ~~le~~Dated Brent means the average of Platts midrange quotations of Dated Brent crude as published by Platts Crude Oil marketwire. Differential means the monthly premium as published by NNPC. The applicable pricing shall be on either Prompt Advanced or Deferred basis Prompt basis shall be five (5) consecutive published quotations after the bill of lading date with the bill of lading date as day zero. Advanced valuation shall be five (5) consecutive published quotations with the fifth day before the bill of lading day i.e the bill of lading day is day six. Deferred pricing option shall be five (8) consecutive published quotations with the 14 day after the bill of lading date as day one i.e. the bill of lading date is day zero. However each Party's preferred option must be indicated at close of work 4.00 pm of the sixth (6) working day before the first day of the laycan. In case either Party's preferred option is not advised to the PMT by close of work of the last working day prior to the first day of the laycan the Prompt option will apply in the valuation of that Party's lifting. ~~P~~ For Natural Gas it regulations. shall be US Dollars MCF according to the gas pricing Natural Gas means all gaseous hydrocarbons produced in association with Crude Oil or from reservoirs which produce gaseous hydrocarbons Natural Gas Proceeds means the amount in Dollars determined by multiplying the Official Selling Price by the number of Barrels of Available Crude Oil lifted by either Party. US. Operator means any operator appointed to carry out Petroleum Operations in the Contract Area. Operating Committee means the operating committee established under the joint operating agreement governing the operations of the Contract Area. Party means NPDC or SEPTA Parties means both NPDC and SEPTA. Petroleum Operations means all Crude Oil and Natural Gas Development and Production Operations precessing terminal activities for or with respect to the Contract Area. transportation and Crude Oil Petroleum Operations Costs means expenditures made and obligation incurred in carrying out Petroleum Operations as determined in accordance with this Agreement and the Accounting Procedure. Petroleum Profit Tax or PPT means the tax obligations arising from the Petroleum Operations as defined in the Petroleum Profit Tax Act Cap P13 LFN 2004 as amended PPT Act. Production Operations Costs means all costs incurred in carrying out Production Production Operations means all operations carried out subsequent to Development in

order to produce, treat, store, convey and deliver Crude Oil and Natural Gas from wells, platforms and facilities to a refinery terminal or other utilisation or marketing point. Profit Oil means the balance of Available Crude Oil after the allocation of Royalty Oil, Cost Oil and Tax Oil. Profit Gas means the balance of Available Natural Gas after the allocation of Royalty Gas, Cost Gas and Tax Gas. Proven Developed and Producing or PDP or p1 Developed means the monthly production forecast attached to this Agreement attributable to the Proven Developed and Producing reserves from the Contract Area not less than 26 Million BOE or greater than 40 Million BOE in the aggregate. Project Management Team or PMT means a team made up of personnel from NPDC and SEPTA appointed by the Management Committee and controlled by SEPTA for a minimum period of 3 years and no longer than 5 years from the Effective Date. Quarter means the time interval from; January 1 to March 31 inclusive, April to June 30 inclusive, July 1 to September 30 inclusive, October 1 to December 31 inclusive. Royalty means the amount payable pursuant to the Petroleum Act and Petroleum Drilling and Production Regulations Cap P10 LFN 2004 as amended. Royalty Oil means the quantum of Available Crude Oil allocated to NPDC which will generate an amount of proceeds equal to the actual payment of Royalty. Royalty Gas means the quantum of Available Natural Gas allocated to NPDC which will generate an amount of proceeds equal to the actual payment of Royalty. Tax Oil means the quantum of Available Crude Oil allocated to NPDC which will generate an amount of proceeds equal to the actual payment of PPT. Tax Gas means the quantum of Available Natural Gas allocated to NPDC which will generate an amount of proceeds equal to the actual payment of CIT. U.S. Dollars means the currency of the United States of America. Wilful Misconduct means in relation to the Operator or SEPTA an intentional, conscious, reckless and wanton disregard of any material provision of this Agreement; or any substantial part of the Work Programme as contained in Article 9. But shall not include an intentional and conscious disregard of either a or o above if life property or Petroleum Operations. the same relates to safeguarding of Work Programme means for the applicable period a statement itemizing the Petroleum Operations to be carried out in the Contract Area. Working Capital means the funds required to conduct

Production Operations. 2P Reserves means 335 Million BOE REST OF PAGE INTENTIONALLY LEFT BLANK ;pff ARTICLE 2 ENTRY FEE 2.1 2.2 23 2.4 2.5 NPDC ocknowledges SEPTAs obligation to pay Fifty Four 54 Milion U.S. Doflars 1o NPDC s an entry fee for participation in the development of 2P Reserves. 5.1 In the event NPDC is designated as the Operator of the Contract Area or a conduct all joint operations with utmost good faith and in a good workmanlike manner in accordance with good industry practice and all applicable laws and regulations; b maintain full and accurate records of all Petroleum Operations performed under this Contract; c be always mindful in the conduct of its operations of the rights and overall interests of Nigeria; d give preference to such goods and services which are available in Nigeria and can be rendered by Nigerian citizens provided they meet the required specifications and are competitive in price; e For the purpose of arriving at Profit Oil and Profit Gas carry out the estimated and final PPT calculation in accordance with the PPT Act and CITA CAP C21 LFN 2004 and submit same on a

timely basis to NPDC; f Allocate 10 to each Party the right to lift in accordance with Annex E. and freely export and re-export abroad the receipts from the 10% share of proceeds from the sale of Available Crude Oil and Available Natural Gas allocated to it hereunder; g give to the Parties full access at all reasonable times during usual business hours to all books records inventories and accounts of any kind or nature maintained relating to Petroleum Operations provided that the Party gives to PMT not less than seven (7) days prior notice in writing and give the Parties the right of access to the Contract Area at all reasonable times to inspect and observe Petroleum Operations of every kind and character carried on in the Contract Area. PMT shall provide either Party with necessary facilities to gain such access provided that the provision of such facilities shall not unduly interfere the conduct of Petroleum Operations hereunder; with i i consult freely with and make full and frank disclosure to the Parties keep them currently concerning Petroleum advised of in connection therewith; matters of importance arising Operations and all except as otherwise provided in this Agreement or as may be authorized by the Management Committee PMT shall not permit or suffer any lien or other encumbrance to be filed or to remain against personal property thereon or related thereto nor against Crude Oil and Natural Gas produced and saved as a result of its operations hereunder unless such lien is imposed by a Court of competent jurisdiction; physical equipment real material only or k have the right to assign and retain such technical administrative and supervisory personnel as deployed to it and consultants as may be necessary for the conduct of Petroleum Operations subject to approval of the Management Committee; l keep accurate records and books of accounts with respect to Petroleum Operations which shall be available during normal business hours to NPDC and SEPTA authorized representatives. Such records and books shall comply with Annex C and generally accepted Accounting Principles and Procedure and with due regard to the requirements of the laws and regulations; m promptly provide to the Management Committee approvals for any expenditure when requested by a Party Parties Parties with copies of n not without the written approval of the Management Committee dispose of sell or re-export any property of such historic cost exceeding One Hundred Thousand Naira N100000.00 per unit or batch or such other

value as may from time to time be determined by Management Committee. Notwithstanding the provision herein PMT hereof shall furnish NPDC and SEPTA quarterly returns of all items of property disposed of regardless of value; time to utilize in Petroleum Operations equipment exclusively owned and made available by a Party and the charges thereafter to the operations shall be as specified in the Accounting Procedure; REST OF PAGE INTENTIONALLY LEFT BLANK

ARTICLE CONDUCT OF JOINT OPERATIONS

6.1 The Parties shall work together to ensure the efficient conduct of The Petroleum Operations in the Contract Area. To this effect an operating structure shall be established where the various departments shall be constituted into operating units and shall have the substantive positions and their respective deputies alternatively manned by the Parties as to this Agreement for as long as the conduct of specified in Annex B Petroleum Operations subsists. Subject to Article 6.5 hereof the Project Operations Manager position to which the operating structure reports shall be held initially by SEPTA for a period of three (3) years and thereafter the position shall be held by NPDC.

6.3 PMT shall be based in an NPDC office. An operational base shall be sited in a convenient location.

6.4 All personnel of PMT shall receive uniform treatment with respect to salaries and other benefits in line with their respective positions

6.5 6.6 6.7 as provided for Without prejudice to SEPTA's right to Cost Oil Profit Oil Cost Gas and Profit

10 PMT shall be fully responsible for Gas Petroleum Operations for a minimum of three (3) years but not exceeding 5 years from the Effective Date. Thereafter SEPTA shall cease to have control PMT. However where SEPTA has not recovered all costs before the expiration of five (5) years SEPTA shall be entitled to recover such costs

Article 11 Upon NPDC being fully responsible for Petroleum Operations NPDC shall continue with Petroleum Operations in accordance with the provisions of this Agreement. Litigation and settlement of claims in connection with the Contract Area or Petroleum Operations shall be conducted for and on behalf of the Parties by NPDC pursuant to the direction of the PMT; provided however not to that NPDC shall exceed N300000.00 Three Hundred Thousand Naira or the foreign currency equivalent without the approval of PMT. NPDC however shall promptly report any such aforesaid settlement to PMT. NPDC shall notify SEPTA of any process

served upon it or of any process it intends to serve in have authority claims and litigation setile 17 any action in relation to Petroleum Operations. Nothing contained in this Article 6.7 shall preclude SEPTA from acting on its own behalf and at its own expense if in its opinion it considers such action advisable or necessary to protect its particular interest hereunder. However SEPTA shall not pursue a course of action contrary to the course of action then being undertaken for the Petroleum Operations with respect to such litigation. in REST OF PAGE INTENTIONALLY LEFT BLANK W

ARTICLE 7 MANAGEMENT COMMITTEE 7.1 A Management Committee shall be established within thirty (30) days from the Effective Date of this Agreement for the purpose of providing orderly direction on all matters pertaining to Petroleum Operations and Work Programme. The powers and duties of the Management Committee shall include but not be limited to the following: a) b) [o] d e f g h i revision amendment and approval of the Programme and Budget; all proposed Work revision amendment and the proposed recommendations made by either Party or by any subcommittee with respect to Petroleum Operations; approval and ensuring that PMT carries out the decisions of the Management Committee and also Petroleum Operations is conducted in accordance with the relevant Nigerian laws; to ensure that the revision or approval of the sale or disposal of any items or movable property relating to Petroleum Operations in accordance with the provisions of this Agreement; resolution of all audit observations; the consideration of periodic performance in respect of approved Work Programme and Budget review of the award of contracts for Petroleum Operations with individual value of Five Hundred Thousand United States Dollars USD 500,000 and above; approval of qualified contractors and subcontractors list; any other matters relating to Petroleum Operations. 7.2 a) The Management Committee shall consist of eight (8) persons appointed by the Parties as follows NPDC SEPTA 4 4 b) Each Party shall designate by notice in writing to the other Party its representatives to serve as members of the Management Committee as provided in Article 7.2a hereof and their respective alternates which members or alternates shall be authorised to represent that Party with respect to the decisions of the Management Committee. Such notice shall give the names titles and addresses of the designated members and alternates S

s c d e At least fourteen 14 days prior to each scheduled Management Committee meeting the Secretary shall notify members of the meeting and deliver to each member an agenda of matters with briefs to be considered during each meeting. Matters which are not delivered within the period stated shall not be considered unless the Management Committee agrees. However no agenda shall be required in the event of an emergency meeting. Otherwise agreed by Party may change any of either Party's respective members or alternates from time to time by notifying the other Party in writing not less than ten 10 days in advance of the effective date of such change. NPDC shall appoint the chairman Chairman of the Management Committee. SEPTA shall appoint the secretary Secretary NPDC shall appoint the assistant secretary Assistant Secretary both of whom shall have no voting rights. The Secretary shall keep minutes of all meetings and records of all decisions of the Management Committee. The minutes of each meeting shall be approved by the Management Committee at the next meeting and signed by the Chairman and Secretary and copies thereof delivered to each Party.

f The Project Operations Manager and his Deputy if not members or alternates shall attend all Management Committee meetings but shall have no voting rights. i l b j i 7.3 7.4a by the Parties agreed otherwise Unless the Management Committee shall meet at on NPDC office once every three 3 calendar months or at such other intervals or venue as may be agreed by the Management Committee. The quorum for any meeting of the Management Committee shall consist of three 3 representatives of NPDC and three 3 representatives of SEPTA. The Chairman or his alternate and the SEPTA's Managing Director or his alternate must be present at every Management Committee meeting for a quorum to be formed. Except as otherwise expressly provided in this Agreement all decisions of the Management Committee shall be reached by the unanimous vote of the Parties. If unanimity is not obtained on any matter including any matter pertaining to Work Programme or Budget proposed to the Management Committee then the 20 rrrrm7.5 At Management Committee shall meet again to attempt to resolve such matter not later than fourteen 14 days after the meeting in which the proposed matter was rejected by a negative vote. Any portion of such proposal that is not rejected shall insofar as possible be carried out less seven 7 days prior to such second meeting

the Party casting the dissenting vote shall provide to the other Party in writing in reasonable detail the reasons for such dissenting vote. If such written reasons are not provided at least seven (7) days prior to such second meeting then the proposal shall be deemed approved. In such second meeting the agenda shall comprise such written reasons as provided by the dissenting Party. If unanimity is not obtained at the second meeting the Management Committee shall meet a third time within fourteen (14) days after the second meeting. If unanimity is not obtained during the third meeting then NPDC and SEPTA may agree to appoint an independent qualified expert to advise on the matter which advice shall be binding on the Parties. In the event of failure of the Parties to agree to the appointment of the said expert the provisions of Article 23 shall apply. If unanimity is not obtained at the second meeting, then not obtained in the third meeting, the Parties shall be bound and abide by each decision of the Management Committee duly made in accordance with the provisions of this Agreement. NPDC shall exercise its votes in such manner to give effect to decisions and procedures in accordance with the decisions of the Management Committee and shall implement Management Committee's decisions at any Operating Committee meeting. The Management Committee shall establish technical subcommittees and any other advisory subcommittees from time to time as it considers necessary such subcommittees legal services budget and finance and as follows: b Each subcommittee established pursuant to this Article 7.5 shall be given terms of reference by the Management Committee and shall be subject to such direction and procedures as the Management Committee may give or determine. Parties. The Management Committee shall appoint the members of the subcommittees which shall comprise equal representation from the subcommittees shall be appointed by the Management Committee. The chairmen and the secretaries of the subcommittees shall be appointed by the Management Committee. c The deliberations and recommendations of any subcommittee shall be advisory only and shall become binding and effective upon acceptance by the Management Committee. The Management Committee shall cease to exist upon the expiration of the conduct of Petroleum Operations by PMT thereafter a new body shall be established to be known as supervisory committee to take care of SEPTA's continued interest in the reserve. SEPTA shall attend all joint operating agreement Operating Committee meetings as NPDC's adviser. SEPTA

shall be an observer and not entitled to vote at the meetings.

7.6 7.7 ARTICLE 8 FUNDING OF PETROLEUM OPERATIONS

8.1 8.2 8.3 8.4 SEPTA shall provide all the funds required for NPDCs 55 share of Petroleum Operation Costs subject to Article 8.2 in accordance with approved Work Programme and the Work Programme shall be concluded by PMT subject to approval of the Management Committee within fifty 50 days from the Effective Date to estimate the capital investments for the Development and the required initial Working Capital. Based on this review the Management Committee shall capital investments which shall be covered by the parent company Guarantee. days approve the amount for Budget. A review of within seven days 7 The costs incurred by the Parties in carrying out Petroleum Operations shall be recovered by the Parties through Cost Oil or Cost Gas in accordance with Article 10 and the Accounting Procedure as set out in Annex C. All bank transactions shall be made through bank accounts opened and maintained by SEPTA exclusively for the Petroleum Operations. SEPTA shall open and maintain project bank accounts exclusively for funding Petroleum Operations and shall procure that NPDC shall have unlimited inquiry and audit on date and all information and transactional documents including all accounts records and balances as they occur from bank accounts and project bank accounts referred to in Articles 8.3 and 8.4 right to copies of If after takeover of Petroleum Operations by NPDC pursuant to Article 6.5 hereof Parties agree that production can be increased and the additional Development Costs are required to add facilities not included in the development programme including but not limited to infill well secondary recovery facilities additional processing facilities, deeper wells and artificial lift SEPTA shall provide NPDC share of Petroleum Operations Costs required to carry out such additional development activities.

8.4 8.7 The additional capital investments referred to in Article 8.6 hereof shall be recovered by SEPTA through Cost Oil and Cost Gas in accordance with Article 10 and the Accounting Procedure and SEPTA shall be entitled to receive a share of Profit Oil and Profit Gas over the additional production as provided for in Article 10.2 hereof. SEPTA shall bear all losses associated with funding NPDCs 55 share of Petroleum Operations under this Agreement.

ARTICLE DEVELOPMENT E AND BUDGETS

9.1 9.2 9.3 If NPDC is designated the

Operator of the Contract Area or part thereof within sixty 60 days from the Effective Date PMT shall submit to the Management Committee for approval the development plan which shall include the development programme and relevant Budget appropriately apportioned into yearly phases report the meetings of At the Management Committee to consider and approve the Work Programme and Budget for each year PMT shall submit a for conduct of Petroleum Operations in accordance with Annex B. During such meetings PMT of on organizational structure for the previous year. on organizationat structure performance ufiized review actual report shall the the be to of to be out info under caried phases quarterly The Development plan shall include the Work Programme and Budget apportioned the Development plan during the remainder of the financial year. In respect of subsequent financial years the Work Programme and Budget shall be submitted not later than 31st August of the preceding financial year. Such services Work Programme and Budget shall comprise all including and completion programmes construction and assembling of field installations and equipment as may be necessary to permit the production storage. transportation and delivery of Crude Oil and Natural Gas from the Contract Area. The Development programme and Budget shall decided as necessary. W environmental requisite studies limited drilling but not for. 9.4 PMT shall submit to Management Committee any revision of the annual Development programme and Budget. Any such revision of the approved Development Budget shall be made by mutual agreement in the event of emergency or extraordinary circumstances that require immediate action PMT may take actions it deems necessary to protect life and property and the interest of Parties and shall promptly notify Parties in writing within fortyeight 48 hours notwithstanding the provisions of this Article 9.4 any cost so incurred shall be recoverable. 4 REST OF PAGE INTENTIONALLY LEFT BLANK

24 PF.FPFA.FFL 5[L L ARTICLE 10 RECOVERY OF PETROLEUM OPERATIONS COSTS AND CRUDE OIL AND NATURAL GAS ALLOCATION 101 Crude Oil and Natural Gas Allocation The allocation of Available Crude Oil and Available Natural Gas shall be in accordance with Annex C Annex D and this Article 10 as follows a b Royalty Oil and Royalty Gas shall be allocated to NPDC in such quantum as will generate an amount of proceeds equal to NPDCs

Royalty applicable to the Contract Area. Cost Oil and Cost Gas shall be allocated to the Parties in such quantum as will generate an amount of proceeds sufficient to recover the following:

- i. Undepreciated costs defined in execution of this Agreement shall be allocated to NPDC; as the Accounting Procedures incurred prior to associated Capital Costs to Development Costs and Production Costs related to the Production of production profile attached hereto as Annex H shall be allocated to SEPTA; P1 Developed reserves as agreed in Incremental Investment Development Costs and Production Costs made by SEPTA shall be recovered from incremental volumes i.e. the monthly production from 2P reserves less the P1 Developed reserves as indicated in the production profile attached hereto as Annex H shall be allocated to SEPTA. Costs expended in United States Dollars will be recovered in United States Dollars through Cost Oil and Cost Gas allocations costs expended in currencies other than United States Dollars will be converted to United States Dollars at the last available exchange rate and recovered through Cost Oil and Cost Gas allocation.
- c) Tax Oil and Tax Gas shall be allocated to NPDC in such quantum as will generate an amount of proceeds equal to the PPT and CIT liability relevant to the production in the Contract Area.

After the above, Profit Oil being the balance of Available Crude Oil after deducting Royalty Oil Cost Oil and Tax Oil and Profit Gas being the balance of Available Natural Gas after deducting Royalty Gas Cost Gas and Tax Gas respectively shall be shared by the Parties pursuant to the Accounting Procedure as follows:

- i. Profit Oil and Profit Gas attributable to undepreciated costs associated to Capital Costs incurred prior to execution of the production profile this Agreement as attached hereto as Annex H the following ratio shall be allocated in indicated in NPDC Ninety per cent [90] SEPTA Ten per cent [10]. Up to the full recovery of Development Costs by SEPTA Profit Oil shall be allocated in the following ratio NPDC Forty per cent [40] SEPTA Sixty per cent [60]. Thereafter Profit Oil shall be allocated in the following ratio NPDC Sixty five per cent [65] SEPTA Thirty five per cent [35].
- ii. Up to the full recovery of Development Costs related to the be contingent allocated in the following ratio resources development Profit shall be NPDC Forty per cent [40] SEPTA Sixty per cent [60]. Thereafter Profit Oil shall be allocated in the following ratio NPDC Sixty five

per cent 65 SEPTA thirty five per cent 35 [26 iv. Up to the full recovery of Development Costs regarding non associated gas by SEPTA Profit Gas shall be allocated in the following ratio NPDC Forty per cent 40 SEPTA Sixty per cent 60 Thereafter Profit Gas shall be allocated in the following ratio NPDC Sixty five per cent 65 SEPTA Thirty five per cent 35 v. Up to the full recovery of the Development Costs of the contingent resources development Profit Gas shall allocated in the following ratio NPDC Forty per cent 40 SEPTA Sixty per cent 60 Thereafter Profit Gas shall be allocated in the following ratio NPDC Sixty five per cent 65 SEPTA thirty five per cent 35 103 Each Party shall take in kind and dispose of its allocation of Cost Oil Using Cost Procedure Annex D. in accordance with Oil and Profit Gas Profit Gas the Either Party may at the request of the other if the other Party's Cost Oil Cost Gas Profit Oil and Profit Gas pursuant to Article 10.1 and the lifting Party shall within thirty 30 days transfer to the account of the nonlifting Party the proceeds of the sale to which the nonlifting Party is entitled. Overdue payments shall bear interest at the annual rate of three 3 months LIBOR Either Party may purchase any portion of their respective allocation of Cost Oil Cost Gas Profit Oil and Profit Gas from the Contract Area.

10.6 Both Parties shall meet on a monthly basis as may be agreed to reconcile all Crude Oil and Natural Gas allocated and lifted during the period as per Annex E

ARTICLE 11 VALUATION OF AVAILABLE CRUDE OIL 1.1 Available Crude Oil shall be valued in accordance with the following procedures a On the commencement of production from new reservoirs PMT shall engage the services of an independent laboratory of good repute to determine the assay of the new Crude Oil b When a new Crude Oil stream is produced liftings shall be made for a trial marketing period of three 3 calendar months or the period required to lift the first three 3 cargoes whichever is shorter. During the trial marketing period PMT shall; c i i iv v collect samples of the new Crude Oil upon which the assay shall be performed as provided in Article 1.1 a above; determine quality and yield of the new Crude Oil; share in the marketing such that each Party markets approximately their proportionate share of the new Crude Oil notwithstanding the fact that a Party's share of Available Crude Oil may be lifted in the Process; payments thereafter shall be made in accordance with Article 10.5;

exchange information regarding the marketing of the new Crude Oil including documents which verify the sales price and terms of each lifting apply the actual F.O.B. sales price to determine the price of each lifting. Such F.O.B sales pricing for each lifting shall continue after the trial marketing period until a valuation of the new Crude Oil has been completed but in no event shall it be longer than ninety 90 days after conclusion of the trial marketing period. As soon as practicable but in any event not later than sixty 60 days after the end of the trial marketing period PMT shall review the assay yield and actual sales data. PMT shall present to M 28] i] proposal for the valuation of the new Crude Oil. A valuation method whether spot related or any other method acceptable to both Parties shall be established for determining the price for each lifting of Available Crude Oil. Such valuation method shall be in accordance with the Official Selling Price published by NNPC or relevant government authority. It is the intention of the Parties that such prices shall reflect the true market value of the new Crude Oil. The valuation method determined hereunder including the product yield values shall be mutually agreed within thirty 30 days of the foregoing which; deferment such valuation to an independent consultant. upon the conclusion of the trial marketing period the Parties shall be entitled to lift their share of Available Crude Oil pursuant to Article 10 and the Lifting Procedure meeting be failing referred to shall from when a new Crude Oil stream is produced from the Contract Area and is commingled with an existing Crude Oil produced in Nigeria which has an established Official Selling Price basis then such basis shall be applied to the extent practicable for determining the Official Selling Price of the new Crude Oil. PMT shall meet and decide on any appropriate modifications to such established valuation basis which may be required to reflect any change in the market value of the Crude Oil as a result of commingling. e 1.2 If in the opinion of either Party an agreed price valuation method fails to reflect the market value of the Crude Oil produced in the Contract Area then such Party shall propose to the other Party modifications to such valuation method once in every six 4 months but in no event more than twice in any year The Parties shall then meet within thirty 30 days of such proposal and mutually agree on any modifications to such valuation within thirty 30 days from such meeting failing which

determination of such valuation shall be referred to an independent consultant. P REST OF PAGE

On 3 June 1992 Allied Energy was awarded an oil prospecting licence to block 210 OPL 210 an interest of 2.5in which Allied subsequently assigned to Camac Nigeria on 30 September 1992.B. On 28 August 2002 Allied were granted oil mining leases 120 and 121 OMLs with respect to the OPL 210 for a term of 20 years commencing from 27 February 2001.C. Pursuant to a Deed of Assignment dated 22 July 2005 Allied assigned to NAE a 40 interest in the OMLs with remaining 60 being retained by Allied.D. On 22 July 2005 Allied and NAE entered into a Production Sharing Contract PSC setting out the terms of agreement in relation to petroleum operations on the territory of the OMLs.E. On 7 April 2010 Allied Energy and CAMAC Nigeria novated to CPL the beneficial ownership of their respective interests in and all rights and obligations under the PSC in relation to the Oyo Field pursuant to the Agreement Novating Production Sharing Contract of the same date entered into by and among Allied Energy CAMAC NigeriaCPL and NAE the First Novation.F. Each of Allied Energy and Camac Nigeria now wishes to novate to CPL the beneficial ownership of their respective interests in and all rights and obligations in relation to the OMLs under the PSC that were not heretofore novated pursuant to the First Novation subject to the terms and conditions hereinafter set forth.NOW IT IS HEREBY AGREED as

follows

11.11.21.2.11.2.2 Definitions and interpretation In this Agreement unless the context otherwise requires In this Agreement unless the context otherwise requires all words and expressions defined in the PSC shall have the same respective meanings in this Agreement. references to clauses and schedules are to Clauses of and Schedules to this Agreement; headings do not affect the interpretation of this Agreement the singular shall include the plural and vice versa and references to one gender include all genders; 21.2.31.2.41.2.522.12.2 references to any English legal term or concept shall in respect of any jurisdiction other than England be construed as references to the term or concept which most nearly corresponds to it in that jurisdiction; a reference to any other document referred to in this Agreement is a reference to that other document as amended revised varied novated or supplemented at any time; and any phrase introduced by the terms including include in particular or any similar expression shall be construed as illustrative and shall not limit the sense of the words preceding those terms.

Novation Subject to Clause 3.3 and with effect from and including the Second Novation Date Allied Energy and Camac Nigeria assign to CPL all their respective rights liabilities duties covenants undertakings warranties and other obligations contained in the PSC in respect of the lease areas of the OMLs that were not assigned pursuant to the First Novation including all claims and demands in respect thereto arising in connection with the PSC. The rights liabilities duties covenants undertakings warranties and other obligations being assigned hereunder shall hereinafter be referred to as the Second Novated Interests. Subject to Clause 3.3 and with effect from and including the Second Novation Date CPL accepts all respective rights and liabilities of Allied Energy and Camac Energy under the PSC and agrees to perform all the duties and to discharge all the covenants undertakings warranties and other obligations of Allied Energy and Camac Energy respectively and to be bound by all the terms and conditions of the PSC in respect of the Second Novated Interests.

2.3 This Agreement shall become effective on the date Second Novation Date on which all the Parties hereto have signed this Agreement. Allied Energy shall indemnify and hold each of NAE and CPL harmless against all losses damages injuries expenses and actions of whatever kind and nature suffered by each of them respectively where such

losses, damages, injuries, expenses and/or actions are as the result of the failure of Allied Energy to notify the Department of Petroleum Resources (DPR) of the transaction described in this Agreement. Subject to Article 2.3, NAE acknowledges and agrees to the novation of the PSC contemplated under this Agreement and agrees to be bound by the terms of this Agreement. Unless the context otherwise requires, with effect from and including the Second Novation Date, references to Allied Energy and/or Camac Nigeria and/or Allied in the PSC as far as the Second Novated Interests are concerned in accordance with this Agreement shall be deemed to be references to CPL.

Confirmation of Terms Subject to Clause 3.3 of this Agreement and except where inconsistent with the provisions of this Agreement, the terms of the PSC and the First Novation are confirmed and shall remain in full force and effect. With effect from the Second Novation Date, this Agreement, the First Novation and the PSC shall be read and construed as one document.

2.42.533.13.23.3 For the avoidance of doubt, the Parties hereby confirm that 3.3.13.3.2 the terms and conditions of Articles 8.1a, 8.1c and 8.3 of the PSC relating to Royalty, Oil Tax, Oil and the Escrow Account shall remain unaffected by this Agreement and Allied Energy shall retain its rights and obligations under those Articles; the Parties understand and acknowledge that CPL is an Affiliate of Allied Energy and accordingly agree that the waiver by NAE of its rights in Article 8.1e of the PSC in favour of Allied Energy in respect of the Oyo field and the Second Novated Interests NAE Waiver remains applicable and such NAE Waiver will be deemed to extend to the interest of CPL in the Oyo Field and the Second Novated Interests. For the avoidance of doubt, if at any time CPL ceases to be an Affiliate of Allied, then the NAE Waiver shall no longer apply in accordance with Article 8.1e of the PSC.

3.3.33.3.43.3.544.14.1.14.1.255.15.2 all terms and conditions of the Cooperation Agreement between NAE and Allied Energy dated 15 January 2006 as amended remain in full force and effect and shall remain unaffected by this Agreement, including without limitation to procurement and engineering services provided by Allied Energy to NAE with respect to the Oyo Field and/or the Second Novated Interests.

notwithstanding anything to the contrary in this Agreement or the PSC, CPL shall not be entitled to appoint any representatives in the Management Committee nor to

exercise any right to vote therein in respect of any matters including with respect to the Second Novated Interests. It is understood that CPL's interest in the Second Novated Interests will be represented by Allied notwithstanding anything to the contrary in this Agreement or the PSC but without prejudice to Clause 3.3.1 the following provisions of the PSC shall not apply to CPL but will continue to apply to Allied or the First Party as the case may be Article 5 7.2 7.3 8.6 9 11 12 13.3 14.3. For the avoidance of doubt the evaluation procedures of Article 9 of the PSC shall be binding on CPL.

Representations and Warranties Each Party severally represents and warrants on behalf of itself that it has full power and authority under its memorandum or articles of association or other governing documents and otherwise to enter into and perform its obligations pursuant to this Agreement; and it has duly authorised, executed and delivered this Agreement and this Agreement constitutes valid and binding obligations enforceable against it in accordance with its terms.

Miscellaneous The provisions of Articles 16 Confidentiality and Public Announcements and 20 Laws and Language of the PSC shall apply mutatis mutandis to this Agreement. This Agreement may be executed in any number of counterparts each of which when executed and delivered shall be an original but all of which when taken together constitute a single instrument.

IN WITNESS WHEREOF the Parties have entered into this Agreement on the day and year first above written.

PROJECT DESCRIPTION 2.1. Project Details Bled Project Location The Project Area covers Seven Hundred

Fifty Seven and 1181000 757.118 hectares located in the Municipality of Loreto Province of Dinagat Islands and bounded by the following geographic coordinates Corner Latitude Longitude 1 10 19 30 La ar a0 2 10 20 00 125 37 30 3 10 20 30 125 37 00 4 10 21 00 is 37 00 cS 10 21 00 125 37 3 6 10 21 30 123 .3f 30 Z 10 21 30 125 33. 30 8 10 21 00 123 38 30 9 10 21 00 125 39 00 pelses 10 10 20 30 125 39 00 ll 10 20 30 125 38 30 iZ 10 20 00 125 38 00 3 LO 19 30 125 38 00 Topography and Drainage The region is characterized by moderately rugged topography with the highest elevation of 980 meters above sea level. The mountain ridges generally trend northeast-southwest and are commonly mantled by reddish lateritic soil. The area is principally drained by the Kanlangugan Creek and its tributaries which form dendritic and radial drainage patterns attributed to the uniformity of the rocks over large areas. General Geology The company's mineral property found in the northern portion of Dinagat Island is underlain by ultramafic rocks which include highly serpentized dunite and harzburgite that are closely associated with hypabyssal gabbro bodies diabase. The ultramafic rocks are highly fractured and jointed because of their positions are within the Philippine Mobile Belt. In most of the areas covered by the exploration the ultramafic complex was seen to be overlain by lateritic soil in some areas containing high grade chromite sands. This phenomenon is attributed to the erosion of either massive chromite deposits themselves or dunite rocks containing disseminated chromite. The secondary chromite sands were subsequently carried down deposited and concentrated to lower levels along with the lateritic soils. Chromite mineralization in the region occurs mainly as parallel layering lenses pods and as disseminations or nodules in peridotite formed during the different stages of gravitational settling in the ophiolites Dunite-Harzburgite Transition Zone. The major faults in the area trend in the northeast-southwest direction. They have great influence in the topography and provide structural control over the chromite mineralization and deposition in the region. Estimated Capital Cost Based on the 1999 Financial Statement the company has current assets of PHP 125 Million.²¹ Os . Type of Mineral Mined Metallurgical Chromite. 4. Present Status of the Project The company then known as Malayan Wood Products Inc. started chromite production in 1979. In 1980 the company discovered the Mt. Redondo deposit
