which is being mined until now. A 600 MT per day gravity concentrating plant was built at the mine site in Mt. Redondo Loreto Dinagat Islands. In June 1986 the mining operation was suspended due to the unilateral cancellation of the Operating Contracts by the then Minister of Environment and Natural Resources. The company appealed to the said cancellation and as a compromise a new Operating Contract was executed on February 27 1989 for a period of sixteen 16 years. Since the Asian crisis Krominco Incorporated remains to be the only metallurgical chromite mine in operation undertaking both mining and exploration at the same time. The company in spite of the slump of the World Market Price for chromite in 1999 to 2002 continuously operating until the Environmental Management Bureau issued a Cease and Desist Order CDO on March 22 2000. The said CDO was issued on the ground that the company is operating without an Environmental Compliance Certificate ECC. The CDO was lifted by the Department of Environment and Natural Resources on November 22 2000 after it found out that the company is qualified to exempted from the Environmental Impact Statement EIS System and therefore from the ECC requirement. However the operation was continually suspended due to continuous slump of the chromite prices. The company resumed operation in the 2 quarter of 2004 because of good market for chromite. . Mining Method Open Pit Mining Estimated Annual Production Projected average Annual Production is about 10000 MT of chromite Lumps ore direct shipping ore and another 10000 MT of chromite concentrate. combined. Zaks ts Type of Milling Process Gravity concentration. . Description of Milling Process Pls. see attached flow sheet Crushing and Milling The milling grade ore are fed to the dump bin of the jaw crusher to reduce the size to minus 34. The crashed materials from jaw crusher are conveyed to the double deck vibrating screen where water is introduced specifically at the top deck to separate the slimes. The screen oversize is recycled to the Symon cone crusher to further reduce the particle size to minus 58. The screen undersize goes to the fine ore bin then to the rod mill to reduce the size of the particle to about 80 minus 100 mesh. Classification and Concentration The rod mill product goes to the spiral classifier. The classifier slimes are pumped to the Krebs cyclone. The cyclone underflow is fed directly to the shaking tables while the cyclone overflow goes to the tailings

thickener. The classifier sand is pumped to the Riechert Spirals then to the shaking tables. At the shaking tables the chromite concentrate product which is about 48 CrO₃ goes to the final concentrate bins the middling is fed to the ballmill and the ballmill product is recycled back to the shaking tables while the tailings go to the tailings thickener. Reclaim Water and Tailings Ponds At the tailings thickener the overflow water is reclaimed back to the mill circuit using a pump. The thickeners underflow goes to the tailings pond. The solid wastes in the tailings are allowed to settle down and only the effluents leave the tailings pond. The solid wastes are then recovered through dredging by using a backhoe and are used for construction road surfacing domestic use and other purposes. Remarks The Krominco Mill Plant has a rated capacity of 600 MT per day. Plain water is introduced into the mill circuit to recover chromite minerals. No chemicals are added in the entire process.

2.2. Minerals Reserves and Resources 2.2.1. Ore Reserves

REDONDO OPEN PIT In view of its high potential for chromite mineralization much work was done in the area.

Preliminary exploration work comprising of test pitting xray drilling and deep diamond drilling disclosed economic and mineable ore reserves. Chromite occurs in the form of alternating layers or bands of high grade and milling grade chromite ore mostly found within dunite bodies and at the same time adjacent to the shear zone that is present in the area. The chromite bearing zone in Mt. Redondo generally strikes in the westeast and northwest southeast direction dipping southward though much deviation from these attitudes are expected and observed because of folding and the chromites proximity to the shear zone. Measured Chromite Reserves 329500 MT Indicated

Chromite Reserves 257000 MT **REDONDO OPEN PIT ORE RESERVES**

1990 1991 1996 and 1997 Krominco Incorporated conducted exploration activities comprising of geologic mapping auger drilling and Xray drilling in the Sangay area. The exploration work was able to outline three potential zones of chromite mineralization named Sangay 1 2 and 3. In Sangay 1 a deposit of chromite sand hosted by lateritic soils was delineated via Auger drilling. In Sangay 2 Xray drilling was able to outline a zone of mineralization of about 20 meters wide and 250 meters long of dominantly milling grade chromite. Exploration work in Sangay 3 area was unfinished and so was unable to affirm the presence of chromite boulders and numerous floats in the area though suggest that an economic deposit may be lying within the Sangay 3 area.

Sangay I Measured Chromite Reserves 16000 MT Chromite Sand Sangay 2 Measured Chromite Reserves 125000 MT

SOUTHEAST REDONDO PROSPECTS From 1994-1995 the Southeast Redondo deposit situated 800 meters southeast of the Redondo Open Pit was discovered. The prospect is a consolidation of two chromite deposits namely Southeast Prospect 1 and Southeast Prospect 2. The two prospects are 130 meters apart with initial assay results of 38 Cr₂O₃ and 54 Cr₂O₃ respectively. Further exploration work comprising of auger drilling test pitting and xray drilling delineated the presence of near surface high grade chromite that is found almost always overlying gabbro which in turn overlies the harzburgite basement. Analysis of all the geologic data suggests that the localized chromite deposits in the Southeast Redondo Prospects were brought up to the nearsurface by the gabbro dikes. Though the deposits are relatively small compared to the other areas what makes them favorable is their nearsurface occurrence. Prospect 1 Measured Reserves 900 MT Prospect 2 Measured reserves 700 MT Total Chromite Reserves 1600 MT

TOTAL CHROMITE RESERVES OF KROMINCO INCORPORATED 729100 MT

2.3.6 2d2 Didrede 2.2.4. 28. As of December 2007 the Company has Milling Ore Stockpiled ready for processing 42000 MT Average Grade The Chromite Reserves of Krominco have average grade of 30 Cr₂O₃. Cutoff Grades The company has two products each having a different cutoff grade. For Sorting Lumpy Ore 30 Cr₂O₃ For Milling Ore 12 Cr₂O₃ Estimated Mine Life Based on the companys Chromite Ore Reserves the Milling Ore stockpiled after sorting and the 600 TPD Mill Plant rated capacity the life of the mine is estimated at

ten 10 years and could go beyond because of the ongoing exploration in the whole contract area that expect to uncover more chromite deposits aside from extensions of the present Redondo deposit. Potential for Additional Reserves Exploration of the companys whole contract area is currently being done. This involves Auger drilling spaced 100 m x 100 m that is intended to spot other potential chromite deposits. Aside from that three 3 areas Sangay 1 2 and 3 which display good indications of chromite deposition are still to be tested further by auger and diamond drilling in order to locate the source of the chromite floats and boulders present in the area.

Access Transportation From Surigao City the project area can be reached in three to four hours by commercial motorized bancas which dock at the Loreto Pier though the company has its own piersite located at Sitio Cambinliw Barangay Santiago in Loreto. From the company piersite to the mine site located on the northern slope of Mt. Redondo it takes 15 to 20 minutes to travel by motor vehicle via an allweather road of eight kilometers that was built by the company. Surigao City is accessible either by interisland vessels from Cebu or by bus from Butuan City both having direct flights from Metro Manila.

2.4. Utilities 2.4.1. 2.4.2. Power Supply Milling operation and the other mine site facilities are supplied with 440 Volts 3 phase 220 Volts 2 phase by three units of Caterpillar Gensets 250 kW each in synchronized operation. One Genset unit 175 kW serves as alternate supply while another unit 25 kVA Perkins acts as the standby unit used for lighting loads only. All the Gensets are owned and operated by the company.

Water Supply The mine site has two 2 sources of water 1 by gravity from the nearby tributaries of Kanlangugan Creek and 2 from the companys freshwater dam which is the water source of water of the Mill Plant. The plant uses two 2 units of 30 HP water pumps for its water requirements.

Administration 16 2. Accounting 7 3. Mine Production 30 4. Mine Engineering Safety; MEPEOCRDO 18 5. Motorpool Zi 6. Mill 36 7. Electrical 9 8. Geology and Exploration 8 9. Warehouse 4 10. Laboratory 9 11. General Services 9 12. Contractual Rotation Personnel i27 Total 300 Staff Organization Setup ENGR. JESUS A. BIRONDO Resident Manager of Krominco Inc. Engr. Jesus Birondo is a licensed Mining Engineer and obtained his bachelor degree from Mapua Institute of Technology. Before he joined Krominco Engr. Birondo was holding top positions in other mining companies engaging in copper gold nickel and chromite projects. His experience in mining operations is unprecedented. ENGR. REYNALDO M. GASPE Mine Superintendent of Krominco Inc. Engr. Reynaldo M. Gaspe is

the duly registered and licensed Mining Engineer and passed the board exam in 1982 the same year that he graduated. Engr. R. M. Gaspe holds the Mine Superintendent position for more than ten 10 years. From 1982 to 1994 he was then connected to Atlas Consolidated Mining and Development Corporation Atlas Ventures Incorporated and Manto Coal Mines before joining the company in 1995.

ENGR. WINIFREDO C. GENTAPA Mill Superintendent of Krominco Inc. Engr. Winifredo C. Gentapa is a holder of the degree of Bachelor of Science in Chemical Engineering. Engr. W. C. Gentapa holds the position of Mill Superintendent for more than ten 10 years. He has had wide experience in ore beneficiations in copper gold and chromite having been connected in the past to Atlas Consolidated Mining and Development Corporation and North Davao Mining Corporation.

ENGR. NILO L. DAMONDAMON Motorpool Superintendent of Krominco Inc. Engr. Nilo L. Damondamon is a duly registered and licensed Mechanical Engineer and is a bonafide member of the Philippine Society of Mechanical Engineers. Previously he was the Mobile Superintendent of North Davao Mining Corporation.

2.6.3. Housing The company provides staff house for staff personnel located at the mine site. Daily and contractual workers are staying in their houses about 4 to 7 kilometers from the operation area since the company provides service trucks to and from the minesite every shift.

2.7. Exploration Work Program For the next five years the exploration activities of Krominco Incorporated will focus on the systematic gathering of geologic data from all over the companys claim area. The exploration work program shall consist of auger drilling test pitting surface geologic mapping and diamond drilling. Foremost among the said activities is the 100 meter x 100 meter spaced auger drilling which will cover the whole contract area. Those areas with high chromite shall be further evaluated by digging closely spaced auger drilling and test pitting. If chromite indications are promising shallow winkie drilling will be undertaken to test the depth of the deposits. Deeper spray drilling will also be done once it is proven that the chromite extends even deeper than what the winkie drill can reach. Since the conduct of auger drilling of the whole contract area will need a very long time to complete more closely spaced auger drilling will also be done in the other prospects in order to speed up the delineation of possible occurrence of ore deposits. In

the same way as the above it will be followed by test pitting shallow drilling and deep penetrating xray drilling.

Year One

1. Scout Auger drilling 100 m x 100 m of the contract area
2. Continuation of Exploration of the Redondo Open Pit
 - 2.1. Detailed Surface Geologic Mapping
 - 2.2. Xray drilling in the Southeast Portion
 - 2.3. Shallow Winkie drilling
3. Geologic Investigation of the RedondoSangay Area
 - 3.1. Semidetailed auger drilling 20 m x 200 m
 - 3.2. Test pits/trenches
 - 3.3. Surface geologic mapping
 - 3.4. Detailed auger drilling
 - 3.5. Shallow winkie drilling
 - 3.6. Deeper xray drilling depending on the shallow drilling results

Year Two

1. Continuation of Exploration of the Redondo Open Pit
 - 1.1. Surface geologic mapping
 - 1.2. Xray drilling in the Southeast Portion
 - 1.3. Shallow winkie drilling
2. Geologic Investigation of the RedondoCambinliw Area
 - 2.1. Semidetailed Auger drilling 20 m x 20 m
 - 2.2. Test pits/Trenches 778 holes 8 hectares 225 meters 50 meters 9 hectares; 88 holes 40 m at least 10 pits 9 hectares 192 m; 64 holes 250 m; 10 holes 540 m; 12 holes 8 hectares 225 m 50m 9 hectares 88 holes 40 m; at least 10 pits
 - 2.3 Surface Geologic Mapping 9 hectares
 - 2.4. Detailed Auger drilling 192 m; 64 holes
 - 2.5. Shallow Winkie drilling 250 m; 10 holes
 - 2.6. Deeper Xray drilling depending on the shallow drilling results II 540 m; 12 holes

Year Three

1. Continued Exploration of the Redondo Open Pit
 - 1.1. Surface Geologic Mapping 8 has.
 - 1.2. Xray drilling in the Southeast Portion 225 m
 - 1.3. Shallow Winkie drilling 50m
2. Geologic Investigation of the Area Northeast of Redondo Mine Pit East of the Dam Area
 - 2.1. Semidetailed Auger drilling 20 mx 20 m 9 has.; 88 holes
 - 2.2. Test pits/Trenches 40 m; at least 10 pits
 - 2.3. Surface Geologic Mapping 9 ha
 - 2.4. Detailed Auger drilling 192 m; 64 holes
 - 2.5. Shallow Winkie drilling 250 m; 10 holes
 - 2.6. Deeper Xray drilling depending on the shallow drilling results II 540 m; 12 holes
3. Geologic Investigation of the 109111138136 Block Northern portion of the claim Area II
 - 3.1. Semidetailed Auger drilling 20 m x 20 m 9 ha; 88 holes
 - 3.2. Test pits/Trenches 40 m; at least 10 pits
 - 3.3. Surface Geologic Mapping 9 ha
 - 3.4. Detailed Auger drilling 192 m; 64 holes
 - 3.5. Shallow Winkie drilling 250 m; 10 holes
 - 3.6. Deeper Xray drilling depending on the shallow drilling results 540 m; 12 holes

Exploration Program Cost Estimates

The companys Exploration Program for the next three years is projected to cost P3333700.00 averaging around P1111200.00 per year. Mining Work Program Mining activity will still

be focused in the Redondo Open Pit for the next five years. The company will continue to extract metallurgical chromite through the open pit method. Excavation will be done with the use of two 2 units of backhoe excavators 1.5 cubic meters capacity each assisted by three 3 units of articulated trucks 20 MT capacity each and seven 7 units of Isuzu dumptrucks 12 MT capacity each. The average annual material movement is projected to be 400000 MT. Pls. see attached section of 3year Mine Development Plan Year One 1 1. Continuation of Mine Development and Ore Extraction in the Redondo Open Pit. 2. Extraction of about 70700 MT of Sorting Ore from the Mining Faces. 3. Projected Production of 10000 MT of high grade chromite lumps with final average grade of 46 Cr03. 4. Stockpiling of additional 60700 MT of Milling Ore to the existing millfeed stockpile. 5. Projected chromite concentrate production of 10000 MT with final average grade of 48 Cr203 Projected Milling Tonnage of 60700 MT of milling ore. Year Two 2 1. Continuation of Mine Development and Ore Extraction in the Redondo Open PitExtraction of about 70700 MT of Sorting Ore. Projected Production of 10000 MT of high grade chromite lumps with final average 46 Cr203. Stockpiling of additional 60700 MT of Milling Ore to the existing Millfeed stockpile. Projected chromite concentrate production of 10000 MT with final average grade of 48 Cr 03 Projected Milling Tonnage of 60700 MT of milling ore. Year Three 3 Continuation of Mine Development and Ore Extraction in the Redondo Open Pit Extraction of about 70700 MT of Sorting Ore. Projected Production of 10000 MT of high grade chromite lumps with final average 46 Cr203. Stockpiling of additional 60700 MT of Milling Ore to the existing Millfeed stockpile. Projected chromite concentrate production of 10000 MT with final average grade of 48 Cr203 Projected Milling Tonnage of 60700 MT of milling ore. 2.9. Production Program and Cost Estimate 2.9.1. COMMUNITY DEVELOPMENT PROGRAM Krominco Incorporated is one of the eight companies in Caraga Region that has adopted the Mines and Geosciences Bureaus Information Communication Education ICE Community Development CD Program with the signing of the Memorandum of Agreement last 1998. As with all the other companies that signed the MOA Krominco has allotted an amount equal to 1 of its total Direct Mining and Milling Costs annually for Community Development. Ten 10 of it goes to Science Research Study. The remaining 90 will be distributed to the livelihood 70 infrastructure projects 30 of the companys two host barangays Esperanza and Santiago. The company has already formed its Technical Working Group Speakers Bureau headed by four Krominco representatives two MGB XIII staff one PENRODENR representative the Mayor of Loreto the two Barangay Captains of the concerned Barangays representatives of the Loreto Roman Catholic Church and the Philippine Independent Church and another two from the NonGovernment Organizations based in the Municipality the REACH Foundation. The multisectoral team is in charge of facilitating and monitoring the ICECD programs of Krominco most especially the livelihood projects that the community will choose to undertake. The TWGSB of Krominco believes that the communities are the companys partners in development and believes in the ProPeople Pro Environment and Responsible Mining philosophy. But before giving the amount in the form of livelihood projects to the community the Krominco TWGSB will ensure that the communities will have the proper social preparation. Thus Kromincos Community Development program starts off with the continuation of its Information Communication and Education ICE Projects which started in 1999 before subjecting the communities to a series of Value Formation seminars and Technical Capability and Financial Management trainings necessary for the success of their chosen livelihood projects. Year One 1 1. Continuation of the Information Communication Education ICE Community Development CD Program that was started in 1999. a. To continue sending out News Features and Articles for the

Quarterly Newsletter of the Caraga Region Mining Communities. b. Participation in the Quarterly Radio Program of the Caraga Region Mining Communities. c. Conduct regular meeting to members of Krominco Inc. Community Technical Working Speakers Bureau 2. Continue the immersion of the Community Relations Development Officers in the two Barangays. 3. Value Formation Seminars. 4. Continue extending assistance of Livelihood and Infrastructure Projects to the host mining communities and municipality. 5. Monitor the progress of Livelihood projects extended to the host mining communities. Estimated Cost Php448663.00 based on the estimated Direct Mining and Milling Costs for Year 1. Year Two 2 1. Continuation of the ICECD Program. a. Educational Talks and Minesite tour for Graduating High School students of Loreto National High School and Loreto Academy. b. To continue sending out News Features and Articles for the Quarterly Newsletter of the Caraga Region Mining Communities. c. Participation in the Quarterly Radio Program of the Caraga Region Mining Communities. d. Conduct regular meeting to members of Krominco Inc. Community Technical Working Speakers Bureau 2. Continue the immersion of the Community Relations Development Officers in the two Barangays. Value Formation Seminars. Continue extending assistance of Livelihood and Infrastructure Projects to the host mining communities and municipality. Monitor the progress of Livelihood projects extended to the host mining communities. Estimated Cost Php448663.00 based on the estimated Direct Mining and Milling Costs for Year 2. Year Three 3 1 Continuation of the ICECD Program. a. Educational Talks and Minesite tour for Graduating High School students of Loreto National High School and Loreto Academy. b. To continue sending out News Features and Articles for the Quarterly Newsletter of the Caraga Region Mining Communities. c. Participation in the Quarterly Radio Program of the Caraga Region Mining Communities. d. Conduct regular meeting to members of Krominco Inc. Community Technical Working Speakers Bureau. Continue the immersion of the Community Relations Development Officers in the two Barangays. Value Formation Seminars. Continue extending assistance of Livelihood and Infrastructure Projects to the host mining communities and municipality. Monitor the progress of Livelihood projects extended to the host mining communities. Estimated Cost Php448663.00 based

on the estimated Direct Mining and Milling Costs for Year 3. Total Information Communication EducationCommunity Development ICE CD Program Cost PhP1228260.00 based on the estimated Direct Mining and Milling Costs from Years 1 to 3.4.0 ENVIRONMENTAL MANAGEMENT AND PROTECTION COST ESTIMATE The following is from the summary Cost of Krominco Inc.s Environmental Protection and Enhancement Program though adjusted to show the cost estimates for three years .

management of Petroleum as defined in the Act in Guyana so as to ensure for the people of Guyana the maximum benefits therefrom and for doing such things in relation thereto; 3 With respect to prospecting for and producing Petroleum and for matters connected therewith the Act and Regulations subject to certain limitations and conditions contained therein authorize the Minister to grant Petroleum Prospecting Licences and Petroleum Production Licences; 4 Section 10 of the Act authorizes the Minister to enter into an agreement with any person with respect to inter alia the grant of a Licence the conditions to be included in a Licence the procedure to be followed by the Minister while exercising any discretion conferred Petroleum Agreement 1 Government of Guyana Orinduik PA Y 5 6 7 8 upon him by or under the Act and the manner in which the discretion shall be exercised and any matter incidental to or connected therewith; Contractor submitted to the delegatee a proposal the proposal for a Production Sharing Agreement in respect of a certain offshore area of Guyana on terms and conditions specified in the proposal; GGMC has been authorized by the Minister to negotiate this Agreement subject to the provisions of the Act and Regulations and to the final written approval of the Minister of its and execution thereof and to assist in the administration and implementation thereof; Contractor will have or will acquire the financial resources the managerial technical and industrial competence and the experience to carry out Petroleum Operations and will provide an affiliate company guarantee in accordance with section 13 of the Act; Pursuant to the aforesaid recitals Contractor made an application to the Minister for a Petroleum Prospecting Licence in accordance with regulation 13 of the Regulations as hereinafter defined over the area described in Annex A and shown on the map attached as Annex B subject to the terms and conditions herein set forth and subject to the provisions of the Act and Regulations and Contractor has agreed by execution of this Agreement to accept the said Licence on the said terms and conditions and provisions. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follows Petroleum Agreement Government of Guyana Orinduik PA . Article 1 Definitions LI In this Agreement unless the context otherwise requires Accounting Procedure means the procedure set out in Annex C; Act

means the Petroleum Exploration and Production Act No. 3 of 1986; Affiliated Company in relation to each Party that is a Contractor means a company or corporation; i which is directly or indirectly controlled by the Party; or ii which directly or indirectly controls the Party; or iii which is directly or indirectly controlled by a company or corporation that also directly or indirectly controls the Party. For the purpose of this definition control means the right to exercise a vote of fifty per cent 50 or more of all the voting shares; Agreed Interest Rate means interest computed on a monthly basis at the rate per annum equal to the average London Interbank Offer Rate LIBOR for six 6 months United States dollar deposits as published by the Wall Street Journal on the first Business Day of such month being calculated plus three percentage points 3; Agreement means this Agreement and the Annexes hereto attached and made a part hereof; Appraisal Programme means a programme carried out following a discovery of Petroleum in the Contract Area for the purpose of delineating the Petroleum Reservoir as defined in the Act to which that discovery relates in terms of thickness and lateral extent and estimating the quantity of recoverable Petroleum therein prior to declaration of commerciality; Appraisal Well means a well drilled for the purpose of an Appraisal Programme; Article means an Article of this Agreement; Associated Gas means all Natural Gas produced from any Petroleum Reservoir of which the predominant production is Crude Oil and includes the gas cap which overlies and is in contact with Crude Oil; Barrel means a quantity consisting of fortytwo 42 United States gallons liquid measure measured at standard conditions of atmospheric pressure and temperature 14.7 3 Petroleum Agreement Government of Guyana Orinduik PA a Ree lbssq. inch absolute or 1 Kgsq. cm. absolute and corrected to a temperature of sixty 60 degrees Fahrenheit or fifteen 15 degrees Celsius; Business Day means a day on which the banks in Georgetown Guyana are customarily open for business. Calendar Month or Month means any of the twelve months of the Calendar Year; Calendar Quarter or Quarter means a period of three 3 consecutive months beginning on the first day of January April July or October; Calendar Year or Year means a period of twelve 12 consecutive Months commencing on January and ending on the succeeding December 31 provided however that a Year of a term of a Licence shall be the period specified in section 2 2 b

of the Act; Commercial Discovery means any discovery which the Contractor in its sole judgment considers economic to develop and produce pursuant to the terms of the Agreement; Contract Area means i on the Effective Date the area described in Annex A and shown on the map in Annex B and the subject of the Petroleum Prospecting Licence granted to the Contractor pursuant to Article 3; and ii thereafter any areas which at any particular time are subject to the Petroleum Prospecting Licence or Petroleum Production Licences granted to the Contractor under Article 8; Contract Costs means Exploration Costs Development Costs Operating Costs Service Costs General and Administrative Costs and Annual Overhead Charge; Contractor means Tullow and Eco and includes each of their successors and permitted assignees; Cost Gas has the meaning assigned in Article 11; Cost Oil has the meaning assigned in Article 11; Crude Oil or Oil means crude mineral oil asphalt ozokerite distillates condensates and all kinds of hydrocarbons and bitumens both in solid and liquid forms at standard conditions of temperature and pressure 60 degrees Fahrenheit or 15 degrees Celsius and 14.7 lbssq. in or 1 Kgsq. cm; Delivery Point means in the case of Crude Oil the inlet flange of the lifting tankship; in the case of Natural Gas shall be the sales point and the point at which custody transfers from seller to buyer. In the case of LNG sales the Delivery Point shall be the inlet loading 4 Petroleum Agreement Government of Guyana Orinduik PA B flange for the LNG tanker. In the case of pipeline deliveries the Delivery Point shall be the inlet flange to buyers pipeline or distribution system or the inlet to a third partys pipeline transporting buyers Natural Gas. The Delivery Point for LPGs shall be the sales point and the point at which custody transfers from seller to buyer. In the case of LPG exports the Delivery Point shall be the inlet loading flange for the LPG tanker or truck. In the case of pipeline deliveries of LPGs the Delivery Point shall be the inlet flange to buyers pipeline or distribution system or the inlet to a third partys pipeline transporting buyers LPGs; or in any case such other economically viable point for export of Petroleum in the Cooperative Republic Of Guyana which shall be agreed to by the Contractor and the Minister; Development Costs means the expenditure so categorized in Annex C; Development Plan means the plan referred to in Article 8.4; Development Well means any well drilled as part of a

Development Plan; Discovery Area means an area which is part of a Prospecting Area consisting of a Discovery Block or Blocks in respect of which the Minister has been informed under section 30 of the Act; Discovery Block means that as defined in the Act; Discovery of Petroleum means that as defined in the Act; Effective Date means the date on which this Agreement comes into force pursuant to Article 30; Expatriate Employee means any employee other than a Guyanese citizen not permanently resident in Guyana who is engaged under a contract of service for the purpose of Petroleum Operations; Exploration Costs means those expenditures so categorized in Annex C; Exploration Period means the initial period and/or the first renewal period and/or the second renewal period referred to in Article 4.1 as the case may be; Exploration Well means a well drilled which is not a Development Well with the objective of exploring for Petroleum on a geological entity be it of structural stratigraphic facies or pressure nature to a depth or stratigraphic level specified in the work programme for the exploration work programme; Field means an area within the Contract Area consisting of a Petroleum Reservoir or multiple Petroleum Reservoirs all grouped on or related to the same individual geological structural features or stratigraphic conditions from which Petroleum may be produced commercially; 5 Petroleum Agreement Government of Guyana Orinduik PA General and Administrative Costs and Annual Overhead Charge means the expenditures so categorised in Annex C; Geologic Basement means any igneous or metamorphic rock or any stratum in and below which the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected; Government means the Government of the Cooperative Republic of Guyana and its ministries and agencies; GGMC means the Guyana Geology and Mines Commission established under section 3 of the Guyana Geology and Mines Commission Act 1979; GGMC Act means the Guyana Geology and Mines Commission Act 1979; Licence means the Petroleum Prospecting Licence and/or the Petroleum Production Licences or both as the context requires; Lifting Entitlement means the quantity of Crude Oil to which a Party shall be entitled in any given period pursuant to

Article 11; Minister means the Minister assigned responsibility for Petroleum or where there is no such Minister the President; Natural Gas or Gas means all hydrocarbons which at standard conditions of temperature and pressure 60 degrees Fahrenheit or 15 degrees Celsius and 14.7 lbsq. in or 1 Kgsq. cm is in a gaseous state including but not limited to wet mineral gas dry mineral gas and casing head gas all substances contained therein including helium which are produced from an oil or gas well in their natural state or residue gas remaining after extraction of NGLs from wet gas. For purposes of this Agreement Natural Gas shall also include liquefiable hydrocarbons obtained from Natural Gas by condensation or extraction including ethane propane butane pentanes and heaviers Natural Gas Liquids or NGLs. Liquefied methane shall not be considered an NGL but rather Natural Gas in the liquid state. NonAssociated Gas means Natural Gas or Gas other than Associated Gas; NonResident SubContractor shall mean a SubContractor the control and management of whose business are exercised outside Guyana. Operating Costs means those costs so categorized in Annex C; Operator shall have the meaning assigned to it in Article 2.2a; Petroleum Agreement Government of Guyana Orinduik PA WB ase Parties means the Government Tullow and Eco and includes Tullows and Ecos successors and permitted assignees and a Party shall mean any of the Parties; Petroleum Operations means Prospecting Operations andor Production Operations as defined in the Act; Petroleum Prospecting Licence means a Licence issued by the Government under the Act and the Regulations to Contractor for carrying out Prospecting Operations and set forth in Form C of the schedule as specified in the Regulations; Petroleum Production Licence means a Licence to be issued by the Government under the Act and the Regulations to Contractor for carrying out Production Operations and set forth in Form D of the schedule as specified in the Regulations; Profit Gas has the meaning assigned in Article 11; Profit Oil has the meaning assigned in Article 11; Recoverable Contract Costs has the meaning assigned in Article 11; Regulations means the Petroleum Exploration and Production Regulations 1986; Service Costs means the expenditures so categorized in Annex C; SubContractor means any company or entity which provides services to the Contractor in connection with Petroleum

Operations; Third Party Sales means third party arms length sales made by i Contractor or ii Affiliated Company of Contractor to a third party for an armslength price which is disclosed to the Minister. 1.2 The words and terms used in this Agreement but not defined herein shall if meanings have been assigned to them under section 2 of the Act have for the purposes of this Agreement the same meanings. 1.3. The provision of this Agreement relating to the Petroleum Prospecting Licence shall be read as part of the provisions of such Licence. 14 The provision of this Agreement relating to any Petroleum Production Licence shall be read as part of the provisions of such Licence. 1.5 The provisions in the Act and Regulations dealing with rights and obligations of the Contractor shall be read as part of but not nullify the provisions of this Agreement and any Licence issued to the Contractor. Petroleum Agreement Government of Guyana Orinduik PA oO IArticle 2 Agreement the Operator Liabilities and Indemnities Josh Dede Zed 2.4 Agreement This Agreement constitutes an agreement made under section 10 of the Act consistent with the Act and the Regulations and is a production sharing agreement the objective of which is the exploration for development and production of Petroleum in the Contract Area by the Contractor subject to the terms hereof and the provisions of the Act and Regulations under which the Contractor shall have an economic interest in the development of Petroleum from the Contract Area. The Operator a Tullow shall be the Operator charged with conducting the day to day activities of the Contractor under this Agreement. No transfer of operatorship to another Party not comprising the Contractor shall take effect unless it has been approved by the Minister which approval shall not be unreasonably withheld. The Minister shall be notified of any change of operatorship to another Party comprising the Contractor in writing. b The Contractor shall provide the Minister with a memorandum summarizing the operating arrangements between the Operator and the Contractor including any Party comprising the Contractor for the conduct of Petroleum Operations which will include inter alia a provision whereby the Operator agrees to conduct the Petroleum Operations in accordance with this Agreement the Licences and any applicable laws of Guyana. Liability The duties obligations and liabilities of the Parties comprising the Contractor under this Agreement and under any Licence issued pursuant

hereto shall be joint and several. Indemnity The Contractor shall at all times keep Government indemnified against all actions claims and the demands that may be brought or made against Government by a third party by reason of negligence any act or omission or reckless disregard of harmful consequences which results in damage to a third party by the Contractor or the Operator in the exercise or purported exercise of the rights of the Contractor under the Act or the Licence provided however that nothing in this Article shall require the Contractor to give the said indemnity for any claim or demand in respect of Petroleum taken by the Minister pursuant to Article 11 after title has passed to the Minister at the Delivery Point or in respect of assets acquired by the Minister pursuant to Article 20 from and after the date of acquisition. Liability by 8 Petroleum Agreement Government of Guyana Orinduik PA er JTcremated the Contractor to the Government for damages in respect of Petroleum Operations under this Agreement is limited to insurance required in accordance with Article 20.2 a provided however that the Contractor shall not be liable to the Government for indirect punitive or consequential damages including but not limited to production or loss of profits. 2 Petroleum Agreement Government of Guyana Orinduik PA er Article 3 Petroleum Prospecting Licence and Guarantee 3.1 3.2 Petroleum Prospecting Licence a On the date of this Agreement the Minister in accordance with the Act the Regulations and the terms of this Agreement shall grant to the Contractor the Petroleum Prospecting Licence for an initial period of four 4 years from the Effective Date over the area described in Annex A and shown on the map attached as Annex B hereto. b Subject to Article 4 and the other terms of this Agreement such Petroleum Prospecting Licence may be renewed but not more than twice at the election of the Contractor for consecutive periods of up to three 3 years each in accordance with the provisions of the Act and the Regulations. Guarantee The Contractor shall on or before the sixtieth 60th day from the Effective Date during year one 1 of the initial period in accordance with Article 4.1 hereunder and thereafter no later than ninety 90 days after the commencement of all subsequent work commitment periods as specified in Article 4.1 provide an Affiliate Company guarantee or other form of guarantee acceptable to the Minister in the amount of ten percent 10 of the budget submitted by the Contractor

pursuant to Article 7.1 for each specific work commitment period. Notwithstanding the foregoing if the Contractor exceeds its minimum work commitment in any phase specified in Article 4.1 the completion of such work commitment shall constitute a waiver of such proportion of the requirement of the guarantee by the Minister which is the equivalent of the excess work previously completed but which is applicable to the subsequent work commitment phase. If the guarantees are Affiliate Company guarantees they shall be in lieu of and satisfy any obligation to provide a guarantee and/or bond pursuant to the Act Regulations or this Agreement on the part or on behalf of the Contractor.

10 Petroleum Agreement Government of Guyana Orinduik PA Article 4 Obligation Exploration Programme and Expenditure 4.1 Exploration Programme Subject to the provisions of this Agreement in discharge of its obligations to carry out Prospecting Operations in the Contract Area the Contractor shall carry out the minimum work described herein during the periods into which Prospecting Operations are divided hereunder a The initial period of four 4 years shall be divided into two 2 phases. Each phase shall consist of two 2 years duration. i aa bb ii aa bb bo aa Petroleum Agreement Government of Guyana Orinduik PA Phase One Two 2 years During Phase One of the initial period. The Contractor shall complete a geological and geophysical evaluation report of the Contract Area based on the available geological information 2D seismic and 3D seismic data previously acquired and from reprocessed seismic data which may be determined necessary by Contractor. At the end of Phase One of the initial period the Contractor shall elect either to relinquish the entire Contract Area or to enter Phase Two 2 of the Initial Period. Phase Two Two 2 years Subject to Article 5 during Phase Two 2 of the Initial Period the Contractor shall in accordance with the conclusions and recommendations of the geological and geophysical evaluation report completed in Phase One 1 acquire a minimum of one thousand square kilometres 1000 sq. km of 3D seismic within the Contract Area during year one 1 of Phase Two 2. Contractor shall process and interpret same to identify drillable targets within the Contract Area. At the end of Phase Two 2 of the Initial Period Contractor shall elect either to relinquish the entire Contract Area or to renew the Petroleum Prospecting Licence for a three 3 year period. The First Renewal Period of three 3 years

duration. Subject to Article 5. During the first two years of the first Renewal Period the Contractor shall drill one 1 Exploration Well to the Cretaceous Formation in accordance with Article 4.2 11 Be SAAAt the end of the First Renewal Period the Contractor shall elect either to relinquish the Contract Area except for any Discovery Areas in respect of which the Minister is informed under Section 30 of the Act and the area contained in any Petroleum Production License or subject to Article 5 relinquish twenty 20 of the Contract Area and renew the Petroleum Prospecting License for a second period of three 3 years c i The Second Renewal Period of three 3 years aa Subject to Article 5 during the Second Renewal Period the Contractor shall drill one 1 Exploration Well to the Cretaceous Formation in accordance with Article 4.2 At the end of the Second Renewal Period the Contractor shall relinquish the entire Contract Area except for i any Discovery Area in respect of which the Minister is informed under Section 30 of the Act ii for the area contained in any Petroleum Production License and any other portion of the Contract Area on which the Minister agrees to permit the Contractor to conduct further exploration activities d The minimum work commitment for a given phase or period referred to in Article 4.1a b and c may be undertaken in an earlier phase or period in whole or in part and in such a case the work commitment with respect to the subsequent period shall be deemed to be satisfied accordingly in whole or in part as the case may be. Contractor may conduct additional work beyond the minimum work commitment in accordance with the terms and conditions of this Agreement which shall be subject to Cost Recovery. Subject to Article 24 herein and section 43 of the Act the Minister may extend any Exploration Period pursuant to a showing of good cause by the Contractor. 42 No Exploration Well drilled by the Contractor shall be treated as discharging any obligation of the Contractor to drill such Exploration Well unless either it has been drilled to the depth or formation agreed with the Minister and specified in the annual work programme or before reaching such depth or formation a the Contractor has expended on such well and any substitute well drilled pursuant to Article 4.2 d below the amount for such work commitment in the budget submitted by the Contractor and approved by the Minister as specified in Article 7.1; or b the Geologic Basement is encountered or such Exploration Well has drilled at least

3000m whichever is encountered first; or c a Discovery is made and the Minister is informed thereof

or 12 Petroleum Agreement Government of Guyana Orinduik PA d insurmountable technical problems are encountered which in accordance with good oilfield practice make further drilling impractical provided that if the said Well is abandoned owing to the said problems before reaching the Geologic Basement the Contractor shall drill a substitute well in the Contract Area to the same minimum depth as aforesaid unless otherwise agreed with the Minister or until the amount in Article 4.2 a less any amounts actually expended on the abandoned well is reached or one of the criteria listed at Articles 4.2 b to d is satisfied.

4.3. Expenditure Obligation The sum actually spent in fulfillment of the work obligation in a specific phase or period shall be deemed to have satisfied the Contractors minimum expenditure obligation for that phase or period. For the avoidance of doubt in the event the Contractor has performed its work obligations for an amount less than the amount specified in an annual work programme and budget submitted under Article 7 Contractor shall be deemed to have fulfilled its expenditure obligation for that phase or period.

13 Petroleum Agreement Government of Guyana Orinduik PA QD Article 5 Relinquishment of Areas Sd a2 ml 5.4 3.3 If prior to the end of the initial period of the Petroleum Prospecting Licence issued to the Contractor under Article 3.1 an application is made by the Contractor for renewal of the Licence under section 24 1 of the Act the Contractor shall not be required to relinquish at the end of the initial period any area of the original Contract. If prior to the end of the first renewal period of the Petroleum Prospecting Licence an application is made by the Contractor for a second renewal of the Licence under section 241 of the Act the Contractor shall then relinquish at the end of this first renewal period an area equal to at least twenty percent 20 of the original Contract Area less the exclusions provided for in Articles 5.3. The areas to be relinquished pursuant to Articles 5.1 and 5.2 shall a comprise Blocks as defined in the Act; b exclude any Discovery Area together with a reasonable area of protective acreage surrounding the Discovery Area; c exclude any area under an Appraisal programme any Production Area and any Natural Gas Discovery; d be selected by Contractor so that i the area relinquished shall comprise one 1 discrete area having regard to any representations made by the

Minister with respect to location shape and size; ii the Blocks to be retained for and during the first renewal period pursuant to Articles 5.1 and 5.2 shall constitute one 1 discrete area unless otherwise agreed to by the Minister. In the event that an area or areas cannot be identified for relinquishment in accordance with this Article without including in such area or areas in whole or in part a subsisting Discovery Area or Production Area or the Minister is of the opinion that the areas to be relinquished will not enable licensing separately or jointly with contiguous unlicensed areas then the Minister and Contractor shall consult together with a view to agreeing on the areas to be relinquished in the light of the circumstances then prevailing. If after sixty 60 days from receiving notice of the Contractors proposed relinquishments the Parties cannot agree on a proposed relinquishment the Parties shall refer the matter to a sole expert pursuant to Article 26. F or the purpose of this Article a Discovery Area shall not include any Discovery Block which relates to a Discovery in respect of which the Contractor has notified the Minister 14 Petroleum Agreement Government of Guyana Orinduik PA Y 5.6 Saf that the Discovery is not of potential commercial interest pursuant to section 31 1 of the Act unless such Discovery Block forms a part and only to that extent of another subsisting Discovery Area. If a Petroleum Prospecting Licence ceases to have effect with respect to Discovery Blocks pursuant to section 32 1 of the Act such reduction in size of the Contract Area shall be treated as an advance relinquishment under this Article and shall reduce the area next required to be relinquished accordingly. Without prejudice to the obligations undertaken in Article 4 the Contractor may at any time during the period of the Petroleum Prospecting Licence on giving the Minister no less than three 3 months notice in writing of its intention to do so relinquish any Block or Blocks in the Contract Area pursuant to section 28 of the Act and in accordance with Articles 5.4 and 5.5. Any such relinquishment shall count towards any subsequent mandatory relinquishments required under Articles 5.1 5.2 or 5.3 above as the case may be. 15 Petroleum Agreement Government of Guyana Orinduik PAped Article 6 Delegation; Cooperation between Contractor and GGMC 6.1 6.2 6.3 6.4 The Minister may subject to the provisions of the Act or any other law delegate any person to exercise and perform any of his functions under this Agreement and anything done by the delegate

in pursuance of the delegation shall have the same validity and effect as it would have if done by the Minister. The Minister also hereby authorizes GGMC to perform inter alia the following functions a to monitor the Petroleum Operations carried out by the Contractor; b to review any proposed exploration work programme and budgets presented by Contractor under Article 7 and any Appraisal Programme presented by the Contractor under Article 8; c to review any Development Plan submitted by the Contractor in connection with an application for a Petroleum Production Licence pursuant to section 34 of the Act; d to ensure the maintenance and availability for inspection of operating records and reports for Petroleum Operations in accordance with this Agreement; e to ensure the accounting procedures specified in Annex C of this Agreement are followed; f to ensure compliance with the provisions of this Agreement Petroleum Act and . Regulations. The Contractor and the delegate shall cooperate in good faith in the exercise of the Ministers functions delegated pursuant to this Article and the Contractor shall keep the delegate advised of all activities taking place during the course of Petroleum Operations and shall provide the delegate with all available information relating to Petroleum Operations as the Minister or the delegate may reasonably require. Towards this end the delegate and the Contractor shall meet at regular intervals but at least once every six 6 months to review the progress and results of the Petroleum Operations and to discuss the work programme and other activities to be undertaken in the ensuing months. With respect to the matters to be reviewed pursuant to Article 6.2 should the delegate wish to make any specific proposals or revisions thereto the delegate shall so notify the Contractor specifying its reasons therefor; within reasonable time thereafter the Contractor and the delegate shall meet and endeavour to agree on the proposals or revisions. The Contractor shall consider and take into account the proposals of the delegate and shall attempt in good faith to reach agreement on such proposals. If the Contractor and the delegate fail to agree within sixty 60 days of submission by the Contractor the 16 Petroleum Agreement Government of Guyana Orinduik PA 46.5 6.6 6.7 exploration work programme and budget including as appropriate any minimum work programme to be undertaken pursuant to Article 4 submitted pursuant to Article 7 and the Appraisal Programme

except in the case of Gas to which the provision of Article 12 shall apply submitted pursuant to Article 8 revised in accordance with any amendments or additions thereto agreed by the delegate and the Contractor shall be deemed adopted. Nothing herein above provided shall preclude the right of the Minister to delegate any additional function to the delegate or subject to Article 6.1 to delegate from time to time any functions including those herein contained to any other agency of Government. A delegation shall not increase the obligations or liabilities of the Contractor and notice of any delegation shall be given promptly to the Contractor. Any approvals required by the Minister or delegates of the Minister shall not be unreasonably withheld. If the Contractor requests required approval from the Minister or delegates of the Minister such approval shall be deemed as granted if no response is provided within sixty 60 days of the request. The Minister and the delegate shall upon request either provide to the Contractor or assist the Contractor in obtaining the assistance required for Contractor to fulfill requirements of the contract including but not limited to the following a approvals issued by Government agencies or local government institutions which are required to conduct hydrocarbon operations including approvals necessary to import goods and services free from duties and taxes; b approvals for easements and rightofway to enable Contractors to conduct operations; c approvals for security for field operations and personnel; d permission for entry and exit visas and working permits for Contractors employees subcontractors and their dependents; e supply reports analyses samples geological geophysical and production data necessary to Contractor from areas inside and outside the Contract Area; f approvals to export hydrocarbons and use essential infrastructure necessary for the economic export of hydrocarbons at normal commercial terms. 17 Petroleum Agreement Government of Guyana Orinduik PAvet Article 7 Annual Work Programme and Budget del Tol Within sixty 60 days after the Effective Date the Contractor shall prepare and submit to the Minister in detail a work programme and budget setting forth the Prospecting Operations which the Contractor proposes to carry out including as appropriate any minimum work obligations to be undertaken pursuant to Article 4 during the remaining portion of the Calendar Year. In subsequent years no less than one 1 month before the beginning of the

Calendar Year the Contractor shall prepare and submit to the Minister a work programme and budget setting forth Petroleum Operations which the Contractor proposes to conduct during the upcoming Calendar Year. The Contractor may for good cause amend the details of any work programme or budget submitted to the Minister pursuant to Article 7.1 provided that a notice of the details of the reasons for the amendments is given to the Minister; b such amendments shall not have the effect of reducing the minimum work obligations undertaken under Article 4 without the prior consent in writing of the Minister; c any proposed amendment shall be subject to review pursuant to Article 6.

18 Petroleum Agreement Government of Guyana Orinduik PA 3 4 ed Article 8

Discovery and Development 8.1 8.2 8.3 8.4 8.5 8.6 Petroleum Agreement Government of Guyana Orinduik PA

Where pursuant to section 30 of the Act notice has been given to the Minister of a Discovery in the Contract Area the Contractor shall forthwith inform the Minister of the steps it proposes to take to satisfy the requirements of section 30 1 a iii of the Act. Where the Contractor pursuant to section 31 1 of the Act has informed the Minister that in its opinion the Discovery is of potential commercial interest the Contractor shall as soon as practicable thereafter submit for the consideration of the Minister its proposals for an Appraisal Programme to meet the requirements of section 30 1 b of the Act. Where an Appraisal Programme has been adopted by the Contractor pursuant to Article 8.2 the Minister may on application by the Contractor pursuant to section 31 2 of the Act stating reasons therefor extend the period within which application may be made by the Contractor for a Petroleum Production License. Where the Contractor has made an application to the Minister for a Petroleum Production Licence in respect of any part of the Contract Area in accordance with section 34 1 of the Act such application shall be accompanied by the proposals required under section 34 3 of the Act hereinafter referred to as the Development Plan and shall satisfy the provisions of section 36 of the Act and the Regulations. The Development Plan shall provide that not later than six 6 months after the grant of the first Petroleum Production Licence the Contractor shall in consultation with GGMC prepare and implement a programme for training and employment of Guyanese nationals in each phase and level of Petroleum Operations and for the

development of management and technical skills for the safe and efficient conduct of Petroleum Operations. Where the Minister considers that the application has not met the requirements of Article 8.4 he shall so notify the Contractor within sixty 60 days of receipt of the application and GGMC and Contractor shall meet to discuss the application with a view to ensuring that the requirements of Article 8.4 are met. In the event that the Parties are unable to agree on amendments to the application to meet such requirements within sixty 60 days from the date of aforesaid application or such longer period as the Parties shall agree or where the Minister fails to respond to or act on the aforesaid application within sixty 60 days the Contractor may refer the matter to a sole expert pursuant to Article 26 for determination within sixty 60 days of appointment of such expert or such other time period as may be agreed between the Contractor and the Minister. Where the Minister considers that the aforesaid application has met the requirements of Article 8.4 he shall within sixty 60 days of receipt thereof so notify the Contractor. In such event or where in the event of a dispute it is determined by the sole expert pursuant to Article 26 that the Contractor has made an application which meets the requirements of Article 8.4 provided the Contractor is not in default under this Agreement the Minister shall grant within sixty 60 days of such notification or determination as the case may be 19 to Contractor a Petroleum Production Licence in the Form D of the schedule as specified in the Regulations over the area for which the application has been made on terms and conditions consistent with this Agreement and the Act and Regulations which will enable the Contractor to carry on Petroleum Operations in the Production Area in accordance with the Development Plan wherein the level of production set shall be consistent with the maximum efficient rate of production which conforms to sound reservoir engineering principles in accordance with good international petroleum industry practice. The initial term of a Petroleum Production Licence shall be twenty 20 years commencing from the date of the grant of the licence under the said Act. The Minister may impose policybased production limits on production below those consistent with maximum efficiency rates for the field or fields; any such production limits will be imposed countrywide and shall be allocated proportionately based upon demonstrable verifiable

field production capacities. 8.7 While the Contractor holds a Petroleum Prospecting Licence or has made an application pursuant to Article 8.4 and in accordance with section 34 1 of the Act the Minister shall not grant a Petroleum Production Licence in respect of all or part of the Contract Area or area covered by such application whether on a geographical or geological basis to any third party. 8.8 Where the Contractor pursuant to section 31 1 of the Act has served notice on the Minister that in its opinion a Discovery made in the Contract Area is not of potential commercial interest the provisions of section 32 1 of the Act shall apply. 8.9 The Contractor may apply for a renewal of a Petroleum Production Licence for a maximum ten 10 years. The application for renewal of ten 10 years shall be granted as long as the Contractor is in good standing under the Licence. a Natural Gas. In the event of any NonAssociated Gas discovery within the Contract Area in recognition of the fact that Natural Gas projects generally have much longer lead times from discovery to first commercial production than is the case for Crude Oil projects the Minister shall grant Contractors request for the maximum ten 10 year Petroleum Production License renewal so long as Contractor is in good standing under the Licence. b The Minister shall not refuse to grant the renewal of a Petroleum Production Licence under section 401 of the Act without first providing the Contractor; i Notice stating the grounds of the intended refusal; and ii Ninety 90 calendar days following the date of the notice referenced in Article 8.9bi to respond to or remedy the stated grounds for refusal. 8.10 If it was determined that the Field as to which the Commercial Discovery applies extends beyond the boundaries of the Contract Area or if such is subsequently determined in the course of development or producing operations in the Field then Contractor may apply for an extension of the Contract Area to include the additional acreage encompassing the Field as determined by the analysis of all the relevant information. The Minister may grant the 20 Petroleum Agreement Government of Guyana Orinduik PA P ase extension to the Contractor for such additional acreage to enable the entire Field to be developed and produced with optimal efficiency in accordance with good oil Field practice. The said acreage shall not be available to Contractor if it is held under Licence to a third party. In such instances the provision of Section 44 of the Act shall

apply. 21 Petroleum Agreement Government of Guyana Orinduik PA Article 9 Records Reports and Information; Confidentiality O41 Records Reports and Information a b c d e f Petroleum Agreement Government of Guyana Orinduik PA The Contractor shall at all times while this Agreement is in force maintain and submit to the Minister in accordance with the provisions of the Act and the Regulations the Petroleum Production Licence and this Agreement full and accurate reports records returns and accounts of Petroleum Operations in the Contract Area. All data well logs maps magnetic tapes cuts of cores and cutting samples and all other geological and geophysical information obtained by the Contractor in the course of carrying out Petroleum Operations hereunder and all geological technical financial and economic reports studies and analyses generated in relation thereto hereinafter referred to as Petroleum Data shall be submitted to the Minister in accordance with the Regulations. The Contractor may freely export for processing or laboratory examination or analysis samples or other original materials constituting Petroleum Data provided that samples equivalent in size and quality or where such material is capable of reproduction copies of equivalent quality have first been delivered to the Minister. Petroleum Data shall be the joint property of the Minister and the Contractor but shall become the sole property of the Minister with respect to any area which ceases to be part of the Contract Area whether as result of relinquishment or expiry surrender or termination of a Licence or otherwise in accordance with the Act from the date on which such area ceases to be part of the Contract Area. The Minister through duly appointed representatives upon providing the Contractor with at least seven 7 days notice shall be entitled to observe the Petroleum Operations conducted by the Contractor at his sole cost and expense and at all reasonable times to inspect all assets records and data kept by the Contractor relating to such Petroleum Operations. In the exercise of such rights under this paragraph the Minister shall not unduly interfere with the Contractors Petroleum Operations under this Agreement. Nothing in this Article shall be construed as requiring the Contractor or any of the Parties comprising the Contractor to disclose any of its proprietary technology or that of its Affiliated Companies which is not acquired in the course of Petroleum Operations under this Agreement. 22 9.2 Confidentiality a

All Petroleum Data information and reports obtained or prepared by the Contractor hereunder shall so long as they relate to any part of the Contract Area be treated as confidential and each of the Parties undertakes not to publish reproduce or otherwise deal with such Petroleum Data or to disclose the same or the thereof to any other person without the consent in writing of the other Parties such consent not to be unreasonably withheld provided however that subject to Article 9.2 b this Article shall not i prevent disclosure by the Contractor aa to an Affiliated Company or employees of an Affiliated Company; bb to consultants professional advisers data processing centres laboratories and SubContractors where disclosure is for the conduct of Petroleum Operations; cc to a bank or other financial institution in connection with financing for Petroleum Operations or general financing requirements established by Contractor or an Affiliated Company of Contractor; dd to the extent required by any applicable law or the regulations of any stock exchange upon which the shares of the Contractor or an Affiliated Company are quoted or by governmental order decree regulation or rule or to the extent required under any legal proceeding or any court order binding on Contractor or Affiliated Company of Contractor; ee to bona fide prospective assignees or transferees of an interest hereunder of the Contractor or in connection with merger consolidation or a sale of stock of the Contractor or an Affiliated Company thereof; ff in connection with data trades; gg of data information and reports already known to the Contractor or Affiliated Company prior to the Effective Date; or hh of data information and reports acquired independently from a third party that represents that it has the right to disseminate such data at the time it is acquired by the Contractor or Affiliated Company; ii Save as provided in Article 9.2 a i prevent disclosure pursuant to section 4 of the Act provided however that neither the Minister nor Contractor shall disclose Petroleum Data relating to any area subject to a Licence to a Petroleum Agreement Government of Guyana Orinduik PA 3.0

20 80 For the avoidance of doubt it is hereby stated that once the Contractors Investment Multiple has increased so as to trigger in any Year a higher percentage of Profit Petroleum sharing for the Government and a lower percentage for the Contractor than that existing before the date of such increase the Parties Shall be entitled to share in the total volume of Profit Petroleum in the

proportions specified in the relevant Articles above in respect of the higher levels of or Investment Multiple and shall not be entitled to receive any Profit Petroleum shares in respect of the lower levels of profitability. The value of the Contractors Investment Multiple at the end of any Year in respect of each Field shall be calculated in the manner provided for and on the basis of the net cash flows specified in Appendix D to this Contract. However the volume of Profit Petroleum to be shared between the Government and the Contractor. shall be determined i 7 ry 8 go 15.5 for each Quarter on an. accumulative basis. Pending finalization of accounts delivery of Profit Petroleum shall be taken by the. Government and the Contractor on the basis of . provisional estimated figures of Contract Costs production prices receipts income and any other income or allowable deductions and on the basis of the value of the Investment . Multiple achieved at the end of the preceding Year. All such provisional estimates shall be approved by the Management Committee When it is necessary fo convert monetary units into physical units of production equivalents or vice versa the price or prices determined pursuant to Articles 19 and 21 for Crude Oil Condensate and Natural Gas respectively shall be used. Within sixty 60 days of the end of each Year a final calculation of Profit Petroleum based on actual costs quantities prices arid income for the entire Year shall be undertaken and any necessary adjustments to the sharing of Petroleum shall be agreed upon between the Government and the Contractor and made as soon as is practicable thereafter. The Profit Petroleum due to the Contractor in any Year from any Field shall. be divided between the Parties constituting the Contractor in proportion to their respective Participating Interests . ow dL a oO

be imported in terms of this Contract solely and exclusively for use in carrying out Petroleum Operations and shall be approved by a representative of the Government to be eligible for such exemption pursuant to the terms of the Contract. 17.4 The Government shall have the right to inspect the records and documents of the physical item or items for which an exemption is or has been provided under Article 17.1 to determine that such item or items are being or have been imported solely and exclusively for the purpose for which the exemption was granted. The Government shall also be entitled to inspect such physical items wherever located to ensure that such items are being used for the purpose herein specified and any item not being so used shall immediately ; become liable to payment of the applicable customs duties. 17.5 Subject to Article 27 the Contractor and its Subcontractors may sell or otherwise transfer in India all imported items which are no longer required for Petroleum Operations subject to applicable megovernins customs duties and sale or disposal of such items. Og SOW LLDAL ee om. ve ARTICLE 18 DOMESTIC SUPPLY SALE DISPOSAL AND EXPORT 18.1 18.2 18.3 18.4 OF CRUDE OIL CONDENSATE Until such time as the total availability to the Government and government Companies of Crude Oil and Condensate from all Petroleum production activities in India meets the total national demand as determined by the Government each constituent of the Contractor shall be required to sell to the Government or its nominee all of their entitlement to Crude Oil and Condensate from each Field in order to assist in satisfying the national demand. Pursuant to Article 18.1 and subject to Article 18.4 each constituent of the Contractor shall offer to sell to the Government or its nomince its total Participating Interest share of Crude Oil and Condensate to which it is entitled under Articles 14 and 15 at the price determined in accordance with Article 19 for salesto Government and the Government shall have the option to purchase the whole of the crude at the said price. The aforementioned offer shall be made by a constituent of the Contract in writing at least six 6 months preceding the Year in which the sale is to be made specifying the estimated quantities and grade of Crude Oil and Condensate being offered based upon estimates which shall be adjusted within ninety 90 days of the end of each Year on the basis of actual quantities produced and saved. The

Government shall exercise its said option to purchase in writing not later than ninety days 90 prior to the commencement of the Year in respect of which the sale is to be made specifying the quantity and grade of . Crude Oil and Condensate which it elects to take in the ensuing Year. Failure by the Government to give such notice within the period specified shall be conclusively deemed an election to take all of the Crude Oil and Condensate offered adjusted as provided herein in the ensuing Year. If during any Year India attains Selfsufficiency the Government. shall promptly thereafter but in no event later than the end of the first Calendar Quarter of the following Year so advise the each constituent of the Contractor by written notice. In such event as from the end of the second Calendar Quarter of the following Year or such earlier date as the Parties may mutually agree Government shall have the option but not obliged to purchase and the each constituent of the Contractor shall have the right to lift and export its Participating Interest share of Crude Oil and Condensate until such time if any as Self sufficiency shall have ceased to exist. If Selfsufficiency ceases to exist during a Year the Government shall recover its option to purchase under Article 18.2 in respect of the following Year by giving notice thereof to the each constituent of the Contractor. 4 .

Jo CORN Af Rey ee Og ON UBS 18.5 18.6 All payments in respect of sales to the Government pursuant to provisions of this Article shall be made by the Government within the period for credit applicable in the calculation of the price pursuant to Article 19. If no time frame for credit is applicable in such calculation payment shall be made within forty five 45 days from the date of delivery of Crude Oil or Condensate to the Government at the Delivery Point. In the case of sales by a Foreign Company payment shall be made in United States Dollars or any other convertible currency acceptable to the Government and the Foreign Company by wire transfer to the credit of the Foreign Companys designated account with a bank within or outside India designated by the Foreign Company. Subject to any change in the relevant laws in the case of sales by a domestic company payment shall be made in equivalent Indian rupees to the credit of the domestic companys designated account with a bank in India designated by the domestic company. Notwithstanding the above each constituent of the Contract shall submit an invoice to the Government within fifteen 15

days from the date of delivery of Crude Oil. All amounts unpaid by the Government by the due date shall from the due date bear interest calculated on a day to day basis at the LIBOR plus two percent 2 will be paid. If full payment is not received by a constituent of the Contractor when due as provided in Article 18.4 it shall at any time thereafter notify the Government of the default and unless such default is remedied within fifteen 15 days from the date of the said notice such constituent shall have the right unless otherwise agreed upon written notice to the Government; a to suspend the sale to the Government purchase under Article 18.2; b to freely lift sell and export all its Participating Interest share of Crude Oil subject to destination restrictions in accordance with Government policy until the Government has paid the due amount plus interest as provided herein c if the payment plus interest is not received by each constituent of the Contractor within one hundred and twenty 120 days from the date the said payment was due to receive and export the Governments share of Profit Oil until such time as either Government has paid all amounts due plus interest or the value based on the price as determined in accordance with Article 19 of Governments share of Profit Oil so exported is equal to all amounts due plus interest whichever first occurs; provided however that if the Government makes a payment to such constituent after it has commenced export of Governments share of Profit Oil and such payment together with the value of Governments share of Profit Oil exported based on the price determined in accordance with Article 19 exceeds the amount due plus interest necessary adjustment shall be carried out to refund to the Government forthwith the excess the amount received by the constituent; . f tele EE18.7 18.8 18.9 18.10 18.11 The Company shall be entitled to freely lift and sell export any Crude Oil and Condensate which the Government has elected not to purchase pursuant to this Article 18 subject to Governments generally applicable destination restrictions to countries with which the Government for policy reasons has severed or restricted trade. No later than sixty 60 days prior to the commencement of production in a Field and thereafter no less than sixty 60 days before the commencement of each Year the Contractor shall cause to be prepared and submitted to the Parties a production forecast setting out the total quantity of Crude Oil that it estimates can be produced from a Field during the succeeding Year based on a

maximum efficient rate of recovery of Crude Oil from that Contract Area or those Contract Areas in accordance with good petroleum industry practice. no later than thirty 30 days prior to the commencement of each Quarter the Contractor shall advise its estimate of production for the succeeding Quarter and shall endeavor to produce the forecast quantity for each Quarter. Each Party comprising the Contractor shall throughout the term of this Contract have the right to separately take in kind and dispose of all its share of Cost Petroleum and Profit Petroleum and shall have the obligation to lift the said Cost Petroleum and Profit Petroleum on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the other Parties. The Government shall throughout the term of this Contract have the right to separately take in kind and dispose of its share of Profit Petroleum and of such portion of the share of the constituents of the Contractor of Crude Oil as is purchased by the Government pursuant to Article 18 and shall have the obligation to lift all of the said Petroleum on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the other Parties. For the purpose of implementing the provisions of Articles 18.9 and 8.10 a Crude Oil lifting procedure shall be agreed upon by the Parties no later than six 6 months prior to the commencement of production in a Field. Such lifting procedure shall include but not necessarily be limited to a a procedure for notification by the Operator to the Government and to each Party comprising the Contractor of projected Crude Oil production ; b a procedure for notification by the Government and by each constituent of the Contractor to the Operator of its expected offtake and the consequences of inability or failure to offtake. Kon Id5 a At 19.1 19.2 19.3 19.3.1 ARTICLE 19 VALUATION OF PETROLEUM For the purpose of this Contract the value of Crude Oil Condensate and Natural Gas shall be based on the price determined as provided herein. A price for Crude Oil shall be determined for each Month or such other period as the Parties may agree hereinafter referred to as the Delivery Period in terms of United States Dollars per Barrel FOB Delivery Point for Crude Oil produced and sold or otherwise disposed of from each Contract Area for each Delivery Period in accordance with the appropriate basis for that type of sale or disposal specified below. In the event that some or all of total sales of

constituents of Contractor of Crude Oil during a Delivery Period are made to third parties at Arms Length Sales all sales so made shall be valued at the weighted average of the prices actually received by the said constituents calculated by dividing the total receipts from all such sales FOB the Delivery Point by the total number of Barrels of the Crude Oil sold in such sales. In the event that a portion of such third party Arms Length Sales are made on a basis other than an FOB basis as herein specified the said portion shall be valued at prices equivalent to the prices FOB the Delivery Point for such sales determined by deducting all costs such as transportation demurrage loss of Crude Oil in transit and similar costs incurred downstream of the Delivery Point and the prices so determined shall be deemed to be the actual prices received for the purpose of calculation of the weighted average of the prices for all third party Arms Length Sales for the Delivery Period.

19.3.2 Each Company constituting the Contractor shall separately submit to the designated 19.4 nominee of the Government within fifteen 15 days of the end of each Delivery Period a report containing the actual prices obtained in their respective Arms Length Sales to third parties of any Crude Oil. Such reports shall distinguish between term sales and spot sales and itemize volumes customers prices received and credit terms and each constituent of the contractor shall allow the designated nominee of the Government to examine the relevant sales contracts. In the event that some or all of the Parties comprising Contractor Companys total sales of Crude Oil during a Delivery Period are made to the Government or its nominee the price of all sales so made shall unless otherwise agreed between the Parties be determined on the basis of either the FOB selling price per Barrel of one or more crude Oils which at the time of calculation are being freely and actively traded in the international market and 19.5 are similar in characteristics and quality to the Crude Oil in respect of which the price is being determined such FOB selli price to be ascertained from Platts Crude Oil Market Wire daily publication Platts or the spot market for the same crude oils ascertained in the same manner whichever price in the opinion of the Parties more truly reflects the current value of such crude oils For any Delivery Period in which sales take place the price shall be the arithmetic average price per Barrel determined by calculating the average for such Delivery Period of the mean

of the high and low FOB or spot prices for each day of the Crude Oils selected for comparison adjusted for differences in the Crude Oil and the crude oils being compared for quality transportation costs delivery time quantity payment terms the market area into which the crude oil is being sold other contract terms to the extent known and other relevant factors. In the event that Platts cases to be published or is not published for a period of thirty 39 consecutive days the Parties shall agree on an alternative daily publication. In the event of changing market conditions the Parties may review and mutually agree on changes to the period over which the average price of comparable crude oils may be calculated.

19.4.1 At least six 6 months prior to commencement of production from the first Field and from each Field thereafter in the Contract Area the Parties shall meet in order to establish a provisional list of the crude oils to be selected for comparison with the Crude Oil to be sold and an appropriate mechanism for the purpose of giving effect to Article 19.4 and definitively establishing the price of Crude Oil to be sold pursuant to Article 19.4. [In determining the quality of a Crude Oil account shall be taken of all relevant characteristics including but not limited to gravity sulphur and metal pour point and product yield.

19.4.2 In the event that at the relevant time no crude oils of similar quality to the Crude Oil to be sold are being actively traded in the international markets where prices can be ascertained by international publication or the official FOB selling prices and the international spot market price vary widely between producers the Parties shall meet in good faith to determine an appropriate pricing basis.

19.4.3 The Parties shall meet annually or sooner upon notice served by any Party on the others to review the list of selected crude oils or the mechanism established pursuant to article 19.4.1 in light of any new facts since the date of selection of such crude oils or establishment of such mechanism and to determine what adjustment if any should be made to the said selection or mechanism by mutual agreement of the Parties. In the event that in any Delivery Period some but not all of a Party's each constituent of the Contractor sales of Crude Oil from a Field are made to the Government or a Government company and some but not all are made to third parties in Arms Length Sales and the price as established in accordance with Article 19.4 differs by more than two per cent 2 from the price as determined

in accordance with Article 19.3 for the same Delivery Period the Parties shall meet upon notice from any Party to determine if the prices established for the relevant Delivery Period should be adjusted taking into account third party Arms Length Sales made by each constituent of the Contractor of the same or similar Crude Oil from the relevant Field or other Fields and published information in respect of other genuine third party Arms Length Sales of the same or similar Crude Oil for that Delivery Period. Until the matter of an adjustment for the relevant Delivery Period is finally determined the price as established in accordance with this Article will apply for that Delivery Period. Any adjustment if necessary will be made within thirty 60 days from the date the adjustment for that Delivery Period is finally determined. A Company constituting the Contractor shall determine the relevant prices in accordance with this Article and the calculation basis of calculation and the price determined shall be supplied to the Government or its nominee and shall be subject to agreement by the Government or its nominee before it is finally determined. Pending final determination the last established price if any for the Crude Oil shall be used. In the event that the Parties fail to reach an agreement on any matter concerning selection of the crude oils for comparison the calculation the basis of or mechanism for the calculation of the prices the prices arrived at the adjustment of any price or generally about the manner in which the prices are determined according to the provisions of this Article within thirty 30 days or such longer period as may be mutually agreed between the Parties from the date of commencement of Commercial Production or the end of each Delivery Period thereafter any Party may refer the matter or matters in issue for final determination by a sole expert appointed as provided in Article 33. 19.7.1 Within ten 10 days of the said appointment the Parties shall provide the expert with all information they deem necessary or as the expert may reasonably require. 19.7.2 Within fifteen 15 days from the date of his appointment the expert shall report to the Parties on the issues referred to him for determination applying the criteria or mechanism set forth herein and indicate his decision thereon to be applicable for the relevant Delivery Period for Crude Oil and such decision shall be accepted as final and binding by the Parties. 19.7.3 Except for the adjustments referred to in Article 19.5 any price or pricing mechanism

agreed by the Parties pursuant to the provisions of this Article shall not be changed retroactively ap
gy Wo et eat Perea ey w 6 [meron L19.8 Any sale or disposal to Affiliates or other sale or disposal of
Crude Oil produced from a Field other than to the Government or Government companies or to third
parties in Arms Length Sales in any Delivery Period shall be valued on the same basis as sales. to
the Government or a Government company. In the event of such a sale or disposal by a Company
such Company shall submit to the Government within fifteen 15 days of the end of each Delivery
Period all relevant information concerning such sales or disposals. 19.9 In the event that in any
Delivery Period there is more than one type of sales referred to in Articles 19.3 19.4 and 19.8 then
for the purpose of calculating Cost Petroleum and Profit Petroleum entitlement pursuant to Articles
14 and 15 a single price per Barrel of Crude Oil for all the sales for the relevant Delivery Period shall
be used. Such single price shall be the weighted average of the prices determined for each type of
sale weighted by the respective volumes of Crude Oil sold in each type of sale in the relevant
Delivery Period. 19.10 In this Article the term nominee means a company wholly or partially owned
by the Government directly or indirectly and shall include any other agency of the Government.
19.11 The provisions specified above for the determination of the price of sales of Crude Oil shall
apply mutatis mutandis to Condensate 19.12 The price of Natural Gas shall be determined as
provided in Article 21. ad ON US ee 20.1 20.2 20.3 seaies ARTICLE 20 CURRENCY AND
EXCHANGE CONTROL PROVISIONS Subject to the provisions herein and to compliance with the
relevant provisions of the laws of general application in India governing currency and foreign
exchange and related administrative instructions and procedures issued thereunder on a
nondiscriminatory basis each Foreign Company comprising the Contractor shall during the term of
this Contract have the right to a repatriate abroad in United States Dollars or any other freely
convertible currency acceptable to the Government and the Foreign Company the net proceeds of
sales of Petroleum in India; receive retain and use abroad the proceeds of any export sales of
Petroleum under b the Contract; c open maintain and operate bank accounts with reputable banks
both inside and outside India for the purpose of this Contract; d freely import through normal

banking channels funds necessary for carrying out the Petroleum Operations; . ; e convert into foreign exchange and repatriate sums imported pursuant to d above in excess if any of its requirements and f make payments outside of India for purchases services and loans obtained abroad . without the requirement that funds used in making such payments must come from or originate in India. The rates of exchange for the purchase and sale of currency by the Companies shall be the rates in accordance with prevailing currency and exchange regulations and for accounting purposes under this Contract these rates shall apply as provided in Section 1.6 of Appendix C. Foreign Companies shall have full rights of control over movement of funds out of bank accounts established for the purpose of Petroleum Operations but shall provide to the Government or any body designated by it monthly bank statements with an explanation of each deposit or payment from the account and shall supply each quarter in a form acceptable to the Government or such designated body full particulars of foreign exchange. transactions pursuant to this Contract in order to facilitate monitoring of such socounts Such particulars shall include 7 O 20.4 a by c d goods required for the purpose of Petroleum Operations ; e g tome details of deposits of proceeds of sales of Petroleum such as quantity of Petroleum sold date of sale and unitprice; the repaytient of principal of loans made to the Contractor in foreign currency for purposes of Petroleum Operations; payments of interest charges fees and expenses in respect of loans referred to in paragraph b above ; . payments in foreign currency to persons not resident in India for the supply of capital payments in foreign currency to persons not resident iri India for the supply of goods and services other than capital goods required for Petroleum Operations including services of foreign employees and consultants ; amounts remitted to India or paid elsewhere at the request of the Government to meet obligations under the Contract; and retention or disbursements to Affiliates in foreign currency representing the excess of net profits depreciation and amortization over the payments made under paragraphs b through f above. The Government shall have the right to verify any statements and reports submitted by the Contractor pursuant to this Article and the Contractor shall promptly respond to any query made by the Government or the designated financial body to the reasonable

satisfaction of the Government or such designated body. Domestic Companies shall be subjected to the relevant provisions of the applicable laws in India governing currency and foreign exchange and related administrative instructions and . procedures issued thereunder from time to time. Coy LCD.

ae 211 21.2 21.3 21.4 ARTICLE 21 NATURAL GAS Subject to Article 21.2 the Indian domestic market shall have the first call on the utilization of Natural Gas discovered and produced from any Field within the Contract Area. Accordingly any proposal by the Contractor relating to Discovery and production of Natural Gas from a Field shall be made in the context of the Governments guidelines issued from. time to time for the utilization of Natural Gas shall take into account the objectives of the Government to develop its resources in the most efficient manner and to promote conservation measures. Contractor shall have the right to use Natural Gas produced from a Field for the purpose of Petroleum Operations including but not limited to reinjection for pressure maintenance gas lifting and power generation etc. For the purpose of sales to the domestic market pursuant to this Article 21 the Contractor shall have freedom to market the gas. Associated Natural Gas ANG 21.4.1 In the event that a Discovery of Crude Oil contains ANG Contractor shall declare in the proposal for the declaration of the said Discovery as a Commercial Discovery as specified in Article 10 whether and by what amount the estimated production of ANG is anticipated to exceed the quantities of ANG which will be used in accordance with Article 21.2 such excess being hereinafter referred to as the Excess ANG. In such an event the Contractor shall indicate whether on the basis of the available data and information it has reasonable grounds for believing that the Excess ANG could be commercially exploited in accordance with the terms of this Contract alongwith the Commercial Production of the Crude Oil from the Oil Field and whether the Contractor intends to so exploit the Excess ANG. Based on the principle of full utilization and minimum flaring of ANG a proposed Development Plan for an Oil Field shall to the extent practicable include a plan for utilization of the ANG including estimated quantities to be flared reinjected and to be used for Petroleum Operations; and if the Contractor proposes to commercially exploit the Excess ANG for sale in the domestic market in accordance with Governments guidelines or elsewhere the proposed plans for USS S a

21.4.2 such exploitation. Im . 21.4.3 If the Contractor wishes to exploit the Excess ANG subject to Article 21.1 the Contractor shall be free to explore markets for the commercial exploitation of the said Excess ANG and submit its proposals for such exploitation to the Government in accordance with Article 21.4.2. 21.4.4 Where the Contractor is of the view that Excess ANG cannot be commercially exploited and chooses not to exploit the said Excess ANG or is unable to find a market for the Excess ANG pursuant to Article 21.4.3 the Government shall be entitled to take and utilize such Excess ANG. 21.4.5 If the Government elects to take the Excess ANG as provided in Article 21.4.4 a the Contractor shall deliver such Excess ANG to the Government or its nominee free of cost at the downstream flange of the gasoil separation facilities; b the Contractor shall based on sound petroleum engineering practices install such facilities as would facilitate in so far as practicable uninterrupted delivery of such Excess ANG to the Government or its nominee; c the cost of all facilities installed pursuant to paragraph b above shall be recoverable as Contract Costs; d the Government or its nominee shall bear all costs including gathering treating processing and transporting costs beyond the downstream flange of the gasoil separation facilities; and e the delivery of such Excess ANG shall be subject to procedures to be agreed between the Government or its nominee and the Contractor prior to such delivery such procedures to include matters relating to timing of offtake of such Excess ANG. 21.4.6 Excess ANG which is not commercially exploited by the Contractor or taken by the Government or its nominee pursuant to this Article 21 shall be returned to the subsurface structure or flared or otherwise disposed of as approved by the Government in the context of the Development Plan provided that flaring will be resorted to only for small quantities and as a last resort provided that Contractor shall at all times be entitled to flare the Excess ANG which is not taken by any consumer private or Government Agency with whom there is a valid contract of upliftment of ANG produced from the Contract Area. 21.4.7 As soon as practicable after the Discovery referred to in Article 21.4.1 or the 21.4.8 submission to Government of the proposal for the declaration of the said Discovery as a Commercial Discovery as therein specified or the submission of the proposed Development Plan referred to in

Article the Contractor and the Government or its nominee shall meet to discuss the sale and/or disposal of any ANG discovered with a view to giving effect to the provisions of this Article 21 in a timely manner. All costs incurred in complying with this Article shall be treated as Contract Cost.

Non Associated Natural Gas NANG 21.5.1 21.5.2 21.5.3 In the event of a Discovery of NANG in the Contract Area the Contractor shall promptly report such Discovery to the Management Committee and the Government and the provisions of Articles 9.1 and 9.2 shall apply. The remaining provisions of Article 9 would apply to the Discovery and development of NANG only insofar as they are not inconsistent with the provisions of this Articles. Notwithstanding the provisions of Article 3 the Contractor shall be entitled to retain the Discovery Area subject to the provisions of the Article 21. If pursuant to Article 9.1 the Contractor gives notification that the Discovery is of potential commercial interest the Contractor shall submit to the Management Committee and the Government within one 1 Calendar Year from the date of notification of the above said Discovery the proposed Appraisal Program including a Work Program and budget to carry out an adequate and effective appraisal of such Discovery to determine i without delay whether such discovery is a Commercial Discovery and ii with reasonable precision the boundaries of the area to be delineated as the Development Area. Such proposed Appraisal Program shall be supported by all relevant data such as Well data Contractors best estimate of reserve range and production potential and shall indicate the date of commencement of the proposed Appraisal Program. The proposed Appraisal Program referred to in Article 21.5.2 shall be considered by the Management Committee within one hundred and twenty 120 days of its submission by the Contractor and the said program together with the Work Program and budget submitted by the Contractor revised in accordance with any agreed amendments or additions thereto approved by the Management Committee. shall be adopted as the Appraisal Program and the Contractor shall promptly proceed with implementation of the said program. 4 24

S. 4 Where the Contractor has submitted a proposal for the declaration of the discovery as a Commercial Discovery the Management Committee shall consider the proposal of the Contractor with reference to commercial utilization or commercial development of the NANG in the domestic

market or elsewhere and in the context of Governments guidelines on gas utilization and the chain of activities required to bring the NANG from the Delivery Point to potential and consumers in the domestic market or elsewhere. The Management Committee may within ninety 90 days request the Contractor to submit any additional information on the Discovery and the related Appraisal Program that it may reasonably. required to facilitate a decision on whether or not to declare the Discovery as a Commercial Discovery. 21.5.5 Lf on the basis of the results of the Appraisal Program the Contractor is of the 21.5.6 21.5.7 opinion that NANG has been discovered in commercial quantities it shall submit to the Management Committee as soon as practicable but not later than three 3 years from the date of notification of the aforementioned Discovery a proposal for the declaration of the Discovery as a Commercial Discovery. Such proposal shall take into account the Governments guidelines on gas utilization and propose alternative options if any for use or consumption of the NANG and be accompanied by a report on the Discovery supported by inter alia technical and economic data evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or on behalf of the Contractor and other relevant information. If no proposal is submitted to the Management Committee by the Contractor within three 3 years from the said Discovery the Contractor shall relinquish its rights to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area. Where the Contractor has submitted a proposal for the declaration of a Discovery . as a Commercial Discovery the Management Committee shall consider the proposal of the Contractor with reference to commercial utilization or commercial development of the NANG in the domestic market or elsewhere and in the context of Governments policy on gas utilization and the chain of activities required to bring the NANG from the Delivery Point to potential consumers in the domestic market or elsewhere. The Management Committee or the Government may within ninety 90 days of the submission of the said proposal request the Contractor to submit any additional information on the Discovery the anticipated markets or an other related matter that may reasonably be required to facilitate a decision on whether or not to declare the Discovery as a Commercial Discovery. The Management

Committee shall submit its recommendations on the Contractor's proposal to the Government within one hundred and twenty (120) days of the date of receipt thereof accompanied by an indication of the probable dates by which the markets would be ready to receive the Gas and an estimate of the quantities available for use of Gas that could be so utilized. The Government shall respond within one hundred and twenty (120) days of receipt of the said recommendation from the Management Committee provided that the Government shall not be bound by the decision or recommendation of the Management Committee. If the Management Committee with the approval of the Government declares the Discovery a Commercial Discovery, the contractor shall within one (1) Calendar Year of the declaration of the Discovery as a Commercial Discovery submit a Development Plan for the development of the Discovery to the Management Committee and the Government for approval. Such Plan shall be supported by all relevant information including inter alia the information required in Article 9.7. The Management Committee shall consider the proposed Development Plan and submit its recommendations to Government within one hundred and eighty (180) days of submission thereof by the Contractor. The Government shall respond to the proposed Development Plan within ninety (90) days of receipt of the recommendations from the Management Committee provided that the Government shall not be bound by the recommendation or decision of the Management Committee. If the Management Committee fails to submit its recommendations to Government within the said ninety (90) days period, the Government shall in any event respond to the Contractor within 270 days from the date of submission of the proposed Development Plan. 21.5.10 If the Government has failed to approve or disapproves the Contractor's proposed Development Plan, the Government shall advise the Contractor in writing of the reasons for such failure or disapproval and the Government and the Contractor shall meet to discuss the said Development Plan and the reasons for the said failure to approve or disapprove and use their best efforts to agree on appropriate modifications thereto to meet the Government's concerns or objections. Thereafter, the Contractor shall have the right to resubmit within ninety (90) days of communication from the Government the proposed Development Plan duly amended to meet the

Governments concerns. Such right of resubmission of the proposed Development Plan shall be exercisable by the Contractor only once. If no such Plan is submitted to the Government within the above specified period the Contractor shall relinquish its rights to develop such Gas. Discovery and such Discovery shall be excluded from the Contract Area. 21.5.1 In the event that the Government approves the Contractors proposal for declaration of the Discovery as a Commercial Discovery and the comprehensive plan or plans for development of such Discovery with such modifications and amendments as the Government may approve the said Gas Discovery shall be promptly developed by the Contractor in accordance with the approved plan which shall be the Development Plan. If OM USL agrees to ensure 21.5.12 In the event that the Contractor does not commence development of such Discovery within ten 10 years from the date of completion of the first discovery Well the Contractor shall relinquish its right to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area. 21.5.13 Notwithstanding above Companies may declare the Discovery as a Commercial Discovery and subject to approval of the Government which approval shall not be unreasonably withheld the Companies can proceed to develop the Discovery at their sole risk and cost. Licensee will not have any claim on the produce from the said Discovery if any out of the sale of the Gas from the said Discovery. If such development turn out to be noncommercial such expenditure shall be reckoned as expenditure on unsuccessful exploration but shall not count as Investment in the Contract Area nor be recoverable as Cost Petroleum from any other Field or Contract Area but shall be recoverable from Petroleum Produced from such Field. 21.5.14 Notwithstanding above Licensee may declare the Discovery as a Commercial Discovery and subject to approval of the Government which approval shall not be unreasonably withheld the Licensee can proceed to develop the Discovery at their sole risk and cost. The Companies will not have any claim on the produce from the said Discovery if any out of the sale of the Gas from the said Discovery. If such development turn out to be noncommercial such expenditure shall be reckoned as expenditure on unsuccessful exploration but shall not count as Investment in the Contract Area nor be recoverable as Cost Petroleum from any other Field or Contract Area but

shall be recoverable from Petroleum produced from such Field. 21.6 Valuation of Natural Gas 21.6.1 The Contractor shall endeavor to sell all Natural Gas produced and saved from the Field at competitive fair market armslength prices. 21.6.2 Notwithstanding Article 21.6.1 Natural Gas produced from the Contract Area shall be valued for the purposes of this Contract as follows a Gas which is flared with the approval of the Government or reinjected shall be ascribed a zero value; b Gas which is sold to the Government or any other Government nominee shall be valued at the prices actually obtained; and Gas which is sold or disposed of otherwise than in accordance with paragraph a or b shall be valued on the basis of competitive Arms Length Sales in the region for similar sales under similar conditions. 21.6.3 The formula on which the prices shall be based and determined pursuant to Articles 21.6.2 b or c shall be approved by the Government prior to approval of the Development Plan. oof OM. LO eee 7 a 22.1 22.2 223 ARTICLE 22 EMPLOYMENT TRAINING TRANSFER OF TECHNOLOGY. Without prejudice to the right of the Contractor to select and employ such number of personnel as in the opinion of the Contractor are required for carrying out Petroleum Operations in a safe cost effective and efficient manner the Contractor shall to the maximum extent possible employ and require the Operator and Subcontractors to employ citizens of India having appropriate qualifications and experience taking into account experience required in the level and nature of the Petroleum Operations. Companies shall offer a mutually agreed number of Indian nationals the opportunity for onthejob training and practical experience in Petroleum Operations during the Exploration Period. Not later than six 6 months after approval of the Development Plan the Contractor shall in consultation with the Licensee establish and implement training programs for staff positions in each phase and level of Petroleum Operations including skilled technical executive and management positions with a view to ensuring employment of nationals of India and. gradual and progressive reduction of foreign personnel. Pursuant to Article 22.2 Companies shall associate and involve mutually agreed numbers of the Licensees personnel in the technologicalaspects of the then ongoing Petroleum Operations without charge of a fee for such association or involvement. Such aspects shall include a seismic data acquisition processing and

interpretation; b computerized formation evaluation using Well logs; c computerized analysis of geological data for basin analysis; d laboratory core analysis; e reservoir simulation and modeling; f geochemistry including analytical methods generation modeling; g measurement while drilling techniques; h stimulation of Wells; i production engineering including optimization methods for surface and subsurface facilities e.g. NODAL analysis and implementation; J. reservoir engineering and management including gas and water injection; k enhanced Petroleum techniques like OWI, 2D/3D seismic source rock studies hydrocarbon generation modeling; m pipeline technology; n Well design and drilling technology. Neither Party shall be obliged to disclose by virtue of this Article 22 any data process or information whether owned by itself any of its Affiliates or a third party of a proprietary nature. At the request of the Government or a government company the Foreign Companies shall separately endeavor to negotiate in good faith technical assistance agreements with the Government or a government company setting forth the terms by which each Foreign Company constituting the Contractor may render technical assistance and make available commercially proven technical information of a proprietary nature for use in India by the Government or a government company. The issues to be addressed in negotiating such technical assistance agreements shall include but not be limited to licensing issues royalty conditions confidentiality restrictions liabilities costs and method of payment.

LOCAL GOODS AND SERVICES In the conduct of Petroleum Operations the Contractor shall give preference to the purchase and use of goods manufactured produced or supplied in India provided that such goods are available on terms equal to or better than imported goods with respect to timing of delivery quality and quantity required price and other terms; oo b employ Indian Subcontractors having the required skills or expertise to the maximum extent possible insofar as their services are available on comparable standards with those obtained elsewhere and at competitive prices and on competitive terms; provided that where no such Subcontractors are available preference shall be given to non-Indian Subcontractors who utilize Indian goods to the maximum extent possible subject however to the proviso in paragraph a above; cooperate with

domestic companies in India to enable them to develop skills and technology to service the petroleum industry; d ensure that provisions in terms of paragraphs a to c above are contained in contracts between the Operators and its Subcontractors. The Contractor shall establish appropriate procedures including tender procedures for the acquisition of goods and services which shall ensure that suppliers and Subcontractors in India are given adequate opportunity to compete for the supply of goods and services. The tender procedures shall include inter alia the financial amounts or value of contracts which will be awarded on the basis of selective bidding or open competitive bidding the procedures for such bidding and the exceptions to bidding in cases of emergency and shall be subject to the approval of the Management Committee. The tender procedure i is attached as Appendix F which shall form part of this Contract. Within one hundred and twenty 120 days after the end of each Calendar Year the Contractor shall provide the Government with a report outlining its achievements in utilizing Indian resources during that Calendar Year. In this Article goods means equipment material and supplies. 49 SIN. US RE a ae ;

ARTICLE 24 INSURANCE AND INDEMNIFICATION

24.1 Insurance

24.1.1 The Contractor shall during the term of this Contract obtain and renew as and when necessary insurance coverage for and in relation to Petroleum Operations for such amounts and against such risks as are customarily or prudently insured in the international petroleum industry in accordance with good petroleum industry practices and shall furnish to the Government certificates evidencing that such coverage is in effect. Such insurance policies shall include the Government and the Licensee as additional insured and shall waive subrogation against the Government and the Licensee. The said insurance shall without prejudice to the generality of the foregoing cover a Loss or damage to all installations equipment and other assets for so long as they are used in or in connection with Petroleum Operations ; ; provided however that if for any reason the Contractor fails to insure any such installation equipment or assets it shall replace any loss thereof or repair any damage caused thereto; b Loss damage or injury caused by pollution in the course of or as a result of Petroleum Operations; c Loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum

Operations for which the Company may be liable; ; a Any claim for which the Government may be liable relating to the loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor is liable to indemnify the Government the Licensee or the State Government e The Contractors and or the Operators liability to its employees engaged in Petroleum Operations. 24.1.2 The Contractor shall require its Subcontractors to obtain and maintain insurance against the risks referred to in Article 24.1.1 relating mutatis mutandis to such Subcontractors. 24.2 Indemnity The Contractor shall indemnify defend and hold the Government the Licensee and the State Government harmless against all claims losses and damages of any nature whatsoever including without limitation claims for loss of damage to property or injury or death to persons caused by or resulting from any Petroleum Operations conducted by or on behalf of the Contractor. ous 7 yoo Gee o . Sade 25.1 25.2 25.4 25.5 25.6 25.7 ARTICLE 25 RECORDS REPORTS ACCOUNTS AND AUDIT The Contractor shall prepare and maintain at an office in India accurate and current books records reports and accounts of its activities for and in connection with Petroleum Operations so as to present a fair clear and accurate record of all its activities expenditures and receipts. The Contractor shall also keep representative samples of cores and cuttings. Based on generally accepted and recognized accounting principles and modern Petroleum industry practices record books accounts and accounting procedures in respect of Petroleum Operations shall be maintained on behalf of the Contractor by one of the Parties comprising Contractor specifically designated for this purpose at its business office in India in accordance with the Accounting Procedure. The Operator will maintain the records on behalf of Contractor. The annual audit of accounts shall be carried out on behalf of the Contractor by a qualified independent firm of recognized chartered accountants registered in India and selected by the Contractor with the approval of the Management Committee. Accounts together with the auditors report thereon shall be submitted to the Parties for approval not later than the thirtieth 30th September following the Financial Year. Any party comprising the Contractor may by giving notice to that effect to the Operator not later than twenty four 24 months following the end of a

Year undertake a separate audit of the accounts and the cost of such audit shall be borne by the Party requiring such audit. Unless a Party comprising the Contractor notifies the other Party or Parties in writing before thirty first 31st. December following Year in which the separate audit was conducted that it has an objection to the accounts for which the separate audit was conducted such accounts shall be deemed to have been approved as on that date. Any objection to the accounts raised by a Party comprising the Contractor shall unless settled by agreement between the Parties be submitted for determination by a sole expert in accordance with the provisions of Article 33. If the matter is not submitted to a sole expert within thirty six 36 months following the year to which such objection relates the objection shall lapse. *Sow AUS]. ae* 25.8 The Government shall have the right to audit the accounting records of the Contractor in respect of Petroleum Operations as provided in the Accounting Procedure. 25.9 The accounting and auditing provisions and procedures specified in this Contract are without prejudice to any other requirements imposed by any statute in India including without limitation any specific requirements of the statutes relating to taxation of Companies. 25.10 For the purpose of any audit referred to in Articles 25.5 and 25.8 the Operator or the Companies shall] make available to the auditor all such books records accounts and other documents and information as may be reasonably required by the auditor. *oN ALY. a* 26.1 26.2 26.3 26.4 *Appencc v. .* ARTICLE 26 INFORMATION DATA CONFIDENTIALITY INSPECTION AND SECURITY The Contractor shall promptly after they become available provide the Licensee with all data obtained as a result of Petroleum Operations under the Contract including but not limited to geological geophysical geochemical petrophysical engineering well logs maps magnetic tapes cores and production data as well as all interpretative and derivative data including reports analyses interpretations and evaluation prepared in respect of Petroleum Operations hereinafter referred to as Data. quoted ; f to Government departments for or in connection with the preparation by or on behalf of the Government of statistical reports with respect to Petroleum Operations or in connection with the administration of this Contract or any relevant law or for any purpose connected with Petroleum Operations; g by a Party with respect to any Data or information which without disclosure by such Party is generally known to the public. 26.6 Any Data information or reports disclosed by the Parties comprising the Contractor to 7 any other person pursuant to Article 26.5 a to d shall be disclosed on the terms that a such Data information or reports shall be treated as confidential by the recipient. Prompt notice of disclosures made by Companies pursuant to Article 26.5 shall be given to the GovernmentLicensee. 26.7 Any Data information and reports relating to the Contract Area which; in the opinion of the Government might have significance in connection with offers by the Government of open acreage OF an exploration program to be conducted by a third party in another area may be disclosed by the Government for such purposes on conditions to be agreed upon between the Government and the Contractor. 26.8 Where an area ceases to be part of the Contract Area the Contractor shall continue to . treat Data and information with respect to respect to the said area as confidential and shall deliver to the Licensee copies or originals of all Data and information in its possession with respect to the said area. The Government shall however have the right to freely use the said Data and information thereafter. ee Spy ILD . ae26.9 26.10 26.11 The Government and the Licensee shall at all reasonable times through duly authorized representatives be entitled to observe Petroleum Operations and to inspect all assets books records reports accounts contracts samples and Data kept by the Contractor or the Operator in respect of Petroleum Operations under the Contract provided however that the Companies shall not be required to disclose any proprietary technology. The duly authorized representatives shall be given reasonable assistance by the Contractor for such functions and the Contractor shall afford such representatives all facilities and privileges afforded to its own personnel in the Contract Area including the use of office space and housing free of charge. The said representatives shall be entitled to make a reasonable use of the equipment and instruments of the Contractor provided that such functions shall not unduly interfere

with the Contractors Petroleum Operations. Contractor shall give reasonable advance notice to the Government or to any other authority designated by the Government for such purpose of its program of conducting surveys by aircraft or by ships indicating inter alia the name of the survey to be conducted approximate extent of the area to be covered the duration of the survey the commencement date and the name of the airport or port from which the survey aircraft or ship will commence its voyage. The Government or the authority designated by the Government for such purpose shall have the right to inspect any aircraft or ship used by the Contractor or a Subcontractor carrying out any survey or other operations in the Contract Area and shall have the right to put on board such aircraft or ship Government officers in such manner as may reasonably be necessary to ensure compliance by the Contractor or the Subcontractor with the security requirements of India.

27.1 27.2 27.3 27.4 27.5 27.6 ARTICLE 27 TITLE TO PETROLEUM DATA AND ASSETS The Government is the sole owner of Petroleum underlying the Contract Area and shall remain the sole owner of Petroleum produced pursuant to the provisions of this Contract except as regards that part of Crude Oil or Gas the title whereof has passed to the Contractor or any other person in accordance with the provisions of this Contract. Title to Crude Oil and or Gas to which Contractor is entitled under this Contract and title to Crude Oil and or Gas sold to Government or its nominee by the Companies shall pass to the relevant Party or as the case may be to Government or its nominee at the Delivery Point. Contractor shall be responsible for all costs and risks prior to the Delivery Point and each Party shall be responsible for all costs and risks associated with such Party's share after the Delivery Point and where the Government or its nominee purchases all or some of the Companies share of Crude Oil or Condensate in accordance with Article 18 Government or its nominee shall be responsible for all costs and risks in respect of the amount purchased after the Delivery Point. . Title to all Data specified in Article 26 shall be vested in the Licensee and the Contractor shall have the right to use thereof as therein provided. Assets purchased by the Contractor for use in Petroleum Operations shall be owned by the Parties comprising Contractor in proportion to their Participating Interest provided that the Licensee shall have the right to require

vesting of full title and ownership in it free of charge and encumbrances of any or all assets whether fixed or movable acquired and owned by the Contractor for use in Petroleum Operations inside or outside the Contract Area such right to be exercisable at the Licensees option either on recovery of the costs of the assets or upon expiry or earlier termination of the Contract. Contractor shall be responsible for proper maintenance insurance and safety of all assets acquired for Petroleum Operations whether before or after the Effective Date and for keeping them in good repair order and working condition at all times and the costs thereof shall be recoverable as Contract Costs in accordance with Appendix C. So long as this Contract remains in force the Contractor shall free of any charge for the purpose of carrying out Petroleum Operations hereunder have the exclusive use and custody of the assets which have become the property of the Licensee subject however to Article 27.7 Equipment and assets no longer required for Petroleum Operations shall first be offered to the Licensee and if not required by the Licensee shall be sold or exchanged by the Contractor provided however that prior consent of the Management Committee shall be obtained for each transaction in excess of US 5000 or such other amounts as may be agreed from time to time such consent not to be unreasonably withheld and provided further that the proceeds of sale shall be credited to Petroleum Operations as provided in Appendix C. 27.8 Assets not required by the Licensee pursuant to the terms of this Article may be sold or otherwise disposed of subject to the terms of this Contract.

oh Ya 28.1 nN os iv ARTICLE 28 ASSIGNMENT OF INTEREST Subject to the terms of this. Article and other terms of this Contract any Party comprising the Contractor may assign or transfer a part or all of its Participating Interest with the prior written consent of the Government which consent shall not be unreasonably withheld provided that the Government is satisfied that a the prospective assignee or transferee is comparable to the assignor in terms of financial standing and technical competence and its capacity and ability to meet its obligations hereunder and is willing to provide an unconditional undertaking to assume its Participating Interest. share of obligations and to provide a guarantee in respect thereof as provided in the Contract; b the prospective assignee or transferee is not a company incorporated in a country with which the

Government for policy reasons has restricted trade or business; c the prospective assignor or transferor and assignee or transferee respectively are willing to comply with any reasonable conditions of the Government as may be necessary in the circumstances with a view to ensuring performance under the Contract; and d the assignment or transfer will not adversely affect the performance or obligations under this Contract or be contrary to the interests of India; ce Government shall not withhold its consent where the assignment or transfer to another party comprising Contractor is as a result or withdrawal provisions of the agreement between the Parties comprising Contractor; Requirement of Operating Agreement have been satisfied. An application by a Company for consent to assign or transfer shall be accompanied by all relevant information concerning the proposed assignment or transfer including detailed information on the proposed assignee or transferee and its shareholding and corporate structure as was earlier required from the Companies constituting the Contractor the terms of the proposed assignment or transfer and the unconditional undertaking referred to in a above. The applicant shall also submit such information relating to the prospective assignee or transferee of the assignment or transfer as the Government may reasonably require to enable proper consideration and disposal of the application. oo. . Of oo 28.3 28.4 28.5 28.6 No assignment or transfer shall be effective until the approval of the Government is received which approval may be given by the Government on such terms as it may deem fit. Upon assignment or transfer of its interest in this Contract the assignor or transferor shall be released and discharged from its obligations hereunder only to the extent that such obligations are assumed by the assignee or transferee with the approval of the Government. . Upon prior notice to the Companies a Government company may assign or transfer all or any part of its rights and interest under this Contract to any other Government company authorized by the Government to explore for and exploit petroleum in the Contract Area. An assignment or transfer shall not be made so as to reduce the Participating Interest of a constituent of the Contractor at any time to less than ten percent 10 of the total Participating Interest of all the constituents of the Contractor except where the Government on the recommendations of the Management Committee may in special

circumstances so permit. Nothing contained in this Article 28 shall prevent a party comprising Contractor from mortgaging pledging charging or otherwise encumbering all or part of its Participating Interest for the purposes of security relating to finance required for performing the Contract provided that i such Party shall remain liable for all obligations relating to its Participating Interest; ii the encumbrance shall be expressly subordinated to the rights of the other Parties under this Contract; iii such Party has given reasonable notice of such encumbrance. and furnishes to all other Parties including for the avoidance of doubt the Government a certified copy of the executed instrument or instruments evidencing the encumbrance; and iv prior consent of the Government shall be required which consent shall not be unreasonably withheld in connection with the hypothecation to any lender with international sensitivities for the Government a . 29.1 29.2 29.3

29.4 ARTICLE 29 GUARANTEES Each of the Companies constituting the Contractor shall procure and deliver to the Government on the Effective Date of this Contract a an irrevocable unconditional bank guarantee from a reputable bank of good standing in India acceptable to the Government in favour of the Government. and the Licensee for the amount specified in Article 29.2 in a form and substance acceptable to the Government; b a financial and performance guarantee from a parent company of good financial standing acceptable to the Government in favour of the Government and the Licensee in the form and substance set out in Appendix E; c a legal opinion from its legal advisors in a form satisfactory to the Government to the effect that the aforesaid guarantees have been duly signed and delivered on behalf of the guarantors with due authority and is legally valid and enforceable and binding upon them. The amount of the guarantee referred to in Article 29.1 a above shall be an amount equal to a Companys Participating Interest share of thirty five percent 35 of the total estimated expenditure in respect of the. Work Program undertaken by the Contractor in the Contract Area during each phase of the Exploration Period. The guarantee shall provide a that the amount referred to in Article 29.2 shall be proportionately reduced at the end of each Contract Year by the percentage which the actual expenditure bears to the total estimated expenditure for each phase of the Exploration Period on presentation to the bank of a certificate signed by the

Licensee that the said amount has been expended and that the said Guarantee may be reduced in accordance with its terms; and b that at the end of the phase the guarantee will be released in favour of the Company on presentation to the bank of a certificate from the Licensee that the obligation of the Contractor has been fulfilled and the guarantee may be released. If the Contractor elects to proceed to the second and third phases respectively of the Exploration Period a bank guarantee for the succeeding phase in terms of Articles 29.1 a 29.2 and 29.3 shall be delivered to the Government with the notice of such election and if such guarantee is not so delivered the provisions of Article 29.5 shall apply. x 29.5 29.6 If any of the documents referred to in Article 29.1 is not delivered within the period specified herein this Contract may be cancelled by the Government upon ninety 90 days written notice of its intention to do so. Notwithstanding any change in the composition or share holding of the parent company furnishing the guarantees herein it shall under no circumstances be absolved of its obligations contained in the guarantees provided pursuant to this Article. CN WY 30.1 30.2 ARTICLE 30 TERMINATION OF CONTRACT Without prejudice to the provisions of Article 30.6 or any other provisions of this Contract Companies have the right to terminate this Contract b with respect to any part of the Contract Area other than a Development Area then producing or that prior thereto had produced Petroleum upon giving ninety 90 days written notice of its intention to do so; and with respect to any Development Area in which Petroleum is being produced or that prior thereto had produced Petroleum upon giving at least one hundred and eighty 180 days written notice of its intention to do so. This Contract may subject to the provisions hereinbelow and Article 31 be terminated by the Government upon giving ninety 90 days written notice of its intention to do so in the following circumstances namely that a Company a b d e D. has knowingly submitted any false statement to the Government in any manner which was a material consideration i in the execution of this Contract; or has intentionally and knowingly extracted or authorized the extraction of any mineral not authorized to be extracted by the Contract or without the authority of the Government except such extractions as may be unavoidable as a result of operations conducted hereunder in accordance with generally accepted international petroleum

industry practice which when so extracted were immediately notified to the Government and to the Licensee; or is adjudged bankrupt by a competent court or enters into any agreement or scheme of composition with its creditors or takes advantage of any law for the benefit of debtors; or has passed a resolution to apply to a competent court for liquidation of the Company unless the liquidation is for the purpose of amalgamation or reconstruction of which the Government has been given notice and the Government is satisfied that the Companys DAGGER PAYOR BLAS performance under this Contract would not be adversely affected thereby and has given its approval thereto; or has assigned any interest in the Contract without the prior consent of the Government as provided in Article 28; or fails to make any monetary payment required by law or under this Contract by the due date or within the specified period after the due date; or CN A980. ee 30.3 30.4 30.5 30.6 30.7 g fails to comply with or contravenes the provisions of this Contract in a material particular; or i fails to comply with any final determination or award made by a sole expert or arbitrators pursuant to Article 33; or i on notice of cancellation as provided in Article 29.5. PROVIDED THAT Where the Contractor comprises two or more Companies the Government shall not exercise its rights of termination pursuant to Article 30.2 on the occurrence in relation to one or more but not all of the Companies of an event entitling the Government to terminate the Contract if any other Company or Companies constituting the Contractor satisfies the Government that it or they is/are willing and would be able to carry out the obligations of the Contractor. This Contract may also be terminated by the Government on giving the requisite notice specified above if the events specified in Article 30.2 c and d occur with respect to a Company which has given a guarantee pursuant to Article 29 subject however to Article 30.4. If the circumstance or circumstances that give rise to the right of termination under Article 30.2 f or g or Article 30.3 are remedied by the Contractor within the ninety 90 day period or such extended period as may be granted by the government following the notice of the Governments intention to terminate the Contract as aforesaid such termination shall not become effective. If the circumstance or circumstances that would otherwise result in termination are the subject matter of proceedings under Article 33 then termination shall not take place so long as such

proceedings continue and thereafter may only take place when and if consistent with the arbitral award. On termination of this Contract for any reason whatsoever the rights and obligations of the Contractor shall cease but such termination shall not affect any rights of any Party which may have accrued or any obligations undertaken or incurred pursuant to this Contract by the Contractor or any Party comprising the Contractor and not discharged by the Contractor or the Party prior to the date of termination. . In the event of termination pursuant to Article 30.1 30.2 or 30.3 a the Government may require the Contractor for a period not exceeding one hundred and eighty 180 days from the date of termination to continue for the account and at the cost of the Government Crude Oil or Natural Gas production activities until the right to continue such production has been transferred to another entity BN 15S 30.8 b in case of a Foreign Company which is constituent of the Contractor shall sub j ect to thg provisions hereof have the right to remove and export all its property which . has riot vested in the Licensee provided that in the event that ownership. of any property is in doubt or disputed such property shall.not be exported unless and until the doubt or dispute has been settled in favour of the Foreign Company. Within ninety 90 days after the termination of this Contract pursuant to Article 30.1 or 30.2 or 30.3 or such longer period as the Government may agree the Contractor shall comply with Article 12.9 and any reasonably necessary action as directed by the Government to avoid Environmental Damage or hazards to human life or to the property F ad Co 4387. ae 311 31.2 31.3 31.4 31.5 that such Party has exercised reasonable diligence and efforts to remedy t ARTICLE 31 FORCE MAJEURE Any nonperformance or delay in performance by any Party hereto of any of its obligations under this Contract or in fulfilling any condition of any license or lease granted to stich Party or in meeting any requirement of the Act the Rules or. any license or lease issued thereunder shali except for the payment of monies due under this Contract or under the Act and the Rules or any law be excused if and to the extent that such nonperformance or delay in performance is caused by Force Majeure as defined in this Article. For the purpose of this Contract the term Force Majeure means any cause or event other than the unavailability of funds whether similar to or different from those enumerated herein lying beyond the reasonable control of

and unanticipated or unforeseeable by and not brought about at the instance of the Party claiming to be affected by such event or which if anticipated or foreseeable could not be avoided or provided for and which has caused the nonperformance or delay in performance. Without limitation to the generality of the foregoing the term Force Majeure shall include natural phenomena or calamities earthquakes typhoons fires wars declared or undeclared hostilities invasions blockades riots insurrection and civil disturbances. Where a Party is claiming suspension of its obligations on account of Force Majeure it shall promptly but in no case later than seven (7) days after the occurrence of the event of Force Majeure notify the other Parties in writing giving full particulars of the Force Majeure the estimated duration thereof the obligations affected and the reasons for its suspension. A Party claiming Force Majeure shall exercise reasonable diligence to seek to overcome the Force Majeure event and to mitigate the effects thereof on the performance of its obligations under this Contract provided however that the settlement of strikes or differences with employees shall be within the discretion of the Party having the difficulty. The Party affected shall promptly notify the other Parties as soon as the Force Majeure event has been removed and no longer prevents it from complying with the obligations which have been suspended and shall thereafter resume compliance with such obligations as soon as possible. The Party asserting the claim of Force Majeure shall have the burden of proving that the circumstances constitute valid grounds of Force Majeure under this Article and the cause of any alleged Force Majeure.

31.6 31.7 o. Where a Party is prevented from exercising any rights or performing any obligations under this Contract due to Force Majeure the time for the performance of the obligations affected thereby and for performance of any obligation or the exercise of any right dependent thereon and the term of any phase of the Exploration Period or this Contract may be extended by such additional period as may be agreed between the Parties or failing agreeing by a sole expert in accordance with Article 33. Notwithstanding anything contained hereinabove if an event of Force Majeure occurs and is likely to continue for a period in excess of thirty days the Parties shall meet to discuss the consequences of the Force Majeure and the course of action to be taken to mitigate the effects

thereof or to be adopted in the circumstances. i on Way ARTICLE 32 APPLICABLE LAW AND LANGUAGE OF THE CONTRACT 32.1 This Contract shall be governed and interpreted in accordance with the laws of India. 32.2 32.3 Nothing in this Contract shall entitle the Contractor to exercise the rights privileges and powers conferred upon it by this Contract in a manner which will contravene the laws of India. The English language shall be the language of this Contract and shall be used in arbitral proceedings. All communications hearing or visual materials or documents relating to this . Contract shall be written or prepared in English. xe Sgn WY SL ARTICLE 33 SOLE EXPERT CONCILIATION AND ARBITRATION 33.1 33.2 33.3 33.4 The Parties shall use their best efforts to settle amicably all disputes differences or claims arising out of or in connection with any of the terms and conditions of this Contract or concerning the interpretation or performance thereof. Except for matters which by the terms of this Contract the Parties have agreed to refer to a sole expert and any other matters which the Parties may agree to so refer any dispute difference or claim arising between the Parties hereunder which cannot be . settled amicably may subject to Article 33.11 be submitted. by any Party to arbitration pursuant to Article 33.3. Such sole expert shall be an independent and impartial person of international standing with relevant qualifications and experience appointed by agreement between the Parties. Any sole expert appointed shall be acting as an expert and not as an arbitrator and the decision of the sole expert on matters referred to him shall be final and binding on the Parties and not subject to arbitration. If the Parties are unable to agree on a sole expert and/or there is no specific agreement with regard to matters to be referred to the sole expert the matter may be referred to arbitration. The parties further agree that the appointment of sole expert would be primarily for the purpose of dealing matters which are technical in nature and require immediate decision more particular for the reasons that such decision not only have direct bearing on day to day operation of the project but failure to resolve within a time bound period may result in the project implementation being delayed prejudicially effected. Subject to the provisions herein the Parties hereby agree that any unresolved dispute difference or claim which cannot be settled amicably within a reasonable time may except for those referred to in Article 33.2;

be submitted to an arbitral tribunal for final decision as hereinafter provided. The arbitral tribunal shall consist of three arbitrators. The Party or Parties instituting the arbitration shall appoint one arbitrator and the Party or Parties responding shall appoint another arbitrator and both Parties shall so advise the other Parties. The two arbitrators appointed by the Parties shall appoint the third arbitrator who shall act as presiding Arbitrator.

33.5 33.6 33.7 33.8 33.9 33.10 33.41 Any Party may after appointing an arbitrator request the other Parties in writing to appoint the second arbitrator. If such other Party fails to appoint an arbitrator within thirty30 days of receipt of the written request to do so such arbitrator may at the request of the first Party be appointed by the Chief Justice of India or any person or institution designated by him within sixty60 days of the receipt of such request in case of an international commercial arbitration as defined in the Arbitration and Conciliation Act 1996 and where Parties to the arbitration comprised of only the domestic companiesbodies the appointment of the arbitrator referred in this sub article shall be done by the Chief Justice of the High Court having jurisdiction or any person or institution designated by him within sixty60 days of the receipt of such request. If the two arbitrators appointed by the Parties fail to agree on appointment of the third arbitrator within thirty30 days of the appointment of the second arbitrator and if the Parties do not otherwise agree the Chief Justice of India or any person or institution designated by him in case of an international commercial arbitration and Chief Justice of the High Court having jurisdiction or any person or institution designated by him in case of an arbitration involving only domestic companies at the request of either Party and in consultation with both appoint the third arbitrator keeping in view that he is not a national of the country of any of the Parties to the arbitration proceedings where the Parties to the dispute belong to different nationalities. If any of the arbitrators fails or is unable to act his successor shall be appointed in the manner set out in this Article as if he was the first appointment. The decision of the arbitral tribunal and in the case of difference among the arbitrators the decision of the majority shall be final and binding upon the Parties. Arbitration proceedings shall be conducted in accordance with the Arbitration and Conciliation Act 1996 except that in the event of any conflict between this Act and

the provisions of this Article 33 the provisions of the Act shall apply. The right to arbitrate disputes and claims under this Contract shall survive the termination of this Contract. . Prior to submitting a dispute to arbitration a party may submit the matter for conciliation under the Indian Arbitration and Conciliation Act 1996 as amended or re enacted from time to time by a sole conciliator to be appointed by mutual agreement of the Parties. If the Parties fail to agree on a conciliator in accordance with the said rules the matter may be submitted for arbitration. No arbitration proceedings shall be instituted while conciliation proceedings are pending. Ao Bs. US reorient33.12 33.13 The venue of conciliation or arbitration proceedings pursuant to this Article unless the Parties otherwise agree shall be in New Delhi and shall be conducted in the English language. Insofar as practicable the Parties shall continue to implement the terms of this Contract notwithstanding the initiation of arbitral proceedings and any. pending claim or dispute. The fees and expenses of a sole expert or conciliator appointed by the Parties shall be borne equally by the Parties. Unless otherwise agreed to by the parties assessment of the costs of arbitration including inental expenses and liability for the payment thereof shall be at the discretion of the arbitrators. 34.1 34.2 34.3 34.4 34.5 34.6 ARTICLE 34 ENTIRE AGREEMENT AMENDMENTS WAIVER MISCELLANEOUS This Contract supersedes and replaces any previous agreement or understanding between the Parties whether oral or written on the subject matter hereof prior to the Effective Date of this Contract. This Contract shall not be amended modified varied or supplemented in any respect except by an instrument in writing signed by all the Parties which shall state the date upon which the amendment or modification shall become effective. No waiver by any Party of any one or more obligations or defaults by any other Party in the performance of this Contract shall operate or be construed as a waiver of any. other obligations or defaults whether of a like or of a different character. The provisions of this Contract shall inure to the benefit of and be binding upon the Parties and their permitted assigns and successors in interest. . In the event of any conflict between any provisions in the main body of this Contract and any provision in the Appendices the provision in the main body shall prevail. The headings of this Contract are for convenience of reference only and shall not be

taken into account in interpreting the terms of this Contract. . Coy WHSL ARTICLE 35

CERTIFICATES 35.1 Each Company shall furnish to the Government prior to execution of this Contract a duly authorized copy of a resolution properly and legally passed by Board of Directors of the Company authorizing its President or any VicePresident or duly appointed attorney to execute this Contract along with a certificate duly signed by the Secretary or an Assistant Secretary or a duly authorized Director of the Company under its seal in this regard and to the effect that the Company has the power and authority to enter into this Contract and to perform its obligations thereunder and has taken all necessary actions to authorize the execution delivery and performance of the Contract.

SECTION 4

RECORDS AND INVENTORIES OF ASSETS

Records 4.1.1

The Contcactor shall keep and maintain detailed records of property and assets in 4.1.2 use for or in connection with Petroleum

Operations under the Contract in accordance with normal practices in exploration and production activities of the international petroleum industry. Such records shall include information on quantities location and condition of such property and assets and whether such property. or assets are leased or owned. The Contractor shall furnish particulars to the Government by notice in writing as provided in the Contract at six monthly intervals of all assets acquired by the Contractor to be used or in connection with Petroleum Operations during the. period immediately preceding the delivery of such notice. Inventories 4.2.1 4.2.2 4.2.3 4.2.4 The Contractor shall a not less than once every twelve 12 Months with respect to moveable assets; and b not less than once every three 3 Years with respect to immovable assets take an inventory of the assets used for or in connection with Petroleum Operations in terms of the Contract and address and deliver such inventory to the Government together with a written statement of the principles upon which valuation of the assets mentioned in such inventory has been based. The Contractor shall give the Government at least thirty 30 days notice in wnting in the manner provided for in the Contract of its mtention to take the inventory referred to in Section 4.2.1 and the Government shalf have the right to be represented when such inventory is taken. When an assignment of rights under the Contract takes place a special inventory shall be taken by the Contractor at the request of the assignee provided that the cost of such inventory is borne by the assignee and paid to the Contractor. In order io give effect to Article 27 of the Contract the Contractor shall provide the Government with a comprehensive list of all relevant assets when requested by the Government to do so. ef USSD ae o 5.1 5.2 i

SECTION 5

PRODUCTION STATEMENT From the date of first production after the Effective Date of Petroleum from the Contract Area the Contractor shall submit a monthly Production Statement to Government showing the following information separately for each producing Field and in aggregate for the Contract Area. S.L1 5.L2 .1.3 5.1.4 S.L5 The quantity of Crude Oil and Condensate produced and saved. The quality and characteristics of such Crude Oil and Condensate produced and saved The quantity of Associated Natural Gas Non Associated Natural Gas produced and saved. The quality characteristics and composition of such Natural Gas produced and saved. The quantities of Crude

Oil Condensate and Natural Gas used for the purpose of carrying on drilling and production operations and pumping to Field storage as well as quantities reinjected. 5.1.6 The quantities of Crude Oil Condensate and Natural Gas unavoidably lost. 5.1.7 The quantities of Natural Gas flared and vented. 5.1.8 The size of Oil stocks held on the first day of the Month in question. 5.1.9 5.1.10 The quantities of Natural Gas reinjected into the Petroleum Reservoir. 5.1.11 The number of days in the Month during which Petroleum was produced from Field. 5.1.12 The Gas/Oil Ratio for each Field in the Contract Area for the relevant Month. All quantities shown in this Statement shall be expressed in volumetric terms Barrels of Petroleum and cubic metres of gas, and in weight metric tonnes for Crude Oil and Condensate. ; ; USS ee 7 ag 5.3 5.4 a 5 The Government may direct in writing that the Contractor include other particulars relating to the production of Petroleum in its monthly Production Statement and the Contractor shall comply with such direction. The Production Statement for each Month shall be submitted to Government no later than ten 10 days after the end of such Month. . pf Soh WL aaa 6.1 6.2 SECTION 6 VALUE OF PRODUCTION AND PRICING STATEMENT The Contractor shall for the purposes of Article 19 of the contract prepare a Statement providing calculations of the value of Crude Oil and Condensate produced and saved during each Month. This Statement shall contain the following information 6.1.1 6.1.2 6.1.3 6.1.6 The quantities prices and receipts realized therefor by the Contractor as a result of sales of Crude Oil and Condensate to third parties with any sales to Government being separately identified made during the Month in question. The quantities prices and receipts realized therefore by the Contractor as a result of sales of Crude Oil and Condensate made during the Month in question other than to third parties The quantities of Crude Oil and Condensate appropriated by the Contractor to refining or other processing without otherwise being disposed of in the form of Crude Oil or . natural Condensate. The value of stocks of Crude Oil and Condensate on the first day of the Month in question. The value of stocks of Crude Oil and Condensate on the last day of the Month i in question. . The percentage volume of total sales of Crude Oil and Condensate made by the

Contractor during the Month that the Arms Length Sales to third parties. Information available to the Contractor insofar as required for the purposes of Article 19 of the Contract concerning the prices of competitive Crude Oils . produced by the main Petroleum producing and exporting countries including contract prices discounts and premia and prices obtained on the spot markets The Contractor shall for the purpose of Article 21 of the Contract prepare a Statement . providing calculations of the value of Associated Natural Gas and Non Associated Natural Gas produced and sold during each Month. This Statement shall contain all information of the type specified in section 6.1 for Crude Oil as is applicable to Gas and such other relevant information as may be required.

LOOSE aa eng 6.3 6.4 The Statement required pursuant to Section 6. and 6.2 shall include a detailed breakdown of the calculation of the prices of Crude Oil Condensate Associated Natural Gas and Non Associated Natural Gas pursuant to the provisions of Articles 19 and 21. The Value of Production and Pricing Statement for each Month Shall be submitted to Gove nt not later than twentyone 21 days after the end of such Month. 71 7.2 SECTION 7 STATEMENT OF COSTS EXPENDITURES AND RECEIPTS The Contractor shall prepare with respect to each Quarter a Statement of Costs Expenditures and Receipts under the Contract. The statement shall distinguish between Exploration Costs Development Costs and Production.Costs and shall separately identify all significant items of costs and expenditure as itemized in Section 3 of this Accounting Procedure within these categories. The Statement of receipts shall distinguish between income from the Sale of Petroleum and inental income of the sort itemized in Section 3.4 of this Accounting Procedure. If the Government is not satisfied with the degree of desegregation within the categories it shall be entitled to request a more detailed breakdown. The Statement shall show the following 7A1 Actual costs expenditures and receipts for the Quarter in question. 7.1.2 Cumulative costs expenditures and receipts for the Year in question. 7.1.3 Latest forecast of cumulativecosts expenditures and receipts at the Year end. 7.1.4 Variations between budget forecast and latest forecast and explanations thereof The Statement of Costs Expenditures and Receipts of each Quarter shall be submitted to Government no later than twentyone 21 days after the end of such quarter. . 8.1 8.2 8.3 8.4

SECTION 8 COST RECOVERY STATEMENT The Contractor shall prepare with respect to each Calendar Quarter a Cost Recovery Statement containing the following information

8.1.1 Unrecovered Contract Costs carried forward from the previous Quarter if any.

8.1.2 Contract costs for the Quarter in question.

8.1.3 Total Contract Costs for the quarter in question Section 8.1.1 plus Section 8.1.2.

8.1.4 Quantity and value of Cost Petroleum taken and disposed of by the Contractor for the Quarter in question.

8.1.5 Contract Costs recovered during the Quarter in question.

8.1.6 Total cumulative amount of Contract Costs recovered up to the end of the Quarter in question.

8.1.7 Amount of Contract Costs to be carried forward into the next quarter. Where necessary the information to be provided under Section 8.1 shall be identified separately Field by Field and also separately for Crude Oil Condensate Associated natural Gas and Non Associated Natural Gas. The Cost Recovery information required pursuant to subsection 8.1 above shall be presented in sufficient detail so as to enable Government to identify how the cost of assets are being recovered for the purposes of Article 27 of the Contract. The Cost Recovery Statement for each Quarter shall be submitted to Government not later than twentyone 21 days after the end of such Quarter.

Ad BN SC ae OL 9.2 9.3

SECTION 9 PRODUCTION SHARING STATEMENT The Contractor shall prepare with respect to each Quarter a Production Sharing Statement containing the following information

9.1.1 9.1.2 9.1.3 9.1.4 9.1.5 9.1.6 9.1.7 The calculation of the applicable net cash flows as defined in a D for the Quarter in question. The value of the Investment Multiple applicable in the Quarter in question. Based on Section 9.1.2 and Article 15 the appropriate percentages of Profit Petroleum for the Government and Contractor in the Quarter in question. The total amount of Profit Petroleum to be shared between the Government and Contractor in the Quarter in question. Based on Sections 9.1.3 and 9.1.4 the amount of Profit Petroleum due to the Government and Contractor as well as to each constituent of the Contractor in the Quarter in question. The actual amounts of Petroleum taken by the Government and Contractor as well as by each constituent of the Contractor during the Quarter in question to satisfy their entitlements pursuant to Section 9.1.5. . Adjustments to be made if any in future Quarters in the respective amounts of Profit Petroleum due to the

Government and Contractor as well as to each constituent of the Contractor on account of any differences between the amounts specified in Sections 9.1.5 and 9.1.6 as well as any cumulative adjustments outstanding from previous Quarters. Where necessary the information to be provided under Section 9.1 shall be identified separately for each Field and also separately for Crude Oil and Condensate as distinct from Natural Gas. The Production Sharing Statement shall be submitted to Government not later than twenty one 21 days after the end of such Quarter.

SECTION 10 END OF YEAR STATEMENT 10.1 The Contractor shall prepare a definitive End of Year Statement. The Statement shall contain aggregated information in the same format as required in the Production Statement Royalty and Cess Statement Value of Production and Pricing Statement Statement of Costs Expenditures and Receipts Cost Recovery Statement and Production Sharing Statement but shall be based on actual quantities of Petroleum produced income received and costs and expenditures incurred. Based upon this Statement any adjustments that are necessary shall be made to the transactions concerned under the Contract. 10.2 The End of Year Statement for each Year shall be submitted to Government within sixty 60 days of the end of such Year.

SECTION 11 BUDGET STATEMENT 11. The Contractor shall prepare a Budget Statement for each Year. This Statement shall 11.2 distinguish between budgeted Exploration Costs Development Costs and Production Costs and shall show the following 11.1.1 Forecast costs expenditures and receipts for the Year in question. 11.1.2 A schedule showing the most important individual items of total costs expenditures and receipts for the said Year. The Budget Statement shall be submitted to Government with respect to each Year not less than ninety 90 days before the start of the said Year provided that in the case of the Year in which the Effective Date falls the Budget Statement shall be submitted within ninety 90 days of the Effective Date.

APPENDIX D CALCULATION OF THE INVESTMENT MULTIPLE FOR PRODUCTION SHARING PURPOSES 1. In accordance with the provisions of Article 15 the share of the Government and the Contractor respectively of Profit Petroleum from any Field in any Year shall be determined by the Investment Multiple earned by the Companies from the Field at the end of the preceding Year. These measures of profitability shall be

calculated on the basis of the appropriate net cash flows as specified in this Appendix D.

Investment Multiple 2. The Net Cash Income of the Companies from the Field in any particular Year is the aggregate value for the Year of the following:

- i Cost Petroleum entitlement of the Companies as provided in Article 14;
- ii Profit Petroleum entitlement of the Companies as provided in Article 15;
- iii the Companies' share of all incidental income of the type specified in section 3.4 of the Accounting Procedure arising from Petroleum Operations;
- less . iv the Companies' share of all Production Costs incurred on or in the Field;
- less v the notional income tax determined in accordance with paragraph 7 of this Appendix payable by the Companies on profits and gains from the Field.

3. The Investment made by the Companies in the Field in any particular Year is the aggregate value for the Year of:

- i the Companies' share of Exploration Costs incurred in the Contract Area and apportioned to the Field in the same proportion that such Costs were recovered pursuant to Article 14.4.
- plus ii The Companies' share of Development Costs incurred in the Field.

4. For the purpose of the calculation of the Investment Multiple costs or expenditures which are not allowable as provided in the Accounting Procedure shall be excluded from Contract Costs and be disregarded.

5. The Investment Multiple ratio earned by the Companies as at the end of any Year from the Field shall be calculated by dividing the aggregate value of the addition of each of the annual Net Cash Incomes accumulated without interest up to and including that Year starting from the Year in which Production Costs were first incurred or Production first arose on or in the Field by the aggregate value of the addition of each of the annual Investments accumulated without interest up to and including that Year starting from the Year in which Exploration and Development Costs were first incurred.

Profit Petroleum from the Field in any Year shall be shared between the Government and the Contractor in accordance with the value of the Investment Multiple earned by the Companies as at the end of the previous Year pursuant to Articles 15.2 15.7. .

General 7.

8. The applicable cash flows set out in paragraphs 2 and 3 of this Appendix shall be separately identified and calculated in respect of each Field. In determining the amount of notional income tax to be deducted in the applicable cash flows specified in paragraph 2

of this Appendix a notional income tax liability in respect of the Field shall be determined for each Company comprising the Contractor as if the conduct of Petroleum Operations by the Company in the Field constituted the sole business of the Company and as if the provisions of the Income Tax Act 1961 with respect to the computation of income tax on the basis of the income and deductions provided for in Article 16 of this Contract were accordingly applicable separately to the Field disregarding any income allowances deductions losses or ; . setoff of losses from any other contract Area or business of the Company

APPENDIX F PROCEDURE FOR ACQUISITION OF GOODS AND SERVICES OBJECTIVES The objectives of these procedures are to a ensure the goods and services acquired by the Operator for the carrying out of the Petroleum Operations are acquired at the optimum cost taking into consideration all relevant factors including price quality delivery times and the reliability of potential . suppliers . b ensure that goods and services are delivered in a timely manner taking into consideration the consequences of delays in the acquisition of these goods and

services on the project as a whole. c ensure that the provisions of Article 23 of the Contract are implemented.

PRINCIPLES The principles upon which these procedures are based are a The parties must be satisfied that the Operator is working to an agreed procedure for acquiring goods and services which is auditable and in accordance with the provisions of the Contract. b The Operator must have the ability to acquire goods and services expeditiously so that the project schedules in respect of Approved Work Programmes are maintained.

PROCEDURES The procedures to be adopted. by the Operator for the acquisition of goods and services shall be as follows

Procedure A Procedure B Procedure C

Applicable to Exploration 25000 to 100001 to more than Appraisal Development and 100000 300000 300000

Production Operations 7

Ao Cow dl SE ee

For Contracts valued at less than US 25000 The Operator will be at liberty to determine the preferred method of acquiring goods and services valued at less than US 25000 with the understanding that at least three (3) quotations from selected suppliers including at least one (1) Indian supplier will be obtained. For items valued at greater than US 10000 Operator is required to report to the Operating Committee if the quote accepted exceeds the lowest quote by more than 20 percent. Operator will promptly report to the Operating Committee the Operator's reasons for not selecting the lowest quote.

Procedure A Operator shall ;

- 1 Provide the Parties with a list of all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the Contract along with other entities if any from whom the Operator proposes to invite tender; Add to such list the entities whom a Party requests for adding within five (5) Business Days on receipt of such lists;
- 2 G3 If and when any Party so requests. Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix FIV to perform under the contract;
- 4 Complete the tendering process within a reasonable period of time;
- 5 Circulate to all Parties a comparative bid analysis stating Operator's choice of the entity for award of contract. Provide also reasons for such choice in case entity chosen is not the lowest bidder
- 6 Inform all the Parties of the entities to whom the contract has been awarded; and
- 7 Upon the request of a Party provide such Party with a copy of the final version of the contract awarded.

Procedure 3 t Provide the Party with a list of all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender; Add to such list the entities whom a Party requests for adding within five 5 Business Days on receipt of such list; ; Os 2 If and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix FIV to perform under the contract; 4 Complete the tendering procedure within a reasonable period of time; 5 Circulate to all Parties a comparative bid analysis stating Operators choice of the entity for award of contract Provide also reasons for such choice in case the entity chosen is not the lowest bidder. If the bid selected is not the lowest bid obtain prior approval of the Operating Committee for award of contract 6 Award the contract accordingly and inform all the Parties of the entities to whom the contract has been awarded; and . 7 Upon the request of a Party provide such Party with a copy of the final version of the contract awarded. Procedure C Operator shall . 1 Publish invitations for parties to prequalify for the proposed contract in at least one 1 daily national Indian newspaper. Provide to NonOperating Companies a list of responding parties and an analysis of their qualifications for the contract being contemplated to be awarded. Include those who qualify as per the prequalification criteria approved as per Appendix F[V in the list of entities from whom Operator proposes to invite tender for the said contract. . 2 Provide the Parties with a total list of all the entities selected as 1 above and all the entities 3 4 approved by the Operating Committee as per Appendix FV for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender; Add to such entities whom a Party requests for adding within five 5 Business Days on receipt of such list; If and when any Party so requests. Operator shall evaluate any entity listed in 2 and 3 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix FIV to perform under the Contract; Gs. US SZ.. ee ie Prepare and despatch the tender documents to the entities as finally listed and to the NonOperating 5 Parties; tek 6 After the expiration of the period allowed for tendering consider and analyse the details of all bids received; Prepare and

circulate to the Parties a comparative bid analysis stating Operators recommendation as to the entity to whom the contract should be awarded the reasons therefor and the technical commercial and contractual terms to be agreed upon; Obtain the approval of the Operating Committee to the recommended bid. However failing Operating Committee approval any Company may refer the issue to the Management Committee for decision; and 8 Award the contract accordingly and upon the request of a Party provide such Party with a. 9 . copy of the final version of the contract; A set of vendor qualification criteria for each major category contractsupply shall be proposed by the Operator and approved by the Operating Committee within thirty 30 days of its submission. In the event the Operating Committee fails to approve vendor qualification criteria within 30 days of the date the same is first submitted by the Operator the matter shall be referred to the Management Committee for decision. The Operating Committee may revise the qualification criteria. IV It is anticipated that in order to expedite Joint Operations contracts will be awarded to qualified vendorscontractors who are identified as approved vendors for the specified activities. A list of such approved vendors shall first be established as follows Ts Operator shall . 1 Provide the Parties with a list of the entities from whom Operator proposes to invite tender for contracts; and 2 Add to such list entities whom a Party requests for adding within fourteen 14 days on receipt of such list; and obtain approval of the Operating Committee by the Operator. Such [list shall thereafter be maintained by the person The Operating Committee may add to or delete vendors from such list. a b Operator to contract a Agent Audit Rights and Assignability The Operator shall act as an agent to the Parties in dealings with contractors and suppliers. Unless otherwise determined by the Management Committee in negotiating contracts with third parties in excess of US D 10000 Operator shallprocure the right to audit clause. Unless otherwise approved by the Management Committee the Operator shall ensure that any contract awarded may be freely assigned to any successor of the Operator in the event of resignation. or removal of the Operator. In cases of emergency Operator may award subcontracts or acquire goods and services without following the procedure set out above provided such transactions are reported to the Operating Committee at its

first meeting following such award. ON Lp. cK PETROLEUM PROSPECTING LICENSE This Deed made the day of . 2013 between the Government of the Republic of Guyana represented herein by the Minister hereinafter referred to as the Minister or the Government as the case may be of the One Part; And Repsol Exploración S.A. hereinafter referred to as Repsol; a Company incorporated under the Law of Spain with its registered office at Mendez Alvaro No 44 28045 Madrid Spain and registered in Guyana under the Companies Act 1991 with its registered address in Guyana situated at 157 C Waterloo Street North Cummingsburg Georgetown Guyana; hereinafter referred to as the Licensee of the Other Part; WHEREAS in accordance with the Petroleum Exploration and Production Act 1986 Act No. 3 of 1986 and the Regulations made thereunder hereinafter referred to as the Act and Regulations respectively the Licensee have by application dated 6th day of December 2012 applied to the Minister for the grant of a Petroleum Prospecting License in respect of the area constituted by blocks described and identified in the First Schedule hereto and shown on a map thereto attached; WHEREAS under authority conferred by section 10 of the Act the Minister has entered into an agreement of even date herewith hereinafter referred to as the Petroleum Agreement with the Licensee for the grant to the Licensee of a Petroleum Prospecting License subject to the terms of the Petroleum Agreement. NOW THEREFORE in exercise of the powers conferred upon the Minister by section 10 and 21 of the Act 1. I the Minister do hereby grant to the Licensee for a period of four (4) Years commencing on the Effective Date of the Petroleum Agreement with two (2) optional renewal periods of three (3) Years each this Petroleum Prospecting License in respect of the area constituted by the blocks described in the First Schedule hereto and identified and shown on the map attached thereto hereinafter referred to as the prospecting area conferring on the Licensee by subject to the Act and the Regulations made thereunder and to the conditions specified hereunder or to which the Licensee is otherwise subject under the Petroleum Agreement the exclusive right to explore in the prospecting area for petroleum and the right to carry on such operations and execute such works therein as are necessary for that purpose. 2. This Petroleum Prospecting License is granted subject to the following conditions A In accordance with

Article 4.1 of the Petroleum Agreement during the term of this Petroleum Prospecting License the Licensee shall in or in relation to the prospecting area carry out the work in Article 4.1a and 4.1b and 4.1c of the Petroleum Agreement. Government Of Guyana Repsol Exploración S.A. Petroleum Prospecting License Page 1

The initial period of four 4 Years shall be divided into two 2 phases phase 1 shall be for two and a half 2.5 Years and phase 2 shall be for one and a half 1.5 Years. Phase 1 of the initial period two and a half 2.5 Years a During phase 1 the Contractor shall Acquire process and interpret 500 km of 2D seismic within the Contract Area and Acquire process and interpret 2000 sq. km of 3D seismic within the Contract Area b At the end of phase 1 the Contractor shall elect either to relinquish the entire Contract Area or enter phase 2. Phase 2 of the initial period one and a half 1.5 Years a During phase 2 Contractor shall commence to drill an Exploration Well to the Cretaceous Formation in accordance to Article 4.2. b At the end of the initial period of four 4 Years the Contractor shall elect either to relinquish the entire Contract Area except i for any Discovery Area in respect of which the Minister is informed under section 30 of the Act ii for any Natural Gas Discovery Area pending the outcome from market development which is to assist Contractor with whether to declare commerciality and iii for the area contained in any Petroleum Production Licence or subject to Article 5 relinquish twenty percent 20 of the Contract Area and renew the Petroleum Prospecting Licence for a further period of up to three 3 Years. First renewal period of three 3 Years The first renewal period of three 3 Years shall be divided into two 2 phases each phase consisting of eighteen 18 months. Contractor shall submit a proposal with the work commitment to be performed during the two phases of the first renewal period along with the relevant application. At the end of the first renewal period of three 3 Years the Contractor shall elect either to relinquish the entire Contract Area except i for any Discovery Area in respect of which the Minister is informed under section 30 of the Act ii for any Natural Gas Discovery Area pending the outcome from market development which is to assist Contractor with whether to declare commerciality and iii for the area contained in any Petroleum Production Licence or subject to Article 5 relinquish twenty percent 20 of the Contract Area and renew the Petroleum Prospecting Licence

for a second period of three 3 Years. Government Of Guyana Repsol Exploraci6n S.A. Petroleum Prospecting License Page2 Second renewal period of three 3 Years The second renewal period of three 3 Years shall be divided into two 2 phases each phase consisting of eighteen 18 months. Contractor shall submit a proposal with the work commitment to be performed during the two phases of the second renewal period along with the relevant application. At the end of the second renewal period of three 3 Years the Contractor shall relinquish the entire Contract Area except i for any Discovery Area in respect of which the Minister is informed under section 30 of the Act ii for any Natural Gas Discovery Area pending the outcome from market development pursuant to section 331 of the Act and as set out in Article 8.4 which is to assist Contractor with whether to declare commerciality and iii for in any Petroleum Production Licence and any other portion of the Contract Area on which the Minister agrees to permit the Contractor to conduct further exploration activities.

the area contained B Within sixty 60 days after the Effective Date of the Petroleum Agreement the licensee shall submit to the Minister details of the work programme and budget on the basis of the minimum work programme specified in A above to be undertaken during the remaining portion of the calendar year. Thereafter for so long as this Petroleum Prospecting License remains in force the Licensee shall submit an annual work programme and budget on the basis of the minimum work program1e specific i A above not later than c1e 0 onth prior to the beginning of the calendar year.

C D Subject to the provisions of the Act and the Petroleum Agreement and other conditions of the Petroleum Prospecting License the Licensee shall conduct prospecting operations hereunder in accordance with the annual work programme and budget submitted pursuant to clause 2B herein. The Licensee shall before commencing any prospecting operations in the prospecting area furnish to the Minister the name and address of the manager who at the time of commencement of such prospecting operations shall have supervision over the prospecting operations to be carried out. Thereafter any change in name and/or address of the manager shall be forthwith notified to the Minister. Any notice which the Minister or any person authorized by the Minister is required or entitled to serve upon the Licensee shall be sufficiently served if the same shall be delivered or sent

by post to such manager at such address and served in accordance with Article 33 of the Petroleum Agreement. E The Licensee shall observe and give effect to the terms of the Petroleum Agreement.

3. Where during any period covered by this Petroleum Prospecting License the obligations of the Licensee under this petroleum prospecting license have been suspended by reason of force majeure pursuant to the Petroleum Agreement the period for which this petroleum prospecting license has been granted shall be extended as specified in Article 24 of the Petroleum Agreement. 4.

The Licensee shall pay to the Government during the term hereby granted an annual Government Of Guyana Repsol Exploración S.A. Petroleum Prospecting License Page 3 LJ IJ u LI u LI u u LI LJ LJ charge in respect of the prospecting area as specified in Article 10 of the Petroleum Agreement.

5. 6. The Licensee shall be entitled to renew this petroleum prospecting license as set forth in Article 3.1b of the Petroleum Agreement. Unless the context otherwise requires terms and expressions used in this Petroleum Prospecting License shall have the same meaning as in the Act or the Petroleum Agreement.

IN WITNESS WHEREOF I Donald Ramotar the Minister do hereby grant this Petroleum Prospecting License and set my hand and affixed the seal of the Government of the Republic of Guyana and the Licensee has set his seal the day month and year first herein above written.

Witness Signed By The Minister Responsible For Petroleum Representing the Government of the Republic of Guyana I His Excellency Donald Ramotar President of the Republic of Guyana Minister Responsible for Petroleum Signed By Repsol Exploración S.A. v Authorized Company Officer/Director

PETROLEUM AGREEMENT This Agreement is made on the Vi day of Vi t.t Republic of Guyana the
Govenunent rted herein by the Minister Responsible for Petroleum hereinafter referred to as the
Minister of the One Part 2013 between the Government of the And of the Other Pari Repsol
Exploraci6n S.A. hereinafter referred to as Repsol; a Company incorporated under the law of Spain
with its registered office at Mendez Alvaro No 44 28045 Madrid Spain and registered in Guyana

under the Companies Act 1991 with its registered address in Guyana situated at 157 C Waterloo Street North Cummingsburg Georgetown Guyana; Repsol Exploraci6n S.A. shall be referred to as Licensee andor Contractor. The Licensee and the Minister shall individually be referred to as Party and collectively as Parties. WHEREAS 1 2 By virtue of the Petroleum PJduc Act Cap. 6505 Petroleum est1g in its natural condition in strata in Guyana is vested in the State; the Petroleum Exploration and P1oduction Act No. 3 of 1986 hereinafter referred to as the Act and the Petroleum Exploration and Production Regulations 1986 the Regulations make provision with respect to prospecting for and production of Petroleum and for matters connected therewith; hereinafter referred to as The Guyana Geology and Mines Commission hereinafter referred to as GGMC a body corporate established under the Guyana Geology and Mines Commission Act No. 9 of 1979 has been seized with the responsibility inter alia of planning and securing the development exploitation and management of Petroleum as defined in the Act in Guyana so as to ensure for the people of Guyana the maximum benefits therefrom and for doing such things in relation thereto ; 3 With respect to prospecting for and producing Petroleum and for matters connected therewith the Act and Regulations subject to certain limitations and conditions contained therein authorize the Minister to grant Petroleum Prospecting Licences and Petroleum Production Licences; 4 Section 10 of the Act authorizes the Minister to enter into an agreement with any person with respect to inter alia the grant of a Licence the conditions to be included in a Licence the procedure to be followed by the Minister while exercising any discretion conferred upon him by or under the Act and the manner in which the discretion shall be exercised and any matter inental to or connected therewith; Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A . Page | 5 6 7 8 Licensee has submitted to the Minister a proposal the proposal for a production sharing agreement in respect of a certain offshore area of Guyana on terms and conditions specified in the proposal; GGMC has been authorized by the Minister to negotiate this Agreement subject to the provisions of the Act and Regulations and to the final written approval of the Minister of its and execution thereof and to assist in the administration and implementation thereof; Licensee will have or will acquire the financial

resources the managerial technical and industrial competence and the experience to carry out Petroleum Operations and will provide a bond in accordance with section 13 of the Act; or a parent company guarantee pursuant to Article 3.2 hereof; Pursuant to the aforesaid recitals Licensee made an application to the Minister for a Petroleum Prospecting Licence in accordance with regulation 13 of the Regulations as hereinafter defined. over the area described in Annex A and shown on the map attached as Annex B subject to the terms and conditions herein set forth and subject to the provisions of the Act and Regulations and Licensee has agreed by execution of this Agreement to accept the said Licence on the said terms and conditions and provisions. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follow; Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 2 Article 1 Definitions 1. 1 In this Agreement unless the context otherwise requires Accounting Procedure means the procedure set out in Annex C; Act means the Petroleum Exploration and Production Act No.3 of 1986; Affiliated Company in relation to each party comprising the Contractor means a company or corporation; i which is directly or indirectly controlled by each party comprising the Contractor; or ii which directly or indirectly controls each party comprising the Contractor; or iii which is directly or indirectly controlled by a company or corporation that also directly or indirectly controls each party comprising the Contractor. For the purpose of this definition control means the right to exercise a vote of fifty per cent 50 or more of all the 01111g shares; Agreed Interest Rate means interest compounded on a monthly basis at the rate per annum equal to the average London Interbank Offer Rate LIBOR for six 6 months United States dollar deposits as published by the Wall Street Journal on the first Business Day of such month being calculated plus three 3 percentage points; Agreement means this Petroleum Agreement and the Annexes hereto attached and made a part hereof; Appraisal Programme means a programme carried out following a discovery of Petroleum in the Contract Area for the purpose of delineating the Petroleum Reservoir as defined in the Act to which that discovery relates in terms of thickness and lateral extent and estimating the quantity of recoverable Petroleum therein prior to declaration of

commerciality; Appraisal Well means a well drilled for the purpose of an Appraisal Programme; Article means an Article of this Agreement; Associated Gas means all Natural Gas produced from any Field of which the production of Crude Oil is more than fifty percent 50 of the total barrels of oil equivalents BOES expected to be produced in said Field as determined in a Development Plan and includes the gascap which overlies and is in contact with Crude Oil. For purpose of BOES calculation a conversion factor of 5658 standard cubic feet per barrel scfbbl shall be used; Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A . Page 3 Barrel means a quantity cons1stmg of fortytwo 42 United States gallons liquid measure measured at standard conditions of atmospheric pressure and temperature 14.7 lbssq. inch absolute or 1 Kgsq. em. absolute and corrected to a temperature of sixty 60 degrees Fahrenheit or fifteen 15 degrees Celsius; Business Day means a day on which the banks in Georgetown Guyana are customarily open for business. Calendar Month or Month means any of the twelve months of the Calendar Year; Calendar Qumier or Quarter means a period of three 3 consecutive months beginning on the first day of January April July or October; Calendar Year or Year means a period of twelve 12 consecutive Months commencing on January 1 and ending on the succeeding December 31 provided however that a Year of a te1m of a Licence shall be the period specified in section 2 2 b of the Act; Commercial Discovery means any discovery which the Contractor in its sole judgment considers economic to develop and produce pursuant to the terms of the Agreement; Contract Area means i on the Effective lJate the area described in Annex A and shown on the map in Annex B and the subject of the Petroleum Prospecting Licence granted to the Contractor pursuant to Article 3; and ii thereafter any areas which at any particular time are subject to the Petroleum Prospecting Licence or Petroleum Production Licences granted to the Contractor under Article 8; Contract Costs means Exploration Costs Development Costs Operating Costs Service Costs General and Administrative Costs A1mual Overhead Charge and PreContract Costs; Contractor means Repsol Exploraci6n S.A. and includes its successors and pennitted ass1gnees; Cost Petroleum has the meaning assigned in Article 1 1; Crude Oil or Oil means crude mineral oil asphalt ozokerite

distillates condensates and all kinds of hydrocarbons and bitumens both in solid and liquid forms at standard conditions of temperature and pressure 60 degrees Fahrenheit or 15 degrees Celsius and 14.7 lbsq. in or 1 Kgsq. cm; Delivery Point means in the case of Crude Oil the inlet flange of the lifting tankship; in Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 4 the case of Natural Gas shall be the sales point and the point at which custody transfers from seller to buyer; or such other economically viable point which shall be agreed to by the Contractor and the Minister; Development Costs means the expenditure so categorized in Annex C; Development Plan .. means the plan referred to in Article 8.4; Development Well means any well drilled as part of a Development Plan; Discovery Area means an area which is part of a Prospecting Area consisting of a Discovery Block or Blocks in respect of which the Minister has been informed under section 30 of the Act; Discovery Block means that as defined in the Act; Discovery of Petroleum means that as defined in the Act Effective Date means the date on which this Agreement comes into force pursuant to Article 30; Expatriate Employee means any employee other than a Guyanese citizen of any party comprising the Contractor the Operator any Affiliated Company and/or SubContractors not permanently resident in Guyana who is engaged under a contract of service for the purpose of Petroleum Operations; Exploration Costs means those expenditures so categorized in Annex C; Exploration Period means the initial period and/or the first renewal period and/or the second renewal period referred to in Article 4. 1 as the case may be; Exploration Well means a well drilled which is not a Development Well with the objective of exploring for Petroleum on a geological entity be it of structural stratigraphic facies or pressure nature to a depth or stratigraphic level specified in the work programme for the exploration work programme; Field means an area within the Contract Area consisting of a Petroleum Reservoir or multiple Petroleum Reservoirs all grouped on or related to the same individual geological structural features or stratigraphic conditions from which Petroleum may be produced commercially; Gas Field means a Field producing predominantly NonAssociated Gas; General and Administrative Costs and Annual Overhead Charge means expenditures so categorised in Annex C; the Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A.

Page 5 Geologic Basement means any igneous or metamorphic rock or any stratum in and below which the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected; Government means the Government of the Republic of Guyana and its ministries and agencies; GGMC means the Guyana Geology and Mines Commission established under section 3 of the Guyana Geology and Mines Commission Act 1979; GGMC Act means the Guyana Geology and Mines Commission Act 1979; Licence means the Petroleum Prospecting Licence and/or the Petroleum Production Licences or both as the context requires; Lifting Entitlement means the quantity of Crude Oil to which a Party shall be entitled in any given period pursuant to Article 11; Minister means the Minister assigned responsibility for Petroleum or where there is no such Minister the President; Natural Gas or Gas means all hydrocarbons which at standard conditions of temperature and pressure 60 degrees Fahrenheit or 15 degrees Celsius and 14.7 lbssq. in or 1 Kgsq. cm is in a gaseous state including but not limited to wet mineral gas dry mineral gas and casing head gas all substances contained therein including helium which are produced from an oil or gas well in their natural state or residue gas remaining after extraction of NGLs as defined herein from wet gas. For purposes of this Agreement Natural Gas shall also include liquefiable hydrocarbons obtained from Natural Gas by condensation or extraction including ethane propane butane pentanes and heaviers Natural Gas Liquids or NGLs. Liquefied methane shall not be considered an NGL but rather Natural Gas in the liquid state; NonAssociated Gas means Natural Gas or Gas other than Associated Gas; NonResident SubContractor shall mean a SubContractor the control and management of whose business are exercised outside Guyana; Oil Field means a Field producing predominantly Crude Oil; Operating Costs means those costs so categorized in Annex C; Operator shall have the meaning assigned to it in Article 2.2a; Parties means the Government and Licensee and includes their successors and permitted Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 6 assignees and a Party shall mean any of the Parties; Petroleum shall have the meaning

assigned in the Act Petroleum Operations means Prospecting Operations and/or Production Operations. as defined in the Act; Petroleum Prospecting Licence means a Licence issued by the Government under the Act and the Regulations to Licensee for carrying out Prospecting Operations and set forth in Form C of the schedule as specified in the Regulations; Petroleum Production Licence means a Licence to be issued by the Government under the Act and the Regulations to Licensee for carrying out Production Operations and set forth in Form D of the schedule as specified in the Regulations; Petroleum Reservoir shall have the meaning assigned in the Act; PreContract Cost means the costs stated in Section 3.1.k of the Accounting Procedure; Profit Petroleum has the meaning assigned in Article 11 ; Prospecting Area has the meaning assigned in the Act; Recoverable Contract Costs has the meaning assigned in Article 11 ; Regulations means the Petroleum Exploration and Production Regulations 1986; Service Costs means the expenditures so categorized in Annex C; SubContractor means any company or entity which provides services to the Contractor in connection with Petroleum Operations; Third Party Sales means third party arms length sales made by i Contractor or ii each party comprising Contractor or iii Affiliated Company of each party comprising Contractor to a third party for an armslength price which is disclosed to the Minister; The words and terms used in this Agreement but not defined herein shall if meanings have been assigned to them under section 2 of the Act have for the purposes of this Agreement the same meanings. The provision of this Agreement relating to the Petroleum Prospecting Licence shall be read as part of the provisions of such Licence. The provision of this Agreement relating to any Petroleum Production Licence shall be read as part of the provisions of such Licence.

1.2 1.3 1.4
Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 7 1.5 The provisions in the Act and Regulations dealing with rights and obligations of the Contractor shall be read as part of but not nullify the provisions of this Agreement and any Licence issued to the Contractor.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 8 Article 2 Agreement the Operator Liabilities and Indemnities 2.1 Agreement This Agreement constitutes an agreement made under section 10 of the Act consistent with the Act and the Regulations and is a production

sharing agreement the objective of which is the exploration for development and production of Petroleum in the Contract Area by the Contractor subject to the terms hereof and the provisions of the Act and Regulations under which the Contractor shall have an economic interest in the development of Petroleum from the Contract Area. 2.2 The Operator a b Repsol shall be the Operator charged with conducting the day to day activities of the Contractor under this Agreement. No transfer of operatorship to another party not comprising the Contractor shall take effect unless it has been approved by the Minister which approval shall not be unreasonably withheld. The Minister shall be notified of any change of operatorship to another party comprising the Contractor in writing. The Contractor shall provide the Minister with a memorandum summarizing the operating arrangements between the Operator and the Contractor including any party comprising the Contractor for the conduct of Petroleum Operations which will include inter alia a provision whereby the Operator agrees to conduct the Petroleum Operations in accordance with this Agreement the Licence and any applicable laws of Guyana. 2.3 Liability The duties obligations and liabilities of the parties comprising the Contractor under this Agreement and under any Licence issued pursuant hereto shall be joint and several. 2.4 Indemnity The Contractor shall at all times keep Government indemnified against all actions claims and the demands that may be brought or made against Government by a third party by reason of negligence any act or omission or reckless disregard of harmful consequences which results in damage to a third party by the Contractor or the Operator in the exercise or purported exercise of the rights of the Contractor under the Act or the Licence provided however that nothing in this Article shall require the Contractor to give the said indemnity for any claim or demand in respect of Petroleum taken by the Minister pursuant to Article 11 after title has passed to the Minister at the Delivery Point or in respect of assets acquired by the Minister pursuant to Article 20 from and after the date of acquisition. Liability by the Contractor to the Government for damages in respect of Petroleum Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 9 Operations under this Agreement is limited to insurance required in accordance with Article 20.2 a provided however that the Contractor shall not be liable to the

Government for indirect punitive or consequential damages including but not limited to production or loss of profits. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 10

Article 3 Petroleum Prospecting Licence and Guarantee 3.1 Petroleum Prospecting Licence a b On the Effective Date of this Agreement the Minister in accordance with the Act the Regulations and the terms of this Agreement shall grant to the Contractor the Petroleum Prospecting Licence for an initial period of four 4 Years from the Effective Date over the area described in Annex A and shown on the map attached as Annex B hereto. Subject to Article 4 and the other terms of this Agreement such Petroleum Prospecting Licence may be renewed but not more than twice at the election of the Contractor for consecutive periods of up to three 3 Years each in accordance with the provisions of the Act and the Regulations. 3.2 Guarantee Each party compnsmg Contractor shall on or before the sixtieth 60th day from the Effective Date during year one 1 of phase one 1 of the initial period in accordance with Article 1.1 .U ereunder and thereafter no later than ninety 90 days afer e commencement of all subsequent work commitment periods as specified in Article 4.1 provide a bond parent company guarantee or other brm of guarantee acceptable to the Minister in proportion to each participating interest up to the amount of ten 1 0 of the budget submitted by the Contractor pursuant to Article 7.1 for each specific work commitment period. Notwithstanding the foregoing if the Contractor exceeds its minimum work commitment in any phase specified in Article 4.1 the completion of such work commitment shall constitute a waiver of such proportion of the requirement of the guarantee by the Minister which is the equivalent of the excess work previously completed but which is applicable to the subsequent work commitment phase. If the guarantees are parent company guarantees they shall be in lieu of and satisfy any obligation to provide a guarantee andor bond pursuant to the Act Regulations or this Agreement on the part or on behalf of the Contractor.

Petroleum Agreement Govemment of Guyana Repsol Exploraci6n S.A. Page 11 Article 4 Exploration Programme and Expenditure Obligation 4.1 Exploration Programme Subject to the provisions of this Agreement in discharge of its obligations to carry out Prospecting Operations in the Contract Area the Contractor shall carry out the minimum work described herein during the

periods into which Prospecting Operations are divided hereunder a The initial period of four 4 Years shall be divided into two 2 phases phase 1 shall be for two and a half 2.5 Years and phase 2 shall be for one and a half 1.5 Years. i Phase 1 of the initial period two and a half 2.5 Years aa During phase 1 the Contractor shall Acquire process and interpret 500 km of 2D seismic within the Contract Area and Acquire process and interpret 2000 sq. km of 3D seismic within the Contract Area bb At the end of phase 1 the Contractor shall elect either to relinquish the entire Contract Area or enter phase 2. ii Phase 2 of the initial period one and a half 1.5 Years aa During phase 2 Contractor shall commence to drill an Exploration Well to the Cretaceous Formation in accordance to Article 4.2. bb At the end of the initial period of four 4 Years the Contractor shall elect either to relinquish the entire Contract Area except i for any Discovery Area in respect of which the Minister is informed under section 30 of the Act ii for any Natural Gas Discovery Area pending the outcome from market development which is to assist Contractor with whether to declare commerciality and iii for the area contained in any Petroleum Production Licence or subject to Article 5 relinquish twenty percent 20 of the Contract Area and renew the Petroleum Prospecting Licence for a further period of up to three 3 Years. b First renewal period of three 3 Years The first renewal period of three 3 Years shall be divided into two 2 phases each phase consisting of eighteen 18 months. Contractor shall submit a proposal Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 12 with the work commitment to be performed during the two phases of the first renewal period along with the relevant application. At the end of the first renewal period of three 3 Years the Contractor shall elect either. to relinquish the entire Contract Area except i for any Discovery Area in respect of which the Minister is informed under section 30 of the Act ii for any Natural Gas Discovery Area pending the outcome from market development which is to assist Contractor with whether to declare commerciality and iii for the area contained in any Petroleum Production Licence or subject to Article 5 relinquish twenty percent 20 of the Contract Area and renew the Petroleum Prospecting Licence for a second period of three 3 Years. c Second renewal period of three 3 Years The second renewal period of three 3 Years shall be divided into two 2 phases each phase consisting of eighteen 18

months. Contractor shall submit a proposal with the work commitment to be performed during the two phases of the second renewal period along with the relevant application. At the end of the second renewal period of three 3 Years the Contractor shall relinquish the entire Contract Area except i for any Discovery Area in respect of which the Minister is informed under section 30 of the Act ii for any Natural Gas Discovery Area pending the outcome from market developer pursuant to section 331 of the Act and as set out in Article 8.4 which is to assist Contractor with whether to declare commerciality and iii for the area contained in any Petroleum Production Licence and any other portion of the Contract Area on which the Minister agrees to permit the Contractor to conduct further exploration activities. d The minimum work commitment for a given phase or period referred to in Article 4.1a b and c may be undertaken in an earlier phase or period in whole or in part and in such a case the work commitment with respect to the subsequent period shall be deemed to be satisfied accordingly in whole or in part as the case may be. Contractor may conduct additional work beyond the minimum work commitment in accordance with the terms and conditions of this Agreement which shall be subject to Cost Recovery. e Subject to Article 24 herein and section 43 of the Act the Minister may extend any Exploration Period pursuant to a showing of good cause by the Contractor.

4.2 No Exploration Well drilled by the Contractor shall be treated as discharging any obligation of the Contractor to drill such Exploration Well unless either it has been drilled to the depth or formation agreed with the Minister and specified in the annual work programme or before reaching such depth or formation one or more of the following occur a the Contractor has expended on such Exploration Well and any substitute well drilled pursuant to Article 4.2 d below the amount for such work commitment in Petroleum Agreement Government of Guyana a Repsol Exploración S.A. Page 13 the budget submitted by the Contractor and approved by the Minister as specified in Article 7.1; or b the Geologic Basement is encountered; or c a Discovery is made and the Minister is informed thereof; or d insurmountable technical problems are encountered which in accordance with good oilfield practice make further drilling impractical provided that if the said Exploration Well is abandoned owing to the said problems before reaching the Geologic Basement the Contractor shall

drill a substitute well in the Contract Area to the same minimum depth as aforesaid unless otherwise agreed with the Minister or until the amount in Article 4.2 a less any amounts actually expended on the abandoned well is reached or one of the criteria listed at Articles 4.2 b to d is satisfied.

4.3 Expenditure Obligation The sum actually spent in fulfilment of the work obligation in a specific phase or period shall be deemed to have satisfied the Contractors minimum expenditure obligation for that phase or period. For the avoidance of doubt in the event the Contractor has performed its work obligations for an amount less than the amount specified in an annual work programme and budget submitted under Article 7 Contractor shall be deemed to have fulfilled its expenditure obligation for that phase or period.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 14 Article 5 Relinquishment of Areas

5.1 5.2 If prior to the end of the initial period of the Petroleum Prospecting Licence issued to the Contractor under Article 3.1 an application is made by the Contractor for renewal of the Licence under section 24 1 of the Act the Contractor shall relinquish at the end of the initial period an area equal to at least twenty percent 20 of the original Contract Area less the exclusions provided for in Article 5. If prior to the end of the first renewal period of the Petroleum Prospecting Licence an application is made by the Contractor for a second renewal of the Licence under section 24 1 of the Act the Contractor shall then relinquish at the end of this first renewal period an area equal to at least twenty percent 20 of the original Contract Area less the exclusions provided for in Articles 5.3.

5.3 The areas to be relinquished pursuant to Articles 5.1 and 5.2 shall

- a comprise Blocks as defined in the Act;
- b c d e exclude any Discovery Area together with a reasonable area of protective acreage surrounding the Discovery Area; and any area under an Appraisal Programme pursuant to Article 8.4;
- exclude any Discovery Area of Natural Gas in a market development phase;
- exclude any Production Area; be selected by Contractor so that
- i ii the area relinquished shall comprise one 1 discrete area having regard to any representations made by the Minister with respect to location shape and size; the blocks to be retained for and during the first renewal period pursuant to Articles 5.1 and 5.2 shall constitute one 1 discrete area unless otherwise agreed to by the Minister.

5.4 In the event that an area or areas

cannot be identified for relinquishment in accordance with this Article without including in such area or areas in whole or in part a subsisting Discovery Area or Production Area or the Minister is of the opinion that the areas to be relinquished will not enable licensing separately or jointly with contiguous unlicensed areas then the Minister and Contractor shall consult together with a view to agreeing on the areas to be relinquished in the light of the circumstances then prevailing. If after sixty 60 days from receiving notice of the Contractor s proposed relinquishments the Parties cannot agree on a proposed relinquishment the Parties shall refer the matter to a sole expert pursuant to Article 26. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A . Page 15 5.5 5.6

For the purpose of this Article a Discovery Area shall not include any Discovery Block which relates to a Discovery in respect of which the Contractor has notified the Minister that the Discovery is not of potential commercial interest pursuant to section 31 1 of the Act unless such Discovery Block forms a part and only to that extent of another subsisting Discovery Area. If a Petroleum Prospecting Licence ceases to have effect with respect to Discovery Blocks pursuant to section 32 1 of the Act such reduction in size of the Contract Area shall be treated as an advance relinquishment under this Article and shall reduce the area next required to be relinquished accordingly. 5. 7 Without prejudice to the obligations undertaken in Article 4 the Contractor may at any time during the period of the Petroleum Prospecting Licence on giving the Minister no less than three 3 months notice in writing of its intention to do so relinquish any Block or Blocks in the Contract Area pursuant to section 28 of the Act and in accordance with Articles 5.4 and 5.5. Any such relinquishment shall count towards any subsequent mandatory relinquishments required under Articles 5.1 5.2 or 5.3 above as the case may be. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 16 Article 6

Delegation ; Cooperation between Contracto r and GGMC 6.1 The Minister may subject to the provisions of the Act or any other law delegate any person to exercise and perfom1 any of his functions under this Agreement and anything done by the delegate of the Minister in pursuance of the delegation shall have the same validity and effect as it would have if done by the Minister. 6.2 The Minister also hereby authorizes GGMC to perfom1 inter alia the following functions a to monitor

the Petroleum Operations carried out by the Contractor; b c d e f to review any proposed exploration work programme and budgets presented by Contractor under Article 7 and any Appraisal Programme presented by the Contractor under Article 8; to review any Development Plan submitted by the Contractor in connection with an application for a Petroleum Production Licence pursuant to section 34 of the Act; to ensure the maintenance and availability for inspection of operating records and reports for Petroleum Operations in accordance with the Agreement; to ensure the accounting procedures specified in Annex C of this Agreement are followed ; to ensure compliance with the provisions of this Agreement Petroleum Act and Regulations. 6.3 The Contractor and the delegate of the Minister shall cooperate in good faith in the exercise of the Minister s functions delegated pursuant to this Article and the Contractor shall keep the delegate of the Minister advised of all activities taking place during the course of Petroleum Operations and shall provide the delegate of the Minister with all available information relating to Petroleum Operations as the Minister or the delegate of the Minister may reasonably require. Towards this end the delegate of the Minister and the Contractor shall meet at regular intervals but at least once every six 6 months to review the progress and results of the Petroleum Operations and to discuss the work programme and other activities to be undertaken in the ensuing months. 6.4 With respect to the matters to be reviewed pursuant to Article 6.2 should the delegate of the Minister wish to make any specific proposals or revisions thereto the delegate of the Minister shall so notify the Contractor specifying its reasons therefor; within reasonable time thereafter the Contractor and the delegate of the Minister shall meet and endeavour to agree on the proposals or revisions. The Contractor shall consider and take into account the proposals of the delegate of the Minister and shall attempt in good faith to reach agreement on such proposals. If the Contractor and the delegate of the Minister fail to agree within sixty 60 days of submission by the Contractor the exploration work programme and budget including as appropriate any minimum work programme to be undertaken pursuant to Article 4 submitted pursuant to Article 7 and the Appraisal Programme except in the case of Gas to which the provision

of Article 12 shall apply submitted pursuant to Article 8 revised in accordance with any amendments or additions thereto agreed by the delegate of the Minister and the Contractor shall be deemed adopted. Nothing herein above provided shall preclude the right of the Minister to delegate any additional function to the delegate of the Minister or subject to Article 6.1 to delegate from time to time any functions including those herein contained to any other agency of Government. A delegation shall not result in the increase of the obligations or liabilities of the Contractor and notice of any delegation shall be given promptly to the Contractor. Any approvals required by the Minister or delegates of the Minister shall not be unreasonably withheld. If the Contractor requests required approval from the Minister or delegates of the Minister such approval shall be deemed as granted if no response is provided within sixty 60 days of the request. The Minister and the delegate of the Minister shall upon request either provide to the Contractor or assist the Contractor in obtaining the assistance required for Contractor to fulfil requirements of the contract including not limited to the following a b approvals issued by Government agencies or local government institutions Which are required to conduct hydrocarbon operations including approvals necessary to import goods and services free from duties and taxes; approvals for easements and right of way to enable Contractors to conduct operations; c approvals for security for field operations and personnel; d e f permission for entry and exit visas and working permits for Contractors employees subcontractors and their dependents; supply reports analyses samples geological geophysical and production data necessary to Contractor from areas inside and outside the Contract Area; approvals to export hydrocarbons and use essential infrastructure necessary for the economic export of hydrocarbons at normal commercial terms. Petroleum Agreement Government of Guyana Repsol Exploración S.A.

Page 18 Article 7 Annual Work Programme and Budget 7.1 Within sixty 60 days after the Effective Date the Contractor shall prepare and submit to the Minister in detail a work programme and budget setting forth the Petroleum Operations. which the Contractor proposes to carry out including as appropriate any minimum work obligations to be undertaken pursuant to Article 4 during the remaining portion of the Calendar Year. In subsequent years no less than one 1 month before the

beginning of the Calendar Year the Contractor shall prepare and submit to the Minister a work programme and budget setting forth Petroleum Operations which the Contractor proposes to conduct during the upcoming Calendar Year. 7.2 The Contractor may for good cause amend the details of any work programme or budget submitted to the Minister pursuant to Article 7.1 provided that a notice of the details of the reasons for the amendments is given to the Minister; b such amendments shall not have the effect of reducing the minimum work obligations undertaken under Article 4 without the prior consent in writing of the Minister; c any proposed amendment shall be subject to review pursuant to Article 6.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 19 Article 8 Discovery and Development

8.1 Where pursuant to section 30 of the Act notice has been given to the Minister of a Discovery in the Contract Area the Contractor shall forthwith inform the Minister of the steps it proposes to take to satisfy the requirements of section 30 1 a iii of the Act. 8.2 Where the Contractor pursuant to section 31 1 of the Act has informed the Minister that in its opinion the Discovery is of potential commercial interest the Contractor shall as soon as practicable thereafter submit for the consideration of the Minister its proposals for an Appraisal Programme to meet the requirements of section 30 1 b of the Act. 8.3 Where an Appraisal Programme has been adopted by the Contractor pursuant to Article 8.2 the Minister may on application by the Contractor pursuant to section 31 2 of the Act stating reasons therefor extend the period within which application may be made by the Contractor for a Petroleum Production Licence. 8.4 8.5 In furtherance to article 8.3 above if Contractor deem a Non Associated Gas Discovery is of potential commercial interest the time period between the notice of Discovery provided for in section 31 1 of the Act and the application for grant of a Petroleum Production Licence shall be extended pursuant to section 31 2 of the Act if necessary to such reasonable time as agreed to in friendly negotiations between the Parties and in pursuance of section 31 of the Act to conduct an Appraisal Programme develop a Natural Gas market and design and construct facilities necessary to commercialize the Natural Gas. Where the Contractor has made an application to the Minister for a Petroleum Production Licence in respect of any part of the Contract Area in accordance with section

34 1 of the Act such application shall be accompanied by the proposals required under section 34 3 of the Act hereinafter referred to as the Development Plan and shall satisfy the provisions of section 36 of the Act and the Regulations. The Development Plan shall provide that not later than six 6 months after the grant of the first Petroleum Production Licence the Contractor shall in consultation with GGMC prepare and implement a programme for training and employment of Guyanese nationals in each phase and level of Petroleum Operations and for the development of management and technical skills for the safe and efficient conduct of Petroleum Operations. 8.6 Where the Minister considers that the application has not met the requirements of Article 8.4 he shall so notify the Contractor within sixty 60 days of receipt of the application and GGMC and Contractor shall meet to discuss the application with a view to ensuring that the requirements of Article 8.5 are met. In the event that the Parties are unable to agree on amendments to the application to meet such requirements within sixty 60 days from the date of aforesaid application or such longer period as the Parties shall agree or where the Minister fails to respond to or act on the aforesaid application within sixty 60 days the Contractor may refer the matter to a sole expert pursuant to Article 26 for determination within sixty 60 days of appointment of such expert or such other time Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 20 period as may be agreed between the Contractor and the Minister. 8. 7 Where the Minister considers that the aforesaid application has met the requirements of Article 8.5 he shall within sixty 60 days of receipt thereof so notify the Contractor. In such event or where in the event of a dispute it is determined by the sole expert pursuant to Article 26 that the Contractor has made an application which meets the requirements of Article 8.5 provided the Contractor is not in default under this Agreement the Minister shall grant within sixty 60 days of such notification or determination as the case may be to Contractor a Petroleum Production Licence in the Form D of the schedule as specified in the Regulations over the area for which the application has been made on terms and conditions consistent with this Agreement and the Act and Regulations which will enable the Contractor to carry on Petroleum Operations in the Production Area in accordance with the Development Plan wherein

the level of production set shall be consistent with the maximum efficient rate of production which conforms to sound reservoir engineering principles in accordance with good international petroleum industry practice. The initial term of the Petroleum Production Licence shall be twenty 20 Years commencing next after the date of the grant of said licence in accordance with the Act. In the event the Minister imposes policybased production limits on production below those consistent with maximum efficiency rates for the Field or Fields any such production limits will be imposed countrywide and shall be allocated proportionately based upon demonstrable verifiable Field production capacities.

8.8 While the Contractor holds a Petroleum Prospecting Licence or has made an application pursuant to Article 8.5 and in accordance with section 34 1 of the Act the Minister shall not grant a Petroleum Production Licence in respect of all or part of the Contract Area or area covered by such application whether on a geographical or geological basis to any third party.

8.9 Where the Contractor pursuant to section 31 1 of the Act has served notice on the Minister that in its opinion a Discovery made in the Contract Area is not of potential commercial interest the provisions of section 32 1 of the Act shall apply.

8.10 If it was determined that the Field as to which the Commercial Discovery applies extends beyond the boundaries of the Contract Area or if such is subsequently determined in the course of development or producing operations in the Field then Contractor may apply for an extension of the Contract Area to include the additional acreage encompassing the Field as determined by the analysis of all the relevant information. The Minister may grant the extension to the Contractor for such additional acreage to enable the entire Field to be developed and produced with optimal efficiency in accordance with good oil Field practice. The said acreage shall not be available to Contractor if it is held under Licence to a third party. In such instances the provision of Section 44 of the Act shall apply.

8.11 The Contractor may apply for a renewal of a Petroleum Production Licence for a maximum ten 10 years. The application for renewal shall be granted as long as the Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 21 Contractor is in good standing under the Licence.

a Natural Gas In the event of any NonAssociated Gas discovery within the Contract Area in recognition of the fact that Natural Gas

projects generally have much longer lead times from discovery to first commercial production than is the case for Crude Oil projects the Minister shall grant Contractors request for the 10 year Petroleum Production License renewal so long as maximum Contractor is in good standing under the Licence. ten b The Minister shall not refuse to grant the renewal of a Petroleum Production Licence under section 401 of the Act without first providing the Contractor; i Notice stating the grounds of the intended refusal; and ii Ninety 90 calendar days following the date of the notice referenced in Article 8.9bi to respond to or remedy the stated grounds for refusal. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 22 Article 9 Records Reports and Information ; Confi dental ity 9.1 Records Reports and Infom1ation a b c d e The Contractor shall at all times while this Agreement is in force maintain and submit to the Minister in accordance with the provisions of the Act and the Regulations the Petroleum Production Licence and this Agreement full and accurate reports records retums and accounts of Petroleum Operations in the Contract Area. All data well logs maps magnetic tapes cuts of cores and cutting samples and all other geological and geophysical information obtained by the Contractor in the course of carrying out Petroleum Operations hereunder and all geological technical financial and economic reports studies and analyses generated in relation thereto hereinafter referred to as Petroleum Data shall be submitted to the Minister in accordance with the Regulations. The Contractor may freely export for processing or laboratory examination or analysis samples or other original materials constituting Petroleum Data provided that samples equivalent r. ze and quality or where such merial is capable of reproduction copies of equivalent quality have first been delivered to the Minister. Petroleum Data shall be the joint property of the Minister and the Contractor but shall become the sole property of the Minister with respect to any area which ceases to be part of the Contract Area whether as result of relinquishment or expiry surrender or termination of a Licence or otherwise in accordance with the Act from the date on which such area ceases to be part of the Contract Area. through duly appointed representatives upon providing The Minister the Contractor with at least seven 7 days notice shall be entitled to observe the Petroleum Operations conducted by the Contractor at his sole

cost and expense and at all reasonable times to inspect all assets records and data kept by the Contractor relating to such Petroleum Operations. In the exercise of such rights under this paragraph the Minister shall not unduly interfere with the Contractors Petroleum Operations under this Agreement. f Nothing in this Article shall be construed as requiring the Contractor or any of the Parties comprising the Contractor to disclose any of its proprietary technology or that of its Affiliated Companies which is not acquired in the course of Petroleum Operations under this Agreement. 9.2 Confidentiality a All Petroleum Data information and reports obtained or prepared by the Contractor Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 23 hereunder shall so long as they relate to any part of the Contract Area be treated as confidential and each of the Parties undertakes not to publish reproduce or otherwise deal with such Petroleum Data or to disclose the same or the thereof to any other person without the consent in writing of the other Party such consent not to be unreasonably withheld provided however that subject to Article 9.2 b this Article shall not i prevent disclosure by the Contractor aa to an Affiliated Company or employees of an Affiliated Company; bb cc dd to consultants professional advisers data processing centres laboratories and SubContractors where disclosure is essential to work for Contractor; to a bank or other financial institution where disclosure is essential to work or financing for Contractor or Affiliated Company of Contractor; to the extent required by any applicable law or the regulations of any stock exchange upon which the shares of the Contractor Jr a Affiliated Company are quoted or by governmental order decree regulation or rule or to the extent required under any legal proceeding or any court order binding on Contractor or Affiliated Company of Contractor; ee to bona fide prospective assignees or transferees of an interest hereunder of the Contractor or in connection with merger consolidation or a sale of stock of the Contractor or an Affiliated Company thereof; ff in connection with data trades; gg of data information and reports already known to the Contractor or Affiliated Company prior to the Effective Date; or hh of data information and reports acquired independently from a third party that represents that it has the right to disseminate such data at the time it is acquired by the Contractor or Affiliated Company; ii prevent disclosure pursuant to section

4 of the Act provided however that neither the Minister nor Contractor shall disclose Petroleum Data relating to any area subject to a Licence to a competitor of the Contractor without the prior written consent of the other Party; or Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 24 iii be construed as imposing on any Party any obligation hereunder with respect to any petroleum data information or reports which are without disclosure by such Party generally known to the public. b c Any petroleum data information or reports disclosed by the Contractor pursuant to this Article shall be disclosed on terms which ensure that the data infom1ation or repot1s aforesaid are treated as confidential by the recipient except for disclosures made pursuant to Article 9.2 add and prompt notice of all disclosures with respect to Articles 9.2 a i ee and ff shall be given to the Minister All petroleum data which becomes the sole property of the Minister pursuant to Article 9.1 d shall continue to be treated as confidential by the Contractor for a period of one 1 year from the date on which it became the sole property of the Minister but may be used by the Contractor in connection with data trades with the prior written consent of the Minister such consent not to be unreasonably withheld subject however to Article 9.2 b. d Where a Licence ceases to be in force with respect to any area the Contractor shall deliver to the Minister originals of all petroleum data and other information relating to such area pursuant to regulation 26 of the Regulations provided however that on application duly made to hi;l1 pursuant to regulation 28 Gf the R6ulations the Minister shall permit the Contractor to retain copies of petroleum data and information relating to the Contact Area subject to Article 9.2 b. e Notwithstanding the provisions of Article 9.1 d all the Contractors proprietary technology except technology for which the cost of development has been approved as Recoverable Contract Cost under this Agreement shall remain the property of the Contractor. Petroleum Agreement Govemment of Guyana Repsol Exploraci6n S.A. Page 25 Article 10 Annual Licence Rental Charge The Contractor shall on the Effective Date of the Petroleum Prospecting Licence or the date of grant of any Petroleum Production Licence as the case may be and thereafter so long as the said Licence remains in force on each mmiversary date thereof pay without demand to the Government an annual Licence rental charge in respect of the Contract Area for the entire

Exploration Period and such payments shall apply to those areas remaining after taking into account any relinquishments pursuant to Article 5 as specified below. Payments under this Article 10 shall be paid directly into bank accounts held and controlled by GGMC as notified in writing Initial Period First Renewal Period Second Renewal Period One hundred thousand US Dollars 100000.00US One hundred thousand US Dollars 100000.00US One hundred thousand US Dollars 100000.00US

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 26

Article 11 Cost Recovery and Production Sharing 11.1 Subject to the terms and conditions of this Agreement the Contractor shall bear and pay all Contract Costs incurred in carrying out Petroleum Operations and shall recover Contract Costs only from Cost Petroleum as herein provided. 11.2 All Recoverable Contract Costs incurred by the Contractor shall subject to the terms and conditions of any agreement relating to NonAssociated Gas made pursuant to Article 12 be recovered from the value determined in accordance with Article 13 of a volume of Petroleum hereinafter referred to as Cost Petroleum produced and sold from the Contract Area and limited in any Month to an amount which equals seventyfive percent 75 of the total production from the Contract Area for such Month excluding any Crude Oil and/or Natural Gas used in Petroleum Operations or which is lost. Recoverable Contract Costs means such Contract Costs as the Contractor is permitted to recover as from the date they have been incurred pursuant to the provisions of Annex C. 11.3 To the extent that in any Month Recoverable Contract Costs exceed the value of Cost Petroleum determined in accordance with Article 13 and/or Article 12 the unrecoverable amount shall be carried forward and subject to the limitation stipulated in Article 11.2 shall be recoverable in the immediately succeeding Month and to the extent not then recovered in the subsequent Month or Months. 11.4 The balance of Crude Oil and/or Natural Gas available in any Month after Recoverable Contract Costs have been satisfied to the extent aforesaid hereinafter referred to as Profit Petroleum shall be shared between the Government and the Contractor for each Field in the following proportions Profit Petroleum Production CBOPD Contractors Share Ministers Shares First Next Next Next Above 20 000 20 000 20 000 20 000 80.000 50.0 47.5 45.0 42.5 40.0 50.0 52.5 55.0 57.5 60.0 11.5 The quantity of Cost

Petroleum actually utilized in satisfying the Recoverable Contract Costs may be allocated by the Contractor to production from any Field or Fields. 11.6 Subject to the provision of Article 14 the Profit Petroleum shall be shared between the Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 27 Government and Contractor on a Monthly basis according to their respective entitlements as set out in Article 11.4. 11.7 To the extent that the actual quantities and costs required to determine Cost Petroleum and Profit Petroleum for the Month in question are not known Crude Oil and/or Natural Gas sharing shall be calculated on an interim basis each Month using the following: a unrecovered Recoverable Contract Cost; b estimated current Recoverable Contract Cost by reference to the agreed work programme and budget supplemented by any other relevant documents or information which are accepted by Contractor and Minister as being reliable indicators of the actual position for the Month in question; c estimated production for the Month in question; d Crude Oil and/or Natural Gas price from the previous Month calculated. 11.8 Retroactive adjustments shall be made to the Crude Oil and/or Natural Gas entitlements and shall be agreed with the Minister based on recalculations utilizing actual quantities of Crude Oil and/or Natural Gas produced and saved and recoverable Contract Costs. Any revised entitlements shall be made subject to any applicable lifting agreements as soon as practicable after such elements have definitely been determined. 11.9 The Contractor shall have the right to use in any Petroleum Operations as much of the production as may reasonably be required by such Petroleum Operations therefor and the quantities so used or lost shall be excluded from any calculations of Cost Petroleum and Profit Petroleum entitlement. Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 28 Article 12 Associated and Non Associated Gas. 12.1 Associated Gas a b c d The Associated Gas produced from any Oil Field within the Contract Area shall be with priority used for the purposes related to the operations of production and production enhancement of Oil Fields such as Gas injection Gas Lifting and power generation. Based on the principle of full utilisation of the Associated Gas and with no impediment to normal production of Crude Oil a plan of utilisation of the Associated Gas shall be included in the Development Plan of each Oil Field. If there is any

excess Associated Gas in the Oil Field after utilisation pursuant to Article 12.1 a the Contractor shall carry out a feasibility study regarding the utilisation of such excess Associated Gas of such Oil Field. Such feasibility study if carried out before submission of the Development Plan of an Oil Field shall be included in the Development Plan. In the event that the Contractor conducts a further feasibility study of the utilisation of the excess Associated Gas of such Oil Field such further feasibility study shall be submitted to the GGMC for review and If the excess Associated Gas in any Oil Field is the subject of the discussion, construction of facilities for such utilisation and the production of excess Associated Gas shall be carried out while a Petroleum Production Licence continues in force. If the Contractor believes that excess Associated Gas of an Oil Field has commercial value the Contractor shall be entitled but not required to make further investment to utilise such excess Associated Gas subject to terms at least as attractive as those established for Crude Oil in Article 11 including but not limited to cost recovery for such further investment. If Contractor believes such Associated Gas is potentially commercial under the current Agreement terms for Oil then Article 11 shall apply and the reference made to Barrels of Oil Per Day BOPD in Article 11.4 shall be replaced by Barrels of Oil Equivalents per Day BOESD. If the Contractor believes improved terms are necessary the Parties shall carry out friendly negotiations in a timely manner to find a new solution to the utilisation of the said excess Associated Gas and reach an agreement in writing. If the Contractor does not believe that the Associated Gas has commercial value but the Minister believes the Associated Gas does have commercial value the Government may utilize the Associated Gas provided there is no impediment to normal production of Crude Oil. All handling from the point of separation of Crude Oil shall be at the sole risk and expense of the Government and will not affect the amount of Cost Petroleum and Profit Petroleum due to Contractor. e Expenses incurred by the Contractor in the production and use of the Associated Petroleum Agreement Government of Guyana Repsol Exploracion S.A. Page 29 Gas of an Oil Field as stipulated in Article 12.1 and those incurred in carrying out any feasibility study on the utilisation of the excess Associated Gas shall be charged to the development cost of the Oil Field and shall be cost recoverable. t If the Parties

agree that the excess Associated Gas of an Oil Field has no commercial value then such Gas shall be disposed of by the Contractor provided that there is no impediment to normal production of the Crude Oil in the most economic manner consistent with good international petroleum industry practice.

12.2 Non Associated Gas a When the Contractor in accordance with Article 8.2 has informed the Minister of any Non Associated Gas discovery within the Contract Area that is of potential commercial interest the Contractor shall inform the Minister whether Contractor believes such discovery is potentially commercial under the current Agreement terms. If the Contractor believes that the fiscal terms will have to be revised in order to economically commercialize the NonAssociated Gas discovery the Contractor shall propose revisions to the fiscal terms as the basis for entering into good faith negotiations to reach mutually acceptable terms for developing the Non Associated Natural Gas discovery. The agreement which shall form an annex to this Agreement shall be based on and include the following principles i that For a period of twelve 12 months from the date of the notice delivered to the Minister under Article 8.2 the Contractor and the Minister shall engage in good faith negotiations of such revisions to Article 11 that would be necessary in order to provide the Contractor with project economics terms at least as attractive as those established for Crude Oil in Article 11. The Parties recognize in order to achieve an economically viable development of NonAssociated Natural Gas different fiscal regimes may have to be considered. In the event the Parties cannot agree upon the necessary revisions to Article 11 a sole expert shall be engaged pursuant to Article 26.3. Once the sole expert renders its decision the Contractor shall review the decision and shall notify the Minister as to whether it shall proceed with the development of the NonAssociated Gas discovery under the terms of the sole expert decision. In the event the Contractor elects not to proceed the nonAssociated Gas discovery to the Government. the Contractor shall relinquish ii The time period between the notice of discovery provided for in section 31 1 of the Act and the application for grant of a Petroleum Production Licence shall be extended pursuant to section 31 2 of the Act if necessary to provide reasonable time as agreed to in friendly negotiations between the Parties and in pursuance of section 331 of the Act to conduct an Appraisal

Programme develop a Gas market and design and construct facilities necessary to commercialize the Natural Gas. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 30 b

c d Following the signature of the agreement herein the Contractor shall work out an Appraisal Programme for the discovered Gas Field according to the terms and conditions determined in the said agreement and submit it to the GGMC for review pursuant to Article 6.4. The Contractor shall carry out the Appraisal Programme which was reviewed and agreed upon with GGMC. The expenses incurred in carrying out the said Appraisal Programme by the Contractor shall be charged to the Exploration Costs of the Contract Area and shall be cost recoverable as permitted under the tem1s of Annex C. After completion of the Appraisal Programme of a Gas Field the Contractor shall submit a report on the Appraisal Programme to GGMC for its review and discussion. If the Contractor retains a Gas Field beyond the expiration of the Exploration Period pursuant to Article 12.2 the Contractor shall pay to the Minister at the commencement of each year of the retention period an annual rental to be arrived at through friendly negotiations but which shall be no less than Two Hundred Thousand United States Dollars 200000US.. The holding fee shall be refunded to Contractor on a pro rata daily basis in the event the Contractor relinquishes the Gas Field or declares such Gas discovery to be a commercial discovery prior to the er.d of such year. 12.3

General Ccnditions Applicable to Natural Gas a Subject to the Governments election to take its production in kind and reserving its rights to market its own production the Parties may agree in writing where such agreement shall be considered a part of this Agreement on such terms and conditions to be determined by friendly negotiations but not inconsistent with the bases for the development and full utilization of any Natural Gas Fields within the Contract Area in accordance with the international petroleum practices. Subject to any such written agreement Contractor shall have the sole responsibility for marketing all the available Natural Gas from the Contract Area and for negotiating for the sale thereof on a joint basis at fair market prices and tem1s common to both the Minister and the Contractor in accordance with Third Party Sales principles. The Contractor will pursue markets both within and outside Guyana and seek to market Natural Gas the highest

realization outlets after deduction of transportation costs. The Contractor will seek to recognize Natural Gas potential value at the international value of alternative fuels in the end user market of the buyers.

b The Contractor shall have the right but not the obligation to process Natural Gas for conversion to liquids chemicals or similar gas utilisation projects and Contractor shall have the right to dispose of the liquids or products therefrom. The Contractor shall have the right to process Natural Gas for recovery of the liquids contained therein. Natural Gas Liquids NGLs recovered and sold shall be valued Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 3l based upon the international value of such products as published in Platts and adjusted to reflect the fair market value of such products FOB Guyana. In addition the Contractor shall have the right to liquefy the Natural Gas for sale as LNG andor the right to compress the Natural Gas to accommodate sales as compressed natural gas CNG.

c The Contractor shall have the right to use Natural Gas both Associated Gas and NonAssociated Gas as may be required for Oil Field and Gas Field operations including the right to reinject for pressure maintenance and enhanced recovery without charge fee or royalty. After a gas marketing alternative for Non Associated Gas has been secured and the Natural Gas reserves indicated in the Development Plan have been allocated to a gas marketing option or to one or more Natural Gas sale contracts the satisfaction of the Natural Gas Domestic Supply Obligation shall not condition prevent or impede the performance of Contractors obligations pursuant to any existing Natural Gas sales contract or to materially erode the economic return of a Natural Gas Development provided that Contractor shall not reduce the delivery of the Natural Gas required to fulfil the Natural Gas Domestic Supply Obligation. Nevertheless Contractor shall make reasonable efforts to supply at fair market value prices volumes in excess of Natural Gas as may be reasonably requ3;ed by the Minister provided h2t Contractor shall give preference to performance of any commitments pursuant to any gas sales contract then in effect.

12.4 General Conditions Related to Petroleum Operations a Subject to the approvals of appropriate governmental authorities which approvals shall not be unreasonably withheld the Contractor shall have the right to construct operate and maintain roads drill water wells and to place

and/or construct fixtures and installations necessary to conduct the Petroleum Operations including but not limited to storage tanks trunk pipelines shipment installations pipelines cables or similar lines liquefaction processing and compression located inside or outside the Contract Area as well as construct operate and maintain or lease facilities for the transportation of Crude Oil and Natural Gas from the Contract Area. Any required governmental approvals may be conditional on the use by other producers of the excess capacity if any of those facilities. Where the Minister and Contractor agree that a mutual economic benefit can be achieved by constructing and operating common facilities the Contractor shall use its reasonable efforts to reach agreement with other producers on the construction and operation of such common facilities.

b Subject to negotiations on a reasonable price and available capacity rights the Contractor may have access to and use of any export facility or pipeline or other facilities or infrastructure built by the Government or by any wholly or partially owned Guyana state enterprises on terms no less favourable than those of any other party having access or use of such facility.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 32

c Subject to negotiatiOns as to a reasonable price and mvnership interest in the facilities the Contractor may have the right to participate in the construction ownership and operation of any of the types of facilities described in subclause 12.4a above that are built by the Government or by any wholly or partially owned state enterprises or by any third pa1iies on terms no less favourable than those of any other party patticipating therein.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 33

Article 13 Valuation of Crude Oil or Natural Gas

13.1 For the purpose of this Agreement the value of a Barrel of Crude Oil or an Mcf of Natural Gas shall be the average fair market price determined as follows

a as soon as practicable after the end of each Calendar Month in which Crude Oil or Natural Gas has been produced and sold from any Field pursuant to this Agreement an average price in terms of United States dollars per Barrel or Met FOB Delivery Point for each Field shall be determined in respect of production during that Calendar Month. It is understood that production from different Fields may be of differing quality and that separate average prices may accordingly be determined for any Calendar Month in respect of

production from each Field; b the prices aforesaid shall be determined as follows i ii in the event that fifty percent 50 or more of the total volume of sales by the Contractor during the Calendar Month of Crude Oil or Natural Gas of a given quality produced hereunder from a Field were Third Party Sales as hereinafter defined the price of all Crude Oil or Natural Gas from such Field of that quality shall be determined to be the simple arithmetic average price actually realised calculated by dividing the total receipts from all such sales calculated FOB the Delivery Point by the total number of Barrels of Crude Oil or Mcfs of Natural Gas sold from such Field in such sales; in the event that less than fifty percent 50 of the total volume of sales by the Contractor during the Calendar Month of Crude Oil or Natural Gas of a given quality produced hereunder from a Field were Third Party Sales the price of all Crude Oil or Natural Gas from such Field of that quality will be determined by the arithmetic average of aa The simple arithmetic average price actually realised in the Third Party Sales during the Calendar Month of such Crude Oil produced hereunder if any calculated by dividing the total receipts from all such sales calculated FOB at the Delivery Point by the total number of barrels of Crude Oil sold in such sales from such Field; and bb The simple arithmetic average price per barrel at which one or more crude oils of similar quality to the Crude Oil are being sold such price being determined by calculating the average for the Month in which production takes place of the mean of the high and low FOB price or prices for each day of those crude oils as quoted in Platts Crude Oil Market Wire daily publication. In the event that Platts ceases to be published or is not published for a period of thirty 30 consecutive days then the Parties shall agree on an appropriate Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 34 alternative publication. In determining the final price account shall be taken of any differences between the Crude Oil and the crude oils quoted in Platts for quality API gravity sulphur pour point product yield as well as differences in quantity delivery time payment and other contract terms to the extent known. Allowance will also be made to take account of the market area into which the Crude Oil is sold should it be different from the area used for Platts. The selected crude oils will be agreed between Contractor and the Minister in advance for each Calendar Year and in making the selection

preference will be given to crude oils of similar quality to Crude Oil from the relevant Field. The arithmetic average aforesaid will be determined by percentage volume of total sales of Crude Oil by Contractor that are and that are not as the case may be Third Party Sales during the Calendar Month in question. cc n the ... of Natural Gas the Contractor and the Minister shall agree on a methodology for valuation of Natural Gas under this Article 13 .1 b ii which represents the fair market value of such Natural Gas FOB Guyana taking into account composition of the Natural Gas. This methodology will be reviewed annually and modified if necessary. iii all such prices will be adjusted to FOB Delivery Point. iv for the purposes of this Article Third Party Sales of Crude Oil or Natural Gas made by the Contractor shall include any Third Party Sales made by the Contractor or an Affiliated Company of Contractor on the Ministers behalf pursuant to Article 14 but shall exclude aa sales whether direct or indirect through brokers or otherwise of any seller to any Affiliated Company of such seller unless at demonstrably arms length price for example where an Affiliate Company of Contractor buys and then resells to a third party at an armslength price which is disclosed to the Minister; bb Crude Oil or Natural Gas exchanges barter deals or restricted or distress transactions or any Crude Oil or Natural Gas transaction which is motivated in whole or in part by considerations other than the usual economic incentives for commercial arms length crude oil or natural gas sales; and Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A.

Page 35 cc Government to government sales. 13.2 Contractor shall be responsible for determining the relevant prices in accordance with this Article. The calculation basis of calculation and the price arrived at shall be supplied to the Minister and shall be subjected to agreement by the Minister before it is finally determined . Pending final determination the last established average Crude Oil or Natural Gas price shall be used. 13.3 During the first Calendar Year of production from the Contract Area the Contractor and the Minister will meet in order to establish a provisional selection of the crude oils and an appropriate mechanism for the purposes of giving effect to Article 13.1 b ii above. This selection will be reviewed annually and modified if necessary. 13.4 In the event of any difference or dispute between the Contractor and the Minister concerning selection of the crude oils

or natural gas the calculation or the basis of calculation of the prices and the prices arrived at or generally about the manner in which the prices are determined according to the provisions of this Article the matter or matters in issue shall finally be resolved by a sole expert appointed pursuant to Article 26.3.

13.5 For the purposes of this Article in determining the quality of a Crude Oil regard shall be given to: all relevant characteristics including but not limited to gravity sulphur and maximum pour point and product yield. In the case of Natural Gas quality of the Natural Gas shall be determined based on its composition.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 36

Article 14 Disposal of Production

14.1 Each of the Parties shall have the right to take in kind at the Delivery Point and separately dispose of its share of the total quantities of production available under this Agreement. The Contractor shall have the right to use as much production as may be needed in any Petroleum Operations within the Contract Area and also within the transportation and terminal system. In the event of third party usage of the transportation terminal systems the quantities so used or lost outside the Contract Area shall be proportionate to aggregate use of that transportation and terminal system. All quantities so used or lost shall be excluded from any calculations of entitlement pursuant to Article 11. The quantity of production to which the Government is entitled pursuant to Article 11 shall be measured and delivered to the Government at the Delivery Point and the Government shall be responsible for all costs and risks associated with the Government's Lifting Entitlement from and after the Delivery Point.

14.2 Within twelve (12) months after the Minister's approval of a Development Plan or within a later period as may be agreed between the Parties but in any event no longer than three (3) months before the first scheduled lifting of Crude Oil the Contractor shall propose to the Minister off-taking procedures to govern the method whereby the Parties will nominate and lift their respective shares of Crude Oil. The details of such procedures shall be discussed and agreed upon between Minister and Contractor. The major principles of such procedures shall include the following:

14.3 a Lifting shall be carried out so as to avoid interference with Petroleum Operations.

b c In the event that any Party shall find itself unable for any reason to lift such quantities of Crude Oil as are to be lifted in accordance with procedures it shall forthwith

notify the other Parties to that effect. Such procedures shall include such deterrents as the Parties may agree to prevent a Party from delaying the lifting of any quantities of Crude Oil not so lifted to a later period. In the absence of any agreement to the contrary between the Parties the Contractor and the Minister shall share in each type of grade of Crude Oil in proportion to their respective Lifting Entitlement.

14.3 The Contractor shall if requested by the Minister use reasonable efforts to market abroad on competitive terms all or part of the Ministers Lifting Entitlement subject to payment by Minister of costs normally borne by a seller in such transactions and on other terms to be agreed including an agreed marketing fee in respect thereof. The Minister shall provide the Contractor with at least six 6 months notice before changing between receiving payments in kind as provided under Article 14.1 and seeking the Contractor to market the Ministers Lifting Entitlement under this Article.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 37

14.4 Subject to the provisions of Article 17 hereof the Contractor shall have the right to export at the export point chosen for this purpose all Petroleum to which it is entitled under this Agreement free of any duty tax or other financial impost and to receive and retain abroad all proceeds from the sale of such Petroleum.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 38

Article 15 Taxation and Royalty

15.1 Subject to Article 32. and except as provided in Article 15.2 15.8 and except as otherwise set forth in this Article 15.1 no tax valueadded tax excise tax duty fee charge or other impost shall be levied at the date hereof or from time to time thereafter on the Contractor or Affiliated Companies in respect of income derived from Petroleum Operations or in respect of any property held transactions undertaken or activities performed for any purpose authorised or contemplated hereunder other than a b c subject to the provisions of Article 21 import duties at the rates specified from time to time in the Customs Act Cap. 8201; taxes duties fees or other imposts for income derived from specific services performed by the Contractor for the public or commercial enterprises and which is unrelated to income derived from Petroleum Operations under this Agreement; rent due to Government in respect of any land rights granted or assigned to the Contractor; d annual licence rental charge it cnder Article 10; e f subject to Article 15.7 local

government rates or taxes being rates or taxes not calculated by reference to income under laws of general application and which are nondiscriminatory are commercially reasonable and do not result in a rate or tax to Contractor in excess of those generally applicable in Guyana; i stamp duties ii registration fees iii licence fees and iv any other similar duty fee or other impost of a minor nature provided the abovereferenced categories are imposed under laws of general application. 15.2 Except as provided in this Article 15 Contractor Affiliated Companies SubContractors and individuals who are expatriates shall be subject to the income tax laws of Guyana including the Income Tax Act of Guyana Cap. 81:01 and the Corporation Tax Act of Guyana Cap. 81:03 and shall separately comply with the requirements of those laws in particular with respect to filing returns assessment of tax and keeping and showing of books and records. 15.3 The taxable income of the Contractor arising in each year of assessment under this Agreement for purposes of the income tax laws of Guyana including the Income Tax Act and the Corporation Tax Act referred to in Article 15.2 shall include the amounts of Contractor's income tax and corporation tax paid pursuant to Article 15.4.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 39

15.4 The Minister hereby agrees a b that a sum equivalent to the tax assessed pursuant to Article 15.2 and 15.3 will be paid by the Minister to the Commissioner General Guyana Revenue Authority on behalf of the Contractor and that the amount of such sum will be considered income of the Contractor; and that the appropriate portion of the Government's share of Profit Petroleum delivered in accordance with the provisions of this Agreement shall be accepted by the Minister as payment in full by the Contractor of Contractor's share of each of the following levies whatsoever the applicable rate of such levies may be which the Minister shall then pay on behalf of the Contractor under Article 15.4 a to the Commissioner General Guyana Revenue Authority i the share of royalty payable by Contractor pursuant to Article 15.6; ii the Contractor's share of the income taxes imposed by the laws of Guyana including but not limited to income tax imposed by the Income Tax Act and corporation tax imposed by the Corporation Tax Act and payable at the date hereof or from time to time thereafter and any other levy or charge on its profits which may become payable from time

to time under my laws acts statutes regulations or orders by the Government; and iii any other similar charge imposed and payable in respect of Petroleum Operations at the date hereof or from time to time hereafter except charges of the type specified in Article 15.1 ab. 15.5 The Contractor shall provide the Minister with the Contractors income tax returns to be submitted by the Minister to the Commissioner General Guyana Revenue Authority so the Minister can pay income tax on behalf of the Contractor as provided under Article 15.4 a. On such returns the Minister shall note that he is paying the income taxes on behalf of the Contractor so that the Commissioner General Guyana Revenue Authority can properly prepare the receipts required under this Article 15 .5. Within one hundred and eighty 180 days following the end of each year of assessment the Minister shall furnish to Contractor proper tax certificates in Contractors name from the Commissioner General Guyana Revenue Authority evidencing the payment of the Contractors income tax under the Income Tax Act and corporation tax under the Corporation Tax Act. Such certificates shall state the amount of tax paid individually on behalf of Contractor or parties comprising the Contractor and other particulars customary for such certificates. 15.6 The Governments share of Profit Petroleum specified in Article 11 includes royalty payable by the Contractor at the rate of one percent 1 of Crude Oil produced and sold and delivery to the Minister pursuant to Article 14 of his share of Profit Petroleum equivalent to royalty shall constitute payment of such royalty in kind. Within one hundred and eighty 180 days following the end of each year of assessment receipts evidencing Petroleum Agreement Government of Guyana Repsol Exploracion S.A. Page 40 payment of Contractors royalty shall be furnished by the Minister to the Contractor stating the amount and other particulars customary for such receipts. 15.7 Subject to the conditions of section 49 of the Act the Minister may remit in whole or in part or defer payment of any royalties payable by Contractor. 15.8 Nothing in this Agreement shall be construed to place an obligation on the Government to file a tax return declaring its share of production or profit share or to regard such profit share as income within the meaning of section 5 of the Income Tax Act Cap 81 01 or section 4 of the Corporation Tax Act Cap 8103 15.9 The Minister hereby agrees that the Contractor shall be exempted from the Property Tax Act pursuant to section

51 of the Act and any other act which amends or replaces in part or in whole the Property Tax Act

15.10 Notwithstanding any provision to the contrary in this Article Contractor Affiliated Companies or NonResident SubContractors shall be exempted from VAT during the Exploration period on services rendered.

15.11 Notwithstanding any provision to the contrary in this Article the Government warrants and agrees with the Contractor that it will procure from the Guyana Revenue Authority GRA the granting of assurances in respect to the Value Added Tax Act for i The contractor and subcontractors of the company to be registered in accordance with the relevant sections of the Value Added Tax Act; and Upon the submission and filing of the appropriate Value Added Tax Return forms within the prescribed timeframe Contractor and subcontractors shall have the right to obtain VAT refunds according to applicable Value Added Tax Regulations.

15.12 The Minister agrees that for the duration of the Exploration Period and for any area within the Contract Area where exploration activity is in progress the provisions of section 1 Ob of the Corporation Tax Act Cap 8103 including any successor provisions to section 1 Ob of the Corporation Tax Act Cap 81 03 shall not apply to the Contractor with respect to any payments made to any Affiliated Companies or SubContractors. Notwithstanding any provision to the contrary in this Article Affiliated Companies or NonResident SubContractors shall not be subject to the provisions of the Income Tax Act of Guyana Cap. 81.01 and the Corporation Tax Act of Guyana Cap 81 03 during the Exploration Period on income earned in Guyana for any given tax year if the Affiliated Company or NonResident SubContractor has conducted business in Guyana for one hundred eighty three 183 days or Jess on a cumulative basis in the tax year of assessment.

15.13 There shall be no tax duty fee withholding charge or other impost applicable on interest payments dividends deemed dividends transfer of profits or deemed remittance of profits from Contractors Affiliated Companies or NonResident SubContractors branch in Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 41 Guyana to its foreign or head office or to Affiliated Companies.

15.14 The Minister agrees that for the duration of the Exploration Period and for any area within the Contract Area where exploration activity is in progress the provisions of section 18h of the Income Tax Act Cap 81 01

including any successor provisions to section 18h of the Income Tax Act Cap 81:01 shall not apply to each party comprising the Contractor with respect to headoffice expenses paid to any Affiliated Companies.

15.15 The Expatriate Employee shall be liable to pay personal income tax in Guyana on income earned in Guyana. Guyana represented herein by the Minister shall cause the proper authorities to issue appropriate tax certificates to Expatriate Employees when required.

i ii If an Expatriate Employee is liable to pay income tax in Guyana on income earned in Guyana such Expatriate Employee shall pay such income tax at a rate equal to the current income tax rate of Guyana; Notwithstanding any provision to the contrary in this Article Expatriate Employees shall not be subject to the provisions of the Income Tax Act of Guyana Cap. 81:01 and shall not be liable for personal income tax in Guyana on income earned in Guyana for any given tax year if the expatriate is physically present in Guyana for one hundred eighty three (183) days or less on a cumulative basis in the tax year of assessment.

15.16 An Order shall be made giving effect to the provisions of this Article in statutory form and language as specified in section 51 of the Act.

Petroleum Agreement
Government of Guyana Repsol Exploración S.A. Page 42 Article 16 Contracts and Assignments

16.1 The relevant party comprising the Contractor or the Operator shall upon request provide to the Minister copies of a b c contracts with respect to the sale or disposal of Petroleum including mvments issued thereunder; any deed of assignment of an interest of any party comprising the Contractor under this Agreement pursuant to Article 25; any instrument by which the Contractor pledges mortgages encumbers or hypothecates its interest under this Agreement or the Contract Area.

16.2 Assignments of any kind between one party comprising Contractor and its Affiliated Company as well as any assignment of any kind made in accordance with this Agreement including one to an unrelated party shall be exempted from any duties or taxes including Capital Gain Taxes payable in such respect and shall be subject to a fee payable to GGMC upon approval of the assignment for the amount of one hundred thousand United States Dollars; 100,000 US\$. Petroleum Agreement
Government of Guyana Repsol Exploración S.A. Page 43 Article 17 Domestic Supply Obligation

17.1 Terms for Crude Oil. a b If the Crude Oil requirements of the domestic market in Guyana the

Crude Oil Domestic Demand exceed the Ministers total entitlement from all Crude Oil production in Guyana then the Contractor shall be obliged together with any third parties which produce Crude Oil in Guyana to supply and sell a volume of Crude Oil to be used for such Crude Oil requirements in Guyana calculated on the basis of the ratio which the Contractors Lifting Entitlement to Crude Oil bears to the sum of Contractors Lifting entitlement plus the total entitlement of all other producers in Guyana subject to Article 17.lc. The volume of Crude Oil which the Contractor shall be required to sell under this Article shall not exceed the Contractors share of Profit Petroleum. The Minister shall give the Contractor notice on or prior to April 1 of the year preceding the Calendar Year in which the Government will have the said requirement and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. For the purpose of this Agreement Crude Oil Domestic Demand shall consist of those quantities of Crude Oil i used to produce refined products or petrochemicals in Guyana for end use by business and residential consumers in Guyana or ii used to produce power in Guyana for end use by business and residential customers in Guyana the amounts for which shall be based upon independent verifiable government statistics. Crude Oil refined products petrochemicals or fuel for power generation that are exported from Guyana shall not be considered part of Crude Oil Domestic Demand. The Contractor shall in any Year have a right to supply out of Contractors Lifting Entitlement the proportion of the Crude Oil requirements of Guyana that the quantity produced from the Contract Area bears to the total production at the time in Guyana to the extent that such requirement is not satisfied from any contract entered into prior to the date of commencement of production from the Contract Area. For the purpose of this paragraph the term the Crude Oil requirements of Guyana means the amount by which in any Year Crude Oil Domestic Demand exceeds the Ministers total entitlement to all Crude Oil produced in Guyana. The Contractor shall give the Minister notice on or prior to April 1 of the Calendar Year preceding the Calendar Year in respect of which Contractor wishes to exercise the aforesaid right and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. Notwithstanding the foregoing the Contractor shall have the right to supply the total amount calculated pursuant to the

foregoing provisions. c The price payable for the sale of Crude Oil pursuant to this Article shall be paid in United States dollars or other currency as may be agreed at a place specified by the Contractor within thirty 30 days of receipt of the Contractors invoice by the Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 44 Minister and shall be determined in accordance with Article 13 failing which Contractor s obligations in respect of the Domestic Supply Obligations of this Article 17 shall be suspended until payment is made good at which time deliveries shall be resumed subject to any alternative commitments that may have been reasonably entered into by Contractor to dispose of the Crude Oil during the period of default in payment. Contractor shall recover any am ount due and unpaid by the Government plus interest at the Agreed Interest Rate from the Governments Lifting Entitlement of Crude Oi l. Any sale of Crude Oil as provided for in Article 17.1 a c shall occur at the Delivery Point or such other point as the Minister and the Contractor may mutually agree. All tenns and conditions for the sale of Crude Oil pursuant to this Article shall be specified in a contract of sale entered into between the Minister and Contractor. d e

17.2 Terms tor Natural Gas. a If the Natural Gas requirements of the domestic market in Guyana the Natural Gas Domestic Demand exceed the Ministers total entitlement from all Natural J. production in Guyana then the Ccntractor shall be obliged tof;eter .i.l. J.ny third parties which produce Natural Gas in Guyana to supply and sell a volume of Natural Gas to be used for such NatlLal Gas Domestic Demand in Guyana calculated on the basis of the ratio which the Contractors Lifting Entitlement to Natural Gas bears to the sum of Contractors Lifting entitlement plus the total entitlement of all other producers in Guyana subject to Article 17.2c. The volume ofNatural Gas which the Contractor shall be required to sell under this Article shall not exceed the Contractors share of Profit Petroleum. The Minister shall give the Contractor notice on or prior to April 1 of the year preceding the Calendar Year in which the Government will have the said requirement and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. For the purpose of this Agreement Natural Gas Domestic Demand shall consist of those quantities of Natural Gas used for domestic residential commercial and industrial consumption including fuel used for domestic

power generation determined by the Minister before the submission of a Development Plan including a forecast of the reasonable variation in demand in the future. Natural Gas liquefied or compressed in Guyana for export or used as feedstock for petrochemical exports such as methanol and fertilizer shall not be considered part of Natural Gas Domestic Demand. Any sales of Natural Gas to the domestic market shall be priced at the netback price of such Natural Gas in the production Field which shall be calculated as the market destination price where the Natural Gas would be sold minus transport marketing processing compression liquefaction and any other fee or tariff paid to Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 45 take the gas from the Field to the destined market. In the event of a failure to reach agreement on the price volume and/or terms of sale either Party may submit the dispute for sole expert determination pursuant to Article 26.3 . The Contractor shall in any Year have a right to supply out of Contractors Lifting Entitlement the proportion of the Natural Gas requirements of Guyana that the quantity produced from the Contract Area bears to the total production at the time in Guyana to the extent that such requirement is not satisfied from any contract entered into prior to the date of commencement of production from the Contract Area. For the purpose of this paragraph the term the Natural Gas requirements of Guyana means the amount by which in any Year Domestic Demand exceeds the Ministers total entitlement to all Natural Gas produced in Guyana. The Contractor shall give the Minister notice on or prior to April 1 of the Calendar Year preceding the Calendar Year in respect of which Contractor wishes to exercise the aforesaid right and the term of the supply shall be on a Calendar Year basis unless otherwise agreed. Notwithstanding the foregoing the Contractor shall have the right to supply the total amount calculated pursuant to the foregoing provisions. The price payable for the sale of Natural Gas pursuant to this Article shall be paid in United States dollars or other currency as may be agreed at a place specified by the Contractor within thirty 30 days of receipt of the Contractors invoice by the Minister and shall be determined in accordance with Article 17.2a failing which Contractor's obligations in respect of the Domestic Supply Obligations of this Article 17 shall be suspended until payment is made good at

which time deliveries shall be resumed subject to any alternative commitments that may have been reasonably entered into by Contractor to dispose of the Natural Gas during the period of default in payment. Contractor shall recover any amount due and unpaid by the Governments Lifting Entitlement of Natural Gas. the Agreed Interest Rate from the Government plus interest at Any sale of Natural Gas as provided for in Article 17.2a c shall occur at the Delivery Point or such other point as the Minister and the Contractor may mutually agree. All terms and conditions for the sale of Natural Gas pursuant to this Article shall be specified in a contract of sale entered into between the Minister and Contractor.

b c d e Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 46 Article 18 Guyana Resources 1 8.1 In the conduct of Petroleum Operations pursuant to this Agreement the Contractor shall require that the Operator give preference to a b the purchase of Guyanese goods and materials provided that such goods and materials are available on a timely basis of the quality and in the quantity required by Operator at competitive prices; and the employment of Guyanese SubContractors in so far as they are commercially competitive and satisfy the Operators financial and technical requirements and meet the requirements of Article 18.1 a. 18.2 The Operator shall establish appropriate tender procedures for the acquisition of goods. materials .nd services which shall ensure that Guyanese suppliers and SubContractors are given adequate opportunity to compete for the supply of goods and services. 18.3 Within ninety 90 days after the end of each Calendar Year the Operator shall provide the Minister with a report outlining its achievements Iri utilising Guyanese resources durmg that Calendar Year.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 47 Article 19 Employment and Training 19.1 Subject to the requirements of any Jaw relating to immigration Govenunent shall provide the necessary work permits and other approvals required by the Contractor for employment of Expatriate Employees in Guyana for the purpose of Petroleum Operations. 19.2 Without prejudice to the right of the Contractor to select employees and determine the number thereof in the conduct of Petroleum Operations the Operator shall employ and SubContractors shall employ Guyanese citizens having appropriate qualifications and experience

whenever and wherever possible . 19.3 During each year of the term of the Petroleum Prospecting License or any renewal thereafter the Contractor shall pay to GGMC the amounts of Initial Period First Renewal Period Second Renewal Period Thirty thousand United States Dollars 30000US. Thirty thousand United States Dollars 30000US. Thirty thousand United States Dollars 30000US. Payments under this Article 19.3 shall be paid directly into bank accounts held and controlled by the GGMC as noted in writing. The purposes of these payments are noted hereunder; a b c d to provide Guyanese personnel nominated by GGMC with on-the-job training in Contractor's operations in Guyana and overseas and/or practical training at institutions abroad particularly in the areas of logistical planning for undertaking Petroleum Operations seismic acquisition and interpretation economic analysis petroleum accounting and contract administration; to send qualified Guyanese personnel selected by GGMC on courses at universities colleges or other training institutions selected by GGMC; to send Guyanese personnel selected by GGMC to conferences and seminars related to the petroleum industry; to purchase for GGMC advanced technical books professional publications scientific instruments or other equipment required by GGMC. 19.4 During each year of the term of the Petroleum Prospecting License or any renewal thereafter the Contractor in accordance with its internal applicable policy shall fully cover the cost of air travel tuition and registration fees suitable lodging and stipend for daily living and upkeep to provide training to one suitably qualified Guyanese selected by the GGMC to pursue a Masters Degree in Oil and Gas Engineering programme in the Centro Superior de Formacion in Madrid Spain. Candidates for this Master Degree must be university qualified and must pass the registration requirements. In the event that the Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 48 capacity of Centro Superior de Formacion is full in any given year then the Contractor will either propose an alternate university in Europe or United States to provide the training or will provide to have simultaneous training for more than one candidate in a different year. Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 49 Article 20 Rights to Assets and Insurance 20.1 Rights to Assets a b The Contractor shall have the right to use free of charge assets previously

installed by the Contractor in relinquished areas which are required for the Petroleum Operations in the remaining portion of the Contract Area provided that in the event of relicensing of the relinquished area such licence shall exclude the aforesaid assets. Subject to Article 20.1 c upon expiry or termination of this Agreement in accordance with the provisions hereof the Contractor shall upon notification by GGMC pursuant to Article 20.1 di i ii deliver to the Minister free of charge in good order and condition fair wear and tear excepted all installations works pipelines. pumps casings tubings engines and other equipment machinery or assets of a fixed or permanent nature constructed used or employed by the Contractor or the Operator in the Contract Area; deliver to the Minister free of charge any fixed assets relating to Petroleum Operations outside the Contract Area and movable assets owned by the Contractor or Operator and used or employed in connection with Petroleum Operations and located in Guyana for which costs have been fully recovered in accordance with Annex C herein; where costs have not been fully recovered the provisions of Article 20.1 b iii shall apply; iii sell to the Minister any other assets owned by the Contractor or Operator and used or employed by the Contractor or Operator in the Contract Area or elsewhere in Guyana in connection with Petroleum Operations at a price equivalent to the unrecovered cost of the assets. c The above provisions of Article 20.1 b shall not apply to i assets which are still required by the Contractor or Operator for use in respect of an area in Guyana subject to another petroleum agreement at the time of expiry or termination of this Agreement; ii equipment and other assets rented or leased by Contractor in Guyana; iii equipment and other assets rented or leased by Contractor and imported in Guyana for use in Petroleum Operations and subsequently exported therefrom; iv equipment and any other assets owned or leased by a SubContractor; Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 50 v household goods and vehicles which are the personal property of employees of the Contractor and SubContractor; vi equipment and assets otherwise not owned by Contractor or Operator. d The Contractor shall notify the Minister of all assets acquired as provided in section 4 of Annex C to this Agreement. i ii At least six 6 Calendar Months before expiry of the term of this three 3 Calendar Months following notice of

Agreement within termination of this Agreement or promptly following cancellation of all Licences GGMC shall notify the Contractor of the assets to be delivered or sold to the Government. Subject to the terms and the provisions of this Article the Contractor shall not within one 1 year of the date upon which it estimates that termination of this Agreement will occur remove from the Contract Area or sell any assets of a fixed or permanent nature which might be deliverable to the Government under this Article without the consent of the Minister such consent not to be unreasonably withheld.

iii Abandonment Programme and Budget aa Within sixty 60 days after the expiration of the term of this Agreement or the sooner relinquishment of some or all of the Contract Area the Contractor shall carry out to the Ministers satisfaction an abandonment programme agreed with the Minister for all installations and pipelines provided by Contractor under this Agreement that the Minister elects not to have delivered up to him in accordance with Article 20.1 b. With respect to the area being relinquished and/or facilities thereon such abandonment programme shall comply with and be limited to internationally accepted standards prevailing at the time of abandonment. bb Concurrent with the submission of a Development Plan as provided in Article 8.4 the Contractor shall submit for the Ministers approval a proposed abandonment programme and budget covering all such installations and pipelines provided by Contractor under this Agreement. The abandonment programme and budget may be revised from time to time with the agreement of the Minister to account for any changes in the Development Plan. cc The Minister shall act without unreasonable delay in reaching a decision on the Contractor's proposal under Article 20.1 d. ii bb and may approve or modify or impose conditions thereon . Before Petroleum Agreement Government of Guyana Repsol Exploración S.A.

Page 51 modifying or imposing conditions on the proposal the Minister shall notify the Contractor of the proposed modification or conditions and give the Contractor the opportunity to make written representations within sixty 60 days thereafter about the proposed modifications or conditions. After taking into consideration such representations the Minister and the Contractor shall make their best efforts to mutually agree on the proposed modifications or conditions of the abandonment programme and budget In the event that the Minister and Contractor cannot mutually agree on the

proposed abandonment programme and budget either Party may by written notice to the other Party propose that the dispute be referred for determination in accordance with the provisions of Article 26. dd In the event that the Contractor does not present a timely proposal to the Minister under Article 20.1 diiibb the Minister after giving thirty 30 days notice to the Contractor of his intention to do so may prepare an abandonment programme and budget for the Contract Area if the Contractor does not present a proposal by the end of the thirty 30 day period. When the Minister has so prepared the abandonment programme and budget it shall have the same effect as i it hri hP.en submitted by the Contractor 1.nr1 approved by the Minister. ee Contractor shall have the right on an annual basis to propose a revised abandonment programme and budget Such proposal shall be subject to the approval process in Article 20.1 diii cc . Any revisions to the abandonment programme and budget shall result in a revision to the guarantee referred to in Article 20.1 diiihh. ff All funds required to carry out the approved abandonn1ent programme shall be made available by Contractor when the costs for abandonment are incurred. gg All costs included in the approved abandonment progra11ille and budget shall be recoverable as operating costs on a unit of production basis commencing during the abandonment programme and budget is approved. The amount to be recovered in a respective period shall be calculated by dividing the approved abandonment budget by the estimated ultimate recoverable reserves which may be revised from time to time based upon the actual performance of the Fields and multiplying the result by the units produced in the period . the period when hh Contractor shall deliver to the Minister within seven 7 days after the date the abandonment programme and budget are approved an Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 52 undertaking from Contractors immediate parent company stating that such parent company shall ensure provision of financial and technical resources necessary to conduct the approved abandonment programme. The amount of the financial unde11aking shall be equal to the amount recovered under Article 20.1 diiiigg less any amounts spent under the approved abandonment programme. ii Notwithstanding the provisions of Article 20.1 diiiiff in the event the Minister elects to have all or a portion of the facilities delivered up to him in

accordance with Article 20.1 b the Contractor shall pay the Minister at the time of transfer the amounts stipulated in the latest approved abandonment budget for the transferred facilities. Upon transfer and receipt of the funds the Minister shall assume all responsibilities for the transferred facilities and their abandonment and shall hold the Contractor harmless against any liability with respect thereto accruing after the date of such transfer to the Minister. iv Subject to Article 20.1 c in the event that the Government acquires any assets pursuant to this Article the Government shall assume all liabilities with respect to such assets arising from and after the date of acquisition and shall not direct the Contractor to remove or abandon any such assets pursuant to regulation 9 la of the Regulations. The Government shall indemnify and hold Contractor harmless for any and all costs and claims which may arise from the use or abandonment of any asset from and after the date of acquisition by the Government. v Assets not acquired by the Government pursuant to this Article may be sold or otherwise freely disposed of by the Contractor subject to Article 21.2 and the Regulations.

20.2 Insurance a The Contractor shall effect at all times during the term of this Agreement insurance as required by applicable laws rules and regulations and of such type and in such amount as is customary in the international petroleum industry in accordance with good oil field practice appropriate for Petroleum Operations in progress in respect of but not limited to i loss or damage to all assets used in Petroleum Operations; ii iii pollution caused in the course of Petroleum Operations for which the Contractor or the Operator may be held responsible; loss or damage to property or bodily injury suffered by any third party in the course of Petroleum Operations for which the Contractor may be liable Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 53 to provide an indemnity pursuant to Article 2.4; iv the Contractors and/or Operators liability to its employees engaged in Petroleum Operations. To the extent permitted by applicable laws rules and regulations such insurance may be provided through Contractors affiliate insurance company. b c Subject to the Minister's approval which shall not be unreasonably withheld the Contractor notwithstanding the provisions of Article 20.2a shall have the right to self-insure all or part of the aforementioned insurances in Article 20.2a. The Contractor shall require the Operator to carry and

to endeavour to have its SubContractors carry insurance of such type and in such amount as is customary in the international petroleum industry in accordance with good oil field practices.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 54 Article 21 Import Duties

21.1 The Contractor and the SubContractors engaged in Petroleum Operations shall be pennitted to import free of duty VAT or all or any other duties taxes levies or imposts all equipment and supplies required for Petroleum Operations including but not limited to drill ships platfom1s vessels geophysical tools communications equipment explosives. radioactive sources vehicles oilfield supplies lubricants consumable items other than foodstuffs or alcoholic beverages or fuel as well as all items listed on Annex D. The aforementioned items including but not limited to the items listed on Annex D shall be deemed approved and certified by the Chief Inspector to be for use solely in carrying out Petroleum Operations. The Contractor shall give prior notification to the Minister of SubContractors engaged in Petroleum Operations. Subject to Article 21.1 and for as long as this Petroleum Agreement remains in force the Contractor and SubContractors engaged in Petroleum Operations hereunder shall be required to pay to the relevant authority excise tax on any fuel imports where such imports have been certified by the Chief Inspector to be used solely in carrying out Petroleum Operations in any area within the Contract Area at a rate often percent 10 or the prevailing rate whichever is lesser.

21.2 Subject to Article 20 any of the items imported into Guyana may if no longer required for Petroleum Operations herender be freely exported at any time by the importing party without the payment of any export duty or impost; provided however that on the sale or transfer by the importer of any such item to any person in Guyana other than the Government import duty shall be payable by the impmier on the value thereof at the date of such sale or transfer as determined by the Customs and Excise Department in accordance with their applicable rules.

21.3 Each Expatriate Employee who have been assigned to work in Guyana for the Operator or its SubContractors shall be pern1itted subject to the limitations and conditions set out in the Customs Act to import into Guyana free of import duty and taxes within six 6 months on first arrival his personal and household effects including one 1 motor vehicle provided however that no property so

imported by the employee shall be sold by him in Guyana except in accordance with Government regulations and upon the payment of the prescribed customs duties. Any importation or replacement of motor vehicles by Expatriate Employees shall be a matter for consultation with the Minister. 21.4 Each Expatriate Employee shall have the right to export from Guyana free of all duties and taxes and at any time all of the items imported under Article 21.3. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 55 Article 22 Foreign Exchange Control 22.1 Each party comprising the Contractor shall during the term of this Agreement have the right a b c d e to retain abroad all foreign exchange obtained from the exp01i sales of Contractors Petroleum and to remit and retain abroad all foreign exchange earned from sales of Petroleum or assets in Guyana; finance Petroleum Operations hereunder to through any combination of equity interaffiliate or third party loans intercompany open accounts or production payments but no payments of principal or interest in respect thereof shall be made from any source in Guyana other than the bank accounts referred to in Article 22.1 c; in any currency to open and maintain bank accounts denominated in Guyanese dollars andor United States dollars in Guyana and freely dispose of the sums deposited therein without any restriction; provided the said accounts are credited only with sums deposited in foreign currency or with the proceeds of the sale of foreign currency oeing credits relating to or derived from retroleum Operations; to pen and maintain bank accounts in any foreign currency outside Guyana .which may be credited without restriction and freely dispose of any sums deposited therein without restriction and without any obligation to convert into Guyana currency any part of the said amounts save that such accounts shall not be credited with the proceeds of the sale of any Guyanese currency without the consent of the Bank of Guyana; to purchase and with the approval of the Bank of Guyana to sell Guyanese currency through the authorized banks without discrimination at the rate of exchange determined by the Bank of Guyana for authorized banks at the time of purchase or sale. 22.2 Expatriate Employees engaged in Petroleum Operations shall be subjected to all Exchange Control Regulations that may be in effect from time to time. Expatriate Employees shall be entitled to remit freely abroad any portion of their salaries paid in Guyana and any investment

income that may be earned on the portion of their salaries paid in Guyana. 22.3 Where any party comprising Contractor Affiliated Company or SubContractor by notice in writing to the Commissioner General Guyana Revenue Authority has guaranteed the full and proper discharge by an Expatriate Employee engaged in Petroleum Operations of his liability to income tax under the laws of Guyana that Expatriate Employee shall be entitled to receive payment of the whole or any part of his remuneration in the country in which he is nonnally resident. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 56 Article 23 Accounting and Audits 23.1 The Contractor shall be responsible for maintaining accounting records relating to Petroleum Operations under this Agreement in accordance with the Accounting Procedures set out in Annex C hereto . 23.2 The Minister shall have the right to audit the acco unting records of the Contractor in respect of Petroleum Operations in accordance with Accounting Procedure. 23.3 Nothing in this Article shall be construed as limiting the right of Govenunent or any officer of Government pursuant to any statutory power to audit or cause to be audited the books of the Contractor. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 57 Article 24 Force Majeure 24.1 Any nonperformance or delay in performance wholly or in part by any Patiy hereto or any of its obligations under this Agreement or in fulfilling any condition of any Licence granted to such Party or in meeting any requirement of the Act or Regulations and any Licence issued thereunder shall except for the payment of monies due by Government to Contractor or monies due to Govenmment under section 43 4 of the Act unless such failure to pay is prevented by any action of the Govenmment not be a breach of this Agreement the Licence or the Act and Regulations if and to the extent that such nonperfonnance or delay wholly or in part is caused by Force Majeure as defined in this Article. 24.2 In this Article the term Force Majeure shall mean any event beyond the reasonable control of the Party claiming to be affected by such event which has not been brought about at its instance and which has caused such nonperformance or delay in performance and without limitation to the generality of the foregoing includes acts of God natural phenomena or calamities earthquakes floods tsunamis epidemics quarantines fires wars declared or undeclared hostilities invasions

blockades riots strikes insurrection civil disturbances mining of the seas piracy international disputes affecting the extent of the Sont;ct Area and any governmental J.cton or inaction that would prevent performance of an obligation or ability of the Contractor to export Petroleum except as provided in Article 14.5. 24.3 Where any Party is claiming suspension of its obligations on account of Force Majeure such Party shall promptly notify the other Parties in writing of the occurrence thereof giving particulars of the Force Majeure and obligations affected. Each Party shall promptly notify the other Parties as soon as the Force Majeure has been removed or no longer prevents it from carrying out its obligations hereunder. 24.4 Where a Party is prevented from exercising any rights or performing any obligations under this Agreement due to a Force Majeure the Minister hereby agrees pursuant to section 43 3 of the Act subject to the proviso therein that a period of additional time necessary for restoration of damages caused during a Force Majeure delay shall be added to the time allowed under this Agreement for the performance of such obligation and for the performance of any obligation or the exercise of any right dependent thereon and to the term of any Licence issued pursuant to this Agreement. In the event the Parties cannot agree on whether the occurrence of the event in question is considered a force majeure event or if the Minister does not agree an additional time period should be added pursuant to section 433 of the Act then a Party may refer the dispute to Arbitration pursuant to Article 26 to determine the nature of the force majeure event and its influence on the contractual obligations of the Party concerned. The Contractor shall have the option of terminating this Agreement without any further obligation if Force Majeure exceeds one 1 year. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 58 24.5 Without prejudice to the other provisions of this Article the Parties shall meet to discuss the consequences of the Force Majeure and the course of action to be adopted in the circumstances. 24.6 The Government shall not invoke Force Majeure due to any order regulation or written directive of the Government which affects the Government's performance of its obligations under this Agreement. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 59 Article 25 Assignment 25 .1 Subject to the regulation 20 of the Regulations any party comprising the

Contractor shall not assign or transfer in whole or in part any of its rights privileges duties or obligations under this Agreement or any Licence issued pursuant to this Agreement to any person firm or corporation without the prior written consent of the Minister. 25.2 The Minister shall give his consent under Article 25.1 where a the assignment or transfer will not adversely affect the performance or obligations under this Agreement; b the assignment is not contrary to the interests of Guyana; or c subject to a above the assignment or transfer is to an approved Affiliated Company. 25.3 In the event that the Minister does not give his consent or does not refuse a request for an assignment or transfer by any party comprising Contractor within sixty 60 days of receipt of such request; his consent shall be deemed to have been given by the Minister. 25.4 Any assignment made pursuant to this Article shall bind the assignee to all the terms and conditions hereof and the terms and conditions of any Licence issued pursuant to this Agreement unless otherwise agreed and as a condition to any assignment the assignee shall provide an unconditional undertaking to the Minister to assume all obligations by any party comprising the Contractor under this Agreement or any Licence issued pursuant to this Agreement. 25.5 An application for assignment or transfer of a Licence shall be made in accordance with Form E of the schedule specified in the Regulations. The applicant shall submit such additional information relating to the intended assignee which the Minister may reasonably require to enable him to dispose of the application.

26.1 The Parties shall make reasonable efforts to resolve amicably all Disputes by negotiation. A notice of the existence of a Dispute shall be given by a Party to another Party in accordance with Article 33 . In the event that no agreement is reached within sixty 60 days after the date on which a Party notifies the other that a Dispute exists or such longer period as specifically agreed by the Parties any Party shall have the right to have such Dispute determined by arbitration or a sole expert as provided for in this Article 26. 26.2 Any claim demand cause of action dispute or controversy arising out of or in connection with this Agreement including any question regarding its formation existence validity enforceability performance termination or alleged breach Dispute which

cannot be settled amicably by negotiation shall be resolved by binding arbitration or by a sole expert pursuant to Article 26.3 Article 26.4 or Article 26.6 whichever applies. 26.3 Any matter required to be referred to a sole expert for determination under this Agreement including under Articles 5.4 8.5 12.2a 13.4 and any other matter which the Parties expressly agree in writing to refer to a sole expert shall be referred to a sole expert for determination by a Party giving notice to such effect pursuant to Article 33. The sole expert shall be appointed by agreement between the Parties and in the event the Parties fail to agree on the sole expert within thirty 30 days after receipt of the written notice from any Party proposing the appointment of a sole expert such expert shall be appointed by the International Centre for Expertise of the International Chamber of Commerce ICC. A sole expert shall be an independent and impartial person of international standing with relevant qualifications and experience. The expert once appointed shall have no ex parte communications with any of the parties to the Dispute concerning the expert determination or the underlying Dispute. The Parties shall cooperate fully in the expeditious conduct of such expert determination and to provide the expert with access to all facilities books records documents information and personnel necessary to make a fully informed decision in an expeditious manner. The sole expert shall act as an expert and not as an arbitrator or mediator and shall endeavour to resolve the Dispute within thirty 30 days of his appointment but no later than sixty 60 days after his appointment. The sole expert shall decide the manner in which any determination is made but in any event shall accept oral and/or written submissions and arguments from the Parties. All correspondence documentation and information provided by a Party to the sole expert shall be copied to the other Party and any oral submissions to the sole expert shall be made in the presence of all Parties and each Party shall have a right of response. The decision of the sole expert on matters referred to him shall be final and binding on the Parties. The Parties shall refer any Dispute arising out of or relating to such expert decision including enforcement thereof to arbitration pursuant to Article 26.4 or Article 26.6 whichever applies. 26.4 Subject to the provisions herein the Parties hereby consent to submit to the International Centre for the Settlement of Investment Disputes ICSID any Dispute relating to or

arising Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 61 out of this Agreement to arbitration pursuant to the rules of the Convention on the Settlement of Investment Disputes between States and Nationals of Other States hereinafter referred to as the Convention. It is hereby stipulated that the transaction to which this Agreement relates is an investment within the meaning of the Convention. The Government hereby irrevocably waives any claim to immunity for itself its agencies its enterprises and any of its assets with regard to any sole expert determination or arbitration pursuant to this Article 26 and to any proceedings to recognise or to enforce this Article 26 or any proceeding to recognise or enforce a sole expert determination or an arbitral award rendered in an arbitration thereunder. Without prejudice to the generality of the foregoing the waiver of immunity shall include immunity from service of process and immunity from jurisdiction of any competent court or any arbitration tribunal and immunity of any of the Governments its agencies or its enterprises property from execution of any sole expert determination or arbitration award or judgment entered thereon.

26.5 If the Secretary General of ICSID refuses to register a request for arbitration or if a tribunal of arbitrators constituted pursuant to Article 26.4 above determines that a dispute is outside of ICSID's jurisdiction either Party may request arbitration of the dispute before three arbitrators pursuant to the Arbitration Rules of the United Nations Commission on International Trade Law UNCITRAL. The American Arbitration Association shall administer the arbitration under the UNCITRAL Arbitration Rules and shall act as the appointing authority; when the UNCITRAL Arbitration Rules call for an appointing authority.

26.6 The seat of the arbitration proceedings pursuant to this Article 26 shall be Washington DC United States of America however hearings may be held at such other place as the Parties may agree to in writing. The arbitration proceedings shall be conducted in the English language.

26.7 The fees and expenses of a sole expert as well as the charges for the use of ICSID or other facilities shall be borne equally by the Contractor and the Government. Each Party shall bear any other expenses it incurs in connection with expert or conciliation proceedings. In the case of arbitration proceedings the arbitrators shall assess the expenses incurred by the Parties the fees and expenses of the arbitrators the charges for the use of the facilities and any

other costs related to the arbitration and shall decide by whom such costs shall be paid in their award. The arbitral award shall be made and payable in dollars of the United States of America free of any tax or other deduction. The award shall include interest unless the arbitration tribunal determines that it is not appropriate. Interest shall run from the date of any breach or violation of this Agreement. Interest shall continue to run from the date of award until the award is paid in full. Interest shall be calculated at the Agreed Interest Rate. The arbitrators shall render a decision within six 6 months after having been confirmed or such other time as the Parties may agree. 26.8 The decision of a majority of the arbitrators shall be final and binding on all the Parties and judgment on the award may be entered by any court of competent jurisdiction.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 62 Article 27 Applicable Law 27.1 This Agreement shall be governed by interpreted and construed in accordance with the laws of the Republic of Guyana and consistent with such rules of international law as may be applicable or appropriate including the generally accepted customs and usages of the international petroleum industry. 27.2 The parties comprising the Contractor agrees to abide by the laws regulations orders directives and notifications of Guyana which shall also apply to its Affiliated Companies and SubContractors engaged in Petroleum Operations in Guyana.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 63 Article 28 Protection of the Environment 28.1 In accordance with the Environmental Protection Act 1996 the Contractor shall obtain an environmental authorization as required from the Environmental Protection Agency and comply with the provisions of that Environmental Protection Act in relation to any activity of this Agreement that is governed by that Environmental Protection Act. 28.2 The Contractor is precluded from initiating any exploration or development activity on those areas outside of the Contract Area which the Environmental Protection Agency may determine to be sensitive or protected. 28.3 28.4 In furtherance of regulation 6 of the Regulations in the conduct of Petroleum Operations the Contractor shall take necessary and adequate precautions in accordance with good international petroleum industry practice against pollution and for the protection of the environment and the living resources

of the rivers and sea. If the Contractor's failure to comply with the provisions of Article 28.1 results in pollution or damage to the environment, riverine or marine life or otherwise the Contractor shall take all reasonable measures in accordance with good international petroleum industry practice to remedy the failure and the effects thereof and shall where pollution occurs treat or disperse it in an environmentally acceptable manner. The Contractor shall not be obligated to remedy or clean up pollution or environmental damage of any type that existed prior to the commencement of Petroleum Operations by the Contractor or arises as a consequence of preexisting environmental conditions.

28.5 The Contractor shall notify the Minister forthwith in the event of any emergency or accident arising from Petroleum Operations affecting the environment and shall take such action as may be prudent and necessary in accordance with good international petroleum industry practice in such circumstances. 28.6 If the Contractor does not act promptly pursuant to Article 28.4 so as to control or clean up any pollution within a reasonable period specified by the Minister the Minister may after giving the Contractor reasonable notice in the circumstances take any actions which are necessary in accordance with good international petroleum industry practice and the reasonable costs and expenses of such actions shall be borne by the Contractor.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 64 Article 29 Termination and Cancellation 29.1 29.2 29.3

This Agreement shall be deemed to have been terminated if the Petroleum Prospecting Licence granted to the Contractor pursuant to Article 3 and every Petroleum Production Licence granted to the Contractor under Article 8 has either expired or under and in accordance with the Act and any relevant provision of this Agreement been surrendered by the Contractor or lawfully cancelled by the Minister pursuant to section 42 of the Act but save as aforesaid shall continue in full force and effect so long as the Contractor continues to hold any of the said Licences. Should any issue arise between the Parties as to whether the Contractor is in default and such issue cannot be amicably settled by consultation between the Parties and a dispute thereon is referred for resolution pursuant to Article 26 this Agreement and the said Licences shall continue in force pending resolution of such dispute. Pursuant to section 42 of the Act the Minister shall not cancel a Licence on the basis of

default unless the Minister has by notice served on the licensee given not less than thirty 30 days notice of such intention and the basis of default. In the notice the Minister shall specify a reasonable date not less than sixty 60 Business Days before which the licensee must submit a written response or remedy the default.

29.4 On termination of this Agreement or cancellation of any Licence as aforesaid the rights and obligations of the Parties shall cease by the termination or cancellation but such termination or cancellation shall not affect any right of action existing or liabilities incurred by a Party before the date of termination or cancellation and any legal proceedings that might have been commenced or continued against a Party may be commenced or continued against it.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 65 Article 30 Effective Date

30.1 The Effective Date shall be 12th April 2013 .

Petroleum Agreement Government of Guyana Repsol Exploración S.A. Page 66 Article 31 Miscellaneous

31.1 The Government assures the Contractor that the Contract Area lies entirely within the territorial limits of Guyana and that Guyana has sovereignty over such area. The Government shall assert its right to the entire Contract Area and seek to resolve current or future claims if any by other States that impugn any portion of the Contract Area. The Government shall also use its best efforts to permit due observance of the terms and conditions of this Agreement by both Parties. Both Parties undertake not to take any action inconsistent with the terms and conditions of the Agreement

31.2 This Agreement shall not be amended or modified in any respect except by written agreement entered into by all the Parties which shall state the date upon which the amendment or modification shall become effective.

31.3 In the event of any conflict between any provisions in the main body of this Agreement and any provisions in the Annexes the provision in the main body shall prevail.

31.4 The headings of this Agreement are for convenience of reference only and shall not be taken into account in interpreting the terms of this Agreement.

31.5 A reference to the singular in this Agreement includes a reference to the plural and vice versa.

31.6 The provisions of this Agreement shall inure to the benefit of and be binding upon the Parties and their permitted assignees and successors in interest.

31.7 No waiver by any Party of any one or more obligations or defaults by any other Party shall be construed

as a waiver of any other obligations or defaults whether of a like or of a different character. 31.8 This Agreement supersedes and replaces any previous Agreement or understanding between the Parties whether oral or written on the subject matter hereof prior to the date of this Agreement. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Page 67 Article 32 Stability of Agreement 32.1 Except as may be expressly provided herein the Government shall not amend modify rescind tem1inate declare invalid or unenforceable require renegotiation of compel replacement or substitution or otherwise seek to avoid alter or limit this Agreement without the prior writ1en consent of Contractor. 32.2 After the signing of this Agreement and in conformance with Article 15 the Government shall not increase the economic burdens of Contractor under this Agreement by applying to this Agreement or the operations conducted thereunder any increase of or any new petroleum related fiscal obligation including but not limited to any new taxes whatsoever any new royalty duties fees charges valueadded tax VAT or other imposts. 32.3 32.4 If at any time after the signing of this Agreement there is a change in the laws of Guyana whether t.hTough the amendment of existing Jaws including the hydrocarbons law the customs code or tax code or the enactment of new laws or a change having the force of law in the interpretation implementation or application thereof whether the change is specific to the Agreement the Contractor or of general application and such change has a materially adverse effect on the economic benefits includin those resulting from the fiscal regime provided by this Agreement accruing to the Contractor hereunder during the term of this Agreement th Government shall promptly take any and all affirmative actions to restore the lost or impaired economic benefits to Contractor so that Contractor receives the same economic benefit under the Agreement that it would have received prior to the change in law or its interpretation application or implementation. The foregoing obligation shall include the obligation to resolve promptly by whatever means may be necessary any conflict or anomaly between this Agreement and any such new or amended legislation including by way of exemption legislation decree andor other authoritative acts. In the event that Contractors overall economic benefits have been materially and adversely affected by actions or changes as set forth above in Section 32.3

whether directly or indirectly Contractor may notify the Government in writing. The Parties shall then meet within thirty 30 days after such notification with the objective of reaching agreement on a remedial action to be taken by the Government whether by exemption legislation decree and/or other authoritative acts or by amendment to the terms of the Agreement. If the Parties are unable to resolve their differences within one hundred twenty 120 days after Contractor has issued the aforementioned notification then the Contractor may refer the matter to arbitration in accordance with Article 26. In such case the arbitral tribunal is authorized to modify the Agreement to reestablish the economic benefits under the Agreement to Contractor described in Article 32.3 or in the event this is not possible including for example where such dispute would not qualify or constitute a legal dispute under Article 25 of the ICSID Convention to award damages to Contractor that fully compensate it for the loss of economic benefits under the Agreement both historical and future losses.

Government of Guyana Repsol Exploraci6n S.A. ANNEX C ACCOUNTING PROCEDURE This

Annex is part of this Petroleum Agreement hereinafter referred to as the Agreement Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. SECTION 1 GENERAL PROVISIONS

1.1 Definitions For the purpose of this Accounting Procedure the terms used herein which are defined in the Agreement or in the Act shall have the same meaning when used in this Accounting Procedure. 1.2 Documentation Required to be Submitted by the Contractor a The Contractor shall keep the accounts operating records reports and statements relating to the Petroleum Operations i ii in accordance with the terms of the Agreement and this Accounting Procedure; and in such form as may be agreed from time to time between the Parties which shall identify the categories of costs expenses expenditures and credits classified in Sections 2 and 3 of this Annex. b Pcrsaant to above the Contractor shall make quarterly Statements relating o the Petroleum Operations including i Production Statement see Section 5 of this Annex. ii Value of Production and Pricing Statement see Section 6 of this Annex. iii Statement of Expenditures and Receipts see Section 7 of this Atmex. iv Cost Recovery Statement see Section 8 of this Annex. v EndofYear Statement see Section 9 ofthis Annex. vi Budget Statement see Section 10 ofthis Annex. 1.3 Language Units of Account and Exchange Rates a Accounts shall be maintained in Guyanese dollars and United States dollars; however the United States dollars accounts will prevail in case of conflict. Barrels shall be employed for measurements of production of Crude Oil required under the Agreement and this Annex. Standard cubic feet scf shall be employed for measurements of production ofNatural Gas required under the Agreement and this Annex. The language employed shall be English. b Should there be any gain or loss from exchange of currency it will be credited or Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. charged to the accounts under the Agreement. c i Amounts received and costs expenses and expenditures made in cunencies other than United States dollars or Guyanese dollars shall be converted into United States dollars by using the relevant foreign exchange rate published in the Wall Street Journal on the first business day following the Month in which the relevant transaction occurred. ii Amounts received and costs expenses and expenditures made in Guyanese dollars or in United States dollars shall be converted from Guyanese dollars into

United States dollars or from United States dollars into Guyanese dollars on the basis of the average of the buying and selling exchange rates between the currencies in question as determined and published by the Bank of Guyana prevailing on the last Business Day of the Calendar Month preceding the Calendar Month that the relevant transaction occurred. iii The actual exchange rates applied in accordance with subsection 1.3 c ii above and where relevant subsection 1.3 c i above shall be identified in the rele.. ar.. Statements required under SU 1J Seci e 1.2 a of this Annex. 1.4 Payments a b All payments between the Parties under the Agreement shall unless otherwise agreed be made in United States dollars and through a bank designated by the receiving Party. All sums due under the Agreement during any Calendar Month shall for each day such sums are overdue bear interest at the Agreed Interest Rate. 1.5 Audit and Inspection Rights of Government a The Minister shall have the right to audit upon ninety 90 days written notice at his sole cost and expense accounts and records of the Contractor maintained hereunder with respect to each Calendar Year within two 2 years from the end of each such Year. For purposes of auditing the Minister may audit examine and verify at reasonable times during normal business hours but not more than once per Calendar Year all charges and credits relating to the Contractors activities under the Agreement and all books of accounts accounting entries material records and inventories vouchers payrolls invoices and any other documents correspondence and records necessary to audit and verify the charges and credits. During such annual audit examination and verification in respect of each Calendar Year the Minister may review items previously subjected to audit in Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. earlier Years but such review shall i ii iii only be carried out in conjunction with the annual audit for any g1ven Year; and subject to Section 1.5 b no sooner than twelve 12 months following the previous audit thereof; and only be for the purposes of verifying a matter arising in a later period which relates to the earlier Years in question or as specified in Section 1.5 b. In conducting such audits the auditors may physically examine at the sole cost and expense of the Minister property facilities and stocks used in Petroleum Operations wherever located. Such examinations shall take place at reasonable times during normal business hours upon

fifteen 15 days prior notice. b At the conclusion of each audit the Parties shall endeavour to settle outstanding matters and a written report will be issued to the Contractor within sixty 60 days of the conclusion of such audit. The report shall include all claims arising from such audit. The Contractor shall reply to the report in writing as soon as possible and in any event not later than sixty 60 days following receipt of the report indicating acceptance or rejection of the audit claim and in the case of a rejection showing explanations thereof. Should the Minister consider that the report or reply requires further investigation on any item therein the Minister shall have the right to conduct further investigation in relation to such matter within sixty 60 days of its receipt of Contractors reply. If within sixty60 days of the Ministers further investigation the Parties are unable to agree to the disposition of the Ministers audit claim the claim shall be submitted to arbitration in accordance with Article 26 of the Agreement. All adjustments resulting from an audit agreed to by the Contractor and the Minister conducting the audit shall be reflected promptly in the accounts by the Contractor and any consequential adjustments in Crude Oil entitlements shall also be made promptly. In the event that an audit claim by the Minister is not settled to the satisfaction by the Contractors reply as provided for above the Contractor shall be entitled to recover any disputed amounts pending final resolution of the claim. However any subsequent adjustments in the Ministers share of Profit Petroleum following resolution of the claim shall be repaid with interest at the Agreed Interest Rate as Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A . a first claim from Contractors share of future Profit Oil. In the event that the Contractors share of Profit Petroleum is insufficient to provide for the Ministers extra entitlement including interest the Contractor shall promptly make an equivalent payment in United States dollars to the Minister. c Without prejudice to the finality of matters as described in subsections 1.5 a and 1.5 b all documents referred to in those subsections shall be maintained and made available for inspection by the Minister for two 2 years following their date of issue providing however that where issues are outstanding with respect to an audit the Contractor shall maintain documents for a longer period until the issues are resolved. d The Contractor may require that audits hereunder of accounts and records maintained by Affiliated

Companies of the Operator other than any Affiliated Company of the Operator which is conducting a substantial part of the Petroleum Operations on behalf of the Contractor be conducted either by the Operators statutory auditors working under the instruction of the Minister provided such appointment is accepted by the statutory auditors failing which by an independent firm of auditors of international standing to be approved by the Minister. e Nothing herein above provided shall entitle the Minister or his auditors to have access to data and records which i are subject to statutory restrictions on disclosure; or ii do not relate to Petroleum Operations; or iii are not customarily disclosed in auditing practice in the international petroleum industry; provided however that where the Minister or his auditors seek confirmation that charges subject to restricted access under a b and c above have been properly charged under this Agreement and Accounting Procedure they shall be entitled to seek at their sole cost from the statutory auditors of the Contractor or its Affiliated Companies as the case may be certification that such charges have been levied on a fair and reasonable basis.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. SECTION 2

CLASSIFICATION. DEFINITION AND ALLOCATION OF COSTS. EXPENSES AND EXPENDITURES

All costs expenses and expenditures relating to the Petroleum Operations referred to in Section 3 shall be classified defined and allocated as follows 2.1 Exploration Costs are all direct and allocated indirect expenditures incurred in the search for Petroleum in an area which is or was at the time when such costs were incurred in the Contract Area including a Aerial geophysical geochemical paleontological geological topographical and seismic surveys and studies and their interpretation provided the data relates to the Contract Area. b Core hole drilling and water well drilling. c d e f g Labour materials or equipment and services used in drilling Exploration and Appraisal Wells with the object of finding Petroleum or for the purposes of appraising the extent of producible reservoirs already discovered provided such wells are not completed as producing wells. Facilities or allocated portions thereof used solely in support of the purposes described in a b and c above. All General and Administrative Costs Annual Overhead Charges and all Service Costs allocated to Exploration Costs. Any other Contract Costs incurred in the search for and appraisal of Petroleum after the

Effective Date. Annual amounts set forth and paid to GGMC pursuant to Article 19.3 of the Agreement. h Rentals. i Licenses and other fees. 2.2 Development Costs shall consist of all expenditures incurred in a b Drilling wells which are completed as producing wells and drilling wells for purposes of producing from a producible reservoir whether these wells are dry or producing and drilling wells for the injection of water or gas to enhance recovery of Petroleum. Completing wells by way of installation of casing or equipment or otherwise after a well has been drilled for the purpose of bringing the well into use as a producer or as a well for the injection of water or gas to enhance recovery of petroleum. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. c d e f Intangible drilling costs such as labour consumable material and services having no salvage value which are incurred in drilling and deepening of wells for production purposes. The costs of field facilities such as pipelines Dow lines production and treatment units wellhead equipment subsurface equipment enhanced recovery systems offshore platforms petroleum storage facilities. expo11 terminals and p1ers harbours and related facilities and access roads for production activities. Engineering and design studies for field facilities . All General and Administrative Costs Annual Overhead Charges and all Service Costs allocated to Development Costs. 2.3 Operating Costs are all expenditures incurred in the Petroleum Operations which are other than Exploration Costs Development Costs General and Administative Costs and Annual Overhead Charge and Service Costs. The balance of General and Administrative Costs and Service Costs not allocated to Exploration Costs or Development Costs shall be allocated to Operating Costs. 2.4 Service Costs a These are direct and indirect expenditures in support of the Petroleum Operations including but not limited to warehouses piers marine vessels vehicles motorised rolling equipment aircraft fire and security stations workshops water and sewage plants power plants housing community and recreational facilities and furniture tools and equipment used in these activities and safety and security services. Service Costs in any Calendar Year shall include the total costs incurred in such Year to purchase and/or construct said facilities as well as the annual costs to maintain and operate the same. b All Service Costs will be allocated to Exploration Costs Development Costs and

Operating Costs in accordance with standard industry accounting practice or on an equitable basis otherwise agreed between the Minister and the Contractor.

2.5 General and Administrative Costs and Annual Overhead Charge

a b General and Administrative Costs are all general and administrative costs in respect of the local office or offices including but not limited to supervisory accounting and employee relations services but which are not otherwise recovered. An Annual Overhead Charge for services rendered outside Guyana and not otherwise charged under the Contractors activities under the Agreement and for staff advice and assistance including but not limited to financial legal accounting and employee relations this Accounting Procedure for managing Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. services. For the period from the Effective Date until the date on which the first Petroleum Production Licence under the Agreement is granted by the Minister this annual charge shall be five percent 5 of the Contract Costs including those covered in subsections 2.1 through 2.5a incurred during the Calendar Year. From the date of grant of the Petroleum Production Licence the Annual Overhead Charge will be First US1 0000000.of Contract Costs Next US1 0000000.of Contract Costs 5 3 In excess ofUS20000000.ofContract Costs 1.5 c All General and Administrative Costs and Annual Overhead Charge will be allocated to Exploration Costs Development Costs and Operating Costs in accordance with standard industry accounting practice or on an equitable basis otherwise agreed between the Minister and the Contractor. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A.

SECTION 3 COSTS EXPENSES EXPENDITURES AND CREDITSOFTHE CONTRACTOR

3 .I Costs Recoverable Without Further Approval of the Minister Subject to the provisions of the Agreement the Contractor shall bear and pay the following costs and expenses in respect of the Petroleum Operations. These costs and expenses will be classified w1der the headings referred to in Section 2. They are all recoverable as Contract Costs by the Contractor under the Agreement.

a Surface Rights This covers all costs attributable to the acquisition renewal or relinquishment of surface rights acquired and maintained in force for the Contract Area including any amounts payable pursuant to Article 10 of the Agreement.

b Labour and Associated Labour

Costs i ii iii iv v Gross salaries and wages including bonuses of the employees of the Parties comprising the Contractor directly engaged in the Petroleum Operations irrespective of the location of such employees it being understood that in the case of k. e personnel only a portion of vhs time is wholly dedicated to Petroleum Operations only that prorata portion of applicable wages and salaries will be charged. Costs regarding holiday vacation sickness and disability payments applicable to the salaries and wages chargeable under i above. Expenses or contributions made pursuant to assessments or obligations imposed under the laws of the Republic of Guyana which are applicable to cost of salaries and wages chargeable under i above. Cost of established plans for employees life insurance hospitalisation pensions and other benefits of a similar nature customarily granted to the employees of the Parties comprising the Contractor. Reasonable travel and personal expenses of such employees including those made for travel and relocation of the Expatriate Employees assigned to the Republic of Guyana all of which shall be in accordance with the nonnal practice of the Parties comprising the Contractor. vi Any personal income taxes owing to the Republic of Guyana by employees of the Parties comprising Contractor and paid or reimbursed by a Party comprising the Contractor. c Transportation Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. The cost of transportation of employees equipment materials and supplies necessary for the conduct of the Petroleum Operations. d Charges for Services i Third Patiyy Contracts The actual costs of contracts for technical and other services entered into by the Contractor for the Petroleum Operations made with third parties other than Affiliated Companies of the Contractor are recoverable; provided that the prices paid by the Contractor are competitive with those generally charged by other international or domestic suppliers for comparable work and services. ii Affiliated Companies Without prejudice to the charges to be made in accordance with subsection 2.5 in the case of services rendered to the Petroleum Operations by an Affiliated Company the charges will be no higher than the usual prices charged by the Affiliated Company to third parties for comparabe servis under similar terms and coditions elsewhere and will be fair and reasonable in the light of prevailing international oil industry practice and conditions. The salaries

wages and related costs of employees of an Affiliated Company that are temporarily or permanently assigned in Guyana and are directly engaged in Petroleum Operations shall be chargeable to the project at their actual documented cost. The salaries wages and related costs of employees of an Affiliated Company that are temporarily or pennanently outside of Guyana and are directly engaged in Petroleum Operations shall be chargeable to the project at their actual documented cost. Costs for salaries wages and related costs shall be charged to the project on an actual basis or at a rate based upon the average cost in The accordance with methodology of determining rates based on average cost shall be provided to the Government upon their request. Such rates may be reviewed at least annually with the Minister. Reasonable actual documented expenses including travel costs of those employees whose salaries and wages are chargeable to the project and are reimbursed by the Contractor under their usual practice shall also be charged to the project. the Affiliated Companys usual practice. e Material i So far as is practicable and consistent with efficient and economical operation only such material or equipment shall be purchased or furnished by the Contractor for use in the Petroleum Operations as may be required Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. for use in the reasonably foreseeable future and the accumulation of surplus stocks shall be minimized. ii The Contractor does not warrant material beyond the suppliers or manufacturers guarantee express or implied and in case of defective material or equipment any adjustment received by the Contractor from the suppliersmanufacturers or their agents will be credited to the accounts under the Agreement. iii a Except as provided in b below material purchased by the Contractor for use in the Petroleum Operations shall be valued to include invoice price less trade and cash discounts if any purchase and procurement fees plus freight and forwarding charges between point of supply and point of shipment freight to port of destination insurance taxes custom duties consular fees other items chargeable against imported material and where applicable handling and transportation expenses from point of importation to warehouse or operating site and cost of the material in question length should not exceed those prevailing transactions on the open market for material of similar quality and supplied on similar

terms at the time of procurement. in normal arms b Material purchased from Affiliated Companies of the Parties comprising Contractor shall be charged at the prices specified at 1 and 2 hereof. 1 New Material Condition A Shall be valued and invoiced at a price which should not exceed length transactions on the open market at the time of procurement. the price prevailing in normal arms 2 Used Material Conditions B and C i is is suitable in sound and serviceable Material which condition and reuse without reconditioning shall be classified as Condition B and priced at not more than seventyfive percent 75 of the price of new material defined in 1 above. for ii Material which cannot be classified as Condition B but which a Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. reconditioning will after further serviceable for original function as good be b secondhand material Condition B or for shall reconditioning; is serviceable for original function but not suitable be classified as Condition C and priced at not more than fifty percent 50 of the current price of new material Condition A as The cost of defined the to reconditioning shall be charged reconditioned material provided that the Condition C material value plus the cost of reconditioning does not exceed the value of Condition B material. 1 above. in iii Material which cannot be classified as Condition B or Condition C shall be priced at a value commensurate with its use. iv When the use of material is temporary and its service to the Petroleum Operations does not justify the reduction in price as provi drd for in 2 ii hereof such material shall be priced on a basis that will result in a net charge to the accounts under the Agreement consistent with the value of the service rendered. f Rentals Duties and Other Assessments All rentals taxes levies charges fees contributions and any other assessments and charges levied by the Government in connection with the Petroleum Operations and paid directly by the Contractor. g Insurance and Losses Insurance premium and cost incurred for insurance pursuant to Article 20 provided that if such insurance is wholly or partly placed with an Affiliated Company of the Parties comprising the Contractor such premium and costs shall be recoverable only to the extent generally charged by competitive insurance companies other than an Mfiliated Company of a Party comprising the Contractor. Costs losses and damages incurred to the extent not made good by insurance are recoverable including costs losses or

damages resulting from the indemnities in Article 2 of the Agreement unless such costs losses or damages have resulted solely from an act of willful misconduct or gross negligence of the Contractor.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A.

h Legal Expenses All costs and expenses of litigation and legal or related services necessary or expedient for the procuring perfecting retention and protection of the Contract Area and in defending or prosecuting lawsuits involving the Contract Area or any third party claim arising out of activities under the Agreement or sums paid in respect of legal services necessary or expedient for the protection of the interest of the Parties are recoverable. Where legal services are rendered in such matters by salaried or regularly retained lawyers of the Contractor or an Affiliated Company of the Parties comprising Contractor such compensation will be included instead under subsection 3.1b or 3.1d above as applicable.

i Training Costs All costs and expenses incurred by the Contractor in training of Guyanese personnel and such other amounts as may be expended on training under Article 19 of the Agreement.

j General and Administrative Costs and Annual Overhead Charge The costs described in subsection 2.5a and the charge described in subsection 2.5b.

k PreContract Costs The sum of one million United States Dollars US1000000. in respect of all costs and expenses incurred by Contractor prior to the Effective Date.

1 Interest and Financing Costs Interest expenses and related fees incurred on loans raised by the Parties comprising the Contractor for Petroleum Operations and other financing costs provided that such expenses fees and costs are consistent with market rates.

m Abandonment Costs Amortized abandonment costs calculated pursuant to Article 20.1diii.

n Social project contributions Costs and expenses not exceeding two million United States Dollars 2000000US. in any given Year incurred by Contractor in social programmes in the influence area of the Licence.

Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A.

3.2 Costs Recoverable only with Approval of the Minister

a Costs and expenses exceeding two million United States Dollars 2000000US in any given Year incurred by Contractor in social programmes in the influence area of the Licence.

b Donations and charitable contributions to recognized organisations in Guyana.

c Expenditure on research into and

development of new equipment material and techniques for use in searching for developing and producing petroleum which will be of benefit to Petroleum Operations.

3.3 Costs not Recoverable under the Agreement

a With the exception of the sum specified in subsection 3.1k costs incurred before the Effective Date.

b c d e Petroleum marketing or transportation costs of Petroleum beyond the Delivery Point.

f Amounts paid under Article 3.2 of the Agreement if any and other amounts paid with regard to nonfulfillment of contractual obligations subject to Section 3.1g.

g Costs of arbitration and the sole expert in respect of any dispute under the Agreement.

h Fines and penalties imposed by Courts of Laws of the Cooperative Republic of Guyana.

i Payments made in accordance with Article 15.4 of the Agreement.

j Costs incurred as a result of willful misconduct or gross negligence of the Contractor or failure to insure where insurance is required pursuant to Article 20.2a of the Agreement.

3.4 Other Costs and Expenses

Other costs and expenses not covered or dealt with in the provisions of this Section 3 and which are incurred by the Contractor in the conduct of the Petroleum Operations are recoverable subject to the approval of the Minister.

3.5 Credits under the Agreement

The net proceeds of the following transactions will be credited to the Accounts under the Agreement and shall reduce the amount of Contract Costs which the Contractor is Petroleum Agreement Government of Guyana Repsol Exploración S.A. entitled to recover from Cost Petroleum by a corresponding amount

a b c d e f g h The net proceeds of any insurance or claim in connection with the Petroleum Operations or any assets charged to the accounts under the Agreement when such operation or assets were insured and the premium charged to the accounts under the Agreement.

i Revenue received from third parties for the use of property or assets the cost of which has been charged to the accounts under the Agreement.

j Any adjustment received by the Contractor from the suppliers/manufacturers or their agents in connection with defective material the cost of which was previously charged to the accounts under the Agreement.

k Rentals refunds or other credits received by the Contractor which apply to any charge which has been made to the accounts under the Agreement including any costs and expenses previously charged to the accounts pursuant to subsection 3.1 h and which have been successfully recouped from legal proceedings

but excluding any award granted to the Contractor under arbitration or sole expert proceedings referred to in subsection 3.3d above. The value at the time of export of inventory materials subsequently exported from the Cooperative Republic of Guyana without being used in the Petroleum Operations the acquisition costs of which have been charged to the accounts under the Agreement. The proceeds from the sale or exchange by the Contractor of materials equipment plant or facilities the acquisition costs of which have been charged to the accounts under the Agreement including such items sold to the Government; The proceeds from the sale of Petroleum Data which relates to the Contract Area provided that the acquisition costs of such rights and information have been charged to the accounts under the Agreement; The proceeds derived from the sale or licence of any intellectual property the development costs of which have been charged to the accounts under the Agreement.

3.6 Duplication of Charges and Credits Notwithstanding any provision to the contrary in this Accounting Procedure it is the intention that there shall be no duplication of charges or credits to the accounts under the Agreement.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. SECTION 4 RECORDS AND VALUATION OF ASSETS The Contractor shall maintain detailed records of property in use for the Petroleum Operations in accordance with normal practice in exploration and production activities of the international petroleum industry. The Contractor shall notify the Minister annually in writing of all assets acquired and all assets disposed of during the preceding twelve 12 months. At reasonable intervals but at least once a year with respect to moveable assets and once every three 3 years with respect to immovable assets inventories of the property under the Agreement shall be taken by the Contractor. The Contractor shall give the Minister at least thirty 30 days written notice of its intention to take such inventory and the Minister shall have the right to be represented when such inventory is taken . The Contractor will state clearly the principles upon which valuation of the inventory has been based. When an assignment of rights under the Agreement takes place a special inventory may be taken by the Contractor at the request of the assignee provided that the costs of such inventory are borne by the assignee.

Petroleum Agreement Government of Guyana Repsol Exploración S.A. SECTION 5

PRODUCTION STATEMENT 5.1 Upon commencement of production of Petroleum from the Contract Area the Contractor shall submit a monthly Production Statement to the Minister showing the following information separately for each Field and in aggregate for the Contract Area. a The gross quantity of Crude Oil and Natural Gas produced. b The quantities of Crude Oil and Natural Gas used for the purpose of carrying on Petroleum Operations including drilling and Production Operations and pumping to Field storage. c Quantities of Crude Oil and Natural Gas lost. d The quantities of Natural Gas flared. e The quantity of Crude Oil produced and saved. f The quantity of Natural Gas produced and saved. g h i G The quantity of stocks of Crude Oil held at the beginning of the Calendar Month in question. The quantity of stocks of Crude Oil held at the end of the Calendar Month in question. The number of days in the Month during which Petroleum was produced from each Field. The average daily production rate for each Field calculated in accordance with Article 11.6 of the Agreement. 5.2 The Production Statement for each Calendar Month shall be submitted to the Minister not later than sixty 60 days after the end of such Calendar Month. Petroleum Agreement Government of Guyana Repsol Exploracion S.A. SECTION 6 VALUE OF PRODUCTION AND PRICING STATEMENT 6.1 The Contractor shall for the purposes of Article 13 of the Agreement prepare a statement providing calculations of the value of Crude Oil and the value of the Natural Gas produced and saved during each Calendar Month for each Field . This statement which shall be prepared for each quantity of Crude Oil and the Natural Gas produced from the Contract Area shall contain the following information a b The quantities prices and receipts realised therefor by the Contractor as a result of Third Party Sales of Crude Oil and the Natural Gas made during the Calendar Month in question. The quantities prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and the Natural Gas made during the Calendar Month in question other than Third Party Sales. c The percentage of total volume of Crude Oil sales which were Third Party Sales. d e The percentage of total volume of Natural Gas sales which were Third Party Sales. Information supplied to the Minister by Contractor for the purposes of Article 13.2 of the Agreement.

SECTION 6 VALUE OF PRODUCTION AND PRICING STATEMENT

6.1 The Contractor shall for the purposes of Article 13 of the Agreement prepare a statement providing calculations of the value of Crude Oil and the value of the Natural Gas produced and saved during each Calendar Month for each Field . This statement which shall be prepared for each quantity of Crude Oil and the Natural Gas produced from the Contract Area shall contain the following information a b The quantities prices and receipts realised therefor by the Contractor as a result of Third Party Sales of Crude Oil and the Natural Gas made during the Calendar Month in question. The quantities prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and the Natural Gas made during the Calendar Month in question other than Third Party Sales. c The percentage of total volume of Crude Oil sales which were Third Party Sales. d e The percentage of total volume of Natural Gas sales which were Third Party Sales. Information supplied to the Minister by Contractor for the purposes of Article 13.2 of the Agreement.

6.2 The Value of Production and Pricing Statement for each Calendar Month shall be submitted to

the Minister not later than sixty 60 days after the end of such Calendar Month. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. SECTION 7 STATEMENT OF EXPENDITURE AND RECEIPTS 7.1 The Contractor shall prepare with respect to each Calendar Quarter or on a monthly basis if requested by the Minister in writing a Statement of Expenditure and Receipts under the Agreement. The Statement will distinguish between Exploration Costs Development Costs and Operating Costs consistent with the individual categories specified in Sections 2 and 3 herein and will separately identify major items of expenditures within these categories. The statement will show the following a Actual expenditures and receipts on a monthly basis for the period in question. b Cumulative expenditure and receipts for the budget year in question. c Cumulative expenditures and receipts since the Effective Date. d Latest forecast of cumulative expenditures to year end. e Variations between budget forecast and latest forecast with explanations thereof. 7.2 Subject to 7.1 the Statement of Expenditure and Receipts shall be submitted to the Minister no later hJ1 si SO days after the end of such C ledar Qumier or Month as the case may be. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. SECTION 8 COST RECOVERY STATEMENT 8.1 The Contractor shall prepare with respect to each Calendar Month a Cost Recovery Statement containing the following information a Recoverable Contract Costs carried forward from the previous Month if any. b Recoverable Contract Costs for the Month in question. c d Total Recoverable Contract Costs which is that cost at subsection 8.1 a plus that cost at subsection 8.1 b. Quantity and value of Cost Petroleum taken and disposed of by the Contractor for the Month in question. e Contract Costs recovered for the Month in question. 8.2 8.3 8.4 f Total cumulative amount of Contract Costs to be carried forward into the next Month. TI infr..tion to besubmitted under Se tic1 8.1 d and e above shal t.Je g r. in separate statements for each Field so as to indicate together the Contractors total allocation of Cost Oil as required under Article 11 of the Agreement. The Cost Recovery Statement to be submitted under subsection 8.1 shall identify the unrecovered cost of assets for the purpose of Article 20.1 b iii of the Agreement. During the Production Period the Cost Recovery Statement for each Month shall be submitted to the Minister

no later than sixty60 days after the end of such Month and twice a year during the Exploration Period not later than 90 days after the end of each calendar semester. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A . SECTION 9 ENDOFYEAR STATEMENT 9.1 The Contractor shall prepare an EndofYear Statement. The Statement will contain aggregated information for the Year in the same format as required in the Value of Production and Pricing Statement Cost Recovery Statement and Statement of Expenditures and Receipts but will be based on actual quantities of Petroleum produced and expenses incurred. The Endof Year Statement for each Calendar Year shall be submitted to the Minister within one hundred and twenty 120 days of the end of such Calendar Year. a Crude Oil i the Domestic Supply Report describing In the event the domestic supply obligations under Article 17 are effected by the Government as to Crude Oil not later than one hundred and twenty 120 days after the end of each Calendar Year the Minister acting on behalf of the Government shall make available to Contractor an amtual summary the Governments total entitlement from all Crude Oil production in Guyana during the prior Calendar Year b the quantity of Crude Oil actually provided to the Government by Contractor and all third parties which produce Cr.dc Oil in Guyana during the priJr C;ar Year and c a description of the quantities and use of all Crude Oil provided to the Government by Contractor and all third parties which produce Crude Oil in Guyana including without limitation domestic power supply from power plant facilities refined products for domestic consumption from refineries etc. and any quantities of Crude Oil refined products petrochemicals or fuel for power generation that are exported from Guyana. a b Nat ural Gas i In the event the domestic supply obligations under Article 17 have been effected by the Government as to Natural Gas not later than one hundred and twenty 120 days after the end of each Calendar Year the Minister acting on behalf of the Government shall make available to Contractor an annual summary the Domestic Supply Report describing a the Governments total entitlement from all Natural Gas production in Guyana during the prior Calendar Year b the quantity ofNatural Gas actually provided to the Government by Contractor and all third parties which produce Natural Gas in Guyana during the prior Calendar Year and c a description of the quantities and use

of all Natural Gas provided to the Government by Contractor and all third parties which produce Natural Gas in Guyana including without limitation domestic residential commercial and industrial consumption fuel used for domestic power generation etc. or and any quantities of Natural Gas liquefied or compressed in Guyana Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. for export or used as feedstock for petrochemical exports such as methanol and fe1iilizer. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. SECTION 10 BUDGET STATEMENT 1 0.1 The Contractor shall prepare an armual budget pursuant to Article 7 of the Agreement the Budget Statement. The Budget Statement will distinguish between Exploration Costs Development Costs and Operating Costs consistent with the individual categories speciied in Sections 2 and 3 and will show the following a Forecast expenditures and receipts under the Agreement for the Calendar Year. b Cumulative expenditures and receipts to the end of the said Year. Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. ANNEX D PreApproved and Certified Petroleum Operations Items A As stimulation chemicals used downhole or injected in oilgas formations Acoustical survey equipment including sonar side scanning sonar full wave form sonic loggers Aeromagnetic recording survey systems Air slips also known as tubing slips All terrain vehicles A TVs Automated equipment at the wellhead processing plant or refinery used to monitor and control production B Bags cloth with printed tags used in well testing Bails links Barrel chemical mixing when used at the wellhead Batteries for production machinery and equipment Batteries geophysical when used exclusively for seismic prospecting in blasting and recording systems Bits drill includes PDCs tricones Blasting systems used for seismic prospecting Blowout ignition system Blowout preventers BOPs Boxes shipping used in well testing core Building portable Building support when used as weatherrelated protective covering for equipment such as electrical generators or instrumentation Buildings that provide ufr... or dwelling space; geologist lab Itailcrs; skidmounted living trailers Bulldozers earth moving equipment c Cable electrical Cable wire rope Cables electrical integrated into machinery Cables used for seismic prospecting Calibration gas for H2S monitors and H2S analyzers Casing Casing accessories Catwalks see Scaffolding Cement

oilwell Cementing equipment Centralizers casing attachment Centrifuge used to remove fine drill solids from mud systems Chemical mixing barrel when used at the wellhead Chemical storage drums when used at the manufacturing or processing site Chemicals used in drilling and production operations Chemicals used in refining operations Choke manifold and valves Circulating system includes discharge and return lines Circulating systems includes mud tanks mud mixers discharge and return lines and separators Cleanersdegreasers includes oilfield equipment Cloth bags with printed tags used in well testing Coil tubing Coil tubing reel Collars drilling Communication equipment includes satellite communications equipment Annex D Page I Petroleum Agreement Government of Guyana Repsol Exploraci6n S.A. Compressors for compression of air or natural gas Computers to monitor productiondrilling machinery and equipment Consumables consumable equipment used in drilling and production operations Control panels used to run generators at a well head Core boxes Corrosion inhibitors added to upstream installations for preventative maintenance Couplings Custom software designed for and integrated into drilling and production machinery or equipment D Data processing units used for seismic prospecting DC electric motors integrated used to drive the drawworks mud pumps or top drives also commonly called traction motors Deflocculants used in fresh water mud systems Dehydration chemicals Dehydrators including mole sieve used at the well head ; used during the production testing phase Demulsifiers used in production operations to remove water from crude oil Density counters spectral gammagamma Detectors flame when used during the production testing phase as an alternative to a flare stack Diesel power generating systems Discharge and return lines Dispersants production chemicals Distribution panel electrical that controls the electrical distribution for the entire rig package Dope pipe Drift fM casing tubing and line pipe Drill bits. includes tricone PDCs Polycrystalline Diamond Compact Drill collar handling equipment Drill collars used in exploration and development drilling Drill line spool wire rope Drill pipe used in exploration and development drilling Drill pipe handling equipment Drill stem testing equipment includes instrumentation Drilling detergent; muds; surfactants Drilling Rigs and associated equipment Onshore and Offshore Drilling fluid chemicals used to create drilling fluid see

mud Drills all drills used exclusively for seismic prospecting includes heli enviro LIS track truck buggy Drives top rotary and pump Drums for chemical storage when used at the manufacturing or processing site E EDR system only an EDR and the embedded dedicated computer equipment that is integrated into the unit used at the drilling site Electric generators and alternators Electric logging equipment Electrical cable distribution panel electrical generating systems Electrical distribution panel Electrical generating systems integrated Electrical submersible pumps ESP for artificial lift of petroleum Electrical surveying equipment Electrical thermostats Electromagnetic surveying equipment includes time and frequency domain induced polarization equipment Emergency gas shut off devices Petroleum Agreement Government of Guyana Repsol Explorac i6n S.A. NO.969798128129130131132133134135138139141142 This Contract made this 2nd day of March
2007 betweenThe President of India acting through the Joint Secretary Ministry of Petroleum and
Natural Gas hereinafter referred to as the Government of the FIRST PART;Ms Oil India Limited a
Company incorporated under the Companies Act 1956 having its corporate office at 5 Sikandra
Road New Delhi 10001 hereinafterreferred to as OIL which expression shall include its successors
and such assigns as are permitted under Article 28 hereof of the SECOND PART;ANDMs
GeoGlobal Resources Barbados Inc. a Company incorporated under the laws of Barbados West
Indies having its registered office at 310 605 1 Street SWCalgary Alberta Canada T2P 3S9
hereinafter referred to as GGRB which expression shall include its successors and such assigns as
are permitted under Article 28hereof of the THIRD PART;ANDWITNESSETHWHEREAS1 2 3 4 5 6
The Oilfields Regulation and Development Act 1948 53 of 1948 hereinafter referred to as the Act
and the Petroleum and Natural Gas Rules 1959 made thereunderhereinafter referred to as the
Rules make provisions inter alia for the regulation of Petroleum Operations and grant of Licenses
and Leases for explorationdevelopment and production of Petroleum in India;The Rules provide for
the grant of Licenses and Leases in respect of land vested in a State Government by that State
Government with the prior approval of theCentral Government;Rule 5 of the Rules provides for an
agreement between the Central Government and the Licensee or Lessee containing additional
terms and conditions with respect tothe License or Lease;The Government desires that the
Petroleum resources which may exist in India be discovered and exploited with the utmost

expedition in the overall interest of India and in accordance with modern oilfield and petroleum industry practices; OILGGRB have committed that it has they have or will acquire and make available the necessary financial and technical resources and the technical and industrial competence and experience necessary for proper discharge and performance of all obligations required to be performed under this Contract in accordance with modern oilfield and petroleum industry practices and will provide guarantees as required in Article 29 for the due performance of its obligations hereunder; and As a result of discussions between representatives of the Government and OILGGRB on the proposal of OILGGRB the Government has agreed to enter into this Contract with OILGGRB with respect to the Contract Area identified as block RJONN20042 and detailed in Appendix A and Appendix B on the terms and conditions herein set forth. NOW THEREFORE in consideration of the premises and covenants and conditions herein contained IT IS HEREBY AGREED between the Parties as follows

ARTICLE 1 DEFINITIONS

In this Contract unless the context requires otherwise the following terms shall have the meaning ascribed to them hereunder

Accounting Procedure means the principles and procedures of accounting set out in Appendix C.

Act means Oilfields Regulation and Development Act 1948 as amended from time to time.

Affiliate means a company or a body; a which directly or indirectly controls or is controlled by a Company which is a Party to this Contract; or b which directly or indirectly controls or is controlled by a company which directly or indirectly controls or is controlled by a Company which is a Party to this Contract. For the purpose of this definition it is understood that control means i ownership by one company of more than fifty percent 50 of the voting securities of the other company; or ii the power to direct administer and dictate policies of the other company even where the voting securities held by such company exercising such effective control in that other company is less than fifty percent 50 and the term controlled shall have a corresponding meaning.

Appendix means an Appendix attached to this Contract and made a part thereof.

Appraisal Programme means a programme carried out following a Discovery in the Contract Area for the purpose of appraising Discovery and delineating the Petroleum Reservoirs to which the Discovery relates in terms of thickness and lateral extent and

determining the characteristics thereof and the quantity of recoverable Petroleum therein. Appraisal Well means a Well drilled pursuant to an Appraisal Programme. Approved Work Programme and Approved Budget means a Work Programme or a Budget that has been approved by the Management Committee pursuant to the provisions of this Contract.

1.1 1.2 1.3 1.4 1.5 1.6 1.7 1.8 1.9 1.10 1.11 1.12 1.14 1.15 1.16 1.17 Arms Length Sales means sales made freely in the open market in freely convertible currencies between willing and unrelated sellers and buyers and in which such buyers and sellers have no contractual or other relationship directly or indirectly or any common or joint interest as is reasonably likely to influence selling prices and shall inter alia exclude sales whether direct or indirect through brokers or otherwise involving Affiliates sales between Companies which are Parties to this Contract sales between governments and government owned entities counter trades restricted or distress sales sales involving barter arrangements and generally any transactions motivated in whole or in part by considerations other than normal commercial practices. Article means an article of this Contract and the term Articles means more than one Article. Associated Natural Gas or ANG means Natural Gas produced in association with Crude Oil either as free gas or in solution if such Crude Oil can by itself be commercially produced. Barrel means a quantity or unit equal to 158.9074 litres forty two 42 United States gallons liquid measure at a temperature of sixty 60 degrees Fahrenheit 15.56 degrees Celsius and under one atmosphere pressure 14.70 psia. Basement means any igneous or metamorphic rock or rocks or any stratum of such nature in and below which the geological structure or physical characteristics of the rock sequence do not have the properties necessary for the accumulation of Petroleum in commercial quantities and which reflects the maximum depth at which any such accumulation can be reasonably expected in accordance with the knowledge generally accepted in the international petroleum industry.

1.13 Budget means a budget formulated in relation to a Work Programme. Business Day means any of the Calendar Day excluding holidays. Calendar Day means any of the seven 7 days of a week. Calendar Month means any of the twelve 12 months of the Calendar Year. Calendar Quarter or Quarter means a period of three 3 consecutive Calendar Months commencing on the first day of

January April July and October of each Calendar Year. 1.18 1.19 1.20 1.21 1.22 1.23 1.24 1.25 1.26
1.27 Calendar Year means a period of twelve 12 consecutive Months according to the Gregorian
calendar commencing with the first 1st day of January and ending with the thirtyfirst 31st day of
December. Commercial Discovery means a Discovery of Petroleum reserves which has been
declared as a Commercial Discovery in accordance with the provisions of Article 10 and Article
21. Commercial Production means production of Crude Oil or Condensate or Natural Gas or any
combination of these from the Contract Area excluding production for testing purposes and delivery
of the same at the relevant Delivery Point under a programme of regular production and
sale. Company for the purpose of this Contract means a company which is a Party to this Contract
and where more than one Company is Party to the Contract the term Companies shall mean all such
Companies collectively including their respective successors and permitted assigns under Article
28. Condensate means those low vapour pressure hydrocarbons obtained from Natural Gas through
condensation or extraction and refers solely to those hydrocarbons that are liquid at normal surface
temperature and pressure conditions provided that in the event Condensate is produced from a
Development Area and is segregated at the Delivery Point or transported then the provisions of this
Contract shall apply to such Condensate as if it were Crude Oil. Contract means this agreement and
the Appendices mentioned herein and attached hereto and made an integral part hereof and any
amendments made thereto pursuant to the terms hereof. Contract Area means on the Effective Date
the area described in Appendix A and delineated on the map attached as Appendix B or any portion
of the said area remaining after relinquishment or surrender from time to time pursuant to the terms
of this Contract including any additional area as provided under Article 11.3. Contract Costs means
Exploration Costs Development Costs and Production Costs as provided in Section 2 of the
Accounting Procedure and allowed to be cost recoverable in terms of Section 3 of the Accounting
Procedure. Contract Year means a period of twelve 12 consecutive months counted from the
Effective Date or from the anniversary of the Effective Date. Contractor means the Companyies. 1.28
1.29 1.30 1.31 1.32 1.33 1.34 Cost Petroleum means the portion of the total value of Petroleum

Produced and Saved from the Contract Area which the Contractor is entitled to take in a particular period for the recovery of Contract Costs as provided in Article 15. Crude Oil or Oil or Crude means all kinds of hydrocarbons and bitumen both in solid and in liquid form in their natural state or obtained from Natural Gas by condensation or extraction including distillate and Condensate when commingled with the heavier hydrocarbons and delivered as a blend at the Delivery Point but excluding Natural Gas. Deepwater Area for deepwater blocks areas means area falling beyond four hundred 400 metre isobath. Delivery Point means except as otherwise herein provided or as may be otherwise agreed between the Parties having regard to international practice the point at which Petroleum reaches the outlet flange of the delivery facility either offshore or onshore and different Delivery Points may be established for purposes of sales. Delivery Points shall be approved by the Management Committee. Development Area means part of the Contract Area which encompasses one or more Commercial Discoveries and any additional area that may be required for proper development of such Commercial Discoveries and established as such in accordance with the provisions of the Contract. Development Costs means those costs and expenditures incurred in carrying out Development Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof. Development Operations means operations conducted in accordance with the Development Plan and shall include but not be limited to the purchase shipment or storage of equipment and materials used in developing Petroleum accumulations the drilling completion and testing of Development Wells the drilling and completion of Wells for Gas or water injection the laying of gathering lines the installation of offshore platforms and installations the installation of separators tankages pumps artificial lift and other producing and injection facilities required to produce process and transport Petroleum into main Oil storage or Gas processing facilities either onshore or offshore including the laying of pipelines within or outside the Contract Area storage at Delivery Points the installation of said storage or Gas processing facilities the installation of export and loading facilities and other facilities required for the development and production of the said Petroleum accumulations and for

the delivery of Crude Oil and Gas at the Delivery Point and also including incidental operations not specifically referred to herein but required for the most efficient and economic development and production of the said Petroleum accumulations in accordance with modern oilfield and petroleum industry practices. 1.35 1.36 1.37 1.38 1.39 1.40 1.41 1.42 1.43 the development of a Commercial Discovery which has been approved by the Management Committee or the Government pursuant to Article 10 or Article 21. Development Plan means a plan submitted by the Contractor for Development Well means a Well drilled deepened or completed after the date of approval of the Development Plan pursuant to Development Operations or Production Operations for the purposes of producing Petroleum increasing production sustaining production or accelerating extraction of Petroleum including production Wells injection Wells and dry Wells. Directorate General of Hydrocarbons or DGH means an organisation including its successors under the Ministry of Petroleum and Natural Gas. Discovery means the finding during Petroleum Operations of a deposit of Petroleum not previously known to have existed which can be recovered at the surface in a flow measurable by conventional petroleum industry testing methods. Discovery Area means that part of the Contract Area about which based upon Discovery and the results obtained from a Well or Wells drilled in such part the Contractor is of the opinion that Petroleum exists and is likely to be produced in commercial quantities. Effective Date means the later of the date on which this Contract is executed by the Parties or the date of issue of License or date from which License has been made effective by the Central Government or State Governments as the case may be. Environmental Damage means soil erosion removal of vegetation destruction of wildlife pollution of groundwater or surface water land contamination air pollution noise pollution bush fire disruption to water supplies to natural drainage or natural flow of rivers or streams damage to archaeological palaeontological and cultural sites and shall include any damage or injury to or destruction of soil or water in their physical aspects together with vegetation associated therewith aquatic or terrestrial mammals fish avifauna or any plant or animal life whether in the sea or in any other water or on in or under land. Exploration Costs means those costs and expenditures incurred in carrying out Exploration Operations as

classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof. Exploration Operations means operations conducted in the Contract Area pursuant to this Contract in searching for Petroleum and in the course of an Appraisal Programme and shall include but not be limited to aerial geological geophysical geochemical palaeontological palynological topographical and seismic surveys analysis studies and their interpretation investigations relating to the subsurface geology including structural test drilling stratigraphic test drilling of Exploration Wells and Appraisal Wells and other related activities such as surveying drill site preparation and all work necessarily connected therewith that is conducted in connection with Petroleum exploration. Exploration Period means the period mentioned in Article 3 during which Exploration Operations may be carried out by the Contractor as provided in Article 3 hereof. Exploration Phase or Phase means any of the periods specified in Article 3 in which the Contractor is required to complete the Minimum Work Programme specified therein. Exploration Well means a Well drilled for the purpose of searching for undiscovered Petroleum accumulations on any geological entity be it of structural stratigraphic facies or pressure nature to at least a depth or stratigraphic level specified in the Work Programme. Field means an Oil Field or a Gas Field or combination of both as the case may be. Financial Year means the period from the first 1st day of April to the thirtyfirst 31st day of March of the following Calendar Year. Foreign Company means a Company within the meaning of Section 591 of the Companies Act 1956. Frontier Area means any area identified demarcated and so notified by the Government or its authorised agencies for the purpose of exploration and exploitation of Oil and Gas which is logistically and technically difficult and lacks infrastructural and/or marketing facilities etc. 1.44 1.45 1.46 1.47 1.48 1.49 1.50 1.51 Gas means Natural Gas. 1.52 1.53 1.54 Gas Field means within the Contract Area a Natural Gas Reservoir or a group of Natural Gas Reservoirs within a common geological structure or feature. Government or Central Government means Government of India unless otherwise stated. Investment shall have the meaning ascribed to that expression in paragraph 3 of Appendix D. 1.55 1.56 1.57 1.58 1.59 1.60 1.61 1.62 1.63 1.64 1.65 1.66 Investment Multiple means the ratio of

accumulated Net Cash Income to accumulated Investment by the Contractor as determined in accordance with Appendix D. Lease means a petroleum mining lease referred to in the Rules and shall unless otherwise stated therein exclude right for exploration and exploitation of coal lignite bed methane CBM. Lessee means the Contractor to whom a Lease is issued under the Rules for the purpose of carrying out Petroleum Operations in a Development Area or Contract Area. LIBOR means the London InterBank Offer Rate for six month maturates of United States Dollars as quoted by the International Swaps and Derivative Association or such other bank being a BBA LIBOR contributor panel bank as the Parties may agree. License means a petroleum exploration license referred to in the Rules. Licensee means the Contractor to whom a License is issued under the Rules for the purpose of carrying out Petroleum Operations in the Contract Area. Minimum Work Programme means with respect to each Exploration Phase the Work Programme specified in Article 5 with respect to such Phase. Management Committee means the committee constituted pursuant to Article 6 hereof. Month means Calendar Month. Natural Gas means wet gas dry gas all other gaseous hydrocarbons and all substances contained therein including sulphur carbon dioxide and nitrogen but excluding extraction of helium which are produced from Oil or Gas Wells excluding those condensed or extracted liquid hydrocarbons that are liquid at normal temperature and pressure conditions and including the residue gas remaining after the condensation or extraction of liquid hydrocarbons from gas. Net Cash Income shall have the meaning assigned in paragraph 2 of Appendix D. Non Associated Natural Gas or NANG means Natural Gas which is produced either without association of Crude Oil or in association with such quantities of Crude Oil which by itself cannot be commercially produced. 1.67 1.68 1.69 1.70 1.71 1.72 1.73 1.74 1.75 1.76 1.77 Oil Field means within the Contract Area an Oil Reservoir or a group of Oil Reservoirs within a common geological structure or feature. Operator means one of the Parties comprising the Contractor appointed as the Operator pursuant to Article 7. Operating Agreement means the joint operating agreement entered by the constituents of the Contractor in accordance with Article 7 with respect to conduct of Petroleum Operations. Operating Committee means the Committee established by that

name in the Operating Agreement pursuant to Article 7. Participating Interest means in respect of each Party constituting the Contractor the undivided share expressed as a percentage of such Party's participation in the rights and obligations under this Contract. Parties means the parties signatory to this Contract including their successors and permitted assigns under this Contract and the term Party means any of the Parties. Petroleum means Crude Oil and/or Condensate and/or Natural Gas existing in their natural condition but excluding helium occurring in association with Petroleum or shale. Petroleum Operations means as the context may require Exploration Operations Development Operations or Production Operations or any combination of two or more of such operations including construction operation and maintenance of all necessary facilities plugging and abandonment of Wells safety environmental protection transportation storage sale or disposition of Petroleum to the Delivery Point Site Restoration and any or all other incidental operations or activities as may be necessary. Petroleum Produced and Saved means gross Petroleum produced minus impurities such as water or solids produced along with Petroleum Petroleum recycled to the reservoir Petroleum used in Petroleum Operations or flared or otherwise unavoidably lost under the provisions of the Contract. Production Costs means those costs and expenditures incurred in carrying out Production Operations as classified and defined in Section 2 of the Accounting Procedure and allowed to be recovered in terms of Section 3 thereof. Production Operations means all operations conducted for the purpose of producing Petroleum from the Development Area after the commencement of production from the Development Area including the operation and maintenance of all necessary facilities therefor. Profit Petroleum means the total value of Petroleum Produced and Saved from the Contract Area in a particular period as reduced by Cost Petroleum and calculated as provided in Article 16. Recompletion means an operation whereby a completion in one zone is abandoned in order to attempt a completion in a different zone within an existing Well bore. Reservoir means a naturally occurring discrete accumulation of Petroleum. Rules means the Petroleum and Natural Gas Rules 1959 and any amendments made thereto from time to time. Section means a section of the Accounting Procedure. Self-sufficiency means in relation to any

Year that the volume of Crude Oil and Crude Oil equivalent of Petroleum products exported from India during that Year either equals or exceeds the volume of Crude Oil and Crude Oil equivalent of Petroleum products imported into India during the same Year as determined by Government.

Site Restoration shall mean all activities required to return a site to its state as of the Effective Date pursuant to the Contractors environmental impact study and approved by the Government or to render a site compatible with its intended after use to the extent reasonable after cessation of Petroleum Operations in relation thereto and shall include where appropriate proper abandonment of Wells or other facilities removal of equipment structures and debris establishment of compatible contours and drainage replacement of top soil revegetation slope stabilisation infilling of excavations or any other appropriate actions in the circumstances.

Statement or Statements refers to the statements required to be furnished in accordance with Appendix C of this Contract.

State Government means any government of a state of the Union of India which has control over the Contract Area for the purpose of grant of Licenses Leases. In case the Contract Area covers more than one state the State Government shall include all such governments of those states.

Subcontractor means any company or person contracted by the Contractor or Operator to provide goods or services with respect to Petroleum Operations.

1.78 1.79 1.80 1.81 1.82 1.83 1.84 1.85 1.86 1.87 1.88 1.89 1.90 1.91

US or USD or US Dollar or United States Dollar means the currency of the United States of America.

Well means a borehole made by drilling in the course of Petroleum Operations but does not include a seismic shot hole.

Work Programme means a work programme formulated for the purpose of carrying out Petroleum Operations.

Year means a Financial Year.

ARTICLE 2 PARTICIPATING INTERESTS

2.1 The initial Participating Interest of the Parties comprising the Contractor shall be as follows

OIL GGRB 75 25 seventy five per cent twenty five per cent

2.2 Except as provided in this Article or elsewhere in this Contract the rights and obligations of the Parties comprising the Contractor shall include but not be limited to

a the right to take Cost Petroleum in accordance with the provisions of Article 15;

b the right to take its Participating Interest share of Profit Petroleum in accordance with the provisions of Article 16;

c the

right to receive its Participating Interest share of any inental income and receipts arising from Petroleum Operations; andd the obligation to contribute its Participating Interest share of costs and expenses including Contract Costs. ARTICLE 3LICENSE AND EXPLORATION PERIOD3.1 The Exploration Period shall begin on the Effective Date and shall consist of two Exploration Phases first exploration Phase shall be for a period not exceeding four 4consecutive Contract Years and second Exploration Phase shall be for a period not exceeding three 3 consecutive Contract Years for a total period not exceeding seven7 consecutive Contract Years unless extended pursuant to the terms of this Contract.3.2 Except as otherwise provided in this Contract the term of the first Exploration Phase shall not exceed 4 four consecutive Contract Years hereinafter referred to as thefirst Exploration Phase.3.3 3.4 Except as otherwise provided in this Contract the term of the second Exploration Phase shall not exceed 3 three consecutive Contract Years from the end of the firstExploration Phase hereinafter referred to as the second Exploration Phase.At the expiry of any Exploration Phase of the Exploration Period provided that the Contractor has completed the Minimum Work Programme for that Exploration Phasethe Contractor shall have the option exercisable by giving a written notice to the Government at least thirty 30 days prior to the expiry of the relevant Phase either a to proceed to the next Exploration Phase on presentation of the requisite guarantees as provided for in Article 29; orb to relinquish the entire Contract Area except for any Discovery Area and any Development Area and to conduct Development Operations and ProductionOperations in relation to any Commercial Discovery in accordance with the terms of this Contract and the Contractor shall have no further obligation in respectof the Minimum Work Programme under Article 5 for any subsequent Exploration Phases of the Exploration Period.If neither of the options provided for in paragraphs a and b hereof is exercised by the Contractor this Contract shall terminate at the end of the then currentExploration Phase and the License shall be automatically cancelled.3.5 3.6 3.7 3.8 3.9 3.10 If at the end of an Exploration Phase the Minimum Work Programme for that phase is not completed the time for completion of the said Minimum Work Programme shallbe extended for a period necessary to enable completion thereof but not exceeding

six 6 months provided that the Contractor submits his request by giving a written notice to the Government at least thirty 30 days prior to the expiry of the relevant Phase and can show technical or other good reasons for noncompletion of the Minimum Work Programme and the Management Committee gives its consent to the said extension and provided further that the period of such extension shall be subtracted from the next succeeding Exploration Phase if any. In case the Minimum Work Programme of any particular Exploration Phase is completed before stipulated time as provided in the Article 3.2 the time so saved will be added to the next Exploration Phase if so requested by the Contractor giving a notice in writing to the Government thirty 30 days prior to such early completion of the Phase and in that event the provision of the Article 3.4 shall apply immediately after such early completion of the Phase. If at the end of an Exploration Phase execution of any Work Programme is in progress and which is in addition to the Minimum Work Programme such Exploration Phase shall be extended for a period not exceeding six 6 months to enable completion thereof provided that the Minimum Work Programme for such Phase has been completed and the Management Committee gives its consent to the said extension as provided in the Article 3.5. In the event of an extension as provided for herein the notice referred to in Article 3.4 shall be given at least thirty 30 days prior to the expiry of the relevant extension. Where sufficient time is not available prior to the expiry of the Exploration Period to complete an Appraisal Programme at the request of the Contractor the Government shall extend the Exploration Period for such period not exceeding eighteen 18 months as may be mutually agreed between the Parties for the Appraisal Programme to be carried out and for the Contractor and the Management Committee to comply with the provisions of Article 10 and Article 21. If no Commercial Discovery has been made in the Contract Area by the end of the Exploration Period the Contract shall terminate. If this Contract is terminated in accordance with its terms the License shall be automatically cancelled. If at the expiry of the Exploration Period a development plan for development of a Commercial Discovery and an application for Lease is under consideration by the Management Committee or Government as the case may be pursuant to Articles 10 11 and 21 respectively the License shall continue in force with

respect to that part of the Contract Area to which the application for the Lease relates pending a decision on the proposed development plan and the application for the Lease but shall cease to be in force and effect with respect to the remainder of the Contract Area.

ARTICLE 4 RELINQUISHMENT

4.14.24.44.54.64.7 If at the end of the first Exploration Phase the Contractor elects pursuant to Article 3.4 to continue Exploration Operations in the Contract Area in the second Exploration Phase the Contractor shall have the option to relinquish a part of the Contract Area in simple geometrical shape. In case the Contractor exercises its option to relinquish a part of the Contract Area at the end of the first Exploration Phase then such area to be relinquished shall not be less than twenty five percent 25 of the original Contract Area and the Contractor shall be entitled to retain the balance area including any Development Area and Discovery Area in not more than three 3 areas of simple geometrical shapes. Notwithstanding the provision of this Article 4.1 the Contractor shall be permitted to retain the Development Areas and Discovery Areas in accordance with Article 3.4. At the end of the third Exploration Phase the Contractor shall retain only Development Areas and Discovery Areas. If the Contractor exercises the option provided for in paragraph b of Article 3.4 the Contractor shall after any Discovery Areas or Development Areas have been designated relinquish all of the Contract Area not included within the said Discovery Areas or Development Areas. As and when the Contract is terminated under the provisions of Article 3 or in accordance with any other provisions of this Contract the entire Contract Area remaining with the Contractor shall be deemed to have been relinquished by the Contractor as on the date on which the Contract is terminated. Relinquishment of all or part of the Contract Area or termination of the Contract shall not be construed as absolving the Contractor of any liability undertaken or incurred by the Contractor in respect of the Contract Area during the period between the Effective Date and the date of such relinquishment or termination. Subject to Article 14.9 the liability of the Contractor shall be limited to any liability undertaken or incurred in respect of relating to or connected with the Contract and/or any claim arising out of or in relation to the act of negligence misconduct commission or omission in carrying out Petroleum Operations during the period between the Effective Date and

the date of relinquishment of the Contract Area or termination or expiry of the Contract as the case may be.

ARTICLE 5 WORK PROGRAMME

5.15.2 The Contractor shall commence Petroleum Operations not later than six (6) months from the Effective Date. In addition to the Bid Work Programme Commitment in first Exploration Phase specified below in Article 5.2.1 and 5.3 the Contractor shall be required to undertake and complete the 2D seismic API in grid size of 8 (eight) KM x 8 (eight) KM covering the entire Contract Area herein referred to as Mandatory Work Programme during first Exploration Phase. In case due to any reason intrinsic to the Contract Area reasons the Contractor is not able to cover any part of the contract area by 2D seismic survey of grid size specified in this Article the Contractor shall submit a proposal for substitution of the shortfall in the Mandatory Work Programme to the Management Committee for approval. The Management Committee shall consider and take a reasoned unanimous decision on the proposal of the Contractor in a timely manner. The Management Committee may ask the contractor by giving a reasonable time any relevant information details date to enable it to take a decision on the proposal. The Management Committee shall ensure that the substituted work programme shall be at least equal to the shortfall in the mandatory Work Programme when evaluated in terms of efforts and expenditure. In case Management Committee is not able to decide unanimously the matter may be referred for approval of the Government. In case no proposal is received from the Contractor for the substitution and fails to complete Mandatory Work Programme the provision of Article 5.6 shall apply.

5.2.1 During the currency of the first Exploration Phase as per Article 3.2 the Contractor shall complete the following Work Programme:

- i A seismic programme consisting of the acquisition processing and interpretation of 250 (two hundred fifty) line kilometers of 2D and 700 (seven hundred) sq kms of 3D seismic data in relation to the exploration objectives;
- ii Reprocessing of 463 (four hundred sixty three) line kilometer of 2D seismic;
- iii Gravity magnetic survey API of 2500 (two thousand five hundred) stations;
- iv Any other Surveys API Geochemical survey of 500 (five hundred) samples;

Twelve (12) Exploration Wells each shall be drilled to at least one of the following depths:

- i One (1) Well 2000 (two thousand) meters
- ii One (1) Well 2200 (two thousand two hundred) meters
- iii One (1) Well 2400 (two thousand four hundred) meters
- iv One (1) Well 2600 (two thousand six hundred) meters

Well 2200 two thousand two hundred meters One 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersOne 1 Well 2500 two thousand five hundred metersto Basement; andthat point below which further drilling becomes impracticable due to geological conditions encountered and drilling would be abandoned by areasonable prudent operator in the same or similar circumstances. Abandonment of drilling under this provision by the Contractor would requireunanimous approval of the Management Committee.5.3 During the currency of the second Exploration Phase as per Article 3.3 the Contractor shall complete the following Work Programmea One 1 Exploration Well shall be drilled to at least one of the following depthsi One 1 Well 2500 two thousand five hundred metersii to Basement; andiii that point below which further drilling becomes impracticable due to geological conditions encountered and drilling would be abandoned by a reasonableprudent operator in the same or similar circumstances. Abandonment of drilling under this provision by the Contractor would require unanimousapproval of the Management Committee.5.4 The actual depth objective for each of the Wells shall be determined by the Contractor in the light of the advice of the Management Committee before the commencementof the drilling. Each Well which reaches the geological objective for which the depth objective was determined shall be deemed to have been drilled to the depthobjective or to actual total depth whichever is greater. The Contractor shall ensure that all relevant subsurface geological geochemical and geophysical informationnecessary for the attainment of the exploration objectives in accordance with modern oilfield and petroleum industry practices is obtained during exploratory drilling. 5.55.65.75.85.9If the depthgeological objective of the Well is not achieved for any reason a substitute Well shall be drilled of the same specifications as stipulated in and subject toArticles 5.2 5.3 as the case may be.Subject to Article 31 the Contractor undertakes to complete the Mandatory Work Programme and Minimum Work

Programme in accordance with Articles 5.2 5.2.15.3 and 5.5 as the case may be. In the event the Contractor fails to fulfill the said Mandatory Work Programme or Minimum Work Programme or both by the end of the relevant Exploration Phase or early termination of the Contract by the Government for any reason whatsoever each Company constituting the Contractor shall pay to the Government within sixty 60 days following the end of the relevant Exploration Phase or early termination of the Contract as may be the case its Participating Interest share for an amount which when evaluated in terms of the Mandatory Work Programme or Minimum Work Programme specified for the relevant Phase is equal to the amount which would be required to complete the said Mandatory Work Programme of Minimum Work Programme or both. For determination of this amount available relevant information including the Budget and modern oilfield and petroleum industry practices may be taken into account. If the Minimum Work Programme for the second Exploration Phase has been completed earlier than eighteen months from the end of the Phase the Contractor shall meet with the Government to discuss the possibility of early relinquishment unless the Contractor undertakes further work with the approval of the Management Committee. In the event that the Contractor has carried out work in excess of the Minimum Work Programme in any Exploration Phase the excess exploration work done shall be set off against the Minimum Work Programme for the following Exploration Phase. As soon as possible after the Effective Date and thereafter within ninety 90 days before commencement of each following Year the Contractor shall submit to the Management Committee the Work Programmes and the Budgets relating to Petroleum Operations to be carried out during the relevant Year. Work Programme and Budgets for the Exploration Period shall include work sufficient to meet the relevant Minimum Work Programme with respect to each Exploration Phase specified in this Article 5.5.10 The Contractor may propose modifications or revisions to the details of a reviewed or an approved Work Programme and Budget as the case may be in the light of the then existing circumstances and shall submit to the Management Committee modifications or revisions to the Work Programme and Budget referred to in Article 5.9.5.11 Work Programmes and Budgets and any modifications or revisions thereto

relating to Exploration Operations shall be submitted to the Management Committee for review and advice as provided in Article 6.5. Work Programmes and Budgets related to Development Operations and Production Operations and any modifications or revisions thereto shall be submitted to the Management Committee for approval as provided in Article 10 and Article 21.

ARTICLE 6 MANAGEMENT COMMITTEE

6.1 6.2 6.3 6.4 There shall be constituted a committee to be called the Management Committee with functions as stated herein below. Government shall nominate two members representing Government in the Management Committee whereas each Company constituting the Contractor shall nominate one member each to represent Company in the Management Committee provided that in case the Contractor constitutes only one Company that Company shall have two members. The Parties shall nominate the members to the Management Committee within thirty days of the Effective Date. Each Party may nominate alternate members with full authority to act in the absence and on behalf of the members nominated under Article 6.2 and may at any time nominate another member or alternate member to replace any member nominated earlier by notice to other members of the Management Committee. One representative of the Government shall be designated as the Chairman of the Management Committee and the second representative of the Government shall be designated as the Deputy Chairman. The member of the Operator or the member designated by the Operator where Operator has two members in the Management Committee shall be designated as the Secretary of the Committee.

6.5 Operator on behalf of the Contractor with the approval of Operating Committee if constituted under the Article 7.4 or in case of a single Party constituting the Contractor then that Party shall submit following matters to the Management Committee for review and it shall have advisory functions:

- a the annual Work Programmes and Budgets in respect of Exploration Operations and any revisions or modifications thereto;
- b annual work progress and costs incurred thereon;
- c proposals for surrender or relinquishment of any part of the Contract Area by the Contractor;
- d proposals for an Appraisal Programme or revisions or additions thereto and the declaration of a Discovery as a Commercial Discovery;
- e any other matter required by the terms of this Contract to be submitted to it for review or

advice; andf any other matter which the Contractor dees to submit for review or advice including matters concerning interParty relationships.6.6 The following matters shall be submitted by Operator on behalf of the Contractor with the approval of Operating Committee if constituted under the Article 7.4 or in caseof single Party constituting the Contractor then by that Party to the Management Committee for approvala Annual Work Programmes and Budgets in respect of Development Operations and Production Operations and any modifications or revisions thereto;b proposals for the approval of development plans as may be required under this Contract or modifications or revisions to a Development Plan;c determination of a Development Area;d appointment of auditors along with scope of audit approval and adoption of audited report submitted under Article 25.4.3;e collaboration with licensees or contractors of other areas;f claims or settlement of claims for or on behalf of or against the Contractor in excess of limits fixed by the Management Committee from time to time;gproposal about abandonment planSite Restoration as required to be submitted under Article 14.10;h any other matter required by the terms of this Contract to be submitted for the approval of the Management Committee;i any other matter which the Contractor dees to submit to it; andj any matter which Government refers to the Management Committee for its consideration and reasoned opinion.6.7 Unless agreed otherwise by all the members of the Management Committee the Management Committee shall meet at least once every six 6 months during theExploration Period and thereafter at least once every three 3 months or more frequently at the request of any member. The Secretary with the approval of theChairman shall convene each meeting by notifying the members twenty eight 28 days prior to such a meeting or a shorter period of notice if the membersunanimously so agree of the time and place of such meeting and the purpose thereof and shall include in such notice a provisional agenda for such meeting. TheChairman shall be responsible for processing the final agenda for such meeting and the agenda shall include all items of business requested by the members to beincluded provided such requests are received by the Secretary at least ten 10 days prior to the date fixed for the meeting. The Secretary shall forward the agenda to themembers at least seven 7 Business Days prior to the date fixed for the meeting.

Matters not included in the agenda may be taken up at the meeting by any member with the unanimous consent of all the members whether present or not present at the meeting.

6.8 The Chairman or the Deputy Chairman as may be the case shall preside over the meetings of the Management Committee and in their absence any other member representing Government and present shall preside over the meetings.

6.9 6.10 6.11 Secretary to the Management Committee shall be responsible inter alia for preparation of the minutes of every meeting in the English language and provision to every member of the Management Committee with two 2 copies of the minutes approved by the Chairman within three 3 Business Days of the meeting. Unless agreed otherwise by all the members of the Management Committee the minutes of a meeting shall be finalised by the Management Committee within three 3 Business Days thereafter. Members shall notify the Chairman and the other members of their approval of the minutes by putting their signatures on one copy of the minutes and returning the same to the Chairman. Members may suggest any modification to the minutes while returning the signed copy. Members may also communicate with the Chairman through telex cable or facsimile or any other effective mode of communication agreed by all the members of the Management Committee. If the Chairman or any other member does not agree with the modification to the minutes suggested by any member the matter shall be brought to the attention of the other members and resubmitted to the Management Committee at the next meeting and the minutes shall stand approved as to all other matters. If a member fails to respond within the aforesaid three 3 Business Day period unless agreed otherwise by the Management Committee as herein provided the minutes shall be deemed to be approved by such member. Any member shall be entitled if either he or his alternate is unable to attend a meeting to cast his vote by telex cable facsimile transmission or any other effective mode of communication agreed by all the members of the Management Committee and received by the Chairman prior to the date on which the vote is taken in the course of the meeting or by giving a prior written notice to all other members appoint a member with his prior consent representing another Party in the Management Committee as its proxy to attend a meeting and to exercise the appointing members right to vote at

the meeting whether as directed by the appointing member or otherwise. A member appointed as a proxy and attending a meeting shall be present in two separate capacities and vote accordingly. All such votes shall have the same effect as if that member had been present and so voted at the meeting. In case of urgency where Operating Committee has made a recommendation together with reasons to the Chairman requiring consideration of a matter by the Management Committee without delay Chairman after being satisfied may waive the requirements of notice period for the meeting and circulation of agenda to such extent as would be consistent with the urgency and consideration of the matter by the Management Committee. Alternatively Chairman may approve submission of notice and agenda to members by telex or facsimile transmission or any other effective mode of communication agreed by all the members of the Management Committee receipt of which shall be confirmed by telephone by the Chairman requiring the members to confirm their decision by these modes of communication not later than three 3 Business Days from confirmation of receipt of notice and agenda by the member. Any member failing to convey the decision within the time limits of three 3 Business Days shall be deemed to have voted in favour of the proposal. The result of any such vote shall be notified by the Chairman to all the members. The meetings of the Management Committee shall be held in India unless otherwise mutually agreed by the members of the Management Committee. All expenses of the members of the Management Committee attending meetings shall be borne by the respective Party and shall in no event be cost recoverable. All matters requiring the approval of the Management Committee shall be generally approved by a unanimous vote of the members of the Management Committee present as well as the views of the members received by some other mode of communication. In case unanimity is not achieved in decision making process within a reasonable period as may be required under the circumstances the decision of the Management Committee shall be approved by the majority Participating Interest of seventy percent 70 or more with Government representative having a positive vote in favour of the decision. There shall be a quorum of the Management Committee for holding a meeting and making decisions with each Party to the Contract represented by at least one

of its nominated members in the Management Committee either present in person or represented as per Article 6.10. If there is no quorum in a meeting the meeting shall stand postponed to the same day and time in the next week and if quorum is not present or represented even in the next meeting and subject to a Government member being present the members present and represented will constitute the quorum and take decisions and decisions taken by such quorum shall be final and binding to all the absenting Parties or Parties not represented notwithstanding the provisions of Article 6.13. The Management Committee if it considers necessary may appoint legal financial or technical subcommittees comprised of such representatives as may be agreed by the Management Committee to consider any matter requiring approval or decision of the Management Committee. Such subcommittee expenses shall form part of Contract Cost with relevant cost classification as decided by the Management Committee pursuant to the Section 2 of the Accounting Procedure and will be cost recoverable. In the event a Party to the Contract is not entitled to vote in the Operating Committee meetings being in default under the Operating Agreement and Operator notifies Chairman of the default by the Party then the issue of exercising voting right by such defaulting Party in the Management Committee meetings shall be discussed by the Management Committee. The Management Committee excluding the defaulting Party after duly hearing the views of the defaulting Party on the matter of their default under Operating Agreement shall take unanimous decision on exclusion or otherwise of the defaulting Party from voting in the Management Committee meetings. For avoidance of any doubt it is clearly understood that unanimous decision by the Management Committee referred to in this Article 6.16 excludes defaulting Party from such decision. Accordingly if the Management Committee decides to exclude the defaulting Party from voting in the Management Committee then the said Party shall not be entitled to vote in the meetings of the Management Committee under Contract. In that event notwithstanding the provisions of Article 6.13 decisions of the Management Committee shall be made by vote of the members of the Management Committee excluding the member appointed by the said Party in default and any vote or purported vote by such member in the Management Committee shall be ignored. The said Party in default shall

be bound by all decisions of the Management Committee. The nondefaulting Parties under the Operating Agreement shall indemnify Government against any claims of whatsoever nature which may arise due to exclusion of defaulting Party from voting in the Management Committee.

OPERATORSHIP JOINT OPERATING AGREEMENT AND OPERATING COMMITTEE

ARTICLE 7.17.27.3 OIL shall be the Operator for the purpose of carrying out Petroleum Operations pursuant to this Contract during the term of the Contract. No change in the operatorship shall be effected without the consent of the Government and such consent shall not be unreasonably withheld. The functions required of the Contractor under this Contract shall be performed by the Operator on behalf of all constituents of the Contractor subject to and in accordance with the terms and provisions of this Contract and generally accepted modern oilfield and petroleum industry practices provided however that this provision shall not be construed as relieving the constituents of the Contractor from any of its obligations or liability under the Contract.

7.4 Within forty five 45 days of the Effective Date or such longer period as may be agreed to by Government the Companies constituting the Contractor shall execute a Joint Operating Agreement. The said agreement shall be consistent with the provisions of this Contract and shall provide for among other things a b the appointment resignation removal and responsibilities of the Operator; the establishment of an Operating Committee comprising of an agreed number of representatives of the Companies chaired by a representative of the Operator; functions of the said Operating Committee taking into account the provisions of the Contract procedures for decision making frequency and place of meetings; and contribution to costs default sole risk disposal of Petroleum and assignment as between the Parties to the Joint Operating Agreement.

7.4.1 7.4.2 Operator shall provide to the Government a copy of the duly executed Joint Operating Agreement within thirty 30 days of its execution date or such longer period as may be agreed to by the Government. In case a single Company constitutes the Contractor the provisions of Article 7.4 and 7.4.1 shall not be applicable. However in case of increase in the number of constituents of the Contractor the provisions of Article 7.4 and 7.4.1 shall apply from the date of such increase in the

number of the constituents. ARTICLE 8 GENERAL RIGHTS AND OBLIGATIONS OF THE PARTIES

8.1 Subject to the provisions of this Contract the Contractor shall have the following rightsa subject to the provisions of Article 12 the exclusive right to carry out Petroleum Operations to recover costs and expenses as provided in this Contract. The rightshall exclude exploitation of coalignite bed methane CBM by the Contractor in the Contract Area;b the right to use free of charge such quantities of Petroleum produced as are reasonably required for conducting Petroleum Operations in the Contract Area inaccordance with generally accepted modern oilfield and petroleum industry practices;c the right to lay pipelines build roads construct bridges ferries aerodromes landing fields radio telephones and related communication and infrastructure facilitiesand exercise other ancillary rights as may be reasonably necessary for the conduct of Petroleum Operations subject to such approvals as may be required and theapplicable laws in force from time to time for the regulation and control thereof;d the right to use all available technical data seismic and well information maps samples etc. of the Contract Area as on the Effective Date free of charge subject tonominal copyingreproduction costs for further Petroleum Operations. The Contractor shall submit the list of all data required by them to Directorate General ofHydrocarbons DGH based on the list of data provided in the information docket for the block pertaining to the Contract Area as soon as possible but not laterthan one hundred and eighty 180 days from the execution of the Contract and the same if available and reproducible shall be made available to the Contractorin the office of DGH within ninety 90 days from the submission of such request for data by the Contractor provided the Effective Date of the Contract hascommenced and the Contractor has furnished relevant guarantees under Article 29 of the Contract.e such other rights as are specified in this Contract.

8.2 The Government reserves the right to itself or to grant to others the right to prospect for and mine minerals or substances other than Petroleum within the Contract Area;provided however that if after the Effective Date others are issued rights or the Government proceeds directly to prospect for and mine in the Contract Area anyminerals or substances other than Petroleum the Contractor shall use its best efforts to avoid obstruction to or interference with

such operations within the Contract Area and the third parties and/or the Government as the case may be shall use best efforts to ensure that operations carried out do not obstruct or unduly interfere with Petroleum Operations in the Contract Area.

8.3 The Contractor shall, having due regard to modern oilfield and petroleum industry practices, a) except as otherwise expressly provided in this Contract, conduct all Petroleum Operations at its sole risk, cost and expense and provide all funds necessary for the conduct of Petroleum Operations including funds for the purchase or lease of equipment, materials or supplies required for Petroleum Operations as well as for making payments to employees, agents and Subcontractors; b) conduct all Petroleum Operations within the Contract Area diligently, expeditiously, efficiently and in a safe and workmanlike manner pursuant to the Work Programme formulated in accordance with Contract; c) ensure provision of all information, data, samples etc. which may be required to be furnished under the applicable laws or under this Contract; d) ensure that all equipment, materials, supplies, plant and installations used by the Contractor, the Operator and Subcontractors comply with generally accepted standards and are of proper construction and kept in safe and good working order; e) in the preparation and implementation of Work Programmes and in the conduct of Petroleum Operations follow modern oilfield and petroleum industry practices with such degree of diligence and prudence reasonably and ordinarily exercised by experienced parties engaged in a similar activity under similar circumstances and conditions; f) the procedure for acquisition of goods and services as of the Effective Date shall be as per the Appendix F of this Contract. Based on economic considerations and generally accepted practices in the international petroleum industry with the objective of ensuring cost and operational efficiency in the conduct of Petroleum Operations, the Appendix F to this Contract may be modified or changed with the prior approval of the Management Committee when circumstances so justify; g) after the designation of a Development Area pursuant to this Contract, forthwith proceed to take all necessary action for prompt and orderly development of the Development Area and for the production of Petroleum in accordance with the terms of this Contract; h) appoint a technically competent and sufficiently experienced representative and in his

absence a suitably qualified replacement therefor who shall be resident in India and who shall have full authority to take such steps as may be necessary to implement this Contract and whose names shall on appointment within ninety 90 days after commencement of the first Contract Year be made known to the Government; i provide acceptable working conditions living accommodation and access to medical attention and nursing care for all personnel employed in Petroleum Operations; j carry out such other obligations as are specified in this Contract in particular those specified in Article 14; and k be always mindful of the rights and interests of India in the conduct of Petroleum Operations.

ARTICLE 9 GOVERNMENT ASSISTANCE

9.1 Upon application in the prescribed manner and subject to compliance with applicable laws and relevant procedures the Government or its nominee will a use their good offices to provide the right of ingress and egress from the Contract Area and any facilities used in Petroleum Operations wherever located and which may be within their control; b use their good offices when necessary to assist the Contractor in procurement or commissioning of facilities required for execution of Work Programmes including necessary approvals permits consents authorisations visas work permits Licenses including Licenses and Leases rights of way easement surface rights and security protection at the Contractors cost required pursuant to this Contract and which may be available from resources within its control; and c in the event that onshore facilities are required outside the Contract Area for Petroleum Operations including but not limited to storage loading and processing facilities pipelines and offices use their good offices in assisting the Contractor to obtain from the authorities of the state in which such facilities are required such licenses permits authorizations consents security protection at the Contractors cost surface rights and easements as are required for the construction and operation of the said facilities by the Contractor.

ARTICLE 10 DISCOVERY DEVELOPMENT AND PRODUCTION

10.1 If and when a Discovery is made within the Contract Area the Contractor shall a forthwith inform the Management Committee and Government of the Discovery; b promptly thereafter but in no event later than a period of thirty 30 days from the date of the Discovery furnish to the Management Committee and Government particulars in writing of the Discovery; and c promptly run

tests to determine whether the Discovery is of potential commercial interest and within a period of sixty 60 days after completion of such tests submit a report to the Management Committee containing data obtained from such tests and its analysis and interpretation thereof together with a written notification of whether in the Contractor's opinion such Discovery is of potential commercial interest and merits appraisal.

10.2 10.3 10.4 If the Contractor determines to conduct a drill stem or production test in open hole or through perforated casing with regard to any Exploration Well it shall notify the Government of the time of such test at least forty eight 48 hours prior to the proposed test and the Government shall have the right to have a representative present during such test. If pursuant to Article 10.1 c the Contractor notifies the Management Committee that the Discovery is of potential commercial interest the Contractor shall prepare and submit to the Management Committee within one hundred and twenty 120 days of such notification a proposed Appraisal Programme with a Work Programme and Budget to carry out an adequate and effective appraisal of such Discovery designed to achieve both the following objectives i determine without delay and in any event within the period specified in Article 10.5 whether such Discovery is a Commercial Discovery and ii determine with reasonable precision the boundaries of the area to be delineated as the Development Area. The proposed Appraisal Programme shall be reviewed by the Management Committee within thirty 30 days after submission thereof pursuant to Article 10.3. The said Appraisal Programme together with the Work Programme and Budget submitted by the Contractor which may be revised or modified or amended by the Contractor in light of the Management Committee review shall be adopted as the Appraisal Programme and the Contractor shall promptly commence implementation thereof; and the annual Budget for the Exploration Period adopted pursuant to Article 5 shall be revised accordingly.

10.5 10.6 10.7 The Contractor shall in respect of a Discovery of Crude Oil advise the Management Committee by notice in writing within a period of eighteen 18 months from the date on which the notice provided for in Article 10.1 c was delivered whether such Discovery should be declared a Commercial Discovery or not. Such notice shall be accompanied by a report on the Discovery setting forth all relevant technical and economic data including estimated recoverable

reserves sustainable production levels estimated development and production expenditures prevailing and forecasted prices and other pertinent technical and economic factors according to modern oilfield and petroleum industry practices as well as all evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or for the Contractor with respect to the Discovery and any other relevant information. If the Contractor is of the opinion that Crude Oil has been discovered in commercial quantities it shall submit the proposal to the Management Committee for review that the Discovery be declared a Commercial Discovery. In the case of a Discovery of Gas the provisions of Article 21 shall apply. The Management Committee shall within forty 40 days of the date of the notice referred to in Article 10.5 review the proposal of the Contractor and request any other additional information it may reasonably require so as to complete the review of the proposal made by the Contractor. The Contractor shall furnish the additional information within thirty 30 days from the date of the request. The review by the Management Committee shall be made and conveyed to the Contractor within the later of a ninety 90 days from the date of notice referred to in Article 10.5 or b forty 40 days of receipt of such other information as may be required under this Article. If the Contractor declares the Discovery a Commercial Discovery after taking into account the advice of the Management Committee as referred in the Article 10.6 within two hundred 200 days of the declaration of the Discovery as a Commercial Discovery the Contractor shall submit to the Management Committee a comprehensive development plan of the Commercial Discovery which shall a relate to the Discovery Area and contain a Reservoir or part thereof and the boundaries of the proposed Development Area; b be designed to ensure the most efficient beneficial and timely use of the Petroleum resources discovered; and c be prepared in accordance with sound engineering economic safety and environmental principles recognised in the generally accepted modern oilfield and petroleum industry practices. Such plan shall contain detailed proposals by the Contractor for the construction establishment and operation of all facilities and services for and inental to therecovery storage and transportation of the Petroleum from the proposed Development Area to the Delivery Point together

with all data and supporting information including but not limited to: description of the nature and characteristic of the Reservoir data statistics interpretations and conclusions on all aspects of the geology Reservoir evaluation Petroleum engineering factors Reservoir models estimates of reserve in place possible production magnitude nature and ratio of Petroleum fluids and analysis of producible Petroleum; outlines of the development project and/or alternative development projects if any describing the production facilities to be installed and the number of Wells to be drilled under such development project and/or alternative development projects if any; estimate of the rate of production to be established and projection of the possible sustained rate of production in accordance with modern oilfield and petroleum industry practices under such development project and/or alternative development projects if any which will ensure that the area does not suffer an excessive rate of decline of production or an excessive loss of Reservoir pressure; estimates of Development Costs and Production Costs under such development project and/or alternative development projects if any; Contractors recommendations as to the particular project that it would prefer; iv) Work Programme and Budget for development proposals relating to the proposed Development Area; vi) anticipated adverse impact on the environment and measures to be taken for prevention or minimisation thereof and for general protection of the environment in conduct of operations; viii) measures to be taken for the health and safety of persons employed in Petroleum Operations; ix) the information required in Article 21.10.8 A proposed development plan submitted by the Contractor pursuant to Article 10.7 may be approved by the Management Committee within one hundred and ten 110 days of submission thereof or eighty 80 days of receipt of any additional information requested by the Management Committee. In case the Management Committee requires any reasonable additional information the same shall be requested by it within eighty 80 days from the submission of the development plan. The Contractor shall provide such additional information within thirty 30 days from the request by the Management Committee. If within a period of one hundred and ten 110 days after submission of a proposed development plan or eighty 80 days from the receipt of any additional information where asked by the Management Committee

the Management Committee fails to convey a decision to the Contractor the Contractor shall have option to submit the proposal to the Government. Also where the Management Committee rejects the development plan of the Contractor the Contractor can submit the development plan for the approval of the Government. The Government shall respond on the proposed development plan submitted by the Contractor within one hundred and ten 110 days. In case Government refuses to approve the proposed development plan it shall convey the reasons for such refusal and the Contractor shall be given opportunity to make appropriate modifications to meet concerns of Government and the provisions of the foregoing Article and resubmit the plan within ninety 90 days from the date of receipt of refusal from the Government. 10.9 10.10 10.11 10.12 10.13 10.14 A Development Plan approved by the Management Committee or Government as may be the case from time to time shall commit the Contractor to the obligations stipulated in Articles 10.10 to 10.12. Work Programmes and Budgets for Development and Production Operations shall be submitted to the Management Committee as soon as possible after the approval of a Development Plan under Article 10.8 and thereafter not later than 31st December each Year in respect of the Year immediately following. The Management Committee when considering any Work Programme and Budget may require the Contractor to prepare an estimate of potential production to be achieved through the implementation of the said Work Programme and Budget for each of the three 3 Years following the Year to which the Work Programme and Budget relate. If major changes in yearly estimates of potential production are required these shall be based on evidence necessitating such changes. Not later than the fifteenth 15th of January each Year in respect of the Year immediately following commencement of Commercial Production the Contractor shall determine the Programme Quantity with the approval of the Management Committee. The Programme Quantity for any Year shall be the maximum quantity of Petroleum based on Contractors estimates as approved by the Management Committee which can be produced from a Development Area consistent with modern oilfield and petroleum industry practices and minimising unit production cost taking into account the capacity of the producing Wells gathering lines separators storage capacity and other

production facilities available for use during the relevant Year as well as the transportation facilities up to the Delivery Point. Proposed revisions to the details of a Development Plan or an annual Work Programme or Budget in respect of Development and Production Operations shall for good cause and if the circumstances so justify be submitted for approval to the Management Committee. In the event the area encompassing the Commercial Discovery extends beyond the Development Area designated in the Development Plan either within the original Contract Area but subsequently relinquished or outside the original Contract Area the Management Committee may make recommendations to the Government concerning enlargement of the Development Area provided the same was not awarded to any other company by the Government or is not held by any other party or not on offer by the Government and no application for a License or Lease is pending with the Government. However in case the area is held by any other party or on offer by the Government or application for License or Lease is pending with the Government the Management Committee shall notify the same to the Government for further action on the matter. Government may consider such request for extension at its sole discretion and on terms and conditions which it may consider fit.

ARTICLE 11 PETROLEUM EXPLORATION LICENSE AND MINING LEASE 11.1 11.2 11.3 11.4

The Contractor shall submit an application for grant of License in respect of the Contract Area as early as possible but not later than fifteen 15 Business Days from the date of execution of this Contract. On submission of a development plan of a Commercial Discovery pursuant to Article 10.7 the Contractor shall submit an application for a Lease in respect of the proposed Development Area to the relevant State Governments. Where a part of a Reservoir in respect of which a Commercial Discovery has been declared extends beyond the Contract Area subject to Article 10.14 such area may be included in the proposed Development Area in relation to which application for a Lease is made on terms and conditions as decided by the Central Government; provided that such area is not subject to a license or lease granted to any other person; not the subject of negotiations, bidding or contract awarded for a license or lease; and available for licensing i.e. is not an area over which Petroleum Operations are excluded. Where a Development Plan has been approved pursuant to

Article 10 and the Contractor has complied with the terms and conditions of the License and this Contract and is not in breach of any of the terms thereof or the provisions of any law and subject to normal Government clearances/approvals being obtained by the Contractor as applicable before grant/issue of the Lease the Central Government will assist the Contractor in obtaining the Lease from the relevant State Governments over the Development Area as agreed subject to Article 11.5 to enable the Contractor to carry out Petroleum Operations in the Development Area in accordance with the Development Plan.

11.5 The Lease shall be granted for an initial period of twenty 20 years from the date of grant thereof subject to a cancellation in accordance with its terms or for termination of this Contract in accordance with its terms;

b extension by mutual agreement between the Parties for five 5 years or such period as may be agreed after taking into account the balance recoverable reserve and balance economic life of the Field/Development Area from the expiry of the initial period provided that in the event of a Commercial production of Non Associated Natural Gas the extension may be for a period of ten 10 years or such period as may be mutually agreed between the Parties after taking into account the balance recoverable reserves and balance economic life of the Field/Development Area from the date of expiry of the initial term; and

c the terms of this Contract and other terms and conditions as set forth in such Lease be consistent with this Contract and the relevant legislation.

ARTICLE 12 UNIT DEVELOPMENT

12.1 If a Reservoir in a Discovery Area is situated partly within the Contract Area and partly in an area in India over which other parties have a contract to conduct petroleum operations and both parts of the Reservoir can be more efficiently developed together on a commercial basis on receiving information in writing from any party to these contracts or any information on this from any bonafide source the Government may for securing the more effective recovery of Petroleum from such Reservoir by notice in writing to the Contractor require that the Contractor

a collaborate and agree with such other parties on the joint development of the Reservoir ;

b submit such agreement between the Contractor and such other parties to the Government for approval within one hundred and eighty 180 days; and

c prepare a plan for such joint development of the said Reservoir within one hundred and eighty 180 days of the

approval of the agreement referred to in b above.12.2 12.3 If no plan is submitted within the period specified in Article 12.1 c or such longer period as the Government and the Contractor and the other parties referred to in Article 12.1 may agree or if such plan as submitted is not acceptable to the Government and the Parties cannot agree on amendments to the proposed joint development plan the Government may cause to be prepared at the expense of the Contractor and such other parties a plan for such joint development consistent with generally accepted modern oilfield and petroleum industry practices which shall take into consideration any plans and presentations made by the Contractor and the aforementioned other parties. If the parties are unable to agree on the proposed plan for joint development the Government may call for a joint development plan from an independent agency which agency may make such a proposal after taking into account the position of the parties in this regard. Such a development plan if approved by Government shall be binding on the parties notwithstanding their disagreement with the plan. However the Contractor may in case of any disagreement on the issue of joint development or the proposed joint development plan prepared in accordance with Article 12.2 or within forty five 45 Business Days of the plan approval as aforesaid in this Article notify the Government that it elects to surrender its rights in the Reservoir Discovery in lieu of participation in a joint development.12.4 12.5 If a proposed joint development plan is agreed and adopted by the parties or adopted following determination by the Government the plan as finally adopted shall be the approved joint development plan and the Contractor shall comply with the terms of the said development plan as if the Commercial Discovery is established. The provisions of Articles 12.1 12.2 and Article 12.3 shall apply mutatis mutandis to a Discovery of a Reservoir located partly within the Contract Area which although not equivalent to a Commercial Discovery if developed alone would be a Commercial Discovery if developed together with that part of the Reservoir which extends outside the Contract Area to the areas subject to contract for petroleum operations by other parties.

ARTICLE 13 MEASUREMENT OF PETROLEUM

13.1 Petroleum used for internal consumption for Petroleum Operations flared saved and sold from the Contract Area shall be measured by methods and appliances generally accepted

and customarily used in modern oilfield and petroleum industry practices and approved by the Management Committee and the Government.13.2 The Government may at all reasonable times inspect and test the appliances used for measuring the volume and determining the quality of Petroleum provided that anysuch inspection or testing shall be carried out in such a manner so as not to unduly interfere with Petroleum Operations.13.3 Before commencement of production from the Contract Area the Parties shall mutually agree onabcdmethods to be employed for measurement of volumes of Petroleum production;the point or points at which Petroleum shall be measured and the respective shares allocated to the Parties in accordance with the terms of this Contract;the frequency of inspections and testing of measurement appliances and relevant procedures relating thereto; andthe consequences of a determination of an error in measurement.13.4 13.5 13.6 The Contractor shall undertake to measure the volume and quality of the Petroleum Produced and Saved from the Contract Area at the agreed measurement pointconsistent with generally accepted modern oilfield and petroleum industry practices with the frequency and according to procedures agreed pursuant to Article 13.3. TheContractor shall not make any alteration in the agreed method or procedures for measurement or to any of the approved appliances used for that purpose without thewritten consent of the Management Committee and the Government.The Contractor shall give the Government timely notice of its intention to conduct measuring operations or any agreed alteration for such operations and the Governmentshall have the right to be present at and supervise either directly or through authorised representatives such operations.The Contractor shall keep all the records of analysis and measurement of hydrocarbons calibrations and proving of measurement system and make available toGovernment or its authorized agency such records on request. ARTICLE 14PROTECTION OF THE ENVIRONMENT14.1 The Government and the Contractor recognise that Petroleum Operations will cause some impact on the environment in the Contract Area. Accordingly in performance ofthe Contract the Contractor shall conduct its Petroleum Operations with due regard to concerns with respect to protection of the environment and conservation ofnatural resources and shall in particular;a employ modern oilfield and petroleum

industry practices and standards including advanced techniques practices and methods of operation for the prevention of Environmental Damage in conducting its Petroleum Operations; b take necessary and adequate steps to prevent Environmental Damage and where some adverse impact on the environment is unavoidable to minimise such damage and the consequential effects thereof on property and people; ii ensure adequate compensation for injury to persons or damage to property caused by the effect of Petroleum Operations; and c comply with the requirements of applicable laws and the reasonable requirements of the Government from time to time.

14.2 14.3 If the Contractor fails to comply with the provisions of paragraph bi of Article 14.1 or contravenes any relevant law and such failure or contravention results in any Environmental Damage the Contractor shall forthwith take all necessary and reasonable measures to remedy the failure and the effects thereof. If the Government in accordance with the laws has good reason to believe that any works or installations erected by the Contractor or any operations conducted by the Contractor are endangering or may endanger persons or any property of any person or are causing or may cause pollution or are harming or may harm fauna or flora or the environment to a degree which the Government deems unacceptable the Government may require the Contractor to take remedial measures within such reasonable period as may be determined by the Government and to repair any such damage. If the Government deems it necessary it may also require the Contractor to discontinue Petroleum Operations in whole or in part until the Contractor has taken such remedial measures or has repaired any damage caused.

14.4 The measures and methods to be used by the Contractor for the purpose of complying with the terms of paragraph bi of Article 14.1 shall be determined in timely consultation with the Government upon the commencement of Petroleum Operations or whenever there is a significant change in the scope or method of conducting Petroleum Operations and shall take into account the international standards applicable in similar circumstances and the relevant environmental impact study carried out in accordance with Article 14.5 below. The Contractor shall notify the Government in writing of the measures and methods finally determined by the Contractor and shall cause such measures and methods to be

reviewed from time to time in the light of prevailing circumstances.14.5 The Contractor shall cause a person or persons with special knowledge on environmental matters to carry out two environmental impact studies in order to determine at the time of the studies the prevailing situation relating to the environment human beings and local communities the flora and fauna in the Contract Area and in the adjoining or neighbouring areas; and to establish the likely effect on the environment human beings and local communities the flora and fauna in the Contract Area and in the adjoining or neighbouring areas in consequence of the relevant phase of Petroleum Operations to be conducted under this Contract and to submit for consideration by the Parties methods and measures contemplated in Article 14.4 for minimising Environmental Damage and carrying out Site Restoration activities.

14.5.1 14.5.2 The first of the aforementioned studies shall be carried out in two parts namely a preliminary part which must be concluded before commencement of any field work relating to a seismographic or other survey and a final part relating to drilling in the Exploration Period. The part of the study relating to drilling operations in the Exploration Period shall be approved by Government before the commencement of such drilling operations it being understood that such approval shall not be unreasonably withheld. The second of the aforementioned studies shall be completed before commencement of Development Operations and shall be submitted by the Contractor as part of the Development Plan with specific approval of Government being obtained before commencement of Development Operations it being understood that such approval shall not be unreasonably withheld.

14.5.3 The studies mentioned in Article 14.5 above shall contain proposed environmental guidelines to be followed in order to minimize Environmental Damage and shall include but not be limited to the following to the extent appropriate to the respective study taking into account the phase of operations to which the study relates a proposed access cutting; b clearing and timber salvage; c wildlife and habitat protection; d fuel storage and handling; e use of explosives; f camps and staging; g liquid and solid waste disposal; h cultural and archaeological sites; i selection of drilling sites; j terrain stabilization; k protection of freshwater horizons; l blowout prevention plan; m flaring during completion and testing of Gas and Oil Wells; n abandonment of Wells; o rig

dismantling and site completion;p reclamation for abandonment;q noise control;r debris disposal; and protection of natural drainage and water flow.14.5.4 Subject to the provision of all applicable laws and notifications on protection of environment any new project or expansion or modernization projects for petroleum operations for which a proposal is submitted by the Contractor the Government shall complete the assessment of the project within a period of ninety 90 days from the receipt of the requisite documents and data from the project authorities and completion of public hearing. The decision of the Government on the proposal of the Contractor for environmental clearance shall be conveyed within thirty 30 days thereafter. However wherever forest land is involved; the Contractor user agency shall have to obtain approval of the Central Government through the State Government concerned under the Forest Conservation Act 1980. The decision of the Central Government on such proposal of the contractor user agency shall be taken within sixty 60 days from the date of receipt of proposal of the Contractor user agency from the State Government. The State Government is required to convey its recommendations on the proposal complete in all respect to the Central Government or otherwise within ninety 90 days from the receipt of the same from the applicant.14.6 The Contractor shall ensure that a Petroleum Operations are conducted in an environmentally acceptable and safe manner consistent with modern oilfield and petroleum industry practices and that such Petroleum Operations are properly monitored;b the pertinent completed environmental impact studies are made available to its employees and to its contractors and Subcontractors to develop adequate and proper awareness of the measures and methods of environmental protection to be used in carrying out the Petroleum Operations; and c the contracts entered into between the Contractor and its contractors and Subcontractors relating to its Petroleum Operations shall include the provisions stipulated herein and any established measures and methods for the implementation of the Contractor's obligations in relation to the environment under this Contract. The Contractor shall prior to conducting any drilling activities prepare and submit for review by the Government contingency plans for dealing with Oil spills fires accidents and emergencies designed to achieve rapid and effective emergency response. The plans referred to

above shall be discussed with the Government and concerns expressed shall be taken into account. In the event of an emergency accident Oil spill or fire arising from Petroleum Operations affecting the environment the Contractor shall forthwith notify the Government and shall promptly implement the relevant contingency plan and perform such Site Restoration as may be necessary in accordance with modern oilfield and petroleum industry practices. In the event of any other emergency or accident arising from the Petroleum Operations affecting the environment the Contractor shall take such action as may be prudent and necessary in accordance with modern oilfield and petroleum industry practices in such circumstances. In the event that the Contractor fails to comply with any of the terms contained in Article 14.7 within a period specified by the Government the Government after giving the Contractor reasonable notice in the circumstances may take any action which may be necessary to ensure compliance with such terms and to recover from the Contractor immediately after having taken such action all costs and expenditures incurred in connection with such action together with such interest as may be determined in accordance with Section 1.7 of Appendix C of this Contract.

14.7 14.7.1 14.7.2 14.8 14.9 On expiry or termination of this Contract or relinquishment of part of the Contract Area the Contractor shall subject to Article 27 remove all equipment and installations from the relinquished area or former Contract Area in a manner agreed with the Government pursuant to an abandonment plan; and b perform all necessary Site Restoration in accordance with modern oilfield and petroleum industry practices and take all other action necessary to prevent hazards to human life or to the property of others or the environment.

14.10 14.11 14.12 14.13 The Contractor shall prepare a proposal for the restoration of site including abandonment plan and requirement of funds for this and the annual contribution. This will be submitted along with the annual Budget for the consideration and approval of the Management Committee. The annual contribution shall be deposited by the Contractor in the Site Restoration fund which will be established in accordance with the scheme notified by the Government. Subject to Section 3.2 of Accounting Procedure any Site Restoration fund scheme formulated by Government and subject to provisions of this Contract any and all costs incurred by the Contractor pursuant to this

Article shall be cost recoverable including but not limited to sinking funds established for abandonment and restoration of the Contract Area. In this Article a reference to Government includes the State Government. Where the Contract Area is partly located in areas forming part of certain national parks sanctuaries mangroves wetlands of national importance biosphere reserves and other biologically sensitive areas passage through these areas shall generally not be permitted. However if there is no passage other than through these areas to reach a particular point beyond these areas permission of the appropriate authorities shall be obtained.

14.14 The obligations and liability of the Contractor for the environment hereunder shall be limited to damage to the environment which occurs after the Effective Date; and results from an act or omission of the Contractor.

ARTICLE 15 RECOVERY OF COST PETROLEUM

15.1 15.2 15.3 15.4 15.5 15.6 15.7 15.8 The Contractor shall be entitled to recover Contract Costs out of a percentage of the total value of Petroleum Produced and Saved from the Contract Area in the Year in accordance with the provisions of this Article. Exploration Costs incurred by the Contractor in the Contract Area upto the date of first Commercial Production shall be aggregated and the Contractor shall be entitled to recover the aggregate of such Exploration Costs out of the Cost Petroleum at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date of such Commercial Production. The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Exploration Costs which it has incurred in any Year after the date of Commercial Production at the rate of one hundred percent 100 per annum of such Exploration Costs beginning from the date such Exploration Costs are incurred. Development Costs incurred by the Contractor in the Contract Area upto the date of first Commercial Production shall be aggregated and the Contractor shall be entitled to recover out of the Cost Petroleum the aggregate of such Development Costs at the rate of one hundred percent 100 per annum of such Development Costs beginning from the date of such Commercial Production. The Contractor shall be entitled to recover out of the Cost Petroleum from the Contract Area the Development Costs which it has incurred after the date of first Commercial Production at the rate of one hundred percent 100 per annum of such Development

Costs beginning from the date such Development Costs are incurred. The Contractor shall be entitled to recover in full during any Year the Production Costs incurred in that Year out of the Cost Petroleum. The Contractor shall be entitled to recover in full during any Year the royalty payments to the Government/State Governments in that Year out of the Cost Petroleum. If during any Year the Cost Petroleum is not sufficient to enable the Contractor to recover in full the Contract Costs due for recovery in that Year in accordance with the provisions of Articles 15.1 to 15.7 then subject to the provisions of Article 15.12a recovery shall first be made of royalty payments; and b recovery shall next be made of the Production Costs; and c recovery shall next be made of the Exploration Costs; and d recovery shall then be made of the Development Costs. The unrecovered portions of Contract Costs shall be carried forward to the following Year and the Contractor shall be entitled to recover such Contract Costs in such Year or the subsequent Years as if such Contract Costs were due for recovery in that Year or the succeeding Years until the unrecovered Contract Costs have been fully recovered out of Cost Petroleum from the Contract Area.

15.9 15.10 15.11 15.12 15.13 The maximum amount of Cost Petroleum to which the Contractor shall be entitled in accordance with the provisions of this Article shall be fifty one percent⁵¹ of the total value of the Petroleum Produced and Saved from the Contract Area. For the purposes of this Article as well as Article 16 costs receipts and income shall be converted into production unit equivalents and vice versa viz both in physical and monetary terms using the relevant prices established pursuant to Article 19 for Crude Oil and Article 21 for Natural Gas. Pending completion of the calculations required to establish definitively the Contractor's entitlement to Cost Petroleum from the Contract Area in any Year the Contractor shall take delivery provisionally of volumes of Crude Oil or Natural Gas representing its estimated Cost Petroleum entitlement calculated with reference to estimated production quantities costs and prices as established by the Contractor and approved by the Management Committee. Such provisional determination of Cost Petroleum shall be made every Quarter on an accumulative basis. Within ninety 90 days of the end of each Year a final calculation of the Contractor's entitlement to Cost Petroleum based on actual production quantities costs and prices for the entire

Year as reflected in audited accounts under Article 25.4.3 shall be undertaken and any necessary adjustments to the Cost Petroleum entitlement shall be agreed upon between the Government and the Contractor within thirty 30 days and made within thirty 30 days thereafter. Where more than one Party constitutes the Contractor the percentage of the total Cost Petroleum from the Contract Area which shall be available to each such Party in any Year for recovery of its share of Contract Costs shall be determined on the basis of the respective Participating Interest of each such Party. The Contractor acknowledges that the cost estimates for Minimum Work Programme are the realistic estimate of expenditure. For the purposes of allowing cost recovery under Article 15 herein read with Section 3 of the Accounting Procedure the cost estimates given by the Contractor in the bid documents towards the Minimum Work Programme in both the Exploration Phases shall be taken as Bench Mark. Any material difference over the Bench Mark shall not be allowed for cost recovery unless the Government on the recommendation of the Management Committee agrees that the cost increase is due to change in circumstances after the Contract comes into effect. For the above purpose an itemized breakup of cost estimates given by the Contractor in the bid documents is placed at Appendix H to this Contract.

ARTICLE 16 PRODUCTION SHARING OF PETROLEUM

16.1

16.2.1 16.2.2 16.2.3 16.2.4 16.2.5 The Parties to this Contract shall share in the Profit Petroleum in each Year in accordance with the provisions of this Article. A Party's share of Profit Petroleum in any Year shall be calculated on the basis of the Investment Multiple actually achieved by the Contractor at the end of the preceding Year for the Contract Area as provided in Appendix D. When the Investment Multiple of the Contractor at the end of any Year is less than one and one half 1.5 the Government shall be entitled to take and receive ninety one percent 91 and the Contractor shall be entitled to take and receive nine percent 9 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than one and one half 1.5 but is less than two 2.0 the Government shall be entitled to take and receive sixty nine percent 69 and the Contractor shall be entitled to take and receive thirty one percent 31 of the total Profit Petroleum from the Contract Area

with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than two 2.0 but is less than two and one half 2.5 the Government shall be entitled to take and receive five percent 5 and the Contractor shall be entitled to take and receive ninety five percent 95 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than two and one half 2.5 but is less than three 3.0 the Government shall be entitled to take and receive five percent 5 and the Contractor shall be entitled to take and receive ninety five percent 95 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. When the Investment Multiple of the Contractor at the end of any Year is equal to or more than three 3.0 but is less than three and one half 3.5 the Government shall be entitled to take and receive five percent 5 and the Contractor shall be entitled to take and receive ninety five percent 95 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year.

16.2.6 16.3 16.4.1 16.4.2 When the Investment Multiple of the Contractor at the end of any Year is equal to or more than three and one half 3.5 the Government shall be entitled to take and receive five percent 5 and the Contractor shall be entitled to take and receive ninety five percent 95 of the total Profit Petroleum from the Contract Area with effect from the start of the succeeding Year. Any balance left to the credit of the Parties in any Site Restoration account opened pursuant to the provision of Article 14.10 after Site Restoration has been done by the Contractor in accordance with the provisions of this Contract and the laws in this regard shall be shared between the Government and the Contractor as per the Investment Multiple reached at the time of ceasing of production from the Contract Area. The Government shall have the option to take its entitlement to Profit Petroleum other than ANG or NANG either in cash or in kind in any Year. In case of ANG or NANG as the case may be the Government shall have the option to take its entitlement to Profit Petroleum in cash or in kind and such option shall be exercised at an interval of every five 5 Years from the commencement of first Commercial Production from the Contract Area. In accordance with the Article 16.4.1 The Government shall exercise such option by

giving a written notice to the Contractor not later than thirtieth 30th June in the preceding Year in which the entitlement is due. Once the Government has exercised its option the same shall continue unless the Government informs the Contractor otherwise.

16.4.3 Where the Government has informed the Contractor of its intention to take its share in kind the Parties shall mutually agree on a procedure for delivery of the Government's share of Profit Petroleum and where relevant the composition of the Petroleum which is to be delivered.

16.5 The value of the Contractor's Investment Multiple at the end of any Year in respect of the Contract Area shall be calculated in the manner provided for and on the basis of the net cash flows specified in Appendix D to this Contract. However the amount of Profit Petroleum to be shared between the Government and the Contractor shall be determined for each Quarter on an accumulative basis. Pending finalisation of accounts Profit Petroleum shall be shared between the Government and the Contractor on the basis of provisional estimated figures of Contract Costs production prices receipts income and any other income or allowable deductions and on the basis of the value of the Investment Multiple achieved at the end of the preceding Year. All such provisional estimates shall be approved by the Management Committee. When it is necessary to convert monetary units into physical units of production equivalents or vice versa the price or prices determined pursuant to Articles 19 and 21 for Crude Oil Condensate and Natural Gas respectively shall be used. Within ninety 90 days of the end of each Year a final calculation of Profit Petroleum based on actual costs quantities prices and income for the entire Year shall be completed and any necessary adjustments to the sharing of Petroleum shall be agreed upon between the Government and the Contractor within thirty 30 days and made within thirty 30 days thereafter.

Explanation The Profit Petroleum due to the Government shall be deposited with Pay Accounts officer or its successor Ministry of Petroleum Natural Gas Government of India Shastri Bhavan New Delhi by 10th of the Month following each Quarter.

16.6 The Profit Petroleum due to the Contractor in any Year from the Contract Area shall be divided amongst the Parties constituting the Contractor in proportion to their respective Participating Interest.

ARTICLE 17 TAXES ROYALTIES RENTALS DUTIES ETC.

17.1 17.2 Companies their employees persons providing any

materials supplies services or facilities or supplying any ship aircraft machinery equipment or plant whether by way of sale or hire to the Companies for Petroleum Operations or for any other purpose and the employees of such persons shall be subject to all fiscal legislation in India except where pursuant to any authority granted under any applicable law they are exempted wholly or partly from the application of the provisions of a particular law or as otherwise provided herein. Pursuant to the provisions of section 42 of the Income tax Act 1961 the allowances specified herein shall apply in computing income tax payable by a Company on its profits and gains from the business of Petroleum Operations in lieu of and not in addition to corresponding allowances provided for under the heading Profits and Gains of Business or Profession in the Income tax Act 1961. Any other allowance which are not specified herein shall be treated in accordance with the provisions of Income tax Act 1961.

17.2.1 Subject to the provisions herein below deductions at the rate of one hundred percent 100 per annum shall be allowed for all expenditures both capital and revenue expenditures incurred in respect of Exploration Operations and drilling operations. The expenditure incurred in respect of Development Operations other than drilling operations and Production Operations will be allowable as per the provisions of the Income tax Act 1961. The expenses so incurred are subject to the following a where any expenditure is not solely incurred on Petroleum Operations or is incurred as part of or in conjunction with any other business only that proportion of the total expenditure which can be proved to the assessing officer to represent a fair proportionate part thereof having regard to all relevant facts and circumstances shall be allowed; b sections 40A and 44C of the Income tax Act 1961 shall apply.

17.2.2 A Company shall be entitled for income tax purposes only to deduct all its unsuccessful Exploration Costs in contract areas covered by other contracts from the aggregate value of Petroleum allocable to the Company from any Fields in the Contract Area in the manner as follows a unsuccessful Exploration Costs incurred in contract areas other than the Contract Area where a Commercial Discovery has been made up to the date of commencement of Commercial Production shall be aggregated and 17.2.3 17.2.4 17.2.5 the Company shall be entitled to deduct such costs at the rate of one hundred per cent 100 per annum; b unsuccessful Exploration Costs

incurred in contract areas other than the Contract Area where a Commercial Discovery has been made after the commencement of Commercial Production shall be deductible at the rate of one hundred per cent 100 per annum of such costs beginning from the Year such costs are incurred. All allowable expenditure incurred prior to the Year in which Commercial Production commences shall be aggregated and the assessed loss for that Year as well as the assessed loss if any incurred in the assessment year relevant to the Year in which Commercial Production commences or in any subsequent assessment year shall be carried forward to succeeding assessment years and set off as provided in the Income tax Act 1961. For any or all accumulated expenditures incurred in respect of Exploration Operations and drilling operations prior to the date of commercial production Companies shall have option to amortize such expenditures over a period of ten 10 years from the date of first commercial production. The profits and gains of the business of the Parties comprising the Contractor consisting of Petroleum Operations shall for the purpose of levy of income tax under the Income tax Act 1961 be computed on the basis of the value determined in accordance with Article 19 of its Participating Interest share of Crude Oil produced and saved and sold or otherwise disposed of from the Contract Area and from any revenue realised on the sale of Associated or Non Associated Natural Gas referred to in Article 21 as well as any other gains or receipts from Petroleum Operations as reduced by the deductions as specified herein and except as herein provided all the provisions of the Income tax Act 1961 shall apply.

17.2.6 Companies shall be eligible for benefits available under section 80 IA of the Income tax Act 1961 as applicable from time to time.

17.3 For the purposes of Article 17.2 and section 42 of the Income tax Act 1961

17.3.1 The following terms used in section 42 of the Income tax Act 1961 shall have the meanings corresponding to the terms used in this Contract and defined in Article 1 as follows

a agreement means this Contract as defined in Article 1;

b commercial production shall have the meaning assigned in Article 1.

17.3.2 The terms assessing officer assessed loss and assessment year shall have the meaning as defined in the Income tax Act 1961.

17.3.3 The other terms used herein and defined in Article 1 shall have the meaning therein ascribed.

17.4 17.5 17.6 17.7 17.8 17.9

Companies Lessee shall be required to pay royalty to the Government Lessor for offshore areas at the rate of ten percent 10 of the wellhead value of Crude Oil and Natural Gas. In case of an onshore area Companies shall be required to pay to the State Governments Lessor at the rate of twelve point five zero percent 12.5 of the wellhead value of Crude Oil and ten percent 10 of the wellhead value of Natural Gas. In case of an offshore area falling beyond four hundred 400 metres both the rate of royalty payable by Companies Lessee to the Government Lessor shall be at the rate of five percent 5 of the wellhead value of Crude Oil and Natural Gas for the first seven years from the date of commencement of Commercial Production in the Field. The valuation of Crude Oil and Natural Gas shall be as per the Article 19 and Article 21 respectively. The royalty amount due to Government State Governments shall be payable latest by the end of the succeeding Month. Machinery plant equipment materials and supplies imported by the Contractor and its Subcontractors solely and exclusively for use in Petroleum Operations under this Contract or similar contracts with the Government where customs duty has been exempted by the Government shall be exempt from customs duties and export duties or other charges on reexportation of the said items in accordance with applicable legislation. The Government shall have the right to inspect the records and documents of the physical item or items for which an exemption has been provided pursuant to Article 17.5 to determine that such item or items are being or have been imported solely and exclusively for the purpose for which the exemption was granted. The Government shall also be entitled to inspect such physical items wherever located to ensure that such items are being used for the purpose herein specified and any item not being so used shall immediately become liable to payment of the applicable customs duties. Subject to Article 27 the Contractor and its Subcontractors may sell or otherwise transfer in India all imported items which are no longer required for Petroleum Operations subject to applicable laws including rules regulations procedures notifications etc. governing customs duties and sale or disposal of such items. Any sales tax or tax of similar nature payable on the sales of Petroleum under this Contract shall be borne and reimbursed by the buyers. Subject to the provisions herein above provided the Contractor shall be liable for payment

of a annual license charges and rental fees and other charges under the Rules; b charges payable by specified industries or in connection with Petroleum Operations under applicable legislation; c payments for purchase lease or rental of land or land rights in connection with Petroleum Operations; d taxes fees or charges for specific services rendered on request or to the public generally; e customs duties except for those items subject to exemption as provided in Article 17 applicable at the rates specified from time to time; and f stamp duties registration fees license fees taxes such as taxes on property or assets not calculated by reference to income or otherwise exempted or other levies fees or charges of a nondiscriminatory nature and generally applicable in India or in the State where Petroleum Operations are being conducted.

17.10 If any change in or to any Indian law rule or regulation dealing with income tax or other corporate tax export import tax excise customs duty or any other levies duties or taxes imposed on Petroleum or dependent upon the value of Petroleum results in a material change to the expected economic benefits accruing to any of the Parties after the date of execution of the Contract the Parties shall consult promptly in good faith to make necessary revisions and adjustments to the Contract in order to maintain such expected economic benefits to each of the Parties provided however that the expected economic benefits to the Parties shall not be reduced as a result of the operation of this Article.

ARTICLE 18 DOMESTIC SUPPLY SALE DISPOSAL AND EXPORT OF CRUDE OIL AND CONDENSATE

18.1 18.2 18.3 18.4 Until such time as the total availability to the Government of Crude Oil and Condensate from all Petroleum production activities in India meets the total national demand each Company comprising the Contractor shall be required to sell in the domestic market in India all of the Company's entitlement to Crude Oil and Condensate from the Contract Area in order to assist in satisfying the national demand. If during any Year India attains Self-sufficiency the Government shall promptly thereafter but in no event later than the end of the first Quarter of the following Year advise the Companies by written notice. In such event as from the end of the second Quarter of the following Year or such earlier date as the Parties may mutually agree domestic sale obligation shall be suspended and the Company shall have the right to lift and export

its Participating Interest share of Crude Oil and Condensate until such time if any as Self-sufficiency shall have ceased to exist. If Self-sufficiency ceases to exist during a Year the Government shall recover its position to ask Companies under Article 18.1 in respect of the following Year by giving ninety 90 days notice thereof to the Companies to sell Crude Oil and Condensate in the Indian domestic market. Upon India achieving Self-sufficiency the Companies shall be entitled to freely lift and export any Crude Oil and Condensate pursuant to this Article 18 subject to Governments generally applicable destination restrictions to countries with which the Government for policy reasons has severed or restricted trade. No later than sixty 60 days prior to the commencement of production in a Field and thereafter no less than sixty 60 days before the commencement of each Year the Contractor shall cause to be prepared and submitted to the Parties a production forecast setting out the total quantity of Crude Oil that it estimates can be produced from a Field during the succeeding Year based on a maximum efficient rate of recovery of Crude Oil from that Field in accordance with modern oilfield and petroleum industry practices. No later than thirty 30 days prior to the commencement of each Quarter the Contractor shall inform its estimate of production for the succeeding Quarter and shall endeavour to produce the forecast quantity for each Quarter.

18.5 Each Company comprising the Contractor shall throughout the term of this Contract have the right to separately take in kind and dispose of all its share of Cost Petroleum and Profit Petroleum and shall have the obligation to lift the said Petroleum on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the other Companies.

18.6 18.7 The Government shall throughout the term of this Contract have the right to separately take in kind and dispose of its share of Crude Oil and shall have the obligation to lift the said Oil on a current basis and in such quantities so as not to cause a restriction of production or inconvenience to the Contractor. For the purpose of implementing the provisions of this Article a Crude lifting procedure and Crude sales agreement based on generally acceptable international terms shall be agreed upon by the Contractor with buyers no later than six 6 months or such shorter period as may be mutually agreed between the Contractor and buyers with the consent of Government prior to the

commencement of production in a Field. Such lifting procedure shall be made available to all the Parties to this Contract.

ARTICLE 19 VALUATION OF PETROLEUM

19.1 19.2 19.3 19.3.1 19.4 For the purpose of this Contract the value of Crude Oil Condensate and Natural Gas refer Article 21 shall be based on the price determined as provided herein. A price for Crude Oil shall be determined for each Month or such other period as the Parties may agree hereinafter referred to as the Delivery Period in terms of United States Dollars per Barrel on import parity basis with marine freight being determined on the basis of nearest port to the Contract Area for Crude Oil produced and sold or otherwise disposed of from Contract Area for each Delivery Period in accordance with the appropriate basis for that type of sale or disposal specified below. Subject to the provisions of this Article 19 it is clearly understood that the actual prices received by the Companies from the sales will form the basis for the purposes of cost recovery Profit Petroleum sharing and payment of royalty as provided in the Articles 15 16 and 17 respectively. The basis of valuation given in this Article for the purpose of Article 15 16 and 17 shall apply only where Government is of the view that sale prices realised by the Companies are not consistent with the price realisable at Arms Length Sales. In the event that some or all of a Company's or Contractors total sales of Crude Oil during a Delivery Period are made to third parties at Arms Length Sales all sales so made shall be valued at the weighted average of the prices actually received by a Company calculated by dividing the total receipts from all such sales at the Delivery Point by the total number of Barrels of the Crude Oil sold in such sales. Each Company constituting the Contractor shall separately submit to the designated nominee of the Government within fifteen 15 days of the end of each Delivery Period a report containing the actual prices obtained in their respective Arms Length Sales for any Crude Oil. Such reports shall distinguish between term sales and spot sales and itemize volumes customers prices received and credit terms and a Company shall allow the designated nominees of the Government to examine the relevant sales contracts. For the purpose of determining price at Arms Length Sales the price of the Crude Oil at which sale takes place will generally be based on per Barrel of one or more crude oils which at the time of calculation are being freely and actively traded in the

international market and are similar in characteristics and quality to the Crude Oil in respect of which the price is being determined selling price to be ascertained from Platts Crude Oil Market Wire daily publication Platts or the spot market for the same crude oils ascertained in the same manner whichever price more truly reflects the current value of such crude oils. For any Delivery Period in which sales take place the price shall be the arithmetic average price per Barrel determined by calculating the average for such Delivery Period of the mean of the high and low FOB prices for each day of the crude oils selected for comparison adjusted for differences in the Crude Oil and the crude oils being compared for quality transportation costs delivery time quantity payment terms and other contract terms to the extent known and other relevant factors. In the event that Platts ceases to be published or is not published for a period of thirty 30 consecutive days the Parties shall agree on an alternative daily publication. The Contractor shall make available all the data pertaining to pricing of Crude to enable Government to determine the proposed sale price by the Contractor each constituent of the Contractor reflects a fair market price for the Crude. In the event that at the relevant time no crude oils of similar quality to the Crude Oil to be sold are being actively traded in the international markets where prices can be ascertained by international publication or the official FOB selling prices and the international spot market price vary widely between producers the Parties shall meet in good faith to determine an appropriate pricing basis. The Contractor shall determine the relevant prices in accordance with this Article and the calculation basis of calculation and the price determined shall be supplied to the Government and shall be subject to agreement by the Government. In the event that the Parties fail to reach agreement on any matter concerning selection of the crude oils for comparison the calculation the basis of or mechanism for the calculation of the prices the prices arrived at the adjustment of any price or generally about the manner in which the prices are determined according to the provisions of this Article within thirty 30 days or such longer period as may be mutually agreed between the Parties from the date of commencement of Commercial Production or the end of each Delivery Period thereafter any Party may refer the matter or matters in issue for final determination by a sole expert or arbitrator

appointed as provided in Article 33. If the matter is referred to the sole expert within ten (10) days of the said appointment the Parties shall provide the expert with all information they deem necessary or as the expert may reasonably require. Within fifteen (15) days from the date of his appointment the expert shall report to the Parties on the issues referred to him for determination applying the criteria or mechanism set forth herein and indicate his decision thereon to be applicable for the relevant Delivery Period for Crude Oil and such decision shall be accepted as final and binding by the Parties.

19.4.1 19.5 19.6 19.6.1 19.6.2 19.6.3 Any price or pricing mechanism agreed by the Parties pursuant to the provisions of this Article shall not be changed retroactively.

19.7 19.8 In the event that all sales of Crude Oil in a Delivery Period by a Company constituting the Contractor are to be made to an Affiliate the Parties may agree on an alternative method of valuing the Crude Oil for the purposes of this Contract provided that such alternative method results in an internationally competitive fair market valuation for that Delivery Period. In case of disagreement the decision of the Government on determining a Crude price in case of sales to an Affiliate shall be final and binding. In the event that in any Delivery Period there is more than one type of sales referred to in Articles 19.3 and 19.7 then for the purpose of calculating Cost Petroleum and Profit Petroleum entitlement and royalty payments pursuant to Articles 15, 16 and 17 respectively a single price per Barrel of Crude Oil for all the sales for the relevant Delivery Period shall be used. Such single price shall be the weighted average of the prices determined for each type of sale weighted by the respective volumes of Crude Oil sold in each type of sale in the relevant Delivery Period.

19.9 The provisions specified above for the determination of the price of sales of Crude Oil shall apply mutatis mutandis to Condensates.

19.10 The price of Natural Gas shall be determined as provided in Article 21.

ARTICLE 20 CURRENCY AND EXCHANGE CONTROL PROVISIONS

20.1 Subject to the provisions herein and to compliance with the relevant provisions of the laws of general application in India governing currency and foreign exchange and related administrative instructions and procedures issued thereunder on a non-discriminatory basis each Foreign Company comprising the Contractor shall during the term of this Contract have the right to repatriate abroad in United States Dollars or any

other freely convertible currency acceptable to the Government and the Foreign Company the net proceeds of sales of Petroleum in India; b receive retain and use abroad the proceeds of any export sales of Petroleum under the Contract; c open maintain and operate bank accounts with reputable banks both inside and outside India for the purpose of this Contract; d freely import through normal banking channels funds necessary for carrying out the Petroleum Operations; e convert into foreign exchange and repatriate sums imported pursuant to d above in excess of any of its requirements; and f make payments outside of India for purchases services and loans obtained abroad without the requirement that funds used in making such payments must come from or originate in India. Provided however that repatriation pursuant to subparagraphs a and e and payments pursuant to subparagraph f shall be subject to the provisions of any treaties and bilateral arrangements between the Government and any country with respect to payments to or from that country.

20.2 The rates of exchange for the purchase and sale of currency by the Companies shall be the prevailing rates of general application determined by the Reserve Bank of India or such other financial body as may be mutually agreed by the Parties and for accounting purposes under this Contract these rates shall apply as provided in Section 1.6 of Appendix C.

20.3. A Party other than a Foreign Company comprising the Contractor shall be governed by the relevant currency and foreign exchange laws and related administrative instructions and procedures issued thereunder.

20.4 Indian Companies shall have right to remit their portion of expenditure in foreign currencies in accordance with the exchange control provisions.

ARTICLE 21 NATURAL GAS

21.1 Subject to Article 21.2 the Indian domestic market shall have the first call on the utilisation of Natural Gas discovered and produced from the Contract Area. Accordingly any proposal by the Contractor relating to Discovery and production of Natural Gas from the Contract Area shall be made in the context of the Government's policy for the utilisation of Natural Gas and shall take into account the objectives of the Government to develop its resources in the most efficient manner and to promote conservation measures.

21.2 The Contractor shall have the right to use Natural Gas produced from the Contract Area for the purpose of Petroleum Operations including reinjection for pressure maintenance in Oil Fields gas

lifting and captive power generation required for Petroleum Operations.21.3 For the purpose of sales in the domestic market pursuant to this Article 21 the Contractor shall have freedom to market the Gas and sell its entitlement.21.4 Associated Natural Gas ANG21.4.1 In the event that a Discovery of Crude Oil contains ANG the Contractor shall declare in the proposal for the declaration of the said Discovery as a CommercialDiscovery as specified in Article 10 whether and by what amount the estimated production of ANG is anticipated to exceed the quantities of ANG which will be usedin accordance with Article 21.2 such excess being hereinafter referred to as the Excess ANG. In such an event the Contractor shall indicate whether on the basis ofthe available data and information it has reasonable grounds for believing that the Excess ANG could be commercially exploited in accordance with the terms of thisContract along with the Commercial Production of the Crude Oil from the Contract Area and whether the Contractor intends to so exploit the Excess ANG.21.4.2 Based on the principle of full utilisation and minimum flaring of ANG a proposed development plan for an Oil Discovery shall to the extent practicable include a planfor utilisation of the ANG including estimated quantities to be flared reinjected and to be used for Petroleum Operations; and if the Contractor proposes tocommercially exploit the Excess ANG for sale in the domestic market in accordance with Governments policy or elsewhere the proposed plans for such exploitation.21.4.3 21.4.4 If the Contractor wishes to exploit the Excess ANG subject to Article 21.1 the Contractor shall be free to explore markets for the commercial exploitation of the saidExcess ANG and submit its proposals for such exploitation to the Government in accordance with Article 21.4.2.Where the Contractor is of the view that the Excess ANG cannot be commercially exploited and chooses not to exploit the said Excess ANG or is unable to find a market for the Excess ANG pursuant to Article 21.4.3 the Government shall be entitled to take and utilise such Excess ANG free of any costcharge.21.4.5 If the Government elects to take the Excess ANG as provided in Article 21.4.4a the Contractor shall deliver such Excess ANG to the Government or its nominee free of any costcharge at the downstream flange of the GasOil separationfacilities;b the Contractor shall based on sound petroleum engineering practices install such facilities as would facilitate insofar as

practicable uninterrupted delivery of such Excess ANG to the Government or its nominee; c the cost of all facilities installed pursuant to paragraph b above shall be borne by the Government or its nominee; d the Government or its nominee shall bear all costs including gathering treating processing and transporting costs beyond the downstream flange of the Gas Oil separation facilities; and e the delivery of such Excess ANG shall be subject to procedures to be agreed between the Government or its nominee and the Contractor prior to such delivery such procedures to include matters relating to timing of offtake of such Excess ANG. Parties shall endeavour that such procedures do not restrict Oil production.

21.4.6 The Excess ANG which is not commercially exploited by the Contractor or taken by the Government or its nominee pursuant to this Article 21 shall be returned to the subsurface structure or flared or otherwise disposed off as approved by the Government in the context of the Development Plan provided that flaring will be resorted to only for small quantities and as a last resort.

21.4.7 As soon as practicable after the submission of the proposed development plan the Contractor and the Government or its nominee shall meet to discuss the sale and disposal of any ANG discovered with a view to giving effect to the provisions of this Article 21 in a timely manner.

21.5 Non Associated Natural Gas NANG

21.5.1 In the event of a Discovery of NANG in the Contract Area the Contractor shall promptly report such Discovery to the Management Committee and the

21.5.2 21.5.3 21.5.4 Government and the provisions of Articles 10.1 and 10.2 shall apply. The remaining provisions of Article 10 would apply to the Discovery and development of NANG only insofar as they are not inconsistent with the provisions of this Article. Notwithstanding the provisions of Article 3 the Contractor shall be entitled to retain the Discovery Area subject to the provisions of this Article 21. If pursuant to Article 10.1 the Contractor gives notification that the Discovery is of potential commercial interest the Contractor shall submit to the Management Committee within one 1 year from the date of notification of the above said Discovery the proposed Appraisal Programme including a Work Programme and Budget to carry out an adequate and effective appraisal of such Discovery to determine i without delay whether such Discovery is a Commercial Discovery and ii with reasonable precision the boundaries of the area to

be delineated as the Development Area. Such proposed Appraisal Programme shall be supported by all relevant data such as Well data Contractors best estimate of reserve range and production potential and shall indicate the date of commencement of the proposed Appraisal Programme. The proposed Appraisal Programme together with the Work Programme and Budget referred to in Article 21.5.2 shall be reviewed by the Management Committee within sixty 60 days of its submission by the Contractor. The Management Committee shall offer its comments within the said period. The said Appraisal Programme together with the Work Programme and Budget submitted by the Contractor as revised or modified or amended in light of the Management Committee review and advice shall be adopted as the Appraisal Programme and the Contractor shall promptly proceed with implementation of the said Programme. If on the basis of the results of the Appraisal Programme the Contractor is of the opinion that NANG has been discovered in commercial quantities it shall submit to the Management Committee as soon as practicable but not later than three 3 years from the date of notification of the aforementioned Discovery a proposal for the declaration of the Discovery as a Commercial Discovery. Such proposal shall take into account the Governments policies on Gas utilization and propose alternative options if any for use or consumption of the NANG and be accompanied by a report on the Discovery supported by inter alia technical and economic data evaluations interpretations and analyses of such data and feasibility studies relating to the Discovery prepared by or on behalf of the Contractor and other relevant information. If no proposal is submitted to the Management Committee by the Contractor within three 3 years from the said Discovery the Contractor shall relinquish its rights to develop such Discovery and the area relating to such Discovery shall be excluded from the Contract Area.

21.5.5 21.5.6 21.5.7 Where the Contractor has submitted a proposal for the declaration of a Discovery as a Commercial Discovery the Management Committee shall consider the proposal of the Contractor with reference to commercial utilization or commercial development of the NANG in the domestic market or elsewhere and in the context of Governments policy on Gas utilization and the chain of activities required to bring the NANG from the Delivery Point to potential consumers in the domestic market or elsewhere. The

Management Committee may within eighty five 85 days of the submission of the said proposal request the Contractor to submit any additional information on the Discovery the anticipated markets or any other related matter that may reasonably be required to facilitate a review. The Contractor shall submit therequired information within thirty 30 days of the request by the Management Committee. The Management Committee will advise the Contractor of its review within one hundred and thirty five 135 days from the submission of proposal or within fifty five 55 days from the receipt of additional information as the case may be on the proposal made by the Contractor to declare the Discovery as a Commercial Discovery. If the Contractor declares the Discovery a Commercial Discovery after taking into account the advice of the Management Committee as referred to in the Article 21.5.5 the Contractor shall within one 1 year of the declaration of the Discovery as a Commercial Discovery submit a development plan for the development of the Discovery to the Management Committee for approval. Such plan shall be supported by all relevant information including inter alia the information required in Article 10.7. Unless otherwise agreed by the Management Committee it shall consider the proposed development plan and give their approval within one hundred and sixty five 165 days of submission thereof or eighty five 85 days from the receipt of the clarifications additional information from the Contractor. Any clarification additional information required by the Management Committee shall be asked for within eighty five 85 days of receipt of the proposal from the Contractor. The Contractor shall provide such additional information within thirty 30 days from the receipt of request by the Management Committee. If the Management Committee fails to convey its decision within one hundred and sixty five 165 days from the submission of the development plan or eighty five 85 days from the receipt of the clarifications additional information whichever is later the Contractor may submit the development plan for the approval of the Government. Also where the Management Committee rejects the development plan of the Contractor the Contractor can submit the development plan for the approval of the Government. 21.5.8 Where the development plan is submitted to the Government for approval pursuant to Article 21.5.7 the Government shall convey its decision within one hundred

and fifteen 115 days from the date of receipt of the proposal from the Contractor. Government where it considers necessary may ask for clarifications and additional information from the Contractor within eighty five 85 days and shall convey its decision within fifty five 55 days from the date of receipt of such clarifications and additional information.

21.5.9 If the Government has failed to approve or disapproves the Contractor's proposed development plan within one hundred and fifteen 115 days from receipt or within fifty five 55 days from the receipt of clarifications and information from the Contractor as mentioned in Article 21.5.8 the Government shall advise the Contractor in writing of the reasons for such failure or disapproval and the Government and the Contractor shall meet to discuss the said development plan and the reasons for the said failure to approve or disapproval and use their best efforts to agree on appropriate modifications thereto to meet the Government's concerns or objections. Thereafter the Contractor shall have the right to resubmit within eighty five 85 days of communication from the Government the proposed development plan duly amended to meet the Government's concerns. Such right of resubmission of the proposed development plan shall be exercisable by the Contractor only once. The Government will respond to the resubmitted plan within one hundred and fifteen 115 days. If no such plan is submitted to the Government within the above specified period the Contractor shall relinquish its right to develop such Gas Discovery and such Discovery shall be excluded from the Contract Area.

21.5.10 In the event that the Management Committee or Government as may be the case approves the Contractor's development plan for the development of such Commercial Discovery with such modifications and amendments as the Management Committee or Government as may be the case may approve the said Gas Discovery shall be promptly developed by the Contractor in accordance with the approved plan which shall be the Development Plan.

21.5.11 The Contractor will have a two 2 years period from the date of approval of the Development Plan by the Management Committee or Government to tie up the markets for sale of Non-associated Natural Gas.

21.5.12 In the event the Contractor does not commence development of such Discovery within ten 10 years from the date of the first Discovery Well the Contractor shall relinquish its right to develop such Discovery and the area relating to such

Discovery shall be excluded from the Contract Area.

21.6 Valuation of Natural Gas

21.6.1 21.6.2 The Contractor shall endeavour to sell all Natural Gas produced and saved from the Contract Area at armslength prices to the benefits of Parties to the Contract. Notwithstanding the provision of Article 21.6.1 Natural Gas produced from the Contract Area shall be valued for the purposes of this Contract as follows a Gas which is used as per Article 21.2 or flared with the approval of the Government or reinjected or sold to the Government pursuant to Article 21.4.5 shall be ascribed a zero value; b Gas which is sold to the Government or any other Government nominee shall be valued on the terms and conditions actually obtained including pricing formula and delivery; and Explanation However it is clarified that this provision would apply only when the sale is made to the Government or Government nominee under the provisions of the Contract c Gas which is sold or disposed of otherwise than in accordance with paragraph a or b shall be valued on the basis of competitive arms length sales in the region for similar sales under similar conditions.

21.7 The formula or basis on which the prices shall be determined pursuant to Article 21.6 shall be approved by the Government prior to the sale of Natural Gas to the consumers/buyers within sixty 60 Business Days from the receipt of proposal or from the date of receipt of clarification/additional information where asked for by the Government. For granting this approval Government shall take into account the prevailing policy if any on pricing of Natural Gas including any linkages with traded liquid fuels and it may delegate or assign this function to a regulatory authority as and when such an authority is in existence and in place.

ARTICLE 22 EMPLOYMENT TRAINING AND TRANSFER OF TECHNOLOGY

22.1 22.2 22.3 Without prejudice to the right of the Contractor to select and employ such number of personnel as in the opinion of the Contractor are required for carrying out Petroleum Operations in a safe cost effective and efficient manner the Contractor shall to the maximum extent possible employ and require the Operator and Subcontractors to employ citizens of India having appropriate qualifications and experience taking into account experience required in the level and nature of the Petroleum Operations. The Operator shall offer a mutually agreed number of Indian nationals the opportunity for on the job training and practical experience in Petroleum

Operations during the Exploration Period. Not later than six 6 months after approval of the Development Plan the Operator shall in consultation with the Government establish and implement training programmes for staff positions in each phase and level of Petroleum Operations including skilled technical executive and management positions with a view to ensuring employment of nationals of India and gradual and progressive reduction of foreign personnel. At the request of the Government the Foreign Companies shall separately endeavour to negotiate in good faith technical assistance agreements with the Government or a company nominated by Government for this purpose setting forth the terms by which each Foreign Company constituting the Contractor may render technical assistance and make available commercially proven technical information of a proprietary nature for use in India by the Government or the company nominated by Government. The issues to be addressed in negotiating such technical assistance agreements shall include but not be limited to licensing issues royalty conditions confidentiality restrictions liabilities costs and method of payment.

ARTICLE 23 LOCAL GOODS AND SERVICES

23.1 In the conduct of Petroleum Operations the Contractor shall give preference to the purchase and use of goods manufactured produced or supplied in India provided that such goods are available on terms equal to or better than imported goods with respect to timing of delivery quality and quantity required price and other terms;

b employ Indian Subcontractors having the required skills or expertise to the maximum extent possible insofar as their services are available on comparable standards with those obtained elsewhere and at competitive prices and on competitive terms; provided that where no such Subcontractors are available preference shall be given to non-Indian Subcontractors who utilise Indian goods to the maximum extent possible subject however to the proviso in paragraph a above;

c ensure that provisions in terms of paragraphs a to b above are contained in contracts between the Operator and its Subcontractors.

23.2 Subject to Article 8.3f the Contractor shall establish appropriate procedures including tender procedures for the acquisition of goods and services which shall ensure that suppliers and Subcontractors in India are given adequate opportunity to compete for the supply of goods and services. The tender procedures shall include inter alia the financial

amounts or value of contracts which will be awarded on the basis of selective bidding or open competitive bidding the procedures for such bidding and the exceptions to bidding in cases of emergency and shall be subject to the approval of the Management Committee.

23.3 Within sixty 60 days after the end of each Year the Contractor shall provide the Government with a report outlining its achievements in utilising Indian resources during that Year in accordance with Section 10 of Appendix C to this Contract.

23.4 In this Article goods means equipment materials and supplies.

ARTICLE 24 INSURANCE AND INDEMNIFICATION

24.1 Insurance

24.1.1 The Contractor shall during the term of this Contract maintain and obtain insurance coverage for and in relation to Petroleum Operations for such amounts and against such risks as are customarily or prudently insured in the international petroleum industry in accordance with modern oilfield and petroleum industry practices and shall furnish to the Government certificates evidencing that such coverage is in effect. Such insurance policies shall include the Government as additional insured and shall waive subrogation against the Government. The said insurance shall without prejudice to the generality of the foregoing cover a loss or damage to all installations equipment and other assets for so long as they are used in or in connection with Petroleum Operations; provided however that if for any reason the Contractor fails to insure any such installation equipment or assets it shall replace any loss thereof or repair any damage caused thereto;

b loss damage or injury caused by pollution in the course of or as a result of Petroleum Operations;

c loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor may be liable;

d any claim for which the Government may be liable relating to the loss of property or damage or bodily injury suffered by any third party in the course of or as a result of Petroleum Operations for which the Contractor is liable to indemnify the Government or the State Government;

e with respect to Petroleum Operations offshore the cost of removing wrecks and cleaning up operations following any accident in the course of or as a result of Petroleum Operations;

and f the Contractor's and/or the Operator's liability to its employees engaged in Petroleum Operations.

24.1.2 The Contractor shall require its Subcontractors to obtain and maintain insurance

against the risks referred to in Article 24.1.1 relating mutatis mutandis to suchSubcontractors.24.2
IndemnitySubject to Article 4.7 the Contractor shall indemnify defend and hold the Government and
the State Government harmless against all claims losses and damages of anynature whatsoever
including without limitation claims for loss or damage to property or injury or death to persons
caused by or resulting from any PetroleumOperations conducted by or on behalf of the
Contractor.ARTICLE 25RECORDS REPORTS ACCOUNTS AND AUDIT25.1 25.2 25.3 25.4.1
25.4.2 25.4.3 25.4.4 25.5 25.6 25.7 The Contractor shall prepare and maintain in original at an office
in India accurate and current books records reports and accounts of its activities for and in
connectionwith Petroleum Operations so as to present a fair clear and accurate record of all its
activities expenditures and receipts.Based on generally accepted and recognised accounting
principles and modern petroleum industry practices record books accounts and accounting
procedures in respectof Petroleum Operations shall be maintained on behalf of the Contractor by
the Operator at its business office in India in accordance with the Accounting Procedure tothis
Contract.The Contractor shall submit to the Government regular Statements and reports relating to
Petroleum Operations as provided in AppendixC.The annual audit of accounts shall be carried out
on behalf of the Contractor by a qualified independent firm of recognised chartered accountants
registered inIndia.The appointment of auditor and the scope of audit should have prior approval of
the Management Committee.The Contractor shall submit the audited accounts to the Management
Committee for approval within sixty 60 days from the end of the Year. The ManagementCommittee
shall consider and approve the auditors report within thirty 30 days after the submission of such
report.Copy of the auditors report shall be submitted to the Government within thirty 30 days after
the approval of the Management Committee.The Government shall have the right to audit the
accounting records of the Contractor in respect of Petroleum Operations as provided in the
Accounting Procedure.The accounting and auditing provisions and procedures specified in this
Contract are without prejudice to any other requirements imposed by any statute in Indiaincluding
without limitation any specific requirements of the statutes relating to taxation of Companies.For the

purpose of any audit referred to in Articles 25.5 the Contractor shall make available in original to the auditor all such books records accounts and other documents and information as may be reasonably required by the auditor during normal business hours.

ARTICLE 26 INFORMATION DATA CONFIDENTIALITY INSPECTION AND SECURITY

26.1 26.2 26.3 The Contractor shall promptly after they become available in India provide the Government free of cost with all data obtained as a result of Petroleum Operations under the Contract including but not limited to geological geophysical geochemical petrophysical engineering Well logs maps magnetic tapes cores cuttings and production data as well as all interpretative and derivative data including reports analyses interpretations and evaluation prepared in respect of Petroleum Operations hereinafter referred to as Data. Data shall be the property of the Government provided however that the Contractor shall have the right to make use of such Data free of cost for the purpose of Petroleum Operations under this Contract as provided herein. The Contractor may for use in Petroleum Operations retain copies or samples of material or information constituting the Data and with the approval of the Government original material except that where such material is capable of reproduction and copies have been supplied to the Government the Contractor may subject to the right of inspection by the Government export subject to any applicable regulations samples or other original Data for processing or laboratory examination or analysis provided that representative samples equivalent in quality size and quantity or where such material is capable of reproduction copies of equivalent quality have first been delivered to the Government. The Contractor shall keep the Government currently advised of all developments taking place during the course of Petroleum Operations and shall furnish the Government with full and accurate information and progress reports relating to Petroleum Operations on a daily Monthly Yearly or other periodic basis as Government may reasonably require provided that this obligation shall not extend to proprietary technology. The Contractor shall meet with the Government at a mutually convenient location in India to present the results of all geological and geophysical work carried out as well as the results of all engineering and drilling operations as soon as such Data becomes available to the Contractor.

26.4 All Data

information and reports obtained or prepared by for or on behalf of the Contractor pursuant to this Contract shall be treated as confidential and subject to the provisions herein below the Parties shall not disclose the thereof to any third party without the consent in writing of the other Parties.

26.5 The obligation specified in Article 26.4 shall not operate so as to prevent disclosurea to Affiliates contractors or Subcontractors for the purpose of Petroleum Operations;b to employees professional consultants advisers data processing centres and laboratories where required for the performance of functions in connection withPetroleum Operations for any Party comprising the Contractor;c to banks or other financial institutions in connection with Petroleum Operations;d to bonafide intending assignees or transferees of a Participating Interest of a Party comprising the Contractor or in connection with a sale of the stock or shares of aParty comprising the Contractor;e to the extent required by any applicable law or in connection with any legal proceedings or by the regulations of any stock exchange upon which the shares of aParty comprising the Contractor are quoted;f to Government departments for or in connection with the preparation by or on behalf of the Government of statistical reports with respect to Petroleum Operationsor in connection with the administration of this Contract or any relevant law or for any purpose connected with Petroleum Operations; andg by a Party with respect to any Data or information which without disclosure by such Party is generally known to the public.

26.6 26.7 26.8 Any Data information or reports disclosed by the Parties comprising the Contractor to any other person pursuant to Article 26.5 a to d shall be disclosed on the termsthat such Data information or reports shall be treated as confidential by the recipient. Prompt notice of disclosures made by Companies pursuant to Article 26.5 shall begiven to the Government.Any Data information and reports relating to the Contract Area which in the opinion of the Government might have significance in connection with offers by theGovernment of acreages may be disclosed by the Government for such purpose. Government may also disclose such Data or information for any explorationprogramme to be conducted by a third party in adjoining areas with the consent of the Contractor for better understanding of regional geological setup and suchconsent by the Contractor shall not be unreasonably withheld.Where an area ceases to be part of the

Contract Area the Contractor shall hand over all the originals and copies of the Data and information with respect to that part to the Government within a period of one 1 year from the date of relinquishment or surrender. The Contractor shall however be allowed to retain one copy of the Data in its possession for its own use where required and shall not use the Data for sale or any other purposes. Subject to the provisions of this Article the Contractor shall keep all Data information confidential. Explanatory Note Pursuant to this Article 26 and notwithstanding any provisions in the contract to the contrary the Government shall have the right to disclose and freely use all data and information at its sole discretion except for data of proprietary nature such as interpretation report to any party on or after three 3 Years from acquisition of such data in order to promote exploration and production activities in the country. For any relinquished areas the government shall have the right to disclose and freely use all the data immediately after such relinquishment. 26.9 26.10 26.11 The Government shall at all reasonable times through duly authorised representatives be entitled to observe Petroleum Operations and to inspect all assets books records reports accounts contracts samples and Data kept by the Contractor or the Operator in respect of Petroleum Operations in the Contract Area provided however that the Contractor shall not be required to disclose any proprietary technology. The duly authorised representatives shall be given reasonable assistance by the Contractor for such functions and the Contractor shall afford such representatives reasonable use of all facilities and privileges afforded to its own personnel in the field including the use of office space and housing for a period not exceeding 30 mandays in a Year and thereafter at the cost of Government. The said representatives shall be entitled to make a reasonable number of surveys measurements drawings tests and copies of documents take samples and make reasonable use of the equipment and instruments of the Contractor provided that such functions shall not unduly interfere with the Contractor's Petroleum Operations. The Contractor shall give reasonable advance notice to the Government or to any other authority designated by the Government for such purpose of its programme of conducting surveys by aircraft or by ships indicating inter alia the name of the survey to be conducted approximate extent of the area to be covered the duration of the survey the

commencement date and the name of the airport or port from which the survey aircraft or ship will commence its voyage. The Government or the authority designated by the Government for such purpose shall have the right to inspect any aircraft or ship used by the Contractor or a Subcontractor carrying out any survey or other operations in the Contract Area and shall have the right to put on board such aircraft or ship Government officers in such number as may reasonably be necessary to ensure compliance by the Contractor or the Subcontractor with the security requirements of India.

ARTICLE 27 TITLE TO PETROLEUM DATA AND ASSETS 27.1 27.2 27.3 27.4 27.5 27.6 27.7

The Government is the sole owner of Petroleum underlying the Contract Area and shall remain the sole owner of Petroleum produced pursuant to the provisions of this Contract except as regards that part of Crude Oil Condensate or Gas the title whereof has passed to the Contractor or any other person in accordance with the provisions of this Contract. Title to Petroleum to which the Contractor is entitled under this Contract and title to Petroleum sold by the Companies shall pass to the relevant buyer party at the Delivery Point. The Contractor shall be responsible for all costs and risks prior to and including at the Delivery Point and each buyer party shall be responsible for all costs and risks associated with such buyer party's share after the Delivery Point. Title to all Data specified in Article 26 shall be vested in the Government and the Contractor shall have the right to use thereof as therein provided. Assets purchased by the Contractor for use in Petroleum Operations shall be owned by the Parties comprising the Contractor in proportion to their Participating Interest provided that the Government shall have the right to require vesting of full title and ownership in it free of charge and encumbrances of any or all assets whether fixed or movable acquired and owned by the Contractor for use in Petroleum Operations inside or outside the Contract Area such right to be exercisable at the Government's option upon expiry or earlier termination of the Contract. The Contractor shall be responsible for proper maintenance insurance and safety of all assets acquired for Petroleum Operations and for keeping them in good repair order and working condition at all times and the costs thereof shall be recoverable as Contract Costs in accordance with Appendix C. So long as this Contract remains in force subject to Article 27.5 the Contractor shall free

of any charge for the purpose of carrying out Petroleum Operations hereunder have the exclusive use of assets which have become the property of Government. Equipment and assets no longer required for Petroleum Operations during the term of the Contract shall be sold, exchanged or otherwise disposed of by the Contractor provided however that the proceeds of sale shall be credited to Petroleum Operations as provided in Appendix C provided that prior written consent of the Management Committee shall be obtained for each transaction in excess of US 50000 Fifty thousand United States Dollars or such other value as may be agreed from time to time by the Management Committee. The consent of the Management Committee shall not be unreasonably withheld.

ARTICLE 28 ASSIGNMENT OF PARTICIPATING INTEREST

28.1 Subject to the terms of this Article and other terms of this Contract any Party comprising the Contractor may assign or transfer a part or all of its Participating Interest with the prior written consent of the Government which consent shall not be unreasonably withheld provided that the Government is satisfied that:

- a the prospective assignee or transferee is of good standing, has the capacity and ability to meet its obligations hereunder and is willing to provide an unconditional undertaking to the Government to assume its Participating Interest share of obligations and to provide guarantees in respect thereof as provided in the Contract;
- b the prospective assignee or transferee is not a company incorporated in a country with which the Government for policy reasons has restricted trade or business;
- c the prospective assignor or transferor and assignee or transferee respectively are willing to comply with any reasonable conditions of the Government as may be necessary in the circumstances with a view to ensuring performance under the Contract; and
- d the assignment or transfer will not adversely affect the performance or obligations under this Contract or be contrary to the interests of India.

28.1.1 Subject to Article 28.7 nothing in this Article 28 shall prevent a Party comprising the Contractor from assigning or transferring a part or all of its Participating Interest to an Affiliate with the approval of the Management Committee provided that:

- a the assignee provides an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for the amount specified in Article 29.2 in a form provided

at Appendix G; b the assignee provides a parent financial and performance guarantee issued by the guarantor which furnished the guarantee pursuant to Article 29 in respect of the assignor Party's obligations under this Contract in favour of the Government of the performance of such Affiliate assignee of its obligations under this Contract; c the prospective Affiliate is not a company incorporated in a country with which the Government for policy reason has restricted trade or business; and d the assignment will not adversely affect the performance or obligations under this Contract or be contrary to the interest of India.

28.2 In case of any change in the status of a Company or its shareholding resulting in a change in the control of the Company; or b its relationship with the companies providing the guarantee under Article 29.1 a and 29.1 b;

28.3 28.4 28.5 28.6 28.7 the Company shall seek the consent of the Government for assigning the Participating Interest under the changed circumstances and the provisions of this Article 28 shall apply mutatis mutandis to be obtaining of such consent. For the purpose of this Article 28.2 control has the same meaning as in Article 1.3. An application for consent to assign or transfer shall be accompanied by all relevant information concerning the proposed assignment or transfer including detailed information on the proposed assignee or transferee and its shareholding and corporate structure as was earlier required from the Companies constituting the Contractor the terms of the proposed assignment or transfer and the unconditional undertaking referred to in Article. The applicant shall also submit such information relating to the prospective assignee or transferee of the assignment or transfer as the Government may reasonably require to enable proper consideration and disposal of the application. No assignment or transfer shall be effective until the approval of the Government is received or deemed to have been received. Approval may be given by the Government on such terms and conditions as it may deem fit. Provided that such terms and conditions may not increase the obligations of the Parties comprising the Contractor. Upon assignment or transfer of its interest in this Contract the assignor or transferor shall be released and discharged from its obligations hereunder only to the extent that such obligations are assumed by the assignee or transferee with the approval of the Government. In the event that the Government

does not give its consent or does not respond to a request for assignment or transfer by a Party comprising the Contractor within one hundred and twenty 120 days of such request and receipt of all information referred to in Article 28.3 above consent shall be deemed to have been given by the Government. An assignment or transfer shall not be made where the Participating Interest to be retained by the proposed assignor or the percentage interest of assignee shall be less than ten per cent 10 of the total Participating Interest of all the constituents of the Contractor except where the Government on the recommendations of the Management Committee may in special circumstances so permit.

28.8 Nothing contained in this Article 28 shall prevent a Party comprising the Contractor from mortgaging pledging charging or otherwise encumbering at its own risk and cost all or part of its Participating Interest for the purposes of security relating to finance to the extent required for performing its obligation under the Contract provided that i such Party shall remain solely liable for all its obligations relating to its Participating Interest to the exclusion of the other participants thereto; ii the encumbrance shall be expressly subordinated to the rights of the other Parties under this Contract. The obligations occurring from the said encumbrance shall be the sole responsibility of the original Party and shall in no manner compromise the rights of other Parties to the Contract; iii such Party has given reasonable notice of such encumbrance and furnishes to all other Parties including for the avoidance of doubt the Government a certified copy of the executed instruments evidencing the encumbrances; iv keeping in view the national interest of India prior consent of the Government shall be required which consent shall not be unreasonably withheld of the list of potential lenders with whom such Party can consider hypothecation; v the Party creating the charge shall ensure that such charge shall not in any way affect the interest of other Parties or result in interference with joint operations. In the event of any claims or liabilities imposed on other Parties because of the creation of such charges the Party having created charge on its Participating Interest shall indemnify the other Parties; and vi in case of foreclosure or default by a borrowing Party the mortgagee shall not be deemed to have acquired a right to carry on either by itself or through an agent the Petroleum Operation without the written consent of the Government of India.

28.8.1 28.8.2 The Parties

acknowledge that to obtain financing a Party Borrower will be required to secure for a permitted chargee the right to receive a copy of any notice served on the Borrower and the Parties agree that they shall serve a copy of any such notice on any such permitted chargee in accordance with the provisions of Article 37 at the same time as such notice is served on the Borrower. For the purposes of Article 37 the address for service of notices of the permitted chargee shall be that specified in the instrument or instruments referred to in Article 28.8iii. In case lender elects to participate directly or through a company other than the Borrower under the financing arrangement referred to above the same shall be subject to the rights of Government as contained in Article 28.1 of Contract and the preemptive rights of the Parties as may be contained in Operating Agreement. Any Party which wishes to exercise the said preemptive rights will explicitly assume the obligation on the same terms and conditions as the Borrower.

ARTICLE 29 GUARANTEES

29.1 Each of the Companies constituting the Contractor shall procure and deliver to the Government within thirty 30 days from the Effective Date of this Contract a an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for the amount specified in Article 29.2 in a form provided at Appendix G; b financial and performance guarantee in favour of the Government from a parent company acceptable to the Government in the form and substance set out in Appendix E1 or where there is no such parent company the financial and performance guarantee from the Company itself in the form and substance set out in Appendix E2; c a legal opinion from its legal advisors in a form satisfactory to the Government to the effect that the aforesaid guarantees have been duly signed and delivered on behalf of the guarantors with due authority and is legally valid and enforceable and binding upon them;

29.2 The amount of the guarantee referred to in Article 29.1 a above shall be an amount equal to thirty five percent 35 of the Company's Participating Interest share of the total estimated annual expenditure in respect of the Minimum Work Programme to be undertaken by the Contractor in the Contract Area during the relevant Year of a Phase subject to Article 29.3. The total estimated expenditure for the relevant Year for the purpose of furnishing bank guarantee by the Contractor shall be higher of the cost

estimates made by the Directorate General of Hydrocarbons DGH or budget estimates of the Contractor as presented by its to the Management Committee.29.3 The guarantee referred to in Article 29.2 shall provide that;a at the end of each Year it shall be automatically renewed for an amount equal to a Companys Participating Interest share of thirty five percent 35 of the totalestimated expenditure in respect of the Minimum Work Programme to be undertaken for the following Year of an Exploration Phase unless the Contractor has terminated the Contract in accordance with the terms thereof. The guarantee shall be renewed at the end of each Year positively thirty 30 days before the expiry of the guarantee period.b after the completion and due performance of the Minimum Work Programme of a particular Exploration Phase the guarantee will be released in favour of the Company on presentation to the bank of a certificate from the Government that the obligation of the Contractor has been fulfilled and the guarantee may be released subject to Article 29.4. Such certificate shall be provided within thirty 30 days from the completion of the Minimum Work Programme and fulfillment of obligations under the Contract to the satisfaction of the Government.29.4 29.5 29.6 If the Contractor elects to proceed to the second Exploration Phase of the Exploration Period a bank guarantee for the Phase in terms of Articles 29.1 a 29.2 and 29.3 shall be delivered to the Government with the notice of such election and if such guarantee is not so delivered the provisions of Article 29.5 shall apply.If any of the documents referred to in Article 29.1 is not delivered within the period specified herein this Contract may be terminated by the Government upon ninety 90 days written notice of its intention to do so.Subject to Article 29.7 notwithstanding any change in the composition or shareholding of the parent company furnishing a performance guarantee as provided herein it shall not under any circumstances be absolved of its obligations contained in the guarantees provided pursuant to Article 29.1b.29.7 If abcd a Party Assignor assigns all or a part of its Participating Interest to a third party Assignee in accordance with Article 28;the Assignee provides an irrevocable unconditional bank guarantee from a reputed bank of good standing in India acceptable to the Government in favour of the Government for an amount equal to the assignees Participating Interest share of the estimated expenditure of the

Minimum Work Programme of the Exploration Phase current at the Effective Date of the assignment; the Assignee provides performance guarantee and legal opinion in terms of this Article; and the addendum to the Contract giving effect to the assignment of Participating Interest is executed by all Parties; then the Government shall release the guarantee given by the assignor under Article 29.1 a to the extent of the amount of the guarantee provided by the assignee and where relevant the guarantee under Article 29.1 b.

ARTICLE 30 TERM AND TERMINATION OF THE CONTRACT

30.1 30.2 The term of this Contract shall be for the period of the License and any Lease granted thereunder unless the Contract is terminated earlier in accordance with its terms and shall be deemed to have been terminated if for any reason the Contractor ceases to hold such License or Lease. Subject to the provision of Articles 5 14 and 30.6 and without prejudice to the provisions of Article 30.7 or any other provisions of this Contract the Contractor shall have the right to terminate this Contract with respect to any part of the Contract Area other than a Development Area then producing or that prior thereto had produced Petroleum upon giving ninety 90 days written notice of its intention to do so; and b with respect to any Development Area in which Petroleum is being produced or that prior thereto had produced Petroleum upon giving at least one hundred and eighty 180 days written notice of its intention to do so.

30.3 This Contract may subject to the provisions herein below and Article 31 be terminated by the Government upon giving ninety 90 days written notice with reasons to the other Parties of its intention to do so in the following circumstances namely that the Contractor or a Party comprising the Contractor the Defaulting Party a has knowingly submitted any false statement to the Government in any manner which was a material consideration in the execution of this Contract; or b has intentionally and knowingly extracted or authorised the extraction of hydrocarbon not authorized to be extracted by the Contract or without the authority of the Government except such extractions as may be unavoidable as a result of operations conducted hereunder in accordance with generally accepted modern oilfield and petroleum industry practices which when so extracted were immediately notified to the Government or c is adjudged bankrupt by a competent court or enters into or scheme of composition with its creditors or takes advantage of

any law for the benefit of debtors; ord has passed a resolution to apply to a competent court for liquidation of the Company unless the liquidation is for the purpose of amalgamation or reconstruction of which the Government has been given notice and the Government is satisfied that the Companys performance under this Contract would not be adversely affected thereby and has given its approval thereto; ore has assigned any interest in the Contract without the prior consent of the Government as provided in Article 28; orf has failed to make any monetary payment required by law or under this Contract by the due date or within such further period after the due date as may thereafter be specified by the Government; org has failed to comply with or has contravened the provisions of this Contract in a material particular; orh has failed to comply with any final determination or award made by a sole expert or arbitrators subject to Article 33; ori has failed to carry out or observe any of the terms and conditions of the License or Lease or the provisions of the Acts or Rules in force thereunder subject however to Article 31.j on notice of termination as provided in Article 29.5. PROVIDED THAT where the Contractor comprises two or more Parties the Government shall not exercise its rights of termination pursuant to Article 30.3 on the occurrence in relation to one or more but not all of the Parties comprising the Contractor of an event entitling the Government to terminate the Contracta if any other Party or Parties constituting the Contractor the non Defaulting Party or Parties satisfies the Government that it or they isare willing and would be able to carry out the obligations of the Contractor.b where the non Defaulting Party or Parties with the consent of the Government has have acquired the Participating Interest of the Defaulting Party pursuant to the provisions of the Operating Agreement and has have procured and delivered to the Government a guarantee or guarantees as referred to in Article 29.1 in respect of the Participating Interest of the Defaulting Party acquired by the non Defaulting Party or Parties.30.4 30.5 This Contract may also be terminated by the Government on giving the requisite notice specified above if the events specified in Article 30.3 c and d occur with respect to a company which has given a performance guarantee pursuant to Article 29 subject however to Article 30.5. If the circumstance or circumstances that give rise to the right of termination under Article 30.3f or g or i or Article 30.4 are

remedied whether by the Defaulting Company or by another Party or Parties in its behalf within the ninety 90 day period or such extended period as may be granted by the Government following the notice of the Governments intention to terminate the Contract as aforesaid such termination shall not become effective.

30.6 On termination of this Contract for any reason whatsoever the rights and obligations of the Contractor shall cease but such termination shall not affect any rights of any Party which may have accrued or any obligations undertaken or incurred including obligations under Article 5.6 by the Contractor or any Party comprising the Contractor and not discharged prior to the date of termination.

30.7 In the event of termination pursuant to Articles 30.2 30.3 or 30.4a the Government may require the Contractor for a period not exceeding one eighty 180 days from the date of termination to continue for the account and at the cost of the Government Crude Oil or Natural Gas production activities until the right to continue such production has been transferred to another entity; a Foreign Company which is a constituent of the Contractor shall have to remove and export all its property subject to Article 27 and the provisions hereof provided that in the event that ownership of any property is in doubt or disputed such property shall not be exported unless and until the doubt or dispute has been settled in favour of the Foreign Company.

30.8 Within ninety 90 days after the termination of this Contract pursuant to Article 30.2 30.3 or 30.4 or such longer period as the Government may agree the Contractor shall comply with Article 14.9 and any reasonably necessary action as directed by the Government to avoid Environmental Damage or hazards to human life or to the property of others.

ARTICLE 31 FORCE MAJEURE

31.1 31.2 31.3 31.4 31.5 Any nonperformance or delay in performance by any Party hereto of any of its obligations under this Contract or in fulfilling any condition of any License or Lease granted to such Party or in meeting any requirement of the Act the Rules or any License or Lease shall except for the payment of monies due under this Contract or under the Act and the Rules or any law be excused if and to the extent that such nonperformance or delay in performance under this Contract is caused by Force Majeure as defined in this Article. For the purpose of this Contract the term Force Majeure means any cause or event other than the unavailability of funds whether similar to or different from those enumerated

herein lying beyond the reasonable control of and unanticipated or unforeseeable by and not brought about at the instance of the Party claiming to be affected by such event or which if anticipated or foreseeable could not be avoided or provided for and which has caused the nonperformance or delay in performance. Without limitation to the generality of the foregoing the term Force Majeure shall include natural phenomena or calamities earthquakes typhoons fires wars declared or undeclared hostilities invasions blockades riots strikes insurrection and civil disturbances but shall not include the unavailability of funds. Where a Party is claiming suspension of its obligations on account of Force Majeure it shall promptly but in no case later than seven (7) days after the occurrence of the event of Force Majeure notify the Management Committee in writing giving full particulars of the Force Majeure the estimated duration thereof the obligations affected and the reasons for its suspension. A Party claiming Force Majeure shall exercise reasonable diligence to seek to overcome the Force Majeure event and to mitigate the effects thereof on the performance of its obligations under this Contract. The Party affected shall promptly notify the Management Committee as soon as the Force Majeure event has been removed and no longer prevents it from complying with the obligations which have been suspended and shall thereafter resume compliance with such obligations as soon as possible. The Party asserting the claim of Force Majeure shall have the burden of proving that the circumstances constitute valid grounds of Force Majeure under this Article and that such Party has exercised reasonable diligence and efforts to remedy the cause of any alleged Force Majeure.

31.6 31.7 Where a Party is prevented from exercising any rights or performing any obligations under this Contract due to Force Majeure the time for the performance of the obligations affected thereby and for performance of any obligation or the exercise of any right dependent thereon and the term of any Exploration Phase of the Exploration Period or this Contract may be extended to the extent of Force Majeure period or by such period as may be agreed by the Management Committee. Notwithstanding anything contained herein above if an event of Force Majeure occurs and is likely to continue for a period in excess of thirty (30) days the Parties shall meet to discuss the consequences of the Force Majeure and the course of action to be taken to mitigate

the effects thereof or to be adopted in the circumstances.

ARTICLE 32 APPLICABLE LAW AND LANGUAGE OF THE CONTRACT

32.1 32.2 32.3 This Contract shall be governed and interpreted in accordance with the laws of India. Nothing in this Contract shall entitle the Contractor to exercise the rights privileges and powers conferred upon it by this Contract in a manner which will contravene the laws of India. The English language shall be the language of this Contract and shall be used in arbitral proceedings. All communications hearing or visual materials or documents relating to this Contract shall be written or prepared in English.

32.4 The laws will also include amendments revisions modifications etc.

ARTICLE 33 SOLE EXPERT CONCILIATION AND ARBITRATION

33.1 33.2 33.3 33.4 33.5 The Parties shall use their best efforts to settle amicably all disputes differences or claims arising out of or in connection with any of the terms and conditions of this Contract or concerning the interpretation or performance thereof. Matters which by the terms of this Contract the Parties have agreed to refer to a sole expert and any other matter which the Parties may agree to so refer may be referred to a sole expert who shall be an independent and impartial person of international standing with relevant qualifications and experience appointed by a written agreement between the Parties and who shall not by virtue of nationality personal connection or commercial interest have a conflict between his/her own interest and his/her duty as a sole expert. In the event that the Parties fail or are unable to agree on a sole expert within thirty 30 days or such longer period as may be mutually agreed by Parties the sole expert shall be appointed by a body or an institution or an agency or a person mutually agreed by Parties. In case there is no agreement on the body or an institution or an agency or a person for appointing sole expert or such institution or agency or body fails to appoint a sole expert within thirty 30 days or such longer period as may be mutually agreed by Parties the matter shall be referred to arbitration. Any sole expert appointed shall be acting as an expert and not as an arbitrator and the decision of the sole expert on matters referred to him/her shall be final and binding on the Parties and shall not be subject to arbitration. Subject to the provisions of this Contract the Parties hereby agree that any controversy difference disagreement or claim for damages compensation or otherwise hereinafter in this Clause

referred to as a dispute arising between the Parties which cannot be settled amicably within ninety 90 days after the dispute arises may except for those referred to in Article 33.2 which may be referred to a sole expert be submitted to conciliation or an arbitral tribunal for final decision as hereinafter provided. The arbitral tribunal shall consist of three arbitrators. Each Party to the dispute shall appoint one arbitrator and the Party or Parties shall so advise the other Parties. The two arbitrators appointed by the Parties shall appoint the third arbitrator. Any Party may after appointing an arbitrator request the other Parties in writing to appoint the second arbitrator. If such other Party fails to appoint an arbitrator within thirty 30 days of receipt of the written request to do so such arbitrator may at the request of the first Party be appointed in accordance with Arbitration and Conciliation Act 1996. 33.6 33.7 33.8 33.9 If the two arbitrators appointed by or on behalf of the Parties fail to agree on the appointment of the third arbitrator within thirty 30 days of the appointment of the second arbitrator and if the Parties do not otherwise agree at the request of either Party the third arbitrator shall be appointed in accordance with Arbitration and Conciliation Act 1996. If any of the arbitrators fails or is unable to act his successor shall be appointed by the Party or person who originally appointed such in the manner set out in this Article as if he was the first appointment. The decision of the arbitral tribunal shall be pronounced within four 4 months unless otherwise extended by the Parties and in case of difference among the arbitrators the decision of the majority shall be final and binding on the Parties. The arbitration agreement contained in this Article 33 shall be governed by the Arbitration and Conciliation Act 1996 Arbitration Act. Arbitration proceedings shall be conducted in accordance with the rules for arbitration provided in Arbitration Act. 33.10 The right to arbitrate disputes under this Contract shall survive expiry or the termination of this Contract. 33.11 33.12 33.13 33.14 Prior to submitting a dispute to arbitration the Parties may by mutual agreement submit the matter for conciliation in accordance with Part III of the Arbitration and Conciliation Act 1996. No arbitration proceedings shall be instituted while conciliation proceedings are pending provided that a Party may initiate arbitration proceedings in the event that dispute has not been resolved by conciliation within sixty 60 days of the date of agreement by the

Parties to submit such dispute to conciliation. The venue of the sole expert conciliation or arbitration proceedings pursuant to this Article unless the Parties agree otherwise shall be New Delhi India and shall be conducted in the English language. Insofar as practicable the Parties shall continue to implement the terms of this Contract notwithstanding the initiation of proceedings before a sole expert conciliator or arbitral tribunal and any pending claim or dispute. The fees and expenses of a sole expert or conciliator appointed by the Parties shall be borne equally by the Parties. The cost and expenses of arbitrator appointed by a Party in accordance with the provision of this Article shall be borne by the respective Party and the cost and expenses of third arbitrator and other incidental expenditure in relation to arbitration and liability thereof shall be at the discretion of the arbitrators. Notwithstanding anything contrary contained herein above in the event of dispute among Government Companies and with the Government such disputes shall be settled in accordance with guidelines issued on the subject by Government from time to time.

ARTICLE 34 CHANGE OF STATUS OF COMPANIES

34.1 The Parties comprising the Contractor shall notify the Government of any change in the management or control of a Company or the relationship with any guarantor of the Companies.

ARTICLE 35 ENTIRE AGREEMENT AMENDMENTS WAIVER AND MISCELLANEOUS

35.1 35.2 35.3 35.4 35.5 35.6 35.7 35.8 This Contract supersedes and replaces any previous agreement or understanding between the Parties whether oral or written on the subject matter hereof prior to the execution date of this Contract. This Contract shall not be amended modified varied or supplemented in any respect except by an instrument in writing signed by all the Parties which shall state the date upon which the amendment or modification shall become effective. No waiver by any Party of any one or more obligations or defaults by any other Party in the performance of this Contract shall operate or be construed as a waiver of any other obligations or defaults whether of a like or of a different character. The provisions of this Contract shall inure to the benefit of and be binding upon the Parties and their permitted assigns and successors in interest. In the event of any conflict between any provisions in the main body of this Contract and any provision in the Appendices the provision in the main body shall prevail. The headings of this Contract are for

convenience of reference only and shall not be taken into account in interpreting the terms of this Contract. Reference to any law or regulation having the force of law includes a reference to that law or regulation as from time to time may be amended extended or reenacted. A reference in this Contract to the word including shall also mean including but not limited to.

ARTICLE 36 CERTIFICATES

36.1 A Company shall furnish prior to execution of this Contract a duly authorised copy of a resolution properly and legally passed by the Board of Directors of the Company authorising its President or any Vice President or any other representative to execute this Contract along with a certificate duly signed by the Secretary or an Assistant Secretary of the Company under its seal in this regard and to the effect that the Company has the power and authority to enter into this Contract and to perform its obligations thereunder and has taken all necessary action to authorise the execution delivery and performance of the Contract.

37.1 All notices statements and other communications to be given submitted or made hereunder by any Party to another shall be sufficiently given if given in writing in English language and sent by registered post postage paid or by telegram telex facsimile radio or cable to the address or addresses of the other Party or Parties as follows:

ACCOUNTING PROCEDURE SECTION 1

GENERAL PROVISIONS 1.1 Purpose

Generally the purpose of this Accounting Procedure is to set out principles and procedures of accounting which will enable the Government of India to monitor effectively the Contractor's costs expenditures production and income so that the Government's entitlement to Profit Petroleum can be accurately determined pursuant to the terms of the Contract. More specifically the purpose of the Accounting Procedure is to classify costs and expenditures and to define which costs and expenditures shall be allowable for cost recovery and profit sharing and participation purposes; specify the manner in which the Contractor's accounts shall be prepared and approved; and address numerous other accounting related matters. This Accounting Procedure is intended to apply to the provisions of the Contract and is without prejudice to the computation of income tax under applicable provisions of the Income Tax Act 1961 as amended.

1.2 Definitions

For purposes of this Accounting Procedure the terms used herein which are defined in the Contract shall have the same meaning when used in this Accounting Procedure.

1.3 Inconsistency

In the event of any inconsistency or conflict between the provisions of this Accounting Procedure and the other provisions of the Contract the other provisions of the Contract shall prevail.

Documentation and Statements to be submitted by the Contractor

Within ninety 90 days of the Effective Date of the Contract the Contractor shall submit to and discuss with the Government a proposed outline of charts of accounts operating records and reports which outline shall reflect each of the categories and subcategories of costs and income specified in Sections 2 and 31.4 1.4.1 and shall be in accordance with generally accepted standards and recognized accounting systems and consistent

with normal petroleum industry practice and procedures for joint venture operations. Within ninety 90 days of receiving the above submission the Government shall either provide written notification of its approval of the proposal or request in writing revisions to the proposal. Within one hundred and eighty 180 days from the Effective Date of the Contract the Contractor and the Government shall agree on the outline of charts of accounts records and reports which shall also describe the basis of the accounting system and procedures to be developed and used under this Contract. Following such agreement the Contractor shall expeditiously prepare and provide the Government with formal copies of the comprehensive charts of accounts records and reports and allow the Government to examine the manuals and to review procedures which are and shall be observed under the Contract.

1.4.2 Notwithstanding the generality of the foregoing the Contractor shall make regular Statements relating to the Petroleum Operations as follows:

- i Production Statement see Section 5 of this Accounting Procedure.
- ii Value of Production and Pricing Statement see Section 6 of this Accounting Procedure.
- iii Statement of Costs Expenditures and Receipts see Section 7 of this Accounting Procedure.
- iv Cost Recovery Statement see Section 8 of this Accounting Procedure.
- v Profit Sharing Statement see Section 9 of this Accounting Procedure.
- vi Local Procurement Statement see Section 10 of this Accounting Procedure.
- vii End of Year Statement see Section 11 of this Accounting Procedure.
- viii Budget Statement see Section 12 of this Accounting Procedure.

1.4.3 All reports and Statements shall be prepared in accordance with the Contract and the laws of India and where there are no relevant provisions in either of these in accordance with generally accepted practices in the international petroleum industry.

1.4.4 Each of the entities constituting the Contractor shall be responsible for maintaining its own accounting records in order to comply with all legal requirements and to support all returns or any other accounting reports required by any Government authority in relation to the Petroleum Operations. However for the purposes of giving effect to this Accounting Procedure the Party constituting the Contractor who is the Operator shall be responsible for maintaining at its business office in India on behalf of the Contractor all the accounts of the Petroleum Operations in accordance with the provisions of the Accounting Procedure and the

Contract.1.5 Language and Units of AccountAll accounts records books reports and Statements shall be maintained and prepared in the English language using mercantile basis of accounting. The accounts shall be maintained in United States Dollars which shall be the controlling currency of account for cost recovery and profit sharing purposes. Metric units and Barrels shall be employed for measurements required under the Contract. Where necessary for clarification the Contractor may also maintain accounts and records in other languages currencies and units.1.6 Currency Exchange Rates1.6.1 For conversion purposes between United States Dollars and Indian Rupees or any other currency the monthly average of the daily mean of the buying and selling rates of exchange as quoted by the Reserve Bank of India or any other financial body as may be mutually agreed by the Parties for the Month in which the revenues costsexpenditures receipts or income are recorded shall be used. However in the case of any single nonUS Dollar transaction in excess of the equivalent of fifty thousand50000 US Dollars the conversion into US Dollars shall be performed on the basis of the average of the applicable exchange rates for the day on which the transaction occurred.1.6.2 Any realized or unrealized gains or losses from the exchange of currency in respect of Petroleum Operations shall be credited or charged to the accounts. A record of the exchange rates used in converting Indian Rupees or any other currencies into United States Dollars as specified in Section 1.6.1 shall be maintained by the Contractor and shall be identified in the relevant Statements required to be submitted by the Contractor in accordance with Section 1.4.2.1.7 Payments 1.7.1 1.7.2 1.7.3 Subject to Article 20.3 of the Contract and the foreign exchange laws and regulations prevailing from time to time all payments between the Parties shall unless otherwise agreed be in United States Dollars and shall be made through a bank designated by each receiving Party. Unless otherwise specified all sums due under the Contract shall be paid within forty five 45 days from the date on which the obligation to pay was incurred. All sums due by one Party to the other under the Contract during any Month shall for each day such sums are overdue during such Month bear interest compounded daily at the applicable LIBOR plus two 2 percentage points.1.8 Arms Length Transactions1.9 1.9.1 1.9.2 1.9.3 Unless otherwise specifically provided for in the Contract all

transactions giving rise to revenues costs or expenditures which will be credited or charged to the accounts prepared maintained or submitted hereunder shall be conducted at arms length or on such a basis as will assure that all such revenues costs or expenditures will not be lower or higher as the case may be than would result from a transaction conducted at arms length on a competitive basis with third parties.

Audit and Inspection Rights of the Government Without prejudice to statutory rights the Government upon at least twenty (20) Business Days advance written notice to the Contractor shall have the right to inspect and audit during normal business hours all records and documents supporting costs expenditures expenses receipts and income such as the Contractor's accounts books records invoices cash vouchers debit notes price lists or similar documentation with respect to the Petroleum Operations conducted hereunder in each Year within two (2) years or such longer period as may be required in exceptional circumstances from the end of such Year. The Government may undertake the conduct of the audit either through its own representatives or through a qualified firm of recognised chartered accountants registered in India or a reputed consulting firm appointed for the purpose by the Government and the costs of audit in case of Government auditors shall be borne by the Government where as for outside auditors this shall be borne by the Contractor as a General and Administrative Cost. In conducting the audit the Government or its auditors shall be entitled to examine and verify at reasonable times all charges and credits relating to the Contractor's activities under the Contract and all books of account accounting entries material records and inventories vouchers payrolls invoices and any other documents correspondence and records considered necessary by the Government to audit and verify the charges and credits. The auditors shall also have the right in connection with such audit to visit and inspect at reasonable times all sites plants facilities warehouses and offices of the Contractor directly or indirectly serving the Petroleum Operations and to physically examine other property facilities and stocks used in Petroleum Operations wherever located and to question personnel associated with those operations. Where the Government requires verification of charges made by an Affiliate the Government shall have the right to obtain an audit certificate from an internationally recognized firm of public accountants

acceptable to both the Government and the Contractor which may be the Contractor's statutory auditor. Submission of the audit certificate shall in no way relieve or diminish the responsibility of the Contractor for the compliance with the obligations under the Contract.

1.9.4 1.9.5 1.9.6 1.9.7 1.9.8 Any audit exceptions shall be made by the Government in writing and notified to the Contractor within one hundred and twenty 120 days following completion of the audit in question. The Contractor shall answer any notice of exception under Section 1.9.4 within one hundred and twenty 120 days of the receipt of such notice. Where the Contractor has after the said one hundred and twenty 120 days failed to answer a notice of exception the exception shall prevail and deemed to have been agreed to by the Contractor. All agreed adjustments resulting from an audit and all adjustments required by prevailing exceptions under Section 1.9.5 shall be promptly made in the Contractor's accounts and any consequential adjustments to the Government's entitlement to Petroleum shall be made within thirty 30 days therefrom. Notwithstanding any reference to a Sole Expert or Arbitration in accordance with the provisions of the Contract in case any amount is claimed as due to the Government resulting from the audit exception but not accepted or settled by the Contractor then the Contractor shall deposit such claimed amount in an escrow account to be opened with a financial institution failing mutually agreed agreement with State Bank of India within thirty 30 days from the date when the amount is disputed by the Contractor. The amount in escrow account along with any interest accumulated thereon shall be appropriated or adjusted in accordance with the decision or award of the Sole Expert or Arbitral Tribunal as may be or otherwise as mutually agreed to between the Parties. If the Contractor and the Government are unable to reach final agreement on proposed audit adjustments either Party may refer any dispute thereon to a sole expert as provided for in the Contract. So long as any issues are outstanding with respect to an audit the Contractor shall maintain the relevant documents and permit inspection thereof until the issue is resolved.

1.10 Revision of the Accounting Procedure By mutual agreement between the Government and the Contractor this Accounting Procedure may be revised from time to time in writing signed by the Parties stating the date upon which the amendments shall become effective.

SECTION 2 CLASSIFICATION DEFINITION AND ALLOCATION OF COSTS AND

EXPENDITURES 2.1 Segregation of Costs Costs shall be segregated in accordance with the

purposes for which such expenditures are made. All costs and expenditures allowable under Section 3 relating to Petroleum Operations shall be classified defined and allocated as set out below in this

Section. 2.2 Exploration Costs Exploration Costs are all direct and allocated indirect expenditures incurred in the search for Petroleum in an area which is or was at the time when such costs

were incurred part of the Contract Area including expenditures incurred in respect of Aerial geophysical geochemical palaeontological geological topographical and seismic surveys analysis

and studies and their interpretation. Core hole drilling and water Well drilling. Labour materials supplies and services used in drilling Wells with the object of finding Petroleum or in drilling

Appraisal Wells provided that if such Wells are completed as producing Wells or injection Well for enhancing Oil recovery the costs of completion thereof shall be classified as Development

Costs. Facilities used solely in support of the purposes described in Sections 2.2.1 2.2.2 and 2.2.3 above including access roads all separately identified. Any Service Costs and General and

Administrative Costs directly incurred on exploration activities and identifiable as such and a portion of the remaining Service Costs and General and Administrative Costs allocated to Exploration

Operations determined by the proportionate share of total Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Exploration Costs. Geological

and geophysical information purchased or acquired in connection with Exploration Operations. Any other expenditures incurred in the search for Petroleum not covered under Sections 2.3 or 2.4. 2.2.1

2.2.2 2.2.3 2.2.4 2.2.5 2.2.6 2.2.7 2.3 Development Costs 2.3.1 2.3.2 2.3.3 2.3.4 2.3.5 2.3.6 Development Costs are all direct and allocated indirect expenditures incurred with respect to the

development of discoveries within the Contract Area including expenditures incurred on account of Geological and Geophysical information acquired in connection with Development

Operations. Drilling Development Wells whether these Wells are dry or producing and drilling Wells for the injection of water or Gas to enhance recovery of Petroleum. Completing of Exploration Wells

by way of installation of casing or equipment or otherwise or for the purpose of bringing a Well into use as a producing Well or as a Well for the injection of water or Gas to enhance recovery of Petroleum. Purchase installation or construction of production transport and storage facilities for production of Petroleum such as pipelines flow lines production and treatment units wellhead equipment subsurface equipment enhanced recovery systems offshore and onshore platforms export terminals and piers harbours and related facilities and access roads for production activities. Engineering and design studies for facilities referred to in Section 2.3.3. Any Service Costs and General and Administrative Costs directly incurred in Development Operations and identifiable as such and a portion of the remaining Service Costs and General and Administrative Costs allocated to development activities determined by the proportionate share of total Contract Costs excluding General and Administrative Costs and Service Costs represented by all other Development Costs.

2.4 Production Costs Production Costs are expenditures incurred on Production Operations after the start of production from the Field which are other than Exploration and Development Costs. The balance of General and Administrative Costs and Service Costs not allocated to Exploration Costs or Development Costs shall be allocated to Production Costs.

2.5 Service Costs Service Costs are direct and indirect expenditures incurred in support of Petroleum Operations in the Contract Area including expenditures on warehouses piers marine vessels vehicles motorized rolling equipment aircraft fire and security stations workshops water and sewerage plants power plants housing community and recreational facilities and furniture and tools and equipment used in these activities. Service Costs in any Year shall include the costs incurred in such Year to purchase and/or construct the said facilities as well as the annual costs of maintaining and operating the same each to be identified separately. All Service Costs shall be regularly allocated as specified in Sections 2.2.5 2.3.5 and 2.4 to Exploration Costs Development Costs and Production Costs and shall be separately shown under each of these categories. Where Service Costs are made in respect of shared facilities the basis of allocation of costs to Petroleum Operations hereunder shall be specified.

2.6 General and Administrative Costs

2.6.1 2.6.2 General and Administrative Costs are

expenditures incurred on general administration and management primarily and principally related to Petroleum Operations in or in connection with the Contract Area and shall include Main office field office and general administrative expenditures in India including supervisory accounting and employee relations services; An annual overhead charge for services rendered by the parent company or an Affiliate to support and manage Petroleum Operations under the Contract and for staff advice and assistance including financial legal accounting and employee relations services but excluding any remuneration for services charged separately under this Accounting Procedure provided that i for the period from the Effective Date until the date on which the first Development Plan under the Contract is approved by the Government this annual charge shall be the Contractor's verifiable expenditure but shall in no event be greater than the following percentages of the total Contract Costs incurred during the Contract Year in or in connection with the Contract Area and qualifying for recovery pursuant to Section 3 Contract year in million US Contract costs in any Annual overhead charge

Contract Costs in excess of US	Overhead charge (%)
250,000	23
600,000	2
2 million	0
5 million	5
12,000,000	1

Costs in excess of US 5 million ii from the date on which the first Development Plan is approved the charge shall be at an amount or rate to be agreed on between the Parties and stated in the Development Plan.

2.6.3 All General and Administrative Costs shall be regularly allocated as specified in Sections 2.2.5 2.3.5 and 2.4 to Exploration Costs Development Costs and Production Costs respectively and shall be separately shown under each of these cost categories.

SECTION 3 COSTS EXPENSES EXPENDITURES AND INCIDENTAL INCOME OF THE CONTRACTOR

3.1 Costs Recoverable and Allowable Without Further Approval of the Government Costs incurred by the Contractor on Petroleum Operations as per reviewed or approved Work Programme and Budget by the Management Committee as the case may be pursuant to the Contract as classified under the headings referred to in Section 2 shall be allowable for the purposes of the Contract except to the extent provided in Section 3.2 or elsewhere in this Accounting Procedure and subject to audit as referred to in Articles 25.4.1 to 25.4.4 and Article 25.5 as provided for herein. Further in case of variation in costs over the reviewed approved Work Programme and

Budget as the case may be or reappropriation of costs shall be submitted to the Management Committee for review and approval as the case may be within thirty (30) days from end of the relevant Financial Year and subject to the audit and other provisions of the Contract such costs shall be allowable for the purposes of the Contract.

3.1.1 Surface Rights All direct costs necessary for the acquisition, renewal or relinquishment of surface rights acquired and maintained in force for the purposes of the Contract except as provided in Section 3.1.9.

3.1.2 Labour and Associated Labour Costs a) Contractors locally recruited employees based in India: Costs of all the Contractors locally recruited employees who are directly engaged in the conduct of Petroleum Operations under the Contract in India. Such costs shall include the costs of employee benefits and Government benefits for employees and levies imposed on the Contractor as an employer, transportation and relocation costs within India of the employee and such members of the employee's family as per the personnel policy of the employer as required by law or customary practice in India. If such employees are engaged in other activities in India in addition to Petroleum Operations the cost of such employees shall be apportioned on a time sheet basis according to sound and acceptable accounting principles.

b) **Assigned Personnel** Costs of salaries and wages including bonuses of the Contractor's employees directly and necessarily engaged in the conduct of the Petroleum Operations under the Contract whether temporarily or permanently assigned irrespective of the location of such employees it being understood that in the case of those personnel only a portion of whose time is wholly dedicated to Petroleum Operations under the Contract only that pro rata portion of applicable salaries, wages and other costs as specified in Sections 3.1.2c, d, e, f and g shall be charged and the basis of such pro rata allocation shall be specified.

c) The Contractor's costs regarding holiday, vacation, sickness and disability benefits and living and housing and other customary allowances applicable to the salaries and wages chargeable under Section 3.1.2b above.

d) Expenses or contributions made pursuant to assessments or obligations imposed under the laws of India which are applicable to the Contractor's cost of salaries and wages chargeable under Section 3.1.2b above.

e) The Contractor's cost of established plans for employees' group life insurance, hospitalization

pension retirement and other benefit plans of a like nature customarily granted to the Contractors employees provided however that such costs are in accordance with generally accepted standards in the international petroleum industry applicable to salaries and wages chargeable to Petroleum Operations under Section 3.1.2b above.

f Personal income taxes where and when they are paid by the Contractor to the Government of India for the employee in accordance with the Contractors standard personnel policies.

g Reasonable transportation and travel expenses of employees of the Contractor including those made for travel and relocation of the expatriate employees including their dependent family and personal effects assigned to India whose salaries and wages are chargeable to Petroleum Operations under Section 3.1.2b above.

Transportation cost as used in this Section shall mean the cost of freight and passenger service and any accountable incidental expenditures related to transfer travel and authorized under the Contractors standard personnel policies. The Contractor shall ensure that all expenditures related to transportation costs are equitably allocated to the activities which have benefited from the personnel concerned.

3.1.3 Transportation Costs

The reasonable cost of transportation of equipment materials and supplies within India and from outside India to India necessary for the conduct of Petroleum Operations under the Contract including directly related costs such as unloading charges dock fees and inland and ocean freight charges.

3.1.4 Charges for Services

i Third Parties

The actual costs of contract services services of professional consultants utilities and other services necessary for the conduct of Petroleum Operations under the Contract performed by third parties other than an Affiliate of the Contractor provided that the transactions resulting in such costs are undertaken pursuant to Section 1.8 of this Accounting Procedure.

ii Affiliates of Contractor

a Professional and Administrative Services and Expenses

Cost of professional and administrative services provided by any Affiliate for the direct benefit of Petroleum Operations including but not limited to services provided by the production exploration legal financial insurance accounting and computer services divisions other than those covered by Section 3.1.4 iib which the Contractor may use in lieu of having its own employees. Charges shall be equal to the actual cost of providing their services shall not include any element of

profit and shall not be any higher than the most favourable prices charged by the Affiliate to third parties for comparable services under similar terms and conditions elsewhere and will be fair and reasonable in the light of prevailing modern oilfield and petroleum industry practices.

b Scientific or Technical Personnel Cost of scientific or technical personnel services provided by any Affiliate of the Contractor for the direct benefit of Petroleum Operations which cost shall be charged on a cost of service basis. Charges therefor shall not exceed charges for comparable services currently provided by outside technical service organizations of comparable qualifications. Unless the work to be done by such personnel is covered by an Approved Budget and Work Programme the Contractor shall not authorize work by such personnel without approval of the Management Committee.

c Equipment facilities and property owned and furnished by the Contractors Affiliates at rates commensurate with the cost of ownership and operation provided however that such rates shall not exceed those currently prevailing for the supply of like equipment facilities and property on comparable terms in the area where the Petroleum Operations are being conducted. The equipment and facilities referred to herein shall exclude major investment items such as but not limited to drilling rigs producing platforms oil treating facilities oil and gas loading and transportation systems storage and terminal facilities and other major facilities rates for which shall be subject to separate agreement with the Government.

3.1.5 Communications Cost of acquiring leasing installing operating repairing and maintaining communication systems including radio satellite link and microwave facilities between the Contract Area and the Contractor's nearest base facility.

3.1.6 Office Shore Bases and Miscellaneous Facilities Net cost to the Contractor of establishing maintaining and operating any office suboffice shore base facility warehouse housing or other facility directly serving the Petroleum Operations. If any such facility services contract areas other than the Contract Area or any business other than Petroleum Operations the net costs thereof shall be allocated on an equitable and consistent basis.

3.1.7 Environmental Studies and Protection Costs incurred in conducting the environmental impact assessment studies for the Contract Area and in taking environmental protection measures including abandonment cost or contribution to abandonment funds as may be

created for abandonment and Site Restoration pursuant to the terms of the Contract.

3.1.8 Materials and equipment

General

So far as is practicable and consistent with efficient and economical operation only such material shall be purchased or furnished by the Contractor for use in the Petroleum Operations as may be required for use in the reasonably foreseeable future and the accumulation of surplus stocks shall be avoided. Material and equipment held in inventory shall only be charged to the accounts when such material is removed from inventory and used in Petroleum Operations. Costs shall be charged to the accounting records and books based on the First in First out method.

ii Warranty

In the case of defective material or equipment any adjustment received by the Contractor from the suppliers or manufacturers or their agents in respect of any warranty on material or equipment shall be credited to the accounts under the Contract.

iii Value of materials charged to the accounts under the Contract

a Except as otherwise provided in subparagraph b below materials purchased by the Contractor for use in the Petroleum Operations shall be valued to include invoice price less trade and cash discounts if any purchase and procurement fees plus freight and forwarding charges between point of supply and point of shipment freight to port of destination insurance taxes custom duties consular fees other items chargeable against imported material and where applicable handling and transportation costs from point of importation to warehouse or operating site and these costs shall not exceed those currently prevailing in normal arms length transactions on the open market.

b Material purchased from or sold to Affiliates or transferred to or from activities of the Contractor other than Petroleum Operations under the Contract

a a new material hereinafter referred to as condition A shall be valued at the current international price which shall not exceed the price prevailing in normal arms length transactions on the open market;

b b used material which is in sound and serviceable condition and is suitable for reuse without reconditioning hereinafter referred to as condition B shall be priced at not more than seventy five per cent 75 of the current price of the above mentioned new materials;

c c used material which cannot be classified as condition B but which after reconditioning will be further serviceable for original function as good secondhand condition B material or is serviceable for original function but substantially not suitable

for reconditioning hereinafter referred to as condition C shall be priced at not more than fifty per cent 50 of the current price of the new material referred to above as condition A. The cost of reconditioning shall be charged to the reconditioned material provided that the condition C material value plus the cost of reconditioning does not exceed the value of condition B material. Material which cannot be classified as condition B or condition C shall be priced at a value commensurate with its use. Material involving erection expenditure shall be charged at the applicable condition percentage referred to above of the current knocked down price of new material referred to above as condition A. When the use of material is temporary and its service to the Petroleum Operations does not justify the reduction in price in relation to materials referred to above as conditions B and C such material shall be priced on a basis that will result in a net charge to the accounts under the Contract consistent with the value of the service rendered.

3.1.9 Duties Fees and Other Charges Any duties levies fees charges and any other assessments levied by any governmental or taxing authority in connection with the Contractor's activities under the Contract and paid directly by the Contractor except corporate income tax payable by the constituents of the Contractor.

3.1.10 Insurance and Losses Insurance premia and costs incurred for insurance pursuant to Article 24 of the Contract provided that such insurance is customary affords prudent protection against risk and is at a premium no higher than that charged on a competitive basis by insurance companies which are not Affiliates. Except as provided in Sections 3.2 ix Section 3.2x and Section 3.2xi actual costs and losses incurred shall be allowable to the extent not made good by insurance. Such costs may include but are not limited to repair and replacement of property in the Contract Area resulting from damages or losses incurred by fire flood storm theft accident or such other cause.

3.1.11 Legal Expenses All reasonable costs and expenses except Section 3.2 xi resulting from the handling investigating asserting defending or settling of any claim or legal action necessary or expedient for the procuring perfecting retention and protection of the Contract Area and in defending or prosecuting lawsuits involving the Contract Area or any third party claim arising out of Petroleum Operations under the Contract or sums paid in respect of legal services necessary for the protection

of the joint interest of Government and the Contractor shall be allowable. Such expenditures shall include attorneys fees court costs costs of investigation and procurement of evidence and amounts paid in settlement or satisfaction of any such litigation and claims provided such costs are not covered elsewhere in the Accounting Procedure. Where legal services are rendered in such matters by salaried or regularly retained lawyers of the Contractor or an Affiliate such compensation shall be included instead under Section 3.1.2 or 3.1.4 ii above as applicable.

3.1.12 Training Costs All costs and expenses incurred by the Contractor in training as is required under Article 22 of the Contract.

3.1.13 General and Administrative Costs The costs described in Section 2.6.1 and the charge described in Section 2.6.2 of this Accounting Procedure.

3.1.14 Royalty License fee surface rentals etc. Royalty License fee surface rentals dead rents and other levies and taxes paid to the Government of India or State Government or local Government bodies or authority or agency except income tax paid to the Government.

3.2 Costs not recoverable and not allowable under the Contract The following costs and expenses shall not be recoverable or allowable whether directly as such or indirectly as part of any other charges or expense for cost recovery and profit sharing purposes under the Contract i costs and charges incurred before the Effective Date including costs in respect of preparation signature or ratification of this Contract; **Explanatory Note** It is clarified that costs and expenditures incurred prior to the Effective Date but after the execution of the Contract for making statutory payments in connection with the Petroleum Operations such as Petroleum Exploration License PEL fee and application fee shall be allowed as Contract Cost and shall be cost recoverable. ii expenditures in respect of any financial transaction to negotiate float or otherwise obtain or secure funds for Petroleum Operations including but not limited to interest commission brokerage and fees related to such transactions as well as exchange losses on loans or other financing whether between Affiliates or otherwise; iii costs of marketing or transportation of Petroleum beyond the Delivery Point; iv expenditures incurred in obtaining furnishing and maintaining the guarantees required under the Contract and any other amounts spent on indemnities with regard to nonfulfillment of contractual obligations; v attorneys fees and other costs and charges in connection

with arbitration proceedings and sole expert determination pursuant to the Contract;vi fines interest and penalties imposed by Courts of law of the Republic of India;vii donations and contributions;viii expenditures on creation of any partnership or joint venture arrangement;ix amounts paid with respect to nonfulfillment of contractual obligations;x costs incurred as a result of failure to insure where insurance is required pursuant to the Contract or of failure to follow procedures laid down by an insurance policy or where the Contractor has elected to self insure or has underinsured;xi costs and expenditures incurred as a result of misconduct or negligence of the Contractor; andxii expenses of the members of the Management Committee as per Article 6.12.3.3 3.4 Other costs recoverable and allowable only with Management Committee approvalAny other costs and expenditures not included in Section 3.1 or 3.2 of this Accounting Procedure but which have been incurred by the Contractor for the necessaryand proper conduct of Petroleum Operations shall be allowed to be recovered only with the express prior approval in writing of the Management Committee.Inental Income and CreditsAll inental income and proceeds received from Petroleum Operations under the Contract including but not limited to the items listed below shall be credited to theaccounts under the Contract and shall be taken into account for cost recovery and Profit Petroleum sharing purposes in the manner described in Articles 15 and 16 of theContracti The proceeds of any insurance or claim or judicial awards in connection with Petroleum Operations under the Contract or any assets charged to the accounts underthe Contract where such operations or assets have been insured and the premia charged to the accounts under the Contract;ii Revenue received from third parties for the use of property or assets the cost of which has been charged to the accounts under the Contract;iii Any adjustment received by the Contractor from the suppliersmanufacturers or their agents in connection with defective material the cost of which was previouslycharged by the Contractor to the accounts under the Contract;iv Rentals refunds or other credits received by the Contractor which apply to any charge which has been made to the accounts under the Contract;v Prices originally charged to the accounts under the Contract for materials subsequently exported from the Republic of India without being used in PetroleumOperations under

the Contract;vi Proceeds from the sale or exchange by the Contractor of assets plant or facilities the acquisition costs of which have been charged to the accounts under theContract;vii Legal costs charged to the accounts under Section 3.1.11 of this Accounting Procedure and subsequently recovered by the Contractor.3.5 NonDuplication of Charges and Credits Notwithstanding any provision to the contrary in this Accounting Procedure it is the objective of the Parties that there shall be no duplication of charges or credits to theaccounts under the Contract.

SECTION 4RECORDS AND INVENTORIES OF ASSETS

4.1 4.1.1 4.2 4.2.1 4.2.2 4.2.3 4.2.4 Records

The Contractor shall keep and maintain detailed records of property and assets in use for or in connection with Petroleum Operations under the Contract inaccordance with normal practices in exploration and production activities of the international petroleum industry. Such records shall include information on quantitieslocation and condition of such property and assets and whether such property or assets are leased or owned.

Inventories

The Contractor shalla not less than once every twelve 12 Months with respect to movable assets; andb not less than once every three 3 Years with respect to immovable assetstake an inventory of the assets used for or in connection with Petroleum Operations in terms of the Contract and address and deliver such inventory to the Governmenttogether with a written statement of the principles upon which valuation of the assets mentioned in such inventory has been based.The Contractor shall give the Government at least thirty 30 days notice in writing in the manner provided for in the Contract of its intention to take the inventoryreferred to in Section 4.2.1 and the Government shall have the right to be represented when such inventory is taken.When an assignment of rights under the Contract takes place a special inventory shall be taken by the Contractor at the request of the assignee provided that thecost of such inventory is borne by the assignee and paid to the Contractor.In order to give effect to Article 27 of the Contract the Contractor shall provide the Government with a comprehensive list of all relevant assets when requested bythe Government to do so.

SECTION 5PRODUCTION STATEMENT

From the date of first production of Petroleum from the Contract Area the Contractor shall submit a monthly Production Statement to Government showing thefollowing information

separately of each producing Field and in aggregate for the Contract AreaThe quantity of Crude Oil and Condensate produced and saved.The quality and characteristics of such Crude Oil and Condensate produced and saved.The quantity of Associated Natural Gas and Non Associated Natural Gas produced and saved.The quality characteristics and composition of such Natural Gas produced and saved separately.The quantities of Crude Oil Condensate and Natural Gas used for the purposes of carrying on drilling and production operations and pumping to field storage aswell as quantities reinjected.The quantities of Crude Oil Condensate and Natural Gas unavoidably lost.The quantities of Natural Gas flared and vented.The size of Petroleum stocks held on the first day of the Month in question.The size of Petroleum stocks held on the last day of the Month in question.The quantities of Natural Gas reinjected into the Petroleum Reservoir.The number of days in the Month during which Petroleum was produced from each Field.The GasOil ratio for each Reservoir and Field for the relevant Month.Water production water injection and Reservoir pressure data for each Reservoir and Field.5.1 5.1.1 5.1.2 5.1.3 5.1.4 5.1.5 5.1.6 5.1.7 5.1.8 5.1.9 5.1.10 5.1.11 5.1.12 5.1.13 5.2 5.3 5.4 5.5 All quantities shown in this Statement shall be expressed in both volumetric terms barrels of Oil and cubic metres of Gas and in the case of Oil in weight metrictonnes.For the purpose of reporting Field production quantities pursuant to this Section the Contractor shall agree with the Management Committee on the exact area to be designated as Development Area.The Government may direct in writing that the Contractor include other reasonable particulars relating to the production of Petroleum in its monthly ProductionStatement and the Contractor shall comply with such direction.The Production Statement for each Month shall be submitted to Government no later than fifteen 15 days after the end of such Month. SECTION 6VALUE OF PRODUCTION AND PRICING STATEMENT6.1 6.1.1 6.1.2 6.1.3 6.1.4 6.1.5 6.1.6 6.1.7 6.2 The Contractor shall for the purposes of Article 19 of the Contract prepare a Statement providing calculations of the value of Crude Oil and Condensate producedand saved during each Month. This Statement shall contain the following informationThe quantities prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and Condensate to third parties

made during the Month in question. The quantities, prices and receipts realised therefor by the Contractor as a result of sales of Crude Oil and Condensate made during the Month in question other than to third parties if any. The quantities of Crude Oil and Condensate appropriated by the Contractor to refining or other processing without otherwise being disposed of in the form of Crude Oil or Condensate. The value of stocks of Crude Oil and Condensate on the first day of the Month in question. The value of stocks of Crude Oil and Condensate on the last day of the Month in question. The percentage volume of total sales of Crude Oil and Condensate made by the Contractor during the Month that are Arms Length Sales to third parties. Information available to the Contractor insofar as required for the purposes of Article 19 of the Contract concerning the prices of competitive crude oils produced by the main petroleum producing and exporting countries including contract prices, discounts and premia and prices obtained on the spot markets. The Contractor shall for the purpose of Article 21 of the Contract prepare a Statement providing calculations of the value of Associated Natural Gas and Non-Associated Natural Gas produced, flared internally, used, saved and sold during each Month. This Statement shall contain all information of the type specified in Section 6.1 for Crude Oil as is applicable to Gas and such other relevant information as may be required by Government. 6.3 6.4 The Statements required pursuant to Sections 6.1 and 6.2 shall include a detailed breakdown of the calculation of the prices of Crude Oil, Condensate, Associated Natural Gas and Non-Associated Natural Gas pursuant to the provisions of Articles 19 and 21. The Value of Production and Pricing Statement for each Month shall be submitted to Government not later than thirty (30) days after the end of such Month.

SECTION 7 STATEMENT OF COSTS, EXPENDITURES AND RECEIPTS

7.1 7.1.1 7.1.2 7.1.3 7.1.4 7.2 The Contractor shall prepare with respect to each Quarter a Statement of Costs, Expenditures and Receipts under the Contract using mercantile basis of accounting. The Statement shall distinguish between Exploration Costs, Development Costs and Production Costs and shall separately identify all significant items of costs and expenditure as itemised in Section 3 of this Accounting Procedure within these categories. The Statement of receipts shall distinguish between income from the sale of Petroleum and internal

income of the sort itemised in Section 3.4 of this Accounting Procedure. If the Government is not satisfied with the degree of disaggregation within the categories it shall be entitled to request a more detailed breakdown. The Statement shall show the following:

- Actual costs, expenditures and receipts for the Quarter in question.
- Cumulative costs, expenditures and receipts for the Year in question.
- Latest forecast of cumulative costs, expenditures and receipts at the Year end.
- Variations between budget forecast and latest forecast and explanations thereof.

The Statement of Costs, Expenditures and Receipts of each Quarter shall be submitted to Government not later than thirty (30) days after the end of such Quarter.

SECTION 8: COST RECOVERY STATEMENT

8.1

8.1.1

8.1.2

8.1.3

8.1.4

8.1.5

8.1.6

8.1.7

8.2

The Contractor shall prepare with respect to each Calendar Quarter a Cost Recovery Statement containing the following information:

- Unrecovered Contract Costs carried forward from the previous Quarter if any.
- Contract Costs for the Quarter in question.
- Total Contract Costs for the Quarter in question: Section 8.1.1 plus Section 8.1.2.
- Quantity and value of Cost Petroleum taken and disposed of by the Contractor for the Quarter in question.
- Contract Costs recovered during the Quarter in question as per Article 15.
- Total cumulative amount of Contract Costs recovered up to the end of the Quarter in question.
- Amount of Contract Costs to be carried forward into the next Quarter.

The Cost Recovery Statement for each Quarter shall be submitted to Government not later than thirty (30) days after the end of such Quarter.

SECTION 9: PROFIT SHARING STATEMENT

9.1

9.1.1

9.1.2

9.1.3

9.1.4

9.1.5

9.1.6

9.1.7

The Contractor shall prepare with respect to each Quarter a Profit Sharing Statement containing the following information:

- The calculation of the applicable net cash flows as defined in Appendix D for the Quarter in question.
- The value of the Investment Multiple applicable in the Quarter in question.
- Based on Section 9.1.2 and Article 16, the appropriate percentages of Profit Petroleum for the Government and the Contractor in the Quarter in question.
- The total amount of Profit Petroleum to be shared between the Government and the Contractor in the Quarter in question.
- Based on Sections 9.1.3 and 9.1.4, the amount of Profit Petroleum due to the Government and the Contractor as well as to each constituent of the Contractor in the Quarter in question.
- The actual amounts of Petroleum taken or payment received by

Government and the Contractor as well as by each constituent of the Contractor during the Quarter in question to satisfy their entitlements pursuant to Section 9.1.5. Adjustments to be made if any in future Quarters in the respective amounts of Profit Petroleum due to the Government and the Contractor as well as to each constituent of the Contractor on account of any differences between the amounts specified in Sections 9.1.5 and 9.1.6 as well as any cumulative adjustments outstanding from previous Quarters.

9.2 The Profit Sharing Statement shall be submitted to Government not later than thirty 30 days after the end of such Quarter. Any amount due or adjustment required in profit sharing among the Parties shall be made within thirty 30 days from the submission of the Statement to the Government.

SECTION 10 LOCAL PROCUREMENT STATEMENT

10.1 In furtherance of the obligation in Article 23 of the Contract for the Contractor to give preference to the procurement of Indian goods and services the Contractor shall prepare in respect of each Year a local procurement statement containing the following information:

- a The amount of expenditure incurred by the Contractor directly or indirectly through its Subcontractors on goods supplied produced or manufactured in India;
- b the amount of expenditure incurred by the Contractor directly or indirectly through its Subcontractors on services provided by Indian entities;
- c the respective percentages that the expenditures recorded under items a and b above represent of the Contractor's total expenditures;
- d a detailed description of the procedures adopted during the Year to identify and purchase goods and services from Indian suppliers; and
- e a detailed exposition of how the local purchases for the Year as recorded under items a and b above compared with the projected purchases included in the budget statement for that Year pursuant to Section 12.1.3 with explanations for any significant variations;

10.2 The local procurement statement shall be submitted to the Government within sixty 60 days after the end of each Year.

SECTION 11 END OF YEAR STATEMENT

11.1 The Contractor shall prepare a definitive End of Year Statement. The Statement shall contain aggregated information in the same format as required in the Production Statement Value of Production and Pricing Statement Statement of Costs Expenditures and Receipts Cost Recovery Statement and Profit Sharing Statement but shall be based on actual quantities of

Petroleum produced income received and costs and expenditures incurred. Based upon this Statement any adjustments that are necessary shall be made to the transactions concerned under the Contract. [Explanation End of year Statement shall further contain the item wise justification for the variation between the actual costs and expenditure incurred and included in the statement of costs expenditure and receipts visvis the Budgets for corresponding line items.] 11.2 The End of Year Statement for each Year shall be submitted to Government within ninety 90 days of the end of such Year.

SECTION 12 BUDGET STATEMENT

12.1 12.1.1 12.1.2 12.1.3 12.2 The Contractor shall prepare a Budget Statement for each Year. This Statement shall distinguish between budgeted Exploration Costs Development Costs and Production Costs and shall show the following Forecast costs expenditures and receipts for the Year in question. A schedule showing the most important individual items of total costs expenditures and receipts for the said Year. Estimated amounts to be spent in the Year on procuring goods and services in India. The Budget Statement shall be submitted to Government with respect to each Year not less than ninety 90 days before the start of the said Year provided that in the case of the Year in which the Effective Date falls the Budget Statement shall be submitted within ninety 90 days of the Effective Date.

APPENDIX D CALCULATION OF THE INVESTMENT MULTIPLE FOR PRODUCTION SHARING PURPOSES

1. 2. In accordance with the provisions of Article 16 the share of the Government and the Contractor respectively of Profit Petroleum from the Contract Area in any Year shall be determined by the Investment Multiple earned by the Contractor from the then Petroleum Operations at the end of the preceding Year. These measures of profitability shall be calculated on the basis of the appropriate net cash flows as specified in this Appendix D. The Net Cash Income of the Contractor from their Petroleum Operations in any particular Year is the aggregate value for the Year of the following:

- i Cost Petroleum entitlement of the Contractor as provided in Article 15;
- plus ii Profit Petroleum entitlement of the Contractor as provided in Article 16;
- plus iii the Contractors all inental income of the type specified in section 3.4 of the Accounting Procedure arising from Petroleum Operations;
- less iv the Contractors Production Costs and royalty payments Article 17

incurred on or in the Contract Area;3. The Investment made by the Contractor in the Contract Area in any particular Year is the aggregate value for the Year of the Contractors Exploration Costs incurred on or in the Contract Area pursuant to Article 15 plus ii the Contractors Development Costs incurred on or in the Contract Area.4. For the purposes of the calculation of the Investment Multiple costs or expenditures which are not allowable as provided in the Accounting Procedure shall be excluded from Contract Costs and be disregarded. 5. 6. The Investment Multiple ratio earned by the Contractor as at the end of any Year shall be calculated by dividing the aggregate value of the addition of each of the annual Net Cash Incomes accumulated without interest up to and including that Year starting from the Year in which Production Costs were first incurred or Production first arose by the aggregate value of the addition of each of the annual Investments accumulated without interest up to and including that Year starting from the Year in which Exploration and Development Costs were first incurred. Profit Petroleum from the Contract Area in any Year shall be shared between the Government and the Contractor in accordance with the value of the Investment Multiple earned by the Contractor as at the end of the previous Year pursuant to Articles 16.2 to 16.5.

APPENDIX E1 FORM OF PARENT COMPANY FINANCIAL AND PERFORMANCE GUARANTEE to be furnished pursuant to Article 29.1 b of the Contract

WHEREAS a company duly organised and existing under the laws of having its registered office at hereinafter referred to as the Guarantor which expression shall include its successors and assigns is [the indirect owner of one hundred percent 100 of the capital stock of XYZ Company and direct owner of its parent company;] and WHEREAS XYZ Company identified as Block hereinafter referred to as the Contract made between the Government of India hereinafter referred to as the Government and XYZ Company hereinafter referred to as XYZ which expression shall include its successors and permitted assigns; and to a Production Sharing Contract respect of an onshore area is signatory offshore in WHEREAS the Guarantor wishes to guarantee the performance of XYZ Company or its Affiliate Assignee under the Contract as required by the terms of the Contract; NOW THEREFORE this Deed hereby provides as follows

1. 2. 3. The Guarantor hereby unconditionally and irrevocably guarantees to the

This guarantee shall be governed by and construed in

accordance with the laws of India. IN WITNESS WHEREOF the Guarantor through its duly authorised representatives has caused its seal to be duly affixed hereto and this guarantee to be duly executed the day of 200.

APPENDIX F PROCEDURE FOR ACQUISITION OF GOODS AND SERVICES

I OBJECTIVES

a ensure that the goods and services acquired by the Operator for carrying out the Petroleum Operations are acquired at the optimum cost taking into consideration all relevant factors including price quality delivery time and the reliability of potential suppliers. b ensure that goods and services are delivered in a timely manner taking into consideration the consequences of delays in the acquisition of these goods and services on the The objectives of these procedures are to project as a whole. c ensure that the provisions of Article 23 of the Contract are implemented.

II PRINCIPLES

The principles upon which these procedures are based are a The Parties must be satisfied that the Operator is working to an agreed procedure for acquiring goods and services which is auditable and in accordance with the provisions of the Contract. b The Operator must have the ability to acquire goods and services expeditiously so that the project schedules in respect of Approved Work Programmes are maintained.

III PROCEDURE

The procedures to be adopted by the Operator for the acquisition of goods and services shall be as follows

Applicable to	Procedure
Exploration Appraisal Development and Production operations	Procedure A 50000 to less than 200000
	Procedure B 200000 to less than 500000
	Procedure C Equal to or more than 500000

For contracts valued at less than US 5000 The Operator will be at liberty to determine the procurement procedures and methods to procure goods and services valued at less than US Dollars five thousand US 5000. For Contracts valued at US 5000 and above but less than US 50000 The Operator will be at liberty to determine the preferred method of acquiring goods and services valued at US Dollars five thousand US 5000 and above but less than US Dollars fifty thousand US 50000 provided that at least three 3 quotations from selected suppliers including at least one 1 Indian supplier will be obtained. For items valued at greater than US Dollars twenty thousand US 20000 Operator is required to report to the Operating Committee if the quote accepted exceed the lowest quote by more than twenty 20 percent. Operator will promptly report to the Operating Committee the

Operator shall provide the constituents of the Contractor with a list of all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender;

2 add to such list the entities whom other Party requests for adding within five (5) Business Days on receipt of such lists;

3 if and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix F IV to perform under the contract;

4 complete the tendering process within a reasonable period of time;

5 circulate to all constituents of the Contractor a comparative bid analysis stating Operator's choice of the entity for award of contract. Provide also reasons for such choice in case entity chosen is not the lowest bidder;

6 inform all the constituents of the Contractor of the entities to whom the contract has been awarded; and

7 upon the request of a Party provide such Party with a copy of the final version of the contract awarded.

Procedure B Operator shall

1 provide the Parties with a list of all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender;

2 add to such list the entities whom a Party requests for adding within five (5) Business Days on receipt of such list;

3 if and when any Party so requests Operator shall evaluate any entity listed in 1 and 2 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix F IV to perform under the contract;

4 complete the tendering procedure within a reasonable period of time;

5 circulate to all constituents of the Contractor a comparative bid analysis stating Operator's choice of the entity for award of contract. Provide also reasons for such choice in case the entity chosen is not the lowest bidder. If the bid selected is not the lowest bid obtain prior approval of the Operating Committee for award of contract;

6 award the contract accordingly and inform all the members of the Management Committee of the entities to whom the contract has been awarded; and

7 upon the request of a Party provide such Party with a copy of the final version of the contract awarded.

Procedure C Operator shall

1 publish invitations for parties to prequalify for the

proposed contract in at least three 3 daily national Indian newspaper. Provide to NonOperating Companies a list of responding parties and an analysis of their qualifications for the contract being contemplated to be awarded. Include those who qualify as per the prequalification criteria approved as per Appendix F IV in the list of entities from whom Operator proposes to invite tender for the said contract; 2 provide the members of the Management Committee with a total list of all the entities selected as 1 above and all the entities approved by the Operating Committee as per Appendix F V for the applicable category of the contract along with other entities if any from whom the Operator proposes to invite tender; 3 add to such entities whom a Party requests for adding within five 5 Business Days on receipt of such list; 4 if and when any Party so requests Operator shall evaluate any entity listed in 2 and 3 above to assure that entity is qualified as based on the qualification criteria agreed in accordance with Appendix F IV to perform under the contract; 5 prepare and dispatch the tender documents to the entities as finally listed and to Parties; 6 after the expiration of the period allowed for tendering consider and analyse the details of all bids received; 7 prepare and circulate to the constituents of the Contractor a comparative bid analysis stating Operator's recommendation as to the entity to whom the contract should be awarded the reasons therefor and the technical commercial and contractual terms to be agreed upon; 8 obtain the approval of the Operating Committee to the recommended bid. However failing Operating Committee approval any Company may refer the issue to the Management Committee for decision; and 9 award the contract accordingly and upon the request of a Party provide such Party with a copy of the final version of the contract; IV. A set of vendor qualifications criteria for each major category contract supply shall be proposed by the Operator and approved by the Operating Committee within thirty 30 days of its submission. In the event the Operating Committee fails to approve vendor qualification criteria within thirty 30 days of the date the same is first submitted by the Operator the matter shall be referred to the Management Committee for decision. The Operating Committee may revise the qualification criteria. V. It is anticipated that in order to expedite joint operations contracts will be awarded to qualified vendors/contractors who are identified as approved vendors for the specified activities. A list of such

approved vendors shall first be established as follows Operator shall¹ provide the constituents of the Contractor with a list of the entities from whom Operator proposes to invite tender for contracts; and² add to such list entities whom a Company requests for adding within fourteen 14 days on receipt of such list; and³ obtain approval of the Operating Committee. Such list shall thereafter be maintained by the Operator. The Operating Committee may add to or delete vendors from such list.

APPENDIX G PERFORMA OF BANK GUARANTEE TO BE PROVIDED PURSUANT TO ARTICLE 291. In consideration of Government of India hereinafter referred to as Government having entered into a Production Sharing Contract for the block dated hereinafter referred to as Contract which expression shall include all the amendments agreed to between the Government and the Contractor thereto with Ms having its registered office at hereinafter referred to as which expression unless repugnant to the context or meaning thereof include all its successors administrators executors and assigns which is a constituent of the Contractor and the Government have agreed that the Company shall furnish to Government a bank guarantee hereinafter referred to as Guarantee towards its obligations as provided in the Contract for US for Foreign Companies US equivalent in Indian Rupees for Indian Companies for the performance of its obligations under the Contract.

6. 29 Ancillary Facilities Site shall mean a site containing Ancillary Facilities which site may either be part of or situated near a Plant Site or Mining Site.

7 4 Annex shall mean the following annexes Environmental impact study and management plan Feasibility study Annex I Annex II

Annex III Exclusive Mining Zones Annex IV Allotment Leasehold. 48. 32 Associated substances shall mean substances associated with nickel and cobalt resulting from mining operations pursuant to this Convention. 9. 19 CFA Franc shall mean the legal currency of the Republic of Cameroon. 10. 9 Commencement of Operations shall mean the date on which the first commercial shipment of Product leaves the production site. 11.17 Commercial Operations shall mean mining operations producing commercial shipments of Product. 12. 7 Contractors shall mean Persons including Shareholders and Affiliates but excluding Lenders who within the scope of a contract signed with GEOVIC supply services or tangible or intangible property relating to the activities undertaken under this Convention. 13. 8 Convention shall mean this Mining Convention and its Annexes plus any renewal extension substitution or amendment of this Convention as mutually agreed upon by the Parties. 14.11 Dollar shall mean the legal currency of the United States of America. 15.10 Effective Date shall mean the date of signature of the Convention by the parties. 16.14 Environmental impact Study and management plan shall mean the impact study and environmental management plan for the project carried out in accordance with the legislation and regulations in force. 17.38 Exclusive Mining Exploitation Zone shall designate those areas identified at Annex III that have been exclusively reserved for mining activity. 18 15 Fiscal Year shall mean the period of twelve 12 months running from January 1 to December 31 of the same calendar year. 19.25 Installation phase shall mean all activities between the date the Mining Permit was granted and the Commencement of Operations. 2034 Lands shall mean parcels of land needed for the Mining Sites the Ancillary Facilities Sites the social facilities the Plant Sites and other facilities indicated below. 2127 Lender shall mean the Person or Persons participating in the financing or refinancing of GEOVICs exploration and/or mining activities excluding contributions to GEOVICs share capital including any guarantor or credit insurer of the loans required for such financing or refinancing and any assignee representative trustee or Affiliate of such Persons. 22 22 Minerals shall mean nickel cobalt and associated substances. 236 Mining Code shall mean Law No. 1 of 16 April 2001 on the Mining Code. 24 18 Mining operations shall mean mining processing conveyance storage sale of minerals.

525 28 . Mining Site shall mean areas where ore or ore minerals are extracted from the ground and any other contingent land necessary to accomplish this function. 26 36 . Mining Title shall mean the exploration permit and the mining permit in accordance with the Mining Code in force. 27 12 National Land shall mean the national land as defined in the land tenure law of Cameroon. 2826 Operational Phase shall mean the period after the Commencement of Operations. 29 23 Party shall mean individually the Republic of Cameroon or GEOVIC its successors or assignees. 3024 Person shall mean any natural person and any private or public body corporate. 3137 Plant shall mean any chemical or metallurgical separation or processing facility. 32.30 Plant Site shall mean any area containing a Plant. 3321 Product shall refer to the concentrate or intermediate product resulting from the minerals extracted at the mining site. 341 Shareholder shall mean any Person who holds one or more shares in GEOVIC to the exclusion of any Person who only holds a qualifying share or who holds obligations or debt convertible into GEOVIC shares. 3516 Shipper shall mean any Person who causes Minerals or Product to be transported using the Cameroon transportation infrastructure. 3631 Subcontractor shall mean a Person including Shareholders and Affiliates but excluding a Lender who by virtue of a contract entered into with a Contractor or with another Subcontractor of an annual value in excess of fifty thousand Dollars 50000 undertakes works supplies goods or services relating to activities undertaken pursuant to this Convention. 3713 Substituted Entity shall mean any Person that is substituted for GEOVIC in its rights and obligations pursuant to this Convention. A Substituted Entity shall be designated and controlled by the Lender pursuant to its agreements with GEOVIC. 3835 Third Party Beneficiaries shall refer to the Shareholders Affiliates Contractors Subcontractors Shippers or Lenders individually or collectively. PART II RIGHTS AND OBLIGATIONS OF THE PARTIES 6ARTICLE 3 MUTUAL OBLIGATIONS The State and GEOVIC hereby undertake to cooperate in order to perform the purpose of this Convention. Each Party shall be obliged to comply with the commitments responsibilities and obligations incumbent on it under this Mining Convention its annexes and its additional clauses in accordance with the legislation and regulations in force with the exception of the specific provisions of this Convention relating to the

simplification and alleviation of customs and administrative procedures.

SUBPART I RIGHTS AND OBLIGATIONS OF GEOVIC

ARTICLE 4 RIGHT OF ACCESS TO LANDS This Convention shall grant to GEOVIC the right to the allotment leasehold of the land needed to perform the purpose of the convention. The land shall be subject to prior classification under the private property of the State pursuant to the Land Tenure and State Land Law in force and the Mining Code and under the conditions laid down in Annex IV relating to the allotment leasehold.

ARTICLE 5 OBLIGATION TO PRODUCE FEASIBILITY STUDIES The mining permit application file shall include the feasibility study carried out in accordance with Sections 16 and 46 of the Mining Code and appended as Annex II of this Convention.

ARTICLE 6 OBLIGATION TO COMPLY WITH TECHNICAL AND SAFETY STANDARDS RELATING TO THE MANAGEMENT AND PROTECTION OF THE ENVIRONMENT AND THE POPULATION

6.1 GEOVIC shall undertake to carry out operations of mining transportation and storage of Products and Minerals according to the international technical and safety standards prevailing in the mining industry the Mining Code and Cameroons legislation relating to the protection of the environment and the population on the one hand and in accordance with the terms laid down in Annex I concerning the Environmental Impact Study and Management Plan approved before hand by the State on the other.

6.2 With effect from the Commencement of Operations GEOVIC shall undertake to furnish the guarantees necessary to ensure the rehabilitation of the site in accordance with the conditions provided for in the Environmental Management Plan.

6.3 If Mining operations should at any time whatsoever come to an end the Parties shall review the status of rehabilitation in order to determine whether any rehabilitation remains to be done following the initial programme. Where necessary the guarantee shall be applied to this end upon mutual agreement of the parties. In the event that the guarantee is in the form of a bank account the balance of the account shall be returned to GEOVIC once the work has been accepted by the State according to applicable legislation.

ARTICLE 7 OBLIGATION TO SUBMIT TO ADMINISTRATIVE MONITORING AND TECHNICAL INSPECTIONS

7.1 During the mining phase GEOVIC shall be subject to administrative monitoring and technical inspections relating to safety and standards as

well as to the protection of the environment and the population provided for by Cameroon legislation.

7.2 The State shall designate specifically for this purpose three (3) of its agents, be they civil servants or not, to carry out without negative impact on GEOVICs operations all monitoring and inspection operations and to witness the trials and tests enumerated below. Such personnel in this capacity shall have access to all the works, installations and sites targeted by their inspection. It shall be their mission to verify compliance of GEOVICs activities with safety provisions of the regulations in particular:

- a To verify twice yearly the reports established following the inspections carried out by GEOVIC and to initial the registers instituted for such inspections;
- b To witness at least once a year or according to the frequency of the operations if they are carried out at intervals of more than one (1) year the inspections carried out by GEOVIC or on behalf of GEOVIC by third parties chosen by GEOVIC among bodies approved by the State and competent to carry out the following operations:
 - Inspection of the condition of safety valves and protection systems;
 - Corrosion management;
 - Inspection of tests of firefighting equipment;
 - Analysis of effluents;
 - Testing of pressure vessels;
 - Quality assurance;
 - Solid waste management;
 - Other tests and inspections as mutually agreed to by the Parties.

7.3 Within the framework of administrative monitoring GEOVIC shall be bound to send to the Minister in charge of mines and geology not later than the fifteenth (15th) of each month a copy of the bills of lading for all shipments of Product during the preceding month.

7.4 In addition prior to 31 March of each year GEOVIC shall provide to the Ministers in charge of mines and geology, industry and the environment respectively a progress report for the previous Fiscal Year. Such report shall contain in particular:

- a The quantities and qualities of Products shipped;
- b A list of GEOVICs personnel by category;
- c A list of lost time accidents and significant incidents relating to the protection of the environment specifying their characteristics as well as the steps taken to prevent a recurrence or to limit the consequences thereof;
- d Information on the major works carried out and the measures taken to reinforce safety and the protection of the environment;
- e The balance sheet certified by a chartered accountant;
- f The state of implementation of the Environmental Management Plan provided for in Article 6 above.

ARTICLE 8. OBLIGATION TO EMPLOY AND

TRAIN CAMEROONIAN PERSONNEL 8.1 Subject to the implementation of the training programme referred to below GEOVIC shall be free to select and employ personnel irrespective of nationality and to terminate the employment of such personnel in accordance with the labour legislation in Cameroon. However in cases of equal competence GEOVIC shall give priority to the recruitment of Cameroonian personnel and shall undertake to include in its contracts with its Contractors a similar provision including a requirement that the Contractors shall include a similar provision in their contracts with Subcontractors. Within the year following the Commencement of Operations GEOVIC shall submit to the State a training programme to ensure the professional and technical training of its Cameroonian personnel in order to allow engineers managers technicians workers and administrative employees access to all positions for which they are qualified. 8.2 GEOVIC shall undertake not to engage in any discrimination of whatever nature whether on the basis of race sex religion or nationality and shall agree to include in its contracts with its Contractors a similar provision including a requirement that the Contractor shall include a similar provision in their contracts with Subcontractors. ARTICLE 9. SOCIAL INFRASTRUCTURE Within the framework of its mining GEOVIC shall undertake to build appropriate housing medical educational sports and recreational facilities for its employees. At the request of the State GEOVIC may place at the disposal of neighbouring establishments or of the public telecommunications facilities electric lines water supply and the health school sports and recreational facilities that it has established provided that use of such facilities shall cause no detriment to GEOVIC. ARTICLE 10. OTHER INFRASTRUCTURE 10.1 By this Convention the Republic of Cameroon hereby grants to GEOVIC the right to a Build and use its own roads connecting the Plant Sites the Mining Sites the Ancillary Facilities Sites any social infrastructure facilities or other facilities to existing roads. Furthermore GEOVIC is entitled to use existing roads in the Republic of Cameroon in accordance with the legislation in force. b Build and use private railroad spurs connecting the Plant Sites the Mining Sites the Ancillary Facilities Sites any social infrastructure facilities or other facilities to any future railroad lines that may be constructed in the vicinity of such sites and facilities. 9c Build use and improve

other infrastructure facilities notably electric lines pipelines drains channels river ports and landing strips for the needs of the Plant Sites the Mining Sites and the Ancillary Facilities Sites. 10.2 If any infrastructure other than as provided in this Convention shall be necessary GEOVIC may request authorization from the Minister in charge of mines and geology who shall be required to take a decision relative to GEOVICs request within a maximum of two 2 months. 10.3 If the State has not responded to GEOVICs request within two 2 months from the date it receives a request for authorization the Republic of Cameroon shall be deemed to have given its approval. ARTICLE 11.

USE OF EQUIPMENT AND MATERIALS PRODUCED IN CAMEROON AND SERVICES RENDERED BY LOCAL BUSINESSES GEOVIC Contractors and Subcontractors shall be free to choose suppliers Contractors and Subcontractors irrespective of their nationality in order to obtain goods and services of good quality in relation to their activities. However GEOVIC shall give priority to the use of equipment and materials available in Cameroon as well as to the services of businesses established in the Republic of Cameroon provided that their services and equipment are comparable to equipment materials and services of foreign origin with regard to price quality reliability availability and delivery terms. GEOVIC shall undertake to include in its contracts with its Contractors a similar provision including an undertaking on their part that its Contractors shall include a similar provision in their contracts with Subcontractors. ARTICLE 12 INSURANCE 12.1

Within this context such Persons shall have the right to freely negotiate and agree a with insurers of their choice as to i applicable coverage ii policy wording iii premiums and other insurance costs the procedure for paying such costs and the bank accounts and currencies used for such payments iv claim settlement procedures and the bank accounts and currencies used for such payments v conditions of reinsurance and vi any other insurance terms provided such insurers are legally established in Cameroon or represented by a duly approved insurance company incorporated in Cameroon. b with reinsurers of their choice outside Cameroon on all aspects of the reinsurance selected in support of the insurance

coverage placed in accordance with this Article subject to part of the reinsurance being reserved for reinsurance companies incorporated in Cameroon and duly approved in accordance with the Cameroon legislation in force. GEOVIC and the Third Party Beneficiaries shall not be otherwise restricted with respect to i reinsurance coverage ii the currency or currencies in which such reinsurance coverage is denominated and claims paid iii reinsurance premiums and other reinsurance costs iv the currency or currencies in which reinsurance premiums and other reinsurance costs are denominated and paid v the procedures and bank accounts used for premium 10payments claim settlements or other payments between the Parties relating to reinsurance vi policy wording or language vii any other terms applicable to such reinsurance agreements and the administration of such agreements. 12.2 Pursuant to Section 3 of the CIMA Code and Article 72 of Ordinance No. 853 of 31 August 1985 the State hereby gives its consent that GEOVIC and the Third Party Beneficiaries shall be authorised to take out insurance policies denominated in foreign currency. 12.3 Notwithstanding Article 12.1 GEOVIC and the Third Party Beneficiaries shall be exempted for activities undertaken under this Convention from the provisions of Ordinance No. 853 of 31 August 1985 relating to the limitation on the transfer of risk and insurance premiums outside Cameroon.

SUBPART II COMMITMENTS OF THE STATE ARTICLE 13 GENERAL GUARANTEES 13.1 In accordance with the provisions of Section 15 of the Mining Code the State shall undertake not to introduce any restriction or modification to a The free implementation of the Articles of Association of GEOVIC where they are not repugnant to the laws in force in Cameroon b GEOVICs unlimited right to select its Shareholders c The rights attached to shares by virtue of law d GEOVICs right to select the Persons in charge of the management or control of GEOVIC President Board members General Manager Financial Commercial Administrative and Technical Managers Auditors Commissaires aux Comptes e GEOVICs right to decide the means of organizing its operation especially the increase and decrease of capital the distribution or capitalization of profits or reserves and the use of its assets and all income the disposition of payments; f The regime applicable to the relationships between GEOVIC and its Shareholders g The freedom of decisions made technical

administrative commercial or financial management of GEOVIC without prejudice to the legislative provisions on the environment for h The freedom of GEOVIC to hire promote and fire its personnel to fix their salaries and other benefits and to fix the number of employees in accordance with the laws in force i The freedom of GEOVIC to import aircraft planes and helicopters and telecommunications equipment for land or satellite communication in accordance with the laws in force j The freedom of GEOVIC to borrow or lend funds in accordance with its Articles of Association. 13.2 Notwithstanding the provisions of Article 13.1 above the Republic of Cameroon hereby guarantees to GEOVIC the Third Party Beneficiaries and to the Persons normally employed by them 11a b c d The freedom of choice of suppliers of goods and providers of services; The free choice and free movement of personnel the issue of visas and work permits to expatriate personnel in accordance with the regulations in force and the provisions relating to public order and subject to Article 8; The grant and renewal of the Mining Titles required for the conduct of the activities of GEOVIC according to the Mining Code and the provisions of this Convention; The freedom to conduct their affairs in accordance with their criteria for mining so long as their actions do not contravene applicable laws and regulations of the Republic of Cameroon. 13.3 The State shall undertake not to object to the decisions of GEOVIC regarding any distribution of its profits in the form of dividends and insofar as allowed by any Lender any cash in excess of the routine needs of GEOVIC but which cannot be distributed in the form of dividends to the Shareholders in proportion to their participation in the share capital in the form of interestfree loans in reduction of capital or advance reimbursement of Shareholder or Affiliate loans or any other method deed on by GEOVIC. 13.4 The State shall guarantee to GEOVIC the Contractors SubContractors Lenders and Shippers registration on the list of importers and exporters as provided for by applicable regulations. 13.5 The Republic of Cameroon shall guarantee that it has obtained from the CEMAC Executive Council in the appropriate form and for the period of validity of this Convention the approval of the legal tax customs and exchange control regime applicable to the activities undertaken under this Convention.

ARTICLE 14 STABILITY OF LEGAL AND TAX REGIME 14.1 In implementation of Section 99 of the

Mining Code the State hereby guarantees a b c the stability of the rates and bases for assessment of taxes duties and fees applicable to GEOVIC under this Convention. the stability of the legal tax customs and exchange control regime as provided for in Article 17 below applicable to the activities undertaken by GEOVIC. The stability of the terms and conditions of the present Convention. 14.2 With regard to the activities undertaken under this Convention the Republic of Cameroon shall not modify the legal fiscal and customs regimes currently in force in such a way as to adversely affect the rights and obligations of GEOVIC or the Third Party Beneficiaries arising from this Convention and no legislative regulatory or administrative measure contrary to the provisions of this Convention shall apply to GEOVIC or the Third Party Beneficiaries without GEOVICs prior written consent. 14.3 a Notwithstanding the terms of Article 14.2 above if GEOVIC believes that any legislation regulation or administrative measure of the State produces an unfavourable effect on the rights and obligations resulting from this Convention for GEOVIC or the Third Party 12Beneficiaries GEOVIC shall have the right to request that such measure not be applied to itself or to the Third Party Beneficiaries. To this end GEOVIC shall address to the Minister in charge of mines and geology a petition stating the reasons for its opinion. Within two 2 months from the date GEOVICs petition is received the Minister in charge of mines and geology may either reject GEOVICs petition in which case GEOVIC may resort to arbitration in accordance with the terms of the present Convention or accept the petition and take the steps necessary to ensure that the measure in question is not applicable to GEOVIC or to the Third Party Beneficiaries. b The introduction of the procedure provided for in paragraph a above shall entail suspension of the application of the measures to GEOVIC and the Third Party Beneficiaries from the date the measures takes effect. The contested measure shall only apply if i GEOVICs petition shall have been rejected and ii GEOVIC has not filed a request for arbitration within two 2 months or iii an arbitration award shall have confirmed the rejection of the petition. 14.4 The Republic of Cameroon shall undertake no nationalization or expropriation affecting the assets of GEOVIC or the Third Party Beneficiaries. ARTICLE 15 NONDISCRIMINATION AND CONFIDENTIALITY 15.1 If during the term of this Convention a mining company operating in

Cameroon benefits from one or more conditions which taken as a whole are considered by GEOVIC to be more favourable than those provided for in this Convention the benefit of such condition or conditions shall apply to GEOVIC at its request. 15.2 The guarantees granted by this Convention to GEOVIC and the Third Party Beneficiaries shall remain valid irrespective of other less favourable conditions applicable to other companies carrying out similar activities even as a result of modifications in Cameroon legislation. 15.3 Any provision of Cameroonian legislation and any modification that comes into effect following the date of signature of the present Convention which are likely to entail more favourable conditions than those provided for in the present Convention shall apply to GEOVIC and the Third Party Beneficiaries as of right. 1315.4 The Republic of Cameroon hereby acknowledges that all reports results of analyses logs geophysical data maps and any other information received from GEOVIC whether by way of inspection or other means constitute Industrial Secrets. The State shall guarantee to GEOVIC that neither the Republic of Cameroon nor any of its agents or officials shall communicate such Industrial Secrets to third parties without the prior and written approval of GEOVIC. GEOVIC shall be entitled to reparation of the prejudice caused by the nonrespect by the State of its commitment not to divulge the Industrial Secrets. ARTICLE 16 FOREIGN CURRENCY AND BANKING OPERATIONS 16.1 For the purposes of the activities carried out under this Convention GEOVIC shall have the right to freely carry out the following operations a b c d e To open maintain operate and close bank accounts including foreign currency bank accounts both outside and within Cameroon To receive in keep in and disburse from such bank accounts funds in foreign currency or local currency in particular for the payment of dividends goods and services interest and principal on loans repatriation of capital advances to Shareholders and taxes To withdraw such funds or to transfer them to another account whether outside or within Cameroon To convert such funds from foreign currency into local currency from local currency into foreign currency and from one foreign currency to any other foreign currency all at rates applicable to general commercial transactions To repatriate invested capital and transfer profits subject to respect of the legislation in force. The rights provided for in this Article shall also

extend to the Third Party Beneficiaries acting within the scope of this Convention. Such Third Party Beneficiaries shall be subject to the rules of applicable ordinary law regarding exchange control. Any Lender may freely transfer abroad all proceeds from foreclosures on secured interests. 16.2 GEOVIC shall at the beginning of each Fiscal Year submit to the Republic of Cameroon an estimate of its foreign currency needs in exchange for local currency indicating however the use intended for such currency. 16.3 Without prejudice to the rights granted by this Article GEOVIC shall comply with administrative formalities relating to the exchange regulations applicable in Cameroon for general commercial transactions. 16.4 In the event of any changes in the present monetary system of the Republic of Cameroon the State shall guarantee maintenance of the rights created under this Article in favour of GEOVIC the Third Party Beneficiaries Lenders and Persons engaged in the marketing of the Product as well as for regular employees of GEOVIC. 14PART III LEGAL AND TAX PROVISIONS ARTICLE 17 LEGAL TAX CUSTOMS AND EXCHANGE CONTROL REGIME 17.1. The legal tax customs and exchange control regime applicable to activities undertaken under this Convention is defined by the following instruments with respect to those of their provisions which are not contrary to or inconsistent with the provisions of this Convention a Act of the Organisation for the Harmonisation of Business Law in Africa OHADA; b Regulation No. 200CEMACUMACCM to harmonise exchange in member States of CEMAC; c the Customs Code in force; d e g the General Tax Code as applicable on the date of entry into force of this Convention; all Finance Laws as applicable on the date of entry into force of this Convention; Law No. 634 of 19 June 1963 to implement the regulations of the Franc Zone throughout the territory of the Republic of Cameroon; the Mining Code in force; Law No. 20024 of 19 April 2002 the Investment Charter of the Republic of Cameroon; Law No. 67LF22 of 12 June 1967 relating to the financial relations between Cameroon and foreign countries; k Law No 9514 of 8 August 1995 to establish the form of accounts kept in US Dollars US ; h i j 17.2 GEOVIC shall benefit from the privileges of the Regime for Strategic Enterprises as defined in the Investments Code under the conditions provided for in Section 43 of Law No. 20024 of 19 April 2002 the Investment Charter for the Republic of Cameroon. 17.3

GEOVIC shall benefit from alleviation of customs operations by systematic application on the basis of a duly reasoned request of simplified procedures such as removal of goods before payment of duty and waiver of monitoring of import inspections nothing to declare lane of onsite visits and of the creation of a customs office at the entrance of the mining complex or of any other procedure provided for by applicable regulation. 17.4 Furthermore all laws of the Republic of Cameroon that are not contrary to or incompatible with the provisions of the present Convention shall apply to the activities undertaken under this Convention. 17.5 GEOVIC shall pay an Ad Valorem Tax on the basis of the market value of the Minerals in accordance with the Finance Law and the Mining Code. 15a 17.6 Nonresident GEOVIC expatriate personnel originating from a country that has no bilateral income tax convention with the Republic of Cameroon who are present in Cameroon for a total of less than one hundred and eighty 180 days during a given Fiscal Year may elect to be taxed on a prorata temporis basis. b The terms of any applicable bilateral income tax convention shall apply to taxation of the income of nonresident expatriate personnel originating from a country that has entered into such a bilateral convention with the Republic of Cameroon. ARTICLE 18. MINING TITLES Within fifteen 15 days following signature of this Convention the Minister in charge of mines and geology shall commence the procedure for delivery of the Mining Permit which shall be granted to GEOVIC within not less than ninety 90 days. ARTICLE 19. MODE OF PAYMENT OF FIXED FEES AND ROYALTIES The conditions according to which GEOVIC shall pay the fixed fees and royalties provided for in the Mining Code shall be those established by regulation. ARTICLE 20. ACCOUNTING PROVISIONS 20.1 GEOVICs accounting shall be kept in accordance with the provisions of General Tax Code this Convention as well as the OHADA Accounting Plan standards. GEOVIC shall be authorized to use the Dollar to keep its accounts to carry out all related accounting operations and to denominate its share capital in such currency. 20.2 The exchange rate to be applied for conversion of operations carried out in a currency other than the Dollar shall be the rate published under the heading exchange cross rates in the London Financial Times in effect on the day of the operation. If the currency is not listed in the exchange cross rates or if the London

Financial Times is unavailable exchange rates taken from another internationally recognized source published in London or New York shall be used. If no published rate can be obtained the rate to be applied shall be the mathematical average of the exchange rates of each business day for the month in question for which the rate is available from any of the sources referred to in this Article

20.2. PART IV MISCELLANEOUS AND FINAL PROVISIONS ARTICLE 21. TERM OF THE

CONVENTION 21.1 This Convention shall take effect from the date of its signature and remain in

force for an initial period of twentyfive 25 years from the Commencement of Operations. It shall be

renewable by mutual agreement following a request for renewal duly made at the latest 2 two years

before the expiry of the initial period. 21.2 Notwithstanding Article 21.1 above this Convention may

be terminated prior to its term only in the following three 3 cases 16a b c By agreement of the

Parties By GEOVICs renunciation in accordance with the nonrenewal clauses and the clauses

concerning the termination of operations below; or By the State in accordance with the conditions for

withdrawal renunciation or invalidity of this Convention. SCOPE OF THE CONVENTION ARTICLE

22. . 22.1 This Convention shall apply principally to GEOVIC and to any Person to which GEOVIC

may assign all or part of the rights and obligations granted to it under the conditions of this

Convention 22.2 The Shareholders the Affiliates the Contractors the SubContractors the Shippers

and Lenders and other Third Party Beneficiaries shall benefit from the rights and guarantees

granted to them respectively under this Convention with respect to activities related to the mining

and processing of the Minerals and to production of the Product in Cameroon. 22.3 The suspension

of rights and benefits granted to GEOVIC by this Convention in application of the terms hereof shall

as of right entail suspension under the same conditions of the extension to the Third Party

Beneficiaries of the same rights and benefits. ARTICLE 23. APPLICABLE STANDARDS The mining

standards applicable under this Convention shall be World Bank standards or standards that can be

demonstrated as generally applicable in the international mining industry or if none the standards

established by applicable legislation in Cameroon. ARTICLE 24. ASSIGNMENT AND TRANSFER

OF RIGHTS SUBSTITUTION OF LENDERS 24.1 The rights and obligations resulting from this

Convention may be assigned including by way of security pledged or transferred in whole or in part by GEOVIC to any Lender or other creditor as well as to its successors and assignees. Any assignment realization of a pledge or transfer of rights arising under this Convention shall automatically entail unless otherwise provided by the assignment pledge or transfer deed the transfer of constructions structures and facilities of any kind belonging to GEOVIC as well as of the benefit of the granting of rights of access to lands as defined in the Mining Code and the terms of the present Convention. Except for constructions structures and facilities of any kind belonging to GEOVIC which may not be the object of a mortgage or other security nor of any attachment or legal process GEOVIC may grant any security including transfer by way of security over its other property or assets including its goodwill its intellectual property rights and its bank accounts. A pledge of the goodwill shall include unless otherwise provided by the pledge deed the rights resulting from this Convention when such pledge is granted for the benefit of the Lender. Any pledge or assignment made by way of security for several creditors may be granted to one of them or to a representative or fiduciary for the common account of all the creditors in question. GEOVIC must notify the Minister in charge of mines and geology for information purposes only of any transfer of the rights 17granted by this Convention or any pledge of GEOVIC shares resulting from an assignment by way of security or from the realization of a security for the benefit of a Lender. 24.2 The State hereby agrees that a Lender or GEOVIC may substitute a Substituted Entity for GEOVIC. With effect from the date of entry into force of such substitution the Substituted Entity shall benefit from all the rights and shall assume all the obligations conferred on GEOVIC by this Convention. However and notwithstanding the foregoing no Substituted Entity shall have the right to agree to amendments or modifications of this Convention. Such substitutions shall entail the vesting in the Substituted Entity of the said rights and obligations as well as GEOVICs rights in constructions structures and facilities of any kind and the benefit of enjoyment of the rights of access to the lands notwithstanding any act or ruling of third parties to the contrary in particular in the event of bankruptcy or court liquidation of GEOVIC. When the principal interest and all other amounts due by GEOVIC under its contracts with

the Lender shall have been paid to the Lender or at the election of GEOVIC if it has named a Substituted Entity the substitution referred to in this Article shall terminate and GEOVIC shall resume its rights and obligations conferred by the present Convention. The conditions and implementation terms of the substitution shall be defined by and between the Parties and the Lender as the case may be. The Parties shall notify the Minister in charge of mines and geology of any such substitution within thirty 30 days of agreement to the terms of the substitution. 24.3 The notarising of all deeds relating to security assignment or transfer or other loan documents related to activities undertaken under this Convention shall be exempt from the special tariffs defined in the Tariff Table appended to Decree No. 9538 of 28 February 1995 setting tariffs for authenticated deeds. All legalization shall be subject to charges and fees to be fixed by amicable agreement between the notary public and the signatories of the said deeds.

ARTICLE 25. SUSPENSION OF RIGHTS AND BENEFITS GRANTED BY THE CONVENTION WITHDRAWAL OF MINING PERMIT TERMINATION AND INVALIDITY OF THE CONVENTION

25.1 OPPORTUNITY TO CURE DEFICIENCIES Whenever the Republic of Cameroon determines that performance by GEOVIC of any of its obligations under this Convention is insufficient the Republic of Cameroon shall provide written notice of the insufficiency with a statement of the reasons therefor and indication of the time period within which GEOVIC is expected to remedy such insufficiency unless a specific time period is stated in this Convention for such opportunity to remedy deficiencies. In any case GEOVIC shall be allowed a reasonably sufficient time under the circumstances to comply.

25.2 The State may in the following cases suspend the rights and benefits granted to GEOVIC by this Convention. Consequently the State may then withdraw the Mining Permit and terminate this Convention under the conditions provided for in Article 27

18a nonpayment within the deadline of all taxes duties royalties and fees after a formal notice in accordance with the General Tax Code and under the conditions laid down in this Convention

b non respect of the clauses concerning environmental management.

25.3 Suspension of rights and benefits may only occur after notification of an official statement in lieu of formal warning. Such suspension may take effect no sooner than fortyfive 45

days after notice to GEOVIC. 25.4 If a dispute relative to suspension is submitted to arbitration such suspension shall be stayed temporarily during the arbitration proceedings. If the dispute relates to amounts due as Ad Valorem Tax or an element of computation of such tax GEOVIC shall pay the uncontested portion. This suspension shall not be stayed if GEOVIC fails to pay such uncontested amount at least sixty 60 days after notice without cure. 25.5 If the issue that motivated the suspension of the Mining Permit has not been cured after thirty 30 days and an arbitration procedure has not been commenced GEOVIC shall be considered as not having performed its obligations under the rights conferred by the Mining Permit which shall be withdrawn and the present Convention terminated. 25.6 Any notice of default given pursuant to this Article shall be cancelled immediately and any suspension that has taken effect shall be lifted when the default has been cured and any applicable penalties paid. 25.7 When pursuant to Article 25.2 the State notes a case of violation and the default has not been cured in the time periods provided for above the rights and benefits referred to in Article 25.2 shall be suspended for a period of no more than one hundred eighty 180 days from the notification of such action to GEOVIC. Such suspension of rights and benefits shall terminate prior to the expiry of the one hundred eighty 180 day period if the State takes note that the default has been cured and that where applicable penalties provided for in the present Convention have been paid. During the period of suspension of rights and benefits activities undertaken under this Convention shall proceed in accordance with its terms and with the legislation in force. 25.8 If at the expiry of the suspension period either a the dispute has not been resolved by arbitration or b the defaults have not been cured and penalties provided for by this Convention have not been paid the Mining Permit may be withdrawn and this Convention terminated with effect from the date of notification of such termination to GEOVIC by the State. 25.9 Suspension of the rights and benefits as well as withdrawal of the Mining Permit and if applicable termination of this Convention shall not release the Parties from their legal and contractual obligations accrued as of the effective date of such measure. ARTICLE 26. RENUNCIATION OF THE MINING PERMIT NONRENEWAL OF THE CONVENTION END OF MINING 19GEOVIC may before or at the expiry

of the term of the Mining Permit renounce the operation of all or part of the said Permit. In the event of a renunciation before the Commencement of Operations GEOVIC shall inform the Minister in charge of mines and geology without any prior notice being required. In the event of a renunciation after the Commencement of Operations GEOVIC shall specify the effective date of its renunciation which shall not be less than twelve 12 months from the date of notice as to a portion of the Mining Permit and twentyfour 24 months for the entire Permit from the date of notice. In addition for information purposes GEOVIC shall give the Republic of Cameroon the reasons for such renunciation and shall stop mining works and rehabilitate the Mining Sites pursuant to the specifications and the Environmental Management Plan. Within two 2 months from the notice the Minister in charge of mines and geology shall officially acknowledge GEOVICs decision. If the renunciation bears on a portion of the Mining Permit only the Minister in charge of mines and geology shall indicate the States position as to acceptance of the conditions for renunciation within two 2 months. This time period shall be extended to six 6 months if the renunciation bears on the entire Mining Permit. The renunciation shall not become effective until after the Republic of Cameroon and GEOVIC have jointly signed a memorandum in which the Republic of Cameroon and GEOVIC shall acknowledge that the terms of withdrawal defined herein have been complied with. The renunciation shall be confirmed by decree. The decree shall recall the terms of the decree granting the Mining Permit and the decree granting allotment leaseholds. It shall discharge GEOVIC from its undertakings under the present Convention as of the date of signature. However if for any reason whatsoever the decree is not published within thirty 30 days following signature of the memorandum referred to above GEOVIC shall be deemed to have been released from the said undertakings.

ARTICLE 27. RIGHTS AND OBLIGATIONS AT THE END OF THE CONVENTION

At the end of the Convention whether at its expiry or by virtue of its invalidity as defined herein a b c d GEOVIC shall be bound to implement and complete work pursuant to the Environmental Management Plan; GEOVIC its Contractors and Subcontractors shall dispose of all equipment and materials situated anywhere within any Mining Site. GEOVIC its Contractors and Subcontractors

shall be entitled to export all such materials under conditions laid down by the legislation in force; The social infrastructure created by GEOVIC shall become the property of the State; Expatriate employees residing in the Republic of Cameroon for the purpose of employment with GEOVIC its Contractors and Subcontractors shall be entitled to export all personal belongings free of export taxes or duties. The 20e Republic of Cameroon shall grant promptly all tax exemptions or other exit documents required to expedite the departure of the said expatriate employees; Neither Party shall be entitled to any compensation or damages by reason of the end of the Convention except in the case of a violation of the provisions of Article 15.4 against revealing Industrial Secrets. ARTICLE 28 FORCE MAJEURE 28.1. The intention of the parties is that the term Force majeure shall receive the interpretation which is the most compliant with the principles and usage of international law. 28.2. According to this convention force majeure shall refer to but not be limited to all events beyond the control of a party and which prevent it from fulfilling its obligations such as earthquakes and natural disasters riots insurrections civil strife acts of war or conditions caused by war. Notwithstanding the foregoing it shall be expressly outlined that force majeure shall be understood as all events beyond the control of GEOVIC and likely to impede either the construction or the development of its mining or plant sites or the production transportation or marketing of its products. However the technical and commercial hazards of the company as well as the general economic situation may not be considered as cases of force majeure. 28.3. The Party that cannot comply with its obligations due to a Force Majeure event shall notify the other Party and shall provide all the details on the Force Majeure event. In all cases the Party that is the victim of a Force Majeure event shall take all appropriate steps in order to perform the obligations affected by the Force Majeure event. A Force Majeure event affecting Contractors and Subcontractors shall be considered as a Force Majeure event affecting GEOVIC insofar as this Force Majeure event affects GEOVICs activities in Cameroon. 28.4. If in case of Force Majeure performance of any of the obligations provided for in this Convention is suspended the period of suspension of the obligation and the time necessary for the Party that is the victim of the Force Majeure event to repair the damages caused by the Force

Majeure event as well as the damages caused during this period of suspension shall be added to any time period provided by this Convention for the performance of such an obligation and any other time period in this Convention shall be extended by an equal amount of time. ARTICLE 29 SETTLEMENT OF DISPUTES 29.1 The Parties shall agree that any dispute arising between the State and GEOVIC from this Convention including its validity shall be the subject of attempts at amicable settlement. In the event of failure to reach an amicable settlement such disputes shall be settled following the arbitration procedure set forth in this article. 2129.2 Any dispute as to interpretation as between the English and French versions shall be resolved pursuant to this article. However if the parties agree that the dispute does not warrant application of the full arbitration procedure they shall designate a neutral bilingual third party who is knowledgeable in the application of international contracts generally. The decision of the party so designated as to the proper interpretation of the disputed clauses shall be binding on the parties. If the parties cannot agree on the third party to be designated they shall agree to submit an application to the International Chamber of Commerce for the designation of such third party. The parties shall agree to accept the party so designated. 29.3. Except as specifically stated elsewhere in this Convention all disputes arising in connection with this Convention shall be finally settled under the Rules of Conciliation and Arbitration of the International Chamber of Commerce ICC by three arbitrators appointed in accordance with the said Rules the Rules. The Parties shall agree that any arbitration under this arbitration provision shall be an international arbitration subject to the New York Convention on the Recognition and Enforcement of Foreign Arbitration Awards of 1958. An arbitration tribunal constituted in accordance with this Convention shall be composed of three 3 arbitrators selected as indicated below. The arbitrators shall have the powers of compounders. 29.4. If a Party is of the opinion that a dispute will not be resolved amicably it shall notify the other Party of its decision to resort to arbitration by means of a Request for Arbitration notified to the other party in accordance with conditions laid down in this Convention and communicated to the ICC. The Request for Arbitration shall be drafted in accordance with the Rules and shall indicate the name qualifications

and domicile of the Claimants selected arbitrator. The Defendant shall file its Answer with the ICC and shall notify it to the Claimant within thirty 30 days of the Defendants receipt of the Request for Arbitration. The Answer shall designate the Defendants choice of arbitrator indicating the arbitrators name qualifications and domicile. The two designated arbitrators shall designate the third arbitrator within thirty 30 days of the receipt by the Claimant of the Defendants Answer. They shall jointly communicate the name qualifications and domicile of the third arbitrator to the ICC. Failure to designate within a deadline of thirty30 days with effect from the date of designation of an arbitrator by either of the parties or if the two designated arbitrators fail to designate a third arbitrator as provided above the unnamed arbitrators shall be appointed by the ICC. 29.5. The Parties shall agree to pay advances and costs of arbitration as provided for in the Rules. The Award shall allocate final responsibility for costs and fees of the arbitration. 29.6. The Parties obligations arising from this Convention shall remain in force and the Parties shall not be released therefrom during the course of any arbitration proceeding 22provided however that the commencement of an arbitration procedure shall suspend execution of the disputed measure during the course of such arbitration unless the designated arbitrators dee otherwise at the request of one of the Parties and as a measure to prevent significant economic loss to either Party or to third parties to protect the environment or for any reason justifying emergency measures. 29.7. The award rendered by the arbitration tribunal shall be final and irrevocable. It shall be binding on the Parties and shall be enforceable in accordance with ICC Rules and applicable laws in the Republic of Cameroon. The Parties shall renounce formally and without reservation any right to challenge said award to oppose its execution by any means or to resort to any other jurisdiction whatsoever for resolution of the same dispute or any part of it. The Republic of Cameroon within the context of arbitration hereby waives its right to invoke immunity from execution of the arbitration award and if necessary from any judgment for enforcement of the arbitration award. 29.8. If an arbitration award orders one of the Parties to pay sums of money to the other Party the Parties shall undertake to agree on the terms of payment of such amounts within thirty 30 days from the date of notification of the award. The

arbitration tribunal shall not close its proceedings until the earlier of i thirty 30 days after notification of the award or ii receipt from either Party of a request that the arbitrators draw a schedule for payment of any award as an adjunct to the award and in aid of enforcement of its award on the merits. If the negotiations fail if no request is made to the arbitrators for the scheduling of payments or if an award is not satisfied in full pursuant to an agreement of the Parties or in accordance with an award in aid of enforcement the Parties agree that the Party in whose favour the award on the merits has been made shall be entitled to set off all or any part of the award against any amounts owing by that Party to the other Party including but not limited to any award in favour of the other Party by the arbitration tribunal any taxes or fees including but not limited to Ad Valorem Taxes owed by GEOVIC to the State or any amounts owed by the State to GEOVIC. Neither the rate of the Ad Valorem Tax nor the obligation of GEOVIC to pay such tax shall be affected by such setoff rights and GEOVIC shall continue to file declarations of the Ad Valorem Tax claiming any setoff. Where no setoffs are available the Party against which an award has been rendered shall make quarterly payments on the award amounting to a minimum of twentyfive percent 25 of the amount of the award until the award is paid in full. If after 12twelve months of the award on the merits said award has not been paid in full if either of the Parties has breached its agreement on the schedule to pay the award or if the arbitrators award as to payment terms has not been complied with the Parties shall be entitled to pursue the enforcement of the arbitration award by any other means which are legal in the jurisdiction where enforcement is sought without restriction. The provisions of this Article shall be enforceable in any case where an arbitration award establishes that in breach of the provisions of this Convention in respect of the stability of the legal and tax regime a legislative administrative or regulatory measure entailing a payment to the State was enforced against Third Party Beneficiaries to the extent GEOVIC is contractually bound to reimburse such payment to such Persons. 23The Parties may agree that this Article shall apply to the payment of sums of money required from either Party as a result of the amicable settlement of a dispute. 29.9. In the event of a dispute between the State and any Third Party Beneficiary arising out of this Convention these

provisions shall be applicable under the following conditions the State accepts the terms of this article pursuant to its obligations under this Convention. A Third Party Beneficiary shall be deemed to have ratified this article when it i initiates arbitration by filing a Request for Arbitration or ii agrees to arbitration by filing an Answer to a demand.

ARTICLE 30 PLACE AND LANGUAGE OF ARBITRATION The arbitration shall be conducted in English or in French or in both languages and shall take place in Paris France. The arbitrators selected shall dee any questions as to use of language during the proceedings on the basis of fairness to the Parties and in the interest of promoting the efficiency of the proceedings.

ARTICLE 31 APPLICABLE LAW Cameroon law the terms and conditions of this Convention the general principles of international law and common practices widely used in the international mining industry shall govern this Convention. In case of conflict among these common practices which can be established as being widely used in the international mining industry shall take precedence.

ARTICLE 32 ENTIRE AGREEMENT This Convention shall set forth the entire understanding of the Parties thereto and shall supersede any and all prior agreements arrangements and understandings relating to the subject matter hereof. The Parties shall declare that no representation promise or statement of intent made by either Party has been left out of this Convention. However no Party shall be bound by or be liable for any alleged representation promise or statement of intent not embodied or incorporated herein unless same shall have been made contemporaneously herewith and put in writing and signed by both Parties.

ARTICLE 33 NONWAIVER The failure of either Party to insist upon strict performance by the other Party of the terms and conditions of this Convention or its failure to take the necessary measures at its disposal to ensure their performance shall not be considered as a waiver of any of its rights granted by this Convention. Each Party shall be under obligation to observe the covenants responsibilities and duties imposed upon it by the terms of this Convention and its riders. The Parties shall be bound to perform in strict accordance with the terms hereof despite the possible inaction of any of the Parties.

ARTICLE 34 SEVERABILITY 24Each and every guarantee undertaking and agreement contained in this Convention is and shall be construed to be a separate

and independent guarantee undertaking and agreement. If any term or provision of this Convention or the application thereof to any Party or in any circumstance shall to any extent be declared invalid and/or unenforceable by an arbitrator or by a court of competent jurisdiction the remainder of this Convention or the application of such term or provision to Parties or circumstances other than those as to which it is invalid or unenforceable shall not be affected thereby.

ARTICLE 35 NOTICES All notices and other communication required by this Convention or any notices which the Parties may give to each other shall be written in English or in French and shall be considered as having been validly given when they are delivered in person to and signed for by a representative of the recipient Party duly designated for this purpose or sent by registered mail with acknowledgement of receipt telegram cable facsimile or telex or by any other electronic means after prior agreement of the Parties to the address of the recipient Party as indicated below or to any other addresses of which either of the Parties may notify the other Party in writing. A Party shall not give notice by facsimile or by electronic transmission without the prior agreement of the other Party. If notice is given by facsimile the effective date of notice shall be the date of receipt of the facsimile. Addresses

inserted No. 37 of 1984 s. 3.] 3D. Fourth variation agreement 1 The fourth variation agreement is approved and ratified. 2 The implementation of the fourth variation agreement is authorised. 3 Without limiting or otherwise affecting the application of the Government Agreements Act 1979 the fourth variation agreement shall operate and take effect notwithstanding any other Act or law. [Section 3D inserted No. 95 of 1985 s. 4.] 3E. Fifth variation agreement 1 The fifth variation agreement is approved and ratified. 2 The implementation of the fifth variation agreement is authorised. 3 Without limiting or otherwise affecting the application of the Government Agreements Act 1979 the fifth variation agreement As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 3 Iron Ore Robe River Agreement Act 1964 s. 4A shall operate and take effect notwithstanding any other Act or law. [Section 3E inserted No. 87 of 1987 s. 6.] 4A. Variation of Agreement to increase rates of royalty 1 In this section Agreement means the agreement a copy of which is set out in the First Schedule a b as varied from time to time in accordance with its provisions; and as varied by these agreements i ii iii iv v the first variation agreement; the second variation agreement; the third variation agreement; the fourth variation agreement; the fifth variation agreement. 2 Clause 92j of the Agreement is varied a in subparagraph ii by deleting three and three quarter per centum 3 and inserting 5.625 b in subparagraph iii by deleting aforesaid; and inserting aforesaid until 30 June 2010 and thereafter at the rate of 5.625 of the f.o.b. value computed as aforesaid; c in subparagraph iv by deleting one shilling and sixpence 16d per ton; and inserting page 4 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 s. 4B 5 of the f.o.b. value computed as aforesaid; 3 Clause 92jii iii and iv of the Agreement as varied by subsection 2 operate and take effect despite a b c any other provision of the Agreement; and any other agreement or instrument; and any other Act or law. 4 Nothing in this section affects the amount of royalty payable under clause 9 of the Agreement in respect of any period before the commencement of the Iron Ore Agreements Legislation 1. Amendment Act 2010 Part 10[Section 4A inserted No. 34 of 2010 s. 23.] 4B. Sixth variation agreement 1 The sixth variation agreement is ratified. 2 The implementation of

the sixth variation agreement is authorised. 3 Without limiting or otherwise affecting the application of the Government Agreements Act 1979 the sixth variation agreement is to operate and take effect despite any other Act or law. [Section 4B inserted No. 61 of 2010 s. 9.] 4C. State empowered under clause 9D9a The State has power in accordance with clause 9D9a of the Agreement. [Section 4C inserted No. 61 of 2010 s. 9.] 4D. Seventh variation agreement 1 The seventh variation agreement is ratified. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 5 Iron Ore Robe River Agreement Act 1964 s. 4 2 The implementation of the seventh variation agreement is authorised. 3 Without limiting or otherwise affecting the application of the Government Agreements Act 1979 the seventh variation agreement is to operate and take effect despite any other Act or law. [Section 4D inserted No. 61 of 2011 s. 9.] 4. Declaration as to entry on Crown lands It is hereby declared that notwithstanding any other Act or law the Company may b c d 2 does not apply enter upon the Crown lands referred to in clause 2c of the Agreement in accordance with and for the purposes therein mentioned; and section 2775 of the Mining Act 1904 to any renewal of the rights of occupancy granted pursuant to clause 2a of the Agreement; and section 96 of the Public Works Act 1902 does not apply to any railway agreed to be constructed under the Agreement; and the Governor may on the recommendation of the Company make alter and repeal bylaws in accordance with and for the purposes referred to in clause 9 of the Agreement and the bylaws i ii shall be published in the Gazette; shall take effect and have the force of law from the date they are so published or from a later date fixed by the order making the bylaws; iii may prescribe penalties not exceeding 100 for a iv breach of any of the bylaws; are not subject to section 36 of the Interpretation Act 1918 3 page 6 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 s. 4 but shall be laid before each House of Parliament within the 6 sitting days of such House next following the publication of the bylaws in the Gazette. [Section 4 amended No. 113 of 1965 s. 81.] [5. Deleted No. 87 of 1987 s. 7.] As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 7 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement First Schedule Iron Ore Robe

River Agreement [s. 2] [Heading amended No. 19 of 2010 s. 4.] THIS AGREEMENT under seal made the eighteenth day of November One thousand nine hundred and sixtyfour BETWEEN THE HONOURABLE DAVID BRAND M.L.A. Premier and Treasurer of the State of Western Australia acting for and on behalf of the said State and instrumentalities thereof from time to time hereinafter called the State of the one part AND BASIC MATERIALS PTY. LIMITED a company incorporated under Companies Act 1961 of the State of Western Australia and having its registered office and principal place of business at 25 William Street Perth in the State of Western Australia hereinafter called the Company which expression will include the successors and assigns the Company including where the context so admits the assignees and appointees of the company under clause 13 hereof of the other part. and WHEREAS a The Company is a wholly owned subsidiary of Cliffs International Inc. a Delaware Corporation registered in Western Australia as a foreign corporation under the provisions of the Companies Act 1961. Cliffs International Inc. is a wholly owned subsidiary of The ClevelandCliffs Iron Company an Ohio Corporation. The Company is the holder of the Mining Areas defined in Clause 1 hereof. b The parties hereto believe that the mining areas contain large deposits of iron ore with an average iron appreciably below 60 and with physical characteristics which render such iron ore unsaleable as direct shipping ore as defined in clause 1 hereof under the quality requirements of the world steel industry. c Attempts were made to improve and upgrade the said iron ore but test work indicated that either such iron ore was not amenable to then known concentrating techniques or the degree of beneficiation was very slight and consequently uneconomic. d Exhaustive research in Western Australia and in the United States of America culminating in full scale pilot plant tests satisfied the Company that iron ore pellets equal to or superior to pellets currently produced in the page 8 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule United States of America could be produced from this iron ore by the Pelletisation process. e The pelletisation process is an advanced treatment process of iron ore and requires considerable technical organisation and skill. As contrasted to mining of direct

shipping ore as defined in clause 1 the process requires extensive additional facilities and utilises a process with vastly increased technical and consumable supply and electric power requirements. The necessary pelletisation plant or plants crushing and fine grinding facilities electric power generating plant petroleum handling and storage facilities represent a very large investment which amounts to approximately one half of the total investment including port railroad mining and other facilities needed to commercially develop the iron ore deposits included in the mining areas to the extent hereinafter mentioned. Power requirements are expected to amount to 75000000 kilo watt f hours per annum for the initial plant and to increase to 225000000 kilo watt hours when the proposed pellet plant capacity is expanded. Fuel oil used as the fuel media for the thermal application portion of the process will amount to approximately 10000000 gallons per annum initially and will increase to 30000000 gallons per annum when the proposed production capacity is installed. Other consumable industrial supplies and materials such as iron steel oil and lubricants will also be used in substantial quantities. g Raymond International Inc. consulting and construction Engineers has made a feasibility study of possible port sites and railroad facilities plant sites townsites and necessary auxiliary facilities. h The Company has informed the State that it is prepared to carry out the works referred to in clause 9 hereof provided that i ii iii contracts satisfactory to the Company are concluded for the sale of not less than 1800000 tons of iron ore pellets during the first two years from the export date as hereinafter defined in clause 1 and not less than 3000000 tons in subsequent years; arrangements satisfactory to the Company are made for financing by any means the works referred to in clause 9 hereof; and a grant is made to the Company of a licence or licences under Commonwealth law for the export of iron ore pellets of not less than 3000000 tons per annum. The State acknowledges that prior to the 22nd day of October 1964 an i agreement was entered into between the Company and the State whereby subject to the provisions of this agreement relating to the submission of As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 9 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement detailed proposals and matters referred to in clause 52

hereof the State had agreed to make the grants of lands referred to in clause 81b of this Agreement and that prior to such date the State had consented to the Company making the improvements set out in clause 9 hereof on the land comprised in any lease granted by the State to the Company pursuant to this Agreement. NOW THIS AGREEMENT WITNESSETH Interpretation 4 1. In this Agreement subject to the context associated company means a any company having a paidup capital of not less than one million pounds 1000000 notified in writing by the Company to the Minister which is incorporated in the United Kingdom the United States of America or the Commonwealth of Australia and which i ii iii iv is a subsidiary of the parent Company within the meaning of the term subsidiary in section 6 of the Companies Act 1961; holds directly or indirectly not less than twenty per cent 20 of the issued ordinary share capital of the Company; is promoted by the parent company or by any company that holds directly or indirectly not less than twenty per cent 20 of the issued ordinary share capital of the parent company for all or any of the purposes of this Agreement and in which the parent company or such other company holds not less than twenty per cent 20 of the issued ordinary share capital; or is related within the meaning of that term in the aforesaid section to the parent company or to any company in which the parent company holds not less than twenty per cent 20 of the issued ordinary share capital and b any company approved in writing by the Minister for the purposes of this Agreement which is associated directly or page 10 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule indirectly with the parent company in its business or operations hereunder; commencement date means the date referred to as the commencement date in clause 73 hereof; Commonwealth means the Commonwealth of Australia and includes the Government for the time being thereof; Companys wharf means the wharf to be constructed by the Company pursuant to this Agreement for the shipment of iron ore from the mineral lease and includes the commercial wharf to be constructed by the Company for the reception of inward cargoes or except for the purposes of definition of harbour other the temporary wharf for the time being approved by the Minister as the Companys wharf for the purposes hereof

during the period to which such approval relates; deposits townsite means the townsite to be established on or near the mining areas pursuant to this Agreement; direct shipping ore means iron ore which has an average pure iron of not less than sixty per cent 60 which will not pass through a one half inch mesh screen and which is sold without concentration or other beneficiation other than crushing and screening; export date means the earlier of the following dates namely a b the date or extended date if any referred to in clause 91 of this Agreement; the date when the Company first exports iron ore or iron ore pellets hereunder other than iron ore shipped solely for testing purposes; financial year means a year commencing on and including the 1st day of July; fine ore means iron ore which has an average pure iron of not less than sixty per cent 60 which will pass through a one half inch mesh screen and which is sold without concentration or other benefaction other than crushing and screening; fines means iron ore not being direct shipping ore or fine ore which will pass through a one half inch mesh screen; As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 11 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement f.o.b. revenue means the price for iron ore from the mineral lease the subject of any shipment or sale and payable by the purchaser thereof to the Company or an associated company less all export duties and export taxes payable to the Commonwealth on the export of the iron ore and all costs and charges properly incurred and payable by the Company from the time the ore shall be placed on ship at the Companys wharf to the time the same is delivered and accepted by the purchaser including 1 ocean freight; 2 marine insurance; 3 4 5 6 7 port and handling charges at the port of discharge; all costs properly incurred in delivering the ore from port of discharge to the smelter and evidenced by relevant invoices; all weighing sampling assaying inspection and representation costs; all shipping agency charges after loading on and departure of ship from the Companys wharf; and all import taxes by the country of the port of discharge; harbour means the port or harbour at or near Cape Preston or such other port or place mutually agreed on and serving the Companys wharf; iron ore pellet contracts means the contract or contracts referred to in clause 51 hereof; iron ore pellets means iron ore in pellet or other form produced by

Pelletisation or more advanced reduction or other more advance treatment process from iron bearing material mined from the mining areas. Land Act means the Land Act 1933; mineral lease means the mineral lease referred to in clause 81a hereof and includes any renewal thereof; Mining Act means the Mining Act 1904; mining areas means the areas delineated and coloured red on the Plan marked A initialled by or on behalf of the parties hereto for the purposes of identification; Minister means the Minister in the Government of the said State for the time being responsible under whatsoever title for the page 12 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule administration of the Ratifying Act and pending the passing of that Act means the Minister for the time being designated in a notice from the State to the Company and includes the successors in office of the Minister; month means calendar month; notice means notice in writing; parent company means and includes both Cliffs International Inc. and The ClevelandCliffs Iron Company; person or persons includes bodies corporate; plant site means the area near the harbour at Cape Preston on which the pellet plant or plants crushing and grinding facilities stockpiling yards electric power generating plant petroleum storage and other ancillary facilities there to or such other site as shall be approved by the State shall be situated; port townsite means the townsite to be established pursuant to this Agreement near the harbour; Ratifying Act means the Act to ratify this Agreement and referred to in clause 3 hereof; said State means the State of Western Australia; special lease means a special lease or license to be granted in terms of this Agreement under the Ratifying Act the Land Act or the Jetties Act 1926 and includes any renewal thereof; this Agreement hereof and hereunder include this Agreement as from time to time added to varied or amended; ton means a ton of two thousand two hundred and forty 2240 lbs. net dry weight; townsite in relation to the townsite to be established near the harbour means a townsite whether or not constituted and defined under section 10 of the Land Act primarily to facilitate the Companys operations in and near the harbour and for employees of the Company and in relation to the mining areas means such a townsite or townsites or any other townsite or townsites which is or are established by the Company

for the purposes of its operations and employees on or near the mining areas in lieu of a townsite constituted and defined under section 10 of the Land Act; wharf includes any jetty structure; As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 13 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement year 1 means the year next following the export date and year followed immediately by any other numeral has a corresponding meaning; reference in this Agreement to an Act shall include the amendments to such Act for the time being in force and also any Act passed in substitution therefor or in lieu thereof and the regulations for the time being in force thereunder; power given under any clause of this Agreement other than clause 17 hereof to extend any period or date shall be without prejudice to the power of the Minister under the said clause 17; marginal notes shall not affect the interpretation or construction hereof 4; the phases in which it is contemplated that this Agreement will operate are as follows a Phase 1 the period from the execution hereof by the parties hereto until the commencement date; and b Phase 2 the period thereafter. Obligations of the State during Phase 1 4 2. The State shall a upon application by the Company at any time prior to the 31st day of March 1965 and surrender of the then existing rights of occupancy already granted in respect of any portions of the mining areas cause to be granted to the Company and to the Company alone rights of occupancy for the purposes of this Agreement including the sole right to search and prospect for iron ore over the whole of the mining areas under section 276 of the Mining Act at a rental at the rate of four pounds 4 per square mile per annum payable quarterly in advance for the period expiring on the 31st December 1965 and shall then and thereafter subject to the continuance of this Agreement cause to be granted to the Company as may be necessary successive renewals of such lastmentioned rights of occupancy each renewal for a period of twelve 12 months at the same rental and on the same terms the last of which renewals notwithstanding its currency shall expire i ii on the date of application for a mineral lease by the Company under clause 81a hereof; at the expiration of one month from the commencement date; page 14 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River

Agreement Act 1964 First Schedule iii iv on the determination of this Agreement pursuant to its terms; or on the day of the receipt by the State of a notice from the Company to the effect that the Company abandons and cancels this Agreement whichever shall first happen; b c introduce and sponsor a Bill in the Parliament of Western Australia to ratify this Agreement and endeavour to secure its passage prior to the 30th day of November 1964; to the extent reasonably necessary for the purposes of clause 5 hereof allow the Company to enter upon Crown lands including land the subject of a pastoral lease and survey possible sites for a plant site and harbour wharf railway townsite both in or near the harbour and on or near the mining areas and other areas required for the purposes of this Agreement; and d take the administrative steps set out in Clause 55b hereof.

Ratification and operation 4 3. 1 Clauses 8 9 10 other than paragraphs d and 1 of clause 10 11 15 both inclusive and 17 of this Agreement shall not operate unless and until the Bill to ratify this Agreement as referred to in clause 2b hereof is passed as an Act before the thirtieth day of November 1964 or such later date if any as the parties hereto may mutually agree upon. If the Bill is not so passed before that date or later date as the case may be this Agreement will then cease and determine and neither of the parties hereto will have any claim against the other of them with respect to any matter or thing arising out of done performed or omitted to be done or performed under this Agreement except as hereinafter provided in clause 10d hereof. 2 If the Bill to ratify this Agreement is passed as an Act before the date or later date if any referred to in subclause 1 of this clause the following provisions of this clause shall notwithstanding the provisions of any Act or law thereupon operate and take effect namely a the provisions of subclauses 1 2 3 and 4 of clause 8 the proviso to paragraph a of subclause 2 of clause 9 subclause 3 of clause 9 paragraphs a f g h i k and m of clause 10 and clauses 14 16 17 and 20 shall take effect as though the same had been brought into force and had been enacted by the Ratifying Act; As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 15 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement b c d subject to paragraph a of this subclause the State and the Minister respectively shall have all the powers discretions and authorities necessary or requisite to enable

them to carry out and perform the powers discretions authorities and obligations conferred or imposed upon them respectively hereunder; no future Act of the said State will operate to increase the Companys liabilities or obligations hereunder with respect to rents or royalties; and the State may as for a public work under the Public Works Act 1902 resume any land or any estate or interest in land required for the purposes of this Agreement and may lease or otherwise dispose of the same to the Company. The company will actively and conscientiously endeavour to conclude Initial obligations of Company 4 4. the contracts and make the arrangements set out in Clause 51 hereof and will from time to time and on request keep the State informed on these matters. Company to give notice 4 5. give notice to the Minister that 1 At any time prior to the 31st December 1965 the Company may a The Company has entered into or intends to enter into contracts satisfactory to the Company for the sale by the Company of iron ore pellets. b The Company has made or is about make arrangements satisfactory to the Company for financing by any means the works referred to in clause 9 hereof and that the Company proposes to proceed with the works set out in clause 9 hereof. Company to submit proposals 4 2 The Company may at any time and shall as soon as possible after giving the notice referred to in Clause 51 hereof submit to the Minister a to the fullest extent reasonably practicable its detailed proposals including plans where practicable and specifications where reasonably required by the Minister with respect so far as relevant to the mining from the mining areas or so much thereof as shall be comprised within the mineral lease by the Company during the three 3 years next following the commencement of such mining with a view to the transport to the plant site of iron ore the page 16 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule pelletisation and shipment before or after pelletisation of the iron ore mined and its outline proposals with respect to such mining during the next following seven 7 years including the location area layout design number materials and time programme for the commencement and completion of construction or the provision as the case may be of each of the following matters namely i ii iii iv v vi vii the harbour and harbour development including dredging the

depositing of spoil the provision of navigational aids the Companys wharf the plans and specifications for which wharf shall be submitted to and be subject to the approval of the State the berth and swinging basin for the Companys use and harbour installations facilities and services all of which shall permit of adaptation so as to enable the use of the harbour and wharf by vessels having a draught of 42 feet; the railway between the mining areas and the Companys wharf and works ancillary to or connected with the railway and its proposed operation including fencing if any and crossing places; townsites on the mining areas and near the harbour and development services and facilities in relation thereto; housing; water supply; roads including details of roads in respect of which it is not intended that the provisions of clause 92b shall operate; and any other works services or facilities proposed or desired by the Company other than those set out in subparagraph b of this subclause; and b the location and respective production and storage capacities of the pelletisation plant and facilities.

3 a If within one 1 month of the 31st December 1965 the Company gives notice to the Minister that it has been unable to make the contracts and arrangements set out in clause 51 hereof the Minister will grant such extension of time as the Company requests up to the 31st December 1969. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 17 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement b If an extension is granted under paragraph a of this subclause and if within one 1 month of the 31st December 1969 the Company demonstrates to the reasonable satisfaction of the Minister that the Company has duly complied with its other obligations and has genuinely and actively but unsuccessfully endeavoured to make the contracts and arrangements set out in clause 51 hereof and the Company reasonably requires an additional period up to the 31st December 1972 for the purpose of making such contracts and arrangements and has reasonable prospects in that regard if granted an extension the Minister will grant such extension as is warranted in the circumstances up to the 31st December 1972. c If an extension is granted under paragraph b of this subclause then prior to the date such extension expires the Company shall give notice to the Minister whether or not it has concluded the contracts and arrangements set out in clause 51 hereof. If the notice is to the

effect that such matters have been concluded the Company will within twelve 12 months after such notice commence and within four 4 years after commencement complete the works set out in clause 9 hereof and will be ready to commence production therefrom. If the notice is to the effect that such matters have not been concluded then the Minister may at any time after the expiration of the extension granted under paragraph b of this subclause give notice to the Company requiring it within twelve 12 months thereafter to conclude the iron ore pellet contracts and arrangements for finance referred to in clause 51 hereof and to give notice accordingly to the Minister. If the Company gives such notice the Company will within twelve 12 months of the giving of the notice commence and within four 4 years thereafter complete the construction referred to above. If the company fails to give such notice and no other agreement is made between the State and the Company in regard to the matter then at any time after the expiration of twelve 12 months from the giving of the notice by the State either party may by notice to the other terminate this agreement. 4 If the Company fails within the time or extended time as the case may be hereinbefore in this clause mentioned to give the notice referred to in subclause 1 of this clause or to submit the proposals referred to in subclause 2 of this clause or fails duly and punctually to carry out its proposals as agreed or determined hereunder and to remedy the failure within reasonable time after notice specifying the failure is given to the Company by the State or if the alleged failure is contested by the Company and promptly submitted to arbitration within a reasonable time fixed by the arbitration award where the question is deed against the Company the arbitrator finding that there was a bona fide dispute and that the Company had not been dilatory in pursuing the arbitration then subject to the provisions of clause 16 hereof page 18 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule relating to delays the State may by notice to the Company given at any time thereafter determine this Agreement whereupon the rights of the Company hereunder and under any lease licence easement or right granted hereunder or pursuant thereto shall cease and determine but without prejudice to any liability on the part of the Company for any antecedent breach of or liability under

any of the provisions hereof. Reservation of harbour site 4 5 a At any time prior to the 31st December 1965 the Company may give notice to the State that it reasonably requires the reservation until the 31st December 1966 of an area or areas of Crown Land and or land the subject of a pastoral lease at or near Cape Preston for possible development by the Company for the plant site the Companys wharf and harbour and road and rail access thereto from the mining areas. b Until the 31st December 1965 or if such notice is given until the 31st December 1966 the State unless the Company otherwise agrees shall take all practicable administrative steps to prevent any development at Cape Preston which would be likely to interfere with the development by the Company of the plant site wharf harbour and road and rail access thereto under the terms of this Agreement. c If the Company should desire to establish the Companys wharf at Cape Preston it will consult with a company to be nominated by the State hereinafter called the nominated company and will not without the consent of the nominated company submit proposals in regard thereto without providing and ensuring therein i ii iii that a plant site suitable for a pelletising plant and ancillary facilities capable of producing not less than four million 4000000 tons of iron ore pellets for shipment from the Companys wharf remains available to the nominated company; that suitable road and rail access from the nominated companys mining areas to its plant site and from the plant site to the Companys wharf remains available to the nominated company; that the Companys wharf and associated facilities will be so constructed as to cater for the berthing of ships requiring at least fortytwo feet 42 of water and so as to be adequate to handle the outward shipment of an aggregate of at least ten million 10000000 tons of iron ore and iron ore pellets per annum and to make suitable provision for inward cargo As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 19 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement and except with the consent of the Minister the Company in developing the Cape Preston area will ensure that effect is given to the factors in this paragraph mentioned. d If no agreement is reached between the Company and the nominated company and if at any time after the 31st December 1966 the Company has not submitted its own full and acceptable proposals

to the State including the requirements of paragraph c of this subclause and the nominated company submits proposals to the Minister for the construction of a wharf and associated facilities at Cape Preston then subject to the remaining paragraphs of this subclause and provided this Agreement is still in force the Minister shall require that such proposals provide and ensure i ii iii that there remains available to the Company a plant site suitable for a pelletising plant and ancillary facilities capable of producing not less than four million 4000000 tons of iron ore pellets for shipment from the wharf to be constructed by the nominated company; that there remains available to the Company suitable road and rail access from the Companys mining areas to such plant site and from the plant site to the wharf of the nominated company; that the wharf and associated facilities of the nominated company will be so constructed as to cater for the berthing of ships requiring at least fortytwo feet 42 of water and subject to paragraph f of this subclause will be adequate to handle the outward shipment of an aggregate of at least ten million 10000000 tons of iron ore and iron ore pellets per annum and to make suitable provision for inward cargo. e The proposals of the nominated company insofar as they relate to the matters referred to in paragraph d of this subclause shall before approval by the Minister be submitted by him to the Company to enable it to make such representations thereon as it sees fit either to the Minister or to the nominated company as to requiring the nominated company to i extend or enlarge the wharf so as to be adequate to handle a greater capacity than ten million 10000000 tons per annum; ii make provision for the facilities associated with the wharf in excess of the facilities stated by the nominated company in its proposals as desired for its purposes and for the wharf to be so constructed and with such facilities as may be required to handle additional inward cargoes for the Company; page 20 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule but subject to the Company making arrangements which are mutually satisfactory with the nominated company for payment of the cost of such additional work. In the event of the Company and the nominated company being unable to agree on the basis for such payment the Minister shall determine the method of payment and the

necessary security. In the event of a dispute as to the cost of such additional work the matter shall be referred to arbitration. The Minister may require accordingly. f If either company demonstrates to the State that at Cape Preston it would not be reasonably practicable for the proposals to include the matters or all matters referred to in paragraphs c d and e as the case may be of this subclause the Minister shall either waive compliance with the whole or part of the matters or shall submit alternative proposals for an equitable sharing of the harbours capacity by both companies. The nominated company may accept the alternative proposals failing which the nominated company shall refer the matter to arbitration in which event the Company may be joined as a party to the arbitration. g If prior to the 31st December 1966 any company desires to submit proposals to the Minister for the establishment of a wharf at Onslow the Minister shall require it to first consult with the Company and that subject to paragraph j of this subclause such company does not without the consent of the Company submit proposals in regard thereto unless such proposals provide and ensure for the matters set out in paragraph h of this subclause. h If the Company should after the 31st December 1966 desire to establish the Companys wharf at Onslow it will consult with the nominated company and subject to paragraph j of this subclause will not without the consent of the nominated company submit proposals in regard thereto if the nominated company has previously submitted its own full and acceptable proposals to the State pursuant to an agreement with the State relating to the mining within the said State and shipment from Onslow of iron ore. If the nominated company has not so submitted proposals and no agreement is reached between the Company and the nominated company within three 3 months from the commencement of consultations the Company may submit proposals under clause 52 of this Agreement for the construction of a wharf and harbour at Onslow but subject to the remaining subclauses the Minister may require that any such proposals shall provide and ensure i that a plant site suitable for a pelletising plant and ancillary facilities capable of producing not less than four million 4000000 tons of iron ore pellets per annum for shipment from the wharf to be constructed by the Company As at

Agreement Act 1964 First Schedule Iron Ore Robe River Agreement remains available to the nominated company provided that this does not unduly prejudice the selection of a site by the Company; ii iii that suitable road and rail access from the nominated companys mining areas to such plant site and from the plant site to the Companys wharf remains available to the nominated company provided that this does not unduly prejudice the selection of road and rail access by the Company; that the Companys wharf and associated facilities will be so constructed that they will cater for the berthing of ships of forty thousand 40000 tons and also make provision for inward cargo required by the nominated company. i The Minister shall refer the Companys proposals under paragraph h before approval thereof to the nominated company to enable it to make such representations thereon as it sees fit to the Minister as to requiring the Company to i extend or enlarge the wharf; ii make provision for facilities associated with the Companys wharf in excess of the facilities stated by the Company in its proposals as desired by it for its purposes and for the wharf to be so constructed and with such facilities as may be required to handle additional inward cargoes for the nominated company; but subject to the Company making arrangements which are mutually satisfactory with the nominated company for payment for the cost of such additional work. In the event of the Company and the nominated company being unable to agree on the basis for such payment the Minister shall determine the method of payment and the necessary security. In the event of a dispute as to the cost of such additional work the matter shall be referred to arbitration. The Minister may require accordingly. j If either company demonstrates to the State that at Onslow it would not be reasonably practicable for the proposals to include all or any of the matters referred to in paragraphs h and i of this subclause the Minister shall either waive compliance with the whole or part of the matters or shall submit alternative proposals for an equitable sharing of the harbours capacity by both companies. The Company may accept the alternative proposals failing which the Company shall refer the matter to arbitration in which event the nominated company may be joined as a party to the arbitration. page 22 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River

Agreement Act 1964 First Schedule Consideration of other proposals under clause 52 4 6. 1 Within two 2 months after receipt of the detailed proposals of the Company in regard to any of the matters mentioned in clause 52 hereof the Minister shall give to the Company notice either of his approval of the proposals or of alterations desired thereto and in the latter case shall afford to the Company opportunity to consult with and to submit new proposals to the Minister. The Minister may make such reasonable alterations to or impose such reasonable conditions on the proposals or new proposals as the case may be as he shall think fit having regard to the circumstances including the overall development and use by others as well as the Company of the port and other facilities but the Minister shall in any notice to the Company disclose his reasons for any such alteration or condition. Within two 2 months of the receipt of the notice the Company may elect by notice to the State to refer to arbitration and within two 2 months thereafter shall refer to arbitration as hereinafter provided any dispute as to the reasonableness of any such alteration or condition. If by the award on arbitration the dispute is deed against the Company then subject to clause 53 hereof unless the Company within three 3 months after delivery of the award satisfies and obtains the approval of the Minister as to the matter or matters the subject of the arbitration this Agreement shall on the expiration of that period of three 3 months cease and determine save as provided in clause 10d hereof but if the question is deed in favour of the Company the decision will take effect as a notice by the Minister that he is so satisfied with and approves the matter or matters the subject of the arbitration. Extension of time 4 7. submission to arbitration hereunder is hereby empowered upon application by either party hereto to grant any interim extension of time or date referred to herein which having regard to the circumstances may reasonably be required in order to preserve the rights of either or both parties hereunder and an award in favour of the Company may in the name of the Minister grant any further extension of time for that purpose. 1 The arbitrator arbitrators or umpire as the case may be of any 2 Notwithstanding that under clause 6 hereof any detailed proposals of the Company are approved by the State or the Minister or determined by arbitration award unless each and every such proposal and matter is so approved or determined by the 31st day of December

1965 or by such extended date if any as the Company shall be entitled to or shall be granted pursuant to the provisions hereof then at any time after the said 31st day of December 1965 or if any extension or extensions should be granted under clause 53 hereof or any As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 23 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement other provision of this Agreement then on or after the expiration of the last of such extensions the Minister may give to the Company twelve 12 months notice of intention to determine this Agreement and unless before the expiration of the said twelve 12 months period all the detailed proposals and matters are so approved or determined this Agreement shall cease and determine subject however to the provisions of clause 10d hereof.

Commencement date 4 3 Subject to the approval of the Minister or determination by arbitration as herein provided of each hand every of the detailed proposals and matters referred to in clause 52 hereof the date upon which the last of those proposals of the Company shall have been so approved or determined or the date upon which the Company gives notice to the Minister that it proposes to proceed with the works set out in clause 9 hereof whichever shall be the later shall be the commencement date for the purposes of this Agreement. 4 If under any arbitration under clause 6 hereof the dispute is deed against the Company and subsequently but before the commencement date this Agreement ceases and determines the State will not for a period of three 3 years after such determination enter into a contract with any other party for the mining transport and shipment of iron ore from the mining areas on terms more favourable on the whole to the other party than those which would have applied to the Company hereunder if the question had been determined in favour of the Company. Terms not more favourable 4 5 In deing whether for the purposes of clause 74 or clause 12 hereof the terms granted by the State to some company or party are not more favourable on the whole than those proposed by or available to the Company regard shall be had inter alia to all the obligations which would have continued to devolve on the Company had it proceeded with the works set out in clause 9 hereof including its obligations to mine transport by rail and ship iron ore pellets and restrictions relating thereto to pay rent additional rental and royalty and

also to the need for the other company or party to pay on a fair and reasonable basis for or for the use of property accruing to the State under paragraph e of clause 10 hereof and made available by the State to that company or party but also to any additional or equivalent obligations to the State assumed by that company or party. page 24 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule Phase 2. Obligations of State Mineral Lease 4 8. state shall a 1 As soon as conveniently may be after the commencement date the after application is made by the Company for a mineral lease of any part or parts not exceeding in total area three hundred 300 square miles and in the shape of a parallelogram or parallelograms of the mining areas in conformity with the Companys detailed proposals under clause 52 hereof as finally approved or determined cause any necessary survey to be made of the land so applied for the cost of which survey to the State will be recouped or repaid to the State by the Company on demand after completion of the survey and shall cause to be granted to the Company a mineral lease thereof for iron ore in the form of the Schedule hereto for a term which subject to the payment of rents and royalties hereinafter mentioned and to the performance and observance by the Company of its obligations under the mineral lease and otherwise under this Agreement shall be for a period of twentyone 21 years commencing from the commencement date with rights to successive renewals of twentyone 21 years upon the same terms and conditions but subject to earlier determination upon the cessation or determination of this Agreement PROVIDED HOWEVER that the Company may from time to time without abatement of any rent then paid or payable in advance surrender to the State all or any portion or portions of reasonable size and shape of the mineral lease; Under Companys proposals 4 b in accordance with the Companys proposals as finally approved or determined under clause 6 hereof and as required the State to accept obligations Lands 4 i grant to the Company in fee simple or for such terms or periods and on such terms and conditions including renewal rights as subject to the proposals as finally approved or determined as aforesaid shall be reasonable having regard to the requirements of the Company hereunder and to the overall development of the harbour and

access to and use by others of lands the subject of any grant to the Company and of services and facilities provided by the Company for nominal consideration townsite lots; As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 25 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement at peppercorn rental special leases of Crown lands within the harbour area the townsites and the railway; and at rentals as prescribed by law or are otherwise reasonable leases rights mining tenements easements reserves and licenses in on or under Crown lands under the Mining Act the Jetties Act 1926 or under the provisions of the Land Act modified as in subclause 2 of this clause provided as the case may require as the Company reasonably requires for its works and operations hereunder including the construction or provision of the railway wharf roads airstrip water supplies and stone and soil for construction purposes; and Services and facilities 4 ii provide any services or facilities subject to the Companys bearing and paying the capital cost involved and reasonable charges for maintenance and operation except operation charges in respect of education hospital and police services and except where and to the extent that the State otherwise agrees subject to such terms and conditions as may be finally approved or determined as aforesaid PROVIDED THAT from and after the thirtieth anniversary of the export date the Company will in addition to the rentals already referred to in this paragraph pay to the State during the currency of this Agreement after such anniversary as aforesaid a rental which subject to its being payable by the Company to the State may from time to time at the option of the Company be payable in respect of such one or more of the special leases or other leases granted to the Company under this paragraph and remaining current as the Company may from time to time designate in a notice to the Minister equal to two shillings and sixpence 2s. 6d. per ton on all iron ore and iron ore concentrates and iron ore pellets in respect of which royalty is payable under clause 92j hereof in any financial year such additional rental to be paid within three 3 months after shipment sale or use or in the case of iron ore concentrates production as the case may be of the iron ore or iron ore concentrates or iron ore pellets; and page 26 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River

Agreement Act 1964 First Schedule Other rights 4 c on application by the Company cause to be granted to it such machinery and tailings leases including leases for the dumping of overburden and such other leases licenses reserves and tenements under the Mining Act or under the provisions of the Land Act modified as in subclause 2 of this clause provided as the Company may reasonably require and request for its purposes under this Agreement on or near the mineral lease. 2 For the purposes of subparagraph i of paragraph b and paragraph c of subclause 1 of this clause the Land Act shall be deemed to be modified by a the substitution for subsection 2 of section 45A of the following subsection 2 Upon the Governor signifying approval pursuant to subsection 1 of this section in respect of any such land the same may subject to this section be sold or leased; b c d e f the deletion of the proviso to section 116; the deletion of section 135; the deletion of section 143; the inclusion of a power to offer for sale or leasing land within or in the vicinity of any townsite notwithstanding that the townsite has not been constituted a townsite under section 10; and the inclusion of a power to offer for sale or grant leases or licenses for terms or periods and on such terms and conditions including renewal rights and in forms consistent with the provisions of this Agreement in lieu of for the terms or periods and upon the terms and conditions and in the forms referred to in the Act and upon application by the Company in forms consistent as aforesaid in lieu of in the forms referred to in the Act. 3 The provisions of subclause 2 of this clause shall not operate so as to prejudice the rights of the State to determine any lease license or other right or title in accordance with the other provisions of this Agreement. 4 The State further covenants with the Company that the State Noninterference with Companys rights 4 a shall not during the currency of this Agreement register any claim or grant any lease or other mining tenement under the Mining Act or otherwise by which any person other than the Company or an As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 27 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement associated company will obtain under the laws relating to mining or otherwise any rights to mine or take the natural substances other than petroleum as defined in the Petroleum Act 1936 within the mineral lease unless the Minister reasonably

determines that it is not likely to unduly prejudice or to interfere with the operations of the Company hereunder assuming the taking by the Company of all reasonable steps to avoid the interference;

No resumption 4 b subject to the performance by the Company of its obligations under this Agreement shall not during the currency hereof without the consent of the Company resume nor suffer nor permit to be resumed by any State instrumentality or by any local or other authority of the said State any of the works installations plant equipment or other property for the time being belonging to the Company and the subject of or used for the purposes of this Agreement nor any of the lands the subject of any lease or license granted to the Company in terms of this Agreement AND without such consent which shall not be unreasonably withheld the State will not create or grant or permit or suffer to be created or granted by any instrumentality or authority of the State as aforesaid any road rightofway or easement of any nature or kind whatsoever over or in respect of any such lands which may unduly prejudice or interfere with the Companys operations hereunder;

Labour requirements 4 c shall if so requested by the Company and so far as its powers and administrative arrangements permit use reasonable endeavours to assist the Company to obtain adequate and suitable labour for the construction and the carrying out of the works and operations referred to in this Agreement including suitable immigrants for that purpose; No discriminatory rates 4 d except as provided in this Agreement shall not impose nor permit nor authorise any of its agencies or instrumentalities or any local or other authority of the State to impose discriminatory taxes rates or charges of any nature whatsoever on or in respect of the titles property or other assets products materials or services used or produced by or through the operations of the Company in the conduct of the Companys business hereunder nor will the State take or permit to be taken by any such State authority any other

from time to time grant or assist in obtaining the grant to the Company of prospecting rights and mining leases with respect to limestone dolomite and other minerals and substances reasonably required by the Company for its purposes under this Agreement; and Consents to improvements on leases 4 f shall as and when required by the Company but without prejudice to the foregoing provisions of this Agreement relating to the detailed proposals and matters referred to in clause 52 hereof consent in writing where and to the extent that the Minister considers to be reasonably justified to the Companys making improvements other than those required in clause 52 hereof for the purposes of this Agreement on the land comprised in any lease granted by the State to the Company pursuant to this Agreement PROVIDED THAT the Company shall also obtain any other consents legally required in relation to such improvements. 5 The Company shall not have any tenant rights in improvements made by the Company on the land comprised in any lease granted by the State to the Company pursuant to this Agreement in any case where pursuant to clause 10e hereof such improvements will remain or become the absolute property of the State. Phase 2. Obligations of the Company to construct 4 9. 1 The Company shall within four 4 years next following the commencement date or within such extended at period not exceeding a further two years as the Company may satisfy the Minister that the Company reasonably requires and the Minister approves and at a total cost of not less than thirtyfive million pounds 35000000 construct install provide and do all things necessary to enable it to mine from the mineral lease to transport by rail to the plant site pelletise and transport to the Companys wharf and to commence shipment therefrom in commercial quantities at an annual rate of not less than one million 1000000 tons of iron ore pellets and will within a further period of five 5 years increase the capacity of such plant to a minimum of 3000000 tons of iron ore pellets per annum and without lessening the As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 29 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement generality of this provision the Company shall within the first mentioned period or extended period as the case may be On mining areas and plant site 4 a construct install and provide upon the mineral lease or plant site or in the vicinity thereof mining

plant and equipment crushing screening stockpiling and car loading plant and facilities power house workshop and other things of a design and capacity adequate to enable the Company to meet and discharge its obligations hereunder and under the iron ore pellet contracts and to mine handle load and deal with not less than three thousand 3000 tons of iron ore per diem such capacity to be built up progressively to not less than ten thousand 10000 tons of iron ore per diem within five 5 years next following the export date; To commence exports 4 b actually commence to mine transport by rail and ship from the Companys wharf iron ore pellets produced from iron ore from the mineral lease so that the average annual rate during the first two years shall not be less than one million 1000000 tons; To construct railway 4 c subject to the State having assured to the Company all necessary rights in or over Crown lands available for the purpose construct in a proper and workmanlike manner and in accordance with recognised standards of railways of a similar nature operating under similar conditions and along a route approved or determined under clause 6 hereof but subject to the provisions of the Public Works Act 1902 to the extent that they are applicable a four feet eight and onehalf inches 4 8 gauge railway with all necessary signalling switch and other gear and all proper or usual works from the mining areas to the plant site and will provide for crossing places and the running of such railway with sufficient and adequate locomotives freight cars and other railway stock and equipment to haul at least one million 1000000 tons of iron ore per annum to the Companys wharf or as required for the purposes of this Agreement; To make roads 4 d subject to the State having assured to the Company all necessary rights in or over Crown lands or reserves available for the purpose construct such new roads as the Company reasonably requires for page 30 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule its purposes hereunder of such widths with such materials gates crossings and passovers for cattle and for sheep and along such routes as the parties hereto shall mutually agree after discussion with the respective shire councils through whose districts any such roads may pass and subject to prior agreement with the appropriate controlling authority being a shire council or the Commissioner of

Main Roads as to terms and conditions the Company may at its own expense and risk except as otherwise so agreed upgrade or realign any existing road; To construct wharf 4 e construct the Companys wharf in accordance with plans and specifications for the construction thereof previously approved or determined under clause 6 hereof on the site previously approved or determined for the purpose; and To carry out proposals 4 f in accordance with the Companys proposals as finally approved or determined under clause 6 hereof and as require the Company to accept obligations i ii dredge the berth at the Companys wharf and the channel and approaches thereto and any necessary swinging basin; lay out and develop the townsites and provide adequate and suitable housing recreational and other facilities and services; iii construct and provide roads housing school water and power supplies and other amenities and services; and iv construct and provide other works if any including an airstrip. 2 Throughout the continuance of this Agreement the Company shall Operation of railway 4 a operate its railway in a safe and proper manner and where and to the extent that it can do so without unduly prejudicing or interfering with its operations hereunder allow crossing places for roads stock and other railways and transport the passengers and carry the freight of the State and of third parties on the railway subject to and in accordance with bylaws which shall include As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 31 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement provision for reasonable charges from time to time to be made altered and repealed as provided in subclause 3 of this clause and subject thereto or if no such bylaws are made or in force then upon reasonable terms and at reasonable charges having regard to the cost of the railway to the Company PROVIDED THAT in relation to its use of the said railway the Company shall not be deemed to be a common carrier at common law or otherwise; Use of roads by others 4 b except to the extent that the Companys proposals as finally approved or determined under clause 6 hereof otherwise provide allow the public to use free of charge any roads constructed or upgraded under this clause PROVIDED THAT such use shall not unduly prejudice or interfere with the Companys operations hereunder; Compliance with laws 4 c in the construction operation maintenance and use

of any work installation plant machinery equipment service or facility provided or controlled by the Company comply with and observe the provisions hereof and subject thereto the laws for the time being in force in the said State; Maintenance 4 d at all times keep and maintain in good repair and working order and condition and where necessary replace all such works installations plant machinery and equipment and the railway wharf roads other than the public roads referred to in clause 10b hereof dredging and water and power supplies for the time being the subject of this Agreement; Shipment of and price for ore 4 e ship from the Companys wharf all iron ore mined from the mineral lease and sold and use its best endeavours to obtain therefor the best price possible having regard to market conditions from time to time prevailing PROVIDED THAT this paragraph shall not apply to iron ore used for the production of iron ore pellets or for the manufacture of iron or steel in any part of the said State lying north of the twentysixth parallel of latitude; page 32 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule Use of wharf and facilities 4 f subject to and in accordance with bylaws which shall include provision for reasonable charges from time to time to be made and altered as provided in subclause 3 of this clause and subject thereto or if no such bylaws are made or in force then upon reasonable terms and at reasonable charges having regard to the cost thereof to the Company allow the State and third parties to use the Companys wharf and harbour installations wharf machinery and equipment and wharf and harbour services and facilities PROVIDED THAT such use shall not unduly prejudice or interfere with the Companys operations hereunder and that the entire control and all personnel for or in respect of such use shall be provided by or with the approval of the Company; Access through mining areas 4 g allow the State and third parties to have access with or without stock vehicles and rolling stock over the mineral lease by separate route road or railway PROVIDED THAT such access over shall not unduly prejudice or interfere with the Companys operations hereunder; Protection for inhabitants 4 h subject to and in accordance with bylaws which shall include provision for reasonable charges from time to time to be made and altered as provided in subclause 3 of this clause and subject thereto or

if no such bylaws are made or in force then upon reasonable terms and at reasonable charges having regard to the cost thereof to the Company allow the inhabitants for the time being of the port townsite being employees licensees or agents of the Company or persons engaged in providing a legitimate and normal service to or for the Company or their employees licensees or agents to make use of the water power recreational health and other services or facilities provided or controlled by the Company; Use of local labour and materials 4 i so far as reasonably and economically practicable use labour materials plant equipment and supplies available within the said State where it is not prejudicial to the interests of the Company so to do; As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 33 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement Royalties 4 j pay to the State royalty on all iron ore or on iron ore pellets produced from iron ore from the mineral lease shipped or sold other than ore shipped solely for testing purposes or in the circumstances mentioned in subparagraph iv of this paragraph on iron ore concentrates produced from iron ore from the mineral lease or on other iron ore from the mineral lease used as mentioned in subparagraph iv of this paragraph as follows i ii iii iv v on direct shipping ore not being locally used ore at the rate of seven and one half percentum 7 of the f.o.b. revenue computed at the rate of exchange prevailing on date of receipt by the Company of the purchase price in respect of ore shipped or sold hereunder PROVIDED NEVERTHELESS that such royalty shall not be less than six shillings 6d per ton subject to subparagraph viii of this paragraph in respect of ore the subject of any shipment or sale; on fine ore not being locally used ore at the rate of three and three quarter percentum 3 of the f.o.b. revenue computed as aforesaid PROVIDED NEVERTHELESS that such royalty shall not be less than three shillings 3d per ton subject to subparagraph ix of this paragraph in respect of ore the subject of any shipment or sale; on fines not being locally used ore at the rate of one shilling and sixpence 16d per ton; on iron ore concentrates produced from locally used ore and on other locally used ore at the rate of one shilling and sixpence 16d per ton; on iron ore pellets produced in Western Australia north of the 26th parallel of latitude from iron ore with a combined average iron of less than 60 at the rate of a one

shilling 1d per ton for all iron ore pellets shipped or sold during year one to year fifteen both inclusive; page 34 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule b c one shilling and threepence 13d per ton for all iron ore pellets shipped or sold during year sixteen to year twentyfive both inclusive; one shilling and sixpence 16d per ton for all iron ore pellets shipped or sold after year twentyfive; on iron ore pellets produced in Western Australia north of the 26th parallel of latitude from iron ore with a combined average iron ore of 60 or over at the rate of one shilling and sixpence 16d per ton; on all other iron ore not being locally used ore at the rate of seven and one half per centum 7 of the f.o.b. revenue computed as aforesaid without any minimum royalty; for averaging purposes if the amount ascertained by multiplying the total tonnage of direct shipping ore shipped or sold and liable to royalty under subparagraph i of this paragraph in any financial year by six shillings 6d is less than the total royalty which would be payable in respect of that ore but for the operation of the proviso to that subparagraph then that proviso shall not apply in respect of direct shipping ore shipped or sold in that year and at the expiration of that year any necessary adjustments shall be made accordingly; for averaging purposes if the amount ascertained by multiplying the total tonnage of fine ore shipped or sold and liable to royalty under subparagraph ii of this paragraph in any financial year by three shillings 3d is less than the total royalty which would be payable in respect of that ore but for the operation of the proviso to that subparagraph then that proviso shall not apply in respect of fine ore shipped or sold in that year and at the expiration of that year any necessary adjustments shall be made accordingly; and the royalty at the rate of one shilling and sixpence 16d. per ton referred to in subparagraphs iii iv and vi of this paragraph shall be adjusted up or down as the case may be as at the first day of January 1969 and as at the beginning of every fifth year thereafter proportionately to vi vii viii ix x As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 35 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement xi the variation of the average of the prices payable for foundry pig iron f.o.b. Adelaide during the last full calendar year preceding the date at which the

adjustment is to be made as compared with the average of those prices during the calendar year 1963. the respective royalties referred to in subparagraph v of this paragraph shall be adjusted up or down as the case may be as at the first day of January 1970 and as at the beginning of every fifth year thereafter proportionately to the variation of the average of the prices payable for foundry pig iron f.o.b. Adelaide during the last full calendar year preceding the date at which the adjustment is to be made as compared with the average of those prices during the calendar year 1968. For the purposes of this paragraph locally used ore means iron ore other than iron ore from which iron ore pellets are produced which are subject to royalty under subparagraph v or vi of this paragraph used by the Company or an associated company both within the Commonwealth and within the limits referred to in paragraph o of this clause for the production of iron ore pellets or in an integrated iron and steel industry and includes iron ore used by any other person or company north of the twentysixth parallel of latitude in the said State for the production of iron ore pellets or in an integrated iron and steel industry; Payment of royalties 4 k within fourteen days after the quarter days the last days of March June September and December in each year commencing with the quarter day next following the first commercial shipment of iron ore or iron ore pellets from the Companys wharf furnish to the Minister a return showing the quantity of all iron ore or iron ore pellets or iron ore concentrates the subject of royalty hereunder and shipped sold used or produced as the case may be during the quarter immediately preceding the due date of the return and shall not later than two 2 months after such due date pay to the Minister the royalty payable in respect of iron ore pellets shipped or sold or iron ore concentrates produced or iron ore used and in respect of all iron ore shipped or sold pay to the Minister on account of the royalty payable hereunder a sum calculated on the basis of invoices or provisional invoices as the case may be page 36 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule rendered by the Company to the purchaser which invoices the Company shall render without delay simultaneously furnishing copies thereof to the Minister of such iron ore and shall from time to time in the next following appropriate return and

payment make by the return and by cash all such necessary adjustments and give to the Minister full details thereof when the f.o.b. revenue realised in respect of the shipments shall have been ascertained; Rent for mineral lease 4 l by way of rent for the mineral lease pay to the State annually in advance a sum equal to three shillings and sixpence 36d per acre of the area for the time being the subject of the mineral lease commencing on and accruing from the commencement date PROVIDED THAT after the Company commences production in commercial quantities within the said State of iron ore pellets if and during the period that the total area for the time being comprised within the mineral lease i ii iii is not more than one hundred 100 square miles the annual rent shall be two shillings 2d per acre; is over one hundred 100 square miles but not more than one hundred and fifty 150 square miles the annual rent shall be two shillings and sixpence 26d per acre; and is over one hundred and fifty 150 square miles but not more than two hundred 200 square miles the annual rent shall be three shillings 3d per acre; Other rentals 4 m pay to the State the rental referred to in the proviso to clause 81 b hereof if and when such rental shall become payable; Inspection 4 n permit the Minister or his nominee to inspect at all reasonable times the books of account and records of the Company relative to any shipment or sale of iron ore or iron ore pellets hereunder and to take copies or extracts therefrom and for the purpose of determining the f.o.b. Revenue payable in respect of any shipment of iron ore or iron ore pellets hereunder the Company will take reasonable steps to satisfy the State either by certificate of a competent independent party acceptable to the State or otherwise to the Ministers reasonable satisfaction as to all relevant weights and analyses and will give due regard to any objection or As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 37 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement representation made by the Minister or his nominee as to any particular weight or assay of iron ore which may affect the amount of royalty payable hereunder; and Export to places outside the Commonwealth 4 o ensure that without the prior written approval of the Minister all iron ore shipped pursuant to this Agreement will be offloaded at a place outside the Commonwealth and if it fails so to ensure the Company will subject to the provisions of

this paragraph be in default hereunder. Where any such shipment is offloaded within the Commonwealth without such prior written approval the Company shall forthwith on becoming aware thereof give to the State notice of the fact and pay to the State in respect of the iron ore the subject of the shipment such further and additional rental calculated at a rate not exceeding ten shillings 10d per ton of the iron ore as the Minister shall demand without prejudice however to any other rights and remedies of the State hereunder arising from the breach by the Company of the provisions hereof. If ore is shipped in a vessel not owned by the Company or an associated company or any other company in which the Company has a controlling interest and such ore is offloaded in the Commonwealth the Company will not be or be deemed to be in default hereunder if it takes appropriate action to prevent a recurrence of such an offloading PROVIDED FURTHER that the foregoing provisions of this paragraph shall not apply in any case including any unforeseeable diversion of the vessel for necessary repairs or arising from force majeure or otherwise where the Company could not reasonably have been expected to take steps to prevent that particular offloading PROVIDED ALSO that the provisions of this paragraph shall not apply to iron ore pellets or iron and steel or steel manufacture by the Company or an associated company within the said State.

Bylaws 4 3 The Governor in Executive Council may upon recommendation by the Company make alter and repeal bylaws for the purpose of enabling the Company to fulfil its obligations under paragraphs a b and f of subclause 2 of this clause and unless and until the port townsite is declared a townsite pursuant to section 10 of the Land Act under paragraph h of subclause 2 of this clause and under clause 10a hereof upon terms and subject to conditions including terms and conditions as to user charging and page 38 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule limitation of the liability of the Company as set out in such bylaws consistent with the provisions hereof. Should the State at any time consider that any bylaw made hereunder has as a result of altered circumstances become unreasonable or inapplicable then the Company shall recommend such alteration or repeal thereof as the State may reasonably require or in the event of there being

any dispute as to the reasonableness of such requirement then as may be decided by arbitration hereunder.

Mutual covenants 4 10. The parties hereto covenant and agree with each other as follows

Water and power supplies 4 a that subject to and in accordance with proposals approved or determined under clause 6 hereof the Company for its purposes hereunder and for domestic and other purposes in relation to a townsite may to the extent determined by the Minister but notwithstanding any Act bore for water construct catchment areas store by dams or otherwise take and charge for water from any Crown lands available for the purpose and generate transmit supply and charge for electrical energy and the Company shall have all such powers and authorities with respect to water and electrical energy as are determined by the Minister for the purposes hereof which may include the powers of a water board under the Water Board Act 1904 and of a supply authority under the Electricity Act 1945. The State acknowledges that large quantities of potable water up to four million 4000000 gallons a day will be required by the Company for its operations under this Agreement. The Company proposes to sink bores in the Fortescue area of the said State for the purposes of ascertaining and testing the availability of supplies. The Company will on request by the State from time to time give to the State particulars of the number depth and kind of bores sunk by it the precise situation of each and the quantities and quality of water obtained therefrom and will notify the State when supplies sufficient for the Companys purposes aforesaid have been proved. After such notice has been given the State will not itself and will not authorise any other to sink any new bore in any position which in the opinion of the State may injuriously affect the supply of water from the bore or bores sunk and required by the Company without making available to the Company adequate alternative supplies. The Company however shall not bore for or store water in any position which in the opinion of the State may

Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement injuriously affect any existing water supply of the lessee or occupier of any land;

Use of public roads 4 b that the Company may use any public roads which may from time to time exist in the area of its operations hereunder for the purpose of transportation of goods and

materials in connection with such operations PROVIDED NEVERTHELESS that the Company shall on demand pay to the State or the shire council concerned the cost of making good any damage to such roads occasioned by i ii such user by the Company prior to the export date; and user by the Company for the transportation of iron ore won from the mineral lease; Upgrading of existing roads 4 c that the State will at the request and cost of the Company except where and to the extent that the Commissioner of Main Roads agrees to bear the whole or part of the cost involved widen upgrade or realign any public road over which the State has control subject to the prior approval of the said Commissioner to the proposed work; Effect on determination of Agreement 4 d that on the cessation or determination of this Agreement i except as otherwise agreed by the Minister the rights of the Company to in or under this agreement and the rights of the Company or of any assignee of the Company or any mortgagee to in or under the mineral lease and any other lease license easement or right granted hereunder or pursuant hereto shall thereupon cease and determine but without prejudice to the liability of either of the parties hereto in respect of any antecedent breach or default under this Agreement or in respect of any indemnity given hereunder AND the Company will without further consideration but otherwise at the request and cost of the State transfer or surrender to the State or the Crown all land the subject of any Crown Grant issued under the Land Act pursuant to this Agreement; page 40 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule ii iii the Company shall forthwith pay to the State all moneys which may then have become payable or accrued due; and save as aforesaid and as provided in clause 74 hereof and in the next following paragraph neither of the parties hereto shall have any claim against another of them with respect to any matter or thing in or arising out of this Agreement; Effect of determination of lease 4 e that on the cessation or determination of any lease license or easement granted hereunder by the State to the Company or except as otherwise agreed by the Minister to an associated company or other assignee of the Company under clause 13 hereof of land for the plant site or the Companys wharf for any installation within the harbour for the Companys railway or for housing at the port or port

townsite the improvements and things erected on the relevant land and provided for in connection therewith other than plant and equipment shall remain or become the absolute property of the State without compensation and freed and discharged from all mortgages and encumbrances and the Company will do and execute such documents and things including surrenders as the State may reasonably require to give effect to this provision. In the event of the Company immediately prior to such expiration or determination or subsequent thereto deing to remove its locomotives rolling stock plant and equipment or any of them from any land it shall not do so without first notifying the State in writing of its decision and thereby granting to the State the right or option exercisable within three months thereafter to purchase at valuation in situ the said plant and equipment or any of them. Such valuation shall be mutually agreed or in default of agreement shall be made by such competent valuer as the parties may appoint or failing agreement as to such appointment then by two competent valuers one to be appointed by each party or by an umpire appointed by such valuers should they fail to agree; No charge for the handling of cargoes 4 f that subject to the Company at its own expense providing all works buildings dredging and things of a capital nature reasonably required for its operations hereunder at or in the vicinity of the As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 41 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement harbour no charge or levy shall be made by the State or by any State authority in relation to the loading of outward or the unloading of inward cargoes from the Companys wharf whether such cargoes shall be the property of the Company or of any other person or corporation but the State accepts no obligation to undertake such loading or unloading and may make the usual charges from time to time prevailing in respect of services rendered by the State or by any State agency or instrumentality or other local or other authority of the State and may charge vessels using the Companys wharf ordinary light conservancy and tonnage dues; Zoning 4 g that the mineral lease and the lands the subject of any Crown Grant lease license or easement granted to the Company under this Agreement shall be and remain zoned for use or otherwise protected during the currency of this Agreement so that the operations of the Company hereunder

may be undertaken and carried out thereon without any interference or interruption by the State by any State agency or instrumentality or by any local or other authority of the State on the ground that such operations are contrary to any zoning bylaw or regulation; Rentals and evictions 4 h that any State legislation for the time being in force in the said State relating to the fixation of rentals shall not apply to any houses belonging to the Company in any townsite and that in relation to each such house the Company shall have the right to include as a condition of its letting thereof that the Company may take proceedings for eviction of the occupant if the latter shall fail to abide by and observe the terms and conditions of occupancy or if the occupant shall cease to be employed by the Company; Labour conditions 4 i that during the currency of this Agreement and subject to compliance with its obligations hereunder the Company shall not be required to comply with the labour conditions imposed by or under the Mining Act in regard to the mineral lease; Subcontracting 4 j that without affecting the liabilities of the parties under this Agreement either party shall have the right from time to time to page 42 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule entrust to third parties the carrying out of any portions of the operations which it is authorised or obliged to carry out hereunder; Rating 4 k that notwithstanding the provisions of any Act or anything done or purported to be done under any Act the valuation of all lands whether of a freehold or leasehold nature the subject of this Agreement except as to any part upon which a permanent residence shall be erected or which is occupied in connection therewith shall for rating purposes be deemed to be on the unimproved value thereof and no such lands shall be subject to any discriminatory rate; Determination of Agreement 4 l that in any of the following events namely if the Company shall make default in the due performance or observance of any of the covenants or obligations to the State herein or in any lease sublease license or other title or document granted or assigned under this Agreement on its part to be performed or observed and shall fail to remedy that default within reasonable time after notice specifying the default is given to it by the State or if the alleged default is contested by the Company and promptly submitted to arbitration within a

reasonable time fixed by the arbitration award where the question is decided against the Company the arbitrator finding that there was a bona fide dispute and that the Company had not been dilatory in pursuing the arbitration or if the Company shall abandon or repudiate its operations under this Agreement or shall go into liquidation other than a voluntary liquidation for the purpose of reconstruction then and in any of such events the State may by notice to the Company determine this Agreement and the rights of the Company hereunder and under any lease license easement or right granted hereunder or pursuant hereto or if the Company shall surrender the entire mineral lease as permitted under clause 8.1a this Agreement and the rights of the Company hereunder and under any lease license easement or right granted hereunder or pursuant hereto shall thereupon determine; PROVIDED HOWEVER that if the Company shall fail to remedy any default after such notice or within the time fixed by the arbitration award as aforesaid the State instead of determining this Agreement as aforesaid because of such default may itself remedy such default or cause the same to be remedied for which purpose As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 43 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement the State by agents workmen or otherwise shall have full power to enter upon lands occupied by the Company and to make use of all plant machinery equipment and installations thereon and the costs and expenses incurred by the State in remedying or causing to be remedied such default shall be a debt payable by the Company to the State on demand; and m that i for the purposes of determining whether and the extent to which A B the Company is liable to any person or body corporate other than the State; or an action is maintainable by any such person or body corporate in respect of the death or injury of any person or damage to any property arising out of the use of any of the roads for the maintenance of which the Company is responsible hereunder and for no other purpose the Company shall be deemed to be a municipality and the said roads shall be deemed to be streets under the care control and management of the Company; and ii for the purposes of this paragraph the terms municipality street and care control and management shall have the meanings which they respectively have in the Local Government Act 1960. Alteration

of works 4 If at any time the State finds it necessary to request the Company to 11. alter the situation of any of the installations or other works other than those on the plant site and other than the Companys wharf erected constructed or provided hereunder and gives to the Company notice of the request the Company shall within a reasonable time after its receipt of the notice but at the expense in all things including increased operating costs and loss of profits if any of the State unless the alteration is rendered necessary by reason of a breach by the Company of any of its obligations hereunder alter the situation thereof accordingly. Indemnity 4 12. The Company will indemnify and keep indemnified the State and its servants agents and contractors in respect of all actions suits claims demands page 44 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule or costs of third parties arising out of or in connection with the construction maintenance or use by the Company or its servants agents contractors or assignees of the Companys wharf railway or other works or services the subject of this Agreement or the plant apparatus or equipment installed in connection therewith. Assignment 4 13. 1 time Subject to the provisions of this clause the Company may at any a b assign mortgage charge sublet or dispose of to an associated company as of right and to any other company or person with the consent in writing of the Minister the whole or any part of the rights of the Company hereunder including its rights to or as the holder of any lease license easement grant or other title and of the obligations of the Company hereunder; and appoint as of right an associated company or with the consent in writing of the Minister any other company or person to exercise all or any of the powers functions and authorities which are or may be conferred on the Company hereunder subject however to the assignee or as the case may be the appointee executing in favour of the State a deed of covenant in a form to be approved by the Minister to comply with observe and perform the provisions hereof on the part of the Company to be complied with observed or performed in regard to the matter or matters so assigned or as the case may be the subject of the appointment. 2 Notwithstanding anything contained in or anything done under or pursuant to subclause 1 of this clause the Company shall at all times during the currency of this

Agreement be and remain liable for the due and punctual performance and observance of all the covenants and agreements on its part contained herein and in any lease license easement grant or other title the subject of an assignment under the said subclause 1. Variation 4 14. writing add to cancel or vary all or any of the provisions of this Agreement or of any lease license easement or right granted hereunder or pursuant hereto for the purpose of implementing or facilitating the carrying out of such provisions or for the purpose of facilitating the carrying out of some separate part or parts of the Companys operations hereunder by an associated company as a separate 1 The parties hereto may from time to time by mutual agreement in As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 45 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement and distinct operation or for the establishment or development of any industry making use of the minerals within the mineral lease or such of the Companys works installations services or facilities the subject of this Agreement as shall have been provided by the Company in the course of work done hereunder. 2 Notwithstanding the provisions of subclause 1 of this clause the Minister may with the consent of the Company from time to time add to cancel or vary any right or obligation relating to the works set out in Clause 9 hereof to the extent that the addition cancellation or variation implements or facilitates the method of achieving any of the purposes of the export of iron ore or iron ore pellets produced from iron ore from the mining areas. 3 Notwithstanding the foregoing provisions of this clause the Minister may from time to time approve variations or require reasonable variations in the detailed proposals relating to any railway or harbour site and/or port facilities or dredging programme or townsite or town planning or any other facilities or services or other plans specifications or proposals which may have been approved pursuant to this Agreement and in considering such variations shall have regard to any changes consequent upon proposals for joint user or joint construction or both of any such works facilities or services and other relevant factors arising after the date hereof. 4 The Company shall be entitled at any time and from time to time with the prior approval in writing of the Minister to enter into an agreement with any third party for the joint construction maintenance and user or for the joint user

only of any work constructed or agreed to be constructed by the Company pursuant to the terms of this Agreement or by such other party pursuant to any agreement entered into by it with the State and in any such event any amount expended in or contributed to the cost of such construction by the Company shall for the purpose of the calculation of the said sum of thirtyfive million pounds agreed to be expended by the Company under Clause 9 hereof so long as the pelletising plant capacity stipulated hereunder and the processing capacity stipulated under the other agreement of each and every category of material shall not be reduced and provided such construction is part of the constructions to which the said sum of thirtyfive million pounds relates be taken and accepted as an amount equal to the total amount expended whether by the Company or the said third party or by them jointly in the construction of such work. 5 When any agreement entered into by the Company with some other company or person results in that other company or person discharging all or any of the obligations undertaken by the Company under this Agreement or renders it unnecessary for the Company to discharge any obligation undertaken page 46 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule 1 On the request by the Company the State shall make by it hereunder the Minister will discharge or temporarily relieve the Company from such part of its said obligations as is reasonable having regard to the extent of and period for which the other company or person actually effects the discharge of those obligations. Export license 4 15. representations to the Commonwealth for the grant to the Company of a license or licenses under Commonwealth law for the export of iron ore or iron ore pellets in such quantities and at such rate or rates as shall be reasonable having regard to the terms of this Agreement the capabilities of the Company and to maximum tonnages of iron ore or iron ore pellets for the time being permitted by the Commonwealth for export from the said State and in a manner or terms not less favourable to the Company except as to rate or quantity than the State has given or intends to give in relation to such a license or licenses to any other exporter of iron ore or iron ore pellets from the said State. 2 If at any time the Commonwealth limits by export license the total permissible tonnage of iron ore or iron ore pellets

as the case may be for export from the said State then the Company will at the request of the State and within three 3 months of such request inform the State whether or not it intends to export to the limit of the tonnage permitted to it under Commonwealth licenses in respect of the financial year next following and if it does not so intend will cooperate with the State in making representation to the Commonwealth with a view to some other producer in the said State being licensed by the Commonwealth to export such of the tonnage permitted by the Commonwealth in respect of that year as the Company does not require and such other producer may require. Such procedure shall continue to be followed year by year during such time as the Commonwealth limits by export license the total permissible tonnage of iron ore or iron ore pellets as the case may be for export from the said State. 3 The Company shall be in default hereunder if at any time it fails to obtain any license or licenses under Commonwealth law for the export of iron ore or iron ore pellets as may be necessary for the purpose of enabling the Company to fulfil its obligations hereunder or if any such license is withdrawn or suspended by the Commonwealth and such failure to obtain or such withdrawal or suspension as the case may be is due to some act or default by the Company or to the Company not being bona fide in its application to the Commonwealth or otherwise having failed to use its best endeavours to have the license granted or restored as the case may be but save as aforesaid if at any time any necessary license is not granted or any license granted to the Company As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 47 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement shall be withdrawn or suspended by the Commonwealth and so that as a result thereof the Company is not for the time being permitted to export at least the tonnage it has undertaken with the State it will export then the Company shall not be obliged to export the tonnage not so permitted until such time as it is so permitted and thereafter it will export the tonnage it has undertaken with the State it will export. The State shall at all times be entitled to apply on behalf of the Company and is hereby authorised by the Company so to do for any license or licenses under Commonwealth law for the export of iron ore or iron ore pellets as may from time to time be necessary for the purposes of this Agreement. Delays 4

16. This Agreement shall be deemed to be made subject to any delays in the performance of obligations under this Agreement and to the temporary suspension of continuing obligations hereunder which may be occasioned by or arise from circumstances beyond the power and control of the party responsible for the performance of such obligations including delays or any such temporary suspension as aforesaid caused by or arising from Act of God force majeure floods storms tempests washaways fire unless caused by the actual fault or privity of the Company act of war act of public enemies riots civil commotions strikes lockout stoppages restraint of labour or other similar acts whether partial or general shortages of labour or essential materials reasonable failure to secure contractors delays of contractors and inability common in the iron ore pellets export industry to profitably sell iron ore pellets or factors due to overall world economic conditions or factors which could not reasonably have been foreseen PROVIDED ALWAYS that the party whose performance of obligations is affected by any of the said causes shall minimise the effect of the said causes as soon as possible after their occurrence. Power to extend periods 4 17. Notwithstanding any provision hereof the Minister may at the request of the Company from time to time extend any period or date referred to in this Agreement for such period or to such later date as the Minister thinks fit and the extended period or later date when advised to the Company by notice from the Minister shall be deemed for all purposes hereof substituted for the period or date so extended. Arbitration 4 18. Any dispute or difference between the parties arising out of or in connection with this Agreement or any agreed amendment or variation thereof or agreed addition thereto or as to the construction of this Agreement or any page 48 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Iron Ore Robe River Agreement Act 1964 First Schedule such amendment variation or addition or as to the rights duties or liabilities of either party thereunder or as to any matter to be agreed upon between the parties under this Agreement shall in default of agreement between the parties and in the absence of any provision in this Agreement to the contrary be referred to and settled by arbitration under the provisions of the Arbitration Act 1895. Notices 4 19. Any notice consent or other writing authorised

or required by this Agreement to be given or sent shall be deemed to have been duly given or sent by the State if signed by the Minister or by any senior officer of the Civil Service of the said State acting by the direction of the Minister and forwarded by prepaid post to the Company at its registered office for the time being in the said State or other address of which such Company has given the State prior notice and by the Company if signed on its behalf by a director manager or secretary of the Company or by any person or persons authorised by the Company in that behalf or by its solicitors as notified to the State from time to time and forwarded by prepaid post to the Minister and any such notice consent or writing shall be deemed to have been duly given or sent on the day on which it would be delivered in the ordinary course of post. Exemption from stamp duty 4

20. operation of this clause would or might be chargeable on 1 The State shall exempt from any stamp duty which but for the a b c d this Agreement; any instrument executed by the State pursuant to this Agreement granting to or in favour of the Company or any permitted assignee of the Company any tenement lease easement license or other right or interest; any assignment sublease or disposition other than by way of mortgage or charge or any appointment made in conformity with the provisions of subclause 1 of clause 13 hereof; and any assignment sublease or disposition other than by way of mortgage or charge or any appointment to or in favour of the Company or an associated company of any interest right obligation power function or authority which has already been the subject of an assignment sublease disposition or appointment executed pursuant to subclause 1 of clause 13 hereof; PROVIDED THAT this clause shall not apply to any instrument or other document executed or made more than seven years from the date hereof. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 49 Iron Ore Robe River Agreement Act 1964 First Schedule Iron Ore Robe River Agreement 2 If prior to the date on which the Bill referred to in clause 2 b hereof to ratify this Agreement is passed as an Act stamp duty has been assessed and paid on any instrument or other document referred to in subclause 1 of this clause the State when such Bill is passed as an Act shall on demand refund any stamp duty paid on any such instrument or other document to the person who paid the same. Interpretation 4 21. This Agreement

shall be interpreted according to the law for the time being in force in the said State. SCHEDULE
WESTERN AUSTRALIA IRON ORE CLEVELANDCLIFFS AGREEMENT ACT 1964 MINERAL

GRIFFITH Minister for Mines THE COMMON SEAL OF BASIC MATERIALS PTY. LIMITED was hereunto affixed in the presence of [C.S.] W. E. DOHNAL Director. J. H. WILLIAMS Secretary. page 52 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement Second Schedule First variation agreement [Heading inserted No. 35 of 1970 s. 7; amended No. 19 of 2010 s. 4.] [s. 2] AN AGREEMENT made the 12th day of May One thousand nine hundred and seventy BETWEEN THE HONOURABLE SIR DAVID BRAND K.C.M.G. M.L.A. Premier and Treasurer of the State of Western Australia acting for and on behalf of the Government of the said State and instrumentalities thereof from time to time hereinafter called the State of the one part and CLIFFS INTERNATIONAL INC. a limited company incorporated under the laws of the State of Ohio one of the United States of America and registered in the State of Western Australia under the provisions of the Companies Act 1961 of the said State and having its registered office situate at 84 Saint Georges Terrace Perth in the said State hereinafter called the Company of the other part. WHEREAS a By an agreement under seal dated the 18th day of November One thousand nine hundred and sixtyfour made between the State of the one part and Basic Materials Pty. Limited hereinafter called Basic of the other part which agreement was approved by and is scheduled to the Iron Ore ClevelandCliffs Agreement Act 1964 and is hereinafter referred to as the Agreement Basic acquired upon the terms and conditions set forth in the agreement certain rights interests and benefits and assumed certain obligations with respect to the exploration for and development of specified iron ore deposits and the mining transportation processing pelletising and shipment of iron ore therefrom. b By virtue of various agreements under seal the Company is now entitled to all the right title interest claim and demand whatsoever of Basic in and under the Agreement and by virtue of deed of covenant with the State has assumed the obligations of Basic thereunder c The State and The Broken Hill Proprietary Company Limited which company is hereinafter referred to as Broken Hill have entered into an agreement which agreement was approved by and is scheduled to the Iron Ore The Broken Hill Proprietary As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 53

Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement Company Limited Agreement Act 1964 and is hereinafter referred to as the Broken Hill Agreement for the mining by that company of iron ore in specified areas and for the establishment by that company of certain port and railway facilities to be used for the transportation of such iron ore and for the construction and establishment within the said State of plant for the secondary processing of iron ore and with regard to other matters d By assignment and deed of covenant made and given pursuant to Clause 27 of the Broken Hill Agreement the rights and obligations of Broken Hill arising under that agreement are now the rights and obligations of Dampier Mining Company Limited hereinafter referred to as Dampier. e The areas covered by the Agreement and the Broken Hill Agreement are adjacent and the Company and Dampier have now entered into an agreement hereinafter referred to as the Companies Agreement which provides for various consultation and cooperation between them and subject to any necessary consents of the State for i ii iii iv Dampier to make available for use by the Company iron ore from the areas covered by the Broken Hill Agreement of an amount of up to 150000000 tons or such greater amount that the terms of the Companies Agreement may oblige it to supply; The company to make available for purchase by Dampier in accordance with the Companies Agreement any iron ore that Dampier may require up to an amount of 2000000 tons per annum or such amount as the Companies may agree; a right to Dampier to purchase part of the railway facilities and/or part or whole of the port facilities to be provided by that Company pursuant to its obligations under the Agreement; and possible additional pelletising facilities at Cape Lambert to be constructed by Dampier or the Company or jointly by Dampier and the Company. f The State the Company and Dampier have now agreed that Cape Lambert is a more desirable port site for the initial development of page 54 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement the deposits covered by the Agreement and the Broken Hill Agreement than those considered earlier and the Company has already submitted proposals for the development of certain facilities at Cape Lambert. g In view of the Companies

Agreement it is desirable that there should be some addition to the various rights and obligations of the parties created by the Agreement and by the Broken Hill Agreement and that certain additional provisions be included to facilitate the carrying out of the Agreement by the joint venture proposed to be established by the Company and referred to in the Companies Agreement. NOW THIS AGREEMENT WITNESSETH This agreement except for this clause shall have no force or effect and 1. shall not be binding upon the parties until it is approved by an Act of the Parliament of Western Australia. 2. If an Act to ratify this agreement is passed by the Parliament of the said State the provisions of this agreement shall take effect as though the same had been enacted by the ratifying Act and notwithstanding any Act or law to the contrary the State and the Minister shall for the purpose of implementing this agreement have all the powers discretions and authorities conferred on them respectively by the Agreement for the purpose of implementing that agreement. The Agreement is added to and varied as hereinafter provided and the 3. Agreement shall be read and construed accordingly. 4. The Agreement is amended as follows 1 Clause 1 is amended by a adding after the definition Companys wharf a definition Dampier as follows means Dampier Mining Company Limited and includes the Company mentioned in the agreement approved by the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964 and any successor or assignee of that Company permitted under that Agreement; As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 55 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement b by deleting the words Cape Preston in the definitions of harbour and plant site and substituting therefor the words Cape Lambert; c by adding to the definition mineral lease after the word includes in the second line the words the sublease of any area of a mineral lease sublet to the Company by Dampier and and by substituting for the word thereof in the last line the words of such lease or sublease; d by adding to the definition mining areas the words and also any area within the mineral lease and also the areas the subject of Temporary Reserves 4269H to 4273H both inclusive reserved under section 276 of the Mining Act; e by adding after the definition said State a definition secondary processing as follows means concentration or other beneficiation of

iron ore other than by crushing or screening and includes thermal electrostatic magnetic and gravity processing and agglomeration pelletisation or comparable changes in the physical character of iron ore. 2 Clause 5 is amended by deleting subclause 5. 3 Clause 8 is amended by adding to paragraph a of subclause 1 as follows i in the fifth line after the words mining areas the following other than the mining areas included in the sublease referred to in the definition of mineral lease and ii by changing the word thereof in the thirteenth line to the following of the lands so applied for notwithstanding the survey in respect thereof has not been completed. page 56 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement b inserting before the existing subparagraph ii of paragraph b of subclause 1 a new subparagraph as follows ii on application by the Company include in the area of any lease to be granted to the Company at Cape Lambert for the purposes hereof adequate provision for a the development of such facilities at Cape Lambert as Dampier may require in connection with the production transportation processing and shipment of iron ore produced pursuant to the agreement approved by the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964; and b the expansion of any proposed iron ore pellet plant facilities to meet any requirements for increased production therefrom as may be required for Dampier; and and renumbering the existing subparagraph ii accordingly. c adding to paragraph b of subclause 1 in the last line after the word pellets the words PROVIDED FURTHER that additional rental will be payable pursuant to this paragraph in respect of iron ore sold to Dampier as if such iron ore were produced under a mineral lease granted pursuant to the agreement approved by the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964. d adding two new paragraphs to subclause 1 thereof as follows d All leases rights mining tenements easements reserves and licenses granted under the provisions of this subclause may be so granted notwithstanding the survey in respect thereof has not been completed; e Notwithstanding the provisions of Section 82 of the Mining Act and of regulations 192 and 193 made thereunder and of Section 81D of the Transfer of Land As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 57 Iron Ore Robe River

Agreement Act 1964 Second Schedule First variation agreement Act 1893 and Section 143 of the Land Act insofar as the same or any of them may apply a no assignment mortgage charge sublease or disposition made or given pursuant to Clause 13 hereof of or over any lease sublease license reserve or tenement granted hereunder or pursuant hereto by the Company or any assignee or appointee who has executed and is for the time being bound by deed of covenant made pursuant to Clause 13 hereof and b no transfer assignment mortgage or sublease made or given in exercise of any power contained in any such mortgage or charge shall require any approval or consent other than such consent as may be necessary under Clause 13 of the Agreement and no equitable mortgage or charge shall be rendered ineffectual by the absence of any approval or consent otherwise than as required by Clause 13 hereof or because the same is not registered under the provisions of the Mining Act. e inserting after the word provisions in the first line of subclause 3 the words of paragraph e of subclause 1 of this clause and the provisions. f adding a new paragraph after paragraph f of subclause 4 as follows g i shall permit Dampier to sublet to the Company the whole or any part of any mineral lease granted pursuant to the agreements approved by the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964 and the Iron Ore Dampier Mining Company Limited Agreement Act 1969; ii shall in the event of the termination of any mineral lease subleased in whole or in part to the Company by Dampier grant to the page 58 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement Company a mineral lease for the unexpired term of the sublease covering the same mining areas and on the same terms as were applicable under the sublease except that royalties shall be payable at the rates provided for in this Agreement. PROVIDED THAT any sublease referred to in subparagraph i and any mineral lease granted to the Company pursuant to subparagraph ii shall be included in the definition of mineral lease in Clause 1 of this agreement and shall be subject to the provisions of Clause 13 and paragraph e of subclause 1 of Clause 8. g adding a subclause as follows 6 No fee simple lease sublease license or other title or right granted or assigned under or pursuant to this Agreement and no chattel belonging to or

owned jointly or in individual shares by the Company and an associated company shall be subject to or capable of partition otherwise than by agreement including partition under the Property Law Act 1969 or under any order of any court of competent jurisdiction made under that Act or otherwise or be subject to the making of an order for sale under the said Act. 4 Clause 9 is amended by a substituting for the proviso to paragraph e of subclause 2 thereof the following proviso PROVIDED HOWEVER that this paragraph shall not apply either to i iron ore used for the production of iron ore pellets or for secondary processing or for the manufacture of iron or steel in any part of the said State lying north of the twentysixth parallel of latitude; or ii iron ore sold or otherwise disposed of to Dampier. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 59 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement b adding to paragraph j of subclause 2 after subparagraph xi and before the last sentence of the said paragraph the following provisos PROVIDED THAT for the purposes of this paragraph the words mineral lease shall not include any sublease from Dampier and PROVIDED FURTHER THAT the royalty payable on any iron ore sold to Dampier shall be computed as if such iron ore were produced under a mineral lease granted pursuant to the agreement approved by the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964 and PROVIDED FURTHER THAT with regard to the contracts which the Company has advised the State were entered into prior to September One thousand nine hundred and sixtynine by an associated company for the sale of iron ore pellets and prepared sinter fines to Japanese steel mills the royalty for fines as well as iron ore pellets shall be computed at the rate specified in subparagraph v of this paragraph subject to the adjustment specified in subparagraph xi. c deleting the last proviso of paragraph o of subclause 2 thereof and substituting therefor the following PROVIDED ALSO that the provisions of this paragraph shall not apply i to iron ore pellets or to ore the subject of secondary processing or Iron or steel manufacture by the Company or an associated company within the said State or ii to ore sold or otherwise disposed of to Dampier. d inserting a new paragraph after paragraph o of subclause 2 thereof as follows p honour its undertakings with Dampier under any agreement with Dampier pursuant to

which it receives a sublease referred to in subparagraph i of paragraph g of subclause 4 of clause 8

PROVIDED THAT as sole page 60 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement

remedy for a breach of this covenant the State may if the breach is not cured within a period as provided in paragraph 1 of clause 10 after notice as provided therein require Dampier to terminate such a sublease for any breach thereof which the State considers material AND the Company shall not thereafter be entitled to a lease under subparagraph ii of paragraph g of subclause 4 of clause 8 AND the State may require the surrender of areas included in any lease or leases pursuant to subparagraph ii of paragraph b of subclause 1 of clause 8. e inserting after the word hereof in the eighth line of subclause 3 the following including the conferring upon the Company of power and authority requisite for the control and management of the works referred to in the said provisions. 5

Clause 10 is amended by substituting for paragraph 1 thereof the following paragraph I i that in any of the following events namely if the Company shall make default which the State considers material in the due performance or observance of any of the covenants or obligations to the State herein or in any lease sublease license or other title or document granted or assigned under this Agreement on its part to be performed or observed or shall abandon or repudiate its operations under this Agreement and such default shall not have been remedied or such operations resumed within a period of one hundred and eighty 180 days after notice as provided in subparagraph ii of this paragraph is given by the State or if the alleged default abandonment or repudiation is contested by the Company and within sixty 60 days after such notice is submitted by the Company to arbitration within a reasonable time fixed by the arbitration award but not less than ninety 90 days after the making of the arbitration award where the question is deed against the Company the arbitrator finding that there was a bona fide dispute and that the Company had not been dilatory in pursuing the arbitration or if the Company As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 61 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement shall go into liquidation other than a voluntary liquidation for the purpose of

reconstruction then and in any of such events the State may by notice to the Company determine this Agreement and the rights of the Company hereunder and under any lease license easement or right granted hereunder or pursuant hereto or if the Company shall surrender the entire mineral lease as permitted under Clause 81a of this Agreement then this Agreement and the rights of the Company hereunder and under any lease license easement or right granted hereunder or pursuant hereto shall thereupon determine PROVIDED HOWEVER that if the default shall not have been remedied after such notice or within the time fixed by the arbitration award as aforesaid the State instead of determining this Agreement as aforesaid because of such default may itself remedy such default or cause the same to be remedied for which purpose the State by agents workmen or otherwise shall have full power to enter upon lands occupied by the Company and to make use of all plant machinery equipment and installations thereon and the costs and expenses incurred by the State in remedying or causing to be remedied such default shall be a debt payable by the Company to the State on demand; and the notice to be given by the State in terms of subparagraph i of this paragraph shall specify the nature of the default or other ground so entitling the State to exercise such right of determination and where appropriate and known to the State the party or parties responsible therefor and shall be given to the Company and all such assignees mortgagees chargees and disponees for the time being of the Companys said rights to or in favour of whom or by whom an assignment mortgage charge or disposition has been effected in terms of Clause 131a hereof whose name and address for service of notice has previously been notified in writing to the State by the Company or any such assignee mortgagee chargee or disponent; ii page 62 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Second Schedule First variation agreement iii the abandonment or repudiation by or liquidation of the Company referred to in subparagraph i of this paragraph means the abandonment or repudiation by or the liquidation of all of them the Company and all assignees and appointees who have executed and are for the time being bound by a deed of covenant in favour of the State as provided in Clause 13 hereof; and. 6 Clause 13 is amended by adding to subclause 1 a new

subparagraph after subparagraph b and before the words subject however as follows and c assign sublet or dispose of to Dampier in whole or in part rights under this Agreement including its rights to or as the holder of any lease license easement grant or other title in relation to the railway and the port and related facilities or any of them; b adding the following to subclause 2 PROVIDED HOWEVER that the Minister may agree to release the Company from such liability where having regard to all the circumstances of any such assignment mortgaging charging subletting disposition or appointment as mentioned in subclause 1 of this clause he considers such release will not be contrary to the interest of the State hereunder; c adding a new subclause as follows 3 To the extent that it imposes any obligation on the Company with regard to the management preservation or control of any of the facilities mentioned in subparagraph c of subclause 1 of this clause whether as to maintenance operation or otherwise this Agreement shall no longer apply with regard to any such facilities which become the sole property of Dampier. 7 Clause 19 is amended by inserting after the words prior notice in line 9 the words or in the case of any other addressee to his or its address for service of notices notified in writing to the State. LIMITED a company incorporated in the State of New South Wales and having its registered office in that State at 60 Martin Place Sydney SUMITOMO METAL AUSTRALIA PTY. LIMITED a company incorporated in the State of New South Wales and having its registered office in that State at 30th floor CBA Centre 60 Margaret Street Sydney and the said MITSUI IRON ORE DEVELOPMENT PTY. LTD. such lastmentioned three companies acting together and carrying on business in the State of Western Australia at 22nd Floor 44 St. Georges Terrace Perth hereinafter collectively called CLIA the said Cliffs Western Mitsui Iron Peko and CLIA hereinafter collectively called the Participants being the party of the third part.

As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 89 Iron Ore Robe River Agreement Act 1964 Fifth Schedule Fourth variation agreement WHEREAS a By an agreement under seal dated the 18th day of November One thousand nine hundred and sixtyfour made between the State of the one part and Basic Materials Pty. Limited hereinafter called Basic of the other part which agreement was approved by and is scheduled to the Iron Ore ClevelandCliffs Agreement Act 1964 and is hereinafter referred to as the Agreement Basic acquired upon the terms and conditions set forth in the agreement certain rights interests and benefits and assumed certain obligations with respect to the exploration for and development of specified iron ore deposits and the mining transportation processing pelletising and shipment of iron ore therefrom. b By virtue of various agreements under seal Cliffs International Inc. Cliffs became entitled to all the right title interest claim and demand whatsoever of Basic in and under the Agreement and by virtue of deed of covenant with the State assumed the obligations of Basic thereunder. c The State and The Broken Hill Proprietary Company Limited which company is hereinafter referred to as Broken Hill entered into an agreement which agreement was approved by and is scheduled to the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964 and is hereinafter referred to as the Broken Hill Agreement for the mining by that company of iron ore in specified areas and for the establishment by that company of certain port and railway facilities to be used for the transportation of such iron ore and for the construction and establishment within the said State of plant for the secondary processing of iron ore and with regard to other matters. d By assignment and deed of covenant made and given pursuant to Clause 27 of the Broken Hill Agreement the rights and obligations of Broken Hill arising under that agreement are now the rights and obligations of BHP Minerals Limited then called Dampier Mining Company Limited hereinafter referred to as BHPM. e The areas covered by the Agreement and the Broken Hill Agreement are adjacent and Cliffs and BHPM entered into an agreement hereinafter referred to as the Companies Agreement which provided for various consultation and cooperation between them and subject to any necessary consents of the State for inter alia i BHPM to make available for use by Cliffs iron ore from the areas

covered by the Broken Hill Agreement of an amount of up to 150000000 tons or such greater amount that the terms of the Companies Agreement may oblige it to supply; and page 90 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Fifth Schedule Fourth variation agreement ii Cliffs to make available for purchase by BHPM in accordance with the Companies Agreement any iron ore that BHPM may require up to an amount of 2000000 tons per annum or such amount as the Companies may agree. f By an Agreement under seal dated the 12th day of May 1970 between the State of the one part and Cliffs of the other part which Agreement was approved and is scheduled to the Iron Ore Cleveland Cliffs Agreement Amendment Act 1970 the Agreement was amended to take account of the developments contemplated in the Companies Agreement. g By an Agreement dated the 30th day of September 1969 between the State of the one part and BHPM of the other part which agreement was scheduled to the Iron Ore Dampier Mining Company Limited Agreement Act 1969 The Broken Hill Agreement was amended to take account of the developments contemplated in the Companies Agreement. h By deed dated the 29th day of June 1970 made between the State Cliffs and Cliffs Western Mitsui Iron Robe River Limited RRL and Mt. Enid Iron Co. Pty. Ltd. Mt. Enid hereinafter called the Original Participants Cliffs granted and assigned to the Original Participants all the right title interest claim and demand of the Company as defined in the Agreement in and under the Agreement as then or thereafter altered from time to time except the rights of occupancy referred to therein of the mining areas therein defined and the rights to obtain mineral leases thereof as tenants in common in the following shares Cliffs Western Mitsui Iron RRL Mt. Enid 30 30 35 5 and by the said deed each of them Cliffs Western Mitsui Iron RRL and Mt. Enid severally covenanted and agreed with the State that it should to the extent of its commitment therein set out comply with observe and perform the provisions of the Agreement as then or thereafter amended on the part of Cliffs to be complied with observed or performed in respect of the matters assigned as therein set forth to the intent that the same should be binding upon them to the extent of the commitment therein set out in the same manner and to the same extent as if each of them were expressly named

in the Agreement. i By virtue of various agreements and deeds Cliffs Western Mitsui Iron Peko and CLIA which parties are hereinafter called the Participants As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 91 Iron Ore Robe River Agreement Act 1964 Fifth Schedule Fourth variation agreement are now entitled to all the right title and interests of the Original Participants in and under the Agreement as amended as tenants in common in the following shares Cliffs Western Mitsui Iron Peko CLIA 30 30 35 5 j k The Participants Cliffs and BHPM have now entered into an Agreement dated the Twenty Eighth day of October 1985 hereinafter referred to as the Second Companies Agreement which provides subject to any necessary consents of the State for inter alia BHPM to make available for use by the Participants of iron ore from areas additional and adjacent to those provided for under the Companies Agreement and which are covered by The Broken Hill Agreement as amended. In view of the Second Companies Agreement it is desirable that there should be some amendment to the various rights and obligations of the parties created by the Agreement as amended by agreements dated 12th May 1970 13th July 1976 5th October 1983 and 30th April 1984 hereinafter referred to as the Principal Agreement and by the Broken Hill Agreement as amended. NOW THIS AGREEMENT WITNESSETH 1. 2. This Agreement except for this Clause shall have no force or effect and shall not be binding upon the parties until it is approved by an Act of the Parliament of Western Australia. If an Act to ratify this Agreement is passed by the Parliament of the said State the provisions of this Agreement shall take effect as though the same has been enacted by the ratifying Act and notwithstanding any Act or law to the contrary the State and the Minister shall for the purpose of implementing this Agreement have all the powers discretions and authorities conferred on them respectively by the Agreement for the purpose of implementing the Agreement. 3. Words and phrases to which meanings are given under Clause 1 of the Principal Agreement other than words and phrases to which meanings are given in this Agreement shall have the same respective meanings in this Agreement as are given to them in Clause 1 of the Principal Agreement. page 92 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Fifth

Schedule Fourth variation agreement 4. 5. River Agreement Act 1964 Sixth Schedule Fifth variation agreement 221 St. Georges Terrace Perth
hereinafter collectively called PIA of the third part the said RRM Mitsui Iron Peko CLIA and PIA the
parties of the third part being hereinafter collectively called the Participants. WHEREAS a by an
agreement under seal dated the 18th day of November 1964 made between the State of the one
part and Basic Materials Pty. Limited hereinafter called Basic of the other part which agreement was
approved by and is scheduled to the Iron Ore ClevelandCliffs Agreement Act 1964 and is hereinafter
referred to as the Agreement Basic acquired upon the terms and conditions set forth in the
Agreement certain rights interests and benefits and assumed certain obligations with respect to the
exploration for and development of specified iron ore deposits and for the mining transportation
processing pelletising and shipment of iron ore therefrom; b by virtue of various agreements under
seal Robe River International Inc. formerly Cliffs International Inc. hereinafter called Cliffs became
entitled to all the right interest claim and demand whatsoever of Basic in and under the Agreement
and by virtue of deed of covenant with the State assumed the obligations of Basic thereunder; c the
Agreement has been varied by the following agreements i ii the agreement dated the 12th day of
May 1970 approved by the Iron Ore ClevelandCliffs Agreement Act Amendment Act 1970; the
agreement dated the 13th day of July 1976 the execution of which by the State was authorized by
the Iron Ore ClevelandCliffs Agreement Act Amendment Act 1973; iii an agreement made the 5th
day of October 1983; iv v the agreement dated the 30th day of April 1984 ratified by the Iron Ore
ClevelandCliffs Agreement Amendment Act 1984; and the agreement dated the 29th day of October
1985 approved and ratified by the Iron Ore ClevelandCliff Agreement Amendment Act 1985 and as
so varied from time to time is hereinafter referred to as the Principal Agreement; d by virtue of
various agreements and deeds the Participants are now entitled to all the right title interest claim
and demand of the Company page 98 Version 02a005 Published on www.legislation.wa.gov.au As
at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth Schedule Fifth variation agreement

as defined in the Principal Agreement in and under the Principal Agreement except Mineral Lease 248 SA granted thereunder by the State to Cliffs as tenants in common in the following shares RRM Mitsui Iron Peko CLIA PIA 30 20 35 5 10; by virtue of a deed dated the 12th day of May 1986 Robe River Limited became entitled inter alia to all the right title and interest of Cliffs in and to the Principal Agreement and the said Mineral Lease 248 SA; by an agreement dated the 24th day of December 1976 made between RRM Mitsui Iron Robe River Limited and Mt. Enid Iron Co. Pty. Ltd predecessors in title of the Participants and BHP Minerals Limited formerly called Dampier Mining Company Limited and referred to hereinafter as BHPM BHPM purchased inter alia interests as therein described in certain leases subleases and licences relating to the port and railway facilities constructed under the Principal Agreement and by an agreement dated the 31st day of December 1976 and made between the State and BHPM BHPM agreed to comply with observe and perform the provisions of the Principal Agreement to be complied with observed and performed in regard to the property so purchased; by an assignment and deed of covenant dated the 25th day of June 1987 made between the State BHPM and the Participants BHPM with effect from the 1st day of December 1986 sold and assigned to the Participants inter alia the whole of its interests in the leases subleases and licences referred to in recital f hereof and the Participants agreed to comply with observe and perform the provisions of the. Principal Agreement to be complied with observed and performed in regard to the property so acquired and by a release of the same date the Minister as defined in the Principal Agreement released BHPM from its obligations to the State in respect thereof; by an assignment and deed of covenant dated the 25th day of June 1987 and made between the State BHPM the Participants The Broken Hill Proprietary Company Limited and Australian Iron and Steel Proprietary Limited BHPM assigned to the Participants all its interest in the agreement defined in section 1A of the Iron Ore Dampier Mining Company Limited Agreement Act 1969 hereinafter called the Dampier e f g h As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 99 Iron Ore Robe River Agreement Act 1964 Sixth Schedule Fifth variation agreement Agreement and in the clauses of the Agreement defined in section 2 of the Iron

Ore The Broken Hill Proprietary Company Limited Agreement Act 1964 hereinafter called the 1964 BHP Agreement set out in item 1 of the Schedule hereto and by the same deed the Participants acquired the benefit of and became subject to the obligations arising under the clauses of the 1964 BHP Agreement set out in item 2 of the Schedule hereto insofar as they related to the interests of the Participants in the Dampier Agreement and the clauses of the 1964 BHP Agreement set out in item 1 of the Schedule hereto; by a release dated the 25th day of June 1987 the Minister as defined in the 1964 BHP Agreement released BHPM and The Broken Hill Proprietary Company Limited from liability for the performance and observance of the covenants and agreements on their part contained in the clauses set out in item 1 of the Schedule hereto and released BHPM from liability for the performance and observance of the covenants and agreements on its part contained in the Dampier Agreement; as a consequence of changed circumstances which caused the production of iron ore pellets under the Principal Agreement to become uneconomic the Minister as defined in the Principal Agreement approved the sale to the Peoples Republic of China of certain key components of the pellet plant constructed pursuant to the Principal Agreement; and i j k the parties hereto desire to amend the Principal Agreement in the light of the acquisitions by the Participants referred to in recitals g and h hereof and the said sale of the pellet plant. NOW THIS AGREEMENT WITNESSES

1. The provisions of this Agreement shall not come into operation until a Bill to ratify this Agreement is passed by the Legislature of the said State and comes into operation as an Act. 2. The Principal Agreement is hereby varied as follows 1 Clause 1 a by deleting the definition of Dampier and substituting the following definition Dampier means BHP Minerals Limited formerly Dampier Mining Company Limited;; page 100 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth Schedule Fifth variation agreement b by inserting after the definition of Dampier the following definition Dampier Mineral Lease means mineral lease No. 254 SA granted to Dampier pursuant to the Agreement defined in section 2 of the Iron Ore The Broken Hill Proprietary Company Limited Agreement Act 1964 and the agreement defined in section 1A of the Iron Ore Dampier Mining Company Limited Agreement Act 1969;; c in

the definition of mineral lease by deleting and includes any subleases of any area of a mineral lease sublet to the Company and/or CRRIA by Dampier and any renewal of such lease or subleases and substituting the following d and includes any areas added to the mineral lease pursuant to the provisions of clause 10A hereof and any renewal of such lease; by inserting after the definition of State Energy Commission the following definition the 1987 Amendment date means the date on which the provisions of the agreement ratified by the Iron Ore ClevelandCliffs Agreement Amendment Act 1987 come into operation;.

2 Clause 6 in the marginal note by deleting other.

3 Clause 7A a by inserting after may require the following and in respect of measures to be taken in relation to the matters the subject of the proposals for the protection and management of the environment; b by deleting the following The provisions of clause 6 shall mutatis mutandis apply to detailed proposals submitted pursuant to this clause..

4 By inserting after clause 7A the following clauses 7AB.

1 On receipt of proposals pursuant to clause 7A hereof the Minister shall approve of the said proposals either wholly or in part without qualification or reservation; or As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 101 Iron Ore Robe River Agreement Act 1964 Sixth Schedule Fifth variation agreement b c defer consideration of or decision upon the same until such time as the Company submits a further proposal or proposals in respect of some other of the matters mentioned in clause 7A hereof not covered by the said proposals; or require as a condition precedent to the giving of his approval to the said proposals that the Company makes such alterations thereto or complies with such conditions in respect thereto as he having regard to the circumstances including the overall development of and the use by others as well as the Company of all or any of the facilities proposed to be provided thinks reasonable and in such a case the Minister shall disclose his reasons for such conditions.

2 The Minister shall within two months after receipt of the said proposals pursuant to subclause 1 give notice to the Company of his decision in respect to the same.

3 4 If the decision of the Minister is as mentioned in either of paragraphs b or c of subclause 1 the Minister shall afford the Company full opportunity to consult with him and should it so desire to submit new or revised proposals either generally or in respect to

some particular matter. Subject to subclause 5 of this clause if the decision of the Minister is as mentioned in either of paragraphs b or c of subclause 1 and the Company considers that the decision is unreasonable the Company within two months after receipt of the notice mentioned in subclause 2 may elect to refer to arbitration in the manner hereinafter provided the question of the reasonableness of the decision.

5 The Company may withdraw its proposals submitted pursuant to clause 7A hereof at any time before approval thereof or where any decision of the page 102 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 7AC. Iron Ore Robe River Agreement Act 1964 Sixth Schedule Fifth variation agreement Minister in respect thereof is referred to arbitration within 3 months after the award by notice to the Minister that it shall not be proceeding with the proposed modification expansion or variation of its activities as so proposed in those proposals.

6 The Company shall implement the decision of the Minister or an award made on arbitration where the proposals are not withdrawn as the case may be in accordance with the terms thereof.

1 The Company shall in respect of the matters referred to in clause 7A hereof which are the subject of proposals approved or determined under clause 7AB hereof carry out a continual programme of investigation research and monitoring to ascertain the effectiveness of the measures it is taking both generally and pursuant to its approved proposals for the protection and management of the environment.

2 The Company shall during the currency of this Agreement at yearly intervals commencing from the dates when proposals under clause 7A hereof are approved or determined or such other date or dates as the Company and the Minister may agree submit reports to the Minister concerning a measures taken for the protection and management of the environment both generally and pursuant to any proposals made under clause 7A hereof; and b investigations research and monitoring carried out pursuant to subclause 1 of this clause.

3 Each 3 years commencing from the date referred to in subclause 2 of this clause the report submitted to the Minister under that subclause shall be more detailed and shall embrace not only the matters referred to in paragraphs a and b of subclause 2 of this clause but also the results and conclusions of the investigations research and monitoring carried out during the previous 3 years and a programme of

As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 103 Iron Ore Robe River Agreement Act 1964 Sixth Schedule Fifth variation agreement measures to be taken for protection and management of the environment including investigations research and monitoring for the ensuing 3 years. 4 The Minister may within 2 months of receipt of a detailed report pursuant to subclause 3 of this clause notify the Company that he a b requires amendment of the report andor programme for the ensuing 3 years; or requires additional detailed proposals to be submitted for the protection and management of the environment in relation to matters the subject of proposals approved or determined under clause 7AB hereof. 5 The Company shall within 2 months of receipt of a notice pursuant to paragraph a of subclause 4 of this clause submit to the Minister an amended report andor programme as required. The Minister shall afford the Company full opportunity to consult with him on his requirements during the preparation of any amended report or programme. 6 The Minister may within 1 month of receipt of an amended report or programme pursuant to subclause 5 of this clause notify the Company that he requires additional detailed proposals to be submitted for the protection and management of the environment in relation to matters the subject of proposals approved or determined under clause 7AB hereof. 7 The Company shall within 2 months of receipt of a notice pursuant to paragraph b of subclause 4 or subclause 6 of this clause submit to the Minister additional detailed proposals as required and the provisions of clause 7AB hereof where applicable shall mutatis mutandis apply. 8 The Company shall implement the decision of the Minister or an award on arbitration as the case may be in accordance with the terms thereof.. page 104

The State RRL and the Robe Participants are now the parties to the agreement dated 18 November 1964 approved by and scheduled to the Iron Ore Robe River Agreement Act 1964 and which as subsequently As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 115 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement added to varied or amended is referred to in this Agreement as the Principal Agreement. B. The parties wish to vary the Principal Agreement. Operative provisions 1. 2. Subject to the context the words and expressions used in this Agreement have the same meanings respectively as they have in and for the purpose of the Principal Agreement. The State shall introduce and sponsor a Bill in the Parliament of Western Australia to ratify this Agreement and shall endeavour to secure its passage as an Act prior to 31 December 2010 or such later date as the parties may agree. 3. a Clause 4 does not come into

operation unless or until an Act passed in accordance with clause 2 ratifies this Agreement. b If by 30 June 2011 or such later date as may be agreed pursuant to clause 2 clause 4 has not come into operation then unless the parties hereto otherwise agree this Agreement shall cease and determine and none of the parties shall have any claim against the other parties with respect to any matter or thing arising out of or done or performed or omitted to be done or performed under this Agreement.

4. The Principal Agreement is varied as follows 1 in clause 1 a by deleting the current definition of direct shipping ore fine ore and fines; b by inserting in the appropriate alphabetical positions the following new definitions approved proposal means a proposal approved or determined under this Agreement; beneficiated ore means iron ore that has been concentrated or upgraded otherwise than solely by crushing screening separating by hydrocycloning or a similar technology which uses primarily size as a criterion washing page 116 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule scrubbing trommelling or drying or by a combination of 2 or more of those processes by the Company in a plant constructed pursuant to a proposal approved pursuant to an Integration Agreement or in such other plant as is approved by the Minister after consultation with the Minister for Mines and beneficiation and beneficiate have corresponding meanings; EP Act means the Environmental Protection Act 1986 WA; fine ore means iron ore not being beneficiated ore or pisolite fine ore which is screened and will pass through a 6.3 millimetre mesh screen; Integration Agreement means a b c d e f the agreement approved by and scheduled to the Iron Ore Hamersley Range Agreement Act 1963 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Robe River Agreement Act 1964 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Hamersley Range Agreement Act Amendment Act 1968 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Mount Bruce Agreement Act 1972 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Hope Downs Agreement Act 1992 as from time to time

added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Yandicoogina Agreement Act 1996 as from time to time added to varied or amended; or As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 117 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement g h i j k the agreement approved by and scheduled to the Iron Ore Mount Newman Agreement Act 1964 as from time to time added to varied or amended; or the agreement approved by and scheduled to the Iron Ore Mount Goldsworthy Agreement Act 1964 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore GoldsworthyNimingarra Agreement Act 1972 as from time to time added to varied or amended; or the agreement authorised by and as scheduled to the Iron Ore McCameys Monster Agreement Authorisation Act 1972 as from time to time added to varied or amended; or the agreement ratified by and scheduled to the Iron Ore Marillana Creek Agreement Act 1991 as from time to time added to varied or amended; Integration Proponent means in relation to an Integration Agreement the Company or the Joint Venturers as the case may be as defined in and for the purpose of that Integration Agreement; iron ore includes without limitation beneficiated ore; laws relating to native title means laws applicable from time to time in the said State in respect of native title and includes the Native Title Act 1993 Commonwealth; lump ore means iron ore not being beneficiated ore or pisolite fine ore which is screened and will not pass through a 6.3 millimetre mesh screen; metallised agglomerates means products resulting from the reduction of iron ore by any method whatsoever and having an iron of not less than 85; Minister for Mines means the Minister in the Government of the said State for the time being responsible under whatsoever title for the administration of the Mining Act 1978 WA; page 118 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule pisolite fine ore means iron ore not being beneficiated ore derived from channel iron deposits that appear to be chemically precipitated sedimentary deposits comprised of a pisolitic texture of hematite grains rimmed with goethite in a goethitic matrix and a having a product grade loss on ignition of 8.5 or greater; and b which will pass

through an 9.5 millimetre mesh screen; Related Entity means a company in which a b as at 21 June 2010; and after 21 June 2010 with the approval of the Minister a direct or through a subsidiary or subsidiaries within the meaning of the Corporations Act 2001 Commonwealth indirect shareholding of 20 or more is held by c Rio Tinto Limited ABN 96 004 458 404; or d BHP Billiton Limited ABN 49 004 028 077; or e those companies referred to in paragraphs c and d in aggregate; variation date means the date on which clause 4 of the variation agreement made on or about 17 November 2010 between the State and the Company comes into operation; and washing means a process of separation by water using only size as a criterion; c in the definition of agreed or determined by i ii deleting assessed at and substituting assessed on; and deleting all the words after have regard to and substituting a colon followed by i in the case of iron ore initially sold at cost pursuant to paragraph B of the proviso to clause 92e the prices for that type of iron As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 119 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement ore prevailing at the time the price for such iron ore was agreed between the arms length purchaser referred to in paragraph Biii of that proviso and the seller in relation to the type of sale and the relevant international seaborne iron ore market into which such iron ore was sold and where prices beyond the deemed f.o.b. point are being considered the deductions mentioned in the definition of f.o.b. value; and in any other case the prices for that type of iron ore prevailing at the time the price for such iron ore was agreed between the Company and the purchaser in relation to the type of sale and the market into which such iron ore was sold and where prices beyond the deemed f.o.b. point are being considered the deductions mentioned in the definition of f.o.b. value;; ii d in the definition of Companys wharf by inserting and in clauses 92e and f also any additional wharf constructed by the Company pursuant to this Agreement before the semi colon; e in the definition of f.o.b. value by i in paragraph i A inserting subject to paragraph ii before in the case of; and B deleting assessed as and substituting assessed on; ii renumbering paragraph ii as paragraph iii; and iii inserting after paragraph i the following new paragraph ii in the case of iron ore initially sold at cost pursuant to paragraph B of the proviso to clause 92e the price

which is payable for the iron ore by the arms length purchaser as referred to in paragraph Biii of that proviso or where the Minister considers following page 120 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule advice from the appropriate Government department that the price payable in respect of the iron ore does not represent a fair and reasonable market value for that type of iron ore assessed on an arms length basis in the relevant international seaborne iron ore market such amount as is agreed or determined as representing such a fair and reasonable market value less all duties taxes costs and charges referred to in paragraph i above; and; f in the definition of loading port by g h i j i ii renumbering the existing paragraph c as paragraph e; and inserting after paragraph b the following new paragraphs c the Port of Port Hedland; or d any other port constructed after the variation date under an Integration Agreement;; in the definition of mineral lease by deleting clause 10A and substituting clauses 9A or 10A; in the definition of secondary processing by deleting concentration or other beneficiation of iron ore other than by crushing or screening and substituting beneficiation of iron ore; in the sentence beginning marginal notes by inserting and clause notes after marginal notes; and by inserting at the end of clause 1 the following new paragraphs Words in the singular shall include the plural and words in the plural shall include the singular according to the requirements of the context. Nothing in this Agreement shall be construed a to exempt the Company from compliance with any requirement in connection with the protection of the environment arising out of or inental to its As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 121 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement activities under this Agreement that may be made by or under the EP Act; or b to exempt the State or the Company from compliance with or to require the State or the Company to do anything contrary to any laws relating to native title or any lawful obligation or requirement imposed on the State or the Company as the case may be pursuant to any laws relating to native title; or c to exempt the Company from compliance with the provisions of the Aboriginal Heritage Act 1972 WA.; 2 by deleting clauses 7A and 7AB and substituting the following

new clauses 7A. 1 If the Company at any time during the continuance of this Agreement after the variation date desires to significantly modify expand or otherwise vary its activities carried on pursuant to this Agreement other than under clauses 7AC 7C or 9D beyond those activities specified in any proposals approved pursuant to clause 6 it shall give notice of such desire to the Minister and within 2 months thereafter shall submit to the Minister detailed proposals in respect of all matters covered by such notice and such of the other matters mentioned in clause 52a as the Minister may require. 2 A proposal may with the consent of the Minister except in relation to an Integration Agreement and that of any parties concerned being in respect of an Integration Agreement the Integration Proponent for that agreement provide for the use by the Company of any works installations or facilities constructed or established under a Government agreement. 3 Each of the proposals pursuant to subclause 1 may with the approval of the Minister or shall if so required by the Minister be submitted separately and in any order as to any matter or matters in respect of which such proposals are required to be submitted. page 122 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule 4 At the time when the Company submits the said proposals it shall submit to the Minister details of any services including any elements of the project investigations design and management and any works materials plant equipment and supplies that it proposes to consider obtaining from or having carried out or permitting to be obtained from or carried out outside Australia together with its reasons therefor and shall if required by the Minister consult with the Minister with respect thereto. 5 The Company may withdraw its proposals pursuant to subclause 1 at any time before approval thereof or where any decision in respect thereof is referred to arbitration as referred to in clause 7AB within 3 months after the award by notice to the Minister that it shall not be proceeding with the same. Consideration of Companys proposals under clause 7A 7AB.1 In respect of each proposal pursuant to subclause 1 of clause 7A the Minister shall a b c subject to the limitations set out below refuse to approve the proposal whether it requests the grant of new tenure or not if the Minister is satisfied on reasonable grounds that it is not in the public

interest for the proposal to be approved; or approve of the proposal without qualification or reservation; or defer consideration of or decision upon the same until such time as the Company submits a further proposal or proposals in respect of some other of the matters mentioned in clause 7A1 not covered by the said proposal; or As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 123 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement d require as a condition precedent to the giving of his approval to the said proposal that the Company make such alteration thereto or comply with such conditions in respect thereto as he thinks reasonable and in such a case the Minister shall disclose his reasons for such conditions PROVIDED ALWAYS that where implementation of any proposals hereunder has been approved pursuant to the EP Act subject to conditions or procedures any approval or decision of the Minister under this clause shall if the case so requires incorporate a requirement that the Company make such alterations to the proposals as may be necessary to make them accord with those conditions or procedures. In considering whether to refuse to approve a proposal the Minister is to assess whether or not the implementation of the proposal by itself or together with any one or more of the other submitted proposals will i ii detrimentally affect economic and orderly development in the said State including without limitation infrastructure development in the said State; or be contrary to or inconsistent with the planning and development policies and objectives of the State; or iii detrimentally affect the rights and interests of third parties; or iv detrimentally affect access to and use by others of the lands the subject of any grant or proposed grant to the Company. The right to refuse to approve a proposal conferred by paragraph a may only be exercised in respect of a proposal where the Minister is satisfied on reasonable grounds that a purpose of the proposal is the integrated use of works installations or facilities page 124 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule as defined in subclause 7 of clause 9B for the purpose of that clause as contemplated by clause 9B. It may not be so exercised in respect of a proposal if pursuant to clause 7AD5 the Minister prior to the submission of the proposal advised the Company

in writing that the Minister has no public interest concerns as defined in that clause with the single preferred development as referred to in clause 7AD5a the subject of the submitted proposals and those proposals are consistent as to their substantive scope and with the information provided to the Minister pursuant to clause 7AD5 in respect of that single preferred development. 2 The Minister shall within 2 months after receipt of 3 4 proposals pursuant to clause 7A1 give notice to the Company of his decision in respect to the proposals PROVIDED THAT where a proposal is to be assessed under Part IV of the EP Act the Minister shall only give notice to the Company of his decision in respect to the proposal within 2 months after service on him of an authority under section 457 of the EP Act. If the decision of the Minister is as mentioned in either of paragraphs a c or d of subclause 1 the Minister shall afford the Company full opportunity to consult with him and should it so desire to submit new or revised proposals either generally or in respect to some particular matter. If the decision of the Minister is as mentioned in either of paragraphs c or d of subclause 1 and the Company considers that the decision is unreasonable the Company within 2 months after receipt of the notice mentioned in subclause 2 may elect to refer to arbitration in the manner hereinafter provided the question of the reasonableness of the decision PROVIDED THAT any requirement of the Minister pursuant to the proviso to subclause 1 shall not be referable to arbitration hereunder. A decision of the As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 125 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement Minister under paragraph a of subclause 1 shall not be referable to arbitration under this Agreement. 5 If by the award made on the arbitration pursuant to subclause 4 the dispute is deed in favour of the Company the decision shall take effect as a notice by the Minister that he is so satisfied with and approves the matter or matters the subject of the arbitration. 6 The Company shall implement the approved proposals in accordance with the terms thereof. 7 Notwithstanding clause 14 the Minister may during the implementation of approved proposals approve variations to those proposals.; 3 by inserting after clause 7AC the following new clause Notification of possible proposals 7AD. 1 If the Company upon completion of a prefeasibility study in respect of any matter that would require the

submission and approval of proposals pursuant to this Agreement being proposals which will have as their purpose or one of their purposes the integrated use of works installations or facilities as contemplated by clause 9B for the matter to be undertaken intends to further consider the matter with a view to possibly submitting such proposals it shall promptly notify the Minister in writing giving reasonable particulars of the relevant matter. 2 Within one 1 month after receiving the notification the Minister may if the Minister so wishes inform the Company of the Ministers views of the matter at that stage. 3 If the Company is informed of the Ministers views it shall take them into account in deciding whether or not to proceed with its consideration of the matter and the submission of proposals. 4 Neither the Ministers response nor the Minister choosing not to respond shall in any way limit prejudice or otherwise affect the exercise by the page 126 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule Minister of the Ministers powers or the performance of the Ministers obligations under this Agreement or otherwise under the laws from time to time of the said State. 5 a This subclause applies where the Company has settled upon a single preferred development a purpose of which is the integrated use of works installations or facilities as defined in subclause 7 of clause 9B for the purpose of that clause as contemplated by clause 9B. b For the purpose of this subclause public interest concerns means any concern that implementation of the single preferred development or any part of it will i detrimentally affect economic and orderly development in the said State including without limitation infrastructure development in the said State; or ii be contrary to or inconsistent with the planning and development policies and objectives of the State; or iii detrimentally affect the rights and interests of third parties; or iv detrimentally affect access to and use by others of lands the subject of any grant or proposed grant to the Company. c At any time prior to submission of proposals the Company may give to the Minister notice of its single preferred development and request the Minister to confirm that the Minister has no public interest concerns with that single preferred development. Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule b The Company shall not be entitled to i ii submit proposals to construct any new port or to establish harbour or port works installations or facilities or to expand modify or otherwise vary harbour or works installations or facilities otherwise than within the boundaries of Port Walcott; or generate and supply power take and supply water or dispose of water otherwise than in accordance with the other clauses of this Agreement and subject to any restrictions contained in those clauses; or iii without limiting subparagraphs i and ii submit proposals to construct or establish works installations or

facilities of a type or to make expansions modifications or other variations of works installations or facilities of a type which in the Ministers reasonable opinion this Agreement immediately before the variation date did not permit or contemplate the Company constructing establishing or making as the case may be otherwise than for integration use as contemplated by subclauses 1a 1b or 1c or as permitted by clause 9D; or submit proposals to make a connection as referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e otherwise than on tenure granted under or pursuant to this Agreement from time to time or held pursuant to this Agreement from time to time; or iv As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 141 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement v vi submit proposals to make a connection referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e for the purpose of use as contemplated by subclause 1ci if in the reasonable opinion of the Minister the activity which is the subject of the proposals would give to the holder or holders of the relevant Mining Act 1978 mining lease the benefit of rights or powers granted to the Company under this Agreement over and above the right of access to and use of the relevant works installations or facilities; or submit proposals to make a connection as referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e for the purpose of use as contemplated by subclause 1c and involving the grant of tenure without the prior approval of the Minister; or vii submit proposals to assign sublet transfer or dispose of any works installations or facilities constructed or held under this Agreement or any leases licences easements or other titles under or pursuant to this Agreement for any purpose referred to in this clause. c Notwithstanding the provisions of clauses 7AB and 9D the Minister may defer consideration of or a decision upon a proposal submitted by the Company for a connection as referred to in subclause 1d or a construction expansion modification or other variation as referred to in subclause 1e for the purpose of use or making available for use as referred to in subclauses 1a or 1b until relevant page 142 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River

Agreement Act 1964 Sixth variation agreement Seventh Schedule corresponding proposals under the relevant Integration Agreement have been submitted and those proposals can be approved under that Integration Agreement concurrently with the Ministers approval under this Agreement of the Companys proposal. 3 Any use or making available for use as referred to in subclause 1 or submission of proposals as referred to in subclause 2 in respect of a Related Entity shall be subject to the Company first confirming with the Minister that the Minister is satisfied that the relevant company is a Related Entity. 4 The Company shall give the Minister prior written notice of any significant change other than a temporary one for maintenance or to respond to an emergency proposed in its use or in it making available for use works installations or facilities as referred to in this clause a b from that authorised under this Agreement immediately before the variation date; and subsequently from that previously notified to the Minister under this subclause as soon as practicable before such change occurs. The Company shall also keep the Minister fully informed with respect to any proposed connection as referred to in subclause 1f or 1g or request of the Company for such connection to be allowed. 5 Nothing in this Agreement shall be construed to a exempt another Integration Proponent from complying with or the application of the provisions of its Integration Agreement; or b restrict the Companys rights under clause 13. For the avoidance of doubt the approval of proposals under this Agreement shall not be construed as authorising another Integration Proponent to As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 143 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement undertake any activities under this Agreement or under another Integration Agreement. 6 Nothing in this clause shall be construed to exempt the Company from complying with or the application of the other provisions of this Agreement including without limitation clause 13 and of relevant laws from time to time of the said State. 7 For the purpose of this clause works installations or facilities means any a b c d e f harbour or port works installations or facilities including without limitation stockpiles reclaimers conveyors and wharves; railway or rail spur lines; track structures and systems associated with the operation and maintenance of a railway

including without limitation sidings train control and signalling systems maintenance workshops and terminal yards; train loading and unloading works installations or facilities; conveyors; private roads; g mine aerodrome and associated aerodrome works installations and facilities; h iron ore mining crushing screening beneficiation or other processing works installations or facilities; i mine administration buildings including without limitation offices workshops and medical facilities; j k borrow pits; accommodation and ancillary facilities including without limitation construction page 144 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule camps and in townsites constructed pursuant to and held under any Integration Agreement; l water sewerage electricity gas and telecommunications works installations and facilities including without limitation pipelines transmission lines and cables; and m any other works installations or facilities approved of by the Minister for the purpose of this clause. Transfer of rights to shared works installations or facilities 9C.

1 For the purposes of this clause Relevant Infrastructure means any works installations or facilities as defined in clause 9B7 a constructed or held under another Integration Agreement; b which the Company is using in its activities pursuant to this Agreement; c which the Minister is satisfied after consulting with the Company and the Integration Proponent for that other Integration Agreement i are no longer required by that other Integration Proponent to carry on its activities pursuant to its Integration Agreement because of the cessation of the Integration Proponents mining operations in respect of which such Relevant Infrastructure was constructed or held or because of any other reason acceptable to the Minister; and ii are required by the Company to continue to carry on its activities pursuant to this Agreement; and d in respect of which that other Integration Proponent has notified the Minister it consents As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 145 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement to the Company submitting proposals as referred to in subclause 2. 2 The Company may as an additional proposal pursuant to clause 7A propose a b that it be granted a lease licence or other title over the Relevant Infrastructure pursuant to this Agreement subject to

and conditional upon the other Integration Proponent surrendering wholly or in part and upon such terms as the Minister considers reasonable including any variation of terms to address environmental issues its lease licence or other title over the Relevant Infrastructure; or that the other Integration Proponents lease licence or other title not being a mineral lease mining lease or other right to mine title granted under a Government agreement the Mining Act 1904 or the Mining Act 1978 to the Relevant Infrastructure be transferred to this Agreement to be held by the Company pursuant to this Agreement with such surrender of land from it and variations of its terms as the Minister considers reasonable for that title to be held under this Agreement including without limitation to address environmental issues and outstanding obligations of that other Integration Proponent under its Integration Agreement in respect of that Relevant Infrastructure. The provisions of clause 7AB shall mutatis mutandis apply to any such additional proposal. In addition the Company acknowledges that the Minister may require variations of the other Integration Agreement and/or proposals under it or of this Agreement in order to give effect to the matters contemplated by this clause.

Miscellaneous Licences for Railways 9D. 1 In this clause subject to the context page 146 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule Additional Infrastructure means a Train Loading Infrastructure; b Train Unloading Infrastructure; c a conveyor train unloading and other infrastructure necessary for the transport of iron ore freight goods or other products from the Railway directly or indirectly to port facilities within a loading port in each case located outside a Port; LAA means Land Administration Act 1977 WA; Lateral Access Roads has the meaning given in subclause 3aiv; Lateral Access Road Licence means a miscellaneous licence granted pursuant to subclause 6aiv or subclause 6b as the case may be and according to the requirements of the context describes the area of land from time to time the subject of that licence; Port means any port the subject of the Port Authorities Act 1999 WA or the Shipping and Pilotage Act 1967 WA; Private Roads means Lateral Access Roads and the Companys access roads within a Railway Corridor; Rail Safety Act means the Rail Safety Act 1998 WA; Railway means a standard gauge heavy haul

railway or railway spur line located or to be located as the case may be in or proximate to the Pilbara region of the said State but outside the boundaries of a Port for the transport of iron ore freight goods and other products together with all railway track associated track structures including sidings turning loops over or under track structures supports including supports for equipment or items associated with the use of a railway tunnels bridges train As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 147 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement control systems signalling systems switch and other gear communication systems electric traction infrastructure buildings excluding office buildings housing and freight centres workshops and associated plant machinery and equipment and including rolling stock maintenance facilities terminal yards depots culverts and weigh bridges which railway is or is to be as the case may be the subject of approved proposals under subclause 4 and includes any expansion or extension thereof outside a Port which is the subject of additional proposals approved in accordance with subclause 5; Railway Corridor means prior to the grant of a Special Railway Licence the land for the route of the Railway the subject of that licence access roads other than Lateral Access Roads areas from which stone sand clay and gravel may be taken temporary accommodation facilities for the railway workforce water bores and Additional Infrastructure if any which is the subject of a subsisting agreement pursuant to subclause 3a and after the grant of the Special Railway Licence the land from time to time the subject of that Special Railway Licence; Railway Operation means the construction and operation under this Agreement of the relevant Railway and associated access roads and Additional Infrastructure if any within the relevant Railway Corridor and of the associated Lateral Access Roads in accordance with approved proposals; Railway spur line means a standard gauge heavy haul railway spur line located or to be located in or proximate to the Pilbara region of the said State but outside a Port connecting to a Railway for the transport of iron ore freight goods and other products upon the Railway to directly or indirectly a loading port; Railway Operation Date means the date of the first carriage of iron ore freight goods or other products page 148 Version 02a005 Published on www.legislation.wa.gov.au

As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule over the relevant Railway other than for construction or commissioning purposes; Railway spur line Operation Date means the date of the first carriage of iron ore freight goods or other products over the relevant Railway spur line other than for construction or commissioning purposes; Special Railway Licence means the relevant miscellaneous licence for railway and if applicable other purposes granted to the Company pursuant to subclause 6ai as varied in accordance with subclause 6h or subclause 6i and according to the requirements of the context describes the area of land from time to time the subject of that licence; Train Loading Infrastructure means conveyors stockpile areas blending and screening facilities stackers reclaimers and other infrastructure reasonably required for the loading of iron ore freight goods or other products onto the relevant Railway for transport directly or indirectly to a loading port; and Train Unloading Infrastructure means train unloading infrastructure reasonably required for the unloading of iron ore from the Railway to be processed or blended with other iron ore at processing or blending facilities in the vicinity of that train unloading infrastructure and with the resulting iron ore products then loaded on to the Railway for transport directly or indirectly to a loading port.

Company to obtain prior Ministerial inprinciple approval

2 a If the Company wishes from time to time during the continuance of this Agreement to proceed under this clause with a plan to develop a Railway it shall give notice thereof to the Minister and furnish to the Minister with that notice an outline of its plan. b The Minister shall within one month of a notice under paragraph a advise the Company As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 149 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement whether or not he approves inprinciple the proposed plan. The Minister shall afford the Company full opportunity to consult with him in respect of any decision of the Minister under this paragraph. c The Ministers inprinciple approval in respect of a proposed plan shall lapse if the Company has not submitted detailed proposals to the Minister in respect of that plan in accordance with this clause within 18 months of the Ministers inprinciple approval.

Railway Corridor 3 a If the Minister gives inprinciple approval to a plan of the Company to

develop a Railway it shall consult with the Minister to seek the agreement of the Minister as to i where the Railway will begin and end; and ii iii iv a route for the Railway access roads to be within the Railway Corridor and the land required for that route as well as Additional Infrastructure if any including without limitation areas from which stone sand clay and gravel may be taken temporary accommodation facilities for the railway workforce and water bores; and in respect of Additional Infrastructure if any the nature and capacity of such Additional Infrastructure; and the routes of and the land required for roads outside the Railway Corridor and also outside a Port for access to it to construct the Railway such roads as agreed being Lateral Access Roads. In seeking such agreement regard shall be had to achieving a balance between engineering page 150 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule matters including costs the nature and use of any lands concerned and interests therein and the costs of acquiring the land all of which shall be borne by the Company. The parties acknowledge the intention is for the Company to construct the Railway the access roads for the construction and maintenance of the Railway which are to be within the Railway Corridor and the relevant Additional Infrastructure if any along the centreline of the Railway Corridor subject to changes in that alignment to the extent necessary to avoid heritage environmental or poor ground conditions that are not identified during preliminary investigation work and recognise the width of the Railway Corridor may need to vary along its route to accommodate Additional Infrastructure if any access roads areas from which stone sand clay and gravel may be taken temporary accommodation facilities for the railway workforce and water bores. The provisions of clause 18 shall not apply to this subclause. If the date by which the Company must submit detailed proposals under subclause 4a as referred to in subclause 2c is extended or varied by the Minister pursuant to clause 17 any agreement made pursuant to paragraph a before such date is extended or varied shall unless the Minister notifies the Company otherwise be deemed to be at an end and neither party shall have any claim against the other in respect of it. b c The Company acknowledges that it shall be responsible for liaising with every title holder in respect of the land

affected and for obtaining in a form and substance acceptable to the Minister all unconditional and irrevocable consents of each such title holder to and all statutory As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 151 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement consents required in respect of the land affected for i ii the grant of the Special Railway Licence for the construction operation and maintenance within the Railway Corridor of the Railway access roads and Additional Infrastructure if any to be within the Railway Corridor; and the grant of Lateral Access Road Licences for the construction use and maintenance of Lateral Access Roads over the routes for the Lateral Access Roads agreed pursuant to paragraph a; and iii the inclusion of additional land in the Special Railway Licence as referred to in subclause 6h or subclause 6i in accordance with this clause. For the purposes of this subclause 3c title holder means a management body as defined in the LAA in respect of any part of the affected land a person who holds a mining petroleum or geothermal energy right as defined in the LAA in respect of any part of the affected land a person who holds a lease or licence under the LAA in respect of any part of the affected land a person who holds any other title granted under or pursuant to a Government agreement in respect of any part of the affected land a person who holds a lease or licence in respect of any part of the affected land under any other Act applying in the said State and a person in whom any part of the affected land is vested immediately before the provision of such consents to the Minister as referred to in subclause 4eii including as applying pursuant to subclause 5d. page 152 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule Company to submit proposals for Railway 4 a The Company shall subject to the EP Act the provisions of this Agreement agreement at that time subsisting in respect of the matters required to be agreed pursuant to subclause 3a submit to the Minister by the latest date applying under subclause 2c to the fullest extent reasonably practicable its detailed proposals including plans where practicable and specifications where reasonably required by the Minister and any other details normally required by a local government in whose area any works are to be situated with respect to the undertaking of

the relevant Railway Operation which proposals shall include the location area layout design materials and time program for the commencement and completion of construction or the provision as the case may be of each of the following matters namely i the Railway including fencing if any and crossing places within the Railway Corridor; ii Additional Infrastructure if any within the Railway Corridor; iii temporary accommodation and ancillary temporary facilities for the railway workforce on or in the vicinity of the Railway Corridor and housing and other appropriate facilities elsewhere for the Companys workforce; iv water supply; v energy supplies; vi access roads within the Railway Corridor and Lateral Access Roads both along the routes for those roads agreed between the As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 153 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement Minister and the Company pursuant to subclause 3a; vii any other works services or facilities desired by the Company; and viii use of local labour professional services manufacturers suppliers contractors and materials and measures to be taken with respect to the engagement and training of employees by the Company its agents and contractors. b Proposals pursuant to paragraph a must specify the matters agreed for the purpose pursuant to subclause 3a and must not be contrary to or inconsistent with such agreed matters. c Each of the proposals pursuant to paragraph a may with the approval of the Minister or must if so required by the Minister be submitted separately and in any order as to the matter or matters mentioned in one or more of subparagraphs i to viii of paragraph a and until all of its proposals under this subclause have been approved the Company may withdraw and may resubmit any proposal but the withdrawal of any proposal shall not affect the obligations of the Company to submit a proposal under this subclause in respect of the subject matter of the withdrawn proposal. d The Company shall whenever any of the following matters referred to in this subclause are proposed by the Company whether before or during the submission of proposals under this subclause submit to the Minister details of any services including any elements of the project investigations design and management and any works materials plant equipment and supplies that it proposes to consider obtaining from or having carried out or permitting to be page 154 Version 02a005 Published on

www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule obtained from or carried out outside Australia together with its reasons therefor and shall if required by the Minister consult with the Minister with respect thereto. e At the time when the Company submits the last of the said proposals pursuant to this subclause it shall i furnish to the Ministers reasonable satisfaction evidence of all accreditations under the Rail Safety Act which are required to be held by the Company or any other person for the construction of the Railway; and ii furnish to the Minister the written consents referred to in subclause 3ci and 3cii. f The provisions of clause 7AB shall apply mutatis mutandis to detailed proposals submitted under this subclause. Additional Railway Proposals 5 a If the Company at any time during the currency of a Special Railway Licence desires to construct a Railway spur line connecting to the Railway the subject of that Special Railway Licence or desires to significantly modify expand or otherwise vary its activities within the land the subject of the Special Railway Licence that are the subject of this Agreement and that may be carried on by it pursuant to this Agreement other than by the construction of a Railway spur line beyond those activities specified in any approved proposals for that Railway it shall give notice of such desire to the Minister and furnish to the Minister with that notice an outline of its proposals in respect thereto including without limitation such matters mentioned in subclause 4a as are relevant or as the Minister otherwise requires. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 155 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement b c If the notice relates to a Railway spur line or to the construction of Train Loading Infrastructure or Train Unloading Infrastructure on land outside the then Railway Corridor the Minister shall within one month of receipt of such notice advise the Company whether or not he approves in principle the proposed construction of such spur line Train Loading Infrastructure or Train Unloading Infrastructure. If the Minister gives in principle approval the Company may but not otherwise submit detailed proposals in respect thereof provided that the provisions of subclause 3 shall mutatis mutandis apply prior to submission of detailed proposals in respect thereof. Subject to the EP Act

the provisions of this Agreement and agreement at that time subsisting in respect of any matters required to be agreed pursuant to subclause 3a as referred to in paragraph b the Company shall submit to the Minister within a reasonable timeframe as determined by the Minister after receipt of the notice referred to in paragraph a or in the case of a notice referred to in paragraph b the giving of the Ministers in principle consent as referred to in that paragraph detailed proposals in respect of the proposed construction of such Railway spur line Train Loading Infrastructure Train Unloading Infrastructure or other proposed modification expansion or variation of its activities including such of the matters mentioned in subclause 4a as the Minister may require. d The provisions of subclause 4 with the date for submission of proposals being read as the date or time determined by the Minister under paragraph c and the reference in subclause 4eii to subclause 3ci being read as a reference to subclause 3ciii and page 156 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Sixth variation agreement Seventh Schedule of clause 7AB shall mutatis mutandis apply to detailed proposals submitted pursuant to this subclause.

Grant of Tenure 6 a On application made by the Company to the Minister in such manner as the Minister may determine not later than 3 months after all its proposals submitted pursuant to subclause 4a have been approved or deemed to be approved and the Company has complied with the provisions of subclause 4e the State notwithstanding the Mining Act 1978 shall cause to be granted to the Company i a miscellaneous licence to conduct within the Railway Corridor and in accordance with its approved proposals all activities including the taking of stone sand clay and gravel the provision of temporary accommodation facilities for the railway workforce and subject to the Rights in Water and Irrigation Act 1914 WA the operation of water bores necessary for the planning design construction commissioning operation and maintenance within the Railway Corridor of the Railway access roads and Additional Infrastructure if any the Special Railway Licence such licence to be granted under and subject to except as otherwise provided in this Agreement the Mining Act 1978 in the form of the Second Schedule hereto and subject to such terms and conditions as the Minister for Mines may from time to time consider reasonable and at a rental

As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 161 Iron Ore Robe River Agreement Act 1964 Seventh Schedule Sixth variation agreement h i j If additional proposals are approved in accordance with subclause 5 for the construction of a Railway spur line outside the then Railway Corridor the Minister for Mines shall include the area of land within which such construction is to occur in the Special Railway Licence by endorsement. The area of such land may be included notwithstanding that the survey of the land has not been completed but subject to correction to accord with the survey when completed at the Companys expense. If additional proposals are approved in accordance with subclause 5 for the construction of Train Loading Infrastructure or Train Unloading Infrastructure outside the then Railway Corridor the Minister for Mines shall include the area of such land within which such infrastructure is approved for construction in the Special Railway Licence by endorsement. The area of such land may be included notwithstanding that the survey of the land has not been completed but subject to correction to accord with the survey when completed at the Companys expense. The provisions of this subclause shall not operate so as to require the State to cause a Special Railway

Licence or a Lateral Access Road Licence to be granted or any land included in the Special Railway Licence as mentioned above until all processes necessary under any laws relating to native title to enable that grant or inclusion of land to proceed have been completed. Construction and operation of Railway 7 a Subject to and in accordance with approved proposals the Rail Safety Act and the grant of the relevant Special Railway Licence and any associated Lateral Access Road Licences the Company shall in a proper and workmanlike manner and in accordance with recognised standards for railways of a similar nature operating under similar conditions construct the Railway and associated Additional Infrastructure and access roads within the Railway Corridor and shall also construct inter alia any necessary sidings crossing points bridges signalling switches and other works and appurtenances and provide for crossings and where appropriate and required by the Minister grade separation or other protective devices including flashing lights and boom gates at places where the Railway crosses or intersects with major roads or existing railways. b The Company shall while the holder of a Special Railway Licence i ii keep the Railway the subject of that licence in an operable state; and ensure that the Railway the subject of that licence is operated in a safe and proper manner in compliance with all applicable laws from time to time; and iii without limiting subparagraph ii ensure that the obligations imposed under the Rail Safety Act on an owner and an operator as those terms are therein defined are complied with in connection with the Railway the subject of that licence. Nothing in this Agreement shall be construed to exempt the Company or any other person from compliance with the Rail Safety Act or limit its application to the Companys operations generally except as otherwise may be provided in that Act or regulations made under it. c The Company shall provide crossings for livestock and also for any roads other railways conveyors pipelines and other utilities which

RPMC Mitsui NML CLIA and PIA are collectively referred to in this Agreement as the Robe Participants. page 184 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement RECITALS A. The State RRL and the Robe Participants are now the parties to the agreement dated 18 November 1964 approved by and scheduled to the Iron Ore Robe River Agreement Act 1964 and which as subsequently added to varied or amended is referred to in this Agreement as the Principal Agreement. B. The parties wish to vary the Principal Agreement. THE PARTIES AGREE AS FOLLOWS 1. Interpretation Subject to the context the words and expressions used in this Agreement have the same meanings respectively as they have in and for the purpose of the Principal Agreement. 2. Ratification and Operation 1 The State shall introduce and sponsor a Bill in the State Parliament of Western Australia prior to 31 December 2011 or such later date as may be agreed between the parties hereto to ratify this Agreement. The State shall endeavour to secure the timely passage of such Bill as an Act. 2 The provisions of this Agreement other than this clause and clause 1 will not come into operation until the day after the day on which the Bill referred to in subclause 1 has been passed by the State Parliament of Western Australia and commences to operate as an Act. 3 If by 30 June 2012 the said Bill has not commenced to operate

as an Act then unless the parties hereto otherwise agree this Agreement will then cease and determine and no party hereto will have any claim against any other party hereto with respect to any matter or thing arising out of done performed or omitted to be done or performed under this Agreement. 4 On the day after the day on which the said Bill commences to operate as an Act all the provisions of this Agreement will operate and take effect despite any enactment or other law. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 185 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement 3. Variation of Principal Agreement The Principal Agreement is varied as follows 1 in clause 1 by a inserting in the appropriate alphabetical positions the following new definitions Eligible Existing Tenure means a i a miscellaneous licence or general purpose lease granted to the Company under the Mining Act 1978; or ii a lease or easement granted to the Company under the LAA and not clearly to the satisfaction of the Minister granted under or pursuant to or held pursuant to this Agreement; or b an application by the Company for the grant to it of a tenement referred to in paragraph ai which application has not clearly to the satisfaction of the Minister been made under or pursuant to this Agreement and as the context requires the tenement granted pursuant to such an application where that tenure was granted or that application was made as the case may be on or before 1 October 2011; LAA means the Land Administration Act 1997 WA; Relevant Land in relation to Eligible Existing Tenure or Special Advance Tenure means the land which is the subject of that Eligible Existing Tenure or Special Advance Tenure as the case may be; second variation date means the date on which clause 3 of the variation agreement made on or about 7 November 2011 between the State and the Company comes into operation; page 186 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement Special Advance Tenure means a b a miscellaneous licence or general purpose lease requested under clause 82b to be granted to the Company under the Mining Act 1978; or an easement or a lease requested under clause 82b to be granted to the Company under the LAA and as the context requires such tenure if granted; b inserting after the words reference in this

Agreement to an Act shall include the amendments to such Act for the time being in force and also any Act passed in substitution therefor or in lieu thereof and the regulations for the time being in force thereunder the words and for the avoidance of doubt this principle subject to the context and without limitation to its application to other Acts may apply in respect of references to the Land Act and the Mining Act notwithstanding references in this Agreement to the LAA and the Mining Act 1978;; 2 by inserting after clause 7F the following new clauses Community development plan 7G. 1 In this clause the term community and social benefits includes a b assistance with skills development and training opportunities to promote work readiness and employment for persons living in the Pilbara region of the said State; regional development activities in the Pilbara region of the said State including partnerships and sponsorships; c contribution to any community projects town services or facilities; and d a regionally based workforce. 2 The Company acknowledges the need for community and social benefits flowing from this Agreement. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 187 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement 3 The Company agrees that a b it shall prepare a plan which describes the Companys proposed strategies for achieving community and social benefits in connection with its activities under this Agreement; and the Company shall not later than 3 months after the second variation date submit to the Minister the plan prepared under paragraph a and confer with the Minister in respect of the plan. 4 The Minister shall within 2 months after receipt of a plan submitted under subclause 3b either notify the Company that the Minister approves the plan as submitted or notify the Company of changes which the Minister requires be made to the plan. If the Company is unwilling to accept the changes which the Minister requires it shall notify the Minister to that effect and either party may refer to arbitration hereunder the question of the reasonableness of the changes required by the Minister. 5 The effect of an award made on an arbitration pursuant to subclause 4 shall be that the relevant plan submitted by the Company pursuant to subclause 3b shall with such changes required by the Minister under subclause 4 as the arbitrator determines to be reasonable with or without modification by the arbitrator be deemed to be

the plan approved by the Minister under this clause. 6 At least 3 months before the anticipated submission of proposals relating to a proposed development pursuant to clauses 7A or 9D the Company must unless the Minister otherwise requires give to the Minister information about how the proposed development may affect the plan approved or deemed to be approved by the Minister under this clause. This obligation operates in relation to all proposals page 188 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement submitted on or after the date that is 4 months after the date when a plan is first approved or deemed to be approved under this clause. 7 The Company shall at least annually report to the Minister about the Companys implementation of the plan approved or deemed to be approved by the Minister under this clause. 8 At the request of either of them made at any time and from time to time the Minister and the Company shall confer as to any amendments desired to any plan approved or deemed to be approved by the Minister under this clause and may agree to amendment of the plan or adoption of a new plan. Any such amended plan or new plan will be deemed to be the plan approved by the Minister under this clause in respect of the development to which it relates. 9 During the currency of this Agreement the Company shall implement the plan approved or deemed to be approved by the Minister under this clause. Local participation plan 7H. 1 In this clause the term local industry participation benefits means a b c the use and training of labour available within the said State; the use of the services of engineers surveyors architects and other professional consultants experts specialists project managers and contractors available within the said State; and the procurement of works materials plant equipment and supplies from Western Australian suppliers manufacturers and contractors. As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 189 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement 2 The Company acknowledges the need for local industry participation benefits flowing from this Agreement. 3 The Company agrees that it shall not later than 3 months after the second variation date prepare and provide to the Minister a plan which contains a b c d a clear statement on the strategies which the Company will use and require a

third party as referred to in subclause 7 to use to maximise the uses and procurement referred to in subclause 1; detailed information on the procurement practices the Company will adopt and require a third party as referred to in subclause 7 to adopt in calling for tenders and letting contracts for works materials plant equipment and supplies stages in relation to a proposed development and how such practices will provide fair and reasonable opportunity for suitably qualified Western Australian suppliers manufacturers and contractors to tender or quote for works materials plant equipment and supplies; detailed information on the methods the Company will use and require a third party as referred to in subclause 7 to use to have their respective procurement officers promptly introduced to Western Australian suppliers manufacturers and contractors seeking such introduction; and details of the communication strategies the Company will use and require a third party as referred to in subclause 7 to use to alert Western Australian engineers surveyors architects and other professional consultants experts specialists project page 190 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement managers and consultants and Western Australian suppliers manufacturers and contractors to services opportunities and procurement opportunities respectively as referred to in subclause 1. It is acknowledged by the Company that the strategies of the Company referred to in subclause 3a will include strategies of the Company in relation to supply of services labour works materials plant equipment or supplies for the purposes of this Agreement. 4 At the request of either of them made at any time and from time to time the Minister and the Company shall confer as to any amendments desired to any plan provided under this clause and may agree to the amendment of the plan or the provision of a new plan in substitution for the one previously provided. 5 At least 6 months before the anticipated submission of proposals relating to a proposed development pursuant to clauses 7A or 9D the Company must unless the Minister otherwise requires give to the Minister information about the implementation of the plan provided under this clause in relation to the proposed development. This obligation operates in relation to all proposals submitted on or after the date that is 7 months after the date when a plan is first provided under this

clause. 6 During the currency of this Agreement the Company shall implement the plan provided under this clause. 7 The Company shall a in every contract entered into with a third party where the third party has an obligation or right to procure the supply of services labour works materials plant equipment or supplies for or in connection with a proposed development ensure that the contract contains appropriate provisions As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 191 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement requiring the third party to undertake procurement activities in accordance with the plan provided under this clause; and b use reasonable endeavours to ensure that the third party complies with those provisions.; 3 in clause 81b by a inserting a comma after Mining Act; and b inserting after subparagraph iii the following new paragraph and notwithstanding clause 9B2biv detailed proposals may refer to activities on tenure which is proposed to be granted pursuant to this paragraph b as if that tenure was granted pursuant to this Agreement but this does not limit the powers or discretions of the Minister under this Agreement or the Minister responsible for the administration of any relevant Act with respect to the grant of the tenure;; 4 by inserting after clause 82 the following new subclauses Application for Eligible Existing Tenure to be held pursuant to this Agreement 2a a The Minister may at the request of the Company from time to time made during the continuance of this Agreement approve Eligible Existing Tenure becoming held pursuant to this Agreement on such conditions as the Minister sees fit including without limitation and notwithstanding the Mining Act 1978 and the LAA as to the surrender of land the submission of detailed proposals and the variation of the terms and conditions of the Eligible Existing Tenure including for the Eligible Existing Tenure to be held pursuant to this Agreement and for the more efficient use of the Relevant Land and the Minister may from time to time vary such conditions in order to extend any specified time for the doing of any thing or otherwise with the agreement of the Company. page 192 Version 02a005 Published on www.legislation.wa.gov.au As at 03 Jan 2014 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement b Eligible Existing Tenure the subject of an approval by the Minister under this subclause will be held by the

Company pursuant to this Agreement i ii iii if the Ministers approval was not given subject to conditions on and from the date of the Ministers notice of approval; unless paragraph iii applies if the Ministers approval was given subject to conditions on the date on which all such conditions have been satisfied; and if the Ministers approval was given subject to a condition requiring that the Company submit detailed proposals in accordance with this Agreement on the later of the date on which the Minister approves proposals submitted in discharge of that specified condition and the date upon which all other specified conditions have been satisfied but the Company is authorised to implement any approved proposal to the extent such implementation is consistent with the then terms and conditions of the Eligible Existing Tenure pending the satisfaction of any conditions relating to the variation of the terms or conditions of the Eligible Existing Tenure. Where this paragraph iii applies prior to any approval of proposals and satisfaction of other conditions the relevant tenure will be treated for but only for the purposes of clause 9B2biv as tenure held pursuant to this Agreement. Application for Special Advance Tenure to be granted pursuant to this Agreement

2b Without limiting clause 81c the Minister may at the request of the Company from time to time made during the continuance of this Agreement approve Special Advance As at 03 Jan 2014 Version 02a005 Published on www.legislation.wa.gov.au page 193 Iron Ore Robe River Agreement Act 1964 Eighth Schedule Seventh variation agreement Tenure being granted to the Company pursuant to this Agreement if a b the Company proposes to submit detailed proposals under this Agreement other than under clause 9D to construct works installations or facilities on the Relevant Land and the Companys request is so far as is practicable made unless the Minister approves otherwise no less than 6 months before the submission of those detailed proposals; and the Minister is satisfied that it is necessary and appropriate that Special Advance Tenure rather than tenure granted under or pursuant to the other provisions of this Agreement be used for the purposes of the proposed works installations or facilities on the Relevant Land and if the Minister does so approve c d notwithstanding the Mining Act 1978 or the LAA the appropriate authority or instrumentality of the State shall obtain the consent of the Minister to the form and substance of the Special Advance

Tenure prior to its grant which for the avoidance of doubt neither the State nor the Minister is obliged to cause to the Company; and if the Company does not submit detailed proposals relating to construction of the relevant works installations or facilities on the Relevant Land within 24 months after the date of the Ministers approval or such later time subsequently allowed by the Minister or if submitted the Minister does not approve such detailed proposals the Special Advance Tenure if then granted shall be surrendered at the request of the Minister. 2c The decisions of the Minister under subclauses 2a and 2b shall not be referable to arbitration and any approval of the Minister under this clause shall not in any way limit prejudice or otherwise affect the exercise by the Minister of the Ministers powers or the performance of the Ministers

PRODUCTI ONSHARING CONTRACT BETWEEN THE GOVERNMENT OF THE REPUBLIC OF KENYA AND ERHCA GCPROFOND LTD. This CONTRACT is made and entered into on the day of

by and between the Government of the Republic of Kenya hereinafter referred to as the Government represented for the purpose of this Contract by the Minister for the time being responsible for energy hereinafter referred to as the Minister and ERHC AGC Profond Ltd. a company registered in the British Virgin Islands and a wholly owned subsidiary of ERHCEnergy Inc. A Colorado Corporation with a place of business at 5444 Westheimer Road Houston Texas 77056 USA hereinafter referred to as The Contractor. The Government and the Contractor herein are referred to either individually as Party or collectively as Parties. WITNESSETH WHEREAS the title to all Petroleum resources existing in their natural conditions in Kenya is vested in the Government and WHEREAS the Government wishes to promote and encourage the exploration and the development of Petroleum resources in and throughout the Contract Area as defined herein and WHEREAS the Contractor desires to join and assist the Government in accelerating the exploration and development of the potential Petroleum resources within the Contract Area and WHEREAS the Contractor has the financial ability technical competence and professional skills necessary to carry out the Petroleum Operations hereinafter described and WHEREAS in accordance with the Petroleum Exploration and Production Act Cap 308 laws of Kenya

1986 enacted by the Parliament of the Republic of Kenya agreements in the form of production sharing contracts may be entered between the Government and capital investors NOW THEREFORE in consideration of the undertaking and covenants herein contained the Parties hereby agree as follows Production Sharing Contract Block 11 A Ministry of Energy Page 5 PART I SCOPE AND INTERPRETATION 1 ASCOPE This Contract is a production sharing contract in accordance with the provisions herein contained and is within the meaning of the term petroleum agreement under section 2 of the Act and is an enforceable contract between the Government and the Contractor. The Contractor shall be responsible to the Government for the execution of the Petroleum Operations contemplated hereunder in accordance with the provisions of this Contract and is hereby appointed and constituted the exclusive legal Contractor to conduct Petroleum Operations in the Contract Area for the term hereof b Provide all capital machinery equipment technology and personnel necessary for the conduc

to Petroleum Operations shall bear the risk of Petroleum Costs required in carrying out Petroleum Operations and shall therefore have an economic interest in the development of the Petroleum deposits in the Contract Area. Such costs shall be included in Petroleum Costs recoverable as provided in clause 27 hereof. During the term of this Contract the total production achieved in the conduct of the Petroleum Operations shall be divided between the parties hereto in accordance with the provisions of clause 27 hereof.

1. BINTERPRETATION

In this Contract words in the singular include the plural and vice versa and except where the context otherwise requires Accounting Procedure means the accounting procedures and requirements set out in Appendix B attached hereto and made an integral part thereof. The Act means the Petroleum Exploration and Production Act Cap 308 laws of Kenya 1986 enacted by the Parliament of the Republic of Kenya.

Additional Exploration Period means the First Additional Exploration Period and/or Second Additional Exploration Period.

Affiliate means a Person directly or indirectly controlling or controlled by or under direct or indirect common control with another Person and Control means the ownership of at least fifty percent (50%) of voting rights in that Person.

Production Sharing Contract Block 11A Ministry of Energy Page 6

Appointee means a body corporate wholly owned or controlled by the Government of the Republic of Kenya and appointed for the purposes of this Contract.

Barrel means a quantity consisting of 158.987 litres at standard atmospheric pressure of 1.01325 bars and temperature of fifteen degrees centigrade.

15C Barrel of Oil Equivalent means that 6000 standard cubic feet of Natural Gas at standard temperature 15°C and pressure 1.01325 bars is equivalent to one Barrel of Crude Oil for the purposes of volumetric calculations under this Contract.

Blocks means area covered by separate production sharing contracts between the Government and the Contractor.

Calendar Quarter or Quarter means a period of three (3) consecutive months commencing with the first day of January, April, July and October.

Calendar Year means a period of twelve (12) consecutive months commencing with the first day of January in any year and ending the last day of December in that year according to Gregorian calendar.

Change in Control means any direct or indirect change in Control of a Party whether through mergers, sale of shares or other equity interests or otherwise through a single transaction or series of related transactions.

ansactions from one or more transferors to one or more transferees Commercial Discovery means a tested and delineated accumulation of Petroleum in an Exploratory Well which has been duly evaluated in accordance with the provisions of clause 19 and whose reserves are certified by a competent 3rd party appointed by the Contractor as being capable of Commercial Production according to good international financial and petroleum industry practice after the consideration of all pertinent technical and economic data Commercial Production means the quantity of Petroleum produced on a regular basis from a Commercial Discovery not used in Petroleum Operations but saved and sold at a value exceeding the combined exploring, finding, appraising, developing, producing, transporting and marketing costs of that production Constitution means the Constitution of the Republic of Kenya Contract means this agreement upon execution Contract Area means Block 11A the geographic area covered by this Contract and described in Appendix A and any part thereof not previously surrendered Contract Year means twelve (12) consecutive calendar months from the Effective Date or from the anniversary thereof Production Sharing Contract Block 11A Ministry of Energy Page 7 Contractor means the Entities and their respective successors or any assignee or assignees of any paying Participating Interest provided that the assignment of any such paying Participating Interest is accomplished pursuant to the provisions of clauses 64 or 35 hereof and such term will include the Government or its Appointee in those certain Development Areas in which the Government exercises its right to acquire a fully paying Participating Interest in accordance with Clause 28.2 Cost Oil shall have the meaning set out in subclause 27.1 Crude Oil means all hydrocarbons regardless of gravity that are produced at the wellhead in liquid state at atmospheric pressure asphalt ozokerites and the liquid hydrocarbons known as distillates or Natural Gas Liquids obtained from Natural Gas by condensation or extraction Customs Duties means duties, levies and other taxes on imports which are payable as a result of the importation of the item or items under consideration Decommissioning Plan means the plan for the decom

commissioning abandonment recovery and removal or if applicable redeployment of wells flow lines pipelines facilities infrastructure and assets related to Petroleum Operations Delivery Point means the inlet flange point F.O.B. Kenya export pipeline or loading facility at which Natural Gas or Crude Oil reaches the metering station of a pipeline or the inlet flange of the lifting tank ship intake pipe or such other point that may be agreed by the Parties Development Area means the area delimited in a Development Plan adopted under Clause 20 hereof Development Period means the period for the development of a Commercial Discovery which begins on the date of the designation of a Development Area in accordance with the provisions of Clause 20 hereof and continues for the term set out in clause 26 Development Plan means the programme for drilling testing and completing all wells meant for production or pressure maintenance installation of a gathering system between wells and installation and commissioning of any processing and transportation facilities necessary to deliver production to the Point of Sale all of which are contained in a plan for development that is prepared and adopted under Clause 20 hereof Discount Rate means the sum of one and the decimal equivalent of the percentage increase in the United States Consumer Price Index as reported for the first time in the monthly publication International Finance Statistics of the International Monetary Fund between the month of the Effective Date and the month when such costs were incurred Production Sharing Contract Block 11 A Ministry of Energy Page 8 Discovery means the Discovery of Petroleum Economic Limit means that point in the life of field where expected Revenue to Contractor from Petroleum Operations is insufficient to cover the operating costs to continue Petroleum Operations in accordance with the requirements of the Contract. In this context Revenue means the expected revenues derived from the conveyance and sale of Petroleum at the Delivery Point together with any firm tariff income earned by the field facilities if any Effective Date means the date falling ninety days after this Contract is executed by the Government and the Contractor Evaluation means the logical cataloguing interpretation and assessment of economic and or technical data and information in order to understand the implications and impact of such data and information on technical and business decisions with respect to Petroleum Operations and shall be inclusive of logging coring and testing an Exploratory Well but exclusive of drillingreamingside tracking or similar activities Execution Date means the

deposit quoted at 11 a.m. by the National Westminster Bank Plc or any other bank agreed by the parties on the first banking day of each month for which interest is due

Lower Thermal Heat Rate means the Btu content of a fuel by international Standards used for comparison of thermal value of a hydrocarbon

Market Evaluation Report means a report for a potentially commercial Natural Gas Discovery by the Contractor including but not limited to identifying potential markets for the Natural Gas expected volumes for such markets infrastructure potentially required to access such markets and expectations of price for the Natural Gas supplied to such markets

Maximum Efficient Rate means the rate at which the maximum ultimate economic petroleum recovery is obtained from a commercial field without excessive rate of decline in reservoir pressure and consistent with good international petroleum industry practice

Minimum Expenditure means the minimum expenditure obligations of the Contractor during each of the Exploration Periods as specified in Clause 4 herein

Minister means the Minister for the time being responsible for energy or his designated representative

Ministry means the Ministry for the time being responsible for energy or its designated representative

Production Sharing Contract Block 11A Ministry of Energy Page 10

Natural Gas means hydrocarbons that are in a gaseous phase at atmospheric conditions of temperature

and pressure including wet mineral gas dry mineral gas casing head gas and residue gas remaining after the extraction or separation of liquid hydrocarbons from wet gas and non hydrocarbon gas produced in association with liquid or gaseous hydrocarbons

Natural Gas Liquids or NGLs means liquefiable hydrocarbons obtained from Natural Gas by condensation or extraction including but not limited to ethane propane butane pentanes and heavies

Normal Cubic Meter means the volume of gas that occupies a cubic meter when this gas is at a temperature of 15 degrees Celsius and a pressure of 1013.25 millibar

Offshore shall mean any area which lies below the elevation of the lowest tide level of the shoreline in question for the 10 years preceding this Contract

Participation Agreement means that model agreement as set out in Appendix C between the Government and Contractor that sets guidelines with respect to the relationship between the Government and Contractor in connection with their respective activities obligations and responsibilities

possibilities and which shall only come into force after negotiation of a mutually acceptable form and on signature by the Parties upon the election of the Government to acquire hold and execute a fully paying working Participating Interest in one or more Development Areas in accordance with Clause 28 of this Contract. Participating Interest or Participating Interest shall mean as the context requires the fully paying Participating Interest expressed as a percentage and held by the Entities in and to this Contract and the Contract Area and will include the Government or its Appointee in those certain Development Areas in _____ which _____ the Government exercises its right to acquire such a fully paying Participating Interest in accordance with Clause 28.

Person means any legal Contractor, corporeal or otherwise. **Petroleum** means Crude Oil and Natural Gas. **Petroleum Costs** means those expenditures made and obligations incurred by the Contractor in carrying out Petroleum Operations hereunder determined in accordance with this Contract and the Accounting Procedure attached hereto in Appendix B and made apart thereof. **Petroleum Operations** means all or any of the operations authorised under this Contract related to the exploration for finding appraisal development extraction production decommissioning separation and treatment storage transportation and sale or disposal of Petroleum up to the point of export or the agreed Delivery Point in Kenya or the point of entry into a refinery and includes Natural Gas processing liquefaction and _____ compressed _____ Natural Gas operations but does not include petroleum refining operations.

Production Sharing Contract Block 11 Ministry of Energy Page 11. **Point of Sale** means Delivery Point unless otherwise specified. **Profit Oil** shall have the meaning set out in subclause 27.3. **Regulations** mean the Petroleum Exploration and Production Regulations. **Second Additional Exploration Period** means the second period of two (2) contract years after the First Additional Exploration Period pursuant to subclause 24 as may be extended under this Contract. **Second Tier Amount** shall have the meaning set out in subclause 27.3. **Semester** means a period of six (6) consecutive months commencing with the first day of January or the first day of July of a Calendar Year. **Stub Year** shall mean that portion of the first Contract Year between the Effective Date and the last day of the Calendar Year then in progress. **Threshold Prices** shall have the meaning set out in subclause 27.3e.

pect of each Exploration Period as set forth in subclauses 41a, 41b and 41c shall relieve the Contractor of the corresponding expenditure obligation thereto. If the drilling of an Exploratory Well is discontinued prior to reaching the minimum depth herein specified because that well has encountered the basement an impenetrable substance or any condition which in accordance with the good international petroleum industry practice would make it unsafe or impractical to continue drilling the minimum depth obligation in respect of that well shall be deemed to be fulfilled. A well drilled to evaluate a Discovery under an Evaluation work programme pursuant to subclauses 192 and 193 shall not be considered to be an Exploratory Well for the purpose of fulfilling the required number of Exploratory Wells unless the written consent of the Minister is obtained. The minimum exploration expenditure set forth in subclause 41 is expressed in U.S. dollars of the year of the Effective Date. In any Contract Year of either the Initial Exploration Period or any Additional Exploration Period for the purpose of comparison of the actual costs incurred and paid by the Contractor with the minimum exploration expenditure the actual costs incurred and paid by the Contractor for seismic operations and the drilling of Exploratory Wells during that Contract Year shall be converted into constant U.S. dollars by dividing the costs by the Discount Rate. If during either the Initial Exploration Period or the First Additional Exploration Period the Contractor exceeds the minimum work obligation in accordance with subclause 41 then such excess may be credited toward the respective obligation of the next succeeding Additional Exploration Period or periods. Production Sharing Contract Block 11A Ministry of Energy Page 157812 Upon entry into each exploration period Contractor shall provide bank guarantee of 50 and parent company guarantee of 50 guaranteeing its full minimum work and expenditure obligations for each exploration period guaranteeing the Contractor's minimum work and expenditure obligations under subclause 41 hereof. If at the end of either the Initial Exploration Period or of the First Second Additional Exploration Period or upon the date of termination of this Contract whichever occurs first the Contractor has not fulfilled all its minimum work obligations under subclause 41 hereof the Contractor shall pay the Government the minimum monetary obligation in respect of all the work for the expiring period multiplied by the Discount Rate and calcul

ated on the last month of that Exploration Period and or the shortfall if any between the amount expended in accordance with sub clause 44 and the minimum monetary obligation for the expiring Exploration

Period multiplied by the Discount Rate. 5. SIGNATURE BONUS AND SURFACE FEES The Contractor shall pay a Signature Bonus of US\$310,000.00 on or before the Execution Date of this contract by means of a direct bank transfer to an accepted Ministry bank account and in accordance with applicable law. The Contractor shall pay on or before the beginning of the relevant Contract Year to the Ministry the following surface fees: i Five Dollars USD 5.00 per square kilometre per annum during the Initial Exploration Period ii Ten Dollars USD 10.00 per square kilometre per annum during the First Additional Exploration Period iii Fifteen Dollars USD 15.00 per square kilometre per annum during the Second Additional Exploration Period iv One hundred Dollars USD 100.00 per square kilometre per annum during the Development and Production Periods 3 The surface fees shall be calculated on the basis of the surface area of the Contract Area on the date those payments are due. A fee payable under sub clause 52 is not refundable and late payments shall attract interest in accordance with sub clause 34.2. Production Sharing Contract Block 11 A Ministry of Energy Page 161

The Minister may terminate this Contract by giving the Contractor written notice if the Contractor 6. TERMINATION AND WITHDRAWAL a Failure to make any payment to the Government or the Minister required under this Contract for a period exceeding sixty (60) days or b In material breach of any other obligation under this Contract or c becomes insolvent makes a composition with its creditors or goes into liquidation other than for reconstruction or amalgamation. 23 The period of notice in respect of sub clause 6.1 hereof shall be two (2) months and in any other case three (3) months but if the Contractor remedies the breach within the period of notice the Minister shall withdraw the notice. Where the Minister reasonably believes the Contractor is using its best effort to remedy the default the Minister may extend the notice accordingly. When this Contract is terminated or expires in whole or in part the Contractor shall conclude the Petroleum Operations in the area as to which this Contract has terminated or expired in an orderly manner minimising harm to the Government and third parties. Production Sharing Contract Block 11 A Ministry of Energy Page 171 23 45 67 PART III RIGHTS AND OBLIGATIONS OF THE CO

TRACTOR 7. RIGHTS OF THE CONTRACTOR The Contractor shall have the right to carry out the Petroleum Operations within the Contract Area subject to the provisions of this Contract for the term hereof. The Contractor is granted the right to enter upon the Contract Area and conduct Petroleum Operations there but permission may be granted by the Government to other Persons to search for and mine minerals other than Petroleum so long as they do not interfere with the Petroleum Operations and easements and rights of way may be granted to other Persons for the benefit of land adjacent to the Contract Area. The Ministers shall facilitate on behalf of the Contractor any permit necessary to enable the Contractor to use the water in the Contract Area for the purpose of the Petroleum Operations but the Contractor shall not unreasonably deprive the users of land domestic settlement or cattle watering place of the water supply to which they are accustomed. The Contractor may for the purpose of the Petroleum Operations use gravel sand clay and stone in the Contract Area but not in a Trust land without a licence granted under section 37 of the Trust Land Act or in other private land without the consent of the owner and on a beach, foreshore or reef without the consent of the Minister. Subject to the provisions of section 10 of the Act and of regulation 6 of the Regulations and subject to the provisions of Chapter V and Articles 261 and 262 in the 5th schedule of the Constitution and Part IV of the Trust Land Act the Contractor may exercise all rights granted to him by this Contract. Subject to the approval of the applicable Development Plan the Contractor shall have the right to freely consume or reinject without being subject to any taxes, royalties or other payments Crude Oil and Natural Gas from the Contract Area for the purpose of conducting the Petroleum Operations. As a result of conducting the Petroleum Operations the Contractor shall have the right without any additional payment except for those payments provided for in this Contract to enter into contracts with the other Parties for the services of their personnel or to provide services in relation to the Petroleum Operations. Production Sharing Contract Block 11A Ministry of Energy Page 18b Arrange financing for a portion of the capital costs of the development operation to be undertaken by the Contractor as determined by the Contractor or enter into agreements providing for the transportation and terminaling of Crude Oil and Natural Gas, establish a marketing agreement with one or more of the parties to market the Crude Oil and Natural Gas on behalf of the Contractor on international markets and enter

ter into any other agreements that may be necessary to conduct the Petroleum Operations.

8. GENERAL STANDARDS OF CONDUCT

1 The Contractor shall carry out the Petroleum Operations diligently and in accordance with good international petroleum industry practice.

2 In particular the Contractor shall ensure that all machinery, plant, equipment and installations used by the Contractor in connection with the Petroleum Operations are of proper and accepted construction and are kept in good repair.

Use the resources of the Contract Area as productively as possible and ensure that good international petroleum industry practice is used to prevent Petroleum discovered and produced or mud or any other fluids or substances escaping or being wasted.

c. prevent damage to adjacent strata which bear Petroleum or water and prevent water entering through wells into strata bearing petroleum except where water injection methods are used for secondary recovery operations.

d. properly confine Petroleum in receptacles constructed for that purpose and not place Crude Oil in an earthen reservoir except temporarily in an emergency.

e. Dispose of waste oil, salt water and refuse in accordance with good international petroleum industry practice, avoiding pollution.

3 In conducting the Petroleum Operations the Contractor may use any of its Affiliates, any Affiliate of the entities constituting the Contractor or independent contractors. The Contractor however shall remain responsible for the performance of its obligations.

Production Sharing Contract Block 11

A Ministry of Energy Page 19

1234569. JOINT LIABILITY AND INDEMNITY

Where a Contractor consists of more than one Person, their liability shall be joint and several.

The Contractor shall cause as little damage as possible to the surface of a Contract Area and to trees, crops, buildings and other property thereon.

shall forthwith repair any damage caused and shall pay reasonable compensation for any loss suffered as determined by an independent Expert appointed by the parties subject to subclause 95.

The Minister may if he has reasonable cause to believe that the Petroleum Operations may endanger persons or property, cause pollution, harm marine life or interfere with navigation and fishing, order the Contractor to take reasonable remedial measures or order the Contractor to discontinue the relevant Petroleum Operations until such measures or mutually agreed alternatives thereto are implemented.

If Petroleum Operations are su

suspended in accordance with this sub clause 93 during the Exploration Period then the Exploration Period shall be extended by the same number of days as the period of the suspension. The Contractor shall maintain appropriate and adequate third party liability insurance and workmen's compensation insurance and shall provide the Minister with the evidence of those insurances before the Petroleum Operations begin. The Contractor shall indemnify and render the Government harmless from all and any third party claims for loss or damage which but for the conduct of Petroleum Operations by the Contractor or sub Contractor would not have arisen or occurred. Under no circumstances however shall the Contractor be liable for indirect or consequential losses or damages, pool formation or structured damage, loss of reservoir, loss of production or loss of profits arising out of or in connection with this Contract or the Petroleum Operations. In the event of an emergency or extraordinary circumstances requiring immediate action including the safeguarding of lives or property or protection of the environment or for health reasons the Operator on behalf of the Contractor may take all such actions as it deems proper or advisable to protect the joint property

its investments and its employees and shall give written notice to the Government immediately thereafter. Any and all costs incurred in connection with such emergency activities shall be regarded as Petroleum Costs for the purpose of cost recovery under Clause 27 and the Accounting Procedure. 10. WELLS AND SURVEYS 11. Unless such a notice is waived the Contractor shall not drill a well or borehole or recommence drilling after a six month cessation without thirty (30) days prior notification to the Minister which notice shall set forth the Contractor's reasons for undertaking such well and shall contain a copy of the drilling programme. Production Sharing Contract Block 11 A Ministry of Energy Page 2023 The design of a well or borehole and the conduct of drillings shall be in accordance with good international petroleum industry practice. No borehole or well shall be drilled so that any part thereof is less than five hundred (500) metres from boundary of the Contract Area without the consent in writing of the Minister which consent shall not be unreasonably withheld. 4 The Contractor shall not except where there is danger or a risk of significant economic loss abandon a well or remove any permanent form of casing therefrom without giving forty eight (48) hours

prior notification to the Minister and an abandoned well shall be securely plugged to prevent pollution subseal
a major water entering or escaping from the strata penetrated or b Commenced drilling re-enter or plug a well un
less a representative of the Minister has been given a reasonable opportunity to be present. 567 The
Contractor shall state in its application to abandon a well on land whether that well is capable
of providing a water supply. The Contractor shall within two (2) months of termination or expiry of this Contract
surrender of part of the Contract Area deliver up all productive wells in said surrendered area in good repair a
and working order together with all casings and installations which cannot be removed without damaging the well
but the Minister may require the Contractor to plug the well at the Contractor's expense by notifying the Contract
or within thirty (30) days after such termination or expiry is effected or at least three (3) months prior to
surrender of
a Development Area. Where the Contractor applies to permanently abandon an Exploratory Well in which petr
oleum of potentially commercial significance has not been found the Minister may request the Contractor to de
open or sidetrack that well and to test the formations penetrated as a result of such operations or to
drill another exploration
well within the same prospect area subject to the following provisions a Any such additional Petroleum Operati
on shall be at the sole cost, risk and expense of the Minister and shall be paid for in accordance with the Accounti
ng Procedure. The Government shall advance to the Contractor the funds necessary to conduct the operation
s. b The Contractor shall not undertake such additional work if it will interfere with the conduct of the Contractor's
Petroleum Operations or if it is not commercially, technically or operationally feasible. Production Sharing Con
tract Block 11A Ministry of Energy Page 21 c In the event that the Petroleum Operations undertaken
under this sub clause 10 7 result in
a Discovery which the Contractor elects to evaluate and/or develop as a commercial field the Contractor shall re
imburse the Government Six Hundred percent (600%) of the costs and expenses incurred by the Government for
the conduct of the operations and such sum shall be paid within thirty (30) days of the notification made by the Cont
ractor. If the Contractor does not make such election the Government shall have the right to continue the Petrol
eum Operations on this Discovery at the sole cost, risk and expense of the Government. 8 The Contractor shall g

ive the Minister thirty 30 days notice of any proposed geophysical survey of the Contract Area which notices shall contain completed detail of the programme to be conducted. At the request of the Contractor the Minister may waive the notice period.

11. OFFSHORE OPERATIONS 1 The Contractor shall ensure that works and installations erected offshore in Kenya territorial waters and exclusive economic zones shall be a Constructed placed marked buoyed equipped and maintained so that there are safe and convenient channels for shipping b Fitted with navigational aids approved by the Minister c Illuminated between sunset and sunrise in a manner approved by the managing director Kenya Ports Authority and d Kept in good repair and working order.

21 The Contractor shall pay reasonable compensation for any interference in fishing rights caused by the Petroleum Operations.

12. FIXTURES AND INSTALLATIONS AND TITLE TO ASSETS With the written consent of the Minister which consent shall not be unreasonably withheld the Contractor shall have the right to construct operate and maintain roads drill water wells and to place and or construct fixtures and installations necessary to conduct the Petroleum Operations including but not limited to storage tanks trunk pipelines shipment installations pipelines cables or similar lines liquefaction processing

and compression located inside or outside the Contract Area as well as to construct operate and maintain or lease facilities for the transportation of Crude Oil and Natural Gas from the Contract Area. The consent of the Minister may be conditional on the use by other producers of the excess capacity if any of those facilities. Where the Minister and Contractor agree that a mutual economic benefit can be achieved by constructing and operating common facilities however the Contractor shall use its reasonable best efforts to reach

agreement with other producers on the construction and operation of such common facilities. Production Sharing Contract Block 11 A Ministry of Energy Page 22 23 45 12 Other producers may only use the facilities of the Contractor where there exists excess capacity and on payment of a reasonable compensation which includes a reasonable return on investment to the Contractor and provided the use does not interfere with the Contractor's Petroleum Operations. The Minister may in consultation with the Contractor consent to the laying of pipelines

cables and similar lines in the Contract Area by other Persons subject to the consent of the Contractor which consents shall not be unreasonably withheld and by the submission of technical data by the Government demonstrating that such lines shall not interfere with the Petroleum Operations of the Contractor. On termination or expiration of this Contract or surrender of part of the Contract Area the Contractor shall remove the aboveground plant appliances and installations from the Contract Area or the part surrendered other than those that are situated in or related to a Development Area or at the option of the Minister the Contractor shall transfer ownership thereof at no cost to the Government in the condition that they are then in in which latter case the Government shall be responsible for operating maintaining abandoning and decommissioning of such plants appliances and installations. When the rights of the Contractor in respect of a Development Area terminate expire or are surrendered the Contractor shall transfer ownership thereof to the Government at no cost the plant appliances and installations that are situated in the Development Area or that are related thereto unless such plant appliances and installations are or may be utilised by the Contractor in Petroleum Operations under this Contract but the Government may require the Contractor to remove the surface installations at the cost of the Contractor. 13

.LOCALEMPLOYMENTTRAININGANDCOMMUNITYDEVELOPMENTPROJECT The Contractor its contractors and subcontractors shall where possible employ Kenya citizens in the Petroleum Operations and until expiry or termination of this Contract shall train those citizens. The training programmes shall be established with the consultation of the Minister. In addition to the obligation under subclause 131 and commencing on the Effective Date the Contractor shall for the purposes of section 11 of the Act contribute or hold to the order of the Ministry a minimum of Production Sharing Contract Block 11A Ministry of Energy Page 23 One hundred and seventyfive thousand Dollars USD175000.00 per year during the Initial Exploration Period towards the Ministry Training Fund ii One hundred and seventyfive thousand Dollars USD175000.00 per year during the First Additional Exploration Period towards the Ministry Training Fund. iii One hundred and seventyfive thousand Dollars USD175000.00 per year during the Second

Additional Exploration Period towards the Ministry Training Fund. iv The Contractor of Two hundred thousand Dollars USD200000.00 per year commencing with the adoption of the first Development Plan under subclause 203.a

minimum obligation hereunder increased further shall be to 312 The Contractor shall by way of direct payments contribute a minimum of Fifty thousand Dollars USD50000.00 per year towards the local community development projects. 14. DATA AND SAMPLE

SThe Contractor shall keep logs and records of the drilling, deepening, plugging or abandonment of boreholes and wells in accordance with good international petroleum industry practice and containing particulars of the strata and subsoil through which the borehole or well was drilled; b The casing, tubing and downhole equipment and alterations thereof inserted in a borehole or well; c Petroleum, water, workable mineral or mineral workings encountered; and d Any other matter related to the Petroleum Operations that is reasonably required by the Minister. The Contractor shall record in an original or reproducible form of good quality and on seismic tapes where relevant all geological and geophysical information and data relating to the Contract Area obtained by the Contractor and shall deliver a copy of that information and data, the interpretation thereof and the logs and records of boreholes and wells to the Minister in a reproducible form as soon as practicable after that information, those interpretations and those logs and records come into the possession of the Contractor.

Production Sharing Contract Block 11 A Ministry of Energy Page 243412 The Contractor may remove for the purpose of laboratory examination or analysis petrological specimens or samples of petroleum or water encountered in a borehole or well and as soon as practicable shall without charge give the Minister a representative part of each specimen and sampler removed but no specimen or sample shall be exported from Kenya without prior notification to the Minister. The Contractor shall keep records of any supply of information concerning the Petroleum Operations reasonably requested by the Minister if the data or information necessary to comply with the request are readily available. 15. REPORTS The Contractor shall supply to the Minister daily reports on drilling operations and production operations and weekly reports on geophysical operations. The Contractor shall report in writing to the Minister the progress of the Petroleum Operations according to the following schedule a Within one (1) month of the last day of March, June

September and December covering the previous three months. Within three months of the last day of December covering the previous year, within three months of the date of expiry or termination of this Contract, a report under subclause 15.2 shall contain in respect of the period which it covers a detail of the Petroleum Operations carried out and the factual information obtained. A description of the area in which the Contractor has operated. An account of the expenditure on Petroleum Operations in accordance with the Accounting Procedure. A map indicating all boreholes, wells and other Petroleum Operations. Production Sharing Contract Block 11A Ministry of Energy Page 25. e. On expiry or termination of this Contract, details of the Petroleum Operations including all the matters described in paragraphs (a) to (d) and (f). All information required by clause 14 not hitherto supplied.

PAR TIV RIGHTS AND OBLIGATIONS OF THE GOVERNMENT AND THE MINISTER

16. RIGHTS OF THE GOVERNMENT

The Government may acquire a part of the Contract Area for a public purpose other than searching for or extracting Petroleum but not to the extent that will prevent the carrying out of Petroleum Operations within the Contract Area and the Government shall not without good cause acquire a part of the Contract Area on which Petroleum Operations are in progress. The Contractor shall not carry out Petroleum Operations on such an acquired part but may enter upon that part but not materially interfere with the public purpose.

b. Carry out directional drilling from an adjacent part. The Minister or a Person authorized by him in writing may at all reasonable times inspect any Petroleum Operations and any records of the Contractor relating thereto and the Contractor shall provide where available facilities similar to those applicable to its own or to subcontractors' staff for transport to the Petroleum Operations, subsistence and accommodation and pay all reasonable expenses directly connected with the inspection. If there is a breach of an obligation due to be performed under this Contract, the Minister may require the Contractor to perform any obligation under this Contract by giving reasonable written notice and if the Contractor fails to comply with the notice, the Minister may execute any necessary works for which

the Contractor shall pay forthwith. The Minister may give notice to execute works at any time but not later than three months after the termination or expiry of this Contract or the surrender of a part of the Contract Area.

17. OBLIGATIONS OF THE GOVERNMENT

1231 The Government may at the request of the Contractor make available to the Contractor such land as the Contractor may reasonably require for the conduct of Petroleum Operations and Production Sharing Contract Block 11A Ministry of Energy Page 26a Where the land is Trust Land the Government may subject to subclause 172 set apart such Trust Land in the Contract Area or outside the Contract Area in accordance with the Trust Land Act b Where the land is private land the Government may subject to section 10 of the Act acquire the land in accordance with the applicable laws c The Contractor shall pay or reimburse the Government any reasonable compensation that may be required for the setting apart use or acquisition of any land for the Petroleum Operations as settled by an Expert Determination.

2345 Where the Contractor has occupied Trust Land for the purpose of the Petroleum Operations before that land has been set apart the Contractor shall notify the Minister in writing of the need to set apart such land. The Government shall grant or cause to be granted to the Contractor its contractors and subcontractors such wayleave easements temporary occupation or other permissions within and without the Contract Area as are necessary to conduct the Petroleum Operations and in particular for the purpose of laying operating and maintaining pipelines and cables and passage between the Contract Area and the Delivery Point of petroleum. The Government shall at all times give the Contractor the right of ingress to and egress from the Contract Area and the facilities wherever located for the conduct of Petroleum Operations. Subject to the usual national security requirements and the Immigration Act and Regulations of Kenya in particular the Government shall not unreasonably refuse to issue and or renew entry visas or work permits for employees technicians and managers employed in the Petroleum Operations by the Contractor or its subcontractors and their dependants.

PART V WORK PROGRAMME DEVELOPMENT AND PRODUCTION

18. EXPLORATION WORK PROGRAMME

1 The Contractor shall submit and orally present to the Minister one month after the Effective Date a detailed statement of the exploration work programme and budget for

he first Contract Year. Production Sharing Contract Block 11 A Ministry of Energy Page 27234123456 The Contractor shall submit and orally present to the Minister three (3) months before the end of each Contract Year a detailed statement of the exploration work programme and budget for the next Contract Year. The Minister may submit to the Contractor within thirty (30) days of the receipt of the annual exploration work programme and budget suggested modifications and revisions thereof. The Contractor shall consider the inclusion of such suggested modifications and revisions in light of good international petroleum industry practice and shall provide the Minister with the exploration work programme and budget which the Contractor has adopted. After the adoption of the annual exploration work programme and budget the Contractor may make changes to that annual exploration work programme and budget if those changes do not materially affect the original objectives of that exploration work programme and budget and shall state the reasons for those changes to the Minister.

19. DISCOVERY AND EVALUATION WORK PROGRAMME The Contractor shall in accordance with section 9b of the Act notify the Minister of a Discovery and shall report to the Minister all relevant information. If the Contractor considers that the Discovery merits Evaluation it shall submit and orally three (3) months present to the Minister a detailed statement of the Evaluation work programme and budget which shall provide for the expeditious Evaluation of the Discovery and the provisions of subclauses 183 and 184 shall apply to the Evaluation work programme and budget. After the Evaluation work programme and budget have been adopted the Contractor shall diligently evaluate the Discovery without undue interruption. In the event of a Discovery in the last year of the Second Additional Exploration Period the Minister shall at the request of the Contractor extend the term of the Second Additional Exploration Period in respect to the prospective area of the Discovery and for the period of time reasonably required to expeditiously complete the adopted Evaluation work programme and budget with respect to such Discovery and to determine whether or not the Discovery is commercially but in any event such extension to the Second Additional Exploration Period shall not exceed twelve (12) months. The Contractor shall not more than three (3) months after the Evaluation or Market Evaluation Report

is completed report to the Minister the commercial prospect of the Discovery including all relevant technical and economic data. If the Contractor reports under subclause 195 that the Discovery is a Commercial Discovery a Development Plan shall be submitted to the Minister within six 6 months of the completion of the Evaluation work programme or Market Evaluation Report unless otherwise agreed and upon written application of

the Contractor the term of this Contract shall be extended by the Minister if necessary in respect of the area of the Commercial Discovery provisionally established in accordance with the adaptation of a Development Plan.

Production Sharing Contract Block 11 A Ministry of Energy Page 2820. DEVELOPMENT PLAN AND DEVELOPMENT WORK PROGRAMME

1 The Contractor shall prepare in consultation with the Minister the Development Plan based on sound engineering and economic principles and in accordance with good international petroleum industry

practice and considering the Maximum Efficient Rate of production appropriate to the Commercial Discovery

.2 The Development Plans submitted by the Contractor to the Minister shall contain a Details of the proposed

Development Area relating to the Commercial Discovery which shall correspond as closely as possible to the extension of the discovered accumulation in the Contract Area as

determined by the analysis of all the relevant available information b Proposals relating to the spacing drilling and completion of the wells and the facilities

and installations required for the production storage and transportation of petroleum c A production forecast and an estimate of the investment and expenses involved and d An estimate of the time required to complete each

phase of the Development Plan. 3 The Minister and the Contractor shall jointly consider the

Development Plan within sixty 60 days of submission thereof and the Minister may within that period unless otherwise agreed submit

suggested modifications justifications and revisions thereof. The Contractor shall consider the inclusion of such suggested modifications and revisions in the light of good international petroleum industry practice and the

Development Plans shall be adopted by mutual agreement. Where the Minister proposes no modifications and revisions the Development Plan of the Contractor shall be adopted sixty 60 days after its submission unless it is

adopted by mutual agreement of the Parties before that period has elapsed. Production Sharing Contract Block 11A Ministry of Energy Page 29451234 After a Development Plan has been adopted the Contractor shall use its best efforts to proceed promptly and without undue interruption to implement the Development Plan in accordance with good international petroleum industry practice. Development work shall commence six (6) months from the date of adoption of the Development Plan. In connection therewith the Contractor shall submit and orally present to the Minister prior to the first day of October of each year following the adoption of the Development Plan a detailed statement of the annual development work programme and budget for the next Calendar Year and the provisions of subclauses 183 and 184 shall apply to the Development Plan and to the annual development work programme and budget. Where the development operations result in an extension to the area to which the Commercial Discovery relates within the Contract Area the Ministers shall adjust the relevant Development Area to include that extension as determined by the analysis of all the relevant available information.

21. UNITISATION Where there are recoverable reserves of a Commercial Discovery extend into an area adjacent to the Contract Area the Minister may require the Contractor to produce Petroleum therefore in cooperation with the Contractor of the adjacent area. Where non-commercial deposits of Petroleum in the Contract Area are exploited with deposits in an area adjacent to the Contract Area would become commercial the Minister may make a similar requirement to the Contractor of that adjacent area. If the Ministers so require the Contractor shall in cooperation with the Contractor of the adjacent area submit within six (6) months unless otherwise agreed by the Parties a proposal for the joint exploitation of the deposits for the approval of the Minister. The reasonable costs of preparing the proposal shall be divided equally between the Contractor and the adjacent contractor. If the proposal is not submitted or approved the Minister may prepare his own proposal in accordance with good international petroleum industry practice for the joint exploitation of the recoverable reserves. The Minister's proposal may be adopted by the Contractor subject to subclause 214 and subject to the adjacent contractor's acceptance of the same proposal. The provisions of the proposal for joint exploitation shall prevail

over this Contract where those provisions do not reduce the financial benefits to the parties under this Contract.

Production Sharing Contract Block 11A Ministry of Energy Page 30121222. MARGINAL AND NONCOMMERCIAL DISCOVERIES Where the Contractor determines that oil or Natural Gas Discovery is marginal or noncommercial the Contractor may propose a modification to this Contract based on an alternative economic evaluation and after consideration the Minister may accept or reject the proposed modification. Upon making a marginal Discovery of Natural Gas the Contractor and the Government shall commence good faith negotiations of revisions to Clause 27 that would be necessary in order to provide the Contractor with project economics that will provide a reasonable Rate of Return. The parties agree that unless otherwise agreed if the Contractor fails to commence the Evaluation of a Petroleum Discovery within Twelve (12) Months following the notice of Discovery or if within Twelve (12) Months following the completion of an Evaluation work programme and the Contractor considers the Crude Oil Discovery does not merit development the Minister may request the Contractor to surrender the area corresponding to such Crude Oil Discovery and the Contractor shall forfeit any rights relating to any production therefrom. The area subject to such surrenders shall not exceed the extension of the discovered accumulation as determined by the structural closure of the prospective horizon and all other relevant available information. Any such surrender by the Contractor shall be credited in accordance with subclause 33 hereof.

23. NATURAL GAS Where Natural Gas is discovered and the Contractor and the Minister agree that it may be economically processed and utilised other than in secondary recovery operations that processing and utilizations shall follow a Development Plan approved in accordance with clause 20. The Contractor shall return associated Natural Gas not required for use in Petroleum Operations or sold to the subsurface structure but if such Natural Gas cannot be economically used or sold or returned to the subsurface structure the Contractor shall after expiry of sixty (60) days notice to the Minister giving reasons why such Natural Gas cannot be economically used or sold or returned to the subsurface structure be entitled to flare such associated Natural Gas in accordance to good international petroleum industry practice. Notwithstanding anything in this clause to the contrary Natural Gas may be flared at any time if necessary for the

econducting of well and production tests and during any emergency. Production Sharing Contract Block 11A Ministry of Energy Page 3134123412 Where the Contractor does not consider that it is economical to process and utilise associated Natural Gas and where that Natural Gas is not required for use in Petroleum Operations the Minister may at the field separator process and utilise that Natural Gas without compensation but the Government shall pay for all costs and expenses related thereto which shall include but not be limited to any engineering studies new fixtures equipment and installations required for the gathering transport processing and utilisation thereof and the operation and maintenance of same shall be at the sole risk cost and expense of the Government. Where the Contractor considers that it is economical to produce Natural Gas the Contractor agrees to sell Natural Gas to the Government to the volume calculated in accordance with subclause 296 below with both terms of sale including price to be agreed.

24. PRODUCTION LEVELS AND ANNUAL PRODUCTION PROGRAMME The Contractor shall produce Petroleum at the Maximum Efficient Rate in accordance with good international petroleum industry practice. Prior to the first day of October of each year following the commencement of Commercial Production the Contractor shall submit and orally present to the Minister a detailed statement of the annual production programme and budget for the next Calendar Year and the provisions of subclause 183 and 4 shall apply to the annual production programme and budget. The Contractor shall endeavour to produce in each Calendar Year the forecast quantity estimated in the annual production programme. The Crude Oil shall be run to storage constructed maintained and operated by the Contractor and Petroleum shall be metered or otherwise measured as required to meet the purpose of this Contract in accordance with clause 25.

25. MEASUREMENT OF PETROLEUM The volume and quality of Petroleum produced and saved from the Contract Area shall be measured by methods and appliances customarily used in good international petroleum industry practice and approved by the Minister. The Minister may inspect the appliances used for measuring the volume and determining the quality of Petroleum and may appoint an inspector to supervise the measurement of volume and determination of quality. Production Sharing Contract Block 11A Ministry of Energy Page 32341 Where the method of

measurement or appliances used therefore have caused an overstatement or understatement of a share of the production the error shall be presumed to have existed since the date of the last calibration of the measurement devices unless the contrary is shown and an appropriate adjustment shall be made for the period of error. The Minister and the Contractor shall determine the measurement point at which production shall be measured and the respective shares of Petroleum allocated.

26. VALUATION OF CRUDE OIL AND NATURAL GAS

The value of Crude Oil for all purposes under this Contract shall be denominated in United States dollars and shall be calculated each Calendar Quarter as follows: if there have been sales of Crude Oil produced from the Contract Area to third parties at arm's length during that Calendar Quarter, the value shall be the weighted average per unit price actually paid in those sales at the F.O.B. point of export or at the point at which title and risk pass to the buyer, adjusted for grade, gravity and quality of such Crude Oil as well as for transportation costs and other appropriate adjustments for grade, gravity and quality of such Crude Oil transaction where the seller and the buyer are independent of one another and do not have directly or indirectly any common interest; but if there have been no sales of Crude Oil produced from the Contract Area to third parties at arm's length during that Calendar Quarter, the value shall be the fair market value determined as the average per unit prevailing market price actually paid during that Calendar Quarter in arm's length sales for export under term Contracts of at least ninety (90) days between unrelated purchasers and sellers for Crude Oil produced in Kenya and for Crude Oil of comparable quality produced in the nearest major Crude Oil producing and exporting country and adjusted for grade, gravity and quality of such Crude Oil as well as for transportation costs and any other appropriate adjustments. If necessary, a value of Crude Oil shall be determined separately for each Crude Oil or Crude Oil mix and for each point of delivery. The value of Crude Oil shall be mutually agreed at the end of each Calendar Quarter and applied to all transactions that took place during the quarter.

Production Sharing Contract Block 11A Ministry of Energy Page 33/231

If the Minister and the Contractor cannot reach an agreement on the value of Crude Oil within thirty (30) days of the end of any Calendar Quarter, such dispute may be submitted for an Expert Determination. Pending the determination of the value of Crude Oil for a Calendar Quarter, the value of Crude Oil determined for the preceding Calendar Quarter will be provisionally applied to make calculation and payment during such Calendar Quarter until the

applicable value for that Calendar Quarter is finally determined pursuant to subclause 26.1. Any adjustment to provisional calculation and payment if necessary will be made within thirty (30) days after such applicable value is finally determined. Natural Gas shall be valued based on the actual proceeds received for sales provided that for sales of Natural Gas between the Contractor and any Affiliate the value of such Natural Gas shall not be less than the then prevailing fair market value for such sales of Natural Gas taking into consideration to the extent possible such factors as the market, the quality and quantity of Natural Gas and other relevant factors reflected in natural gas pricing. For sales of Natural Gas into the domestic market the price shall be set in accordance with

the provisions of subclause 23.5. PART VI COST RECOVERY PRODUCTION SHARING MARKETING AND PARTICIPATION 27. COST RECOVERY PRODUCTION SHARING WINDFALL AND INCOME TAX Subject to the auditing provisions under clause 30 the Contractor shall recover the Petroleum Costs in respect of all Petroleum Operations incurred and paid by the Contractor pursuant to the provisions of this Contract and duly entered in the Joint Account by taking and separately disposing of an amount equal in value to a maximum of Sixty Percent (60%) of all Crude Oil produced from the Contract Area during that Fiscal Year and not used in Petroleum Operations. Such cost recovery Crude Oil is hereinafter referred to as Cost Oil. 2. Petroleum Costs may be recovered from Cost Oil in the following manner: a. Petroleum Costs with the exception of capital expenditures incurred in respect of the Contract Area shall be recoverable either in the Fiscal Year in which these costs are incurred and paid or the Fiscal Year in which Commercial Production occurs whichever is the later and b. capital expenditure incurred in respect of each Development Area shall be recoverable at a rate of 20% based on amortization at that rate starting either in the Fiscal Year in which such capital expenditure are incurred and paid or the Fiscal Year in which Commercial Production commences whichever is the later. Production Sharing Contract Block 11A Ministry of Energy Page 34 For the purpose of this clause capital expenditure shall mean the qualifying expenditure other than intangible drilling costs that is expenditure that has no salvage value including expenditure

on labour fuel repairs maintenance hauling mobilization and supplies and materials other than supplies and materials for well casings or other well fixtures which is for or incidental to drilling cleaning deepening completing or abandoning wells and is incurred in respect of: i) The determination of well locations geological and geophysical studies and topographical and geographical surveys preparatory to drilling; ii) The drilling shooting testing and cleaning of wells; and iii) The clearing draining and levelling of land road building and laying off foundations. c) To the extent that in a Fiscal Year the Petroleum Costs recoverable according to subclauses 272a and 272b exceed the value of all Cost Oil or Cost Gas for such Fiscal Year the excess shall be carried forward for recovery by the Contractor in the next succeeding Fiscal Year or Fiscal Years until fully recovered but in no case after the termination of this Contract. d) To the extent that in a Fiscal Year the Petroleum Costs recoverable according to subclauses 272a and 272b are less than the maximum value of the Cost Oil or Cost Gas as specified in subclause 271 the excess shall become part of and be included in the Profit Oil or Profit Gas as provided for in subclause 273 hereafter. e) For the purpose of valuation of Cost Oil and Cost Gas the relevant provisions of clause 26 hereof shall apply. 3. The total Crude Oil produced and saved from the Contract Area and not used in Petroleum Operations less the Cost Oil as specified in subclauses 271 and 272 shall be referred to as the Profit Oil and shall be shared taken and disposed of separately by the Government and Contractor according to increments of Profit Oil as follows: Production Sharing Contract Block 11A Ministry of Energy Page 35 ONSHORE PROFIT OIL SPLIT TRANCHES

Incremental Production Tranches	Govt. Share	Contractor Share
0-30000 barrels per day	50%	50%
30000-50000 barrels per day	60%	40%
50000-70000 barrels per day	65%	35%
70000-100000 barrels per day	67%	33%
Above 100000 barrels per day	70%	30%

22a) For the purpose of this subclause increments of Profit Oil shall be calculated by considering the total Crude Oil produced and saved from the Contract Area less the quantity of Cost Oil required to satisfy recoverable cost expenses and expenditures according to subclauses 271 and 272. b) Where two (2) or more reservoirs are sufficiently close so that they utilize the same surface installation they shall be considered for the purposes of subclause 273 a) as being one (1) Development Area. When making a proposal for the delineation of a Development Area and its associated Development Plan the Contractor shall consider in priority the option which is the most favourable.

e for the Government in terms of Profit Oil split. c Windfall Profits When the value of crude oil for any calendar quarter calculated in accordance with Clause 26 of the PSC exceeds United States US\$50 per barrel FOB Mombasa hereinafter referred to as the Threshold Price adjusted for the United States of America's Consumer Price Index CPI whose Effective Date will be from the date of the contract execution then a Second Tier Amount is payable by the Contractor to the Government. The Second Tier Amount will be calculated in respect of each Calendar Quarter according to the following formula:

$$R = CSPO \times 26 \times V - \text{Threshold Price}$$

Where R is the Second Tier Amount in US Dollars, V is the value of Crude Oil in U.S. dollars for that Calendar Quarter calculated in accordance with Clause 26 and expressed in US bbl provided that V exceeds the Threshold Price and CSPO is the Contractor Share of Profit Oil for that Calendar Quarter in bbl calculated pursuant to clause 273a. d The Second Tier Amount will be calculated within thirty (30) days following the end of the Calendar Quarter for which it is due. For the purposes of this Contract the Second Tier Amount will be treated as an adjustment to the amount payable as Profit Oil. e The Threshold Price set forth in this subclause 273 c is US\$50 per barrel F.O.B. Mombasa as of Effective Date and shall be adjusted quarterly as set forth below. The Threshold Price during any Calendar Quarters shall be derived by multiplying the Threshold Price by the number hereinafter referred to as the price index which is the sum of one (1) and the decimal equivalent of the percentage increase in the United States Consumer Price Index as reported for the first time in the monthly publication International Finance Statistics of the International Monetary Fund between the month of Effective Date and the month when such valuation is calculated. 4 With respect to subclauses 271, 272 and 273 Cost Oil, Cost Gas, Profit Oil and Profit Gas calculation shall be done quarterly on an accumulative basis. To the extent that actual quantities, costs and expenses are not known, provisional estimates of such data based on the adopted annual production work programme and budget under clause 24 shall be used. Within sixty (60) days of the end of each Fiscal Year a final calculation of Cost Oil, Cost Gas, Profit Oil and Profit Gas based on actual Crude Oil and Natural Gas production in respect of that Fiscal Year and recoverable Petroleum Costs shall be prepared and any necessary adjustments shall be made. 5 Each Contractor shall be subject to and shall comply with the requirements of the income tax law

wsinforceinKenyawhichimposetaxesonoraremeasuredbyincomeorprofits.ProductionSharingContract
Block11A Ministry of Energy Page 37 The portion of the Profit Oil or Profit Gas which the Government is entitled
to take and receive and which is calculated under subclause 27.3 shall be inclusive of all taxes present or future ba
sed on income or profits of the Contractor including specifically tax payable under the Income Tax Act
and dividend tax imposed by Kenya on any distribution of income or profits by the Contractor but
shall exclude the tax paid by
the Contractor on behalf of petroleum services subcontractors. The Government agrees to pay and discharge
as and when due such taxes for account of each Contractor and the Minister agrees to furnish each Contractor
with proper receipts from the Government evidencing the payment of all such taxes on the Contractor's behalf f
or each Fiscal Year. Each Contractor shall prepare and file a Kenya income tax return for each Fiscal Year withi
n four 4 months after the close of each Fiscal Year. The receipts furnished by the Minister evidencing payment o
f such taxes shall correspond to the amount of taxes payable on behalf of the Contractor by the Government. Th
e receipts shall be issued by the duly constituted authority for the collection of Kenya income taxes and
shall be furnished within three 3 months after the date
the Contractor files its Kenya income tax return for the Fiscal Year. All taxes paid by the Government in the name
and on behalf of the Contractor shall be considered income to the Contractor for the Fiscal Year to which the tax
payments relate. 6. If so directed by the Minister the Contractor shall be obligated to lift and market part or the enti
re Government share of Profit Oil Profit Gas and any Government or Appointee Participating Interest share of
Petroleum in a Development Area. If any Party fails to lift and market their share of Petroleum the Contractor no
minated as operator may lift and market such Party's share on their behalf. When the Minister elects not to take a
nd receive in kind any part of the Government share of Profit Oil the Minister shall notify the Contractor three 3 m
onths before the commencement of each Semester of a Calendar Year specifying the quantity of production a
nd such notices shall be effective for the ensuing Semester. Any sale by the Contractor of the Government share
of Profit Oil shall not be for a term of more than one 1 year without the Minister's consent. The Contractor shall
have the right to market the Government's share at the
then prevailing fair market price. The price paid by the Contractor for the Government share of Profit Oil shall be

he price established according to clause 26. The Contractor shall pay the Government on a monthly basis such payments to be made within thirty (30) days after the end of the month in which the production occurred. Production Sharing Contract Block 11A Ministry of Energy Page 387812 At a reasonable time prior to the scheduled date of commencement of Commercial Production the parties shall agree to procedures covering the scheduling, storage and lifting of Petroleum produced from the agreed upon Point of Sale. In the event that the Contractor elects to produce a Natural Gas Discovery the Petroleum Costs incurred by the Contractor and directly attributable to the development and production of such Natural Gas shall be recovered from part thereof. 28. GOVERNMENT PARTICIPATION The Government will have a ten percent (10%) carried participating interest upon declaration of commerciality and thereafter may elect to acquire an additional ten percent (10%) interest in the PSC thus bringing total government participation to twenty percent (20%). The Government may participate either directly or through an appointee if the Government exercises its right to participate in a Development Area the Government and the Contractor shall enter into either a Participation Agreement or an amendment and novation of the Joint Operating Agreement to add the Government or its Appointee as a party to the Joint Operating Agreement within three (3) months after notice to the Contractor under subclause 28.1.3 The Government shall in exercise of its right to participate in a Development Area have a right to a vote in proportion to its Participating Interest with respect to all decisions taken under this Contract and either the Participation Agreement or Joint Operating Agreement as appropriate. Both and separately take and dispose of its Participating Interest share in the Petroleum produced and saved to which the Contractor is entitled under this Contract corresponding to its Participating Interest in that Development Area. Assume its share of Petroleum Costs incurred in respect of that Development Area from the Effective Date of its participation as defined in subclause 28.3 pro rata to its Participating Interest. Own a Participating Interest share in all assets acquired for Petroleum Operations in or related to the Development Area. Production Sharing Contract Block 11A Ministry of Energy Page 3941234 The Government shall

reimburse the Contractor without interest prorata to the Government Participating Interest its share of all costs, expenses and expenditure incurred in respect of the Development Area from the date the Development Plan for that Development Area has been adopted to the date the Government serves notice pursuant to subclause 28.3 exercises its right to participate in that Development Area.

This reimbursement shall be made within three (3) months after the Government serves notice pursuant to subclause 28.3.

29. DOMESTIC CONSUMPTION The Contractor shall have the obligation to supply in priority Crude Oil for domestic consumption in Kenya and shall sell to the Government that portion of the Contractor's share of Production which is necessary to satisfy the domestic supply requirements in accordance with the following provisions. In each Calendar Year the Minister shall notify the Contractor not less than three (3) months prior to the beginning of that Calendar Year of the domestic supply requirement. The maximum amount of Crude Oil that the Minister may require from the Contractor's share of production shall be calculated each Calendar Quarter and shall be equal to the excess of total Crude Oil domestic consumption in Kenya multiplied by a fraction the numerator of which is the average Crude Oil production from the Contract Area and the denominator of which is the total Crude Oil production from all producers in Kenya over the amount of Crude Oil available to the Government from the Government's share of Crude Oil from all production sharing Contracts in Kenya including the Government's share of production under clause 27 and in the form of Government participation share under clause 28. For the purpose of this subclause domestic consumption does not include Crude Oil refined in Kenya for export. When the Contractor is obligated to supply Crude Oil or Natural Gas for domestic consumption in Kenya the price paid by the Government shall be calculated in accordance with clause 26. Such sales to the Government shall be invoiced monthly and shall be paid within thirty (30) days of receipt of the invoice unless other terms and conditions are mutually agreed. With the written consent of the Minister the Contractor may comply with this clause by importing Crude Oil and exporting the same amount but appropriate adjustments shall be made in price and volume to reflect transportation costs differences in quality gravity and terms of sale provided that the Contractor may also comply with this Clause with respect

to Natural Gas amounts required under subclause 296 by importing alternative fuels and exporting an like amount of Natural Gas. Production Sharing Contract Block 11A Ministry of Energy Page 40561234 In this clause Government includes an Appointee and Contractor does not include the Government where the Government has participated under clause 28. In each Calendar Year the Minister shall notify the Contractor not less than three 3 months prior to the beginning of that Calendar Year of the domestic Natural Gas supply requirement. The maximum amount of Natural Gas that the Minister may require from the Contractor's share of production shall be calculated each Calendar Quarter and shall be equal to the excess of total domestic Natural Gas consumption in Kenya multiplied by a fraction the numerator of which is the average Natural Gas production from the Contract Area and the denominator of which is the total Natural Gas production from all producers in Kenya over the amount of Natural Gas available to the Government from the Government's share of Natural Gas from all production sharing contracts in Kenya including in the form of Government's share of production under Clause 27 and in the form of Government participation share under Clause 28 under this Contract. For the purpose of this subclause 296 domestic consumption does not include Natural Gas liquefied or compressed in Kenya for export.

PART VII BOOKS ACCOUNTS AUDITS IMPORTS EXPORTS AND FOREIGN EXCHANGE 30. BOOKS ACCOUNTS AND AUDITS The Contractor shall keep books and accounts in accordance with the Accounting Procedure and shall submit to the Minister a statement of those accounts not more than three 3 months after the end of each Calendar Year. At the request of the Minister the Contractor shall appoint an independent auditor of international standing approved by the Government to audit annually the books and accounts of the Contractor and report thereon and the cost of such audit shall be at the charge of the Contractor and cost recoverable. The Government may audit the books and accounts in accordance with the provisions of the Accounting Procedure within two 2 Calendar Years of the period to which they relate and shall complete that audit within one 1 Calendar Year. In the absence of an audit within two 2 Calendar Years or in the absence of notice to the Contractor of a discrepancy in the books and accounts within three 3 Calendar Years of the period to which the audit relates the Contractor's books and accounts shall be deemed correct.

its contractors and subcontractors engaged in carrying out Petroleum Operations under this Contract shall be permitted to import into Kenya all the services, materials, equipment and supplies including but not limited to machinery, vehicles, consumable items, movable property and any other articles to be used solely in carrying out Petroleum Operations under this Contract. Such services, materials, equipment and supplies shall be exempt from all Customs Duties, VAT and import declaration fees provided that the Contractor and its contractors and subcontractors shall give preference to Kenyan goods and services in accordance with clause 31 hereof. In relation to materials, equipment and supplies imported or to be imported pursuant to subclause 32.2 when a responsible representative of the Ministry has ascertained that they are to be used solely in carrying out Petroleum Operations under this Contract, the Contractor and its contractors and subcontractors shall be entitled to make such imports without any approval of import licence provided however that an application has been duly made to any exchange control approvals subject to the provision of clause 33 hereof for any inspection outside of Kenya by general superintendence or other inspecting body acting for the time being appointed by the Government. The actual costs of Contracts for technical and other services entered into by the Contractor for Petroleum Operations and for materials purchased by the Contractor for use in Petroleum Operations shall be recoverable provided that those services and materials are reasonably required for Petroleum Operations and provided further that the prices paid by the Contractor are not higher than those currently prevailing in normal arms-length transactions of the open market for comparable services and materials. Production Sharing Contract Block 11A Ministry of Energy Page 43/56/78 Each expatriate employee of the Contractor, its contractors and subcontractors shall be permitted to import and shall be exempt from all Customs Duties with respect to their reasonable importation of household goods and personal effects including one (1) automobile provided however that such properties are imported within three (3) months of their arrival or such longer period as the Government may in writing determine. The Contractor and its contractor and subcontractors and their expatriate employees may sell in Kenya all imported items which are no longer needed for Petroleum Operations. However, if such imports were exempt

from Customs Duties the sellers shall fulfil all formalities required in connection with the payment of duties taxes fees and charges imposed on such sales. Subject to subclauses 126 and 127 Contractor and its contractors and subcontractors and their expatriate employees may export from Kenya exempt of all export duties taxes fees and charges all previously imported items which are no longer required for the conduct of Petroleum Operation under this Contract. customs duties as that term is used herein shall include all duties taxes on import except those charges paid to the Government for actual services rendered which are repayable as a result of the importation of the item or items under consideration.

33. EXCHANGE AND CURRENCY CONTROL SClauses 331 332 and 333c were deleted following the repealing of the Exchange Control Act Chapter 113 of the law of Kenya however clauses 333a 333b and 334 have been retained as they are still applicable.

3 Subject to the obligation to give preference to Kenyan goods and services as stipulated under clause 31 the Contractor shall have the right to enter all contracts and subcontracts necessary to carry out Petroleum Operations without prior approval by the Central Bank of Kenya or any other Government agency. The Government reserves the right to inspect the records or documentation related to such contracts and subcontracts and in accordance with clause 30 to appoint independent auditors to examine the accounts of the Contractor and if the Government requests the Contractor shall provide a copy of such contracts within thirty 30 days provided however that where the Government disputes a specific substantivematerial provision in the contract the value in dispute shall not be included until the dispute has been resolved in respect of a qualifying expenditure under the Income Tax Act and Production Sharing Contract Block 11 A Ministry of Energy Page 44 b the Certificate of Approved Enterprise.

4 The Government shall grant to the Contractor a certificate of Approved Enterprise in accordance with the Foreign Investments Protection Act Chapter 518 of the Law of Kenya. The amount recognized by the certificate as having been invested shall be the actual amount for the time being invested by the Contractor as set forth in its books of account maintained and audited in accordance with this Contract provided however that the Contractor shall not repatriate any proceeds of sale of an asset forming part of either a qualifying expenditure under the Income Tax Act or b any asset subject to a Certificate of Approved Enterprise without written

approval and thenecessary amendments to the relevant certificate. Proceeds arising from any other source may

PARTVIII GENERAL

34. PAYMENTS

1 AllsumsduetotheGovernmentortheContractorshallbepaidinUnitedStatesdollarsorothercurrencyagreedto bythe GovernmentandtheContractor.

Production Sharing Contract Block 11 A Ministry of Energy Page 452

Any lat epayments shall attract interest at LIBOR plus 300 basis points.

35. ASSIGNMENT

12 After notice to the Minister an Contractor may assign part or all of its rights and obligations under this Contract to an Affiliate without the pri or approval of the Minister provided such assignments shall result in the assignor and the assignee being jointly and severally liable for all of the assignor's obligations hereunder. An Contractor may only assign to a Person ot her than an Affiliate part or all of its rights and obligations under this Contract with the consent of the Minister whic h shall not be unreasonably withheld and which shall be granted or refused within thirty 30 days of receipt by the Minister of the notice from the Contractor that it intend to make such an assignment but the Minister may requir esuch an assignee to provide a guarantee for the performance of the obligations of the Contractor.

3 The Contr actor shall report to the Minister any Change in Control in its corporate structure.

36. MANAGER ATTORNEY AND JOINT OPERATION AGREEMENT

1231 The Contractor shall notify the Minister before the Petroleum Operations begin of the name and address of the person resident in Kenya who will supervise the Petroleum Operations and prior notice of any subsequent changes shall be given to the Minister. The Contractor shall appoint an advocate resident in Kenya with the power of representation in all

matters relating to this Contract of which appointment the Ministers shall be notified before the Petroleum Operations begin and prior notice of any subsequent changes shall be given to the Minister. Where the Contractor consists of more than one Person the Contractor shall deliver to the Minister a copy of the Joint Operating Agreement between those Persons as soon as it is available.

37. **CONFIDENTIALITY** All the information which the Contractor may supply to the Government under this Contract shall be supplied at the expense of the Contractor and the Government shall keep that information confidential and shall not disclose it other than to a Person employed by or on behalf of the Government except with the consent of the Contractor which consent shall not be unreasonably withheld.

Production Sharing Contract Block 11A Ministry of Energy Page 4623456123

Notwithstanding subclause 37.1 the Minister may use any information supplied for the purpose of preparing and publishing reports and returns required by law and for the purpose of preparing and publishing reports and surveys of a general nature for internal use. The Minister may publish any information which relates to a surrendered area at any time after the surrender and in any other case three (3) years after the information was received unless the Minister determines after representations by the Contractor that a longer period shall apply. The Government shall not disclose without the written consent of the Contractor to any Person other than a Person employed by or on behalf of the Government knowhow and proprietary technology which the Contractor may supply to the Minister. Except as may be necessary to obtain the appropriate governmental approvals none of the Parties shall disclose the content of this Contract except to its Affiliates independent contractors and consultants bona fide third party purchasers of an interest under this Contract as required by law without the prior written consent of the other Parties. Subject to legal or regulatory requirements applicable to the Contractor the Parties shall cooperate in developing joint publicity statements to be released at an agreed time. After the Effective Date all public announcements by the Contractor about the Petroleum Operations shall be issued through the Contractor with the approval of the Government.

38. **FORCE MAJEURE** In this clause Force Majeure means an occurrence beyond the reasonable control of the Minister or the Government or the Contractor which prevents any of them from performing their obligation under this Contract.

ractincludingbutnotlimitedtotheoccurrencesetoutinclause381.Force Majeure shall include among other things Acts of God unavoidable accidents acts of war or conditions attributable to or arising out of war declared or undeclared insurrections riots and other civil disturbances hostile acts of hostile forces constituting direct and serious threat to life and property and all other matters or events of a like or comparable nature beyond the control of the Parties concerned. Where the Minister the Government or the Contractor is prevented from complying with this Contract by force majeure the Person affected shall promptly give written notice to the other and the obligations of the affected Person shall be suspended provided that the Person shall do all things reasonably within its power to remove such cause of force majeure. Upon cessation of the force majeure event the Person no longer affected shall notify the other Person. Production Sharing Contract Block 11 A Ministry of Energy Page 4745 Where the Person not affected disputes the existence of force majeure that dispute shall be referred to arbitration in accordance with clause 41. Where an obligation is suspended by force majeure for more than one (1) year the parties may agree to terminate this Contract by notice in writing without further obligations. 6 The term of the Contract shall be automatically extended for the period of the force majeure. 39. WAIVER A waiver of an obligation of the Contractor shall be in writing signed by the Minister and no waiver shall be implied if the Minister does not exercise a remedy under this Contract. 40. GOVERNING LAW 123 This Contract shall be governed by interpreted and construed in accordance with the Law of Kenya. The Contractor agrees that it will obey and abide by all laws taxes duties levies and regulations in force in Kenya. If after the Execution Date of this Contract the economic benefits of a party are substantially affected by the promulgation of new laws and regulations or of any amendments to the applicable laws and regulations of Kenya the parties shall agree to make the necessary adjustments to the relevant provisions of this Contract observing the principle of the mutual economic benefits of the parties. The Parties shall renegotiate and amend this Contract in good faith so as to achieve the same economic benefits for the Contractor as would have been anticipated had there not been any adverse economic effects. The Parties shall meet within thirty (30) days after the Government's receipt of the notice from the Contractor regarding the adverse economic effects. If the Parties are unable to agree upon the modifications that are required to

this Contract in order to resolve the adverse economic impact on the Contractor within ninety (90) days after the expiration of the preceding thirty (30) day period or within another time frame as may be agreed by the Parties. The matter may be referred to arbitration by either the Contractor or the Government in accordance with Clause 41.1. Production Sharing Contract Block 11A Ministry of Energy Page 48

41. ARBITRATION

1 Except as otherwise provided in this Contract any question or dispute arising out of or in relation to or in connection with this Contract shall as far as possible be settled amicably. Where no settlement is reached within thirty (30) days from the date of the dispute or such a period as may be agreed upon by the parties the dispute shall be referred to arbitration in accordance with the UNCITRAL arbitration rules adopted by

the United Nations Commission on International Trade Law.

2 The number of arbitrators shall be three (3) and shall be appointed as follows: each party shall appoint one (1) arbitrator and so notify the other party of such appointment and those two (2) arbitrators shall appoint the third arbitrator. If any of the arbitrators shall not have been appointed within thirty (30) days either party may request in writing the Secretary General of the International Centre for Settlement of Investment Disputes to appoint the arbitrator or arbitrators not yet appointed and to designate an arbitrator to be the Chairman of the arbitral tribunal. The Secretary General shall forthwith send a copy of that request to the other party. The Secretary General shall comply with the request within thirty (30) days from the receipt thereof or such longer period as the parties may agree. The Secretary General shall promptly notify the parties of any appointment or designation made by him pursuant to the aforesaid request.

c Arbitrators shall be chosen from countries other than those of which the parties are nationals.

d If an arbitrator fails or is unable to act his successor will be appointed in the same manner as the arbitrator whom he succeeds.

34 The arbitrations shall take place in Cape Town, South Africa and shall be in English. The decision of the majority of the arbitrators shall be final and binding on the parties.

Production Sharing Contract Block 11A Ministry of Energy Page 49

5 Any judgement upon the award of the arbitrators may be entered in any court having jurisdiction in respect thereof.

42. ABANDONMENT AND DECOMMISSIONING OPERATIONS

1 Decommissioning Costs

a The Decommissioning Plan is to form part of the Development Plan

and shall include as schedule for the amortization of costs and cost recovery of costs which are estimated to be incurred when the development is decommissioned. b The Contractor shall exercise its good faith judgment to book sufficient accruals for future abandonment and decommissioning operations to cover the expenses which are expected to be incurred under the Decommissioning Plan. The Contractor shall examine on an annual basis the estimated costs of abandonment and decommissioning operations and if appropriate revise them. c The Contractor shall commence booking accruals for abandonment and decommissioning costs in the first Calendar Quarter in which the ratio of cumulative production to overall recoverable reserves reaches sixty percent (60%) unless otherwise agreed in the Development Plan. d All abandonment and decommissioning costs shall be covered as Petroleum Costs at the time that the accrual is entered in the books. e Contractor shall book an accrual on a Calendar Quarter basis for the amount of future abandonment and decommissioning costs according to the following formula:
$$FTA \cdot ECA \cdot AFB \cdot X \cdot CPP \cdot PRR$$
 Where FTA is the amount to be accrued for future abandonment and decommissioning costs in respect of the relevant Calendar Quarter. ECA is the total estimated cost of abandonment and decommissioning operations established pursuant to this Abandonment and Decommissioning Clause. CPP is the volume of Petroleum produced during the Calendar Quarter in which the abandonment and decommissioning accrual was booked. Production Sharing Contract Block 11 A Ministry of Energy Page 50 PRR is the Contractor's estimated remaining recoverable reserves at the end of the Calendar Quarter in which the abandonment and decommissioning accrual was booked as such estimates may be revised by Contractor from time to time. AFB is the accrued abandonment and decommissioning cost balance at the end of the previous Calendar Quarter. 2 Commencement of Abandonment and Decommissioning Operations Abandonment and decommissioning will be scheduled to occur after a Discovery reaches its Economic Limit. Economic Limit shall mean that point in the life of field where expected Revenue to Contractor from Petroleum Operations is insufficient to cover the operating costs to continue Petroleum Operations in accordance with the requirements of the Contract. In addition Revenue means the expected revenues derived from the sale of Petroleum together with any firm tariff income

earned by the field facilities if any. b. On or before the start of the 720 calendar day period prior to the expected start date of abandonment and decommissioning the Minister shall notify the Contractor which of the facilities and assets identified in the Development Plan shall not be abandoned and decommissioned but which shall revert to the ownership of the Government in accordance with Clause 12 of this Contract. No further funds to cover abandonment and decommissioning costs shall be reserved or accrued for the facilities and assets so identified and a corresponding adjustment shall be made if necessary by the Contractor. c. If the Minister decides not to use the said assets he shall have the right to require the Contractor to remove them at the latter's expense in accordance with the said Decommissioning Plan it being understood that the abandonment and decommissioning operations shall be carried out by the Contractor in accordance with good international petroleum industry practice this Contract and in accordance with the time schedule and conditions defined in the Decommissioning Plan which shall have been approved. 3. Abandonment and Decommissioning upon Termination of Development Area a. If the Contractor recommends abandonment and or decommissioning of facilities assets or wells belonging to it in connection with a termination of a Development Area pursuant to subclause 35 of this Contract the Government may elect to take ownership of and continue using such facilities assets and wells by giving the Contractor written notice of such decision within sixty (60) calendar days of the Government's receipt of the Contractor's notice of relinquishment. Upon so notifying the Contractor which notification is effective as of the effective date of the Contractor's relinquishment the Government shall take ownership of and be responsible for abandonment and decommissioning of such facilities assets and wells. Production Sharing Contract Block 11 Ministry of Energy Page 51 If the Government does not elect to continue using such facilities assets or wells the Contractor shall be responsible for their abandonment and decommissioning upon termination of this Contract or of the Development Area within the corresponding Development Area if earlier. Contractor may in consultation with Government defer the abandonment and decommissioning operations for a reasonable length of time if

this would result in operational efficiencies which minimize the cost for all parties. 4 Facilities Assets and Wells Which the Government Continues to Use With respect to any facilities assets or wells which the Government elects to own pursuant to this Contract or pursuant to these Abandonment and Decommissioning provisions, the Government shall conduct such continued use and/or abandon or decommission in accordance with generally accepted international petroleum industry practice and in such a manner that does not interfere with continuing Petroleum Operations and b The Government may abandon and decommission such facilities assets and wells as and when the Government dees. 5 Disbursement of Funds for Abandonment and Decommissioning Costs a The Contractor will advise the Government on an annual basis its best estimate of the projected date of abandonment and decommissioning of the Discovery based on the then current estimate of when the Economic Limit will be reached according to the then current production forecast and realized Petroleum prices. b As and when the Contractor commences booking accruals pursuant to these provisions the Contractor will cause the accrued costs of abandonment and decommissioning operations to be set aside in a separate US interest bearing escrow account in the joint names of the Contractor and the Government established at a mutually acceptable financial institution in London England to be used solely for paying the decommissioning costs. The account is to be funded on a quarterly basis by the Contractor constituting the Contractor and the Government in proportion to the Contractor's then current Participating Interest under this Contract and out of its share of ongoing Cost Oil Cost Gas Profit Oil and Profit Gas attributable to the Contractor and the Government entities or by cash payment if production is insufficient. A final reconciliation shall be submitted to all Entities and the Government following completion of all abandonment and decommissioning operations and adjustments made in accordance with subclause 4.26 below. Production Sharing Contract Block 11 A Ministry of Energy Page 526 Adjustments to Accruals for Abandonment and Decommissioning Costs a If excess accruals which were booked for abandonment and decommissioning costs remain following completion of all abandonment and decommissioning operations then such excess funds shall be distributed to Contractor and Government in the same proportion as the cumulative Profit Oil or

Profit Gas distribution as appropriate to Government and Contractor under Clause 27 of this Contract during the years that the accruals for abandonment and decommissioning costs were booked by Contractor. b Any abandonment and decommissioning cost accruals which have been booked for purposes of removing facilities or assets that the Government deems should not be removed shall be paid

by Contractor to Government concurrently with the transfer of ownership of such facility asset or well to the Government. The Government represents that the transferred funds shall only be used in conjunction with its abandonment and decommissioning operations. If amounts accrued for abandonment and decommissioning costs are insufficient to complete abandonment and decommissioning activities additional funds for such activities shall be provided from a portion of Crude Oil or Natural Gas which Contractor is entitled to receive under this Contract from any Development Area or if no production is available by cash payment by the Entities and the Government in the same ratio as would be applicable for distribution of excess amounts under subclause 4.26a. Production Sharing Contract Block 11 Ministry of Energy Page 531 Any notice and other communication under this Contract shall be in writing and shall be delivered by hand sent by registered post or by facsimile to the following address of the other. 43. Production Sharing Contract Block 11 A Ministry of Energy Page 59 APPENDIX B ACCOUNTING PROCEDURE PART I GENERAL PROVISIONS 1.1 Interpretation. 1.2 Accounting obligation of the Contractor. 1.3 Language and units of accounts. 1.4 Audits. 1.5 Revision of Accounting Procedure. PART II COSTS EXPENSES EXPENDITURE AND CREDITS OF THE CONTRACTOR 2.1 Surface rights. 2.2 Labour and related costs. 2.3 Materials. 2.4 Transportation and employee relocation costs. 2.5 Services. 2.6 Damage and losses to joint property. 2.7 Insurance. 2.8 Legal expense. 2.9 Duties and taxes. 2.10 Office camps and miscellaneous facilities. 2.11 General and administrative expenses. 2.12 Other expenditure. 2.13 Credits under the Contract. 2.14 No duplication of charges and credits.

Production Sharing Contract Block 11 A Ministry of Energy Page 60 PART III FINANCIAL REPORTS TO THE MINISTER PART I GENERAL PROVISIONS The purpose of this Accounting Procedure is to establish methods and rules of accounting for Petroleum Operations and the principles set forth herein shall apply to Petroleum Operations pursuant to the production sharing contract hereinafter referred to as the Contract to which this Appendix is attached. 1.1 INTERPRETATION 1.1.1 DEFINITIONS Controllable Material means material which the Operator subjects to record control and inventory. A list of types of such material shall be furnished to the Government and non-Operator. Joint Account means the set of accounts maintained by the Operator to record all expenditure and other transactions under the provisions of the Contract. Such accounts will distinguish between exploration evaluation development and production costs. After adoption of a Development Plan a separate Joint Account shall be maintained for each Development Area. Joint Property means all property where legal title is acquired and held in connection with Petroleum Operations under the Contract. Material means personal property including supplies and equipment where legal title is acquired and held for use in Petroleum Operations. Non-Operator means the entities constituting the Contractor other than the Operator and the

Government when it participates. Operator means the party designated to conduct the Petroleum Operations

Words not defined herein but which are defined in the Contract shall have the meanings ascribed to them therein.

1.1.2 PRECEDENCE OF DOCUMENT In the event of conflict between the provisions of this Accounting Procedure and the provisions of the Contract the provisions of the Contract shall prevail.

1.2 ACCOUNTING OBLIGATIONS OF THE CONTRACTOR Production Sharing Contract Block 11A Ministry of Energy

Page 61

1.2.1. The Contractor shall maintain financial accounts necessary to record in reasonable detail the transactions relating to Petroleum Operations which shall be prepared in accordance with generally accepted standards of

the international petroleum industry as more particularly but not exclusively set out in this Accounting Procedure.

1.2.2. The Contractor shall provide the Government with a description of its accounting classifications and the Contractor shall use such classifications when preparing its accounts.

1.2.3. The Contractor shall provide detail of the financial accounts in the form of monthly statements which shall reflect all charges and credits related to Petroleum Operations to be prepared on accrual basis so that expenditure is recorded as incurred when title to goods passes or when work is executed and to present the total accounts for the Contract Area and each Development Area and the share of the Operator and each Non Operator.

1.3. LANGUAGE AND UNITS OF ACCOUNTS

1.3.1. All books of accounts shall be maintained in the English language and in United States dollars.

Where necessary for clarification the Contractor may also maintain accounts and records in other language and

currencies provided that such accounts and records shall be prepared in accordance with US GAAP accounting rules and shall be consistent with the generally accepted standards of the international petroleum industry.

1.3.2. It is the intent of this Accounting Procedure that neither the Government nor the Contractor should experience an exchange gain or loss at the expense of or to the benefit of the other. However should there be any gain or loss from exchange of currency it will be credited or charged to the accounts under the Contract.

1.4. AUDITS AND INSPECTION RIGHTS OF THE GOVERNMENT

1.4.1. The Government upon at least thirty (30) days advance written notice to the Contractor shall have the right at its sole expense to audit the Joint Account and related records for any Calendar Year or portion thereof within the twenty four (24) month period following

at the end of such year. Notice of any exception to the Contractor's accounts of any Calendar Year must be submitted to the Contractor within three years from the end of such year.

1.4.2. For the purposes of auditing the Government may examine and verify at reasonable times all charges and credits relating to the Petroleum Operations such as books of account accounting entries Material records and inventories vouchers payrolls invoices and any other documents correspondence and records necessary to audit and verify the charges and credits. Furthermore the auditor shall have the right in connection with such audit to visit and inspect at reasonable times all sites plants facilities warehouses and offices of the Contractor in Kenya directly or indirectly serving the Petroleum Operations in Kenya including visiting personnel associated with those operations.

Production Sharing Contract Block 11 A Ministry of Energy Page 62

1.4.3. All adjustments resulting from an audit agreed shall be rectified promptly in the Contractor's accounts. Any unresolved dispute arising in connection with an audit shall be referred to arbitration in accordance with clause 41 of the Contract.

1.4.4. At the request of the Minister the Contractor shall appoint an independent auditor of international standing approved by the Minister to audit annually the accounts and records of the Petroleum Operations and report thereon and the cost of such audit and report shall be chargeable to the Joint Account and cost recoverable.

1.5. REVISION OF ACCOUNTING PROCEDURE

1.5.1. By mutual agreement between the Government and the Contractor this Accounting Procedure may be revised from time to time by an instrument in writing signed by the parties.

1.5.2. The parties agree that if any procedure established herein proves unfair or inequitable to any party the parties shall meet in good faith and endeavour to agree on the changes necessary to correct that unfairness or inequity.

PART II COSTS EXPENSES EXPENDITURE AND CREDITS OF THE CONTRACTOR

Subject to the provisions of the Contract the Contractor shall bear and pay the following costs and expenses necessary to conduct Petroleum Operations. Such Petroleum Costs are recoverable by the Contractor in accordance with the provisions of the Contract.

2.1. SURFACE RIGHTS

2.1.1. All direct costs necessary to acquire and to maintain surface rights to the Contract area when such costs are paid by the Contractor according to the provisions of the Contract.

2.2. LABOUR AND RELATED COST

2.2.1. Salaries and wages of employees of the operator and its Affiliates for portion of their time spent performing management

administrative legal accounting treasury tax employee relations computer services engineering geological and all other functions for the benefit of Petroleum Operations whether temporarily or permanently assigned to the Contract Area as well as the cost of employee benefits customary allowances and personal expenses incurred under the usual practice of the Operator and its Affiliates and amount imposed by

governmental authorities which are applicable to such employees. Production Sharing Contract Block 11 AM inistry of Energy Page 632.3. MATERIAL 2.3.1. Value of Material charged to the accounts Contract. The

cost of Material equipment and supplies purchased or furnished by the Operator for use in Petroleum Operations shall be charged to the Joint Account on the basis set forth below. So far as it is reasonably practical and consistent with efficient and economical operations only such Material shall be purchased for or transferred to the Joint Property as may be required for immediate use and for approved work programmes and the accumulation of surplus stock shall be avoided. 2.3.1.1. Except as otherwise provided in subpart 2.3.1.2 below Material purchased leased or rented shall be charged at the actual net cost incurred by the Operator. Net cost shall include but shall not be limited to such items as vendors invoice price transportation duties fees and applicable taxes less all discounts actually received. 2.3.1.2. Material purchased or transferred from the Contractor or its Affiliates shall be charged at the

price specified here below a New Material condition A shall be valued at the current international net cost which shall not exceed the price prevailing in normal arms length transactions on the open market. b Used Material c conditions B C and D. i Material which is in sound serviceable condition and is suitable for reuse without reconditioning shall be classified as condition B and priced at seventy five percent 75 of the current price of new Material defined in a above. ii Material which cannot be classified as condition B but which after reconditioning will be further serviceable for its original functions shall be classified as condition C and priced at fifty percent 50 of the current price of new Material as defined in a above. The cost of reconditioning shall be charged to the reconditioned Material provided that the value of condition C Material plus the cost of reconditioning do not exceed the value of condition B Material. condition D and priced at a value commensurate with its use. iii Material whi

ch cannot be classified as a condition B or condition C shall be classified as Production Sharing Contract Block 1

1A Ministry of Energy Page 64 2.3.2. INVENTORIES 2.3.1.1. At reasonable intervals inventories shall be

taken by the Operator of all Controllable Material.

The Operator shall give ninety (90) days written notice of intention to take such inventories to allow the Minister and non-Operator to be represented when any inventory is taken. Failure of any party to be represented after due

notice given shall bind such party to accept the inventory taken by the Operator. 2.3.2.2. The Operator shall clearly

state the principles upon which valuation of the inventory has been based. 2.3.2.3. Whenever there is a sale or

change of interest in the Joint Property a special inventory may be taken by the Operator provided the seller and purchaser of such interest to bear all of the expenses thereof. In such cases both the seller and the purchaser

shall be entitled to be represented and shall be governed by the inventory so taken. 2.4. TRANSPORTATION AND EMPLOYEE RELOCATION COSTS 2.4.1. Transportation of Material and other related costs such as

origin services expediting crating dock charges forwarders charges surface and air freight and customs clearance and other destination services. 2.4.2. Transportation of employees as required in the conduct of Petroleum

Operations including employees of the Operator's Affiliates whose salaries and wages chargeable under sub parts 2.2.1 and 2.5.2. 2.4.3. Relocation costs of the Contract Area vicinity of employees permanently or temporarily

assigned to Petroleum Operations. Relocation costs from the Contract Area vicinity except when an employee is reassigned

to another location classified as a foreign location by the Operator. Such costs include transportation of employee families and their personal and household effects and all other relocation cost in accordance with

the usual practice of the Operator and its Affiliates. 2.5. SERVICES 2.5.1. The actual cost of contract services professional consultants and other services performed by third parties other service provided by the entities constituting the

Contractor or their Affiliates but the prices paid by the Contractor shall not be higher than those generally charged for comparable services. 2.5.2. Costs of technical services such as but not limited to engineering and related data processing performed by the Contractor

and its Affiliates for the direct benefit of Petroleum Operations engineering and related

and its Affiliates for the direct benefit of Petroleum Operations engineering and related

data processing performed by the Contractor provided such costs shall not exceed those currently prevailing if performed by third parties in normal arms length transaction for like services. Production Sharing Contract Block 11 A Ministry of Energy Page 65

2.5.3. Costs of use of equipment and facilities for the direct benefit of the Petroleum Operations furnished by third parties Contractor or its Affiliates at a rate commensurate with the costs of ownership or rental and the cost of operation thereof but such rates shall not exceed those currently prevailing in the general vicinity of the Contract Area in normal arms length transactions on the open market for like services and equipment.

2.6. DAMAGES AND LOSSES TO JOINT PROPERTY

2.6.1. All costs or expenses necessary for the repair or replacement of Joint Property resulting from damages or losses incurred by fire flood storm theft or any other cause except insofar as those costs and expenses are caused by the willful misconduct of the Operator. The Operator shall furnish the Government and non Operators written notice of damages or losses for each damages or loss in excess of United States Dollars Fifty Thousand U.S\$50,000.00 as soon as after the loss as practicable.

2.7. INSURANCE

2.7.1. Premium for insurance required under the Contract provided that a party not participating in such insurance shall not share in the cost unless such insurance is compulsory under the law of Kenya and provided further that if such insurance is wholly or partly placed with an Affiliate of the Contractor such premium shall be recoverable only to the extent generally charged by competitive insurance companies other than an Affiliate of the Contractor.

2.7.2. Actual expenditure incurred in the settlement of all losses claims damages judgments and other expenses for the benefit of the Petroleum Operations.

2.8. LEGAL EXPENSES

2.8.1. All costs or expenses of litigation or legal service otherwise necessary or expedient for the protection of the Joint Property or the interest in the Contract Area including but not limited to legal counsel salaries and fees court costs cost of investigation or procuring evidence and amounts paid in settlement or satisfaction of any such litigation or claims. These services may be performed by the Operator's legal staff or an outside firm as necessary.

2.9. DUTIES AND TAXES

2.9.1. All duties taxes except taxes based on income fees and governmental assessments of every kind and nature which have been paid by the Entities with respect to the Contract. Production Sharing Contract Block 11 A Ministry of Energy Page 66

2.10. OFFICE CAMPS AND ADMINISTRATIVE

EXPENSES 2.10.1. Cost of establishing, maintaining and operating any office, sub-offices, camps, warehouse housing and other facilities directly serving Petroleum Operations. The cost shall be allocated to the operations served on an equitable basis.

2.11. GENERAL AND ADMINISTRATIVE EXPENSES 2.11.1. These charges shall be made monthly for services of all personnel and offices of the Operator and its Affiliates outside Kenya and those not otherwise provided herein. It shall include service and related office cost of personnel performing management, administrative, legal, accounting, treasury, tax, employee relations, computer service, purchasing, engineering, geological, geophysical and all other functions for the direct benefit of Petroleum Operations. The charges shall be made as follows: This charge will be at the rate of Three Percent (3%) of total costs per month during any period in which exploration operations are being conducted. For the period commencing on the date that the contractor reports a commercial discovery to the Government to the discovery to Government as required in clause 19.5 of the contract, if terminated, the provisional rates shall be Three Percent (3%) of total costs. The charges shall be as follows: The provisional charges for such costs are based upon operators' cost experience and estimates of cost to be incurred in conduct of the petroleum operations and are subject to quarterly adjustment as operators' costs indicate are necessary and equitable. Within ninety (90) days following the end of each quarter, the operator shall determine the actual cost incurred in performing such services and shall charge or credit the joint account for the difference between the actual cost incurred for the quarter and the provisional rate charged during the quarter. On request to the Government, the operator shall make available at its home office all supporting documents used for the determination of the charges. Such documents shall include but shall not be limited to time allocation reports prepared by employees providing services described in subpart 2.11.1, cash vouchers supporting cash expenses included in overhead pool, inter-company billings, supporting charges for services provided by operators' affiliates, e.g., building rental, telecommunications paid by the operator's parent company, summary or impersonalized computer runs, supporting salaries, wages and employee benefits and others such documents.

ments as may be mutually agreed. Production Sharing Contract Block 11 A Ministry of Energy Page 672. 12. O

THERE EXPENDITURE 2.12.1. Other reasonable expenditure not covered or dealt with in the foregoing provisions which are incurred by the Operator and/or the other entities constituting the Contractor and their respective Affiliates for the necessary proper economical and efficient conduct of Petroleum Operations. 2.12.2. Interest incurred on loans raised by the Contractor for capital expenditure in Petroleum Operations under the Contract at a rate not exceeding prevailing commercial rates may be recoverable as Petroleum Costs. 2.13. **CREDITS UNDER THE CONTRACT** The net proceeds of the following transaction will be credited to the account under the Contract: a) The net proceeds of any insurance or claim in connection with the Petroleum Operations or any assets charged to the accounts under the Contract; b) Revenue received from outsiders for the use of property or assets charged to the accounts under the Contract; c) Any adjustment received by the Contractor from the suppliers, manufacturers or their agents in connection with defective equipment or Material the cost of which was previously charged by the Contractor under the Contract; d) Rentals, refunds or other credits received by the Contractor which apply to any charge which has been made to the accounts under the Contract; e) Proceeds from all sales of surplus Material or assets charged to the account under the Contract; and f) The prices originally charged to the accounts under the Contract for inventory Material subsequently exported from Kenya. 2.14. **NODUPLICATION OF CHARGES AND CREDITS** Notwithstanding any provision to the contrary in this Accounting Procedure, it is the intention that there shall be no duplication of charges or credits in the accounts under the Contract. Production Sharing Contract Block 11 A Ministry of Energy Page 68

PART III FINANCIAL REPORTS TO THE MINISTER 3.1. The reporting obligations provided for in this Part III shall unless the contrary is stated apply to the Operator. 3.2. The Operator shall submit annually to the Minister the following: 3.2.1. The annual work programme and budget three months before the beginning of the year to which they apply and the budget shall be analyzed by item within the exploration programme, Evaluation programme, development programme and production programme and show for each major budget item with reasonable detail the following: a) Latest forecast

cumulative costs anticipated at the start of the budget year b Cumulative expenditure anticipated at the end of each quarter of the budget year and c Expenditure anticipated in future years to complete the budget item. 3.2.2. As scheduled, the service and supply contracts to be entered into during the forthcoming year exceeding the equivalent of Five Hundred Thousand U.S. Dollars U.S. 500,000.00 per contract showing the anticipated tender date and approximate value and the goods or services to be provided 3.2.3. The audit report required by subpart 1.4.4 of this Accounting Procedure stating whether in the opinion of the auditors of the Contract a The last annual expenditure report records the expenditure of the Contractor truly and fairly in accordance with the provisions of the Contract b The report on petroleum revenues submitted truly and fairly determined the arms length value of disposal of petroleum during the year. 3.3. the Operator shall submit quarterly within thirty (30) days of each quarter to the Minister 3.3.1. a report of expenditure and receipts under the Contract analyzed by budget item showing a Actual expenditure and receipts for the quarter in question b Actual cumulative cost to date Production Sharing Contract Block 11 A Ministry of Energy Page 69 c Latest forecast cumulative cost at the year end d Variations between budget costs and actual costs and explanation thereof and e With effect from adoption of the Development Plan the total payroll costs segregated between Kenyan and non-Kenyan personnel and the total expenditure segregated between Kenyan and non-Kenyan goods and services. 3.3.2. A cost recovery statement containing the following information a Recoverable Petroleum Costs carried forward from the previous quarter if any b Recoverable Petroleum Costs incurred and paid during the quarter c Total recoverable Petroleum Costs for the quarter plus a above d Quantity and value of Cost Oil taken and separately disposed of by the Contractor for the quarter e Amount of Petroleum recovered for the quarter f Amount of recoverable Petroleum Cost to be carried forward into the next quarter if any and g Value of Government's share of production taken by the Contractor pursuant to clause 27 of the Contract. 3.4. A copy of each contract for goods or services valued in excess of Five Hundred Thousand U.S. Dollars USD 500,000.00 shall be provided to the Minister as soon as practicable after its execution. 3.5. After the commencement of production the Operator shall within fifteen (15) days after the end of each month submit a production report to the Minister showing for each Development Area the quantity of Petroleum a Held in stock at the beginning of the month b Produced during the month c Lifted and by whom d Lost and consumed in Petroleum

tion Agreement made and entered into on this day of by and between the Gov
ernment of the Republic of Kenya hereafter referred to as the Government represented for the purpose of this a
greement by the Minister for the time being responsible for energy hereinafter referred to as the Minister and E
RH C Energy AG C Profond Limited hereinafter referred to as the Contractor. WHEREAS the Government and
the Contractor have entered into a production sharing contract referred to as the Contract to which this Append
ix is attached WHEREAS the Government may desire to exercise its option under clause 28 of the Contract and W
HEREAS the Parties wish to set forth the terms and conditions under which the Government has agreed to parti
cipate in the Petroleum Operations in the event such an option is exercised NOW THEREFORE the Parties agr
ee as follows 1 INTERPRETATION 1. In this participation Agreement words in the singular includes the
plural and vice versa and
except where the context otherwise requires A F E means an authorization for expenditure Government inclu
des an appointee as defined in sub clause 28.2 of the Contract Joint account means the accounts
maintained by the operator to record all transactions related
to operations in the participation area under this Participation Agreement Joint property means all property
acquired and held for use in connection with operations under

this Participation Agreement Nonoperator means a party other than the operator Operating committee means the committee established by Article 4 hereof Operator means the party designated to conduct the petroleum operations pursuant to Article 3 hereof and its successors Production Sharing Contract Block 11 A Ministry of Energy Page 73 Participating interest means the respective undivided interest of each of the parties as it may exist at any given time in the participation area and under this Participation Agreement Participation area means a development area in which the Government elects to participate under the Contract Participation dates means the effective date of participation by the Government as defined in sub clause 28.3 of the Contract Participation work programme means a programme of the petroleum operations under this Participation Agreement Parties means collectively the Government and the entities consulting the Contractor or their respective successors or assignees. party means any one of the parties Year means calendar year.

2. Words not defined in this Participation Agreement but which are defined in the Contract have the meanings given to them in the Contract.

3. In the event of any conflict between the Contract and this Participation Agreement the Contract shall prevail and this Participation Agreement shall be deemed amended accordingly.

2. PARTICIPATING INTERESTS

1. When and if the Government elects pursuant to clause 28 of the contract to participate in petroleum operations in a participation area the Contractor constituting the contractor shall assign proportionately to the Government a part of its interest in the development area so that the rights, interest and obligations of the contractor and the Government in such area shall be owned and borne as of the participation date in undivided interests as follows: Government... or such lesser amount as may be elected in accordance with clause 28 of the Contract Contractor... or such greater amount as may remain after the Government's selection.

2. In the event a party shall transfer in whole or in part its Participating interest pursuant to clause 35 of the Contract and Article 9 of this Participation Agreement the participating interest of the parties therein shall be revised accordingly.

Production Sharing Contract Block 11 A Ministry of Energy Page 74

3. OPERATOR AND DUTIES OF OPERATOR

1. The operator shall be the party acting as operator on the participation date and the operator shall have the rights and obligations of an operator in respect of its participating interest.

2. The operator shall serve as operator until it resigns or is removed pursuant to the provisions of

this Article or until it ceases to hold a participating interest thereunder. In the event that an operator assigns the whole of its participating interest hereunder to one of its affiliates such affiliate shall become operator hereunder in the former's place.

3. Upon the affirmative vote of all the non-operator parties the operator shall be removed as operator in case of any one of the following:

- a. Bankruptcy of the operator or its parent company;
- b. Assignment for the benefit of the operator's creditors;
- c. Appointment of a receiver or manager with respect to the whole or any part of the property or assets of the operator;
- d. Entitlement of any person other than an affiliate of the operator to appoint a majority of the members of the board of directors of the operator by the reason of any act, default or neglect of the operator;
- e. Failure without justification by the operator to pay a sum due to or in the name of the joint account for more than sixty (60) days;
- f. The operator's material breach of this Participation Agreement which remains unremedied for more than thirty (30) days after the operator is notified by non-operator parties of such breach;
- g. Reduction in the operator's participating interest to percent or less.

4. An operator may at any time resign as operator by giving to the other parties notice in writing of such resignation. Such resignations shall be effective one hundred eighty (180) days after the date of notice thereof or on the date on which a successor operator appointed by the parties other than the operator shall be ready and able to assume the obligations of operator in accordance with all the provisions of this Participation Agreement whichever shall first occur.

5. Should an operator so resign or be removed as successor operator shall immediately be appointed by the operating committee. A party having been removed as operator may not vote to succeed itself as operator. Such appointment parties holding not less than the percentage figure of the remaining participating interests set out in Article 4.6. For the purpose of this Article operator includes any of its affiliates holding a participating interest in this Participation Agreement.

Production Sharing Contract Block 11A Ministry of Energy Page 756.

Removal or resignation of an operator shall not in any way affect its rights or obligations as a non-operator party to this Agreement. On the effective date of removal or resignation the operator shall deliver to the successor operator any and all funds, equipment, materials, apparatus, tenancies, books, records, data, interpretation, information and rights acquired by and in the custody of the operator for the joint account of the parties including

g available petroleum not delivered to the parties shall with the successor or operator prepare an inventory of joint property adjusting the joint account accordingly and shall cooperate as far as possible in effecting a smooth transfer of operating responsibilities. 7. An operator that is removed under Article 33g hereof may charge to the joint account all reasonable and necessary expenditure incurred in demobilizing and repatriating personnel and equipment. 8. The operator shall have control of the petroleum operations in the participation area and shall have exclusive custody of all material, equipment and other property acquired therefore and shall perform the duties under this Participation Agreement diligently and in accordance with good international petroleum industry practice and sound and accepted engineering management and accounting principles. The operator shall not be liable to any nonoperator for any acts or omissions, claims, damages, losses or expenses in connection with or arising out of this Participation Agreement or the contractor petroleum operations, save those caused by gross negligence or wilful misconduct of the operator. 9. The operator shall consult with nonoperators and advise them on all matters arising from the petroleum operations. b. Comply with the decisions of the operating committee. c. Keep the participating interests and all property acquired or used free from liens except for those authorized by Article 6 hereof and d. Pay the costs of the petroleum operations under this Participation Agreement promptly and make proper charge to nonoperators. 10. The operator shall submit a copy of an AFE to the nonoperators for each budget item of capital expenditure in the approved participation work programme and budget that costs more than U.S. dollars. U.S. Production Sharing Contract Block 11A Ministry of Energy Page 76 Where it is necessary to complete an expenditure in a budget item in the approved participation work programme the operator may exceed the budget for the budget item by the lesser of ten per cent therefor U.S.D. and shall report promptly such excess expenditure to the nonoperators. The operator may spend not more than U.S. dollars USD .. on petroleum operations in the

participation are not included in an approved participation work programme provided that such expenditure shall not be for items previously rejected by the operating committee. The operator shall report promptly that expenditure to the nonoperator and if it is approved in accordance with Article 46 the operator may make further expenditure thereon or on other items not exceeding U.S. dollars U.S. in that year. The limits in this Article 310 may be changed from time to time by the operating committee. In the case of emergency the operator may make such immediate expenditure and take such immediate action as may seem necessary for the protection of life or property or the prevention of pollution and such emergency expenditures shall be reported promptly to the parties by the operator. 11. A nonoperator may inspect the participation area, the petroleum operations and the books, records and other information of the operator pertaining thereto. The operator shall supply to a nonoperator by telephone, telefax, telegraph or telex daily reports on drilling and such other reports in writing normally provided by an operator to a nonoperator in the international petroleum industry including but not limited to reports on well tests and core analysis and copies of drilling logs, well surveys and velocity surveys. The operator shall furnish any other information reasonably requested by a nonoperator if such information is readily available. 12. The operator shall obtain and maintain all insurance required by law and such other insurance as the operating committee may from time to time determine provided that in respect of such other insurance any party may elect not to participate provided such party gives notice to that effect to the operator. The cost of insurance in which all the parties are participating shall be for the joint account and the cost of insurance in which less than all the parties are participating shall be charged to such parties individually. The operator shall in respect of any insurance promptly inform the parties participating therein when it is taken out and supply them with copies of the relevant policies when the same are issued and arrange for the parties participating therein according to their respective participating interest to be named as coinsureds on the relevant policies with a waiver of subrogation in favour of the parties and Production Sharing Contract Block 11A Ministry of Energy Page 77 c. Duly file all claims and take all necessary and proper steps to collect any proceeds and if all the parties are participating therein credit them to the joint account or if less than all the parties are participating therein credit them to the participating parties. Subject as stipulated above any of the parties

may obtain such insurance as it deems advisable for its own account at its own expense provided such insurance is acceptable under the applicable law. If the operator is unable to obtain such other insurance required by the operating committee it shall so advise the parties and thereafter it shall be discharged of its obligation to obtain such insurance. The operator shall take all reasonable steps to ensure that all contractors including subcontractors performing work in respect of the petroleum operations and the joint property obtain and maintain all insurance required by the law and obtain from their insurers a waiver of subrogation in favour of the parties.

13. The operator may prosecute defend and settle claims and litigations arising out of the petroleum operations and may compromise or settle such claims or litigations which involve an amount not exceeding the equivalent of one hundred thousand U.S. dollars U.S. 100 000 without the approval of the operating committee. Any claim or litigation involving an amount in excess of the equivalent of one hundred thousand U.S. dollars U.S. 100 000 shall be reported promptly to the nonoperators and a nonoperator shall have the right to be represented by its own counsel at its expense in the compromise settlement or defence of such claims or litigation.

14. The operator shall fulfil the reporting obligations of the Contractor as specified in the [Contract] unless otherwise stipulated in this Participation Agreement and the Contract.

4. OPERATING COMMITTEE AND WORK PROGRAMMES

1. The parties shall establish an operating committee to supervise and control the petroleum operations. The operating committee shall consist of one representative appointed by each of the Parties provided always that more than one of the Parties may appoint the same representative who shall represent them separately. Production Sharing Contract Block 11 A Ministry of Energy Page 78 Each party shall as soon as possible after the date of this Participation Agreement give notice to all the other parties of the name of its representative and of an alternate on the operating committee. Such representative may be replaced from time to time by like notice. Representatives may bring to meetings of the operating committee such advisers as they consider necessary. The representative of a Party or in the absence of the representative his alternate shall be deemed authorized to represent and bind such party with respect to any matter which is

within the powers of the operating committee. The representative of the party which is the operator shall be the chairman of the operating committee and shall report the proceedings.

2. Except as otherwise provided in this Participation Agreement the powers and duties of the operating committee shall include:

- a. The consideration and determination of all matters relating to general policies, procedures and methods of operation hereunder;
- b. The approval of any public announcement or statement regarding this Participation Agreement or the petroleum operations;
- c. The consideration, revision and approval or disapproval of all proposed participation work programmes, budgets and AFEs prepared and submitted to it pursuant to the provisions of this Participation Agreement;
- d. The determination of the timing and location of all wells drilled under this Participation Agreement and any change in the use or status of a well;
- e. The determination of whether the operator will represent the parties regarding any matters or dealings with the Minister, any other governmental authorities or third parties in so far as the same relate to the petroleum operations, provided that there is reserved to each party the unfettered right to deal with the Minister or any other governmental authorities in respect of matters relating to its own participating interest and for the consideration and if so required the determination of any other matter relating to the petroleum operations which may otherwise be designated under this Participation Agreement for reference to it.

3. The operator shall when requested by a representative of any party call a meeting of the operating committee. The operator may do so at any time to keep the parties informed on the petroleum operations.

4. A request to call a meeting of the operating committee shall state the purpose of that meeting and except in an emergency the operator shall give the parties at least fifteen (15) days written notice with an agenda of the meeting but where a meeting is called in an emergency the operator shall give as much notice thereof as possible by telephone, telex or telegraph and except with the consent of all the parties the business of a meeting shall be only that for which it was called.

Production Sharing Contract Block 11A Ministry of Energy Page 795.

The operator may instead of calling a meeting submit matters to the parties by written notice upon which each party may vote within the period prescribed in the notice which shall not be less than three (3) days.

Production Sharing Contract Block 11 A Ministry of Energy Page 819. Where a party fails to pay an amount required to be paid hereunder and remains in default for ninety (90) days the participating interest share of the defaulting party may be declared forfeit by the nondefaulting parties unless the amount due is an advance and the defaulting party provides an irrevocable letter of credit or other security acceptable to the operator for the amount due. 10. When the participating interest share of a defaulting party is declared forfeit the operator shall give notice thereof to all the parties and that share shall vest rateably unless otherwise agreed in the nondefaulting parties without payment of compensation and the defaulting party shall at its sole expense take all steps necessary to vest that share accordingly and the defaulting party hereby appoints the operator to act as its attorney to execute any and all documents required to effect such transfer. Notwithstanding the transfer of a defaulting party's participating interest share in accordance with the foregoing the defaulting party shall remain liable for its proportionate share of the commitments incurred before its rights lapsed. 11. Where a party is in default of payment the remaining parties shall advance the operator on demand a share of that payment in proportion to the participating interests of those parties. Any payments received from a defaulting party shall be credited to the accounts of the nondefaulting parties who advanced funds on behalf of the defaulting party. 7. MATERIAL AND EQUIPMENT 1. All material and equipment acquired by the operator for petroleum operations hereunder shall be owned by the parties in undivided shares in the proportion of their respective participating interests. 2. Except as may be otherwise approved by the operating committee the operator shall purchase for the joint account of the parties only such material and equipment as are reasonably required in the conduct of operation provided for in approved participation work programmes or revision thereof the operator shall not stockpile material or equipment for future use without the approval of the operating committee. 3. Jointly acquire

ed material or equipment declared by the operator to be surplus shall be disposed of in such manner as the operating committee may direct or if the book value thereof does not exceed..... U.S. dollars U.S..... the operator shall dispose of same in such manner as the operator shall deem appropriate provided however that each Party may if practicable separately take or sell and dispose of its interest in such material or equipment or may by notice in writing and subject to revocation at will authorize the operator for a period or periods of not more than one year each to sell such material and equipment for the account of the party or parties giving such authorization. Each party shall have the right to purchase at the prevailing market price in the area material or equipment which the operator has declared to be surplus and which the operator intends to dispose of on the open market. Production Sharing Contract Block 11 A Ministry of Energy Page 824. Subject to the provision of clause 12 of the Contract upon termination of this Participation Agreement the operator shall salvage for the jointly owned material and equipment which can reasonably be salvaged to be disposed of as provided in Article 73 hereof.

8. RELATIONSHIP OF THE PARTIES AND TAX PROVISIONS

1. The parties declare that it is not their intention by entering into this Participation Agreement to create or be considered as a partnership or any other similar Contractor.

2. Each party shall be responsible for and shall pay its own taxes to the Kenyan authorities on its operations hereunder.

3. It is recognized that a party hereunder may be subject to the laws of its place of incorporation in addition to the laws of Kenya. For United States Federal income tax purposes each of the parties hereto which is subject to United States Income Tax laws U.S. Party hereby elects to be excluded from the application of all of the provisions of Subchapter K chapter 1 Subtitle A of the United States Internal Revenue Code of 1954 as permitted and authorized by Section 761 of that Code and the regulations promulgated thereunder. Should there be any requirement that each U.S. Party evidence this election each U.S. Party agrees to execute such documents and furnish such other evidence as may be required by the United States Federal Internal Revenue Service. Upon the request of any U.S. Party the Operator shall provide data necessary for filing United States tax returns.

9. SURRENDER AND TRANSFERS

1. Any party desiring that all of the participation area be surrendered voluntarily

shall notify the other parties in writing accordingly specifying its reasons thereof and thereafter a Each party shall within thirty 30 days after receipt of the notice inform the other parties in like manner whether it concurs in or opposes the proposed surrender but all the parties concur in the proposed surrender the participation area shall be surrendered as soon as possible under the Contract if one or more of the parties shall oppose the proposed surrender the party or parties desiring to surrender shall upon request by the opposing parties transfer and convey without warranty of title free and clear of all liens charges and encumbrances and without right to compensation all of its or their interests in the participation area and material left thereon to said opposing party or parties each in the proportion that its or their participating interest hereunder bears to the sum of the participating interests of all the opposing parties or as otherwise agreed by the opposing parties. The transferring party or parties shall bear Production Sharing Contract Block 11 A Ministry of Energy Page 83 its or their participating interest shares of cost expenses and liabilities incurred hereunder which are attributable to the participation area for the period prior to the effective date of such transfer of interest its or their participation interest shares of all costs and expenses incurred by the operator after such date under any contracts entered into by the operator in execution of a participation work programme theretofore approved by the operating committee and its or their participating interest shares of any accrued obligations under the contract which are not included rights or other obligations in connection therewith. A transfer under paragraph c above shall be effective as among the parties thirty 30 days after the opposing parties receipt of the transferring party's first mentioned notice proposing surrender. Thereafter until such transfer has received whatever approvals may be necessary under the provisions of the Contract or applicable law the transferring Party or parties shall hold at most legal but not equitable title to the interests transferred for the benefit of the opposing party or parties. The transferring party or parties receiving the interests transferred shall execute and deliver such documents and do such other acts as may be necessary to give legal effect to such transfer to obtain all approvals thereof as may be required from the Minister and otherwise to effectuate the purpose of this

Paragraph. e Notwithstanding the foregoing if the operating committee determines that percent or more of the estimated discovered and recoverable reserves under the participation area have been produced no party shall be allowed to surrender or required to transfer interest in this Participation Agreement and the Contract without the unanimous consent of all parties.

2. No transfer of any interest under this Participation Agreement and the Contract shall be made by any party otherwise than in respect of an undivided interest in all or part of its participating interest in this participation Agreement and the Contract and in accordance with the following provisions of this Article 9.3.

If any party shall receive a bona fide offer for the purchase of all or a portion of an offeree party's participation interest in this Participation Agreement and the participation area which the offeree party is willing to accept the offeree party shall give notice thereof in writing to the other parties.

Production Sharing Contract Block 11 A Ministry of Energy Page 84 a Such notices shall set forth the identity of the offeror, the terms and conditions including monetary and other considerations offered in good faith and all other relevant particulars.

b For a period of thirty (30) days next following the receipt of such notice the other parties shall have an option to purchase the entire interest proposed to be sold on the same terms offered by the offeror or as set forth in the respective offer.

c If more than one of the parties should exercise its right to purchase said interest each shall have the right to acquire such interest in the proportion that the Participating Interest thereunder of such party bears to the sum of the Participating interests of all the parties exercising such right except as they may otherwise agree.

d If within such a period of thirty (30) days none of the other parties shall exercise its right to purchase said interest the sale to said offeror may be made under the terms and conditions set forth in the notice given provided that the sale shall be consummated within six (6) months from the date of such notice and that the sale and any transfers shall be in accordance with the Contract and applicable law.

e For the purpose of this paragraph an offer to purchase shall also include an acceptance of a Contractor's offer to sell.

4. The limitations of Article 9.3 shall not apply to transfer of a participating interest by a party to an affiliate of such party or by the Contractor to an acceptable assignee as defined in the Contract or by the Government to an appointee or from an appointee to another appointee nor shall they apply to a transfer of

a

participating

interest effected as a result of merger, consolidation, reorganization or sale of capital stock of the parent company of a Party. 5. Every transfer of a participating interest in the participation area shall be made expressly subject to this Participation Agreement and shall include a corresponding interest in jointly acquired equipment and facilities.

No transfer of an interest thereunder shall be effective unless made by an instrument in writing duly executed by the parties thereto in accordance with applicable law and until the same has received all consents required under this Participation Agreement and the Contract. A transfer shall provide that the transferor remains liable for obligations incurred before the date of transfer and such obligations shall in addition become the obligations of the transferee. Whereafter the transfer, the transferee or transferor owns a participating interest of less than five percent, they shall be jointly represented. 6. A transfer other than to an affiliate or an appointee shall be of sufficient financial standing to meet its participating interest share of its obligations under the Contract and this Participation Agreement. In the event of a transfer of a participating interest to an affiliate of a party, the transferor party shall remain responsible for the full performance by the affiliate of the obligations undertaken by said party under this Participation Agreement and the Contract and if such affiliate ceases to be an affiliate, the participating interest shall be transferred back to the party. Production Sharing Contract Block 11 Ministry of Energy Page 857. In this Article, transfer means a transfer, assignment, sale or other disposal of the interest of a party. 10. DISPOSAL OF PRODUCTION 1. Each party shall separately own, take in kind and dispose of its participating interest share of that portion of the petroleum produced and saved from the participation area to which the Contractor is entitled under clause 27 of the Contract. 2. Within six (6) months following the signing of this Participation Agreement, the parties shall, in accordance with the provisions of the Contract and in light of the gathering and transportation facilities available under the adopted development plan, in good faith, establish a set of rules governing the scheduling, lifting and other necessary provisions for the crude oil off-takes of the parties consistent with good international petroleum industry practice, which shall provide among other things such detailed terms and procedures as required for: a) Short-term production forecasts; b) Nomination and calculation of entitlements; c) Scheduling of deliveries; d) Lift

ed in the proposing party's notice within the period thereof provided such project is considered as being approved by the operating committee and the provisions of Article 48 of this Participation Agreement shall apply. Production Sharing Contract Block 11 A Ministry of Energy Page 875. In the event that less than all the parties elect to participate in the project the parties which elected to participate hereafter referred to as sole risk parties shall be entitled to have the sole risk project carried out. The interest of each sole risk party in a sole risk project shall be in proportion to its participation interest in this Participation Agreement or in such other proportion as the sole risk parties may agree. Any sole risk project shall be carried out at the sole risk cost and expense of the sole risk parties in the proportion of their respective interests.

6. A sole risk project shall be carried out by the operator on behalf of the sole risk parties under the provisions of this participation agreement. No sole risk project may be commenced after one hundred and eighty (180) days following the expiration of the notice period prescribed in Article 11.3 but the operator shall commence work as promptly as reasonably possible if the notice period of seventy-two (72) hours set forth in Article 11.3 applies. The operator shall complete the sole risk project with due diligence provided that it does not jeopardize or unreasonably interfere with petroleum operations carried out under the Contract and adopted by the operating committee pursuant to Article 4 of this Participation Agreement. The sole risk parties may use for the sole risk project any production handling processing and/or transporting facilities which are joint property subject to a determination by the operating committee as to usage fees availability of capacity and production compatibility.

7. In connection with any sole risk project the sole risk project will be carried out under the overall supervision and control of the sole risk parties in lieu of the operating committee. The computation of costs and expenses of the sole risk project incurred by the sole risk parties shall be made in accordance with the principles set out in Exhibit A attached hereto. The operator carrying out the sole risk project shall maintain separate books records and accounts including bank accounts for the sole risk project which shall be subject to the same right of examination and audit by the sole risk parties. The costs and expenses of the sole risk project shall not be reflected in the statements and

billing rendered by the operator for petroleum operations under the Participation Agreement and Production Sharing Contract Block 11 A Ministry of Energy Page 88

8. If the operator is carrying out a sole risk project on behalf of the sole risk parties, the operator shall be entitled to request the sole risk parties in connection with the sole risk project to advance their share of the estimated expenditure and shall not use joint account funds or be required to use its own funds for the purpose of paying the costs and expenses of the sole risk project. Furthermore, the operator shall not be obliged to commence or, having commenced, to continue the sole risk project unless and until relevant advances have been received from the sole risk parties.

8. The sole risk parties shall indemnify and hold harmless the other parties against all actions, claims, demands and proceedings whatsoever brought by any third party arising out of or in connection with the sole risk project and shall further indemnify the other parties against all damages, costs, losses and expenses, whether directly or indirectly caused to or incurred by them as a result of anything done or omitted to be done in the course of carrying out such sole risk project.

9. Subject to the provision of Article 11.10 below, the sole risk project, including data and information, is wholly owned by the sole risk parties in accordance with the provisions of the Contract, but the sole risk parties shall keep the other parties informed about the project. In the event that such project results in an increase of production of petroleum from the participation area, the portion of such increase which is available to the Contractor shall be owned solely by the sole risk parties. Each of them shall have the right and obligation to take in kind and separately dispose of its proportional share of supplementary petroleum production.

10. Any party or parties which are not participating in the sole risk project may, by giving thirty (30) days' notice to the sole risk parties, become participants in such project at any time after the sole risk parties have recovered from the supplementary petroleum production the following sum of money to which they are entitled on the project:

In the case of a project under Article 11.2a hereof, six hundred percent (600%) of the Sole Risk cost of such project plus one hundred percent (100%) of the cost of operating such well incurred by the Sole Risk Parties.

In the case of a project under Article 11.2b hereof, percent (.....) of the Sole Risk cost of such project plus one hundred percent (100%) of the cost of operating such facilities. The value of the supplementary production to which a Sole Risk Party is entitled shall be the market value in sales at arms length determined

ed in accordance with clause 26 of the Contract. From and after the election of any party or parties to become participants in such project all relevant wells facilities equipment and other property appurtenant thereto shall be owned jointly by the participating parties and each of the participating parties shall be entitled to receive its proportional share of the supplementary petroleum production. Production Sharing Contract Block 11 A Ministry of Energy Page 89 12. CONFIDENTIALITY 1. All information related to the petroleum operations shall be confidential and shall not be disclosed to a person other than a party except to an affiliate of the Government and other public authorities to the extent necessary for the purpose of any applicable law or stock exchange to which a party is obliged to make disclosure. Contractors consultants legal counsel or arbitrators of a Party where disclosure is essential a bona fide prospective purchaser of an interest of a Party in the Contract but that purchaser

shall undertake to treat that information as confidential and where disclosure is essential or a person to whom disclosure has been agreed by the Parties. 2. A party making a disclosure to a person described in paragraph 1 or f shall give ten 10 days written notice thereof to the other parties. 3. The parties shall consult with each other prior to the release of any public statement or press release and except to the extent required by law rule or regulation of any government authority or stock exchange no party shall make any public statement or press release without the approval of all the other parties which shall not be unreasonably withheld. The operator shall utilize its best efforts to coordinate all such public statements to the end that all Parties may effect simultaneous press releases. 4. The obligations of the parties under this Article 12 are continuing obligations and any party ceasing to be a party to this Agreement shall remain bound by this Article until this Agreement is no longer in force between any remaining parties and the Contract has expired. 13. LIABILITY 1. The parties shall be severally liable in accordance with their respective participating interest to third parties. Production Sharing Contract Block 11 A Ministry of Energy Page 90 2. Where the Government has nominated an Appointee as defined in clause 281 of the Contract and the appointee defaults the Government shall be liable. 3. If because of the operation of the joint and several liability provisions contained in the Contract anyone of the Parties hereto shall be required to pay in full to the Government or any other party any sum which it

liability were several would be required separately from each of the Parties or from one other party only then the Parties shall notify forthwith and request immediate payment of the Parties proportionate share according to its Participating interest. If within ten (10) days from receipt of said notice the other Parties shall fail to make payment as provided above such Parties shall be in default and the provisions of Article 6 above shall apply this being without prejudice to any other legal remedies available to the non defaulting Parties against the defaulting Parties.

14. **GOVERNING LAW** This Participation Agreement shall be governed by and be construed in accordance with the law of Kenya.

15. **ARBITRATION** A dispute under this Participation Agreement shall be referred to arbitration in accordance with clause 41 of the Contract.

16. **FORCE MAJEURE** 1. In this Article 16 Force Majeure shall include Acts of God unavoidable acts of war or conditions attributable to or arising out of war declared or undeclared laws rules regulations and orders by any government or governmental agency strikes lockouts or other labour or political disturbances insurrection riots and other civil disturbances hostile acts of hostile forces constituting direct and serious threat to life and property and all other matters or events of a like or comparable nature beyond the control of the Party concerned other than rig availability which prevents any of them from performing their obligations under this Participation Agreement.

2. In this clause Force Majeure means an occurrence beyond the reasonable control of the Minister or the Government or the contractor which prevents any of them from performing their obligation under this contract.

3. Where a party is prevented from performing an obligation under this Participation Agreement by force majeure that party shall give written notice to the other Parties and the obligation of the affected Party shall be suspended for the period of the force majeure.

Production Sharing Contract Block 11A Ministry of Energy Page 914.

4. The affected party shall promptly notify the other parties when the period of force majeure terminates.

5. No Party may claim force majeure as a reason for the failure to timely pay any monies pursuant to this Participation Agreement.

6. Where any Party disputes the existence of force majeure that dispute may be referred to arbitration as provided in clause 44 of the Contract.

17. **NOTICES** 1. All notices and other communications provided for in this Participation Agreement shall be made in writing and shall be delivered by hand

or sent by registered airmail as appropriate return receipt requested or by telegram or telex with confirmation by mail to the Parties at the following addresses To the Government Ministry of Energy FAO Hon. Minister of Energy Nyayo House Kenyatta Avenue PO Box 30582. 00100 Nairobi Kenya Tel 00254 20310112 Fax 00254 20228314 To the Contractor President CEO ERHCE Energy AGC Profond Limited 5444 Westheimer Road Suite 1440 HOUSTON TX 77056 USA Tel 713 626 4700 Fax 713 626 47042. Production Sharing Contract Block 11A Ministry of Energy Page 923. Any party may at any time and from time to time change its authorized representative or its address herein on giving the other Parties ten (10) days notice in writing to such effect. to the Contract. 18. TERM 1. This Participation Agreement shall come into force on the participation date and shall remain in force until it is terminated by the written consent of all the parties. b. All the Participating interests are vested in one Party or the expiration or termination of the Contract. 2. Before this Participation Agreement is terminated there shall be a final accounting and settlement of the Joint Account. 19. FINAL PROVISIONS 1. Headings are inserted in this Participation Agreement for convenience and shall not affect the construction or interpretation hereof. 2. This Participation Agreement shall not be amended, modified or supplemented except by an instrument in writing signed by the parties. 3. Subject to the provisions hereof this Participation Agreement is binding upon and shall apply to the successors and assignees of the parties hereto and each of them respectively. IN WITNESS WHEREOF the Parties hereto have signed this Participation Agreement on the day and year first above written. Production Sharing Contract Block 11A Ministry of Energy Page 93 EXHIBIT A ACCOUNTING PROCEDURE Attached to and made a part of the Participation Agreement. Section 1 General Provisions 1.1 Interpretation 1.2 Statements, billings and adjustments 1.3 Advances and payments 1.4 Audits SECTION 1 GENERAL PROVISIONS The purpose of this accounting procedure is to establish equitable methods for determining charges and credits applicable to operations under the Agreement. It is the intent of the Parties that no Party shall lose or profit by reason of its duties and responsibilities as either operator or as non-operator and that no duplicate charges to the joint

nt account for the same work shall be made. The parties agree that if any procedure established herein proves to be unfair or inequitable to any party the parties shall meet and in good faith endeavour to agree on the changes necessary to correct that unfairness or inequity.

1.1.1. In this Exhibit 1.1. INTERPRETATION: The Agreement means the Participation Agreement of which this Exhibit forms part; the Contract means the production sharing contract to which the Agreement is attached.

Production Sharing Contract Block 11A Ministry of Energy Page 94

ii Words and expressions defined in the Agreement, the Contract and its appendices have the meanings therein ascribed to them.

1.1.2. In the event of any conflict between the provisions of the Agreement and this exhibit the provisions of the Agreement shall prevail.

1.1.3. By mutual agreement between the parties this accounting procedure attached to the Agreement may be revised from time to time by an instrument in writing signed by the parties.

1.2. STATEMENTS, BILLINGS AND ADJUSTMENTS

1.2.1. The operator shall maintain financial accounts necessary to record in reasonable detail the transactions relating to petroleum operations under the Agreement which shall be prepared in accordance with generally accepted standards of the international petroleum industry. The operator shall upon request by the Party furnish a description of its accounting classifications.

1.2.2. Each party to the Agreement is responsible for preparing its own accounting and tax reports and paying its own tax obligations to meet Kenyan requirements. The operator shall furnish the non-operators with all reports, statements, billings and accounting documents necessary to maintain their own accounting records.

1.2.3. The operator shall bill the non-operators on or before the last day of each month for their proportionate share of expenditure for the preceding month. Such billings shall be accompanied by statements of all charges and credits to the joint account summarized in reasonable detail by appropriate accounting classifications indicative of the nature thereof except that items of controllable material and unusual charges and credits shall be detailed.

1.2.4. The operator shall upon request by non-operators furnish a description of such accounting classifications.

1.2.5. Amounts included in the billings shall be expressed in the currency in which the operators' records are maintained. In the conversion of currencies when accounting for advances or payments in different currencies as provided for in subsection 1.3. or any other currency transactions affecting operations under the Agreement it is the intent that none of the parties shall experience an exchange gain or loss at the expense of or to the benefit

of the other Parties. It is agreed that any loss or gain to the joint account resulting from the exchange of _____ currency _____ required for operations under the Agreement or from the translations required shall be charged or credited to the joint account. The operator shall furnish the parties with a description of the procedure applied by the operator to accomplish said translation or exchange of currencies and provide currency exchange data _____ sufficient _____ to _____ enable _____ non _____ operators to translate the billing to the currency of the nonoperator's accounts.

Production Sharing Contract Block 11A
Ministry of Energy Page 95

1.2.6. of billings by nonoperator shall not prejudice the right of any nonoperator to protest or question the correctness thereof; however, all bills and statements rendered to nonoperators by the operator during any year shall conclusively be presumed to be true and correct after twenty-four (24) months following the end of any such year unless within the said twenty-four (24) month period a nonoperator takes written exception thereto and makes claim on the operator, which shall be made unless it is made within the same prescribed period. The provisions of this Subsection shall not prevent adjustment resulting from a physical inventory of the joint property or from a third party claim.

1.3. ADVANCES AND PAYMENT

1.3.1. If operators request nonoperator shall advance to the operator their share of estimated cash requirements for the succeeding month's operation in accordance with Article 6 of the Agreement. Operator shall make written request for the advance to nonoperators at least twenty (20) days prior to the first banking day of such succeeding month. The advances shall not be due and payable before the first banking day of the month for which the advance is requested. The request shall set out the funds in the currencies to be expended as estimated by the operator to be required. Then nonoperator shall on or before the due date make corresponding advances in the currencies requested by depositing such funds to operator's account at a bank as may be from time to time designated by the operator.

1.3.2. Should the operator be requested to pay any large sum of money for operations under the Agreement which were unforeseen at the time of providing the nonoperators with said monthly estimates of its requirements, the operator may make a written request of the nonoperators for special advances covering the nonoperator's share of such payments. Nonoperator shall advance to operator their share of such advances within fifteen (15) days after date of such notice.

1.3.3. If nonoperator's advances exceed their share of actual expenditure

the next succeeding cash advance after such determination shall be reduced accordingly. However, nonoperators may request that excess advances be refunded. The operator shall make such refund within fifteen (15) days after the date of such notice. Production Sharing Contract Block 11A Ministry of Energy Page 96

1.3.4. If nonoperator advances are less than their share of actual expenditure, the deficiency shall, at operator's option, be added to subsequent cash advance requirements or be paid by nonoperators within fifteen (15) days following operator's billing to nonoperators of such deficiency.

1.3.5. If the operator does not request nonoperators as provided in subpart 1.3.1. to advance their share of estimated cash requirements, nonoperators shall pay their share of actual expenditure within fifteen (15) days following date of operator's billing.

1.3.6. Payments of advances or billings shall be made on or before the due date and if not so paid, the unpaid balances shall be treated as provided under Article 6 of the Agreement.

1.4. AUDITS

1.4.1. A nonoperator upon at least thirty (30) days advance written notice to the operator and other nonoperator shall have the right at its sole expense to audit the joint account and related records for any year or portion thereof within the twenty-four (24) month period following the end of such year; however, the conducting of an audit shall not extend the time for the taking of written exception to and the adjustment of accounts as provided for in subpart 1.2.5. The operator shall make every reasonable effort to cooperate with the nonoperators and the nonoperator shall make every reasonable effort to conduct audits in a manner which will result in a minimum of inconvenience to the operator.

1.4.2. All adjustments resulting from an audit agreed between the operator and the nonoperator conducting the audit shall be rectified promptly in the joint account by the operator and reported to the other nonoperator.

Any unresolved dispute arising in connection with an audit shall be referred to arbitration in accordance with Article 15 of the Agreement.

1.4.3. Except as otherwise provided in the Contract, the cost of any audit or verification of the joint account that is for the benefit of all parties shall be chargeable to the joint account if the parties mutually agree.

Production Sharing Contract Block 11A Ministry of Energy Page 97

SECTION 2 CHARGEABLE CO

STSEXPENDITUREANDCREDITSTheoperatorshallcharge the joint account for all those costs and expenditure necessary to conduct petroleum operations under the agreement pursuant to the provisions of subpart 2.12. inclusive of appendix B to the Contract. The operator shall credit the joint account for all the proceeds resulting from petroleum operations under the Agreement pursuant to the provisions of subpart 2.31. of Appendix B to the Contract. 6 PRODUCTION SHARING CONTRACT 30 October 2006 This Agreement which has been

approved by the Joint Commission is a Production Sharing Contract and is subject to the Treaty and

the Petroleum Mining Code BETWEEN the Timor Sea Designated Authority established under the

Treaty party of the first part; AND Minza Oil Gas Limited Registration No. 93827 a corporation

organised and existing under the laws of Jersey the Contractor party of the second part; both

referred to individually as a Party or collectively as the Parties. Whereas A. B. C. D. petroleum

existing within the Joint Petroleum Development Area is a resource to be exploited jointly by

TimorLeste and Australia; the Designated Authority with the Joint Commissions approval has the

power to enter into Production Sharing Contracts; the Designated Authority wishes to promote

Petroleum Operations in the Contract Area and the Contractor desires to join and assist the

Designated Authority in exploring for developing and exploiting Petroleum in the Contract Area for

the benefit of the people of TimorLeste and Australia; and the Contractor has the financial capability

and the technical knowledge and technical ability to carry on the Petroleum Operations in a manner

wholly consistent with the Treaty the Code and this Agreement and has a record of compliance with

principles of good corporate citizenship. NOW THEREFORE it is agreed 30 October 2006 Page 7

Article 1 Interpretation 1.1 Definitions In this Agreement Accounting Records has the meaning given

in Clause 1.2 of Annex C; Agreement means this Production Sharing Contract; Appraisal means any

appraisal activities including appraisal wells the purpose of which at the time such activity is

commenced is to appraise and evaluate the extent volume or the quality of Petroleum reserves

contained in a Discovery including the commerciality of them and all related activities; Appraisal

Costs has the meaning given in Clause 2.2 of Annex C; Approved Contract means a contract made

by the Contractor and approved by the Designated Authority as a part of a Development Plan; Associated Gas means Natural Gas commonly known as gascap gas which overlies and is in contact with significant quantities of Crude Oil in a Reservoir and solution gas dissolved in Crude Oil in a Reservoir; Capital Costs has the meaning given in Clause 2.3 of Annex C; Code means the Petroleum Mining Code agreed and adopted by TimorLeste and Australia pursuant to Article 7a of the Treaty as amended varied modified or replaced from time to time and regulations made and directions given under it; Commercial Discovery means a discovery of Petroleum that the Contractor declares commercial as contemplated in subArticle 4.10; Commercial Production commences when commissioning and test production having been concluded the first day of the first period of thirty 30 consecutive days during which the average level of regular production delivered for sale on the twenty five 25 highest production days in the thirtyday period reaches a level of regular production delivered for sale determined by the Designated Authority; Committee has the meaning given in subArticle 14.1; Contract Area means the area specified in Annexes A and B but not any part of it which has been relinquished under Article 3; Contract Year means a period commencing on the Effective Date or on any anniversary of it and ending immediately before the next anniversary of it; Cost Recovery Statement has the meaning given in Clause 7 of Annex C; Crude Oil Field means a a single Reservoir; or 30 October 2006 Page 8 b multiple Reservoirs all grouped on or related to the same geological structure or stratigraphic conditions which contain hydrocarbons in a liquid state in the Reservoir with or without Associated Gas and from which Crude Oil and Associated Gas may be produced; Decommission means in respect of the Contract Area or a part of it as the case may be to abandon decommission transfer remove andor dispose of structures facilities installations equipment and other property and other works used in Petroleum Operations in the area to clean up the area and make it good and safe and to protect the environment; Decommissioning Costs Reserve means the cumulative amount of monies provided in each Calendar Year for the funding of the Decommissioning Plan pursuant to paragraph 4.14d; Decommissioning Plan means a plan of works and an estimate of expenditures therefor for Decommissioning including environmental

engineering and feasibility studies in support of the plan; Decommissioning Security Agreement means an agreement between the Designated Authority and the Contractor as mentioned in subArticle 4.15; Development means operations designed to recover Petroleum from a Reservoir for commercial purposes and includes design construction installation drilling but excludes drilling for the purposes of Exploration or Appraisal and all related activities; Development Work Programme and Budget has the meaning in subArticle 4.12; Development Area has the meaning given in subArticle 4.10; Development Plan means a development plan for a Development Area as referred to in subArticle 4.11; Discovery means a discovery of Petroleum in a Reservoir in which Petroleum has not previously been found that is recoverable at the surface in a flow measurable by conventional petroleum industry testing methods; Effective Date has the meaning given in subArticle 2.3; Exploration means any exploration activities including geological geophysical geochemical and other surveys investigations and tests and the drilling of core holes stratigraphic tests exploration wells and other drilling and testing operations for the purpose of making a Discovery and all related activities; Exploration Costs has the meaning given in Clause 2.1 of Annex C; Exploration Work Programme and Budget has the meaning in subArticles 4.1 4.2 and 4.3; Field means a Natural Gas Field or a Crude Oil Field from which Petroleum may be produced; Force Majeure has the meaning given in Article 18; Gas Retention Area has the meaning given in subArticle 3.5; 30 October 2006 Page 9 ICC means the International Chamber of Commerce; Ineligible Costs has the meaning given in Clause 2.8 of Annex C; Loan Facility means any overdraft loan or other financial facility or accommodation including any acceptance credit bond note bill of exchange or commercial paper finance lease hire purchase agreement trade bill forward sale or purchase agreement or conditional sale agreement or other transaction having the commercial effect of a borrowing; Miscellaneous Receipts has the meaning given in Clause 2.7 of Annex C; Natural Gas Field means a a single Reservoir; or b multiple Reservoirs grouped on or related to the same geological structure or stratigraphic conditions; in which NonAssociated Gas exists naturally under Reservoir conditions of temperature and pressure; NonAssociated Gas means Natural Gas which is not Associated Gas;

Operating Costs has the meaning given in Clause 2.4 of Annex C; Production means any Petroleum exploitation or export activities but not Development; Production Statement has the meaning given in Clause 5.1 of Annex C; Quarter means a period of three months beginning on January 1 April 1 July 1 or October 1 of each Calendar Year; Recoverable Costs has the meaning given in Article 6; Security means a a standby letter of credit issued by a bank; b an ondemand bond issued by a surety corporation; c a corporate guarantee; or d any other financial security acceptable to the Designated Authority and issued by a bank surety or corporation acceptable to the Designated Authority and having a credit rating indicating that it has sufficient worth to pay its obligations in all reasonably foreseeable circumstances; Treaty means the Timor Sea Treaty between the Government of TimorLeste and the Government of Australia signed on 20th May 2002; United States Dollars means the lawful currency of the United States of America; Uplift has the meaning given in Clause 2.6 of Annex C; 30 October 2006 Page 10 Value of Production and Pricing Statement has the meaning given in Clause 6 of Annex C; and Work Programme and Budget means a work programme for Petroleum Operations and budget therefor approved in accordance with this Agreement.

1.2 Headings As used herein headings are for convenience and do not form a part of and shall not affect the interpretation of this Agreement.

1.3 Further Interpretation In this Agreement unless the contrary intention appears a b c the words including and in particular shall be construed as being by way of illustration or emphasis only and shall not be construed as nor shall they take effect as limiting the generality of any preceding words; a reference to an Article subArticle paragraph subparagraph or to a Clause or an Annex is to an Article subArticle paragraph subparagraph of or to a Clause or an Annex to this Agreement; a reference to an agreement including this Agreement or instrument is to the same as amended varied novated modified or replaced from time to time; d person includes a corporation or other legal entity; e f the singular includes the plural and vice versa; any gender includes the other; g an agreement includes an arrangement whether or not having the force of law; h i j k l a reference to the consent or approval of the Designated Authority means the consent or approval in writing of the Designated Authority and

in accordance with the conditions of that consent or approval; law includes the Treaty and the Code; reference to any English legal concept term action remedy method of judicial proceeding legal document legal status court or official is in any jurisdiction other than England and Wales a reference to what most nearly approximates in that jurisdiction to that reference; contiguous area means a SubBlock or a number of SubBlocks each having a point in common with another such SubBlock; where a word or expression is defined cognate words and expressions shall be construed accordingly; m terms capitalised but not defined herein shall have the meaning defined in the Code; 30 October 2006 Page 11 and this Agreement shall inure to the benefit and burden of the Parties their respective successors and permitted assigns. 1.4 Annexes If there is a conflict the main body of this Agreement prevails over an Annex. 1.5 Joint and Several Liability If the Contractor is more than one person the obligations and liabilities of the Contractor under this Agreement are the obligations and liabilities of them all jointly and severally. 1.6 Operator a The appointment of an Operator by the Contractor shall be subject to prior approval by the Designated Authority where i ii there is more than one Authorised Person in respect of a particular Authorisation and the person appointed as Operator is one of those Authorised Persons; or the person appointed as Operator is not an Authorised Person. b c Except with the prior approval of the Designated Authority as required under paragraph 1.6a the Contractor shall not permit any person to exercise any function of an Operator. For all purposes of this Agreement the Operator shall represent the Contractor and the Designated Authority may deal with and rely on the Operator. The obligations liabilities acts and omissions of the Operator are additionally the obligations liabilities acts and omissions of the Contractor. d The Operator shall establish its head operations office in TimorLeste. e Any change in Operator shall be subject to the prior approval of the Designated Authority. f Where the Designated Authority determines that an Operator is no longer competent to be an Operator the Designated Authority with the approval of the Joint Commission may by written notice to the Operator and to the Contractor revoke its approval. Article 2 Scope and Term 2.1 Scope a This Agreement and the rights interests and benefits of the Contractor and the obligations and liabilities of the Designated

Authority under it are subject to the Treaty and the Code. The Contractor and the Designated Authority shall comply 30 October 2006 Page 12 with the terms of the Treaty the Code regulations and directions made in accordance with the Code and this Agreement. b Subject to this Agreement the Contractor shall and has the exclusive right to carry on Petroleum Operations at its sole i cost risk and expense; ii shall provide all human financial and technical resources therefor; and iii shall as further provided in this Agreement share in Petroleum from the Contract Area. c d The Contractor is not authorised to carry on Petroleum Operations in any part of the JPDA outside the Contract Area other than in accordance with an Access Authorisation granted to it by the Designated Authority under Article 9 of the Code. This Agreement does not authorise the Contractor to process Petroleum beyond the Field Export Point and no expenditure in respect of further processing shall be a Recoverable Cost.

2.2 Conditions Precedent a This Agreement is conditional on i ii iii iv the appointment of an Operator in accordance with subSection 4.5 of the Code; if the Contractor is more than one person the conclusion of a Joint Operating Agreement and such agreement coming into full force and effect subject only to satisfaction of this condition; the Contractor providing the Designated Authority with a Security in form and satisfactory to the Designated Authority for the performance of the Contractors minimum work and expenditure obligations in accordance with subArticles 4.1 4.2 and 4.3; and the Contractor demonstrating to the satisfaction of the Designated Authority that it has complied with its obligations under subArticle 17.2 in regard to insurance. b If the conditions mentioned in paragraph 2.2a are not fulfilled before the sixtieth 60th day after the date of this Agreement this Agreement shall terminate and be of no further force or effect.

2.3 Effective Date and Term a The effective date of this Agreement is the date on which all of the conditions precedent set out at subArticle 2.2 have been satisfied Effective Date. The Designated Authority shall notify the Contractor in writing that the conditions precedent have been satisfied. b This Agreement shall terminate on the first to occur of 30 October 2006 Page 13 i ii iii iv all of the Contract Area being relinquished pursuant to Article 3; the Parties so agreeing; termination pursuant to subArticle 2.4; or the Treaty ceasing to be in force.

2.4 Grounds for Termination a Where a

Contractor i ii iii iv has not complied with any plan approval condition or term to which this Agreement is subject; has not complied with the Code; has knowingly provided false information to the Designated Authority in connection with this Agreement; has not paid any amount payable by it under the Code or under this Agreement within a period of three 3 months after the day on which the amount became payable; or v is subject to or commits an Insolvency Event the Designated Authority may with the approval of the Joint Commission on that ground by instrument in writing served on the Contractor terminate this Agreement. b The Designated Authority shall not terminate this Agreement due to one or more of the relevant grounds identified in subparagraphs 2.4aiiv unless there has been a material breach by the Contractor of one of those grounds. c Where this Agreement expressly grants the Designated Authority a right to terminate this Agreement that right shall be exercised in accordance with the requirements of subArticles 2.4 and 2.5. 2.5 Designated Authority to give Notice Except in relation to an Insolvency Event in which case the Designated Authority may terminate this Agreement forthwith the Designated Authority shall not terminate this Agreement unless a b c it has by instrument in writing served on the Contractor given not less than thirty 30 days notice of its intention to so terminate this Agreement; it has in the instrument specified a date on or before which the Contractor may submit in writing to the Designated Authority any matters that it wishes to be considered; and it has taken into account any information provided under paragraph 2.5 b and any action taken by the Contractor or other parties to remove that ground or to prevent the recurrence of similar grounds. 30 October 2006 Page 14 2.6 Surviving Obligations a b Termination of this Agreement for any reason including the passage of time in whole or in part shall be without prejudice to rights and obligations expressed in the Code or this Agreement to survive termination or to rights and obligations accrued thereunder prior to termination including Decommissioning and all provisions of this Agreement reasonably necessary for the full enjoyment and enforcement of those rights and obligations shall survive termination for the period so necessary. If the Contractor is more than one person and circumstances arise in which the Designated Authority may terminate an Authorisation the Designated Authority may on such

conditions as it may elect to terminate this Agreement only in respect of those persons whose acts or omissions or in relation to whom acts omissions or events have occurred which have led to such circumstances arising if i ii it is satisfied that the other persons did not connive in such acts omissions or events and could not reasonably have been expected to prevent them occurring; and it is satisfied that it is fair and reasonable to do so in all the circumstances and the other persons agree including as to such conditions.

Article 3 Relinquishment of Blocks

3.1 Periodic Relinquishment of Exploration Area

a The Contractor shall relinquish b c i ii at the end of the third 3rd Contract Year not less than twenty five 25 percent of the SubBlocks in the original Contract Area; and at the end of the fifth 5th Contract Year not less than a further twenty five 25 percent of the SubBlocks in the original Contract Area. At the end of any Contract Year and subject to paragraph 3.1e the Contractor may relinquish some or all of the SubBlocks in the Contract Area. Any SubBlocks so relinquished will be credited against the next relinquishment obligation of the Contractor under paragraph 3.1a. The Contractor shall consult with and give not less than thirty 30 days notice to the Designated Authority of the SubBlocks which at any time it wishes to relinquish. Except with the consent of the Designated Authority i ii those SubBlocks must form one discrete area; and the SubBlocks not relinquished must form one or more discrete areas all of sufficient size and convenient shape to enable Petroleum Operations to be conducted thereon.

30 October 2006

Page 15 d If the Contractor does not relinquish SubBlocks at the time and in the manner required by this subArticle 3.1 all of the Contract Area shall be deemed relinquished at the end of the Contract Year concerned. e Without the consent of the Designated Authority and notwithstanding subArticle 3.1 the Contractor may not relinquish all of the SubBlocks in the Contract Area if it has not then fulfilled its obligations under subArticles 4.1 4.2 and 4.3 or is then in breach of any provision of this Agreement.

3.2 Final Relinquishment of Exploration Area

a b At the end of the seventh 7th Contract Year the Contractor shall relinquish all of the Contract Area other than such part thereof as is a Development Area. If at the end of the seventh 7th Contract Year a Discovery has been made but there has been insufficient time for the Contractor acting and having acted in accordance with this

Agreement to appraise it the obligation of the Contractor under subArticle 3.2 shall be postponed i ii iii for such SubBlocks and to such depths as the Designated Authority may determine to be reasonably necessary to encompass the Field plus a reserve margin sufficient to cover the probable extent of the field; for such period as is reasonably necessary to permit the Contractor to appraise or to complete the Appraisal of the Discovery; and as a consequence of that Appraisal for the Contractor to decide whether to declare a Commercial Discovery and if it does so for the Designated Authority to declare a Development Area in respect of it. 3.3 Relinquishment of Development Area a Except with the consent of the Designated Authority and subject to paragraph 3.3b below a Development Area shall be deemed to be relinquished on the first to occur of i ii production from the Development Area ceasing permanently or for a continuous period of twelve 12 months or if because of Force Majeure as is determined by the Designated Authority in consultation with the Contractor under subArticle 18.5; and the twenty fifth 25th anniversary of the date on which the first 1st Development Plan in respect of the Development Area was approved by the Designated Authority. b Where the Contractor has entered into contracts for the sale of Natural Gas which have been approved as part of a Development Plan then relinquishment shall be no earlier than the expiry date of those contracts. c Without the consent of the Designated Authority the Contractor may not otherwise relinquish all or any part of a Development Area. 30 October 2006 Page 16 3.4 Termination of Agreement and Continuing Obligations in respect of Relinquished Area a b This Agreement shall terminate in respect of a part of the Contract Area which is relinquished. Relinquishment of all or a part of the Contract Area is without prejudice to the obligations of the Contractor to Decommission. 3.5 Gas Retention Area a b c If the Appraisal of a Discovery of NonAssociated Gas demonstrates that the Discovery although substantial is not then either alone or in combination with other Discoveries commercially viable but is likely to become so within five 5 years the Designated Authority may at the request of the Contractor declare a Gas Retention Area in respect of it for that period. On request of the Contractor and after demonstration that the grant of an extended period is likely to result in the declaration of a Commercial Discovery the Designated

Authority may extend the period of the Gas Retention Area for such longer period and on such conditions as is considered appropriate by the Designated Authority. This Article 3 but not subArticle 3.3 applies to and in respect of a Gas Retention Area as it does to and in respect of a Development Area for as long as during that period the Contractor diligently seeks to make it commercially viable and demonstrates to the Designated Authority that it is doing so. The Gas Retention Area consists of those SubBlocks forming a single contiguous area that encompass the Natural Gas Field plus a reserve margin sufficient to cover the probable and possible extent of it but the Designated Authority may exclude deeper formations in which no Discovery has been made. The Designated Authority at any time and from time to time and whether of its own volition or at the request of the Contractor may i ii iii add SubBlocks then in the Contract Area to; remove SubBlocks from; or vary by depth within the Contract Area a Gas Retention Area as may be required to ensure that it encompasses the Natural Gas Field. The Contractor shall relinquish any part of the Contract Area removed from a Gas Retention Area as a consequence of such removal or other variation if it occurs after the time for the relinquishment provided for in paragraph 3.2a. d The Gas Retention Area shall be deemed to have been relinquished on the earlier of i ii iii expiry of the period mentioned in paragraph 3.5 a; the Contractor ceasing to meet its obligations under paragraph 3.5 b; and the Contractor declaring a Commercial Discovery in respect of it and the Designated Authority declaring a Development Area as a consequence thereof. 30 October 2006 Page 17 3.6 Oil Retention Area If the Appraisal of a Discovery of a Crude Oil Field demonstrates that the Discovery although substantial is not then either alone or in combination with other Discoveries commercially viable but is likely to become so within five 5 years the Designated Authority may in its absolute discretion at the request of the Contractor declare an Oil Retention Area in respect of it or any part thereof for that period on such terms and conditions as the Designated Authority considers appropriate. Article 4 Work Programmes and Budget 4.1 Commitment in Initial Period In each Contract Year mentioned below the Contractor shall carry out an Exploration Work Programme and Budget of not less than the amount of work specified for that Contract Year Surveys Purchase of 2051 kilometres of multiclient

2D seismic. Wells Nil Nil Acquisition and processing of a minimum of 500 kilometres of new 2D fullfold high quality seismic data. Nil Nil Contract Year 1 2 3 Data Evaluation Interpretation and reprocessing of existing seismic data. Systematic review of the hydrocarbon potential of the Contract Area through integrated geological geophysical structural geochemical and other studies. Interpretation of new and existing seismic data. Systematic review of the hydrocarbon potential of the Contract Area through integrated geological geophysical structural geochemical and other studies. Interpretation of new and existing seismic data. Systematic review of the hydrocarbon potential of the Contract Area through integrated geological geophysical structural geochemical and other studies. 30 October 2006 Page 18 4.2 Commitment in Second Period In each Contract Year mentioned below and unless the Contractor has relinquished all of the Contract Area not being a Development Area Oil Retention Area or a Gas Retention Area before the start of the fourth 4th Contract Year the Contractor shall carry out an Exploration Work Programme and Budget of not less than the amount of work specified for that Contract Year Contract Year 4 5 Data Evaluation Preparation of well prognosis. Confirmation of drilling location for 1 exploration well. Nil Surveys Nil Nil Wells Nil 1 exploration well to a depth regarded as sufficient by the TSDA to fully investigate all exploration prospects of the chosen location. 4.3 Commitment in Third Period In each of the sixth 6th and seventh 7th Contract Years and unless the Contractor has relinquished all of the Contract Area not being a Development Area Oil Retention Area or a Gas Retention Area before the start of the Contract Year concerned the Contractor shall carry out such Exploration Work Programme and Budget of not less than the amount of work specified for that Contract Year Surveys Nil Wells Nil Nil Nil Contract Year 6 7 Data Evaluation Systematic review of the hydrocarbon potential of the Contract Area through integrated geological geophysical structural geochemical and other studies including the integration of new well data. Systematic review of the hydrocarbon potential of the Contract Area through integrated geological geophysical structural geochemical and other studies including the integration of new well data. 30 October 2006 Page 19 4.4 Performance of Exploration Work Programme and Budget a b If any well forming part of the Exploration Work Programme and

Budget provided for in this Article 4 is abandoned for any reason other than a reason specified in paragraph 4.4 b before reaching the defined objectives of such well the Contractor shall drill a substitute well. In this event the First Second or Third Exploration Period as the case may be shall be extended by a period of time equal in length to the time spent in preparing for and drilling the substitute well including mobilisation and demobilisation of the drilling rig if applicable. Unless otherwise agreed by the Designated Authority any well which forms part of the Exploration Work Programme and Budget provided for in this Article 4 shall be drilled to such depth as is necessary for the evaluation of the geological formation established by the available data as the target formation and which Good Oil Field Practices would require the Contractor to attain unless before reaching such depth i ii iii iv v vi vii a formation stratigraphically older than the deepest target formation is encountered; basement is encountered; further drilling would present an obvious danger such as but not limited to the presence of abnormal pressure or excessive losses of drilling mud; impenetrable formations are encountered; Petroleum bearing formations are encountered which require protecting thereby preventing planned depths from being reached; the Contractor and the Designated Authority agree to terminate the drilling operation; or the Designated Authority confirms that the drilling obligation has been fulfilled. In such circumstances the drilling of any such well may be terminated at a lesser depth and shall be deemed to have satisfied the Contractors obligations in respect of that well. c Where a well which forms part of the Exploration Work Programme and Budget provided for in this Article 4 results in a Discovery and the Contractor informs the Designated Authority pursuant to subArticle 4.9 that the Discovery merits Appraisal that well will be deemed to have met its objective and to have satisfied the Contractors obligations in respect of that well. 4.5 Consequences of NonPerformance a If in a Contract Year the Contractor carries out less Exploration than is required of it under the Exploration Work Programme and Budget the Designated Authority may i require that the shortfall be added to the Exploration to be carried out in the next Contract Year; 30 October 2006 Page 20 ii iii require payment of the estimated cost of the Exploration not carried out in that Contract Year; or terminate this Agreement and require

payment of the estimated cost of the Exploration not carried out in that Contract Year. b c If in a Contract Year the Contractor carries out more Exploration than is required of it the excess shall be credited against Exploration to be carried out in the following Contract Year and to the extent in excess of that Exploration shall be further carried forward. For the purposes of the foregoing provisions of this Article 4 and of Article 6 and Annex C and except with the consent of the Designated Authority no work in a Development Area will be regarded as Exploration except to the extent in respect of a formation shallower or deeper than the Field concerned and in which no Discovery has been made.

4.6 Work Programmes and Budgets Subject to subArticle 4.7 the Contractor shall carry out Petroleum Operations substantially in accordance with Work Programmes and Budgets approved by the Designated Authority. Such an approval by the Designated Authority is without prejudice to any other obligation or liability of the Contractor under this Agreement.

4.7 Emergency and Other Expenditures Outside Work Programmes and Budgets a Without further approval by the Designated Authority the Contractor may overexpend by ten percent 10 on any line item in an approved Work Programme and Budget for a Contract Year. b Without further approval by the Designated Authority the total of all overexpenditures under paragraph 4.7a under that Work Programme and Budget for that Contract Year shall not exceed ten percent 10 of the total expenditures in that Work Programme and Budget. c d e The Contractor shall promptly inform the Designated Authority if it anticipates or should reasonably anticipate that any such limit in paragraph 4.7b will be exceeded and seek in the manner provided in this Article 4 an amendment to the appropriate Work Programme and Budget. In determining whether to approve the overexpenditures contemplated at paragraphs 4.7a and b the Designated Authority shall consider whether such increases are necessary to complete the programme of works provided that such increase is not the result of any failure of the Contractor to fulfill its obligations under this Agreement. Nothing in subArticle 4.6 or paragraph 4.7a precludes or excuses the Contractor from taking all necessary and proper measures for the protection of life health the environment and property if there is an emergency including a significant fire explosion Petroleum release or sabotage; inent involving loss

of life serious injury to an employee contractor or third party or serious property damage; strikes and riots; or evacuation of the Operators personnel. As soon as reasonably practicable the Operator will inform the Designated Authority of the details of the emergency and of the actions it has taken and intends to take.

4.8 Exploration a b c The Contractor shall submit for the approval of the Designated Authority an Exploration Work Programme and Budget for each Calendar Year. From time to time the Contractor may submit for the approval of the Designated Authority amendments to the Exploration Work Programme and Budget. The Contractor is not obliged to carry out more Exploration in a Contract Year than is required by subArticles 4.1 4.2 and 4.3.

4.9 Discovery and Appraisal a b c d e The Contractor shall notify the Designated Authority of a Discovery and shall provide the Designated Authority with such information in respect of it as the Code requires. As soon as reasonably practicable after a Discovery is made the Contractor shall advise the Designated Authority whether or not having regard to paragraph 4.9e the Discovery merits Appraisal. At such time and in such manner as the Designated Authority requires the Contractor shall submit for the approval of the Designated Authority an Appraisal Work Programme and Budget for each Calendar Year. From time to time the Contractor may submit for the approval of the Designated Authority amendments to the Appraisal Work Programme and Budget. An Appraisal Work Programme and Budget for a Calendar Year will be such as would be undertaken by a person seeking diligently to appraise in accordance with this Agreement a Discovery with a view to determining if it is either alone or in combination with other Discoveries a Commercial Discovery.

4.10 Commercial Discovery a b c The Contractor may at any time and having regard to paragraph 4.10b declare that a Commercial Discovery has been made. The declaration is to be made in such manner and be accompanied by such supporting data and information as the Designated Authority requires including the Contractors proposal as to that part of the Contract Area to be declared a Development Area. The Designated Authority shall declare those SubBlocks which encompass the Field in which the Commercial Discovery has been made plus a reserve margin sufficient to cover the probable extent of the Field to be a Development Area but may exclude deeper formations in

which no Discovery has been made. The Designated Authority at any time and from time to time of its own volition or that of the Contractor may 30 October 2006 Page 22 i ii iii add SubBlocks then in the Contract Area to; remove SubBlocks from; or vary by depth within the Contract Area a Development Area as may be required to ensure that it encompasses the Field concerned but not unless the Designated Authority and the Contractor otherwise agree after the first Development Plan in respect of the Development Area has been approved. The Contractor shall relinquish any part of the Contract Area removed from a Development Area as a consequence of such removal or other variation if it occurs after the time for the relinquishment provided for in paragraph 3.2a. 4.11 Development Plan a b c Not more than twelve 12 months after the declaration of a Development Area and in the manner required by the Designated Authority the Contractor shall submit for the approval of the Designated Authority a Development Plan for the Development Area. From time to time the Contractor may submit for the approval of the Designated Authority amendments to the Development Plan. A Development Plan will be assessed on the basis of whether it would be undertaken by a person seeking diligently to develop and exploit in accordance with this Agreement the Petroleum in the Development Area in accordance with Good Oil Field Practice and in a way that promotes further investment and contributes to the long term development of TimorLeste and Australia. d Except with the consent of the Designated Authority and without prejudice to the generality of paragraph 4.11a a Development Plan shall include i ii a description of the proposed reservoir development and management programme; details of aa the geological and the reservoir work done together with the production profiles simulated in order to reach the best depletion alternative; bb the production treatment and transportation facilities to be located in the JPDA; cc dd facilities for transporting the Petroleum from the Contract Area and the JPDA; and facilities wherever located which are connected to any facilities mentioned in subparagraphs bb and cc above and which or the operation of which might affect the integrity management or operation thereof; iii the production profiles for all hydrocarbon products including possible injections for the life of the Development including the commencement of Production and the specific rates of Petroleum

production; 30 October 2006 Page 23 iv v vi vii the projected start of Commercial Production; the Decommissioning Plan in such detail as the Designated Authority requires including a calculation of the Decommissioning costs the annual contribution to the Decommissioning Costs Reserve and the Contractors proposal for the Decommissioning Security Agreement; an environmental management covering the life of the Development; impact statement and proposals for environmental a Contractors proposal for ensuring the safety health and welfare of persons in or about the proposed Petroleum Operations; viii the Contractors proposals for aa the use of TimorLeste goods and services; bb training and employment of nationals and permanent residents of TimorLeste; having regard to occupational health and safety requirements; and cc processing Petroleum; ix x xi the estimated capital expenditure covering the feasibility fabrication installation commissioning and preproduction stages of the Development; an evaluation of the commerciality of the Development including a full economic evaluation; the Contractors and if more than one person each such persons proposals for financing; xii summary details and copies of aa bb all contracts and arrangements made or to be made by the Contractor for the sale of Natural Gas; for information purposes only all contracts and arrangements made or to be made by persons in respect of that Natural Gas downstream of the point at which it is to be sold by the Contractor and which are relevant to the price at which and other terms on which it is to be sold by the Contractor or are otherwise relevant to the determination of the value of it for the purposes of this Agreement but not beyond the point at which it is first disposed of in an arms length transaction; and cc all contracts and arrangements made or to be made by the Contractor in respect of facilities downstream of the Field Export Point for transporting processing liquefying storing handling and delivering that Natural Gas; and xiii such other data and information including in respect of insurance to be obtained by the Contractor and buyers and shippers of Petroleum as the 30 October 2006 Page 24 Code requires and as the Designated Authority otherwise requires and is relevant to the Development Plan. e The Designated Authority shall not approve a Development Plan or an amendment to it unless i ii a Decommissioning Security Agreement has been concluded in respect of the Development Area; and

the Designated Authority has consulted with the Joint Commission in relation to the Development Plan or amendment.

4.12 Development Work Programmes and Budgets a b c At such time and in such manner as the Code requires and as the Designated Authority otherwise requires the Contractor shall submit for the approval of the Designated Authority a Development Work Programme and Budget for each Development Area for each Calendar Year. At any time and from time to time the Contractor may submit for that approval amendments to it. A Development Work Programme and Budget for a Calendar Year shall be substantially in accordance with the Development Plan for the Development Area. The Designated Authority may not unreasonably withhold its approval of a Development Work Programme and Budget properly submitted by the Contractor.

4.13 Approved Contracts a b c The Contractor may not sell or otherwise dispose of Natural Gas from the Contract Area other than pursuant to an Approved Contract or as otherwise may be provided in the Development Plan or in this Agreement. The Contractor may not use any facilities downstream of the Field Export Point for transporting processing treating liquefying storing handling or delivering Petroleum other than under the terms of an Approved Contract. The Contractor may not amend waive or fail to enforce any provision of an Approved Contract without the approval of the Designated Authority.

4.14 Decommissioning a b The Contractor shall submit to the Designated Authority for its approval pursuant to subparagraph 4.11dv a Decommissioning Plan for the Development Area and a schedule of provisions for the Decommissioning Costs Reserve. The Decommissioning Plan shall be revised and resubmitted to the Designated Authority for its approval at such times as are reasonable having regard to the likelihood that the Decommissioning Plan including cost estimates thereunder may need to be revised. c The Contractor shall carry out the Decommissioning Plan substantially in accordance with its terms.

30 October 2006 Page 25 d Estimates of the monies required for the funding of the Decommissioning Plan shall be charged as Recoverable Costs beginning in the Calendar Year following the Calendar Year in which Commercial Production first occurs. The amount charged in each Calendar Year shall be calculated as follows i ii iii iv v vi vii The total Decommissioning costs at the expected date of Decommissioning

shall first be calculated. There shall be deducted from such total Decommissioning costs the additions made taken as the Decommissioning Costs Reserve made and Recoverable Costs in all previous Calendar Years together with interest on such Recoverable Costs calculated to the approved date of Decommissioning at the actual or forecast rate of Uplift whichever is applicable. to The residual Decommissioning costs resulting from the calculations under subparagraph 4.14di and ii shall then be discounted to the Calendar Year in question at the forecast rate of Uplift for each Calendar Year remaining until the Calendar Year of Decommissioning. The discounted total of residual Decommissioning costs shall then be divided by the total number of Calendar Years remaining prior to the Calendar Year of Decommissioning itself including the Calendar Year in question. The resultant amount shall be the addition to the Decommissioning Costs Reserve for the Calendar Year in question. It is the intention of this provision that the total accumulated provision allowed the Calendar Year of Decommissioning at the rate of Uplift will equal the total Decommissioning costs. interest calculated including to If the amount in subparagraph 4.14dv is a negative amount then such amount shall be treated as a reduction of Recoverable Costs for the Calendar Year in question. 4.15 Decommissioning Security a b c Prior to Decommissioning Security pursuant to the Decommissioning Security Agreement shall be provided by the Contractor in an amount equal to the sum of provisions made to the Decommissioning Costs Reserve and taken as Recoverable Costs in all previous years together with interest on such Recoverable Costs calculated to the end of the previous Calendar Year at the actual rate of Uplift. After Decommissioning commences the Designated Authority shall at the end of each Calendar Year review the amount of Security required for the outstanding Decommissioning and shall take into consideration any Decommissioning costs that have already been incurred. Failure of the Contractor to provide Security and otherwise to fulfill its obligations under the Decommissioning Security Agreement shall be a breach of this Agreement. 30 October 2006 Page 26 Article 5 Conduct of Work 5.1 Proper and Workmanlike Manner a b The Contractor shall carry out Petroleum Operations and shall procure that they are carried out in a proper efficient and workmanlike manner and in accordance with the

Code this Agreement and Good Oil Field Practice. In particular the Contractor shall carry out Petroleum Operations and procure that they are carried out in such a manner as is required by paragraph 5.1a to i ii protect the environment ensure that Petroleum Operations result in minimum ecological damage or destruction and clean up pollution; ensure the safety health and welfare of persons in or about the Petroleum Operations; iii maintain in safe and good condition and repair all structures facilities installations equipment and other property and other works used or to be used in Petroleum Operations; iv on the earlier of aa termination of this Agreement; and bb when no longer required for Petroleum Operations; and in either case cc except with the consent of the Designated Authority; or dd unless this Agreement otherwise provides abandon decommission transfer remove and/or dispose of all structures facilities installations equipment and other property clean up the Contract Area and make it good and safe and protect the environment to the satisfaction of the Designated Authority. v vi control the flow and prevent the waste or escape of Petroleum water or any product used in or derived by processing Petroleum; prevent the escape of any mixture of water or drilling fluid with Petroleum or any other matter; vii prevent damage to Petroleum-bearing strata in or outside the Contract Area; viii except with the consent of the Designated Authority keep separate aa each Reservoir discovered in the Contract Area; and bb such of the sources of water discovered in the Contract Area as the Designated Authority directs; 30 October 2006 Page 27 ix prevent water or any other matter entering any Reservoir through wells in the Contract Area except when required by and in accordance with the Development Plan and Good Oil Field Practice; x minimise interference with navigation and fishing; and xi remedy in a timely fashion any damage caused to the environment.

5.2 Access to Contract Area Subject to law and to this Agreement the Contractor may enter and leave the Contract Area at any time for the purposes of Petroleum Operations.

5.3 Health Safety and the Environment a Within three 3 months of the Effective Date the Contractor shall submit to the Designated Authority for its approval plans in regard to i ii the health safety and welfare of persons in or affected by Petroleum Operations; and the protection of the environment including the marine environment and the atmosphere and the prevention of pollution in order to

reduce the risks to the personnel and the environment so they are as low as reasonably practicable. The plans shall be reviewed annually and amended from time to time as may be necessary to ensure its continuing compliance with Good Oil Field Practice. b Notwithstanding anything elsewhere contained in this Agreement the Contractor shall clean up pollution resulting from Petroleum Operations to the satisfaction of the Designated Authority and meet the costs of so doing to the extent done by anyone else including the Designated Authority.

5.4 Goods Services Training and Employment

The Contractor shall take reasonable steps to comply with the proposals which accompanied its application under subSection 5.4 of the Code for this Agreement in respect of training employment and the acquisition of goods and services such proposals are specifically listed at Annex D and shall a b c give persons based in TimorLeste a real opportunity to compete for delivery of goods and services provided they are offered on competitive terms and conditions; with due regard to occupational health and safety requirements give preference in employment in Petroleum Operations to nationals and permanent residents of TimorLeste; and within thirty 30 days of the end of each Calendar Year submit to the Designated Authority a report demonstrating compliance with the above obligations.

30 October 2006 Page 28

5.5 Flaring

Except with the consent of the Designated Authority or in an emergency the Contractor shall not flare Petroleum.

5.6 Operator and its SubContractors

The Operator and only the Operator may carry out Petroleum Operations and may do so by itself its agents and subcontractors. This subArticle 5.6 does not relieve the Contractor of any obligation or liability under this Agreement; and the carrying out of Petroleum Operations by its agents or contractors does not relieve the Operator or the Contractor of any obligation or liability under this Agreement.

Article 6 Recoverable Costs

6.1 Generally

a b The Contractors accounts shall be prepared and maintained in accordance with Annex C. Only costs and expenses incurred by the Operator in carrying on Petroleum Operations including additions to the Decommissioning Costs Reserve and unless the Contractor is only one person and the Contractor and the Operator are that person properly charged to the Contractor under an agreement made between them and consented to by the Designated Authority are Recoverable Costs but without

prejudice to any other provision of this Agreement which would result in any such cost or expense not being a Recoverable Cost.

6.2 Recoverable Costs In any Calendar Year Recoverable Costs are subject as further provided in Annex C the sum of those of the following that are not ineligible costs

a the sum of

- i Recoverable Exploration Costs; Recoverable Appraisal Costs;
- ii Recoverable Capital Costs; and
- iv Recoverable Operating Costs;

b c additions to the Decommissioning Costs Reserve if any allowable in that Calendar Year; Recoverable Costs in the previous Calendar Year to the extent in excess of the value of the Contractors share of Petroleum under subparagraph 7.1bi in that previous Calendar Year; plus

30 October 2006 Page 29

d a Quarterly amount equal to the product of the rate of Uplift and the Quarterly balance of outstanding Recoverable Costs; less Miscellaneous Receipts and less any deductions pursuant to paragraph 7.4a.

Article 7 Sharing Of Petroleum

7.1 Determination of Shares In each Calendar Year the Parties shall take and receive the following shares of every grade and quality of Petroleum as and when it is delivered at the Field Export Point

- a the Designated Authority
 - i ii five 5 percent; plus its share of any balance as mentioned in paragraph 7.1c;
- b the Contractor
 - i ii ninety five 95 percent but not more than is equal in value to Recoverable Costs for the Calendar Year concerned; plus its share of any balance as mentioned in paragraph 7.1c;
- c any Petroleum not taken by the Contractor under subparagraph 7.1bi shall be shared as to forty 40 percent by the Designated Authority and as to sixty 60 percent by the Contractor.

7.2 Option of Designated Authority

- a b Unless the Designated Authority elects otherwise as per paragraph 7.2b the Contractor shall take and receive and dispose of in common stream with its own share and on terms no less favourable to the Designated Authority than the Contractor receives for its own share the Designated Authoritys entire share of Petroleum. The Designated Authority may make an election to take and separately dispose of the Designated Authoritys share of Petroleum. Unless the Contractor otherwise agrees which agreement will not be unreasonably withheld the Designated Authority may not so elect other than
- i ii in respect of all or the same percentage of all of the Designated Authoritys shares of Crude Oil for and throughout each Calendar Year on not less than ninety 90 days prior written notice to the Contractor before the

start of the Calendar Year concerned; and in respect of the Designated Authority's share of Natural Gas in connection with its approval of Approved Contracts. 30 October 2006 Page 30 7.3 Lifting a b Subject to this Agreement the Contractor may lift dispose of and export from the JPDA its share of Petroleum and retain the proceeds from the sale or other disposition of that share. The Contractor and the Designated Authority shall from time to time make such agreements between them as are reasonably necessary in accordance with Good Oil Field Practice and the commercial practices of the international petroleum industry for the separate lifting of their shares of Petroleum. 7.4 Title and Risk a b c d Petroleum shall be at the risk of the Contractor until it is delivered at the Field Export Point. Without prejudice to any obligation or liability of the Contractor as a consequence of a failure of the Contractor to comply with its obligations under the Code and this Agreement including subArticle 5.1 Petroleum which is lost after it is recovered at the wellhead and before it is delivered at the Field Export Point shall be deducted from the Contractor's Recoverable Costs under subArticle 6.2. Title in the Contractor's share of Petroleum shall pass to it when and risk therein shall remain with the Contractor after it is delivered at the Field Export Point. Title in the Designated Authority's share of Petroleum taken by the Contractor pursuant to subArticle 7.2 shall pass to the Contractor when and risk therein shall remain with the Contractor after it is delivered at the Field Export Point. The Contractor shall defend indemnify and hold harmless the Designated Authority and/or the members of the Joint Commission from all claims and demands asserted in respect of Petroleum wherein the risk is with the Contractor. 7.5 Payment on Account a b Unless the Designated Authority has made an election under paragraph 7.2b the Contractor shall pay to the Designated Authority an amount equal to the Designated Authority's share of all amounts received by the Contractor for the Petroleum within thirty six 36 hours of receipt. In the event that the Contractor has not received payment for Petroleum within sixty 60 days of production it nonetheless will make a provisional payment to the Designated Authority of the estimated value of the Designated Authority's share of such Petroleum. Article 8 Valuation of Petroleum 8.1 Point and type of Valuation Petroleum shall be valued as if it were sold in an arms length transaction f.o.b. or equivalent at the Field Export Point.

30 October 2006 Page 31 8.2 Value of Crude Oil The value of Crude Oil a b Sold f.o.b. or equivalent at the Field Export Point in an arms length transaction is the price payable for it; Sold in an arms length transaction other than f.o.b. or equivalent at the Field Export Point is the price payable for it less such fair and reasonable proportion of such price that relates to the transportation processing and delivery of the petroleum downstream of the Field Export Point up to the actual point of sale; or c Sold other than as mentioned in paragraphs 8.2a and b shall be the fair and reasonable market price thereof having regard to all relevant circumstances. 8.3 Value of Natural Gas The value of Natural Gas shall be the price payable under the Approved Contract or as otherwise may be provided in the Development Plan or in this Agreement with such fair and reasonable adjustments as required to reflect the point and type of valuation in subArticle 8.1 or where a Contractor enters into a sale other than at armslength. 8.4 Price Payable In this Article 8 the price payable is the price that is or would be payable by the buyer if the Petroleum were delivered by the Contractor and taken by the buyer without set off counterclaim or other withholding of any nature. Article 9 Payments 9.1 Fees The Contractor shall pay to the Designated Authority fees and other payments as provided for in the Code. 9.2 Payment Mechanism All payments under this Agreement shall be made in United States Dollars unless otherwise agreed and within ten 10 days after the end of the month in which the obligation to make the payment is incurred to a bank specified by the Party to whom the payment is due. 9.3 Late Payment Any amount not paid in full when due shall bear interest compounded on a monthly basis at a rate per annum equal to one month term London Interbank Offer Rate LIBOR for United States Dollar deposits as published in London by the Financial Times or if not so published then as published in New York by The Wall Street Journal current from day to 30 October 2006 Page 32 day plus five percentage 5 points on and from the due date for payment until the amount together with interest thereon is paid in full. 9.4 Minimum Payment If this Agreement is terminated for any reason before the end of the third Contract Year the Contractor shall on such termination pay to the Designated Authority those fees which it would have paid under subArticle 9.1 if termination had not occurred until the end of the third Contract Year. Article 10

Provision of Goods and Services 10.1 Notice a b Except with the consent of the Designated Authority the Contractor shall draw to the attention of suppliers based in TimorLeste and Australia in such manner as the Designated Authority agrees all opportunities for the provision of goods and services for Petroleum Operations. Subject to subArticle 10.2 the Contractor shall before awarding any contract for goods or services obtain the written approval of the Designated Authority. Approval from the Designated Authority shall be deemed thirty 30 days after written notice of an intention to award is given by the Contractor unless otherwise notified in writing to the Contractor. 10.2 Contracts Not Requiring Designated Authoritys Approval The Contractor may make contracts for goods and services for Petroleum Operations without the Designated Authoritys consent but not if for property to be leased to the Contractor where a b the contract or related series of contracts is expected to involve expenditure of less than two million 2000000 United States Dollars or such higher amount that may be specified by regulation; or the contract or related series of contracts is expected to involve expenditure of less than five million 5000000 United States Dollars or such other amount that may be specified by regulation and the goods or services are required in respect of a Development Plan the cost of which is expected to exceed one hundred million 100000000 United States Dollars or such higher amount that may be specified by regulation. 10.3 Tender Invitations a All invitations to tender made for the purpose of procuring goods and services shall be published in two 2 of the newspapers with broadest circulation in TimorLeste and Australia or as agreed with the Designated Authority. 30 October 2006 Page 33 b Notwithstanding subArticle 10.2 and except with the consent of the Designated Authority all goods and services shall be procured on an arms length basis by competitive tendering and the Contractor before inviting any tender for goods or services shall consult with the Designated Authority in respect of i ii the list of bidders which the Contractor proposes to invite to tender; and the bid package to accompany the invitation which shall include aa a draft contract; bb the scope of work; cc a technical proposal form; dd a commercial proposal form; ee the use of TimorLeste ; and ff the basis upon which bids will be evaluated. In addition the Contractor shall submit a statement to the Designated Authority regarding the need for the goods or

services concerned and their relationship to the approved Work Programme and Budget the estimated value of the contract and the contracting schedule. c d If the Designated Authority grants an exception to the obligation at paragraph 10.3b it shall publish its reasons for doing so. Costs for goods and services procured on other than an arms length basis the price payable for which is in excess of one hundred thousand 100000 United States Dollars shall be established in accordance with the provisions of Annex C. 10.4 Emergencies The foregoing provisions of this Article 10 do not apply in the circumstances mentioned in paragraph 4.7e to the extent they would hinder the Contractor from taking all necessary and proper measures as therein mentioned. 10.5 Other Information to be Provided a b c The Contractor shall submit to the Designated Authority copies of all contracts for the supply of goods and services for use in relation to Petroleum Operations promptly after their execution. The Contractor shall promptly after awarding a contract for the supply of goods and services in relation to Petroleum Operations following a tender as mentioned in subArticle 10.3 provide the Designated Authority with a detailed report on the reasons for the award. From time to time if requested by the Designated Authority the Contractor shall upon completion of a specific contract relating to the provision of goods and services in relation to Petroleum Operations the price payable under which is in excess of 30 October 2006 Page 34 one hundred thousand dollars 100000 United States Dollars submit to the Designated Authority an appraisal and completion report covering details of the actual expenditures made and of the manpower goods and services utilised in the performance of the contract. d From time to time if requested by the Designated Authority the Contractor shall within sixty 60 days after such request submit to the Designated Authority details of goods and services actually procured both from suppliers based inside and outside TimorLeste and Australia. Article 11 Title to Equipment 11.1 Property a Subject to subArticle 11.2 all structures facilities installations equipment and other property and other works used or to be used in Petroleum Operations shall be and remain the property of the Contractor while so used or held for use unless Contractor requests and obtains approval from the Designated Authority for an alternative arrangement. b Paragraph 11.1a does not apply to property leased to the

Contractor or leased by or belonging to third parties providing services. 11.2 Retention a b c The Designated Authority may upon termination of this Agreement in respect of all or a part of the Contract Area elect to acquire any property or other works as mentioned in paragraph 11.1a installed on or used exclusively in respect of that area by giving the Contractor a notice to that effect. The Contractor shall have no further obligation or liability in respect of any property or other works acquired by the Designated Authority pursuant to paragraph 11.2a but without prejudice to obligations and liabilities accrued prior thereto and will repay to the Designated Authority all amounts included in the Decommissioning Costs Reserve claimed by the Contractor under Article 6 in respect of it before the acquisition and shall subject to paragraph 11.2c claim no further such amounts in respect of it. In respect of any property which has not been fully cost recovered the Designated Authority shall upon electing to acquire such property pursuant to this subArticle pay to the Contractor an amount equal to the unrecovered costs of the property including Uplift calculated at the date of the election. For the purposes of this subArticle it is assumed that costs are recovered in the order in which they were incurred. 30 October 2006 Page 35 Article 12 Consultation and Arbitration 12.1 Arbitration a b If a dispute arises between the Designated Authority and the Contractor relating to the interpretation and performance of this Agreement and relevant provisions of the Treaty and the Code the Parties shall attempt to resolve that dispute by means of negotiation. If such a dispute cannot be resolved by negotiation within a period of ninety 90 days of notification by either Party of a dispute either Party may submit that dispute to arbitration in accordance with the terms set out in this Article 12. 12.2 Procedure a b Arbitration shall be conducted in accordance with the Rules of Arbitration of the International Chamber of Commerce ICC. The Designated Authority and the Contractor shall each appoint one arbitrator and those two arbitrators shall appoint a third. If either Party fails to appoint an arbitrator within thirty 30 days after receipt of a written request to do so such arbitrator shall at the other Partys request if the Parties do not otherwise agree be appointed upon application to ICC. If the first two arbitrators appointed fail to agree on a third within thirty 30 days of the second arbitrator being appointed the third arbitrator shall if the Parties do not

otherwise agree be appointed at the request of either Party upon application to ICC. If an arbitrator fails or is unable to act that arbitrator's successor shall be appointed in the same manner as the arbitrator who is replaced. c The majority decision of the arbitrators shall be final and binding on the Parties. An award made may be enforced in any court having jurisdiction for the purpose. 12.3 Location and Language The place of arbitration shall be Singapore. The language of the arbitration shall be English. 12.4 Commercial Arrangement Waiver of Sovereign Immunity a This Agreement is a commercial agreement. b Both the Designated Authority and the Contractor waive any claim to sovereign immunity which they may have both as to process and execution. 12.5 Obligations Continue During Arbitration The obligations of the Parties under the Agreement shall continue pending the resolution of any matter submitted to arbitration. 30 October 2006 Page 36 Article 13 Financial and Technical Data Records and Reports 13.1 Ownership a The Designated Authority shall have title to all technical data and information acquired in respect of i ii iii the sea bed or subsoil in the JPDA; Petroleum therein; and the superjacent waters in the course of or as a result of Petroleum Operations. b Paragraph 13.1a includes all raw data and information including cores cuttings samples and all geological geophysical geochemical drilling well production and engineering data and information that the Contractor collects and compiles through Petroleum Operations. It does not include data obtained from special studies carried out by or for the Contractor that uses special proprietary software or procedures. It also does not include interpretations that have particular commercial or regional significance to a Contractor over and above that which is necessary for the commercial evaluation and development of a Contract Area and in respect of which the eligible recoverable cost attributable to the Contract Area is a small proportion of the total cost of the interpretations. 13.2 Records Storage Retrieval and Submission a b The Operator shall keep full complete and accurate books accounts and other records of Petroleum Operations and of the sale or other disposition of Petroleum of the data and information mentioned in subArticle 13.1 and of all other financial commercial legal operational technical and other data and information acquired or generated for or resulting directly or indirectly from Petroleum

Operations including that relating to marketing and otherwise to the sale of Petroleum. The Operator shall make the originals or copies of all such data information and records available to the Designated Authority or as it shall direct at reasonable times at the Operators offices in TimorLeste and shall promptly deliver the same to the Designated Authority or as it directs as and when and in such manner as the Designated Authority specifies. c Without prejudice to paragraph 13.2b the Operator shall store all such data and information as the Designated Authority after consultation with the Contractor reasonably directs and otherwise in accordance with Good Oil Field Practice. d The Contractor may retain copies of all such data and information and records delivered to the Designated Authority for use in or in relation to Petroleum Operations and its complying with obligations under law but not otherwise without the consent of the Designated Authority. e Except with the consent of the Designated Authority or as required by law or the rules of a recognised stock exchange the Contractor may not sell or disclose any 30 October 2006 Page 37 such data information and records without the consent of the Designated Authority or as otherwise provided in this Agreement.

13.3 Reports The Contractor shall provide the Designated Authority with such reports as are mentioned in Annex C and as the Designated Authority directs.

13.4 Export of Data and Information No such data information and records shall be taken out of or transmitted from or stored outside TimorLeste or Australia without the consent of the Designated Authority which consent shall not be withheld if resources for the processing interpretation or analysis thereof are not available in TimorLeste if the data information and records are promptly returned to TimorLeste or Australia and accurate copies or useable and representative samples are retained in TimorLeste or Australia.

13.5 Use of Data and Information a b The Designated Authority may make such use as it wishes of the data and information mentioned in this Article 13 and nothing in subArticles 13.6 or 13.7 prevents the Designated Authority using data and information for the purposes of general statistical and other general reporting publicly or otherwise on its activities. Except with the consent of the Designated Authority the Contractor may only use the data and information mentioned in subArticle 13.1 for its Petroleum Operations or for an application for an Authorisation or for reporting

information to its Affiliates provided that the Authorised Person first procures that any such Affiliates agree to be bound by this paragraph 13.5b.

13.6 Confidentiality of Data and Information

a Except as otherwise provided in this Agreement or with the consent of the Contractor the Designated Authority shall not publicly disclose or other than for the purpose of the administration of the Treaty or the Code or as otherwise required by the Treaty or the Code or for the purpose of the resolution of disputes under this Agreement make available to any person any data or information mentioned in subArticle 13.1 until the earlier of i ii five 5 years after the data or information was acquired by the Contractor; and this Agreement ceasing to apply; b Except with the consent of the Designated Authority and in accordance with the conditions if any of the consent the Contractor shall not disclose the data or information mentioned in subArticle 13.1 other than i to its employees agents contractors and Affiliates to the extent necessary for the proper and efficient carrying on of Petroleum Operations; 30 October 2006 Page 38 ii iii iv as required by law; for the purpose of the resolution of disputes under this Agreement; or as required by a recognised stock exchange. The Contractor shall procure that a person mentioned in subparagraph 13.6bi maintains the data and information disclosed to it confidential in the terms of this Article 13.

13.7 Trade Secrets

a Except with the consent of the Contractor and notwithstanding subArticle 13.6 the Designated Authority shall not publicly disclose or other than for the purpose of the administration of the Treaty or the Code or as otherwise required by the Treaty or the Code or for the purpose of the resolution of disputes under this Agreement make available to any person any data or information submitted to it by the Contractor which i ii is a trade secret of or other data and information the disclosure of which would or could reasonably be expected to adversely affect the Contractor in respect of its lawful business commercial or financial affairs; and was clearly marked as such when it was submitted to the Designated Authority. b Without prejudice to subparagraph 13.7ai i ii the Designated Authority may at any time and from time to time serve notice on a Contractor requiring it to show cause within the time specified for the purpose in the notice why information which it has marked pursuant to subparagraph 13.7aii should still be considered a trade secret or other information as mentioned in

that paragraph; and if the Contractor does not show cause within that time the data and information shall no longer be a trade secret or other such information for the purposes of this subArticle 13.7.

Article 14 Management of Operations 14.1 Constitution of Committee For the purpose of this Agreement there will be a committee consisting of two representatives of the Designated Authority one of whom shall be the chairperson and the same number of representatives of the Contractor as nominated by the Designated Authority and the Contractor respectively. For each of its representatives the Designated Authority and the Contractor may nominate an alternate to act in the absence of the representative. 30 October 2006 Page 39 14.2 Meetings a The Committee will meet at least twice in each year in the Designated Authoritys offices or such other place as the Designated Authority may advise upon the chairperson giving thirty 30 days notice thereof. There shall be at least one meeting of the Committee for each of the following purposes i ii examining the Work Programmes and Budgets for the following year which the Contractor is required to submit under Article 14; and reviewing any proposed or agreed amendments to a Work Programme and Budget; reviewing the progress of Petroleum Operations under the current Work Programmes and Budgets; and discussing any other matter relating to Petroleum Operations. b The Contractor or the Designated Authority may request a meeting of the Committee at any time by giving written notice to the chairperson. Such notice shall include a full description of the purpose of the meeting. The chairperson shall thereupon give notice and call such a meeting. Article 15 Third Party Access 15.1 Third Party Access a b The Contractor shall provide for third party access to the structures facilities installations equipment and other property within the Contract Area on reasonable terms and conditions. The Contractor shall use all reasonable efforts to negotiate a satisfactory agreement for third party access and where mutual agreement can not be reached the Designated Authority after consultation with the Joint Commission shall set the terms for such third party access after taking into account internationally accepted principles Good Oil Field Practice and operational requirements and standards. Article 16 Audit 16.1 Independent Audit The Designated Authority may require at the Contractors cost an independent audit starting except in the case of manifest error or

fraud within twenty four 24 months after the end of the Calendar Year and concluding within twelve 12 months of this start of the Contractors books and accounts relating to this Agreement for any Calendar Year. The Contractor shall forward a copy of the independent auditors report to the Designated Authority within sixty 60 days following the completion of the audit. There shall be a period of at least twelve 12 months between independent audits except in the case of manifest error or fraud.

30 October 2006 Page 40 16.2 Designated Authority Audit The Designated Authority may inspect and audit by itself or as it directs and at its own cost the Contractors books and accounts relating to this Agreement for any Calendar Year starting within twenty four 24 months after the end of the Calendar Year and concluding within twelve 12 months of this start.

16.3 Exceptions a b c All audit exceptions shall be raised by the Designated Authority within six 6 months after receipt of the independent auditors report by the Designated Authority or completion of the audit by the Designated Authority or as it directed as the case may be failing which the Contractors books and accounts shall be conclusively deemed correct except in the case of manifest error or fraud. The Contractor shall fully respond to an audit exception within sixty 60 days of its being raised failing which the exception shall be deemed accepted. Adjustments required among the Parties as a consequence of an audit shall be made promptly.

16.4 Contractor to Assist The Contractor shall fully and expeditiously assist and cooperate with audits.

16.5 Affiliates The foregoing provisions of subArticle 16.1 apply in respect of Affiliates of the Contractor. The Contractor shall use its best endeavours to procure that its Affiliates comply with them.

Article 17 Indemnity and Insurance 17.1 Indemnity The Contractor shall at all times defend keep effectually indemnified and hold harmless the Designated Authority and the members of the Joint Commission against all actions suits proceedings costs charges claims and demands whatsoever including for economic loss which may be made or brought against the Designated Authority and/or the members of the Joint Commission wheresoever by any third party in relation to or in connection with this Agreement or resulting directly or indirectly from Petroleum Operations under this Agreement or any other matter or thing done or purported to be done in pursuance of this Agreement or in the conduct of Petroleum

Operations notwithstanding that the Designated Authority and/or the members of the Joint Commission may have approved in any manner or form whatsoever thereof or that such may have been permitted or required by the terms of the Treaty the Code including any regulation made or direction given thereunder or this Agreement or that the Designated Authority and/or the members of the Joint Commission could have exercised but did not exercise any power function right or authority to prohibit the same. The Designated Authority and/or the members of the Joint Commission shall give 30 October 2006 Page 41 the Contractor prompt notice of any such claim and shall not settle it without the prior consent of the Contractor.

17.2 Insurance a The Contractor shall i ii unless the Designated Authority is satisfied from time to time after consultation with the Contractor that the potential liability under subArticle 17.1 can be covered by other means including selfinsurance maintain insurance in respect thereof for such amount and on such terms as the Designated Authority requires from time to time; and take out and maintain insurance in respect of such other matters as the Designated Authority requires including in respect of pollution for such amounts as the Designated Authority requires from time to time and otherwise as required by Good Oil Field Practice unless the Designated Authority is satisfied from time to time after consultation with the Contractor that the potential liability can be covered by other means including selfinsurance. b All such insurances shall name the Designated Authority and the members of the Joint Commission as coinsured and shall waive all rights of subrogation against the Designated Authority and the members of the Joint Commission.

Article 18 Force Majeure 18.1 Force Majeure Relief a Subject to the further provisions of this Article 18 a Party shall not be liable for any failure to perform an obligation under this Agreement to the extent such performance is prevented hindered or delayed by events or circumstances which are beyond its reasonable control and the effects of which could not including by reasonable anticipation and cannot reasonably be avoided or overcome by it Force Majeure. b Notwithstanding paragraph 18.1a the following shall not be Force Majeure i ii iii iv v failure to pay money; in the case of the Contractor the law or any action or inaction of the government of a place other than TimorLeste or Australia or of a political subdivision thereof; in the

case of the Designated Authority the law or any action or inaction of the government of TimorLeste or Australia; in the case of the Contractor any failure to deliver and maintain a Security or to obtain and maintain insurance as required by this Agreement; and in the case of the Contractor strikes lockouts and other industrial disturbances of the Operators or of its agents and subcontractors 30 October 2006 Page 42 employees and not part of a wider industrial dispute materially affecting other employers.

18.2 Procedure A Party claiming Force Majeure shall a b notify the other Party as soon as reasonably practicable of the event or circumstance concerned and of the extent to which performance of its obligations is prevented hindered or delayed thereby; keep the other Party fully informed as to the actions taken or to be taken by it to overcome the effects thereof and from time to time provide it with such information and permit it such access as it may reasonably require for the purpose of assessing such effects and the actions taken or to be taken; and c resume performance of its obligations as soon as reasonably practicable after the event or circumstance no longer exists.

18.3 Consultation The Parties shall consult with each other and take all reasonable steps to minimise the losses of either Party and to minimise any overall delay or prejudice to Petroleum Operations as a result of Force Majeure.

18.4 Third Parties Where a Party enters into an agreement in relation to this Agreement with a third party a failure by the third party to perform an obligation under that agreement shall be Force Majeure affecting that Party only if performance of that obligation was prevented hindered or delayed by events or circumstances which if the third party were party to this Agreement in the capacity of the Party concerned would in accordance with the provisions of this Article 18 be Force Majeure affecting it.

18.5 Extension of Time If Force Majeure materially prevents hinders or delays Petroleum Operations for more than one 1 month the Parties shall discuss in good faith amendments regarding the term of and the periods of time in which Petroleum Operations are to be carried out under this Agreement.

Article 19 Restrictions on Assignment and Change in Control

19.1 Assignment a Except with the consent in writing of the Designated Authority and unless in accordance with the conditions of the consent where the Contractor assigns or 30 October 2006 Page 43 otherwise deals with this Agreement the

Designated Authority may terminate this Agreement. b Paragraph 19.1a includes any assignment transfer conveyance novation merger encumbering or other dealing in any manner whatsoever or howsoever whether legally beneficially or otherwise and whether conditionally or not by a Contractor with i ii iii this Agreement or all or any part of its rights interests benefits obligations and liabilities under it; Petroleum which has not then been but might be recovered in the Contract Area or any proceeds of sale of such Petroleum; and anything whereby this Agreement that Petroleum or any of those rights interests and benefits would but for this subArticle 19.1 be held for the benefit of or be exercisable by or for the benefit of any other person. Paragraph 19.1a does not apply to an agreement for the sale or exchange of Crude Oil where the sale or exchange occurs after title thereto has passed to the Contractor. If notwithstanding paragraphs 19.1a and b any assignment or other dealing is effective by the laws of TimorLeste Australia or any other place without that consent the Designated Authority may terminate this Agreement. The Designated Authority may not consent to a dealing which would result in a person other than a limited liability corporation or an entity with limited liability specifically established for the sole purposes of this Agreement becoming a Contractor and any consent otherwise is of no force or effect. For the purposes of the foregoing encumbrance includes any mortgage charge pledge hypothecation lien assignment by way of security title retention option right to acquire right of preemption right of set off counterclaim trust arrangement overriding royalty net profits interest or any other security preferential right equity or restriction any agreement to give or to create any of the foregoing and any transaction which in legal terms is not a secured borrowing but which has an economic or financial effect similar to that of a secured borrowing. c d e f 19.2 Change in Control a Except with the consent of the Designated Authority if i ii there is a Change in Control of the Contractor or if more than one person any such person; within thirty 30 days after the Contractor has advised the Designated Authority in reasonable detail of the Change in Control the Designated Authority serves notice on the Contractor that it will terminate this Agreement unless such a further Change in Control of the Contractor as is specified in the notice takes place within the period specified in the notice; and iii that further

Change in Control does not take place within that period 30 October 2006 Page 44 the Designated Authority may terminate this Agreement. b c Paragraph 19.2a does not apply if the Change in Control is the direct result of an acquisition of shares or other securities listed on a recognised stock exchange. For the purposes of paragraph 19.2a Change in Control includes a person ceasing to be in Control whether or not another person becomes in Control and a person obtaining Control whether or not another person was in Control. Article 20 Other Provisions 20.1 Notices a b Any notices required to be given by any Party to another Party shall be served in accordance with the Code. All notices to be served on the Contractor shall be addressed to its office in Timor Leste. 20.2 Applicable Law This Agreement shall be governed by and construed in accordance with the laws of England without regard to principles of conflicts of law which would otherwise direct the laws of another jurisdiction to be applied. 20.3 Third Party Rights Unless specifically provided in this Agreement the Parties do not intend that any term of this Agreement be enforceable solely by virtue of the Contracts Rights of Third Parties Act 1999 UK by any person who is not a Party to this Agreement. 20.4 AmendmentsModification This Agreement shall not be amended or modified in any respect unless the Parties agree in writing. 20.5 Entire Agreement This Agreement in conjunction with the provisions of the Treaty and the Code sets out the entire agreement and understanding of the Parties in connection with the subject matter of this Agreement and supersedes any other prior agreements understanding or arrangements whether written or otherwise relating thereto. 30 October 2006 Page 45 IN WITNESS WHEREOF the Parties have executed this Agreement. The Designated Authority BY BY Minza Oil Gas Limited BY BY 30 October 2006 Page 46 Annex A Part 1 JPDA 06101A CONTRACT AREA DESCRIPTION Coordinates in AGD66 The JPDA 06101A Contract Area is the area bounded by the line described below. a commencing at the point of Latitude 10 21 00.00 South Longitude 127 50 00.00 East Point K1; b running thence east along that parallel of latitude to its intersection with the meridian of longitude 128 10 29.64 East Point K2; c thence south east along the geodesic to the point of Latitude 10 29 17.00 South Longitude 128 12 24.00 East Point K3; d thence south west along the geodesic to the point of Latitude 10 43 43.00

South Longitude 127 59 16.00 East Point K4; e thence south west along the geodesic to the point of Latitude 10 53 42.00 South Longitude 127 48 45.00 East Point K5; f thence north westwards to its intersection with the meridian of longitude 127 40 00.00 East Point K6; g thence north along that meridian of longitude to its intersection with the parallel of latitude 10 30 00.00 South Point K7; h thence east along that parallel of latitude to its intersection with the meridian of longitude 127 50 00.00 East Point K8; and i thence north along that meridian of longitude to the point of commencement Point K1. The approximate total area of JPDA 06101A is 2150 square kilometres.

Note The origin of the geographical coordinates used in this area description is the Australian Geodetic Datum 1966 AGD66.

30 October 2006 Page 47 Annex A Part 2 JPDA 06101A

CONTRACT AREA DESCRIPTION Coordinates in WGS84 In accordance with Section 3 of the Petroleum Mining Code positions in the JPDA may be expressed by reference to the spheroid World Geodetic System 84 WGS84 which has its centre at the centre of the Earth and a major equatorial radius of 6378137 metres and a flattening of 10029825.7223563. The point numbers in the following table of WGS84 coordinates correspond to the written description of the Contract Area as described in Annex A Part 1. In the event of a discrepancy between the Annex A Part 1 description and the WGS84 coordinates tabulated below the Annex A Part 1 description takes precedence.

Point Number	K1	K2	K3	K4	K5	K6	K7	K8
Latitude	10o 20 54.86 South	10o 20 54.86 South	10o 29 11.85 South	10o 43 37.86 South	10o 53 36.86 South	10o 44 54.86 South	10o 29 54.86 South	10o 29 54.86 South

Accounting Procedure Clause 1 General Provisions 1.1 Purpose and Definitions a b c The purpose of this Annex C is to further define the manner in which the costs and expenses of Petroleum Operations will be recorded Recoverable Costs will be determined and the Contractors books and accounts will be prepared and maintained and ancillary matters. A reference to a Clause or paragraph is to a clause or paragraph of this Annex C unless the contrary is stated. A reference to

an Article is to an article of the Agreement to which this Annex C is attached.

1.2 Accounting Records a The Contractor shall maintain complete accounts books and records on an accruals basis of all costs expenses and revenues of or relating to Petroleum Operations and the sale or other disposition of Petroleum on an accurate basis and in accordance with generally accepted accounting procedures and standards of the international petroleum industry and in accordance with the charts of accounts mentioned in paragraph 1.2b. b Within sixty 60 days after the Effective Date the Contractor shall submit to the Designated Authority for its approval an outline of charts of accounts books records and reports to be used for the purposes of paragraph 1.2a and for reporting to the Designated Authority thereon.

1.3 Language and Units of Account a Metric units and barrels shall be employed for measurements and quantities under this Agreement. b c The Accounting Records and all reports to the Designated Authority will be in English. The Accounting Records and all reports to the Designated Authority will be in United States Dollars. Costs and revenues in another currency will be translated at the exchange rate set on the day the cost is incurred or the revenue realised at a time and by a financial institution designated by the Contractor and approved by the Designated Authority. d Exchange gains or losses will be credited or charged to the Accounting Records.

30 October 2006 Page 50 Clause 2 Classification and Allocation

2.1 Exploration Costs Exploration Costs are those costs whether of a capital or operating nature which directly relate to Exploration and are incurred in respect of activities carried out substantially in accordance with an approved Exploration Work Programme and Budget but without prejudice to subArticle 4.7 of this Agreement including costs of a drilling wells and related abandonment and site remediation thereof; b surveys including labour materials and services including desk studies and analysis of survey data used in aerial geological geochemical geophysical and seismic surveys and core hole drilling; c auxiliary or temporary facilities; d e f workshops power and water facilities warehouses site offices access and communication facilities; floating craft automotive equipment furniture and office equipment; and if approved by the Designated Authority employee and welfare housing recreational educational health and meals facilities and other similar costs necessary for

Exploration. 2.2 Appraisal Costs Appraisal Costs are those costs that directly relate to Appraisal. 2.3 Capital Costs Capital Costs are a b in respect of a Development Area and before the start of Commercial Production from it those costs whether of a capital or operating nature which directly relate to the Development of it; and in respect of a Development Area and after the start of Commercial Production from it those costs of a capital nature which directly relate to the Development of it or to the production of Petroleum from it and are incurred in respect of activities carried out substantially in accordance with an approved Development Work Programme and Budget but without prejudice to subArticle 4.7 of this Agreement including costs of a b workshops power and water facilities warehouses site offices access and communication facilities; production facilities including offshore platforms including the costs of labour fuel hauling and supplies for both the offsite fabrication and onsite installation of platforms and other construction costs in erecting platforms wellhead production 30 October 2006 Page 51 tubing sucker rods surface pumps flow lines gathering equipment storage facilities all other equipment facilities and modules on platforms treating plants and equipment and secondary recovery systems; pipelines and other facilities for transporting Petroleum produced in the Contract Area to the Field Export Point; movable assets and subsurface drilling and production tools equipment and instruments and miscellaneous equipment; floating craft automotive equipment furniture and office equipment; and if approved by the Designated Authority employee and welfare housing recreational educational health and meals facilities and other similar costs necessary for the Development. c d e f 2.4 Operating Costs Operating Costs are in respect of a Development Area and after the start of Commercial Production from it those costs of an operating nature which directly relate to the Development thereof or to the production of Petroleum therefrom and are incurred in respect of activities carried out substantially in accordance with an approved Development and Production Work Programme and Budget but without prejudice to subArticle 4.7 of this Agreement. 2.5 Decommissioning Costs Reserve Decommissioning Costs Reserve is the amount determined in accordance with paragraph 4.14d. 2.6 Uplift Uplift is the amount which when compounded Quarterly is equal to the average for the

business days of the Quarter of the annual yield on longterm United States Treasury Bonds thirtyyear 30 bonds plus an annual margin of eleven 11 percentage points.

2.7 Miscellaneous Receipts

Miscellaneous Receipts are a all monies received by the Contractor other than for the sale or other disposal of Petroleum from a Development Area which are directly related to the conduct of Petroleum Operations including i ii iii amounts received from the sale or other disposal of Petroleum from production testing activities undertaken in Exploration and Appraisal wells; amounts received for the disposal loss or destruction of property the cost of which is a Recoverable Cost; amounts received by the Contractor under an insurance policy the premiums of which are Recoverable Costs in respect of damage to or loss of property; 30 October 2006 Page 52 iv v vi vii amounts received as insurance the premiums of which are Recoverable Costs compensation or indemnity in respect of Petroleum lost or destroyed prior to the Field Export Point; amounts received from the hiring or leasing of property the cost of which is a Recoverable Cost; amounts received from supplying information obtained from Petroleum Operations; amounts received as charges for the use of employee amenities the costs of which are Recoverable Costs; and viii amounts received in respect of expenditures which are Recoverable Costs by way of indemnity or compensation for the incurring of the expenditure refund of the expenditure or rebate discount or commission in respect of the expenditure; and b the value of property as determined by the Designated Authority the cost of which is a Recoverable Cost when that property ceases to be used in Petroleum Operations.

2.8 Ineligible Costs

Ineligible Costs are a interest or any payment in the nature of in lieu of or having the commercial effect of interest or other cost under or in respect of a Loan Facility; b Foreign exchange and currency hedging costs; c costs relating to formation of corporations or of any partnerships or joint venture arrangements other than in respect of a unitisation as required by the Code; d payments of dividends or the cost of issuing shares; e f g h i j repayments of equity or loan capital; payments of private override royalties net profits interests and the like; all expenditure including professional fees publicity and outofpocket expenses incurred in connection with the negotiation signature or ratification of this Agreement and payments associated with the acquisition of an

interest under this Agreement; payments of taxes under the taxation law of either TimorLeste or Australia made in accordance with Article 5 of the Treaty and Annex G of the Treaty and all other taxes on income profit or gain wherever arising; payments of administrative accounting costs and other costs indirectly associated with Petroleum Operations; except with the consent of the Designated Authority costs incurred in respect of Petroleum after it has passed the Field Export Point; 30 October 2006 Page 53 k costs incurred as a result of noncompliance by the Contractor with the law or this Agreement including costs incurred as a result of any negligent act or omission or willful misconduct of the Contractor its agents and subcontractors including any amount paid in settlement of any claim alleging negligence or willful misconduct whether or not negligence or misconduct is admitted or whether such sum is stated to be paid on an exgratia or similar basis; l payment of compensation or damages under this Agreement; m costs relating to the settlement of disputes which are not approved in advance by the Designated Authority including all costs and expenses of arbitration or litigation proceedings under this Agreement; n Decommissioning costs actually incurred which have been taken into account for the purposes of determining the Decommissioning Costs Reserve; o payments if any under Article 9 of this Agreement; p q r s audit fees and accounting fees excluding fees and expenses incurred for the conduct of audit and accounting services required by this Agreement incurred pursuant to the auditing and accounting requirements of any law and all costs and expenses incurred in connection with intragroup corporate reporting requirements whether or not required by law; except with the consent of the Designated Authority and in accordance with the conditions of the consent any expenditure in respect of the hiring or leasing of structures facilities installations; equipment or other property or of other works; except with the consent of the Designated Authority costs including donations relating to public relations or enhancement of the Contractors corporate image and interests; costs associated with local offices and local administration including staff benefits which are excessive; t costs which are not adequately supported and documented; u v except with the consent of the Designated Authority but subject to subArticle 4.7 of this Agreement costs not included in a Work Programme and Budget

for the relevant Calendar Year; and costs not falling within any of the above items which are stated elsewhere in this Agreement not to be recoverable including in paragraph 2.1d of Article 2 or costs incurred without the consent or approval of the Designated Authority where such is required.

2.9 Other Matters

a The methods mentioned in this 2.9 will be used to calculate Recoverable Costs.

b Depreciation is not a Recoverable Cost.

30 October 2006 Page 54

c d The method for the allocation of general and administration costs other than direct charges allocable to Petroleum Operations proposed by the Contractor shall be subject to approval by the Designated Authority and shall be applied each Calendar Year consistently. Inventory levels shall be in accordance with Good Oil Field Practice. The value of inventory items not used in Petroleum Operations or sold the cost of which has been recovered as an Operating Cost shall be treated as Miscellaneous Receipts. The cost of an item purchased for inventory shall be a Recoverable Cost.

e Where the cost of anything or a receipt or value in respect of anything relates only partially to the carrying out of Petroleum Operations only that portion of the cost or the receipt or value which relates to the carrying out of Petroleum Operations will be a Recoverable Cost or assessed as a Miscellaneous Receipt. Where any cost or related receipt or value relates to more than one of Exploration Appraisal Capital and Operating Costs or to more than one Development Area the cost or related receipt or value will be apportioned in an equitable manner.

Clause 3 Costs Expenses and Credits

Subject as otherwise provided in this Agreement the following costs charges and credits shall be included in the determination of Recoverable Costs

3.1 Surface Rights

All direct costs necessary for the acquisition renewal or relinquishment of surface rights acquired and maintained in force for the purposes of the Agreement.

3.2 Labour and Associated Labour Costs

a b The Contractors locally recruited employees based in TimorLeste or Australia

Costs of all locally recruited employees who are directly engaged in the conduct of Petroleum Operations in the JPDA TimorLeste or Australia. Such costs shall include the costs of employee benefits and state benefits for employees and levies imposed on the Contractor as an employer transportation and relocation costs within TimorLeste and Australia of the employee and such members of the employees family limited to spouse and dependent children

as required by law or customary practice therein. If such employees are also engaged in other activities the cost of such employees shall be apportioned on a time sheet basis according to sound and acceptable accounting principles. Assigned Personnel Costs of salaries and wages including bonuses of the Contractors employees directly and necessarily engaged in the conduct of the Petroleum Operations whether temporarily or permanently assigned irrespective of the location of such employees it being understood that in the case of those personnel only a portion of whose time is wholly dedicated to Petroleum Operations under the Agreement only that prorata portion of applicable salaries wages and other costs as delineated in paragraphs 3.2c 3.2d 3.2e 3.2f and 3.2g shall be charged and the basis of such prorata allocation shall be specified.

30 October 2006 Page 55

c d e f The Contractors costs regarding holiday vacation sickness and disability benefits and living and housing and other customary allowances applicable to the salaries and wages chargeable under paragraph 3.2b. Expenses or contributions made pursuant to assessments or obligations imposed under the laws of TimorLeste or Australia which are applicable to the Contractors cost of salaries and wages chargeable under paragraph 3.2b. The Contractors cost of established plans for employees group life insurance hospitalisation pension stock purchases savings bonus and other benefit plans of a like nature customarily granted to the Contractors employees provided however that such costs are in accordance with generally accepted standards in the international petroleum industry applicable to salaries and wages chargeable to Petroleum Operations under paragraph 3.2b. Reasonable transportation and travel expenses of employees of the Contractor including those made for travel and relocation of the expatriate employees including their families and personal effects assigned to TimorLeste or Australia whose salaries and wages are chargeable to Petroleum Operations under paragraph 3.2b. Actual transportation expenses of expatriate personnel transferred to Petroleum Operations from their country of origin shall be charged to the Petroleum Operations. Transportation expenses of personnel transferred from Petroleum Operations to a country other than the country of their origin shall not be charged to the Petroleum Operations. Transportation cost as used in this section shall mean the cost of freight and passenger service

meals hotels insurance and other expenditures related to vacation and transfer travel and authorised under the Contractors standard personnel policies. The Contractor shall ensure that all expenditures related to transportation costs are equitably allocated to the activities which have benefited from the personnel concerned. g Reasonable personal expenses of personnel whose salaries and wages are chargeable to Petroleum Operations under paragraph 3.2b and for which expenses such personnel reimbursed under the Contractors standard personnel policies. In the event such expenses are not wholly attributable to Petroleum Operations the Petroleum Operations shall be charged with only the applicable portion thereof which shall be determined on an equitable basis.

3.3 Transportation and Employee Relocation Costs The cost of transportation of employees equipment materials and supplies other than as provided in 3.2 necessary for the conduct of the Petroleum Operations along with other related costs including import duties customs fees unloading charges dock fees and inland and ocean freight charges.

3.4 Charges for Services For purposes of this Clause 3.4 Affiliates which are not wholly owned by the Contractor or the Contractors ultimate holding company shall be considered third parties. a Third Parties

30 October 2006 Page 56

The actual costs of contract services services of professional consultants utilities and other services necessary for the conduct of the Petroleum Operations performed by third parties other than an Affiliate of the Contractor. b Affiliates of the Contractor i ii iii Professional and Administrative Services Expenses cost of professional and administrative services provided by any Affiliates of the Contractor for the direct benefit of Petroleum Operations including services provided by the production exploration legal financial insurance accounting and computer services divisions other than those covered by subparagraph 3.4bii or Clause 3.6 or paragraph 3.8b which the Contractor may use in lieu of having its own employees. Charges shall reflect the cost of providing their services and shall not include any element of profit and shall be no less favourable than similar charges for other operations carried on by the Contractor and its Affiliates. The chargeout rate shall include all costs incidental to the employment of such personnel. Where the work is performed outside the home office base of such personnel the daily rate shall be charged from the date such personnel

leave the home office base where they usually work up to their return thereto including days which are not working days in the location where the work is performed excluding any holiday entitlements derived by such personnel from their employment at their home office base. Scientific or Technical Personnel cost of scientific or technical personnel services provided by any Affiliate of the Contractor for the direct benefit of Petroleum Operations which cost shall be charged on a cost of service basis and shall not include any element of profit. Unless the work to be done by such personnel is covered by an approved Work Programme and Budget the Contractor shall not authorise work by such personnel. Equipment and facilities use of equipment and facilities owned and furnished by the Contractors Affiliates at rates commensurate with the cost of ownership and operation; provided however that such rates shall not exceed those currently prevailing for the supply of like equipment and facilities on comparable terms in the area where the Petroleum Operations are being conducted. The equipment and facilities referred to herein shall exclude major investment items such as but not limited to drilling rigs producing platforms oil treating facilities oil and gas loading and transportation systems storage and terminal facilities and other major facilities rates for which shall be subject to separate agreement with the Designated Authority. 3.5 Communications Costs of acquiring leasing installing operating repairing and maintaining communication systems including radio and microwave facilities between the Contract Area and the Contractors base facility. 30 October 2006 Page 57 3.6 Office Storage and Miscellaneous Facilities Net cost to the Contractor of establishing maintaining and operating any office suboffice warehouse data storage housing or other facility in TimorLeste directly serving the Petroleum Operations. 3.7 Ecological and Environment a b c d Costs incurred in the Contract Area as a result of legislation for archaeological and geophysical surveys relating to identification and protection of cultural sites or resources. Costs incurred in environmental or ecological surveys required by this Agreement or regulatory authorities. Costs to provide or have available pollution containment and removal equipment. Costs of actual control and cleanup of oil spills and of such further responsibilities resulting therefrom as may be required by applicable laws and regulations. e Costs of restoration of

the operating environment. 3.8 Material Costs Costs of materials and supplies equipment machines tools and any other goods of a similar nature used or consumed in Petroleum Operations subject to the following.

a Acquisition the Contractor shall only supply or purchase materials for use in Petroleum Operations that may be used in the foreseeable future. The accumulation of surplus stocks and inventory shall be avoided so far as is reasonably practical and consistent with efficient and economical operations. Inventory levels shall however take into account the time lag for replacement emergency needs weather conditions affecting operations and similar considerations.

Components of costs arms length transactions except as otherwise provided in paragraph 3.8d material purchased by the Contractor in arms length transactions in the open market for use in the Petroleum Operations shall be valued to include invoice price less trade and cash discounts purchase and procurement fees plus freight and forwarding charges between point of supply and point of shipment freight to port of destination insurance taxes customs duties consular fees excise taxes other items chargeable against imported materials and where applicable handling and transportation expenses from point of importation to warehouse or operating site. Where an Affiliate of the Contractor has arranged the purchase coordinated the forwarding and expediting effort a fee equal to four 4 per cent of the value of the materials may be added to the cost of the materials purchased.

c Accounting such material costs shall be charged to the Accounting Records and books in accordance with the First in First out FIFO method.

d Material purchased from or sold to Affiliates of the Contractor or transferred from other activities of the Contractor to or from Petroleum Operations shall be valued 30 October 2006 Page 58 and charged or credited at the prices specified in subparagraphs 3.8di 3.8dii and 3.8diii.

i New material including used new material moved from inventory Condition A shall be valued at the current international net price which shall not exceed the price prevailing in normal arms length transactions in the open market.

ii Used material Conditions B C and D

aa Material which is in sound and serviceable condition and is suitable for reuse without reconditioning shall be classified as Condition B and priced at seventyfive per cent 75 of the current price of new material defined in subparagraph 3.8di.

bb Materials which cannot be

classified as Condition B but which are reconditioning will be further serviceable for its original function shall be classified as Condition C and priced at not more than fifty per cent 50 of the current price of new material as defined in subparagraph 3.8di. The cost of reconditioning shall be charged to the reconditioned material provided that the value of Condition C material plus the cost of reconditioning does not exceed the value of Condition B material. cc Material which cannot be classified as Condition B or Condition C shall be classified as Condition D and priced at a value commensurate with its use by the Contractor. If material is not fit for use by the Contractor it shall be disposed of as junk. iii Material involving erection costs shall be charged at the applicable condition percentage of the current knockeddown price of new material as defined in subparagraph 3.8di. iv When the use of material is temporary and its service to the Petroleum Operations does not justify the reduction in price as provided for in subparagraph 3.8diibb such material shall be priced on a basis that will result in a net charge to the accounts under this Agreement consistent with the value of the service rendered. v Premium prices whenever material is not readily obtainable at published or listed prices because of national emergencies strikes or other unusual causes over which the Contractor has no control the Contractor may charge Petroleum Operations for the required material at the Contractors actual cost incurred in providing such material in making it suitable for use and in moving it to the Contract Area; provided notice in writing is furnished to the Designated Authority of the proposed charge prior to charging Petroleum Operations for such material and the Designated Authority shall have the right to challenge the transaction on audit. vi Warranty of material furnished by the Contractor the Contractor does not warrant the material furnished. In case of defective material credit shall not be passed to Petroleum Operations until adjustment has been received by the Contractor from the manufacturers of the material or their agents. 30 October 2006 Page 59 3.9 Rentals Duties and Other Assessments All rentals levies charges fees contributions and other charges of every kind and nature levied by any TimorLeste or Australian governmental authority in connection with the Petroleum Operations and paid directly by the Contractor save where the contrary is expressly provided in this Agreement. 3.10 Insurance and Losses Insurance premiums

and costs incurred for insurance provided that such insurance is customary affords prudent protection against risk and is at a premium no higher than that charged on a competitive basis by insurance companies which are not Affiliates of the Contractor. Except in cases of failure to insure where insurance coverage is required pursuant to this Agreement actual costs and losses incurred shall be allowable to the extent not made good by insurance. Such costs may include repair and replacement of property resulting from damages or losses incurred by fire flood storm theft accident or other cause.

3.11 Legal Expenses All reasonable costs and expenses resulting from the handling investigating asserting defending or settling of any claim or legal action necessary or expedient for the procuring perfecting retention and protection of the Contract Area and in defending or prosecuting lawsuits involving the Contract Area or any third party claim arising out of the Petroleum Operations or sums paid in respect of legal services necessary for the protection of the joint interest of the Designated Authority and the Contractor shall be allowable. Such expenditures shall include attorneys fees court costs costs of investigation and procurement of evidence and amounts paid in settlement or satisfaction of any such litigation and claims. Where legal services are rendered in such matters by salaried or regularly retained lawyers of the Contractor or an Affiliate of the Contractor such compensation shall be included instead under Clause 3.4b as applicable.

3.12 Claims Expenditures made in the settlement or satisfaction of any loss claim damage judgement or other expense arising out of or relating to Petroleum Operations.

3.13 Training Costs All costs and expenses incurred by the Contractor in the training of its employees engaged in Petroleum Operations and such other training as is required by this Agreement.

3.14 General and Administrative Costs The costs described in Clause 2.9c.

30 October 2006 Page 60

3.15 Other Expenditures Other reasonable expenditures not covered or dealt with in the foregoing provisions of this Clause 3 which are necessarily incurred by the Contractor for the proper economical and efficient conduct of Petroleum Operations.

3.16 Duplication There shall be no duplication of charges and credits.

Clause 4 Inventories Inventories of property in use in Petroleum Operations shall be taken at reasonable intervals but at least once a year with respect to movable assets and once

every three 3 years with respect to immovable assets. The Contractor shall give the Designated Authority at least thirty 30 days written notice of its intention to take such inventory and the Designated Authority shall have the right to be represented when such inventory is taken. The Contractor shall clearly state the principles upon which valuation of the inventory has been based. The Contractor shall make every effort to provide to the Designated Authority a full report on such inventory within thirty 30 days of the taking of the inventory. When an assignment of rights under this Agreement takes place the Contractor may at the request of the assignee take a special inventory provided that the costs of such inventory are borne by the assignee.

Clause 5 Production Statement

5.1 Production Information From the start of production from the Contract Area the Contractor shall submit a monthly Production Statement to the Designated Authority showing the following information separately for each producing Development Area and in aggregate for the Contract Area a the quantity of Crude Oil produced and saved; b the quality characteristics of such Crude Oil produced and saved; c the quantity of Natural Gas produced and saved; d the quality characteristics of such Natural Gas produced and saved; e the quantities of Crude Oil and Natural Gas used for the purposes of carrying on drilling and production operations and pumping to field storage; f the quantities of Crude Oil and Natural Gas unavoidably lost; g the quantities of Natural Gas flared and vented; h the size of Petroleum stocks held at the beginning of the month in question; i the size of Petroleum stocks held at the end of the month in question; 30 October 2006 Page 61 j the quantities of Natural Gas reinjected into the Reservoirs; and k in respect of the Contract Area as a whole the quantities of Petroleum transferred at the Field Export Point. All quantities shown in this statement shall be expressed in both volumetric terms barrels of Crude Oil and cubic meters of Natural Gas and in weight metric tonnes.

5.2 Submission of Production Statement The Production Statement for each month shall be submitted to the Designated Authority no later than ten 10 days after the end of such month.

Clause 6 Value of Production and Pricing Statement

6.1 Value of Production and Pricing Statement Information The Contractor shall for the purposes of Article 7 of the Agreement prepare a Value of Production and Pricing Statement

providing calculations of the value of Crude Oil and Natural Gas produced and saved during each Quarter. This Value of Production and Pricing Statement shall contain the following information a b the quantities and the price payable therefor by the Contractor in respect of sales of Natural Gas and Crude Oil delivered to third parties during the Quarter in question; and the quantities and price payable in respect of sales of Natural Gas and Crude Oil delivered during the Quarter in question other than to third parties.

6.2 Submission of Value of Production and Pricing Statement The Value of Production and Pricing Statement for each Quarter shall be submitted to the Designated Authority not later than twenty one 21 days after the end of such Quarter.

Clause 7 Cost Recovery Statement

7.1 Quarterly Statement The Contractor shall prepare with respect to each Quarter a Cost Recovery Statement containing the following information a Recoverable Costs carried forward from the previous Quarter; b Recoverable Costs for the Quarter in question; c Credits under the Agreement for the Quarter in question; d Total Recoverable Costs for the Quarter in question paragraphs 7.1a plus 7.1b less 7.1c; 30 October 2006 Page 62 e f quantity and value of the Contractors share of Petroleum under Article 7 of the Agreement in the Quarter in question; and amount of Recoverable Costs to be carried forward into the next Quarter paragraph 7.1d less paragraph 7.1e.

7.2 Preparation and Submission of Cost Recovery Statements Quarterly Cost Recovery Statements shall be submitted within thirty 30 working days after the end of the Quarter in question.

7.3 Annual Statement An Annual Cost Recovery Statement shall be submitted within ninety 90 days after the end of each Calendar Year. The Annual Statement shall contain the categories of information listed in Clause 7.1 for the Calendar Year in question separated into the Quarters of the Calendar Year in question and showing the cumulative positions at the end of the Calendar Year in question.

Clause 8 Statements of Expenditure and Receipt

8.1 Quarterly Statement The Contractor shall prepare with respect to each Quarter a Statement of Expenditure and Receipts. The Statement will distinguish between Exploration Appraisal Capital and Operating Costs and will identify major items within these categories. The Statement will show the following a actual expenditures and receipts for the Quarter in question; b cumulative expenditure and receipts for the Calendar Year in question; c latest

forecast cumulative expenditures at the Calendar Year end; d variations between budget forecast and latest forecast and explanations thereof. The Statement of Expenditure and Receipts of each Quarter shall be submitted to the Designated Authority no later than fifteen 15 days after the end of such Quarter.

8.2 Annual Statement The Contractor shall prepare a Final EndofYear Statement. The Statement will contain information as provided in the Production Statement Value of Production and Pricing Statement Cost Recovery Statement and Statement of Expenditure and Receipts but will be based on actual quantities of Petroleum produced and costs incurred. This Statement will be used to make any adjustments that are necessary to the payments made by the Contractor under this Agreement. The Final EndofYear Statement of each Calendar Year shall be submitted to the Designated Authority within ninety 90 days of the end of such Calendar Year.

30 October 2006

Page 63 Annex D Proposals in respect of training employment and the acquisition of goods and services

subArticle 5.4 The following proposals are deemed to have accompanied the Contractors application under subSection 5.4 of the Code for this Agreement.

ACTION PLAN FOR SUPPORTING THE ECONOMIC DEVELOPMENT OF TIMORLESTE

a Proposals for training and employment of TimorLeste nationals It is the intention of Company to employ a citizen of TimorLeste to coordinate contact between the Company and the TimorLeste Government should a suitable qualified candidate be identified. Further should the workload justify it the Company will employ an administrative assistantsecretary. Training of Timorese staff will include language training to ensure high standards in Portuguese Tetun and English. For the senior post a nontechnical training will be given in the operation of the oil industry probably by means of an overseas training course. For both posts computer training and health and safety training will be supplied. It is the intention of the Company to employ one or more Timorese graduates as trainees in our primary operating location. If suitable candidates can be recruited depending on their qualifications they will receive training in geoscientific engineering legal andor financial aspects of oil industry; and health and safety with emphasis on marine facilities. These staff will also be trained to act as a primary link between the Company and the TimorLeste Government. It is the intention of the Company to support

undergraduate training in TimorLeste in particular for students in the fields of petroleum engineering geology geophysics and associated business. This programme could run alongside a sponsorship scheme and/or work experience opportunities for suitable candidates. Other programmes can be devised in accordance with the need of the Company and the existence of appropriate circumstances. The Company has provisionally identified a number of TimorLeste citizens that could fulfil roles within the company subject to their availability. The above proposals will involve a minimum commitment from the Company of US\$40000 but clearly our intention is that expenditure on the TimorLeste employment and training components of the project will be considerably larger than this figure.

b Proposals for the acquisition of goods and services in TimorLeste Tendering for goods and services for local/offshore use will be advertised in TimorLeste with preference given to companies based in TimorLeste.

c Proposals for the improvement of TimorLeste technical capabilities through research. It is the intention of the Company to support geoscientific research relevant to the Company's exploration and production interests. By way of background the first electromagnetic survey in the Falkland Islands was carried out by Rockhopper within just over one year of the licences being granted which was beyond the initial commitment in the application. Accordingly if similar opportunities were available to the Company the Company would endeavour to carry out similar types of technological studies/activities.

d Proposals for transfer of technology and skills to TimorLeste nationals The training for TimorLeste staff employed by the Company as summarised in section a above will result in the transfer of skills and technological expertise to TimorLeste nationals. Our longterm aim would be for TimorLeste staff to rise up through the Company organisation and eventually occupy positions of managerial responsibility for our TimorLeste projects.

MINERAL PRODUCTION SHARING AGREEMENT

351 2011 No. This MINERAL PRODUCTION SHARING AGREEMENT is made between the

Mineral Production Sharing Agreement (MPSA) No. 351 dated 18 February 2011 between the

Republic of the Philippines and the Government of Timor-Leste

by the Acting Secretary of the Department of Environment and Natural Resources with office at the

Department of Environment and Natural Resources Building Visayas Avenue Diliman Quezon City and MT. SINAI MINING EXPLORATION AND DEVELOPMENT CORPORATION herein referred to as the CONTRACTOR a corporation duly organized and existing under the laws of the Republic of the Philippines with office at Km. 12 Diversion Road Panacan Davao City and represented in this act by its Chairman of the Board and Chief Executive Officer Vicente T. Lao as authorized by its Board of Directors please refer to ANNEX A WITNESSETH WHEREAS the 1987 Constitution of the Republic of the Philippines provides in Article XII Section 2 thereof that all lands of the public domain waters minerals coal petroleum and other natural resources are owned by the State and that their exploration development and utilization shall be under the full control and supervision of the State; WHEREAS the Constitution further provides that the State may directly undertake such activities or it may enter into a Co-Production Joint Venture or Mineral Production Sharing Agreement with Filipino citizens or cooperatives partnerships corporations or associations at least sixty per centum of whose capitalization is owned by such citizens; WHEREAS pursuant to Republic Act No. 7942 otherwise known as The Philippine Mining Act of 1995 which took effect on 09 April 1995 the Secretary of the Department of Environment and Natural Resources is authorized to enter into Mineral Production sharing Agreements in furtherance of the objectives of the Government and the constitution to bolster the national economy through sustainable and systematic development and utilization of mineral lands; WHEREAS the EVI and has applied for the Exploration Permit No. 200900010 of said Exploration Permit to a Mineral Production Sharing Agreement pursuant to the provisions of the pertinent implementing rules and regulations; WHEREAS the Government desires to avail itself of the financial resource technical competence and skill which the Contractor is capable of applying to the mining operations of the project contemplated herein; WHEREAS the Contractor desires to join and assist the Government in the initial rational exploration and possible development and utilization for commercial purposes of chromite and other associated mineral deposits existing in the Contract Area WHEREAS the Contractor has access to all the financing technical competence technology and environmental management skills required to

promptly and effectively carry out the objectives of this Agreement; NOW THEREFORE for and in consideration of the foregoing premises the mutual covenants, terms and conditions hereinafter set forth it is hereby stipulated and agreed as follows:

V121314sEcroN ISCOPE

This Agreement is a Mineral Production Sharing Agreement entered into pursuant to the provisions of the Act and its implementing rules and regulations. The primary purpose of this Agreement is to provide for the rational exploration, development and commercial utilization of chromite and other associated mineral deposits existing within the Contract Area with all necessary services, technology and financing to be furnished or arranged by the Contractor in accordance with the provisions of this Agreement. The Contractor shall not by virtue of this Agreement acquire any title over the Contract Mining Area without prejudice to the acquisition by the Contractor of the landsurface rights through any mode of acquisition provided for by law. The Contractor shall undertake and execute for and on behalf of the Government responsible mining operations in accordance with the provisions of this Agreement and is hereby constituted and appointed for the purpose of this Agreement as the exclusive entity to conduct mining operations in the Contract Area. The Contractor shall assume all the exploration risk such that if no minerals in commercial quantity are developed and produced it will not be entitled to reimbursement. During the term of this Agreement the total value of production and sale of minerals derived from the mining operations contemplated herein shall be accounted for and divided between the Government and the Contractor in accordance with the provisions of this Agreement.

VIII

hereof

SECTION II DEFINITIONS

As used in this Agreement the following words and terms whether singular or plural shall have the following respective meanings:

2.1 . Act refers to Republic Act No. 7942 otherwise known as the Philippine Mining Act of 1995.

2.2. Agreement means this Mineral Production Sharing Agreement.

2.3. Associated Minerals mean other ores/minerals which occur together with the principal ore/mineral.

2.4. Bangko Sentral means Bangko Sentral ng Pilipinas.

2.5. Budget means an estimate of expenditures to be made by Contractor in mining operations contemplated hereunder to accomplish the Work Program for each particular period.

2.6. Bureau means Mines and Geosciences Bureau.

2.7. Calendar Year or Year means a

period of twelve 12 consecutive months starting with the first day of January and ending on December 31 while Calendar Quarter means a period of three consecutive months with the first calendar quarter starting with the first day of January.

2.8. Commercial Production means the production of sufficient quantity of minerals to sustain economic viability of mining operations reckoned from the date of commercial operation as declared by the Contractor or as stated in the feasibility study whichever comes first.

2.9. Constitution or Philippine Constitution means the 1987 Constitution of the Republic of the Philippines adopted by the Constitutional Convention of 1986 on October 15 1986 and ratified by the People of the Republic of the Philippines on February 2 1987.

2.10. Contract Area means the area onshore or offshore delineated under the Mineral Production Sharing Agreement subject to the relinquishment obligations of the Contractor and properly defined by latitude and longitude or bearing and distance.

2.11. Contract Year means a period of twelve 12 consecutive months counted from the Effective Date of this Agreement or from the anniversary of such Effective Date.

2.12. Contractor means Mt. Sinai Mining Exploration and Development Corporation or its assignees of interest under this Agreement Provided That the assignment of any of such interest is accomplished pursuant to the pertinent provisions of the implementing rules and regulations of the Act.

2.13. Declaration of Environmental Concern (DEC) means a document proclaiming the specific site which are recoverable by socially acceptable environmentally safe and economically sound methods specified in the Project Feasibility Study.

2.14. Department or DENR means the Department of Environment and Natural Resources.

2.15. Director means the Director of Mines and Geosciences Bureau.

2.16. Effective Date means the date of execution of this Agreement by the Contractor and by the Secretary on behalf of the Government.

2.17. Environment means all facets of man's surroundings physical ecological aesthetic cultural economic historic institutional and social.

2.18. Exploration means searching or prospecting for mineral resources by geological geophysical and geochemical surveys remote sensing test pitting trenching drilling shaft sinking tunneling or any other means for the purpose of determining the existence extent quality and quantity of mineral resources and the feasibility of mining them for profit.

2.19. Exploration Period shall mean

the period from the Effective Date of this Agreement which shall be for two (2) years renewable for like periods but not to exceed a total term of six (6) years for nonmetallic minerals and eight (8) years for metallic minerals subject to the pertinent provisions of the implementing rules and regulations of the Act.

2.20. Force Majeure means acts or circumstances beyond the reasonable control of the Contractor including but not limited to war, rebellion, insurrection, riots, civil disturbances, blockade, sabotage, embargo, strike, lockout, any dispute with surface owners and other labor disputes, epidemics, earthquake, storm, flood or other adverse weather conditions, explosion, fire, adverse action by the Government or by any of its instrumentality or subdivision thereof, act of God or any public enemy and any cause as herein described over which the affected party has no reasonable control.

2.21. Foreign Exchange means any currency other than the currency of the Republic of the Philippines acceptable to the Government and the Contractor.

2.22. Government means the Government of the Republic of the Philippines or any of its agencies and instrumentalities.

2.23. Gross Output means the actual market value of the minerals or mineral products from each mine or mineral land operated as a separate entity without any deduction for mining, processing, refining, transporting, handling, marketing or any other expenses. Provided That if the minerals or mineral products are sold or consigned abroad by the Contractor under C.I.F. terms, the actual cost of ocean freight and insurance shall be deducted. Provided further That in the case of mineral concentrates which are not traded in commodity exchanges in the Philippines or abroad such as copper concentrate, the actual market value shall be the world price quotation of the mineral products contained therein prevailing in the said commodity exchange after deducting the smelting, refining, treatment, insurance, transportation and other charges incurred in the process of converting mineral concentrates into refined metal traded in those commodity exchanges.

2.24. Mine Development refers to work undertaken to prepare an ore body or a mineral deposit for mining including the construction of necessary infrastructure and related facilities.

2.25. Minerals mean all naturally occurring inorganic substances in solid, liquid, gas or any intermediate state excluding energy materials such as coal, petroleum, natural gas, radioactive materials and geothermal energy.

2.26. Mineral Products

mean prepared into marketable beneficiation cyanidation processes. materials derived from mineral ores rocks and state by metallurgical processes which include leaching smelting calcination and other similar.

2.27. Mining Area means that portion of the Contract Area identified by the Contractor as defined and delineated in a Survey Plan duly approved by the Director Regional Director concerned for purposes of development and/or utilization and sites for support facilities.

2.28. Mining Operations means mining activities involving exploration feasibility study environmental impact assessment development utilization mineral processing and mine rehabilitation.

2.29. Notice means notice in writing telex or telecopy authenticated by answerback or confirmation received addressed or sent as provided in Section 16.2 of this Agreement.

2.30. Ore means naturally occurring substance or material from which a mineral or element can be mined and/or processed for profit.

2.31. Pollution means any alteration of the physical chemical and/or biological properties of any water air and/or land resources of the Philippines or any discharge thereto of any liquid gaseous or solid wastes or any production of unnecessary noise or any emission of objectionable odor as will or is likely to create or render such water air and land resources harmful detrimental or injurious to public health safety or welfare or which will adversely affect their utilization for domestic commercial industrial agricultural recreational or other legitimate purposes.

2.32. Secretary means the Secretary of the Department of Environment and Natural Resources.

2.33. State means the Republic of the Philippines.

2.34. Work Program means a document which presents the plan of major mining operations and the corresponding expenditures of the contractor in its Contract Area during a given period of time including the plan and expenditures for development of host and neighboring communities and of local geoscience and mining technology as submitted and approved in accordance with the implementing rules and regulations of the Act.

SEN 000291 s.e.c. to N.I.T.

TERM OF AGREEMENT

3.1. This Agreement shall have a term of twenty-five (25) years from Effective Date and may be renewed thereafter for another term not exceeding twenty-five (25) years. The renewal of this Agreement as well as the changes in the terms and conditions thereof shall be upon mutual consent by the parties. In the event the Government decides to allow mining operations thereafter by other

Contractor this must be through competitive public bidding. After due publication of notice the Contractor shall have the right to equal the highest bid upon reimbursement of all reasonable expenses of the highest bidder.

SECTION IV CONTRACT AREA 4.1. Size Shape and Location of Contract Area This Agreement covers a Contract Area of approximately Five Hundred Ten and 160110000510.1601 hectares situated in Homonhon Island Guiuan Eastern Samar and bounded by the following geographical coordinates please refer to ANNEX A 150000 scale Location Map Sketch Plan Corner Latitude Longitude

125 42 0000 125 42 1600 125 42 3500 125 43 0000 125 43 1500 125 43 3000 125 43 4200 125 44. 0000 125 44 0000 125 42 4200 125 42 0000 125 42 0000 125 42 1500 125 42 1200 125 42 0000 10 45 0000 10 45 0000 10 44 1000 10 44 1600 10 44 1500 10 44 0000 10 43 5800 10 44 0500 10 43 3000 10 43 3000 10 43 3800 10 43 5600 10 44 1500 10 44 2500 10 44 2500

SECTION V EXPLORATION PERIOD 5.1. Timetable for Exploration The Contractor shall commence Exploration activities not later than three (3) months after the Effective Date for a period of two (2) years renewable for like periods but not to exceed a total term of six (6) years for metallic minerals and eight (8) years for non-metallic minerals subject to annual review and approval by the Director implementing rules and regulations of the Act.

6.1 SENR 030291 Provided That the used term of Exploration Permit No. 2009-0001-O-VIII shall be deducted from the above Exploration Period. The Contractor shall also submit a Community Development Program to the Regional Office concerned within six (6) months upon registration of this Agreement as prescribed under the implementing rules and regulations of the Act.

5.2. Renewal of Exploration Period In case the Contractor opts for a renewal of its Exploration Period it shall file prior to the expiration thereof a renewal application in the Mines and Geosciences Bureau Central office accompanied by the mandatory requirements stipulated in the implementing rules and regulations of the Act. The Director may grant the renewal of the Exploration Period on condition that the Contractor has substantially complied with the terms and conditions of the Agreement. Provided That with or without the filing of the renewal application the Exploration Period shall upon its expiration automatically shift to the next two (2) year term and so on. In cases where further exploration is warranted beyond the six (6) or eight (8) year period and on condition

that the Contractor has substantially implemented the Exploration and Environmental Work Programs as verified by the Bureau the Director may further grant renewal of the Exploration Period Provided That the Contractor shall be required to set up a performance surety equivalent to the expenditure requirement of the Exploration and Environmental Work Programs.

5.3. Work Programs and Budgets

The Contractor shall strictly comply with the approved Exploration and Environmental Work Programs together with their corresponding Budgets please refer to ANNEXES C and D. The amount to be spent by the Contractor in conducting Exploration activities under the terms of this Agreement during the Exploration Period shall be in the aggregate of not less than that specified for each of the Contract Years as follows:

Contract Year	Exploration Work Program	Environmental Work Program
1st Contract Year	PhP 1,695,000.00	PhP 870,000.00
2nd Contract Year	PhP 6,192,500.00	
Total	PhP 8,620,000.00	

In the event of renewal of the Exploration Period the amount to be spent every year shall first be agreed upon by the parties. In the event of termination of this Agreement the Contractor shall only be obliged to expend the prorata amount for the period of such Contract Year prior to termination. If during any Contract Year the Contractor should expend more than the amount to be expended as provided above the excess may be subtracted from the amount required to be expended by the Contractor during the succeeding Contract Years and should the Contractor stand or with the consent of the Government then the deficiency shall be applied to the amounts succeeding Contract Years.

6. Relinquishment of Total Portion of the Contract Area

During the Exploration Period the Contractor may relinquish totally or partially the original Contract Area. After the Exploration Period and prior to or upon approval of a Declaration of Mining Project Feasibility by the Director the Contractor shall finally relinquish any portion of the Contract Area not necessary for mining operations and not covered by any Declaration of Mining Project Feasibility.

7. Final Mining Area

The Director may allow the Contractor to hold more than one (1) final Mining Area subject to the maximum limits set under the implementing rules and regulations of the Act. Provided that each final Mining Area shall be covered by a Declaration of Mining Project Feasibility.

8. Declaration of Mining Project Feasibility

Within the term of the Exploration Period the

Contractor shall file in the Regional Office concerned the Declaration of Mining Project Feasibility of the Contract Area final Mining Area supported by Project Feasibility Study Three 3 Year Development and Construction or Commercial Operation Work Program complete geologic report an application for survey and the pertinent Environmental Compliance Certificate among other applicable requirements. Failure of the Contractor to submit the Declaration of Mining Project Feasibility during the Exploration Period shall be considered a substantial breach of this Agreement.

Survey of the Contract Area The Contractor shall cause the survey of the perimeter of the Contract Area final Mining Area through an application for survey complete with requirements filed in the Regional Office concerned simultaneous with the submission of the Declaration of Mining Feasibility. Survey returns shall be submitted to the Regional Director concerned for approval within one 1 year from receipt of the Order of Survey complete with the mandatory requirements stated in the implementing rules and regulations of the Act.

5.8. Reporting. During the Exploration Period the Contractor shall submit to the Director through the Regional Director concerned quarterly and annual accomplishment reports under oath on all activities conducted in the Contract Area from the Effective Date of this Agreement. The quarterly report shall be submitted not later than fifteen 15 days at the end of each Calendar Quarter while the annual accomplishment report shall be submitted not later than thirty 30 days from the end of each Calendar Year. Such information shall include detailed financial expenditures raw and processed geological geochemical geophysical and radiometric data plotted on a map at a minimum 1:50,000 scale copies of originals of assay results duplicated samples field data copies of originals from drilling reports maps environmental work program implementation and detailed expenditures showing discrepancies deviations with approved exploration and environmental plans and budgets as well as all other information of any kind collected during the exploration activities. All information submitted to the Bureau shall be subject to the confidentiality of this Agreement.

b. Final Report Regional Director Contractor shall submit to the Director through the concerned a final report under oath upon the expiration of the Exploration Period which shall be in the form and substance comparable to published professional reports of respectable

international institutions and shall incorporate all the findings in the Contract Area including location of samples assays chemical analysis and assessment of mineral potentials together with a geologic map of 150000 scale at the minimum showing the results of the exploration. Such report shall also include detailed expenditures incurred during the Exploration Period. In case of diamond drilling the Contractor shall upon request of the Director Regional Director concerned submit to the Regional Office concerned a quarter of the core samples which shall be deposited in the Regional Office Core Library for safekeeping and reference.

c. Relinquishment Report The Contractor shall submit a separate relinquishment report with a detailed geologic report of the relinquished area accompanied by maps at a scale of 150000 and results of analyses and detailed expenditures among others.

SECTION V DEVELOPMENT AND CONSTRUCTION PERIOD

6.1. Timetable The Contractor shall complete the development of the mine including the construction of production facilities within thirty six 36 months from the submission and approval of the Declaration of Mining Project Feasibility subject to such extension based on justifiable reasons as the Director may approve upon recommendation of the Regional Director concerned.

6.2. Reporting

a. Annual The Contractor shall submit within sixty 60 days after December 31 of each year to the Director through the Regional Director concerned an annual report which states the major activities achievements and detailed expenditures during the year covered including maps assays rock and mineral analyses and geological and environmental progress reports during the Development and Construction Period.

b. Final Report Within six 6 months from the completion of the development and construction activities the Contractor shall submit a final report to the Director through the Regional Director concerned. Such report shall integrate all information in maps of appropriate scale and quality as well as in monographs or reports in accordance with international standards.

IV. COMMERCIAL OPERATION

The Contractor shall submit within thirty 30 days before the completion and construction of production facilities to the Director through the Regional Director concerned a Three Year Commercial Operation Work Program. The Contractor shall commence commercial utilization immediately upon approval of the aforesaid Work Program. Failure

of the Contractor to commence Commercial Production within the period shall be considered a substantial breach of the Agreement.

7.2. Commercial Operation Work Program and Budget During the Operating Period the Contractor shall submit to the Director through the Regional Director concerned Work Programs and Budgets covering a period of three (3) years each which shall be submitted not later than thirty (30) days before the expiration of the period covered by the previous Work Program. The Contractor shall conduct Mining Operations and other activities for the duration of the Operating Period in accordance with the duly approved Work Programs and corresponding Budgets.

7.3. Expansion and Modification of Facilities The Contractor may make expansions, modifications, improvements and replacements of the mining facilities and may add new facilities as the Contractor may consider necessary for the operations. Provided That such plans shall be embodied in an appropriate Work Program approved by the Director.

7.4. Reporting

a. Quarterly Reports Beginning with the first Calendar Quarter following the commencement of the Operating Period the Contractor shall submit within thirty (30) days after the end of each Calendar Quarter to the Director through the Regional Director concerned a Quarterly Report stating the tonnage of production in terms of ores, concentrates and their corresponding grades and other types of products; value, destination of sales or exports and to whom sold; terms of sales and expenditures.

b. Annual Reports During the Operating Period the Contractor shall submit within sixty (60) days from the end of each Calendar Year to the Director through the Regional Director concerned an Annual Report indicating in sufficient detail:

1. The total tonnage of ore reserves whether proven, probable or inferred; the total tonnage of ores, kind by kind, broken down between tonnage mined, tonnage transported from the mine site and their corresponding destination, tonnage stockpiled in the mine and elsewhere in the Philippines, tonnage sold or committed for export whether actually shipped from the Philippines or not, tonnage actually shipped from the Philippines with full details as to purchaser, destination and terms of sale and if known to the Contractor, tonnage refined, processed or manufactured in the Philippines with full specifications as to the intermediate products, byproducts or final products and of the terms at which they were disposed; and work in progress at the end

of the ion with respect to all the installations and facilities¹⁰ SE R030291VV related to the utilization program including the investment actually made or committed; and b.3. Profile of work force including management and staff stating particularly their nationalities and for Filipinos their place of origin i.e. barangay town province region. The Contractor shall also comply with other reporting requirements provided for in the implementing rules and regulations of the Act.^{sEcTtoN viilIFJSCAL}

REGIME 81828384 **General Principle** The fiscal regime of this Agreement shall be governed by the principle according to which the Government expects a reasonable return in economic value for the utilization of nonrenewable mineral resources under its national sovereignty while the Contractor expects a reasonable return on its investment with special account to be taken for the high risk of exploration the terms and conditions prevailing elsewhere in the industry and any special efficiency to be gained by a particularly good performance of the Contractor.

Registration Fees Within fifteen 15 days upon receipt of the notice of approval of the Agreement from the Regional Office concerned the Contractor shall cause the registration of this Agreement with the said Regional Office and pay the registration fee at the rate provided in the existing rules and regulations. Failure of the Contractor to cause the registration of this Agreement within the prescribed period shall be sufficient ground for cancellation of the same.

Occupation Fees Prior to registration of this Agreement and at the same date every year thereafter the Contractor shall pay to the Bureau an occupation fee over the Contract Area at the annual rate provided in the existing rules and regulations. If the fee is not paid on the date specified the Contractor shall pay a surcharge of twenty five percent 25 of the amount due in addition to the occupation fees.

Share of the Government The Government Share shall be the excise tax on mineral products at the time of removal and at the rate provided for in Republic Act No. 7729 amending Section 151 a of the National Internal Revenue Code as amended in addition to a Royalty of not less than five percent 5 of the gross output as well as other taxes duties and fees levied by existing laws. The Excise Tax shall be timely and completely paid to the nearest Bureau of Internal Revenue Office in the province concerned while the Royalty shall be paid directly to the Bureau. For purposes of determining the amount of the herein Government Share the

Contractor shall strictly comply with the auditing and accounting requirements prescribed under existing laws and regulations. The and 292 of Government Code shall be allocated in accordance with Sections 290 Act No. 7160 otherwise known as The Local 1991 711 71 SE R03029185 Pricing of Sales

The Contractor shall dispose of the minerals and byproducts produced at the highest market price prevailing in the locality. The Contractor shall also pay the lowest achievable marketing commissions and related fees and shall negotiate for more advantageous terms and conditions subject to the right to enter into long term sales or marketing contracts or foreign exchange and commodity hedging contracts which the Government acknowledges to be acceptable notwithstanding that the sale price of the minerals and byproducts may from time to time be lower or the terms and conditions of sales are less favorable than that available elsewhere. The Contractor shall seek to strike a balance between long term sales or marketing contracts or foreign exchange and commodity hedging contracts comparable to policies followed by independent producers in the international mining industry. The Contractor shall likewise seek a balanced distribution among consumers. Insofar as sales to Contractor affiliates are concerned prices shall be at arms length standard and competing offers for large scale and long term contracts shall be procured. Before any sale and or shipment of mineral product is made existing and future marketing contracts sales agreements shall be submitted to the Director copy furnished the Regional Director concerned for registration. At the same time the Contractor shall regularly inform the Director in writing of any revisions changes or additions in said contracts agreements. The Contractor shall reflect in its Monthly Quarterly Report on Production Sales and Inventory of Minerals as well as in the Integrated Annual Report the corresponding registration numbers of the marketing contracts agreements governing the export or sale of minerals.

Associated Minerals If minerals other than chromite and other associated mineral deposits are discovered in commercial quantities in the Contract Area the value thereof shall be added to the value of the principal mineral in computing the Government share.

Submission to Government Within the periods stated herein the Contractor shall prepare and submit to the Director through the Regional Director concerned a Work Program and

corresponding Budget for the ContractArea stating the Mining Operations and expenditures which the Contractorproposes to carry out during the period covered with the details andparticulars set forth elsewhere in this Agreement or in the supportingdocuments.Governments Examination and Revision of Work Program Should theGovernment dee to propose a revision to a certain specific feature in theWork Program or Budget it shall within thirty 30 days after receipt thereofprovide a Notice to the Contractor specifying in reasonable detail its reasons the Government and Contractor will meettherefore.on the revision proposed by the Government. In anyany portion of said Work Program or Budget in whichto agthe revisioniii1rfl;r.rliltflfIJlrulithe Government shall fail to notify the Contractor of the proposed revisionshall insofar as possible be carried out as prescribed herein. f theGovernment should fail within sixty 60 days from receipt thereof to notifyContractor of the proposed revisions the Work Program and Budgetproposed by the Contractor shall be deemed to be approved.

9.3. Contractors Changes to Work Program It is recognized by the Governmentand the Contractor that the details of any Work Program may requirechanges in the light of changing circumstances. The Contractor may makesuch changes Provided That it shall not change the general objective ofthe Work Program Provided further That changes which entail a negativevariance of at least twenty percent 20 shall be subject to the approval ofthe Director.In case of any positive variance the Contractor shall submit to the Directorthrough the Regional Director concerned a copy each of the WorkPrograms for information.9.4. The Governments approval of a proposed Work Program and Budget willnot be unreasonably withheld.

XENVIRONMENTAL PROTECTION AND MINE SAFETY AND HEALTH

10.1. The Contractor shall manage its Mining Operations in a technicallyfinancially socially culturally and environmentally responsible manner toachieve the sustainable development objectives and responsibilities asprovided for under the implementing rules and regulations of the Act.10.2. The Contractor shall ensure that the standards of environmental protectionare met in the course of the Mining Operations. To the extent possiblecontrol of pollution and the transformation of the minedout areas ormaterials into economically and socially productive forms must be done

mining.10.3. An Environmental Compliance Certificate ECC shall be secured first by the Contractor prior to the conduct of any development works construction of production facilities and/or mine production activities in the Contract Area.10.4. The Contractor shall submit the following Programs/Plan as prescribed in the implementing rules and regulations of the Act. Environmental Work Program;b. Community Development Program;c. Environmental Protection and Enhancement Program EPEP and Final Mine Rehabilitation and/or Decommissioning Plan;Protection and Enhancement Program13SENRO30291e. Social Development and Management Program SDMP.10.5. The Contractor shall establish a Contingent Liability and Rehabilitation FundCLRFF which shall be in the form of the Mine Rehabilitation Fund MRF and the Mine Waste and Tailings Fee MWTF.The MRF shall be based on the financial requirements of the approvedEPEP as a reasonable environmental deposit to ensure satisfactory compliance with the commitments/strategies of the EPEPAEPEP and availability of funds for the performance of the EPEPAEPEP during the specific project phase. The MRF shall be deposited as Trust Fund in a government depository bank and shall be used for physical and social rehabilitation of areas affected by mining activities and for research on the social technical and preventive aspects of rehabilitation.The MWTF shall be collected based on the amounts of mine waste and mill tailings generated during the conduct of Mining Operations. The MWTF collected shall accrue to a Mine Waste and Tailings Reserve Fund and shall be deposited in a government depository bank for payment of compensation for damages caused by the Mining Operations.10.6. The Contractor shall set up mitigating measures such as mine waste and mill tailings disposal system mine rehabilitation or plan water quality monitoring etc. to minimize land degradation air and water pollution rock drainage and changes in hydrogeology.10.7. The Contractor shall set up an Environmental and Safety Office at its mine site manned by qualified personnel to plan implement and monitor its approved EPEP.10.8. The Contractor shall be responsible in the monitoring of environmental safety and health conditions in the Contract Area and shall strictly comply with all the rules and regulations embodied under DENR Administrative Order No. 200098 otherwise known as the Mine Safety and

Health Standards. SECTION X RIGHTS AND OBLIGATIONS OF THE PARTIES II. 1. Obligations of the Contractor. a. To exclusively conduct sustainable Mining Operations within the Contract Area in accordance with the provisions of the Act and its implementing rules and regulations; b. To construct and operate any facilities specified under the Mineral Agreement or approved Work Program; c. To determine the exploration mining and treatment process to be Mining Operations; 14. To extract, remove, use and dispose of any tailings as authorized by an approved Work Program; To secure all permits necessary or desirable for the purpose of Mining Operations; To keep accurate technical records about the Mining Operations as well as financial and marketing accounts and make them available to Government representatives authorized by the Director for the purpose of assessing the performance and compliance of the Contractor with the terms of this Agreement. Authorized representatives of other Government Agencies may also have access to such accounts in accordance with existing laws, rules and regulations; To furnish the Bureau all the data and information gathered from the Contract Area and that all the books of accounts and records shall be open for inspection; To allow access to Government during reasonable hours in inspecting the Contract Area and examining pertinent records for purposes of monitoring compliance with the terms of this Agreement; To hold the Government free and harmless from all claims and accounts of all kinds as well as demands and actions arising out of the acts or injuries to persons or properties caused by Mining Operations of the Contractor and indemnify the Government for any expenses or costs incurred by the Government by reason of any such claims, accounts, demands or actions; To allot annually a minimum of one and a half percent (1.5%) of the operating costs necessary to implement activities for the development of mining, community mining, technology and geosciences and institutionalization of public awareness and education on mining and geosciences; In the development of the community. I. To recognize and respect the rights, customs and traditions of indigenous cultural communities over their ancestral lands and to allocate royalty payment of not less than one percent (1%) of the value of the gross output of minerals sold; k. 2. To coordinate with proper authorities in the development of the host and

neighboring communities in accordance with the SDMP and to promote the general welfare of the inhabitants living therein. Where traditional self-sustaining income and the community activities are identified to be present the Contractor shall assist in the preservation and/or enhancement of such activities; and k.3. To give to Filipino citizens who have established the neighboring communities in the hiring of its mining operations. If necessary skills and are currently not available the Contractor must immediately prepare and undertake a training and recruitment program at its expense;

In the development of Mining Technology and Geosciences

- 1.1. In the course of its operations to produce geological, geophysical, geochemical and other types of maps and reports that are appropriate in scale and in format and substance which are consistent with the internationally accepted standards and practices. Such maps shall be made available to the scientific community in the most convenient and cost-effective forms subject to the condition that the Contractor may delay release of said information for a reasonable period of time which shall not exceed three (3) years;
- 1.2. To systematically keep the data generated from the Contract Mining Area such as cores, assays and other related information including economic and financial data and make them accessible to students, researchers and other persons responsible for developing mining, geoscience and processing technology subject to the condition that the Contractor may delay release of data to the science and technology community within a reasonable period of time which shall not exceed three (3) years;
- 1.3. To transfer to the Government or local mining company the appropriate technology it may adapt in the exploration, development and commercial utilization of the minerals in the Contract Area;
- 1.4. To develop a program for the advancement of mining technology and geosciences to build up resources and mineral discoveries, improve operational efficiency and resource recovery and enhance environmental protection and mine safety;
- 1.5. To allocate research and development budget for the advancement of mining technology and geosciences in coordination with the Bureau, research institutions, academe, etc.; and
- 1.6. To replicate data, maps and reports cited in k.1 and k.2 and furnish the Bureau for archiving and systematic safekeeping which shall be made available to the science and technology community for conducting research and undertaking other activities which

contribute to the development of mininggeoscience and processing technology and the correspondingnational pool of manpower talents Provided however that therelease of data maps and the like shall be similarlyconstrained in accordance with k.1 and k.2 above;m. To develop and institutionalize an Information EducationProgram for greater public awarenessof responsible mining and geosciences;andand16SENRO00291n. To incorporate in the Mining Project Feasibility Study the plannedexpenditures necessary to implement all the plans and programs setforth in this Agreement; ando. To pay all other taxes and fees mandated by existing laws rules andregulations.

11.2. Rights of the Contractor

a. To conduct Mining Operations within the confines of itsContractMining Area in accordance with the terms and conditionshereof and without interfering with the rights of otherContractorsLesseesOperatorsPermitteesPermit Holders;b. Possession of the Contract Area with full right of ingress and egressand the right to occupy the same subject to surface and easementrights;c. To use and have access to all declassified geological geophysicaldrilling production and other data relevant to the mining operations;d. To sell assign transfer convey or otherwise dispose of all its rightsinterests and obligations under the Agreement subject to the approvalof the Government;e. To employ or bring into the Philippines foreign technical andspecialized personnel including the immediate members of theirfamilies as may be required in the operations of the Contractorsubject to applicable laws and regulations Provided That if theemployment connection of such foreign persons with the Contractorceases the applicable laws and regulations on immigration shallapply to them. Every time foreign technologies are utilized and wherealien executives are employed an effective program of trainingunderstudies shall be undertaken. The alien employment shall belimited to technologies requiring highly specialized training andexperience subject to the required approval under existing laws rulesand regulations;f. To enjoy easement rights and use of timber water and other naturalresources in the Contract Area subject to pertinent laws rules andregulations and the rights of third parties;S. Repatriation of capital and remittance of profits dividends and intereston loans subject to existing laws and Bangko Sentral ng Pilipinasrules and regulations; andh. To import when necessary all equipment spare parts and

raw materials required in the operations in accordance with existing laws and regulations.¹¹ 11.3. Obligations of the Government⁹ the Contractor has the Governments full cooperation of the rights granted to it under this Agreement;¹⁷ tSE R000291b.C.d. To use its best efforts to ensure the timely issuance of necessary permits and similar authorizing documents for use of the surface of the Contract Area; To cooperate with the contractor in its efforts to obtain financing contemplated herein from banks or other financial institutions Provided That such financing arrangements will in no event reduce the Contractors obligation on Government rights hereunder; and To recognize the authority of the financing institution that has granted a loan to the contractor for the mining project to designate its assignee of the Mineral Agreement in case of the contractors default from such loan Provided That the assignee is a Qualified person and the assignment shall be subject to the approval of the Secretary.

SECTION XII ASSETS AND EQUIPMENT
12.1. The Contractor shall acquire for the Mining Operations only such assets that are reasonably estimated to be required in carrying out such Mining Operations.
12.2. All materials equipment plant and other installations of a movable nature erected or placed on the Contract Area by the Contractor shall remain the property of the Contractor. The Contractor shall have the right to remove and reexport such materials and equipment plant and other installations from the Philippines subject to existing rules and regulations.

In case of cessation of Mining Operations on public lands occasioned by its voluntary abandonment or withdrawal the Contractor shall have a period of one (1) year from the time of cessation within which to remove its improvements; otherwise all social infrastructures and facilities shall be turned over or donated tax free to the proper government authorities national or local to ensure that said infrastructures and facilities are continuously maintained and utilized by the host and neighboring communities.

SECTION XIII EMPLOYMENT AND TRAINING OF PHILIPPINE PERSONNEL
13.1. The Contractor agrees to employ to the extent possible qualified Filipino personnel in all types of mining operations for which they are qualified; and after Commercial Production commences shall in consultation and with consent of the Government prepare and undertake an extensive training programme suitable to Filipino nationals in all levels of employment. The objective of said

programme is to reach within the timetable set forth below the following targets of

Filipinization	Unskilled	Skilled	Clerical	Professional	Management	Year 1	Year 3	Year 5	Year 10	Year 15
100	100	100	100	100	100	100	100	100	100	100

13.2. Cost and expenses of training such Filipino personnel and the Contractor's own employees shall be included in the Operating Expenses.

13.3. The Contractor shall not discriminate on the basis of gender and shall respect the right of women workers to participate in policy and decision-making processes affecting their rights and benefits.

14.1. The Government and the Contractor shall consult with each other in good faith and shall exhaust all available remedies to settle any and all disputes or disagreements arising out of or relating to the validity, interpretation, enforceability or performance of this Agreement before resorting to arbitration as provided for in Section 14.2. below.

14.2. Any disagreement or dispute which can not be settled amicably within a period of one (1) year from the time the issue is raised by a Party shall be settled by a tribunal of three (3) arbitrators. This tribunal shall be constituted as follows: one to be appointed by the Contractor and the other to be appointed by the Secretary. The first two appointed arbitrators shall consider names of qualified persons until agreement on a mutually acceptable Chairman of the tribunal is selected. Such arbitration shall be initiated and conducted pursuant to Republic Act No.

876 otherwise known as the Arbitration Act. In any event the arbitration shall be conducted applying the substantive laws of the Republic of the Philippines.

14.3. Each party shall pay fifty percent (50%) of the fees and expenses of the Arbitrators and the costs of arbitration. Each party shall pay its own costs and attorneys' fee.

SECTION XV. SUSPENSION OR TERMINATION OF CONTRACT

TAX INCENTIVES AND CREDITS

15.1 This Agreement may be suspended for failure of the Contractor to comply with any provision or requirement of the Act and/or its implementing rules and regulations; to pay on time the complete taxes, fees and other charges demandable and due the Government;

15.2 This Agreement terminates or may be terminated for the following causes: a) expiration of its term whether original or renewal; b) withdrawal from the Contractor; c) violation by the Contractor of the Agreement's conditions; d) failure to pay taxes, fees or charges for two (2) consecutive years; e) false

statement or financial obligations or terms or C19SE R030291 omission of facts by the Contractor; and 0 any other cause or reason provided under the Act and its implementing rules and regulations or any other relevant laws and regulations.

15.3. All statements made in this Agreement shall be considered as conditions and essential parts hereof and any falsehood in said statements or omission of facts which may alter change or affect substantially the fact set forth in said statements shall be a ground for its revocation and termination.

15.4. The Contractor may by giving due notice at any time during the term of this Agreement apply for its cancellation due to causes which in the opinion of the Contractor render continued mining operation no longer feasible or viable. In this case the Secretary shall decide on the application within thirty 30 days from notice. Provided That the Contractor has met all the financial fiscal and legal obligations.

15.5. No delay or omissions or course of dealing by the Government shall impair any of its rights under this Agreement except in the case of a written waiver. The Government's right to seek recourse and relief by all other means shall not be construed as a waiver of any succeeding or other default unless the contrary intention is reduced in writing and signed by the party authorized to exercise the waiver.

15.6. In case of termination the Contractor shall pay all the fees and other liabilities due up to the end of the year in which the termination becomes effective. The Contractor shall immediately carry out the restoration of the Contract Area in accordance with good mining industry practice.

15.7. The withdrawal by the Contractor from the Mineral Agreement shall not release it from any and all financial environmental legal and fiscal obligations under this Agreement.

15.8. The following acts or omission inter alia shall constitute breach of contract upon which the Government may exercise its right to terminate the Agreement.

a. Failure of the Contractor without valid reason to commence Commercial Production within the period prescribed; and

b. Failure of the Contractor to conduct mining operations and other activities in accordance with the approved Work Programs and any modification thereof as approved by the Director. Provided That the Agreement shall automatically terminate upon field verification that the Contractor committed the above failures.

15.9. The Government may suspend and cancel tax incentives and credits if they are by the terms and conditions of said incentives and Contractor

facredits.20 1H NTSENR030291SECTION XVIOTHER PROVISIONS16.1 . Any terms and conditions resulting from repeal or amendment of any existing laws or regulation or from the enactment of a law regulation or administrative order shall be considered a part of this Agreement.16.2. NoticeAll notices demands and other communications required or permitted hereunder shall be made in writing telex or telecopy and shall be deemed to have been duly given notice in the case of telex or telecopy if answered back or confirmation received or if delivered by hand upon receipt or ten days after being deposited in the mail airmail postage prepaid and addressed as follows If to the Government THE SECRETARY Department of Environment and Natural Resources DENR Building Visayas Avenue Diliman Quezon City If to the Contractor THE PRESIDENT Mt. Sinai Mining Exploration and Development Corporation Km. 12 Diversion Road Panacan Davao City Either party may substitute or change such address on notice thereof to the other party Provided That the Contractor shall in case of any change of address during the term of this Agreement notify the Director in writing. Failure to do such notification shall be deemed as waiver by the Contractor to be informed about any communications as provided in Section 16.2 above. 16.3. Governing Law This Agreement and the relation between the parties hereto shall be governed by and construed in accordance with the laws of the Republic of the Philippines. The Contractor hereby agrees and obliges itself to comply with the provisions of the Act its implementing rules and regulations and other relevant laws and regulations. 16.4. Suspension of Obligation VVa. Any failure or delay on the part of any party in the performance of its obligation or duties hereunder shall be excused to the extent as defined in the Act Provided That attributable to Force Majeure causes the subject to be subject to by the Director. III W I I I I I b. If Mining Operations are delayed curtailed or prevented by such Force Majeure causes then the time for enjoying the rights and carrying out the obligations thereby affected the term of this Agreement and all rights and obligations hereunder shall be extended for a period equal to the period involved. The Party whose ability to perform its obligations is affected by such Force Majeure causes shall promptly give Notice to the other in writing of any such delay or failure of performance the expected duration thereof and

its anticipated effect and shall use its efforts to remedy such delay except that neither Party shall be under any obligation to settle a labor dispute Provided That the suspension of obligation by the Contractor shall be subject to prior approval by the Director.

16.5. Amendments This Agreement shall not be annulled amended or modified in any respect except by mutual consent in writing of the herein parties.

IN WITNESS WHEREOF the Parties hereto have executed this Agreement as of the day and year first above written

1.0 ARTICLE1 Definitions and Interpretation

1.1 In this Agreement the following terms shall have the meanings specified below

1.1.1 Affiliate means a as it relates to all Parties except SHELL a company or other entity thar directly or indirectly through one or mote intermediaries controls or is controlled by or is under common control of or with a Party; [4 Page 5 H o V A NN L Aemb as it relates to SHELL indirectly controlled N.V. Koninklijke Nederlandsche Petroleum Maatschappij The Shell Transport and Trading Company Ple any company other than SHELL which is for the dme being directly or Koninklijke Nederlandsche

Petroleum Maatschappij and The Shell Transport and Trading Company Plc of them. dhs definition Control means ownership of a minimum of 50 of the issued voting stock of company entitled to vote or ownership of equivalent rights to determine the decisions of such company or entity; [purpose of by N.V. For the either and or Agreement means this agreement including the Schedules; Appraisal means the its commencement is the determination of the extent volume or producibility of Hydrocarbons contained in a Discovery. activity whose purpose time the of at Farmout means the grant of possession and use of Farmout Area Farmee for the purpose of conducting Operations in the Marginal Field defined in Article 3. Additional Reservoir means any new Petroleum Deposit in the Farmout Area that is outside the Farmout Depth. Associated Agreements means all agreements to which some or all Parties are party under which the Farmor provide services to Farmee with regard to the transportation or disposal of Production from the Marginal Field the Hydrocarbon Handling Agreement and the Offtake Agreement. but without limitation including to 112 113 1.1.4 L1.6 117 Abandonment Security Agreement means an agreement substantially in the form of Schedule C provided that such amendments shall be made thereto as are necessary to; 0 i i make provision for the principles set out in the schedules thereof comply with documents comprising the schedules thereof and/or the Regulations and/or any third party signatory to the as may be required to render the Abandonment Security Agreement and/or the documents comprising its schedules effective and enforceable in accordance with the intention of the Parties as set out in this Agreement under the law applicable at the date of execution thereof. V Page 6 e el . S Am118 Discovery means by of Hydrocarbons within the Farmout Area the existence of which until that moment was unknown or not confirmed. accumulation drilling finding of an the 119 Ammerica. Dollars or US means the legal currency of the United States of 1.1.10 Dry Crude means treated crude oil from Marginal Field with a water of less than 0.5 by volume measured in accordance with Department Petroleum DPR in accordance with the provision of the Regulations. Resources approved methods less of 1111 Effective Date shall be as defined in Article 3 of this Agreement; 1112 1.1.13 1114 1.1.15 Encumbrances means any mortgage charge whether fixed or floating pledge claim lien equity or

other security agreement or arrangement or any royalty interest production payment net profit interest deferred or or right arrangement; preemption obligation agreement carried similar int of Farmee means Universal Energy Resources Limited Farmout means the grant of po sion and usc of Farmout Arca te Farmee for the purpose of conducting Operations in the Marginal Field as defined in Article 3. Farmout Area means the atea within OML 14 delineated by its ordinates shown in Schedule A as may be amended from time to time by the agreement of this Agreement. in accordance with provisions Parties the the of 1.1.16 Farmout Depth means the True Vertical Depth TVD of the decpest well drilled in the Marginal Field as at the Effective Date which is 9829 Feet True Vertical Depth Subsea as indicated in Schedule A. 1117 property and equipment Farmout Facilities means all Farmout Arca that shall be handed over belonging to the Farmor within the to the Farmee by Farmor on as is basis including all benefits and liabilitics putsuant to this Agreement. facilitics 1.1.18 Government means the Government of the Federal Republic of Nigerix including as the context requires state and local governments its ministe agencies and other subdivisions. 1119 Gross Negligence or Wilful Misconduct means an intentional and conscious or reckless distcgard of good and prudeat oil and gas field practice Page 7 or of the terms of this Agreement and shall not include any omissions crrovs or mistakes made by any director officer employee agent contractor o7 subcontractor of such Party or its Affiliates in the exercise in good faith of any authority or discretion conferred upon such Party under this Agreement 1.1.20 Health Safety and Environmental or HSE Standards means the standards as set out by the Department of Petroleum Resources and the JV Operator. 1.1.21 Joint Operating Agreement or JOA mcans the Joint Operating Agreement between the Farmor dated 11 July 1991 as may be amended from time to time which governs their relationship in relation to intee al OML 14 whereby SHELL was appointed operator to conduct petroleum opetations within the arcas covered by their oil mining leases. 1.1.22JV Operator means SHELL as the Operator for the time being of the Joint Venture. 1.1.23Joint Venture means the joint venture between the Farmor. 1.1.24 LIBOR means the London Inter Bank Offer Rate as quoted by the National Westminster Bank in London for three months United States Dollar deposits at 11.00

hours on the relevant date or the maximum legally If the London [nter Bank Rate is not so quoted on permissible rate if less. the relevant date such rate last previously so quoted shall be taken provided that if National Westminster Bank shall not have quoted such rate for seven 7 consecutive days the rate published in the Financial Times London on the day after the relevant date shall be substituted.

1.1.25 Marginal Field means Stubb Creek Field situated in the FarmOur Avca as defined in 1.1.15.

1.1.26 MFO means Unvers operator on behalf of h as Finergy Resources Limited rself and Partners where applicable. marginal eld 1.1.27 Minister or Ministry means the Minister or Ministry of

Petroleum requires Resources of including the Department of Petroleum Resources DPR of the Ministry the Federal chuhlit of Nigeria the context as 1.1.28 Month means a calendar month; 1.1.29

Natural Gas means all gascous Hydrocarbons produced in associarion gascous reservoirs produce mainly which from or Oil Crude with Hydrocarbons. 1.1.30 Nigeria means the Federal Republic of

Nigeria; Page 8 e ah Ao TL.1.31 Oil Mining Lease OML means the lease to the Farmor granted by the Minister under the Petroleum Act 1969 Cap 350 laws of the Federation of Nigeria 1990 as

amended to a lessee to search for win work carry away and dispose Petroleum from all the atea covered by OML 14. L1.1.32 Operations means the exploration prospecting winning working and

cartying away of petroleum undertaken by the Farmee in respect of the Marginal Field and all matters ancillary thereto including further Appraisal within the Farmout Area in accordance with the

terms of this Agreement. 1.1.33 Party means any party to this Agreement its successors and permitted assigns and Parties means all such parties collectively. 1.1.34 Petroleum means mineral

oil or any related hydrocarbon or natural gas its natural state in strata and does not include coal or be or other stratified deposits from which oil as bituminous shales extracted by destructive

distillation. it exists can in 1.1.35 Petroleum Operations shall have the meaning ascribed rhe Petroleum Profits Tax Act Cap 354 Laws of the Federadon of Nigeria 1990. to in it 1.1.36 Petroleum

Profits Tax ot PPT has the meaning ascribed to it in the Petroleum Profits Tax Act Cap 354 and Laws of the Federation of Nigeria 1990. 1.1.37 Regulations means any and statutes all and

regulations affecting oil mining leascs and Marginal Fields and companies conducting petroleum

operations in effect from time to time and made by government authorities having jurisdiction over oil mining leases and the Farmout Area and over operations conducted thereon and any laws orders or Regulations of any State or local Government authority. orders rules laws 1.1.38 Work Programme means any programme of Operations to be carried out in the FarmOut Area. 1.2 Interpretation All references to Articles Schedules and Appendices are unless otherwise this expressly stated references to Articles Schedules and Appendices to Agreement. than party 2.2.1 The Partners to Stubb Creek Marginal field agree that Universal Energy Resources Limited is the operator and has the exclusive responsibility for executing the Operations and shall represent the Partners in the performance and administration of this Agreement. 2.2.2 Notwithstanding Article 2.2.1 each of the Farmee shall be jointly and severally liable for its obligations under this Agreement. 31 Tarmout ARTICLE 3 FARMOUT 3.1.1 to all of for the and with dutics terms subject accepts together benefits Facilities the purpose of conducting Operations in Subject to the terms and conditions of this Agreement the Farmor hereby grant to the Farmee for the term of this Agreement possession and use of the Farmout Area for the purpose of Farmee conducting Operations in the liabilities rights Marginal Field associated with conducting Petroleum Operations in the Farmout Atea and this Agreement and Farmee hereby Government consent the possession and use of the Farmout Area andor the Farm out Marginal Field together with all rights benefits obligations and liabilities associated with the conduct of Petrolevim Operations in the Farmout Arca. 312 Farmee shall use the Farmout Area only for the purposes set forth in this Agreement and in accordance with the terms of this Agreement the OMI and the Regulations. Except as otherwise provided for in this Agreement the costs and expenses incurred in the Operations as well as any losses and risks derived therefrom shall be borne by Farmee and Farmor shall not be responsible to bear ot tepay any of the Farmees costs provided such losses ate not caused by the Farmor. A v Page 11 3.1.3 g L 755 g It is understood and agreed that this Agreement is subject to the provisions of the OML and the Regulations. 315 As between the Fatmor and Farmee the Farmor shall retain all ownership rights to the OML and the rights title and interest or estate of the Farmec shall be equivalent to those of a sublessee in accordance with the terms of this Agreement. 3.2 Government Approvals 32.1 The Farmor and Farmee each undertake to obtain all necessary approvals from the relevant authorities in relation and obligations under this Agreement. In this regard each Party shall provide reasonable assistance to the other Party as necessary in order for such approvals to be obtained in a timely manner. their respective rights to 33 Effective Date and Term of Farmout 3.3.1 The Effective Date of the Farmout intended by this Agreement shall

be the latter of 1 The payment by Farmee of any signature bonus and/or other fees payable to the Government upon the terms of the allocation of the Marginal Field to Farmee. b The obtaining of all approvals and consents required by the Regulations for the Farmout. The receipt by Farmor from Farmee of copies of the certificates of insurance in respect of the classes of insurance listed in Article 16.1.1 16.1.2 and 16.1.3. 3.3.2 Term of Agreement 3.3.2.1 Subject to Article 19 this Agreement shall be for an initial period of sixty months from the Effective Date. 3.3.2.2 If prior to the end of the initial sixty month period Farmee serves on the JV Operator notification from DPR of approval and renewal of the farm out to Farmee by Government the Agreement shall be subject to the full force and effect from the end of the sixty . hereof continue in period of the Effective Date for so long as the Farmor continues to have the right to conduct Petroleum Operations within any part of the area currently included within OML 14 unless terminated earlier Article 19. Page 12 7 3.3.3 Hand Over Not later than fourteen days after the Effective Date of the Farmout in accordance with this Article 3 or at such other time as the Parties shall agree JV Operator shall give custody to Farmee on an as is and where is basis of the Farmout Area; of all the Farmout Facilities; 3.4 Environmental Baseline Survey Farmee shall carry out an Environmental Base Line Survey in line with the requirements set out in Schedule B signed by Farmee and Farmor the acceptance of which shall be confirmation by the Parties that this Survey fairly and completely describes the status of the environmental condition of the Farmout Area as at the Effective Date of this Agreement. Failure of Farmee to conduct the Environmental Base Line Survey in accordance with Article 3.4 above shall be deemed to be acceptance of Farmor's assessment of the environmental state of the Farmout Area as at the Effective Date and shall be a waiver of any subsequent claims against Farmor arising out of or concerning the environmental condition of the Farmout Area. ARTICLE 4 REDEFINITION OF FARMOUT AREA 4.1 If new information has become available based upon relevant objective scientific and technical factors that indicates that the Marginal Field may extend beyond the Farmout Area Farmee shall inform Farmor and may request an amendment to in accordance with the provisions of this Article. the Marginal Field shall include The factors on which a

case for redefinition of the Marginal Field could be and limited made interpretation of new seismic data new development concepts results from appraisal or development wells drilled within the Marginal Field by Farmee or outside the Farmout Area by JV Operator. acquisition processing not but to 4.3 Any such request shall be in writing and shall substantiate in detail and with relevant data the reasons behind Farmees request for a redefinition of the Page 13 44 4.5 4.6 Marginal Field. Not later than ninety days upon receiving such request for redefinition of the Marginal Field the Parties will meet to discuss such request. Farmort shall consider Farmees request and may at its absolute discretion agree to a redefinition of the Marginal Field as Farmor may deem fit. If Parties cannot agree on the a redefinition within six 6 months of the request or if the Parties fail to meet within ninety days of the request as provided in this Article 4.3 then the request shall be deemed to be refused by Farmor and may be revisited only for the purposes of a unitisation with Farmor at the discretion of the Farmor. The provisions of this Agreement including consideration shall apply mutatis mutandis to a redefinition made other than for unitisation. If and as long as with respect to any request for redefinition no agreement this has been reached the Marginal Field Agteement. shall remain as out in set . a as result of such request Farmor considers it appropriate or the If Marginal Field appears to straddle the boundaty or boundaries of Farmors oil mining lease ot a neighbouring oil mining lease not being the property of the Farmor Farmee shall promptly report same to DPR and shall use its best endeavours to reach agreement with the holders of such oil mining lease subject to the Regulations on the development of the Marginal Field as a unit with such straddled fields including agreement on participation the allocation of production and the determination of the consideration for such participation. If an agreement is reached the unitised arca shall be deemed to be subject to the terms of DPRs guidelines on unitisation. If Farmout Area is reduced by surrender expiration andot relinquishment revocation of the OML then the Farmout Area shall be redefined to andor such exclude relinquishment and in the event of revocation of the OML it shall revert to Government. surrender expiration affected arca any by Page 14 .ARTICLE 5 FINANCIAL OBLIGATIONS 51 Overiding Royalty As consideration for Overiding Royalty accordance with this

Article 5. the Farmout Farmee shall Override. The Ovetride shall pay to the Farmor be determined in Farmee shall pay to Farmor as follows daily production With respect to the production of Crude Oil from the Marginal Field the Farmee shall pay to the Farmor an Override of 2.5 of the daily production up to 2000 Bopd. Subsequently 3.0 of the value of Farmees from and subsequently 5.5 of the value of Farmees daily production from 5001 to 10000 Bopd; and subsequently 7.5 of the value of the Farmees daily production between 10001 and 15000 Bopd. For production in excess of 15000 Bopd the Farmee shall pay the Farmor such additional rate of Override as shall be negotated and agreed between the Parties. Bopd; 5000 2001 to For the purpose of the Override the daily production shall miean the entire daily production of Crude Oil from the Marginal Fild. With respect to the production of Natural Gas from the Marginal Field the Farmee shall pay to the Farmor an Ovetride of 0 of the value of Farmees production between 0 and 20 Million Standard Cubic Feet per Day MMSCFD; For production higher than 20 Million Standard Cubic Feet perDay MMSCFD the terms acd conditions of such production shall be agreed between Farmor and Farmee. All payments due under Article 5.1.1a from the Farmee shall be made in Crude Oil allocation from Farmee to Farmor in such quantum as will generate an amount sufficient to cover all such payment under this Agreement In respect of such allocation Farmor shall have the option at its sole discretion to elect to take delivery thereof . at the fence between Farmees facilities and Farmors facilitdes; or Page 15i at such other outlet of Farmees Crude Oil as may be agreed by the Parties. c Farmor shall have the option at its sole discretion to elect to receive the Override from Farmee at all times in US Dollars equivalent ar the prevailing market prices payment net of all applicable handling charges for Farmees Crude Oil the on ate of d For the purpose of calculation of the Override Farmee shall keep full and correct accounts for all Petroleum measured as stipulated in Article 7.2.3 and Farmor shall have access at all times to the books of Farmee containing such accounts and may make excerpts therefrom. Farmee shall within sixty 60 days after the end of cach calendar year deliver to JV Operator an abstract for cach be as confidential by JV Operator unless otherwise agreed by Farmee. yeat which accounts of such treated shall 3 5.2. 5.2. 4 rw2bnw5.3 Farmee shall be required

to account for or measure Petroleum unavoidably lost or used in operations hereunder including Petroleum used in secondary recovery operations or Natural Gas that may be flared. Without prejudice to Article 6.4 i Farmee shall furnish Farmor a copy of any report presented by Farmee to DPR on the number of barrels of Crude Oil and other Petroleum produced in the Farmout Area within the five 5 days immediately following the end of each calendar month. If Farmee should not supply copy of such report JV Operator may elect to calculate the payments due to Farmor under this Article 5 proceeding on the basis of the mentioned monthly report most recently presented by the Farmee to the Minister and Farmee shall pay on such on the understanding that such payment shall be adjusted when Farmee furnishes Farmor the report of reference. basis Unless otherwise provided herein any payment which Farmee is required to make to the Farmor pursuant to this Agreement shall be made within thirty days following the date of lifting by the Farmee of the Petroleum produced from its Operations. Where payments are to be made in cash they shall be made to a bank account to be nominated in writing from time to time by the Farmor. Page 16 5.4 Any overdue payment shall and compounded monthly from the due date until the date on which the payment is received at the annual rate of bear interest calculated as in the case of payments which have been the subject of a bona fide dispute LTBOR plus one percent 1; and in the case of all other late payments LIBOR plus one per cent 1 ; and in the case of payments in local currency it shall be the Minimum Rediscount Rate MRR advised by the Central Bank of Nigeria CBN plus six percent 6 during the period in which the amount in default remains unpaid.. 5.5 5.6 5.7 5.8 to Farmor from Farmee shall remain unpaid a If any sums due a continuous period of three months after it has become due Farmee shall be considered to be in Default and shall be deemed to have granted to the Farmor a lien upon all Crude Oil produced from the Marginal Field and the proceeds therefrom to secure discharge of the said sums due from Farmee together with interest thereon at the rate provided in Article 5.4 above. for This hereby agreed that throughout the period of such Default Farmee shall not be entitled to its production from the Marginal Field which shall then vest in and be the property of the Farmor while any sums including interest due from Farmee remains outstanding.

Farmor shall be authorised to sell such production from the Marginal Field at the best price obtainable under the circumstances and after deducting all costs charges and expenses incurred by it in connection with such sale shall recover from the remaining proceeds all moneys due to it by Farnee together with interest accrued. Any surplus remaining thereafter shall be paid to the Farmee. Notwithstanding the provision of Articles 5.5 and 5.6 above Farmor may upon not less than 30 days prior notice to Farmee suspend performance of their services or obligations to Farmee under the Associated Agreements if applicable. The exercise of such right shall not constitute a waiver of any other remedies available to the Farmor under this Agreement.

Page 17 6.1 6.1.1 ARTICLE 6

RIGHTS AND OBLIGATIONS OF THE PARTIES Rights and obligations of the Farmee Save and except as otherwise provided in this Agreement the Farmee shall to the extent provided for in this Agreement Have the right to conduct Operations by itself its agents and/or its contractors. If the Farmee does not conduct any Operations itself it shall nonetheless remain responsible for such Operations as the Farmee to the extent provided under this Agreement and the Regulations to Conduct all its Operations in accordance with the terms of the OML the Regulations and this Agreement in a manner consistent with good and prudent oil and gas field practice and with that degree of diligence and prudence reasonably and ordinarily exercised by experienced oil and gas companies engaged in similar activities under similar circumstances and conditions to meet Health Safety and Environmental Standards of DPR and the JV Operator. Have the right to all reservoirs lying totally within the Farmout Area and down to the Farmout Depth. Grant to the Farmor access to drilling well production operating and other data and reports as compile during the term hereof and at surrender all original data and reports to the DPR. seismic geological geophysical it may the end of the Agreement all e Acquire all permits consents approvals surface or other rights that may be required for or in connection with the conduct of the Operations the FarmOut Area and not start any activity the appropriate permit consent or approval has been obtained have the right to deal directly with Government on all matters relating to the Operations other than those relating directly or indirectly to the OML outside of the Farm out Area. until Fully inform and submit to JV Operator all

and Government interface in respect of the Marginal Field and adhere to any instructions of JV Operator in respect thereof as stipulated in the terms of this agreement. g Pay and be liable for all taxes rates and assessments of every description whatsoever that may be imposed on Farmee by any lawful authority in respect of the Farmout Area or by reason of this Agreement. Page 18 [3 N Y h Make all payments due to the Farmor in accordance with the terms of this Agreement. i Obtain the Insurance required under Article 16 without limiting in the rights way the Farmor to procure and insurance coverage as they determine to be appropriate at the Farmors expense. j Maintain good relations with the host communities Local and State Governments and inhabitants of the areas in and around the Farmout Area and do nothing to undermine the relationship of these parties with the Farmor. k Not exercise all or any rights or authority over the FarmOut Area in derogation of the rights of the Farmor as stipulated in the terms of this Agreement Farmee shall not represent itself in its Operations in any part of the Farm out Area in any way or manner that might reasonably be interpreted as a claim to agency of or partnership with the Farmor. l A violation of the terms Farmee shall not conduct any of its operations in be done within the and conditions of the OML and shall do or cause to scope of its authority and with due diligence all such lawful acts and things within its control as may be necessary to keep and maintain the OML in force and effect in so far as the Farmout Area is concerned and do nothing to endanger the OML. Farmee shall be responsible for acquiring any surface rights and rightsofway required for the Operations provided that JV Operator shall to the extent possible and subject to any required consent first having been granted easements or licence to the Farmee with regard to any such surface rights and is free to and/or is able to rightsofway that may be in its possession which it grant. Notwithstanding the foregoing however JV Operator responsible for any failure by Government or any owner of land or surface right to grant consent to any such easements and/or licence. Farmee at its sole expense shall have the right and obligation to perfect title to and/or make any modification necessary to cause any such surface v and rightsofway to remain in compliance with all requirements of the of Nigeria provided however that the Farmee shall not have the right in make

any such modification that of ability immaterial way obligations under the OML. will adversely affect other than any the Farmor to comply with ro an its the of 6.1.2 6.1.3 6.14 6.1.5 Page 19 0.1.6 Except as otherwise provided in this Agreement or as may be authorised by the mutual agreement in writing of the Parties Farmee shall not permit or suffer any lien or other encumbrance to be filed or to remain against the Farmout Area and Farmout facilities unless th a bona fide dispute with respect thereto. Farmee may only create a lien or other encumbrance on Farmees facilities and/or Petroleum produced and saved as a result of its Operations subject always to Farmors overriding royalty payments and any right reserved to the Farmor in respect thereof under the terms of this Agreement. The lien to be created by the Farmee under this Article 6.1.6 shall not for any reason rank in priority over the right which the Farmor would otherwise have been entitled to under this Agreement had such charge or lien not been created by the Farmee.

6.2 Rights and obligations of the Farmor

6.2.1 In accordance with this Agreement the Farmor shall a and be liable for all taxes rates and assessments of every Pay description 1 whatsoever that may be imposed by any lawful authority over the OML except as may be applicable over the Farmout Area y L b Subject to any confidentiality obligations by which it is bound herein give the Farmee access on reasonable prior notice during business hours to such information and/or data relating to the possession of the Farmor as Farmee may reasonably require for Operations excluding analyses prepared by or on behalf of the Farmor for their internal purposes or proprietary information of the Farmor or third party. the Farmee shall have the right and access to all original data resulting from the Operations including but not limited to geological geophysical engineering well logs completion production operations status reports and any other data as the Farmee may compile during the term hereof provided however that the Farmee shall keep and use such original data during the term of this Agreement d Have the right in the event of any environmental or safety problem or any emergency involving the safeguarding of the prevention of pollution or risk of damage to the OML or the Farmors Petroleum Operations around the Farmout Area In the event which in the opinion of of notice in writing to Farmee requiring Farmor's Operations to issue suspend Operations or any part thereof

and inform and seek Ellmfiilf.I from DPR.. Farmee shall not resume Operations until permitted to do so in the JV Operator could a suspension property or mitigated lives by be for or Page 20writing by DPR upon consultation with JV Operator. Any expense incurred by Farmee as a result of any such suspension shall not be recoverable from the Farmor provided the Inent was not caused by the Farmor. Access Rights The Farmor shall at all reasonable times and at their cost have the right of access to the FarmOut Arca for their authorised representatives and at the Farmors expense provided such Farmor give Farmee reasonable notice in writing of the date such access is required and nominates in such notice the authorised be granted. PROVIDED always that the JV Operator shall be entitled to dispense with such notice in the event of an emergency. representatives to whom such access to is relieve indemnify and hold Each Farmor so requesting such access shall harmless the Farmee from and against all claims liabilities costs damages and expenses of every kind and nature in respect of personal injury including fatal injury or disease of any representative of such Farmor save and except where such personal injury was caused or contributed by the negligence or breach of duty of any employee agents or contractors of the Farmee. Reports Farmee shall make available to Farmor copies of all statutory reports to DPR including a copy of the report or form presented by Farmee to DPR on the aumber of barrels of Crude Oil and volumes of other hydrocatbon produced he from days immediately following the end of each submitted within fifteen calendar month. calendar month which report the Marginal Field every shall 15 a quartetly Farmee shall submit within forty five days after the end of each calendar a quarter narrative report of all the activities during such calendar quarter under this Agrecment with plans and maps showing the places where the described wotk was done to Farmor which shall progress contain report the end of each Calendar Year Farmee shall Within three months after deliver to Farmor an annual report which shall consolidate the information such the quarterly progress reports furnished in contained in Calendar Year. Farmee shall report all inences of environmental pollution or commuiial disturbances occurring in the Farmout Area or from Operations immediacly respect of AL tae el Ry 1 o o . 1 i iii iv Page 21upon their occurrence and in any event not less than twentyfour hours thereafter. 6.5 Books

and Accounts Farmee shall keep complete books of accounts of Operations consistent with modern petroleum industry and accounting practices and procedures. The statutory books and accounts of this Agreement shall be kept in Naira and U. S. Dollars. All other books of accounts for the Operations shall be kept in both Naira and U. S. Dollars.

6.6 Farmers Inspection Rights

6.6.1 6.6.2 6.6.3 Subject as otherwise provided in this Agreement the Farmor shall have access to and the right to inspect not more than twice a year all books records and inventories maintained by the Farmee and relating to the Operations provided that JV Operator gives the Farmee not less than fourteen 14 days prior notice of the date upon which it desires to make such inspection and identifies the person or persons to conduct such inspection. Not more than once in six months and subject to a minimum of 14 days notice the Farmor may audit or cause the audit of the books and accounts relating to Operations and the Marginal Fields throughout the term of this report an Agreement. However in external auditor shall be appointed by both Parties to audit the books. In the event of disagreement of audit Notwithstanding the limitations under this Article 6 Farmor shall upon notice at any other time other than as provided have access to the records books the purposes of and accounts of the Farmee for inspection and/or audit upon showing reasonable cause to do so. inventories

6.7 Covenant and Undertaking Each Party hereby covenants and undertakes with the other Party that it will comply with all applicable provisions and requirements of the Regulations and the OML and will do all such acts and things within its control as may be necessary to keep and maintain the OML in full force and effect.

Page 22

ARTICLE 7 OPERATIONS

7.1 Operations conducted in the Farm out Area shall be at the sole cost risk and expense of Farmee and Farmee shall ensure that its Operations do not conflict with or cause any hindrance to Farmers Petroleum Operations. Farmee shall discuss its Annual Work Programme and proposed budget with the Farmor before submission to the DPR. Farmor shall have the right but not the obligation to review and/or comment upon the said work programme. Should Farmor wish to propose a revision as to certain specific features of the said Work Programme and Budget it shall within four 4 weeks after receipt thereof so notify the Farmee in writing specifying in reasonable detail the review requested and its reasons therefore

Farmee shall use its best endeavours to resolve the request for revisions proposed by Farmor and give reasonable regard to any comments by the Farmor. 17 Farmor has not made any comments and/or proposed any revisions in writing within four (4) weeks then it shall be deemed that Farmor has no comments thereon.

7.2 Exploration and Appraisal

7.2.1 7.2.2 7.2.3 Farmee has the right to further drill Appraisal/Development wells in the Marginal Field and all reservoirs lying totally within the Farmout Area down to the Farmout Depth shall be considered to be part of the Marginal field and subject to the terms of this Agreement.

drill 1f in the course of Operations Farmee suspects the presence of Additional Reservoirs below the Farmout Depth and desires to such Additional Reservoirs Farmee shall submit its Work Programme to Farmor for consideration of the safety and technical issues thereof as Farmor so wishes. Farmor shall not unreasonably withhold its consent for such drilling PROVIDED that if Farmor does not give its consent within a period of 30 days from the date of submission of such programme by Farmee the matter shall be referred to DPR for resolution. The Farmor reserve the right to participate in the terms and conditions therefore shall to separate agreement between the Parties. the development of such Additional Reservoirs and be subject into Farmee shall measure all Petroleum produced and saved from the Marginal Field and the duly authorised representatives of Farmor shall have the rights to examine such measurements and to test the appliances used therefore. [It give reasonable Farmee wishes to alter its measuring appliance it shall

Page 23 ; A notice to the Farmor to enable its representative to be present during such alteration and Farmee shall use standard measuring

7.3 Meetings and Minutes Farmee and Farmor shall meet at least once every twelve (12) Months to discuss Operations. Such meetings shall be called by Farmee upon not less than fourteen (14) days advance notice with the agenda for the meeting attached. Any Party may require additional items to be put on the agenda provided notice thereof is received not later than seven (7) days before the meeting in question. Notwithstanding the foregoing if either Party reasonably believes the circumstances so require it shall be entitled to call a meeting at such other time and upon shorter notice than that stipulated above.

8.1 8.2 HEALTH AND ENVIRONMENTAL STANDARDS ARTICLE 8 With the goal of achieving safe and reliable

operations in compliance with all Regulations including avoiding significant and unintended impact on the safety or health of people or property or the environment the Farmee must in the conduct of Operations conform to the applicable HSE Standards and Regulations as notified to the Farmee from time to time. Farmee shall establish and provide to the Partics a programme for regular FISE audits and shall grant the Farmor and/or its agents the right from time to time upon reasonable notice to observe Operations in the Farmour Area conduct HSE audits or join HSE audits conducted by the Farmee at or audit by the Farmor shall not of itseif Farmors own cost. Such visit the PFarmees constitute an endorsement ot warranty by the Farmor of Operations or environmental standards. 1f any such FISE Audir reveals any Petroleum which potential Operations or reputation the Farmee shall at its own cost abide by any instructions of the Farmor to correct and/or otherwise prevent and/or arrest such situation including the suspension of Operations. environmental Farmors affect issue may Page 24

REPRESENTATIONS WARRANTIES AND DISCLAIMERS ARTICLE 9 a1

 CONVENTION TITIS CONVENTION IS DATED NOVEMBER 292012 BETWEEN THE REPUBLIC
 OF CAMEROON represented by the His Excellency Emmanuel BONDE Minister of Industry Mines
 and Technological Development acting herein pursuant to the powers conferred upon him by the
 Prime Minister of the Republic of Cameroon hereinafter referred to as the State AND CAM moN S.A.
 a societe anonyme registered under the Jaws of the Republic of Cameroon with a share capital of
 1200 shares having its registered office at 2eme etage Immeuble Ilibiscus Avenue Charles De Gaul
 le Hippodrome Yaounde Cameroon; registered on 27 April2005 with the Regislre du Commerce et
 du Credil Mobilier RCCM of Yaounde under number RCYA02005B362 BP 33 059 Yaounde
 Republic of Cameroon; represented by Mr. Giulio Casella acting herein in his capacity as Chaimtan
 of the Board of Directors and Mr. Serge Asso o Mendomo acting herein in his capacity as General
 Manager pursuant to a power conferred upon them by a resolution of Cam Irons board of directors
 hereinafter referred to as Cam Iron. The State and Cam Iron being together referred to as the
 Parties and each as a Party. Considering Law No. 20010 11 of 16 April 2001 establishing a Mining
 Code as amended and supplemented by Law No. 2010011 of29 July 2010 and decree No
 20021648PM of26 March 2002 defming the conditions of implementation of Law No. 2001001 of 16
 April2001. The mineral deposits contained in the soi l and subsoil of the territory of the State are and
 remain the exclusive property of the State. Considering the importance of the mining sector in the

economic and social development of the Republic of Cameroon Cameroon the State in the framework of its mining resource development programme has decided to promote and stimulate foreign investment related to the exploration of said resources. In the context of this development plan the State has granted to Cam Iron the Exploration Permit under which Cam Iron has carried out exploration operations which confirmed the existence of iron ore deposits near the Mbalam village in the Eastern Region of the Republic of Cameroon. In progressing its exploration of the Exploration Permit and to provide certainty for its investment into the territory of the State. Cam Iron entered into the Framework Agreement with the State. Based on the findings of the Feasibility Study Cam Iron considers that those iron ore deposits would allow on an economically profitable basis in compliance with the fiscal and customs provisions described in this Convention the extraction of the Mbalam Ore as well as the construction of the facilities required for the exploitation processing transformation transportation and export of said Mbalam Ore the Blended Ore and the Beneficiated Ore through an integrated system and in accordance with the Operating standards set forth in the Project Agreements. page 1 1 Therefore Cam Iron declared that it is able to i ii iii iv v vi carry out or instruct a Third Party to carry out Mining Operations in the Exploitation Area in accordance with the terms and conditions set forth in this Convention the Project Agreements and the Exploitation Permit; construct or procure the construction of and exploit the Railway Facilities in accordance with the terms and conditions set forth in this Convention the Railway Concession the relevant Project Lease and the Railway Agreement; construct or procure the construction of and exploit the Mineral Terminal facilities in accordance with the terms and conditions set forth in this Convention the Mineral Terminal Concession the relevant Project Lease and the Mineral Terminal Agreement; subject to the satisfaction of the matters referred to in Articles ii and iii above provide Railway services and Mineral Terminal services to Third Parties; conduct or procure the conduct of the Blending Operations in accordance with the terms and conditions set forth in this Convention and the Blending Agreement; subject to the satisfaction of certain technical and economic criteria construct or procure the construction of and exploit the Beneficiation Facility in accordance with the terms and conditions set

forth in this Convention and the Beneficiation Agreement; vii as the case may be conduct or procure the conduct of and exploit any other facility required for the Project in accordance with the terms and conditions set forth in this Convention and where necessary an Additional Specific Agreement including procuring the conduct and construction of the Beneficiation Power Station; and viii carry on each of the foregoing activities together the Project at its own expense and risk either itself or through a Project Company. Having confirmed its commitment to undertake the Project under the terms and conditions set forth in this Convention Cam Iron has filed an application for obtaining the Exploitation Permit under the conditions and according with the terms of sections 45 et seq. of the Mining Code which was declared admissible. The Parties have convened negotiated and agreed to this Convention which is governed by the Legislation subject to any contrary provisions or exemptions required for the Projects needs as may be authorised by the Enabling Law.

THEREFORE THE PARTIES HAVE AGREED AS FOLLOWS

SECTION I GENERAL PROVISIONS

DEFINITIONS Where capitalized the terms and expressions used in this Convention have the meanings ascribed to them below

Acceding Party means each of the Mine Project Company the Railway Project Company and the Mineral Terminal Project Company and any other Project Company which will be acceding to this Convention in accordance with Article 6.4. page 12

Acceptable Bank Rating means a with respect to any bank based in the Peoples Republic of China a long term credit rating of at least Baa3 Moody's Investor Services Inc. or BBB Standard and Poor's Ratings Group; b any bank with a physical presence in Cameroon that is under the supervision and regulation of the States national monetary authority; and c with respect to any other financial institution a long term credit rating of at least BBB Standard and Poor's Ratings Group or Baa3 Moody's Investor Services Inc. unless otherwise agreed by the State. Accession Notice means the document attached as Annex I. Additional Facility Authorisation has the meaning ascribed to it in Article 19.1 g. Additional Facility Request has the meaning ascribed to it in Article 19.1 b. Additional Roads means all land traffic lanes other than a Project Road. Additional Specific Agreement means any agreement entered into between the State and Cam Iron a Project Company or any Subsidiary

as the case may be and if agreed between those Parties drawn up based on the BOOT model where appropriate determining and setting the framework of the conditions of funding and building of any facility required for the purposes of the Project but which cannot be governed by any existing Specific Agreement. Additional Spur Line means a standard gauge heavy haul railway connecting the Mainline Railway to exploitation areas covered by a mining permit other than the Exploitation Permit either within or outside the territory of the State but does not include the Initial Spur Lines or loading facilities at the relevant mine site. Additional State Interest means the State interest described in Article 45.2a(ii). Adverse Circumstances has the meaning ascribed to it in Article 47.1.4a. Aerodrome means the defined area on land within the Exploitation Permit on which there will be buildings installations and equipment intended to be used either for the arrival departure and surface movement of aircraft authorized by a Project Company to utilize the Facilities including passenger check-in areas baggage handling facilities customs offices office space ramp access security screening aircraft parking and hangar facilities and other areas or facilities necessary for the efficient conduct of aviation activities. Aerodrome Agreement means the agreement relating to the use of the Aerodrome which shall be concluded between the Mine Project Company Cam Iron and the State. Affiliate means with respect to an entity any other entity which is Controlled by or under common Control with such entity. Annex means an annex to this Convention and Annexes means all annexes to this Convention. Application has the meaning ascribed to it in Article 32.1 2a. Arbitration Procedure has the meaning ascribed to it in Article 56.3. Arms Length Terms means the terms which would be agreed upon between knowledgeable and willing parties in an arms length transaction. Assets or Goods means as the case may be all assets and/or goods required for the Project Operations including consumables plant equipment materials commodities vehicles fuel and hydrocarbons. Assignee means any Person directly or indirectly holding rights in the Project from any Project Company the transfer to which Person was permitted in accordance with the provisions of this Convention the Project Agreements and the Finance Documents. Auditors has the meaning ascribed to it in Article 30.2a. Bank Guarantee means a guarantee in a form acceptable to

the State in its reasonable discretion issued by an independent bank with an Acceptable Bank Rating whether or not located outside the territory of the State for the amounts referred to in this Convention and Bank Guarantees mean those guarantees collectively. Beneficiated Ore means iron ore mined in the Exploitation Area which has been beneficiated in the Beneficiation Facility. Beneficiation means the process whereby the Mine Project Company concentrates or upgrades the Low Grade Ore from the Exploitation Permit and/or reduces the level of impurities thereof by washing drying crushing or screening or a combination thereof by utilising the Beneficiation Facility and Beneficiated shall be construed accordingly. Beneficiation Agreement means the agreement to be finalized between the State and the Mine Project Company with regard to the design construction operation and maintenance of a Beneficiation Facility and associated facilities. Beneficiation Capacity Expansion Works means construction and related work performed on the Beneficiation Facility and required to increase the Initial Beneficiation Production Capacity or the Interim Beneficiation Production Capacity as the case may be. Beneficiation Election has the meaning ascribed to it in Article I 0.1 j. Beneficiation Escrow Account has the meaning ascribed to it in Article I 0.9. Beneficiation Facility means the plant to be constructed which will enable the conduct of Beneficiation Operations which for clarification excludes the Beneficiation Power Station with an initial capacity equal to the Initial Beneficiation Production Capacity or Interim Beneficiation Production Capacity and as the context requires includes any expansion of that facility as contemplated by Article I 0.13. Beneficiation Feasibility Study has the meaning ascribed to it in Article 10.1 d. Beneficiation Operations means the design construction operation and maintenance of a Beneficiation Facility. Beneficiation Power Station means either the gas fired or hydro power station which is to be constructed to generate the power to meet the power requirements of the Beneficiation Operations. Beneficiation Power Station Feasibility Study has the meaning ascribed to it in Article I O. Jd. v page4 Beneficiation Sector Good Practices refers to Good International Industry Practices methods techniques standards norms and actions internationally followed for large scale bulk commodity projects. Beneficiation Specifications means the specification that in the Beneficiation

Facility be designed to eventually produce thirty five million 35 000 000 Tonnes of Beneficiated Ore in any Calendar Year and the other detailed technical characteristics of the Beneficiation Facility which must take into account the Beneficiation Sector Good Practices; and ii the Beneficiation Power Station be designed to always produce enough power to facilitate the Beneficiation Operations. BF Commissioning has the meaning ascribed to it in Article 10.7f. BF Commissioning Deadline has the meaning attributed to it in Article 10.7. BF Construction Commencement Date has the meaning attributed to it in Article 10.10a. BF Power Station Construction Commencement Date has the meaning attributed to it in Article 10.10b. BF Construction Conditions means the conditions set forth in Annex 11. BF Construction Deadline has the meaning ascribed to it in Article 10.7. Blended Ore means iron ore which results from the Blending Operations. Blending Agreement means the agreement relating to the blending of Mbale Ore with iron ore from the territory covered by the Nabeba Permit to be concluded between the Mine Project Company Congo Iron and the Mineral Terminal Project Company which will establish the provisions regarding the blending of Mbale Ore and Nabeba Ore. Blending Operations means the operations relating to the industrial process whereby Nabeba Ore and Other Ores other than Nabeba Ore with the consent of the State are blended with any Mbale Ore. which operations are carried out in accordance with the terms and conditions of this Convention the Blending Agreement and the Monitoring Agreement Blending or such similar agreements. Bonus Payment means a bonus payment under Law No. 201001 1 of 29 July 2010 to amend and supplement certain provisions of the Mining Code. Bonus Payment Holiday has the meaning ascribed to in Annex vn. BOOT means build own operate and transfer. Breach or Breach Event has the meaning ascribed to it in Article 50.1. Business Day means any day excluding Saturday and Sunday on which commercial banks are open for business in Yaounde in the territory of the State and with respect to the Reference Rate means any day excluding Saturday and Sunday on which commercial banks are open for business in London. Calendar Year means a period of twelve 12 consecutive months commencing on 1st January and ending on 31st December the same year. Cameroon has the meaning given in the . pageS Cameroonian Bank. has the meaning given

in Article 43.2. Cam Iron Share Transfer Agreement means the agreement to be concluded between the State and Cam Iron relating to the State acquiring fifteen percent 15 of the share capital and voting rights of the Mine Project Company from Cam Iron. Cam Iron Representative has the meaning ascribed to it in either Article 18.22.2ai or Article 30.5.2ai. Capital Gains Tax Holiday has the meaning ascribed to in Article Annex VII. CCJA means the Common Court of Justice and Arbitration. CEMAC means the Economic and Monetary Community of Central African States. CEDispute Notice has the meaning ascribed to it in Article 39.1. CENotice has the meaning ascribed to it in Article 39.1. Centre has the meaning ascribed to in Article 56.2a. CFA Franc means the currency which is the legal tender in the territory of the State. Change in Control has the meaning ascribed to it in Annex IX. Change in Emission Scheme means a the enactment or making of an Emission Scheme; or b a change in the way an Emission Scheme is applied or interpreted as a result of a binding decision of a court of competent jurisdiction or by a Governmental Entity responsible for administering the Emission Scheme that occurs on or after the Change Notice. Change in Law Event means the coming into effect of a any Legislation other than the Enabling Law enacted after the Signature Date; b c d e any modification including repeal of any Legislation existing on the Signature Date that comes into effect after the Signature Date; any change referred to in this Convention as a Change in Law; a change in the sales Tax imposed by the State and paid by a Project Company any Contractor or any Subcontractor with respect to sales of goods purchased for the performance of the services contemplated under any of the Project Agreements; or a new Tax or an increase in Tax imposed by the State and paid by a Project Company any Contractor or any Subcontractor with respect to the performance of the services contemplated under any of the Project Agreements including any Royalty or any Taxes measured by gross receipts; provided however that new Taxes shall not include any Taxes imposed by a foreign government or any of their agencies compliance with which in accordance with the Operating Standards materially interferes with delays or increases the cost of performing the Project Operations. v page6 It is specifically understood however that none of the following shall constitute a Change in law Event I 2

3 4 5 any law statute code or regulation that has been enacted or adopted on or before the Signature Date to take effect after the Signature Date; the denial delay in issuance of or imposition of any term or condition in connection with. any Governmental Approval required for the Project Operations as a result of any Project Companys noncompliance with applicable Legislation relating to such Governmental Approval; a change in the nature or severity of the actions typically taken by a Governmental Entity to enforce compliance with Legislation which was in effect as of the Signature Date; any increase in any fines or penalties provided for under Legislation in effect as of the Signature Date provided such increases do not discriminate against the Project Companies; or any act event or circumstance that would otherwise constitute a Change in Law Event but that does not change the requirements imposed on any Project Company by the Operating Standards in effect as of the Signature Date. Change Notice has the meaning ascribed to it in Article 40.5b. CIMA has the meaning ascribed to it in Article 42.1 . Collective Bargaining Agreement means the agreement dated the Signature Date entered into between Cam Iron on the one hand and the trade unions designated therein on the other hand the Ministry of Labor and Social Security and the Ministry of Employment and Professional Training having also executed such agreement with a view to determining the terms and conditions of recruitment dismissal organization of the working conditions remuneration professional training health and safety of the personnel hired for the purposes of the Project and all the obligations of which shall be restated separately by each Project Company in the Specific Agreement to which it is a party. Committee Response has the meaning ascribed to it in Article 47.1.5. Compensation Event means a b c any applicable entry on the Project by the State pursuant to Article 6.Sc and Article 6.5d ten million 10000000 US Dollars per individual occurrence or twentyfive million 25000000 US Dollars over a rolling five 5 year period; the circumstances described in Articles 22.2 twentyfive million 25000000 US Dollars over a rolling five 5 year period and 22.3 twentyfive million 25000000 US Dollars over a rolling five 5 year period; any unreasonable delay in or denial of the issuance of a properly submitted application or other petition for a Governmental Approval required for U1e Project for which the Project Company has complied with

all material requirements under applicable Legislation which delay is not caused by a Project Company Fault and which continues for sixty 60 Days following notice of such unreasonable delay or denial by the applicable Project Company to the State Project Committee or such later time to the extent the failure to respond would materially affect Project V page 9 Operations twentyfive million 25000000 US Dollars over a rolling five 5 year period; a Change in Law fifty million 50000000 US Dollars over a rolling five 5 year period and Article 40.6 fifty million 50000000 US Dollars over a rolling five 5 year period; Article 41.2 ten million 10000000 US Dollars over a rolling five 5 year period Confiscation; a State Fault twentyfive million 25 000000 US Dollars over a rolling five 5 year period; or any other event referred to in this Convention as a Compensation Event two million 10000000 US Dollars per individual occurrence or such other amount as specified therein defined in each case as adjusted by the Inflation Adjustment. Compensation Event Notice has the meaning ascribed to it in Article 47. 1.5. Conditions Precedent mean the conditions precedent described in Article 4. 1 . Confidential Information has the meaning ascribed to it in Article 44.1.1. Confiscation has the meaning ascribed to it in Article 41.1. Confiscation Dispute has the meaning ascribed to it in Article 41.4. Congo Border Terminal means the train monitoring station to be located on the border between the State and the Republic of Congo which will monitor the continuous movement of the locomotives and rail wagons via electronic monitoring systems to confirm the cargo is in accordance with the rail manifest prepared at the point of loading including overhead viewing platform and lighting to support continuous operations during daylight and at night and the train will not be required to stop before during or after the border crossing as elaborated in the Quadripartite Agreement and to be operated pursuant to the terms of the Quadripartite Agreement to the extent applicable. Congo Iron means Congo Iron S.A. a Societe Anonyme registered under the laws of the Republic of Congo having its registered office at Avenue du Professeur LokoMafouta Brazzaville Republic of Congo; registered with the Registre du Commerce et du Credit Mobilier of Brazzaville under number CGBZV06 B I I. Connected Operations means the Railway Operations including the Road Operations the Mineral Terminal Operations the Beneficiation Operations and the Blending

Operations as well as any operation required for the Project. Conservation Convention has the meaning ascribed to it in Article 29.5.2. Construction Phase means a for each of the Mining Facilities Railway Facilities and Mineral Terminal Facilities the period commencing on the Date of Entry into Force until Project Commissioning subject as the case may be to the issuance of the Finding of Compliance; and page 18 b for any other Project Facilities including the Beneficiation Facility the period during which the Project Company in charge of the completion of this Project Facility incurs expenses in connection with the acquisition the development and construction of such Project Facility until completion and commissioning of such other Project Facility after having been subject as the case may be to the issuance of the finding of Compliance. Contemplated Rights has the meaning ascribed to it in Article 50.5a. Contractors means any entity other than the Lenders which within the scope of a contract signed with a Project Company supplies Goods and/or services for the purposes of the Project under the conditions defined in this Convention and in the Specific Agreements and Additional Specific Agreements and in compliance with the Legislation provided that any such entity whose contract provides for aggregate payments in excess of one hundred million 100000000 US Dollars adjusted by the Inflation Adjustment shall be a Qualified Contractor. For the avoidance of doubt Contractors shall include Qualified Contractors and Main Contractors. Control means a b either the direct or indirect ownership by a person or entity of a portion of shares or stock or any other equity granting the majority voting rights in the general meetings of an entity or entitling it to exercise decisive authority within said entity's management provided that within the meaning of this Convention a person is deemed to exercise a decisive authority within an entity's management where due to de facto or de jure circumstances such person's opinion prevails with respect to said entity's decisionmaking; or the blocking minority in the decisions of the general meetings of an entity determined with respect to companies under the conditions provided by the Uniform Act on Commercial Companies or by the law of the place of incorporation of the relevant company if the latter proves to be more appropriate to assess such blocking minority. Convention means this Convention and its Annexes as well as any renewal extension substitution or

amendment thereof or thereto as mutually agreed upon by and between the Parties. Convention Compensation means with respect to a Compensation Event compensation payable or in the discretion of the State a incentives including Tax incentives offered; or b extensions of any applicable term under a Project Agreement in each case by the State to Cam Iron and/or the applicable Project Company in order to restore Cam Iron or such Project Company to the same after-tax economic position that such company would have been in if such Compensation Event had not occurred and calculated in accordance with Article 39.1; provided that incentives and Tax incentives may not be used as Convention Compensation if the use of such Convention Compensation would result in a payment default under the Finance Documents. Convention Compensation Dispute has the meaning ascribed to it in Article 39.1. Corporate Tax Holiday has the meaning ascribed to it in Annex VU. Costs include expenses costs royalties tariffs fees taxes and levies of any nature including customs duties and charges. page 9 CP Long Stop Date means the date that is eighteen 18 months from the Signature Date or such later date as is agreed to by the Parties or contemplated in this Convention including Article 4.3. CRU means CRU International Limited of 31 Mount Pleasant London W1X 0AD an international research company recognized for price and demand forecasting in the iron and steel industries or where they cease to exist or undertake such work such similar organization as agreed to between the Parties. Date of Entry into Force has the meaning ascribed to it in Article 4.4. Date of First Commercial Shipping means the date on which shall occur the first loading on a vessel of at least sixty thousand 60,000 Tonnes of Blended Ore excluding shipping intended for one or more steel plants aiming at testing the iron ore made effective by the issuance of the bill of lading relative to this first commercial shipping. Day means a calendar day it being understood that for any time limit provided for in this Convention if the last day falls on a Saturday Sunday or a bank holiday in the State said time limit shall be extended to the next Business Day. Debt means all indebtedness for borrowed money including principal interest commissions and fees to be paid or repaid by a Project Company under the Finance Documents relating to the amounts raised and used to fund or refinance the debt component of the

Project costs excluding the amounts borrowed to fund the Equity or interest accrued on said amounts. Decision has the meaning ascribed to it in Article 56.2. Delay Breach or Delay Breach Event has the meaning ascribed to it in Article 50.1.2. Delay Breach Liability Threshold has the meaning ascribed to it in Article 50.3. Design Capacity means one hundred million 100000000 tonnes of iron ore in a Calendar Year consisting of thirtyfive tnillion 35.000000 Tonnes plus sixtyfive million 65000000 wet tonnes based on the assumptions to be detailed in the Railway Agreement and Mineral Terminal Agreement. Development Costs means the aggregate amount of costs and expenses incurred by the State in connection with the development of the Project. Dispute means any dispute disagreement controversy or claim arising out of connected with or relating to this Convention or any of the other Project Agreements or to the breach termination invalidity existence or interpretation thereof or to any event action or inaction related to any of the foregoing. Economic Hardship means an economic situation that was unforeseeable by the Parties at the Signamre Date and which without preventing continuation of the Project would render the Project unprofitable in the aggregate across the Project Companies. Emission Scheme means any scheme relating to the emission removal mitigation reduction avoidance or sequestration of greenhouse gases including a greenhouse gas emissions trading scheme or sequestration requirement which is in place at the Signature Date. Enabling Law means the law ratifying the States entry into this Convention under the terms and conditions set forth in this Convention among other things. v pagol10 Environment means soil surface waters groundwaters land stream sediments surface or subsurface stiaata ambient air plants animals and other life fom1s and per Law n9612 of 5 August 1996 relating to environmental management in the State 111ay be defined as per clause 2 of such law as a common welfare of the Nation patrimoine commtm de la Nadon. It forms an integral part of the universal welfare palrimoine universe. Environmental Guarantces reters to the Mine Project Company Environmental Bank Guarantee and the Mineral Terminal Project Company Environmental Bank Guarantee or any one of them. Environmental and Social Assessment and Management Plan means the plan for the mitigation of the negative impacts of and the optimization of the positive

impacts of the Project and including the Environmental Impact Study in compliance with the Legislation and in particular Article 126 et seq. of the Mining Code Implementing Decree such as it is periodically revised pursuant to the provisions of Article 29.2.1 c and the Mining Code and which for the avoidance of doubt is incorporated by reference into this Convention. Environmental Impact Study means in accordance with the Legislation and submitted to the State along with filing the Feasibility Study. the environmental assessment carried out Exempt Assignment means an assignment to a wholly owned Subsidiary of such Project Company in which the assignee agrees to be bound by the rights and obligations of the assignor in an agreement acceptable to Ute State in form and substance in its reasonable discretion the assignment complies with applicable Legislation and any rights of the State in the Shareholders Agreement applicable to such Project Company have been complied with. Expn. nsion Capacity means the capacity of ore that can be hauled using the Railway Facil ities and handled and loaded onto vessels using the Mineral Terminal Facilities based on construction of new facilities and assets that are beyond the scope of the design for the Initial Capacity. Expansion Conunittee means the committee established in accordance with Article 18.22. Expansion Contract means either a Mineral Terminal Services Agreement or a Railway Haulage Agreement hat relates to the provision of Expansion Capacity. Expansion Directive has the mea. niog ascribed to it in Article 18.14a. Expansion Project refers to a project providing for the creation of Expansion Capacity pursuant to Article 18. Expansion Project Company or Expansion Project Companies means lhc Railway Project Company andor the Mineral Terminal Project Company where the context requires. Expansion Stage means any stage beyond Stage I where new infrastructure is constructed to increase thecapacityoftheMineraJ Terminal Facilities and U1e Railway Facilities beyond the Initial Capacity. Expert Procedure has the meaning ascribed to it in Article 56.2a. Exploitation Ana means. at any time the surface area of the Exploitation Permit such as same could be reduced pursuant to lhc provisions of Article 53 .2. page 11 Exploitation Lease means a Project Lease granted over the area of the Exploitation Area in accordance with this Convention. Exploitation Permit means the permit to mine iron ore to be granted to Cam Iron in

accordance with Sections 45 to 52 of the Mining Code the provisions of this Convention and the application for mining title filed by Cam Iron on 9 October 2009 as amended on 17 December 2009 and transferred to the Mine Project Company in accordance with Section 20 of the Mining Code. the provisions of this Convention and the applicable Accession Notice. Exploitation Phase means for each Project Facility a period beginning immediately after the completion of its Construction Phase until expiration or termination of rights to operate sltch Project Facility held by the relevant Project Company in accordance with the provisions of the relevant Project Agreements. Exploration Permit means exploration permit No 92 which is the subject of Decree No 161MINIMIDTDMGSDAM of Order No 00586MINIMIDT SG DMGSDAM of 6 July 2010 extending the term of exploration permit No 92 to 27 September 20 12 and Order No. 003207MINIMIDTSGDMGSDAM of 27 July 2012 extending the term of the exploration permit No. 92 to 27 July 2014. September of 27 2005 and Explosives means the ammonia based products that are to be imported into the territory of the State for. a b c usc within the Exploitation Area the Mineral Terminal Area and Railway Area for the construction of the mine Mineral Terminal and Railway usc in fracturing the Mbalam Ore within the Exploitation Area for Mining Operations; or transportation to the Republic of Congo for constmction and mining operations in the area covered by the Nabeba Permit using industry recognised transport driUing and blasting techniques in accordance with as applicable the Explosives Agreement and to the extent applicable the Quadripartite Agreement. Explosives Agreement means the agreement to be concluded between the Mine Project Company Mineral Terminal Project Company Railway Project Company and the State related to the use and transport of Explosives. Feasibility Expert has the meaning ascribed to it in Article 18.13.1. Feasibility Study means the Project definitive feasibility study which in accordance with Section 46 of the Mining Code was submitted to the State on 15 April2011 and as shall be updated as provided for in Article 4.1 a. Finance Documents means all equity or debt finance agreements entered into by Cam Iron the Project Companies and/or any Subsidiary and one or more Lenders for the purposes of constituting the Debt as well as any security document or related ancillary document including any abTeement

between the Lenders and the State or between the Lenders and Cam Iron the Project Companies or a Subsidiary. Finding of Compliance means for each of the Project Facilities the finding of compliance by the State of any Project Facility according to the Specifications and applicable Legislation relating thereto and the delivery by the State to the relevant Project Company of that finding pursuant to of compliance with the relevant Specific Agreement or with respect to the Beneficiation Facility in compliance with this Convention and the Beneficiation Agreement. First Notice has the meaning ascribed to it in Article 39.1. Fixed Profit Margin means twelve percent 12. FMU has the meaning ascribed to it in Article 29.5.2. Force Majeure means Ordinary Force Majeure or Political Force Majeure as the case may be each such event or circumstance being a Force Majeure Event. Foreign Exchange Agreement has the meaning ascribed to it in Article 43.1. Foreign Personnel has the meaning ascribed to it in Article 32.12a. Framework Agreement means the framework agreement entered into between the State and Cam Iron on 18 December 2008. Food Committee has the meaning ascribed to it in Article 29.5.1h. General Tax Code means Law No 200212003 of 19 April 2002 as amended from time to time. Good International Industry Practice has the meaning ascribed to it in Article 29.4h. Governmental Approval means any approval, certificate of approval, authorization consent waiver, variance, exemption, declaratory order, exception, license filing registration permit notarization special lease or other requirement of any Governmental Entity that applies to all or any part of the Project or Project Operations. Governmental Entity means the State or any ministry department or political subdivision thereof and any person directly or indirectly controlled by the State and performing executive legislative regulatory or administrative duties for the State including regional authorities. Granting Decree means the presidential decree granting the Exploitation Permit to Cam Iron. Handback Requirements has the meaning ascribed to it in Article 54.2. Handback Security has the meaning ascribed to it in Article 54.2. Iron SECS has the meaning ascribed to it in Article 32.11. Eligible Grade Ore means iron ore with an iron greater than 50 Fe with limitations on Al₂O₃ SiO₂ and Phosphorous which render the product suitable for direct shipping ore DSO. ICC means the International Chamber of

Commerce. ICSID Convention has the meaning ascribed to it in Article 10 of the ICSID Convention. Immigration Document has the meaning ascribed to it in Article 32.12a. Independent Engineer means an internationally recognized engineering firm or firms experienced in the mining rail and mineral terminal industries and in Africa. Independent Accountant means an internationally recognized accounting firm acceptable to both the Mine Project Company and the State with whom neither Party nor its Affiliates currently has or within the previous five (5) years has had a relationship. Inflation Adjustment means a pro rata adjustment every five (5) years from the Date of Entry into Force to reflect changes in the Consumer Price Index published by the United States Department of Labor. Initial Beneficiation Production Capacity means a production capacity of no less than eleven (11) million Tonnes of Beneficiated Ore in any Calendar Year or a pro rata portion of such tonnage based on the number of applicable Days in such Calendar Year commencing on the date that is twelve (12) months following the BF Commissioning where the Beneficiation Facility is first built to that capacity. Initial Capacity means in million Tonnes per annum the maximum number of Tonnes of iron ore that can be hauled using the Railway Facilities and handled and loaded onto vessels using the Mineral Terminal Facilities including any capacity created by operational efficiencies debottlenecking and other minor capital works excluding any Expansion Capacity, based on the construction of such Railway Facilities and Mineral Terminal Facilities in accordance with the initial design specifications to achieve the Targeted Annual Production Capacity. Initial Junction means the point at which the Mainline Railway joins the Initial Spur Lines as indicated on the site plan attached to the Railway Agreement. Initial Spur Lines means the standard gauge heavy haul railway located within the Railway Area in the case of the territory of the State connecting the junction of the Mainline Railway to the Mine Loading Area within the a) Exploitation Area; or b) the junction of the Mainline Railway to the Congo Border Terminal a site plan of which may be attached to the Railway Agreement showing each of the Initial Spur Lines and will include the loading facilities at the Mine Loading Area. Interim Beneficiation Production Capacity means a production capacity of no less than twenty two (22) million Tonnes of Beneficiated Ore in any Calendar Year or a pro rata

portion of such tonnage based on the number of applicable days in such Calendar Year commencing on the date that is twelve 12 months following the BF Commissioning where the Beneficiation Facility is built to that capacity. Internal Rate of Return or JRR means the annualised effective compounded rate of return as determined pursuant to the formulae and methodology set forth in the Beneficiation Agreement to be mutually agreed to by the State and Cam Iron. Investment Charter means Law No 200214 of 19 April 2002 as amended. Joint Committee has the meaning ascribed to it Article 30.5.1. Joint Liability Subscription Agreement has the meaning ascribed to it in Article 3.4c. Kribi Port Authority means the Cameroonian national port authority. Labor Committee has the meaning ascribed to it in Article 32.9. v page 14 Land Law means the Legislation that governs land and property management in the territory of the State. Legislation means inter alia any international convention validly ratified by the State OHADA uniform acts CEMAC rules any law including the Mining Legislation order circular regulation including any document relating to health safety and Environment matters case law any administrative act of a regulatory or individual nature decree act regulation directly applicable in the territory of the State and/or such as promulgated published voted or ratified by any Governmental Entity; including any variations modifications amendments novations or reentry into force of said texts as well as any permits licenses authorisations approvals and consents injunctions or any final and non appealable judgment directly applicable to the relevant party delivered or deed pursuant to these texts and issued by any Governmental Entity or any jurisdiction of the State or supranational jurisdiction including the CCJA. For the avoidance of doubt Legislation shall include the Enabling Law once enacted. Legitimate Cause means a b c a Project Agreement Project Lease or Exploitation Permit or any other permit or authorisation not being delivered or renewed being revoked modified withdrawn cancelled or suspended in each case resulting in a Material Adverse Effect other than where such nonissue or nonrenewal revocation modification cancellation or suspension or such withdrawal is the consequence of a nonperformance or a breach by Cam Iron or a Project Company of its contractual or regulatory obligations the effect of exercise of the States Reserved Rights or a result of a failure

by Cam Iron or a Project Company to properly file or renew such permit or authorisation; any Change in Law that has a Material Adverse Effect other than where such Change in law occurs under the nondiscriminatory application of the Legislation to companies carrying out the same or similar business as undertaken by any Project Company; or a breach by the State of any material obligation under this Convention a Specific Agreement an Additional Specific Agreement or the Legislation that has a Material Adverse Effect. Lender means any bank national or international financial institution export credit agency any credit insurer or other establishment having granted to Sundance Cam Iron or a Project Company a commercial credit a loan bonds or a financing or refinancing relating to the Project on capital markets or otherwise as well as their authorised assigns agents trustees auditors and assignees excluding Cam Iron the Shareholders or any Subsidiary of the Shareholders or any other lender providing debt to a Project Company in connection with the funding of capital needs in connection with the Additional State Interest and the exercise by the State of the right to borrow funds for capital calls on that equity including the financing or refinancing of all or part of the operations and infrastructures situated outside the territory of the State provided that said operations and infrastructures relate to or are physically connected with all or part of the Project Operations. LIDOR means the London InterBank Offer Rate of three month US Dollar deposits which appears on the Telerate page 3750 or equivalent successor to such page as of 1100 am London time on the original due date of the overdue amount. Loan Carry Cap has the meaning ascribed to it in Article 45.4h. page 15 Loss means any loss liability damage penalty charge or outofpocket and documented cost or expense or increase thereof. For the avoidance of doubt all actual payments reasonably made by any Person to third parties or reasonable outofpocket and documented costs or expenses actually suffered or incurred by any Person in respect of Claims made by third parties shall constitute Losses of such Person. Losses shall not include indirect and consequential damages including lost opportunities and lost profits. Low G grade Ore means Itabirite hematite ore containing between thirty to fifty percent 30-50 Fe and SiO₂ ranging from thirtyseven to fiftythree percent 37 to 53 with acceptable characteristics to allow the ore to be Beneficiated

producing a concentrate with approximately sixtyfive percent 65 Fe. M a in Contracto r or Main S
ubcontractor means respectively a Contractor or a Subcontractor which delivers mining rail
transportation or mineral terminal services to respectively the Project Companies or a Contractor for
the purposes of the Proj ect under the conctitions defined in this Convention and in the Specific
Agreements and Additional Speci fie Agreements and i of which fifty percent 50 of the work force is
employed or used for the needs of the Project in the relevant year or ii qualifies as a Qualified
Contractor or a Qualified Subcontractor. Mainline Railway means a standard gauge heavy haul
mainline railway between the Initial Junction and the Mineral Terminal Area including the unloading
facilities rocker and related conveyors as well as all connected infrastructures inducting railroad fills
and ballast railways works associated with the railways including bolsters passing tracks loops
works on or underneath the tracks supports including supports for machinery or items associated
with the use of a railway tunnels bridges culverts train control systems signalling systems warning
systems track machinery and other apparatus stations sheds rol lcong stock facilities and equipment
designed for the maintenance of rolling stock communication systems buildings offices workshops
and material machinery and equipment related thereto loops and loading and unloacting tracks
terminal stations marshalling yards depots weighbridges dwellings earthworks and concrete works
ballast wagons temporary shelters wells supply networks power plants power and transmission lines
and pipelines. Marketing Agreement means the agreement relating to the Marketing Operations
which shall be concluded between the Mine Project Company and the Marketing Company.
Marketing Company means a company in which the State does not have an equity interest. and a a
party to the Marketing Agreement is in charge of the Marketing Operations. Marketing Operations
means a lbc commercial logistical technical and quality assurance operations for Marketing of the
Sale Products; b Marketing of the Sale Products; and c assumption of credit risk associated w ilb the
buyer of the Sale Products carried out in accordance with the tenns and conditions of this
Conveolion and the Marketing Agreement. Marketing of tbe Sale Products means a the purchases
of all Products and Nabeba Ore; and . page I 18 b the sales and marketing of the Sale Products

inside or outside the territory of the State in order to produce income for the Mine Project Company.

Material Adverse Effect means an effect on a b Project Operations; or the real property securities, assets or economic financial or legal situation of Cam Iron or a Project Company under a Project Agreement or a Finance Document which i is or would reasonably be expected to be material and adverse to A the business results of operations or condition financial or otherwise of Cam Iron and the Project Companies taken as a whole; B the legality validity or enforceability of the Project Documents taken as a whole; C the ability of State to perform its material obligations under the Project Agreements taken as a whole or D the ability of the Project Companies to perform their material obligations under the Project Agreements taken as a whole. Mbalam Ore means all iron ores produced from the Exploitation Area including the High Grade Ore and the Low Grade Ore. Mine Commissioning means the wet commissioning of Mining Facilities associated with the Mining Operations other than the Beneficiation Operations. Mine Gate Value means the methodology described in 0 for the value of the Product. Mine Loading Area means the area within the Exploitation Permit designed for the loading of the Mbalam Ore into railway wagons for the purposes of transport using the Railway. Mine Project Company refers to the Project Company established by Cam Iron which will accede to the Exploitation Permit and the provisions of this Convention and be in charge of Mining Operations. Mine Project Company General Bank Guarantee has the meaning ascribed to it in Article 31.1. Mine Project Company Environmental Bank Guarantee has the meaning ascribed to it in Article 29 .2.1 . Mine Project Company Shareholders Agreement means the shareholders agreement relating to the rights and obligations of the shareholders of the Mine Project Company a non exhaustive list of the material terms of which are set out in Annex X that shall be concluded between the shareholders of the Mine Project Company. Mineral Terminal means the mineral terminal dedicated to the Project which consists of the Mineral Terminal Facilities located in the Mineral Terminal Area the building and operation of which is entrusted to the Mineral Terminal Project Company under the responsibility of Cam Iron in accordance with the provisions of this Convention and the Mineral Terminal Agreement. Mineral Terminal Agreement means the

agreement relating to the Mineral Terminal Operations which shall be finalized and concluded between the State the Mineral Terminal Project Company and the Knbi Port Authority in the presence of Cam Iron and shall contain a description of the assumptions and principles related to the Design Capacity and the operations of the Mineral Terminal. pageH Mineral Terminal Area has the meaning ascribed to it in Article 13.2. Mineral Terminal Commissioning has the meaning ascribed to it in Article 13.1 i. Mineral Terminal Concession means a concession granted by appropriate authority and the terms of which are set out in the Mineral Terminal Agreement. Mineral Terminal Facilities means any infrastructure necessary for the collection handling storage reclaiming loading onto ships and export of the Sale Products and collection of the Goods and goods for other Third Party mining operations including Nabeba Goods before railing to the Exploitation Area or mine belonging to a Third Party including to the Nabeba Permit and loading of those onto railway wagons but excluding the Mainline Railway the Project Roads the Additional Roads the unloading facilities rocker and conveyors but may include a rail waste retention ponds dwellings workshops and storage areas offices collection depots and iron ore storage sheds iron ore storage and recovery facilities equipment for processing and blending products platforms and material loading facilities a pier and berths for loading onto the ships ship loaders material handling tools dustsuppression equipment product sampling stations and tools product weighing stations chemical and metallurgical testing laboratories customs facilities earthworks and associated concrete units roads bridges supply systems gas petroleum and water transportation pipelines borrow material and quarries manufacturing facilities necessary for the production of material for construction and/or the Project Operations a power plant transmission lines water supply systems for industrial water and supply networks airstrips medical facilities material collection facilities material equipment and consumables and hydrocarbon collection facilities hydrocarbon storage facilities all of these being owned by or leased to Cam Iron or a Subsidiary or Contractor or occupied or used by same and necessary for completion of the Project; b temporary facilities; c c moorings; and the channel breakwater ship passing areas navigational aids and boathouses. Mineral Terminal

Operations means a the design construction operation and maintenance of the Mineral Terminal Facilities including the loading on board of the export ships unloading of import ships and storage of cargoes carried out in accordance with the terms and conditions of this Convention and the Mineral Terminal Agreement and b the Blending Operations carried out in accordance with the terms and conditions of this Convention the Blending Agreement and the Mineral Terminal Agreement. Mineral Terminal Operations Agreement has the meaning ascribed to it in Article 13.5. Mineral Terminal Project Company means the Project Company established by Cam Iron at the Date of Entry into Force and party to the Mineral Terminal Agreement. in charge of the Mineral Terminal Operations and Blending Operations. Mineral Terminal Project Company Environmental Bank Guarantee has the meaning ascribed to it in Article 29 .2.1 . v page j 18 Mineral Terminal Project Company Share Transfer Agreement means the agreement relating to the State acquiring fifteen percent 15 of the share capital and voting rights of the Mineral Terminal Project Company to be concluded between the State and the Mineral Terminal Project Company. Mineral Terminal Project Company Shareholders Agreement means the shareholders agreement relating to the rights and obligations of the shareholders of the Mineral Terminal Project Company a nonexhaustive list of the material terms of which are set out in 66cAnnex IX and shall be concluded between the shareholders of the Mineral Terminal Project Company. Mineral Terminal Services Agreement means the services agreement concluded between the Mineral Terminal Project Company and either the Mine Project Company or other Third Party contracting to utilise the services of the Mineral Terminal Project Company which may include a description of the tariffs to be charged by the Mineral Terminal Project Company. Mineral Terminal Specifications means the broad specifications which will be detailed in the Mineral Terminal Agreement. and which will describe the technical requirements of the Mineral Terminal Facilities that the Mineral Terminal Project Company will need to meet while carrying out the Mineral Terminal Operations. Minimum Annual Beneficiated Ore Production means a minimum of eleven million Tonnes of Beneficiated Ore from the Beneficiation facility in any Calendar Year or a pro rata portion of such tonnage based on the number of applicable Days in

such Calendar Year commencing on the date that is twelve 12 months following the BF Commissioning. Minimum Annual Ore Production means the mining and selling of a minimum of twelve L2 million Tonnes of High Grade Ore from the Exploitation Area in any Calendar Year commencing in the Calendar Year post Project Commissioning. Mining Code means Law No 2001001 of 16 April 2001 as amended and supplemented by Law No 2010011 of 29 July 2010, as it may be further amended or supplemented from time to time. Mining Code Implementing Decree means decree No 20021648PM of 26 March 2002 setting the conditions for implementation of Law No 2001001 of 16 April 2001. Mining Facilities means all facilities constructed or operated within the Exploitation Area which are used for the mining crushing screening and processing and after BF Commissioning the Beneficiation of Mbalam Ore water treatment and storage transmission lines and storage facilities as well as necessary supporting infrastructure including conveying and load out facilities and accommodation facilities required to produce the Mbalam Ore for transportation to the Mineral Terminal Facility. Mining Legislation means collectively Implementing Decree, the Mining Code and the Mining Code Mining Operations means a the design construction operation and maintenance of the Mining Facilities including dismantling and rehabilitation of the said Mining Facilities; b the extraction through any process of the Mbalam Ore; c Beneficiation Operations; v page 119 d e the development handling transportation and storage of Mbalam Ore and Beneficiated Ore within the Exploitation Area; an investigation aiming to localise and assess mineral substance deposits located within the Exploitation Area; and t the rehabilitation of the Exploitation Area carried out under the Exploitation Permit and under the terms and conditions of this Convention and the applicable Project Agreements. Minister refers to at all times the Minister of the State in charge of mines. Ministry refers to at all times the ministry of the State in charge of mines. Ministry of Labor refers to at all times the ministry of the State in charge of labor. Monitoring Agreement Blending means the agreement relating to the rights of the State to review the Blending Operations and the rights of the Mine Project Company and Congo Iron to be protected from discriminatory or disproportionate treatment with regard to Blending operations. Monitoring Agreement Marketing

means the agreement relating to Marketing Operations and the rights of the State to review those operations. Monitoring Agreement Treasury means the agreement relating to Treasury Operations and the rights of the State to review those operations. Nabeba Assets or Nabeba Goods means as the case may be, all assets and/or goods required for the Nabeba Project including consumables plant equipment materials commodities vehicles fuel and hydrocarbons. Nabeba Convention means the convention relating to the Nabeba mining project which is to be located on the area covered by the Nabeba Permit which convention is to be concluded between Congo Iron and the Republic of Congo. Nabeba Ore means all iron ores produced from the area covered by the Nabeba Permit. Nabeba Permit the areas covered by the Mineral Permit Decree 2007362 and Decree 2007363 of 2d August 2007 and renewal Decrees 2011280 and 2011281 of 5 April 2011 over the Nabeba Bamegod and Ibanga permits in the Sangha region of the Republic of Congo. Nabeba Project means the mining project which is the subject matter of the Nabeba Convention and Nabeba Permit. Notification of Breach has the meaning ascribed to it in Article 50.2a. Official Gazette means the Official Gazette of the State. OHADA is the French acronym for Organisation pour l'Harmonisation du Droit des Affaires en Afrique Organisation for the Harmonisation of Business Law in Africa and currently comprises 16 Member States. The organisation was established on 17 October 1993 by a treaty signed in Port Louis Mauritius which was amended on 17 October 2008 by the Treaty of Quebec. OHADA Act means any uniform act which has been adopted by OHADA as modified from time to time each governing a specific matter and which are directly applicable in the territory of the State. Operating Standards means all construction management operational technical and performance standards applicable to Cam Iron and the Project Companies under any Project Agreement including the Specifications and if no standard is specified then internationally recognized practices used in large mining and infrastructure projects including any applicable international environmental standards and compliance with Legislation and not inconsistent with Good International Industry Practices unless the Legislation conflicts with Good International Industry Practices in which case the Legislation shall control. Ordinary Force Majeure

means with respect to either Party any event or circumstance external for the affected Party independent of its will reasonably unforeseeable and outside its reasonable control that prevents the Party invoking it from performing its statutory or regulatory obligations as well as its obligations under this Convention and any other Project Agreement to which it is a party where such Party has taken all reasonable measures in order to avoid or mitigate the effect of such event or circumstance on the ability of the Party to perform its obligations under this Convention and any other Project Agreement to which it is a party and provided that this event or circumstance is not the direct or indirect result of a breach or nonperformance by such Party of any of its statutory or regulatory obligations or of its obligations under this Convention and any other Project Agreement to which it is a party. Without limiting the generality of the foregoing it is expressly agreed between the Parties that the definition of Ordinary Force Majeure includes to the extent that they satisfy the requirements of the foregoing paragraph the following events a b earthquake fire tsunami flood cyclone, typhoon tornado or other natural disaster; and unforeseeable and uninsurable events not attributable to the Party affected by the Ordinary Force Majeure Event each such event or circumstance being an Ordinary Force Majeure Event the intent of the Parties is that the expression Ordinary Force Majeure should be construed in closest possible compliance with customary international law principles and practices in particular that recognized by the United Nations International Law Commission. Other Ores means any iron ore whether direct shipping ore or processed ore that is mined outside of the territory of the State and brought into the territory of the State for transport and shipment which shall include the Nabeba Ore but exclude the Mbalam Ore. Parties means all of the parties to this Convention and as applicable, to any Project Agreement and Party means any one of them. Permit Withdrawal Breach or Permit Withdrawal Breach Event has the meaning subscribed to it in Article 50.1.1. individual including legal Person means any representatives or administrators thereof corporation partnership joint venture trust limited liability company limited partnership joint stock company unincorporated association or other entity or a Governmental Entity. the heirs beneficiaries executors Platts means a division of the McGraw Hill Companies and is a provider of

energy and metals information and a source of benchmark price assessments in the physical energy
page 21 markets or a similar source if Platts does not provide applicable benchmark price
assessments or is no longer providing such information. Political Force Majeure means a b c d an
act of war whether declared or not invasion armed conflict act of foreign enemy or blockade or any
epidemic in each case within or directly affecting the State; an act of rebellion riot nationwide strikes
or strikes of a political nature acts or campaigns of terrorism or sabotage or credible and imminent
threats thereof occurring within the territory of the State; any event expressly identified as a political
force majeure event under a Specific Agreement; or any closing by the State of a border terminal
through which iron ore is transported into the territory of the State including the Congo Border
Terminal each such event or circumstance being a Political Force Majeure Event provided however
that such event or circumstance prevents the Party invoking same from performing any statutory or
regulatory obligation as well as any obligation under the Project Agreement to which it is a party
where such Party has taken all reasonable measures in order to avoid or mitigate the effect of such
event or circumstance on such Party's ability to perform its obligations under the Project Agreement
to which it is a party. Positive Beneficiation Determination has the meaning ascribed to it in Article
10.11. Positive Economic Feasibility Determination has the meaning set forth in Article 18.13.2diii.
Positive Technical Feasibility Determination has the meaning ascribed to it in Article 18.13.2diii. P
ower Plant means any power plant including the Beneficiation Power Station to be built and/or
contracted to produce the power required for the Mining Operations. Products means a the Mbalam
Ore produced on the Exploitation Area; b the Blended Ore produced from the Mineral Terminal
Area; and c the Beneficiated Ore produced from the Beneficiation Facility. Project has the meaning
ascribed to it in the of this Convention. Project Agreements refers to collectively this Convention the
Specific Agreements the Marketing Agreement the Treasury Agreement the Railway Haulage
Agreement the Mineral Terminal Services Agreement the Monitoring Agreement Blending the
Monitoring Agreement Marketing the Monitoring Agreement Treasury. the Collective Bargaining
Agreement the Exploration Permit the Exploitation Permit and individually any one of these

documents and any other agreement certificate or document entered into issued or created in connection with the Project. v page 122 Project Agreement Termination Certificate means the certificate in a form agreed to by the Parties to be issued pursuant to Article 54.2.5b . Project Area means any surface area within U1e territory of Stale including the Exploitation Area the Railway Area and the Mineral Terminal Area over which a Project Lease is granted to one or more of the Project Companies. Project Commissioning means whichever date occurs last between the foUowing three 3 dates a the date Mine Commissioning occurs; b c the date Railway Commissioning occurs; or the date Mineral Terminal Commissioning occurs as acknowledged jointly by the Parties through the issuance of the last of the Findings of Compliance and the effective occurrence of the Date of First Commercial Shipping. Proj ect Company or Project Companies means a Cam Iron the Mine Project Company the Railway Project Company and the Mineral Tenninal Project Company or any Subsidiary responsible for any part of the Project Operations of which it is in charge in accordance with the terms of this Convention and in which the State held or holds with the exception of Cam Iron at any Lime an interest of at least fifteen percent 15 or; b any other entity that is a party to a Project Agreeemem that expressly provides for such entity to be treated as a Project Company. Project Compan y Fault means a b c d a breach by Cam Iron a Project Company or any Subsidiary of a Project Company of any of its material obligations under any Project Agreement or Legislation; a breach of any material representation or warranty made by Cam Iron a Project Company or any Subsidiary of a Project Company under any Project Agreement; wilful misconduct of Cam Iron a Project Company a Project Company Person or any Subsidiary or a Project Company; or a grossly negligent act or omission of Cam Iron a Project Company a Project Company Person or any Subsidiary of a Project Company. Project Company Inte rest means the interest benefits and rights of a Project Company in the Project created by the applicable Project Agreement and the rights and obligations of such Project Company in such Project Agreement. Project Company Person means a b any director officer employee or agent of Cam Iron or a Project Company in each case acting as such; o r any Contractor. any Subcontractor and any

representative advisor including any legal and financial advisor of Cam Iron or any Project Company in any such Persons capacity as a provider of services directly or indirectly to Cam Iron or such Project Company in connection with the Project. page 123 Project Contracts refers to collectively the Mineral Terminal Services Agreements and Railway Haulage Agreements including any Expansion Contract and individually any one of these documents. Project Economic Model is the financial model which the Parties have agreed is their best understanding of the economics of the Project as of the Signature Date including the assumptions on which the financial model has been prepared as the same may be updated pursuant to the terms of this Convention. Project Facilities means the Mining Facilities the Mineral Terminal Facilities and the Railway Facilities as well as any other facility which may be built in accordance with the terms and conditions set forth in Article 19.1 of this Convention. Project Lease means a b a longterm lease entered into by a Project Company with the State in accordance with this Convention relating to the use and occupation of the land riverbeds and seabeds required for the purposes of the Project; or in case a longterm lease as referred to in paragraph a of this definition cannot be implemented any public domain Temporary Occupation Authorisation granted by the State and/or a Governmental Entity to a Project Company on the land riverbeds and seabeds and having the same purpose as that mentioned in paragraph a of this definition. Project Lease Request means a request to the State by a Project Company to enter into a Project Lease in form and substance which is typical in the territory of the State and to be otherwise agreed to by the Parties. Project Operations means the Mining Operations and the Connected Operations. Project Parties has the meaning ascribed to it in Article 56.3b Project Roads means all unsealed roads constructed by a Project Company which are required for the Project in accordance with the provisions of this Convention a Project Agreement and a Project Lease and where the context permits includes all unsealed roads constructed by a b the Mine Project Company for the support of Mining Operations; the Mineral Terminal Project Company for the support of Mineral Terminal Operations; and c the Railway Project Company for the support of the Railway Operations. Project Road Adjacent to the Railway means the Project Road built and located along the Mainline

Railway under a specific Project Lease by the Railway Project Company for but not limited to the Project needs in accordance with the provisions of this Convention and the Railway Agreement; provided that a portion of such Project Road set forth in the Road Plan shall become a Public Road and cease to be a Project Road following completion of the construction of the Railway and the metallic surfacing of the applicable portions of such Project Road in accordance with the Road Plan.

page 124 | Project Road Specifications means the specifications attached as an annex to the Road Agreement containing all the technical requirements of the Project Roads that a Project Company will need to meet while carrying out the Road Operations. Protocol has the meaning ascribed to it in Article 32.12c. Promulgation Decree means the decree promulgating the Enabling Law. Proposed Expansion Schedule has the meaning ascribed to it in Article I 0.13 di. Public Roads means those roads and bridges within the territory of the State that are designated by the State for public use including the applicable portion of the Project Road Adjacent to the Railway set forth in the Road Plan following completion of the construction of the Railway and the metallic surfacing of such applicable portion of the Project Road Adjacent to Railway. Qualified Contractor means preapproved contractors agreed to by the State and Cam Iron prior to the Date of Entry into Force or any other person or entity that has the independence technical and financial resources to perform the obligations to be assigned to it and is reasonably experienced in performing such obligations and with respect to those contractors and subcontractors which report directly to a Project Company and will receive aggregate payments in excess of two hundred and fifty million 250000000 US Dollars without reduction for anticipated subcontracting adjusted by the Inflation Adjustment to which the State has provided its prior written consent which will not be unreasonably withheld provided that such consent will be deemed to have been given if the State does not respond to notice requesting approval of a contractor within fortyfive 45 Days of the delivery of the notice. Quadripartite Agreement means the agreement contemplated to be entered into among the State the Republic of Congo one or more Project Companies and Congo Iron relating to among other things the import of Nabeba Ore into the territory of the State before export and the transport through

the State of Nabeba Assets for use in the Nabeba Project. Quarter means the three 3 month period of a Calendar Year ending on 31 March 30 June. 30 September or 31 December. Railway means the railway dedicated to the transport of iron ore and goods and assets related to the mining of iron ore including the Railway Facilities located within the Railway Area. the completion of which has been entrusted to the Railway Project Company under the responsibility of Cam Iron in accordance with the provisions of this Convention and the Railway Agreement. Railway Agreement means the agreement relating to the Railway Operations which shall be finalized and concluded between the State and the Railway Project Company in the presence of Cam Iron and may include the indication of the Initial Junction and Initial Spur Lines Railway Area and Railway Specifications and shall contain a description of the assumptions and principles related to the Design Capacity and the operations of the Railway. It is anticipated that the Railway Project Company will have the right to operate the Initial Spur Line and on above rail system from the Congo Border Terminal to the mine on the Nabeba Permit. Railway Area has the meaning ascribed to it in Article 12.1.2a. Railway Commissioning has the meaning ascribed to it in Article 12.1.1. v page 25 Railway Concession means a concession granted by the appropriate authority and the terms of which are set out in the Railway Agreement. Railway Facilities means the Mainline Railway the Initial Spur Lines and as the case may be one or more other Additional Spur Lines. Railway Haulage Agreement means the services agreement which shall be finalized and concluded between the Railway Project Company and the Mine Project Company or other party contracting with the Railway Project Company which may include a description of the tariffs to be charged by the Railway Project Company. Railway Operations Agreement has the meaning ascribed to it in Article 12.2.2a. Railway Operations means the design construction operation and maintenance of the Railway Facilities carried out in accordance with the terms and conditions of this Convention and the Railway Agreement. Railway Project Company means the Project Company Controlled by Cam Iron at the Date of Entry into Force and party to the Railway Agreement in charge of the Railway Operations. Railway Project Company Share Transfer Agreement means the agreement to be entered into whereby the State

acquires fifteen percent 15 of the share capital and voting rights of the Railway Project Company. Railway Project Company Shareholders Agreement means the shareholders agreement relating to the rights and obligations of the siweholders of the Railway Project Company a nonexhaustive list of the material tenns of which are set out in Annex X and shall be concluded between the shareholders of the Railway Project Company. Rnitway Specifications means the specifications which will be detai led in the Railway Agreement and which wil l describe the technical requirements of the Railway Facilities that the Railway Project Company will need to meet while carrying out the Railway Operations. RCCM means Registre du Commerce et du Credit Mobilier established by the Uniform Act on Commercial Companies. R eference Rate means the threemonth US Dollar LffiOR variable rate as it appears on the Telerate screen as of 1100 a.m. London time two 2 Business Days London marketplace prior to the fust l Day of the relevant period. Telerate screen means page 3750 of the Dow Jones Telerate Monitor Service or such other page as may replace page 3750 for US Dollar deposits; where the Reference Rate is said to be increased by x the interest rate shall be calculated by addition of the LIBOR rate to the amount displayed; where the Reference Rate is said to be increased by x basis points the interest rate shall be calculated by addition of the LIBOR rate to the basis points it being understood that one hundred 1 00 basis points equal one percent l. Rehab Escrow Account bas the meaning ascribed to it in Article 29.2.1. Rehab Escrow Agreement bas the meaning ascribed to it in Article 29.2. l. Relief Event means the occurrence of any of the following events or circumstances a a Change in Law Event; pagl26 b c d e f g h i j compliance by the Project Company pursuant to the Reserved Rights or otherwise with an order or direction by police fire officials anned forces or any comparable public authority having the legal authority to make such order or give such direction; an official or unofficial strike lockout work rule or other labor dispute by i public sector employees or ii private sector employees other than employees of a Project Company a Contractor or a Subcontractor that are working at the Project Area A which l is regional or national in nature and affects the mining construction building maintenance or facilities management indusll generally or 2 takes place at a faciHty manufacturing materials or equipment for the Project and is

not directed at the Project and B which lasts for more than thirty 30 Days in the aggregate; the preemption confiscation diversion destruction or other interference in possession or performance of materials or services by a Governmental Entity in connection with a public emergency or any condemnation or other taking by eminent domain of any material portion of the Project; the issuance of an injunction or any other final order by a court of competent jurisdiction other than as a result of a reasonable determination by the issuer that such action was appropriate with the result that the State or the Project Company becomes unable to perform its material obligations under the Convention or applicable Project Agreement; the closure due to an accident construction or otherwise of a road necessary for direct access to the Project through exercise of the States Reserved Rights; the performance of maintenance that cannot be performed under the Operating Standards without affecting the provision of services under the Mineral Terminal Services Agreement and Railway Haulage Agreement and the relief for which is approved in advance by the State in writing; any unreasonable delay in or denial of the issuance of a properly submitted application or other petition for a Governmental Approval required for the Project for which the Project Company has complied with all material requirements under applicable Legislation which delay is not caused by a Project Company Fault and which continues for sixty 60 Days following notice of such unreasonable delay or denial by the applicable Project Company to the State Project Committee or such lesser time to the extent the failure to respond would materially affect Project Operations; a State Fault; or any other item expressly identified as a Relief Event in a Project Agreement in each case the response to which or compliance with which in accordance with the Operating Standards materially interferes with delays or increases the cost of performing the Project Operations provided that, none of the foregoing shall be deemed a Relief Event if it arises from or is materially contributed to directly or indirectly by any Project Company Fault. Relief Event Notice has the meaning ascribed to it in Article 38.1.1 Remedial Period has the meaning ascribed to it in Article 50.2a.ii. v page 27 Reports refers to on an individual basis any one of the reports specified in Article 30.3 and collectively all of such reports. Representative means with respect to any party any director officer employee official lender

or any agent or trustee acting on its behalf partner member owner agent lawyer accountant auditor professional advisor consultant engineer. contractor other Party for whom such Party is responsible at law or other representative of such Person and any professional advisor consultant or engineer designated by such Person as its Representative. Request has the meaning ascribed to it in Article 56.2a. Reserve Expansion Capacity has the meaning ascribed to it in Article 0. Reserved Rights has the meaning ascribed to it in Article 6.5. Road Agreement has the meaning ascribed to it in Article 14.1. Road Operations means the design construction operation and maintenance of the Project Roads carried out in accordance with the terms and conditions of this Convention and of a Project lease as the case may be. Road Plan has the meaning ascribed to it in Article 14.1. Rosters means a work scheme that includes a ratio of a number of work daysweeks and a number of daysweeks leave. Royalty means the payment calculated in accordance with Article 34. Sale Products means a the Products; and b Nabeba Ore. Services Application means an application for Mineral Terminal services or Railway haulage services sent by Mine Project Company Congo from or any Third Party to an Expansion Project Company and the State. Services Application Window means a period commencing on the date that an invitation is published pursuant to Article 18. 7b and ending on the date that is forty five 45 Days thereafter. Services Feasibility Study means a technical commercial and economic feasibility study of the provision of Mineral Terminal services and the provision of Railway haulage services as applied for under a Services Application. Share Transfer Agreement or Share Transfer Agreements mean one or more of the Cam Iron Share Transfer Agreement Mineral Terminal Project Company Share Transfer Agreement and the Railway Project Company Share Transfer Agreement. Shareholder means any entity other than the State that holds one or more shares in any Project Company. v page 128 Shareholders Agreements mean the Mine Project Company Shareholders Agreement the Mineral Terminal Project Company Shareholders Agreement and the Railway Project Company Shareholders Agreement. Scheme has the meaning ascribed to it in Article 4.1 d. Shifts means the continuous time period over one day measured in hours which starts from the time employees are required to start working on the

Project to the time they are entitled to leave the work premises. Signature Date means the date first written above when the State and Cam Iron signed this Convention. South and East Regions Plan has the meaning ascribed to it in Article 29.5. 1 a. Special Development Fund has the meaning ascribed to it in Article 29.5.1 f. Specific Agreements means together the Railway Agreement the Mineral Terminal Agreement and the Blending Agreement as well as any Additional Specific Agreement. the Railway Specifications means Specifications the Project Road Specifications the Mineral Terminal Specifications construction specifications and any other specifications that could be prepared in connection with any Additional Facility Request and in singular any one of these specifications. the Beneficiation Specifications in plural Spur Line means the Initial Spur Line or any Additional Spur Line. Stage 1 means the period from the Date of First Commercial Shipping and ending on the earlier of a the date that the maximum capacity of the Railway Facilities and the Mineral Terminal Facilities achieves or is demonstrated to achieve thirty five 35 million Tonne per annum or b the fourth anniversary from the Date of first Commercial Shipping. State Fault means a b a breach by the State of any of its material obligations other than payment obligations under a Project Agreement; or a breach of any material representation or warranty by the State under a Project Agreement; or c wilful misconduct of the State. State Interest means the State interest described in Article 45.2a. State Project Committee has the meaning ascribed to it in Article 47.1. State Representative has the meaning ascribed to it in either Article 18.22.2a.ii or Article 30.5.2a.ii. Step in Rights shall refer to such rights of the State as set forth in Article 50.4. Subcontractors means any entity other than the Lenders who carry out within the scope of a contract signed with a Contractor all or part of the Project Operations on behalf of such Contractor under the conditions laid down in this Convention Specific Agreements and Additional Specific Agreements and in compliance with the Legislation and international standards generally accepted for projects of comparable scale provided that any such entity whose contract with a Contractor provides for aggregate payments in excess of one hundred million US Dollars adjusted by the Inflation Adjustment shall be a Qualified Contractor.

Subsidiary means any entity which is directly owned or directly controlled by Cam Iron and/or a Project Company and specifically excluding any entities or Affiliates owned or Controlled by any entity which directly or indirectly owns or controls Cam Iron or a Project Company other than the Mine Project Company the Railway Project Company or the Mineral Terminal Project Company.

Sundance means the company Sundance Resources Limited organised under the laws of Australia having its registered office at Level 35 Exchange Plaza | 2 The Esplanade Perth Western Australia 6000 Australia and registered on 1 July 2000 as an Australian Public Company under Australian Business Number No 19 055 719 394.

Sustaining Capital means capital expenditure that is necessary to ensure continuity of production output at the planned capacity incurred periodically to replace existing capital assets.

Targeted Annual Production Capacity means prior to the BF Commissioning a target of thirty five 35 million Tonnes per annum of Mbalam Ore and Nabeba Ore and after the establishment of the Beneficiation facility that facility achieving a production capacity of thirty five 35 million Tonnes per annum of Mbalam¹ Ore as provided for in this Convention.

Tariff Framework means the Mineral Terminal Tariff Framework and or the Railway Tariff Framework attached as Annex III as the context requires.

Tax includes duties taxes and tolls of any kind including ad valorem taxes business licence taxes community integration taxes transit taxes company taxes impôt sur les sociétés including the minimum company income tax based on revenue le minimum de perception de l'impôt base sur les bénéfices des sociétés value added taxes including council tax and value added tax special taxes on revenue Taxe Spéciale sur les revenus nonresident taxes withholding taxes computer taxes. customs duties excise duties duties under the OHADA Acts impôt sur le revenu de capitaux mobiliers taxes stamp duties capital gains taxes registration duties transit commission taxes Port Autonome de Douala unloading taxes personal income tax income taxes and turnover tax including the minimum company income taxes that represent 1.1 of the monthly or annual turnover of the company based on revenue even in the case of loss impôt sur les sociétés et le minimum de perception; and costs fees and charges of any kind including inspection costs including any monitoring verification inspection and control duties fees

taxes and charges of Societe Generale de Surveillance or any company forming a similar function charges of the Foreign Trade Single Desk Operations Guichet Unique des Operations du Commerce Exterieur importation declaration fees transit charges customs clearance certificate fees customs verification fees customs clearing agent fees clearing and forwarding agent fees and charges. Bordereau Electronique de Suivi des Cargaisons electronic transit commissioning and clearance fees. transfer fees registration fees and charges Bonus Payment import file fees transit commission fees and charges customs clearance attestation fees customs inspection fees handling fees and charges Honoraires d'Agrets en Douanes rental charges dividends and interest and management fees tracking charges and cargo tracking charges page 30 a b v charged by the Sale whether existing or future regardless of nature whether direct or indirect. Technical Dispute shall refer to any Dispute specifically designated as a Technical Dispute elsewhere in this Convention whose referral to the Expert Procedure is expressly provided for in this Convention. Technical Dispute Resolution Agreement has the meaning ascribed to it in Article 56.2n. Temporary Occupation Authorization means a right to occupy the Cameroonian public domain as provided in article 9 of the Ordinance No. 742 of 6 July 1974 on Land Law and this Convention. Term of the Project means a period starting on the Date of Entry into Force of this Convention and ending upon completion including, as the case may be any renewal or early expiry of the Exploitation Permit. Third Party means any person other than a Party a Project Company a Governmental Entity a Subsidiary a Shareholder or any other entity subrogated to the rights of Cam Iron. Third Party Facility means a b an Additional Spur Line; or an Additional Road that has been authorised in accordance with the applicable provision regarding expansion as set forth in Article 18. Tonnes means dry tonnes. Treasury Agreement means the form of agreement relating to the Treasury Operations which shall be finalized and concluded between the Project Companies and the Treasury Company. Treasury Operations means the management of the treasury functions of the Project Companies and the sale proceeds received by the Mine Project Company on the sale of the Sale Products carried out in accordance with the terms and conditions of this Convention and the Treasury Agreement. Treasury Company

means a company in which the State does not have an equity interest and as a party to the Treasury Agreement is in charge of the Treasury Operations. Uniform Act on Commercial Companies means the Uniform Act relating to Commercial Companies and Economic Interest Group adopted on 17 April 1997 by the Member States of the Organisation for the Harmonisation of Business Laws in Africa. US Dollar means the currency which is the legal tender in the United States of America. VAT means value added tax.

2 INTERPRETATION

2.1 Interpretation

In this Convention save any provision to the contrary page 131 the Annexes have the same legal force as this Convention itself of which they form an integral part; the headings used Articles and paragraphs are for convenience only and shall not be construed as having any particular meaning; a reference to the and to the Articles paragraphs and Annexes is to the and articles paragraphs and annexes of this Convention unless indicated otherwise; the terms defined in Article I are used interchangeably in the singular or plural form where the meaning or context so requires; if a word or phrase is defined its other grammatical forms have a corresponding meaning; a reference to a person includes any natural person or legal person organized under private or public law; a reference to an entity includes any legal person organized under private or public law as well as any association or groups of several legal persons and excludes natural persons or group comprised of natural persons; a reference to this Convention an agreement another convention or another agreement includes this document and its annexes such as potentially amended as well as as the case may be any deed that would be validly substituted therefore by way of novation unless this Convention such agreement or document expressly provides otherwise; mentioning anything after includes including for example or similar expressions does not limit what else might be included; the terms grant award delivery where applied to an authorisation a permit a lease or any other legal document designate the moment when the authorisation permit lease or administrative document has been duly delivered or enacted by the relevant Governmental Entity notified to the beneficiary in the manner prescribed by the Legislation or this Convention and in the case of a regulatory document published with the Official Gazette or according to the other methods required as the case may be. by the

Legislation. The ministerial or interministerial orders granting the authorisations the decrees and the laws of the State must in particular be published with the Official Gazette; in case of conflict or contradiction between the provisions of this Convention and those of its Annexes or any other Project Agreement those of this Convention shall prevail except where the Annex or Project Agreement expressly contemplates that it will prevail. In case of conflict or contradiction between any general provision and a special provision then the specific provision shall prevail over the general provisions; the Parties acknowledge that this Convention is being finalized in both English and French and agree that the English version shall prevail in the event there is any contradiction or inconsistency between the English version of this Convention and the French version of this Convention; and any reference to a specific law in this Convention shall unless otherwise specified be deemed a reference to such law as in effect in the State. page 132 a b c d e f g h i j k l m v 3

LEGAL NATURE AND PURPOSE OF TJUS CONVENTION 3.1 Legal Nature of this Convention a

This Convention is inter alia a mining convention within the meaning of the Mining Legislation. It determines i ii U1e technical legal tax customs economic administrative land employment and environment conditions with a view to the Parties performance of the Project; and the main terms and conditions for carrying out the Mining Operations within the Exploitation Area. b c d This Convention also sets for the framework for the Connected Operations which the Parties acknowledge are an essential component of the Project and integral to the Mining Operations. T11e Specific Agreements relating to the Connected Operations shall be concluded by the Parties after the Signature Date in accordance with the terms set forth on the applicable Annexes hereto to the extent applicable and shall become a part of this Convention upon ratification of this Convention by the Enabling Law. The Parties intend as a Condition Precedent to enter into a written agreement agreeing on the form of Annexes contemplated by this Convention but not attached at the time of signing and may also update annexes by agreement To the extent any provision of this Convention and a Project Agreement departs from the provisions of the Legislation such provision shall only be effective to the extent approved in the Enabling Law. Without limiting U1e foregoing the Enabling law

shall address any authorizations needed under Legislation to pennit the Marketing Company to accomplish the Marketing Operations.

3.2 Project Descr iption

The Parties agree that tile Project is an integrated mining and infrastructure project all steps of which shall be undertaken by the Project Companies with a view to optimally exploiting the Mbalam Ore resources contained within the Exploitation Area and to allow for the development of an integrated iron ore tining industry in the territory of the State. To illis end ilie Parties accept that a b subject to iliis Convention Cam Iron shall have overall responsibility for Project Operations aod in that capacity shall be responsible for the completion and the proper execution of ilie Project relative to the terms and conditions set by Legislation by this Convention and by all of the other Project Agreements; the Mine Project Company as assignee of the Exploitation Permit and holder of the Exploitation Lease shall be in ccharge of carrying out the Mining Operations in compliance with the tenus and conditions set by legislation this Convention and those of the Project Agreements to which it is a party; c v the completion of the Connected Operations shall be entrusted to the oilier Project Companies for the terms referred to in this Convention of page 133 l which i ii lthe Railway Project Company is in charge of conducting the Railway Operations and Road Operations; the Mineral Terminal Project Company is in charge of conducting lthe Mineral Terminal Operations and Blending Operations; and iii as the case may be any Project Company in charge of conducting any other operations required for or connected with the Project in compliance with the terms and conditions of the Legislation this Convention the Project Agreements and the Project Leases to which each of the Project Companies is a party; d e conduct of the Marketing Operations shall be entrusted to the Marketing Company; and conduct of the Treasu.ry Operations shall be entrusted to the Treasury Company.

3.3 Project Economic Model

a As at the Signature Date the Parties have agreed on the Project Economic Model which i ji b is built up on the economics detailed in the Feasibility Study and any updates included up until the Signature Date; and takes account of the exonerations reductions and fiscal principles propbsed by Cam Iron prior to their final negotiation of this Convention. The Parties agree to keep confidential and hold the Project Economic Model for the benefit and use of the Parties. The

State may retain a copy of and access and use the Feasibility Study and Project Economic Model for its own use for any purpose including i the operation of the Railway and Mineral Terminal directly or by a Third Party after the expiration of the Railway Agreement and Mineral Terminal Agreement respectively and ii mining operations after the end of the Term of the Project.

3.4 Joint and Several Liability

a b Other than as provided for in Article 3.4d Cam Iron expressly consents to be jointly and severally liable to the State for all the obligations undertaken by the Project Companies hereunder or under the various Project Agreements. This commitment by Cam Iron to joint and several liability shall continue until any obligation entered into by any Project Company under any document referred to in Article 3.4a has been fully and finally satisfied or as otherwise provided for in Article 3.4d.

c The commitment of Cam Iron under this Article 3.4 is the subject of a separate document which the Parties intend to negotiate the Joint page 34 v incorporate Liability Subscription Agreement which may Article 1200 et seq. of the Cameroonian Civil Code and shall set forth among others Cam Iron's obligation to perform or cause to be performed any specific obligation of Cam Iron or any Project Company or pay or cause to be paid any amount due by Cam Iron or any Project Company in each case under any Project Agreement.

d Cam Iron shall be released from being jointly and severally liable to the State for all the obligations undertaken by a Project Company where i ii more than fifty percent 50 of the voting equity interests in that Project Company are held by or have been transferred to the State or a Governmental Entity whether together or by one of them; or the State agrees in writing to release Cam Iron from that obligation on the basis of an alternative party acceptable to the State offering to be jointly and severally liable for the obligations of the Project Company and that party having financial standing which is no less than that of Cam Iron or if less, otherwise acceptable to the State.

3.5 Other Deliveries on the Signature Date

In addition to any other documents or items required to be delivered to the State on the Signature Date, the State shall also have received from Cam Iron a b a letter agreement from Sundance in favour of the State which, among other things provides for a guarantee by Sundance of the obligations of Cam Iron under this Convention prior to the Date of Entry into Force and an agreement to pay or cause to be

paid to the State a breakup fee in certain circumstances and the Bonus Payment required to be paid as set forth in Article 36.3; and i a certificate of appropriate public officials dated a date reasonably close to the Signature Date as to the existence and good standing in its jurisdiction of organization; ii a certificate dated as of the Signature Date duly executed and delivered by an officer of Cam Iron certifying as to A resolutions of its board of directors then in full force and effect authorizing the execution delivery and performance of this Convention. B the incumbency and signatures of those of its officers or other authorized representatives as applicable authorized to execute this Convention on behalf of Cam Iron and C the full force and validity of each organizational document of Cam Iron and copies thereof.

3.6 Project Commissioning a b Cam Iron undertakes that the Project Commissioning occur within six (6) years following the Date of Entry into Force or such later date as otherwise agreed. In case of disagreement between the Parties concerning the completion of the Project Commissioning the provisions of Article 56 shall apply. For the purposes of this Article such a disagreement shall be deemed to constitute a Technical Dispute.

3S 4 CONDITIONS PRECEDENT

4.1 Conditions Precedent Except for the provisions of this Article 4 as well as Articles 1 Definitions 2 Interpretation 4 Conditions Precedent 36.3 Bonus Payment 44 Confidentiality 56 Dispute Resolution 59 Legislation in Force 60 Entire Agreement 61 No Waiver. 62 Severability and Article 3 of Annex VTI Bonus Payment which will to the extent applicable become effective as of the Signature Date this Convention and the Parties rights and obligations under this Convention shall only become effective at the time indicated in Article 4.4 and subject to the prior satisfaction of the following conditions a b c the delivery by Cam Iron to the State of an updated Feasibility Study which i includes details of the costs for the construction of the foundations required for a dual track and any delays and direct costs such construction would cause to the construction of the Mainline Railway for A the first two hundred and fifty (250) kilometres of the Railway from Lolabe and B the entire length of the Mainline Railway; ii the impact on the construction time frame for building the Mainline Railway; iii includes the update to the independent reserve statement including changes in construction and operating cost the production profile and the Project Economic Model; and iv a

description of the key components of and assumptions associated with reaching the Design Capacity and an annual capacity of two hundred million 200000000 wet tonnes on the Railway and for the Mineral Terminal. the delivery by Cam Iron to the State of a commitment letter for the Debt required by the Project; agreement by the Parties on the form of all Annexes contemplated by this Convention but not attached at the Signature Date and Sundance shall have either i ii consummated the transactions contemplated by the scheme of arrangement announced involving Sundance and Hanlong Africa Mining Investment Ltd in 2011 and subsequently varied the Scheme pursuant to which one hundred percent 100 of the shares of Sundance will be acquired by a Third Party; or completed a transaction with another entity or entities which in the opinion of the State acting reasonably has the independence and capability to run the Project and has firm written commitments for to achieve Project the equity and debt financing necessary Commissioning; e.g the passage of the Enabling Law in a mutually acceptable form and issuance of the Promulgation Decree; the delivery of a signed copy of the Joint Liability Subscription Agreement by Cam Iron to the State; the registration of the Mine Project Company and the conclusion and entry into force of the Mine Project Company Share Transfer Agreement page J36 v the Mine Project Company Shareholders Agreement and an Accession Notice by the Mine Project Company; the registration of the Railway Project Company and the conclusion and entry into force of the Railway Project Company Share Transfer Agreement the Railway Project Company Shareholders Agreement the Railway Agreement and an Accession Notice by the Railway Project Company; the registration of the Mineral Terminal Project Company and the conclusion and entry into force of the Mineral Terminal Project Company Share Transfer Agreement the Mineral Terminal Project Company Shareholders Agreement the Mineral Terminal Agreement and an Accession Notice by the Mineral Terminal Project Company; the execution of the Technical Dispute Resolution Agreement; the notification to Cam Iron of the publication in the Official Gazette of the Promulgation Decree if any; the approval by the State of any Finance Documents in which the State is a party and the closing of the lending transactions contemplated by the Finance Documents; the delivery of the Exploitation

Pennit to Cam Iron materialized by the notification to Cam Iron of the publication in the Official Gazette of the Granting Decree to the extent required by the Legislation; a certificate from an officer of Cam Iron or the applicable Project Company certifying that all of Cam Iron s representations and warranties as set forth in this Convention and all the representations and warranties by the applicable Project Companies if any exist at the time or their Subsidiaries under the Project Agreements shall in each instance be true and correct in all respects on the Signature Date other than any representations and warranties that relate to a specific date in which case such specific date and after giving effect to any disclosure provided in such certificate; in a certificate from the State certifying that all of States representations and warranties as set forth this Convention and the Project Agreements to which the State is a party on the date of execution shall in each instance be true and correct in all respects on the Signature Date other than any representations and warranties that relate to a specific date in which case such specific date and after giving effect to any disclosure provided in such certificate; the State shall have received from each Project Company or Subsidiary executing a Project Agreement i a certificate of appropriate public officials dated a date reasonably close to the date of execution of such Project Agreement as to the existence and good standing of such Project Company or Subsidiary in its jurisdiction of organization; and ii a certi ticate dated as of the date of execution of such Project Agreement duly executed and delivered by an officer of such Project Company or Subsidiary as to A resolutions of its board of directors then in full force and effect authorizing the execution delivery and perfonnance of such pagal37 h i j k l m n o p v Project Agreement and the transactions contemplated thereby B the incumbency and signatures of those of such Project Company or any Subsidiarys officers authorizod representatives agents managing members or general partners as applicable authorized to act with respect to each Project Agreement to be executed by such Project Company or Subsidiary and C the full force and validity of each organizational document and copies thereof; the Project Companies shall have received from the State i the incumbency and s.ignatures of those State officials authorized to act with respect to each Project Agreement to be executed by such Project Company or Subsidiary; the issuance of the

Bank Guaranties required by the terms of this Convention to be in effect on the Date of Entry into Force; the execution of the Railway Haulage Agreement by the Railway Project Company and the Mine Project Company and the Mineral Terminal Services Agreement by the Mineral Temuol Project Company and the Mine Project Company; the execution of the Monitoring Agreement Blending; the execution of the Monitoring Agreement Marketing; the execution of the Monitoring Agreement Treasury; the execution of the Marketing Agreement including the registration of the Marketing Company; the execution of the Treasury Agreement including the registration of the Treasury Company; the binding and effectiveness of the insurance policies required in accordance with the Finance Documents; q r s t u v w x y z the execution by all applicable parties thereto of each of the i Aerodrome Agreement; ii Explosives Agreement; iii Conservation Convention; iv Road Agreement; v Blending Agreement; vi Beneficiation Agreement; vii Beneficiation Escrow Agreement; viii Foreign Exchange Agreement; ix Project Leases for the initial territory covered by the Exploitation Permit Mineral Terminal Area and Railway Area and page 138 x Rehab Escrow Agreement; and aa the Parties shall have agreed on a list of preapproved Qualified Contractors.

together the Conditions Precedent. 4.2 Quadripartite Agreement. The Parties may also negotiate the Quadripartite Agreement but the effectiveness of this Convention shall not be conditioned upon the execution of the Quadripartite Agreement. 4.3 Satisfaction and Benefit of the Conditions Precedent a Except as set forth below the Parties shall also use their reasonable endeavours to cause the Conditions Precedent to be satisfied as soon as possible after the Signature Date and in any event before the CP Long Stop Date. Notwithstanding the foregoing or anything to the contrary in this Convention i ii iii iv all Conditions Precedent requiring the execution of an agreement also require that the agreement be so tenable acceptable to the Parties to that agreement; the Condition Precedent set forth in Article 4.1 a shall be satisfied on or before the date that is six 6 months following the Signature Date and the Condition Precedent set forth in Article 4.1b shall be satisfied on or before the date that is nine 9 months following the Signature Date or in either case such other date as the Parties may agree; the State shall have no obligation to present the Enabling Law to

Parliament for approval until the Conditions Precedent set forth in Articles 4. Ja and b are satisfied and only to the extent such Conditions Precedent are satisfied within the timing required by Article 4.3a(ii); and the Parties shall use their reasonable efforts to finalize prior to the submission of the Enabling Law any Project Agreement which the Parties agree requires a variance or waiver of Legislation so such variance or waiver can be included in the Enabling Law which the Parties will seek to be presented to the Parliament of the State for approval at the scheduled session of Parliament that occurs following agreement on the terms of any such Project Agreements and variances and waivers. b In the event that any of the Conditions Precedent are not satisfied or waived at the latest on the CP Long Stop Date the Parties agree to meet in order to deal with no obligation to agree within ninety 90 Days following the CP Long Stop Date to either. i each waive in writing any nonsatisfied Conditions Precedent; or v postpone the CP Long Stop Date to any subsequent date as mutually agreed between the Parties. c In the event of either failure to reach an agreement on the waiver of the nonsatisfied Conditions Precedent or agreement to extend the CP Long Stop Date without satisfaction or waiver of the Conditions Precedent by such CP Long Stop Date i ii iii this Convention shall be null and void and the rights and obligations potentially arisen under this Convention shall be automatically terminated and revoked; Cam Iron shall not be entitled to invoke any right under any Project Agreement; and each Party including with respect to Cam Iron any Subsidiary Shareholder and Lender expressly and irrevocably undertakes not to seek the other Party's liability due to a failure to fulfil one or more Conditions Precedent only in this case other than as a result of a failure to use reasonable efforts or to that Party's refusal at its sole discretion to waive such fulfilment in writing. d If the Parties agree to waive the satisfaction of a specific Condition Precedent which provides for execution of a Project Agreement and agree to continue to work to finalize such Project Agreement following the Date of Entry into Force the Parties shall continue to negotiate the terms of such Project Agreement for an additional mutually agreeable period of time and if the Parties do not reach final agreement by such time any Party may submit the matter as a Technical Dispute to the Expert Procedure and request the

determination of the appropriate terms of the item constituting the waived condition and the decision of the experts in the Expert Procedure shall determine the terms on which the Parties shall enter into the waived item.

4.4 Entry into Force of this Convention This Convention shall be effective on that date on which all of the Conditions Precedent shall be satisfied or waived such date the Date of Entry into Force.

4.5 Parties Responsibilities between the Signature Date and the Date of Entry into Force

a b Each Party shall justify and notify the other Party any satisfaction of the Conditions Precedent as and when they occur. The Parties undertake to a reasonable extent to provide any information or assistance requested by the other Party in order to enable the performance of all obligations to which they are bound under Article 4.1 . If the satisfaction of the relevant Condition Precedent is the responsibility of only one Party and the latter seeks the assistance of the other Party all costs and expenses related to such assistance shall be borne by the Party seeking to satisfy the relevant Condition Precedent.

c Each Party shall notify the other Party in writing of the occurrence of any event likely to prevent the Conditions Precedent from being satisfied before or no later than on the CP Long Stop Date as soon as the Party becomes aware of the relevant event.

d The Parties acknowledge that the Conditions Precedent listed are for the benefit of each Party and that the State and Cam Iron shall use their reasonable endeavours to cause the satisfaction of such Conditions Precedent and that any such Condition Precedent may only be waived with the agreement of each Party.

5 REPRESENTATIONS AND WARRANTIES

5.1 Cam Iron Representations and Warranties Cam Iron hereby represents and warrants to the State as follows

a b c d e it is a Societe Anonyme duly organized and validly existing under the Legislation and has full power right and authority to execute this Convention and any other Project Agreement to which Cam Iron is a party and which it is executing at the applicable time of the making of this representation. and to perform each of its obligations herein and therein; neither the execution by Cam Iron of this Convention and any Project Agreement to which Cam Iron is a party and which it is executing at the applicable time of the making of this representation nor the fulfilment of the obligations contemplated hereby or thereby is in conflict with or has resulted or will result in a default

under or a violation of the governing instruments of Cam Iron or any other agreements or instruments to which it is a party or by which it is bound; each of this Convention and the Project Agreements to which Cam Iron is a party and which it is executing at the applicable time of making of this representation constitutes the legal valid and binding obligation of Cam Iron enforceable against Cam Iron in accordance with its terms subject to applicable bankruptcy insolvency and similar laws affecting the enforceability of the rights of creditors generally; as of the date of the applicable representation there is no action suit proceeding investigation or litigation pending and served on Cam Iron which challenges Cam Iron's authority to execute or perform or the validity or enforceability of this Convention and any Project Agreement to which Cam Iron is or will be a party or which challenges the authority of the individual executing this Convention and any Project Agreement for Cam Iron and Cam Iron has disclosed to the State any pending and unserved or threatened action suit proceeding investigation or litigation with respect to such matters of which Cam Iron is aware; the information supplied and representations and warranties made by Cam Iron in the Feasibility Study the Project Economic Model reports and official submittals and applications to the State to the knowledge of Cam Iron after diligent investigation with its employees and legal and other advisors of Cam Iron involved including employees of Sundance Inc. with regard to factual statements A are true correct and complete in all material respects; B do not contain any untrue statement of a material fact or omit to state any material fact necessary in light of the particular circumstances under which it was made in order to make the statements in this Convention not misleading; and C with respect to projections and to the extent not otherwise disclosed are made in good faith; 2 are based on the best available information at the time of delivery; and 3 have not been superseded and are the only item of that type in use at the time; f it has carefully reviewed the whole of this Convention the Project Agreements which are being executed as of the date of this representation and all applicable Legislation prior to the Signature Date and subject to the satisfaction of the Conditions Precedent has taken all steps it considers reasonably necessary to satisfy itself that assuming the satisfaction of the Conditions Precedent nothing contained in this

Convention or a Project Agreement which is being executed at the applicable time of the making of this representation inhibits or prevents Cam Iron from performing and completing the Project as currently contemplated; g as of the Signature Date it is in compliance in all material respects with the Legislation pertaining to the transactions contemplated in this Convention; and h the Project Economic Model i was prepared by or on behalf of Cam Iron in good faith; ii iii discloses all material cost revenue and other financial assumptions and projections used by Cam Iron in determining to enter into this Convention; and is substantially similar exclusive of any changes made as a result of the discussions between the States Representatives and Sundance to the financial model presented to Ilanlong Africa Mining Investment Ltd for it to present to the anticipated Lenders.

5.2 State Warranties

The State warrants to Cam Iron and the Project Companies the following a b c it has full status power right and authority to execute and perform this Convention and the other Project Agreements to which it is a party and which it is executing at the time of this representation and to perform each and all of its obligations provided for in this Convention and the Project Agreement; each of the Project Agreements to which the State is a party and which it is executing at the time of this representation constitutes a legal valid and binding obligation of the State enforceable against the State in accordance with its terms; as of the date of the representation there is no action suit proceeding investigation or litigation pending and served on the State which challenges the States authority to execute or perform or the validity or enforceability of this Convention or any other Project Agreement to which the State is a party or which challenges the authority of the State

page 42 v

executing his Convention or any other Project Agreements to which the State is a party; d c the State has carefully reviewed the whole of his Convention the Project Agreements which it is executing at the time of this representation and applicable Legislation prior to the Signature Date and subject to the satisfaction of the Conditions Precedent has taken all steps it considers reasonably necessary to satisfy itself that assuming the Conditions Precedent are completed nothing contained in this Convention and any Project Agreement to which it is a party as of the date of his representation inhibits or prevents the State from performing and completing the Project as

contemplated; and in executing this Convention the State is in full compliance with any Legislation. As of the Signature Date all financial obligations required by the State for the Project under this Convention or any other Project Agreement to which the State is or will be a party are or will at the appropriate time be included in the States annual financial programs.

6 SCOPE WIDTH AND PERFORMANCE OF THIS CONVENTION

6.1 Scope of this Convention

a The rights created by this Convention are solely for the benefit of the Parties hereto and their respective permitted Assignees and except as expressly provided in Articles 28, 32 and 43.1 no other Person shall have or be construed to have any legal or equity right remedy or claim under or in respect of or by virtue of this Convention or any provision herein contained provided the permitted Contractors and Subcontractors shall be entitled to benefit from Cam Iron's Tax incentives and exemptions in this Convention with respect to their work on the Project in connection with such entity's performance pursuant to the Project Agreements provided however that only one entity shall be entitled to enjoy such benefits with respect to each individual product or service contemplated under the Project Agreements and no such Contractor or Subcontractor shall have a direct relationship with the State be a third party beneficiary or have a right to bring a cause of action or enter into any dispute resolution proceeding with the State but rather Cam Iron and the Project Companies shall be able to claim any denied Tax benefits or incentives under claims permitted through the Project Agreements and then the applicable Project Company if any shall refund to such Contractor or Subcontractor any compensation received. No Shareholder Subsidiary Contractor Subcontractor Lender nor any respective employee thereof shall be deemed a third party beneficiary of this Convention or any Project Agreement unless such Person is an Assignee.

b Any suspension termination extinguishment or expiry of the rights and benefits granted to the Project Companies under this Convention triggers automatically and under the same conditions suspension termination extinguishment or expiry of the extension of said rights and benefits to the Persons referred to in the preceding Article.

pag 143

6.2 Cooperation

The State and Cam Iron undertake to reasonably cooperate in order to fulfil the purpose of this Convention; provided that nothing herein shall be

deemed to restrict the ability of the State to enforce the Legislation and pursue civil and criminal actions in connection with violations of the Legislation. This Article shall apply to all references in the Project Agreements to the States obligation to cooperate regardless of whether expressly stated in such Project Agreement. The State Project Committee shall be formed and empowered with offering timely State cooperation to Cam Iron and the Project Companies with respect to performance of their responsibilities under the Project Agreements including any matter in any Project Agreement that requires the consent or the approval of the State.

6.3 Compliance with Undertakings and Binding Effect of this Convention Each Party agrees to comply with the undertakings obligations and responsibilities to which it is bound under Ibis Convention in accordance with the Legislation.

6.4 Accession to this Convention The Parties to this Convention agree that notwithstanding Article 49 each Project Company once duly incorporated with the relevant RCCM shall automatically become a Party to Ibis Convention by delivering a duly executed Accession Notice supported by an extract of the minutes of its governing body or relevant organ of management that the person executing the Accession Notice has been duly authorised to execute the Accession Notice. Such an Acceding Party shall immediately benefit from and be bound by Ibis Convention to the extent specified in the Accession Notice or as otherwise applicable to that Acceding Party upon receipt of the Accession Notice by all the Parties to Ibis Convention as of the date of the Accession Notice provided that each Acceding Party shall be required to make the same representations and warranties as Cam Iron under this Convention as of the effective date of such Accession Notice and shall assume with respect to its applicable portion of the Project all obligations of Cam Iron and/or the applicable Project Company hereunder and under the Legislation any applicable permits and the Environmental and Social Management Assessment Plan including with respect to Operating Standards State remedies notification dispute resolution provision of Bank Guarantees or other security and other operational matters. For the avoidance of doubt Cam Iron shall not be released from any of its obligations hereunder by virtue of any such accession.

6.5 Reservation of Rights Notwithstanding anything to the contrary in Ibis Convention or in any Project Agreement the State

reserves for itself its Representatives and Governmental Entities the right and shall at all times during the Term of the Project have the right to enter the Project Area and each and every part thereof at all reasonable times and to the extent practicable under the circumstances upon reasonable prior notice which notice shall outline the reasons for and/or object of the State's actions in the following circumstances the Reserved Rights a to inspect the Project or determine whether or not a Project Company is in compliance with its obligations under this Convention a Project Agreement or Legislation as further set forth in Article 30.2b; paragraph 44 v b c d in the event of an actual or reported emergency danger threat circumstance or event that is reasonably believed by the State or its designee including relevant police fire emergency services, armed forces and any other security or emergency personnel in accordance with Article 6.9 to have caused or to present the imminent potential to cause injury to individuals damage to property or threat to the Environment or to public safety to take at such times as the State determines necessary in its discretion and with notice to the Project Company if practicable under the circumstances such actions as the State or such designee determines necessary to respond to or to rectify such emergency danger threat circumstance or event without liability to the Project Companies; to design construct operate manage maintain repair and rehabilitate any existing or future roads highways port terminals railroads or aerodromes other than as contemplated in the Project Agreements adjacent to above or under the Project in accordance with the terms set forth in this Convention or any Project Agreement; and solely in accordance with the terms of the Project Agreements to do any other act or thing that the State may be obligated to do pursuant to the terms of such Project Agreement or have a right to do under such Project Agreement, including those expressly referenced as Reserved Rights. In connection with any entry made pursuant to this Article 6.5, the State shall use reasonable efforts obligation de moyens to minimize interference with the Project Operations in connection with any entry on the Project. With respect to any entry or action under Article 6.5b above and to the extent applicable pursuant to the terms of this Convention Article 6.5d above in each case that qualifies as a Compensation Event the State shall pay to the Project Company or otherwise deliver

the Convention Compensation upon demand by the Project Company and if Disputed after final judgment or arbitral award is rendered in each case in accordance with the procedures set forth in this Convention for payment of Convention Compensation.

6.6 State Access Rights. The State and its Representatives during the progress of any work referred to in Article 6.6 at no cost to the State or its Representatives shall have all necessary or appropriate easement and access rights and may keep and store at the Project all necessary or appropriate materials tools supplies equipment sheds mobile trailers and other vehicles in a reasonably neat and orderly fashion in material compliance with the Legislation and the Environmental and Social Assessment and Management Plan and so as to not unreasonably interfere with the applicable Project Companys conduct of Project Operations. To the extent that the State undertakes work or repairs under Article 6.6 or any other provision of this Convention such work or repairs shall be commenced and diligently completed in a good and workmanlike manner in accordance with any applicable Operating Standards and in such a manner as not to unreasonably interfere with the conduct of business in or use of such space to the extent reasonably possible without incurring any additional cost. Cam Iron and the applicable Project Companies shall be indemnified for any Losses related to the foregoing access rights and shall not be responsible for any harm to persons or property in connection with such rights. In each case absent gross negligence or wilful misconduct on the part of Cam Iron or such Project Company.

6.7 Effect of Reservation. Any reservation of a right by the State to enter upon the Project and to make or perform any repairs alterations restoration or other work in to or about the Project which is the Project Companys obligation pursuant to this Convention or any other Project Agreement shall not be deemed to a impose any obligation on the State to do so; b render the State responsible to a Project Company or any other Person for the failure to do so; or c relieve a Project Company from any payment obligation to the State as otherwise provided in this Convention or any other Project Agreement. Nothing in this Convention or any other Project Agreement shall impose any duty upon the part of the State to do any work required to be performed by the Project Company hereunder and performance of any such work by the State shall not

constitute a waiver of the Project Companies default in failing to perform the same. 6.8 No Request to Contractors. Nothing contained in this Convention shall be construed as constituting the request of the State express or implied by inference or otherwise to any Contractor or Subcontractor for the performance of any labour or service or the furnishing of any materials for the improvement alteration addition or repair of the Project or any part thereof. 6.9 Police Fire Emergency and Public Safety Access Right. Notwithstanding any other provision of this Convention at all times during the Term of the Project and without notice unless in the discretion of the State there is adequate time for such notice or compensation to Cam Iron or the Project Companies any police fire and emergency services and any other security or emergency personnel including the armed forces and any Governmental Entity with jurisdiction over the Project Area shall have access to the Project Area as necessary for emergency management and homeland security purposes prevention of practice drills for or response to a public safety emergency. Cam Iron and the Project Companies shall cooperate with police fire and emergency services and any other security or emergency personnel including the armed forces in respect of such emergency management and homeland security purposes. The State shall use its reasonable efforts obligation de moyens to minimize a the duration and scope of any such declaration; b the adverse impact that any such declaration may have on the Project Operations; and c any public perception that Cam Iron or the applicable Project Company is acting in conjunction with any of the foregoing State efforts. including 7 TERM OF THIS CONVENTION AND SURVIVAL 7.1 Term of the Project and Survival Without prejudice to the provisions of Article 4.1 this Convention shall take effect on the Date of Entry into Force and except as provided herein shall remain effective for the Term of the Project. Articles 1 Definitions 2 Interpretation 4 Conditions Precedent 36.3 Bonus Payment 44 Confidentiality 56 Dispute Resolution and 59 Legislation in Force 60 Entire Agreement 61 No Waiver and 62 Severability and any other sections that survive by their terms shall survive the termination of this Convention. 7.2 Termination Notwithstanding Article 7.1 the Exploitation Permit may be withdrawn and this Convention may be terminated prior to expiry of the Term of the Project in accordance with in Article 50 and the

Legislation. I v .. pagel46 SECriO.S U M INING O PERATIONS 8 MINTNG OPERATIONS AND

Within fonyfivc 45 Days of Date of Entry into Force or such longer period as may be reasonably
required by the State the State shall i ii publish in the Ollicial Gazette a decree of the appropriate
authority upon proposition of the Minister an arrete of the Minister authorising and acknowledging
the transfer of the Exploitation Permit from Cam Iron to the Mine Project Company to the extent
required under the Legislation and in accordance with the terms of this Convention; and gr.mt an
Exploataaon Lease to the Mine ProJect Company for an initial term of twentyfive 25 years as from
the Date of Entry into Force wath an opuon to extend automatically on the extension of the
Exploitation Permit and to requirements. applicable conditions subject b The initial transfer of the
Exploitation Pemait from Cam Iron to the Mine Project Company shall be exempt from any Tax
including any Bonus Paymenl. 8.2 Renewal of the Exploitation Pe malt and of the Exploitation Lease
a b Upon expiry of the iniuat validity period of the Exploataation Permit the Mine Project Company
may apply for. in accordance nh Anacle 66 of the Mining Code Implementing Decree at least
twentyfour 24 months prior to ns cxpary date the renewal of the Exploitation Permat for a maximum
penod of ten l 0 years. The Exploataation Permit may subsequently be renewed by maximum
successive penods of ten 10 years with the renewal application being made at least twelve 12
months prior to 1 he then expiry date. Subject to Article 8.2c the Exploitation Permit sha ll be
renewed subject to Cm Iron and the Project Companies as well as their successors and respective
Assignees having complied with their contrnactual obligations under this Convention and the other
Project Agreements including the absence of material breach of such agreements; and if the Mine
Project Company demonstrates the commercial nature of the Mbalam Ore in accordance with
section 482 of the Mining Code. c The State agrccs that 11 will 001 unreasonably deny or delay any
properly completed and submiued application for renewal of the Exploitation Pennit. 8.3 Rights Gra
nted Tbe Exploitation Lease will grant according to its tenns the Mine Project Company the right 10
access and 10 occupy on an exclusive and temporary basis subject lo the Reserved Rights of the

State the land located within the Exploitation Area to carry out the Mining Operations therein in accordance with the terms and conditions thereof of this Convention and of the Legislation.

8.4 New Discoveries

a b c If the Mine Project Company discovers within the framework of its Mining Operations a reasonably material amount of mineral substances other than iron ore within the Exploitation Area the Mine Project Company and Cam Iron undertake to promptly notify this discovery to the Minister in accordance with the provisions of the Mining Legislation. If the Mine Project Company indicates its intention to exploit such other mineral substance within the Exploitation Area, this exploitation shall require the application and approval of a new mining title as well as the conclusion of a new mining convention in accordance with the provisions of the Legislation. The State shall reasonably consider such application in accordance with the provisions of such mining Legislation. Determination of the manner and participants in any exploitation of the mine shall be among the State's Reserved Rights and if the Mine Project Company and the Minister are able to negotiate a mining convention on mutually satisfactory terms, the Minister shall grant such application. If within two (2) years following the notification to the State of a discovery of another mineral substance within the Exploitation Area or such longer period as may be reasonably requested by the Mine Project Company provided it demonstrates it is diligently pursuing the prerequisites to mining such other mineral substance the Mine Project Company fails to appropriately apply for an exploitation permit in accordance with the Mining Code to exploit this other mineral substance or remains silent the State may freely grant exploration rights and subject the commercially extractable mineral an exploitation permit to one or more Third Parties under conditions which would not materially interfere with the performance of the Project; provided that the granting of an exploitation permit shall not release the recipient of such rights of any obligation to the Project Companies and where the Mine Project Company has complied with this Article and has made an application for an exploitation permit pursuant to the Mining Legislation, to confirming that For the avoidance of doubt it is expressly agreed that the exploration and exploitation of any natural resources including any mineral substances including iron ore outside the Exploitation Area would

fall outside the scope of this Convention.

9 CONDUCT OF THE MINING OPERATIONS

9.1 Rights to carry out the Mining Operations

a As of the later of the date when the Exploitation Permit is transferred to the Mine Project Company in accordance with Article 8.1 and the date when the Mine Project Company becomes a Party to this Convention in accordance with Article 6.4 the Mine Project Company shall have the right to carry out the Mining Operations under this Convention and the Exploitation Permit.

b Cam Iron undertakes and stands surety for the Mine Commissioning page[48 .. v under the conditions of this Convention. Cam Iron the Mine Project Company and the State undertake to comply with their respective obligations to cooperate to ensure Mine Commissioning.

c Following Project Commissioning production of Product will be ramped up during for a period of three 3 Calendar Years from the Date of Project Commissioning and Cam Iron undertakes to ensure the Minimum Annual Ore Production will be reached in the third 3 full Calendar Year post Project Commissioning.

9.2 General Obligations of Mine Project Company in the Conduct of the Mining Operations

9.2.1 Until the exhaustion of the High Grade Ore from the Exploitation Area and except as consented to by the State during any period in which High Grade Ore from the Exploitation Area is being mined the Mine Project Company must maintain the Minimum Annual Ore Production measured on a rolling average over a thirtysix 36 month period as adjusted on a pro rata basis for periods in which no High Grade Ore is being mined from Exploitation Area or the area covered by the Nabeba Permit.

9.2.2 The Mine Project Company shall undertake to carry out the Mining Operations diligently and in compliance with the Operating Standards the Legislation and to the extent applicable any specific standard contained in the applicable Project Agreements. This obligation shall include the requirement to a b c d e I follow Good International Industry Practices in order to effectively manage the mineral resource; ensure that all materials supplies facilities and equipment that the Mine Project Company or its Contractors and Subcontractors use within the framework of the Mining Operations are compliant with the Operating Standards and remain in a good state of use; use the resources available in the Exploitation Area such as water sand. gravel and wood in the most rational manner possible for the exclusive

purposes of the Mining Operations; place the scrap and waste in recipients built for that purpose and dispose of such scrap and waste in accordance with the Operating Standards and Legislation; take all usual measures taken in accordance with Good International Industry Practice in order to avoid damages to areas outside Mining Operations and prevent emissions in excess of approved levels and in each case mitigate any damages and emissions through customary means including payment of damages; supervise in a competent manner and continuously develop the employees of the Mine Project Company during Mining Operations. To this end the Mine Project Company shall develop training programmes to ensure the employees are skilled to perform the task they are employed for; g ensure that its Contractors and Subcontractors comply in their respective fields i with the standards and practices required by the Project Agreements including Good [nternational Industry Practice; ii with the Legislation; iii iv with the Environmental and Social Assessment and Management Plan; and with the applicable Project Companies quality safety and health policies; and h pay all Taxes. duties. fees and other miscellaneous payments provided for tmder this Convention and the Legislation.

9.3 Annual Works Programs and Corresponding Budgets.

On or before 30 September of each Calendar Year following the Calendar Year in which Project Commissioning occurred the Mine Project Company shall submit for review and comment to the State the production program of Mbalam Ore and the corresponding budget set for the following Calendar Year which shall notably demonstrate Cam rons ability to fulfil its obligations under Article 9.1c.

9.4 Legal Regime Ap plicable to the Assets of the Mine Project Company.

a b c d The State acknowledges that the Mining Operations shall not be drawn up as a BOOT model however the State may elect to purchase all or some of the Assets of the Mine Project Company which are necessary used or desintble in connection with the Mining Operations upon the expiry withdrawal or terrn.ination of the Exploitation Permit in exchange for cash consideration equal to the fair market value of such Assets. The State shall promptly pay the consideration required by this Article 9.4a and the Assets selected by the State shall upon payment transfer to the State. The Mine Project Company shall not pay any Taxes triggered by the transfer of such Assets to the State. Any Assets

transferred to the State in accordance with Article 9.4a shall be transferred free and clear of all security interests, liens and encumbrances including in favour of the Lenders and the Mine Project Company shall cause all such security interests, liens and encumbrances to be removed prior to transfer. The Mine Project Company shall keep an up-to-date inventory of its Assets at its expense under the conditions set forth in this Convention. The Mine Project Company shall not without the States' prior consent not to be unreasonably withheld: i) transfer with or without consideration all or part of the Assets of the Mine Project Company save in the case of any Assets that may be replaced or become surplus in the ordinary course of business; or ii) create a security right or grant any other right whatsoever over said Assets except for the purposes of financing but not refinancing in a manner that grants a security interest in the Assets of the Project Companies within the last five (5) years of the Mineral Terminal Agreement and Railway Agreement to the Project and in favour of the Lenders of such financing. c) The State must not unreasonably withhold its consent to any transfer referred to in Article 9.4d where the transferee agrees to be bound by the obligations to the State under this Convention with respect to the Assets of the Mine Project Company.

10 BENEFICIATION OPERATIONS

The Parties acknowledge that the Beneficiation of the Low Grade Ore and the construction of the Beneficiation Facility and Beneficiation Power Station constitute a decisive part of the Project and the State is granting the Exploitation Permit, the Railway Concession and the Mineral Terminal Concession based on the long-term nature of the Project of which Beneficiation is an essential component.

10.1 Beneficiation Operations and Beneficiation Feasibility Study

a) b) c) d) The Parties agree that the grant and if requested the renewal of the Exploitation Permit by the State in favour of the Mine Project Company must allow the Mine Project Company to produce commercially exploitable Mbalam Ore. As a consequence the Parties confirm their agreement to enable Beneficiation of the Low Grade Ore in order to produce Beneficiated Ore, conducting Beneficiation Operations in Subject to the occurrence of the events referred to in Articles 6.4 and 8.1a) the Operating Standards and the provisions of this Convention the Mine Project Company shall have the right to carry out the Beneficiation Operations under this Convention any applicable Project

Agreement and the Exploitation Permit. Prior to the Date of First Commercial Shipping Cam Iron must have completed and provided to the State a prefeasibility study regarding the Beneficiation Power Station. The foregoing prefeasibility study shall be prepared by Cam Iron or the Mine Project Company but shall be reviewed by an Independent Engineer selected by the State. Thirtysix 36 months from the Date of First Commercial Shipping and on every second 2 anniversary thereafter until the ending point specified in the Beneficiation Agreement if a Positive Beneficiation Determination has not occurred Cam Iron must have completed and provided the State with a Beneficiation Feasibility Study and a feasibility study relating to the design and construction of the Beneficiation Power Station containing the items customarily considered for a study of this type Beneficiation Power Station Feasibility Study. The Beneficiation Feasibility Study and the Beneficiation Power Station Feasibility Study shall be prepared on behalf of Cam Iron or the Mine Project Company but be reviewed by an Independent Engineer selected by the State. The State shall have the right to use and share with Third Parties the Beneficiation Power Station Feasibility Study for the purpose of constructing the Beneficiation Power Station. The Project Companies shall keep the State informed of their timetable for preparing the Beneficiation Feasibility Study and Beneficiation Power Station Feasibility Study so that the State may arrange for the prompt review by its Independent Engineer. The Independent Engineer shall be engaged by the State at the sole expense of the State but the Mine Project Company will set aside for multiple studies if needed five hundred thousand 500000 US Dollars to fund such expense from dividends due to the State from the Mine Project Company to review the Beneficiation Feasibility Study or updated prefeasibility study or review the draft Beneficiation Power Station Feasibility Study or prefeasibility study. The Project Companies and their Subsidiaries shall and shall cause any person or entity preparing the Beneficiation Feasibility Study and Beneficiation Power Station Feasibility Study to cooperate with the Independent Engineer as it conducts its business and provide them with any materials they request. It is acknowledged that Cam Iron will in its work be utilising information provided by itself or the Project Companies; and in particular detail categories of information

substantially similar to those of the Feasibility Study including A B C D the mineral resources and mineral reserves of Low Grade Ore present within the Exploitation Area for Mbalam Ore and the exploitation area covered by the Nabeba Pennit with respect to the Nabeba Ore; provided. that the resources and reserves of the area covered by the Nabeba Permit are for planning purposes only and shall not be included in the calculation of IRR; the mineral resource and mineral reserves estimate of High Grade Ore present within the Exploitation Area for Mbalam Ore and the surface area of the Nabeba Pennit with respect to the Nabeba Ore; the extent to which the Mine Project Company shall continue to mine any High Grade Ore at expiration of the BF Commissioning Deadline subject to having reached and maintained the Initial Beneficiation Production Capacity. insofar as the volumes of Low Grade Ore present within the Exploitation Area so allow the conditions under which Congo Iron shall continue to mine any High Grade Ore at expiration of the BF Commissioning Deadline where at anytime thereafter the Mine Project Company is not mining sufficient High Grade Ore from the Exploitation Pennit to satisfy the Minimum Annual Ore Production. The Beneficiation Feasibility Study is to describe the ongoing transport and blending of the High Grade Ore from the Nabeba Project by Railway Project Company and Mineral Terminal Project Company as the case may be with whatever High Grade Ore is available from the Exploitation Pennit and how this will coexist with the Mine Project Company having a Beneficiation Facility which is conducting Beneficiation Operations with respect to paragraph 52 the Low Grade Ore present within the Exploitation Area and which is to be processed through the Beneficiation Facility with either the Initial Beneficiation Production Capacity or the Interim Beneficiation Production Capacity as the case may be E the manner in which the Mine Project Company proposes to continue to mine High Grade Ore and at the same time undertake Beneficiation Operations in order to reach a beneficiation production capacity that is higher than the Initial Beneficiation Production Capacity or Interim Beneficiation Production Capacity as the case may be including details of the Beneficiation Capacity Expansion Works and when they will be undertaken; F the site plan of the Beneficiation Facility within the Exploitation Area; G the Beneficiation Specifications; H I J K L M an analysis of all

of the BF Construction Conditions and the reasonable conclusions taken in good faith by Cam Iron regarding the conditions governing their satisfaction; a provisional timetable for building the Beneficiation Facility which shall take into account the deadlines referred to in this Article 10; a study of the environmental and social effects of the Beneficiation Facility including emissions disposal of dirt and waste water treatment and mitigation and the resulting management plan; a study specifying the needs of the Beneficiation Facility in terms of gas water and electricity and the manner in which Mine Project Company proposes to meet said needs; the full economic analysis of the Beneficiation Operations and a calculation of the Internal Rate of Return; and any other topic customarily addressed by such studies or that is appropriate in the particular context of these studies Beneficiation Feasibility Study. g During the period prior to the delivery to the State of the Beneficiation Power Station Feasibility Study the Mine Project Company shall i conduct or procure the conduct of technical and economic studies relating to the building of or contracting a Third Party to build the Beneficiation Power Station or provide the required power on a regular basis and in accordance with any related provisions established in the Beneficiation Agreement; and inform the State of the findings of such studies. page 153 ii v h i j k l m During the preparation of the Beneficiation Feasibility Study and Beneficiation Power Station Feasibility Study the Mine Project Company shall consult with the State in order to determine whether the State wishes to ensure that there is sufficient capacity within the Beneficiation Power Station to produce power in excess of the Mine Project Company's requirements for the purposes of its Beneficiation Operations and to the extent the State wishes there to be such additional capacity it must provide such incentives or financial support to ensure the Mine Project Company does not incur a tariff for electricity which is greater than it would have had the capacity of the Beneficiation Power Station been no more than was needed for the purposes of the Beneficiation Operations. Within one hundred and eighty (180) Days following the date on which the State receives the Beneficiation Feasibility Study the State can provide the Mine Project Company with any comment or objection to the Beneficiation Feasibility Study. The Mine Project Company shall to the greatest extent possible take into account the

comments or objections provided by the State in order to achieve a consensual Beneficiation Feasibility Study no later than ninety 90 Days following the date on which the Mine Project Company receives comments from the State on the Beneficiation Feasibility Study. If the Parties are unable to achieve a consensus on the Beneficiation Feasibility Study then either Party may refer the disagreement to the Expert Procedure for resolution as a Technical Dispute; provided that a dispute regarding whether the IRR threshold component in the BF Construction Conditions has been met shall be subject to resolution as an ordinary Dispute rather than a Technical Dispute. Where a Beneficiation Feasibility Study demonstrates that the conditions in the BF Construction Conditions are not met then the State cannot require the Mine Project Company to conduct the Beneficiation Operations. If by operation of Article 10.1 j above and notwithstanding anything else in this Article 10 if the Mine Project Company is not obliged to conduct the Beneficiation Operations then the Mine Project Company may nevertheless commit in writing to conduct the Beneficiation Operations subject to the terms of the Project Agreements a Beneficiation Election. A Positive Beneficiation Determination means if i a Beneficiation Feasibility Study demonstrates that the BF Construction Conditions have been met; or ii a Beneficiation Election has been made. Upon the occurrence of a Positive Beneficiation Determination the State and Cam Iron or the Mine Project Company shall agree on a set of milestones for the construction and commissioning of the Beneficiation Facility.

10.2 Obligation to Conduct Beneficiation Operations a The Mine Project Company undertakes to construct and commission the Beneficiation Facility and conduct the Beneficiation Operations in accordance with the Beneficiation Specifications and generally in accordance with and subject to this Article 10 and the Beneficiation Agreement. For the avoidance of doubt the Beneficiation Facility shall be built specifically to allow Beneficiation of the Low Grade Ore in accordance with the provisions of this Convention and the Beneficiation Agreement. At any time during the Term of the Project in the event of there being a processing unit within the territory of the State capable of processing the Beneficiated Ore produced by the Mine Project Company the Mine Project Company must sell at least fifteen percent 15 in the aggregate of the total production of

Beneficiated Ore to local processing facilities or steel mills whether owned by the State or a Third Party located within the State under financial terms and conditions that are consistent with international benchmark pricing and trading terms. If no Beneficiated Ore is able to be sold locally and in any case for all Beneficiated Ore which is not sold locally it is to be exported as is. d If any Beneficiated Ore is processed into pellets by the Mine Project Company and there is a pelletisation facility that is a Cameroonian company that could process a portion of the Beneficiated Ore then at least fifteen percent (15%) of the Beneficiated Ore will be processed by the Cameroonian company on reasonable terms and competitive prices.

10.3 Power Supply a The Parties acknowledge that i ii a key factor in being able to establish Beneficiation Operations is the establishment or obtaining of a power supply which is of sufficient capacity as to support those Beneficiation Operations; in order to provide the power referred to in Article 10.3ai following a Positive Beneficiation Determination. i The State may within a period established in the Beneficiation Agreement elect in its discretion to construct own and operate or procure the construction and operation of the Beneficiation Power Station. In the event the State does not elect to do so the Mine Project Company shall designate one or more Third Parties approved by the State such approval shall not be unreasonably withheld to build own and/or operate the Beneficiation Power Station. The provisions set forth herein regarding the obligations of the Mine Project Company in respect of causing the construction and operation of the Beneficiation Power Station shall be set forth in the Beneficiation Agreement and shall apply to the State in the event it elects to construct own and operate or procure the construction and operation of the Beneficiation Power Station; iii the Mine Project Company will enter into a power purchase agreement on commercially reasonable and customary terms to purchase the power required by the Mine Project Company based on either the Targeted Annual Beneficiation Production Capacity or Production Capacity as applicable and the State anticipates entering into a power purchase agreement on commercially reasonable and Initial Beneficiation Production Capacity page 155 customary terms to purchase the excess power that the Mine Project Company is not reasonably expected to progressively consume. The terms of the power purchase agreements

will be described in greater detail in the Beneficiation Agreement; and iv the Beneficiation Power Station must be capable of providing a power supply of the quantity and quality that is at least sufficient enough to carry on the Beneficiation Operations. b c While the Parties anticipate that the Mine Project Company shall cause to be built the Beneficiation Power Station the Beneficiation Agreement will contain provisions allowing the State to elect to supply power to the Beneficiation Facility in its sole discretion. The Beneficiation Agreement shall describe a process by which the Parties will consider different alternatives and cooperate to identify and pursue a plan for building and operating the Beneficiation Facility and Beneficiation Power Station.

10.4 Obligations of the Builder Owner and Operator with Respect to the Power Supply If the State does not elect to build the Beneficiation Power Station the Mine Project Company shall obtain or cause the Third Party designated to construct the Beneficiation Power Station to obtain whatever authorisations approvals consents and licences that are necessary for such Third Party to build and operate the Beneficiation Power Station.

10.5 Procurement Model for the Power Supply The Beneficiation Agreement will in accordance with Article 10.3 address the procurement framework for the output of the Beneficiation Power Station and consider components of the tariff based on a reasonable return of and return on equity and other factors and b the term of the concession which will be tied to the duration of the Exploitation Permit. The Beneficiation Agreement on mutually agreeable terms shall also provide the State with an option to build or cause to build the Beneficiation Power Station and to participate in the equity funding of the Beneficiation Power Station. Power sold to purchasers other than the Mine Project Company will not be included in the return to the equity holders of the owner and operator of the Beneficiation Power Station.

10.6 Calculation of Internal Rate of Return The Beneficiation Agreement shall address the details regarding the determination of whether the BF Construction Conditions have been met including specifying the formulae and methodology for calculating the Internal Rate of Return. The Parties acknowledge that in determining whether the BF Construction Conditions have been satisfied the calculation of the Internal Rate of Return shall be based on an assumption that the Beneficiation Facility has achieved the Targeted Annual Production

Capacity for each year of Beneficiation Operations notwithstanding the fact that the Beneficiation Facility may only be constructed to achieve the Initial Beneficiation Production Capacity or the Interim Beneficiation Production Capacity or may otherwise achieve less than the Targeting Annual Production Capacity as page 156 b a result of the flexibility being afforded to the Mine Project Company in achieving the Targeted Annual Production Capacity; and include the estimated investment and exploitation costs known as at Lhc BF Construction Deadline including reasonable contingency escalation and inflation allowances and the estimated charge for power supply referred to in Article I 0.5 and the forecast iron ore prices for the relevant iron ore products based on a mutually agreeable forecast such as the CRU forecast for relevant iron ore price for the years of the Beneficiation Operations including the long term average where applicable as of that date being such that they would enable the marketing of the Beneficiated Ore at an internationally competitive price. The Mine Project Company is to achieve an Internal Rate of Return for the Beneficiation Operations of not less than a rate equal to the Reference Rate plus five hundred 500 basis points.

10.7 Construction and Commissioning of the Beneficiation Facility Subject to the provisions of this Article I 0 and Article 55 Cameroon guarantees and stands surety for the Mine Project Company to complete the construction of the Beneficiation Facility and cause to be completed the construction of the Beneficiation Power Station by the date BF Construction Deadline that is the latter of one hundred and twenty 120 months following the Date of First Commercial Shipping as the same may be adjusted pursuant to this Convention and the Beneficiation Agreement. The Parties anticipate that the Beneficiation Agreement will address changes to the construction timeline based on the Positive Beneficiation Determination being made after the time period necessary to develop the Beneficiation Power Station and Beneficiation Facility by the anticipated deadlines. Notwithstanding the BF Construction Deadline the Mine Project Company must notify the State of the actual date of commencement of construction of the Beneficiation Facility and Beneficiation Power Station within seven 7 Days of that date. Once construction of the Beneficiation Facility and Beneficiation Power Station has commenced it must not be terminated nor must it be suspended for a period of sixty 60

Days or more for any reason other than the occurrence of a Force Majeure Event Legitimte Cause Economic llardship or as part of the construction plan where such suspension does not impact the completion of construction by the BF Construction Deadline. Where a Force Majeure Eventr Legitimate Cause or Economic Hardship as referred to in Article J0.7c occurs the Mine Project Company must promptly notify the State and must make all reasonable efforts obligation de moyens to overcome the event. Once overcome the Mine Project Company must immediately notify the State and the period the BF during which Commissioning Deadline. that event occurs shall be added onto The normal or early expiration of the BF Construction Deadline will be made official by the issuance of a Finding of Compliance. In the event that he State makes any observations such observations will specify the pogo l 57 a b c d e v reservations that must be addressed prior to the BF Commissioning. The Mine Project Company will have a period of one hundred and e ighty l 80 Days or such longer period where the Mine Project Company demonstrates in good faith that the observations cannot be accommodated within the one hundred and eighty 180 Day period to complete the works aimed at addressing the reservations of the State and the SF Conunissioning Deadline will be extended correspondingly without imposing any penalties on the Mine Project Company. In the event that one or the other of the Parties refuses to sign the Finding of Compliance free of any reservations the most aggrieved Party shall initiate an Expert Procedure. f Subject to the tenns of this Article 10 and Article 55 the Mine Project Company undertakes to carry out the commissioning of the Beneficiation Facility on the basis of at least the Initial Beneficiation Production Capacity and the Interim Beoeficiation Production Capacity or Targeted Annual Production Capacity to the extent the Beneficiation Faci lity is ftrSt built the case may be the BF Commissioning within a time frame not to exceed three hundred a nd sixty five 365 Days after the BF Construction Deadline is reached the BF Commissioning Deadline. to such capacity as g Notwithstanding the applicable BF Commissioning Deadline the Mi ne Project Company must notify the State of the actual date of commissioning of the Beneficiation Facility within seven 7 Days of that date. 10.8 Fin ancing of Ben eficiation Each of the Project Companies and the State as a future shareholder shall use its

reasonable endeavours to facilitate the conclusion of the financing for the Beneficiation Facility based on project financing and minimize the amount of equity financing required. The State must approve any such financing documents to which it is a party. The Mine Project Company shall maintain reserves funded by undistributed profits as contemplated by Article 10.9.1 necessary to fund the equity component if anticipated by the Parties of the financing of the Beneficiation Facility and not require any contribution of equity from their Shareholders without the prior written consent of the State which consent shall not be unreasonably withheld. The other Project Companies shall similarly maintain reserves solely for the purpose of funding modifications if required to accommodate the transport or handling of any such Beneficiated Ore with respect to their specific Project Operations but nothing in this Article shall require a Project Company which is established to build and operate the Beneficiation Power Station to create such a reserve.

10.9 Beneficiation Incentives and Escrow.

10.9.1 Beneficiation Escrow Account. a The Mine Project Company Cam Iron and the State will enter into an escrow agreement the Beneficiation Escrow Agreement pursuant to which an escrow account shall be established Beneficiation Escrow Account with an independent escrow agent in a neutral country. The Mine Project Company shall contribute to the Beneficiation Escrow Account from profits from the sale of the High Grade Ore mined from page 158 f; i ii for the Exploitation Area which would otherwise be available distribution an amount equal to twentyfive percent 25 of the total funds required to finance the Beneficiation Facility funded annually from twentyfive percent 25 of otherwise distributable cash until such amount is reached; provided that at the time of a Positive Beneficiation Determination the frequency and amounts of such ti.UJding may be increased on a mutually agreeable schedule reasonably designed and adjusted to enable the Mine Project Company to achieve the target of twentyfive percent 25 of the total funds required to finance the Beneficiation Facility prior to the anticipated deployment of such funds. The funds in the Beneficiation Escrow Account shall be used pursuant to the following terms which will be detailed the Beneficiation in Agreement and the Beneficiation Escrow Agreement if there is a Positive Beneficiation Determination the funds in the Beneficiation Escrow Account shall be

available for providing the equity portion of the financing needed for the Beneficiation Facility and any amounts not necessary for the equity funding requirements shall be distributed to the shareholders of the Mine Project Company on a pro rata basis; and if there is a Positive Beneficiation Determination and the Mine Project Company does not comply with its obligations under this Convention and the Beneficiation Agreement regarding construction and commissioning of the Beneficiation Facility such funds shall be available to the Mine Project Company for the purpose of financing the construction of the Beneficiation Facility using any structure chosen by the State. The Beneficiation Escrow Agreement shall provide that such funds shall remain in escrow for a period not to exceed ten 10 years from the date it is determined in good faith that the Mine Project Company will not be complying with its obligation to construct the Beneficiation Facility to be available to the State for deployment for the purpose of financing the Beneficiation Facility provided that such funds shall only be available to the Mine Project Company to finance the Beneficiation Facility and to the extent not all funds are necessary for such financing such excess amounts shall be distributed to the Shareholders of the Mine Project Company on a pro rata basis being the shareholders immediately prior to the determination that the Mine Project Company will not cause the construction of the Beneficiation Facility to be built. If the State through the Mine Project Company, has not arranged for the utilization of such funds for the purposes referred to in this Article by the tenth anniversary then such funds shall be distributed to the Shareholders of the Mine Project Company on a pro rata basis based on the ownership interests of such Shareholders on the date that it is determined that the Mine Project Company will not be complying with its obligation to construct the Beneficiation Facility.

10.9.2 Impact on Term of the Railway Agreement and Mineral Terminal Agreement. The Railway Agreement and Mineral Terminal Agreement shall provide that a if the Mine Project Company complies with its material obligations regarding the construction of the Beneficiation Facility and Beneficiation page 159 b c Power Station to be constructed if required the term of the Railway Concession set forth in the Railway Agreement and Mineral Terminal Concession set forth in the Mineral Terminal Agreement shall upon BF

Commissioning be extended from twenty five 25 years to thirty 30 years; provided that the base tariff chargeable to Third Party users will be allocated one hundred percent 100 to the State beginning at the start of year twenty nine 29; if there has been a Positive Beneficiation Determination and the Mine Project Company does not comply with its material obligations regarding the construction of the Beneficiation Facility and Beneficiation Power Station the State shall have the option to hire new employees or contractors to operate the Railway; and if there has been a Positive Beneficiation Determination and the Mine Project Company does not comply with its material obligations regarding the construction of the Beneficiation Facility and Beneficiation Power Station but the State does not cause through the Mine Project Company to use the funds in the Beneficiation Escrow Account to finance the equity portion of the construction of the Beneficiation Facility the terms of the Railway Concession set forth in the Railway Agreement and Mineral Terminal Concession set forth in the Mineral Terminal Agreement shall at the State's election in its sole discretion, be shortened to terminate on the tenth anniversary of the date of the release of the funds from the Beneficiation Escrow Account.

10.9.3 Impact on Equity of Project Companies. The Shareholders Agreements shall provide that if there has been a Positive Beneficiation Determination and the Mine Project Company does not comply with its material obligations regarding the construction of the Beneficiation Facility and Beneficiation Power Station then on the tenth anniversary of Project Commissioning fiftyone percent 51 of the total equity in each Project Company shall automatically transfer to the State from Cam Iron.

10.10 Beneficiation Construction and Commissioning a b v If a Positive Beneficiation Determination has occurred Cam Iron and the Mine Project Company shall obtain all statutory and regulatory approvals leases licences permits, consents and authorisations required to be obtained to finance, construct, commission and properly operate the Beneficiation Facility and all other infrastructure and facilities necessary to enable proper operation of the Beneficiation Facility. The State shall to any related permits and not unreasonably withhold approval authorizations requested by Cam Iron or the Mine Project Company and such Project Company shall provide notice to the State Project Committee of such withholding. If a Positive Beneficiation

Determination has occurred the Mine Project Company shall commence construction of the Beneficiation Facility no later than eighty four 84 months of the Date of First Commercial Shipping as the same may be adjusted pursuant to this Convention and the Beneficiation Agreement BF Construction Commencement Date and cause the Third Party it procured to build the Beneficiation Power Station to commence construction of the Beneficiation Power Station no later than a date agreed to in the Beneficiation Agreement BF Power Station Construction Commencement Date. c The Beneficiation Agreement shall address among other topics the identification and method of obtaining the permits necessary for the Beneficiation Operations remediation environmental compliance bank guarantees and construction timelines. I 0.1 Waiver of Conditions a The BF Construction Conditions are for the sole benefit of the Mine Project Company. b Without prejudice to its obligations under the terms of Article 10.12 a BF Construction Condition is waived if and only if the Mine Project Company gives a written notice of waiver of that condition to the State. 10.12 Obligation to Satisfy Beneficiation Conditions a b Each Party including the Mine Project Company must use their reasonable endeavours to do those things that are required of them or within their control and cooperate with each other to ensure that i the BF Construction Conditions and the commissioning of the Beneficiation Facility are satisfied on or before the BF Construction Commencement Date or the BF Commissioning Deadline as applicable or as soon as practicable thereafter and ii the commencement of the Beneficiation Power Station and the commissioning of the Beneficiation Power Station are satisfied on or before the BF Power Station Construction Commencement Date or the BF Commissioning Deadline as applicable or as soon as practicable thereafter. If a Party including the Mine Project Company becomes aware that a BF Construction Condition or commissioning of the Beneficiation Facility will not or is unlikely to be satisfied by the BF Construction Deadline or the BF Commissioning Commencement Date as applicable then that Party must give written notice to the other Party identifying the relevant BF Construction Condition or a BF Commissioning Deadline as applicable that will not or is unlikely to be so satisfied. I 0.13 Production Capacity of the Beneficiation Facility a Subject to this Article 10 and as it may be

modified in the Beneficiation Agreement the Parties agree and acknowledge and Cam Iron undertakes to ensure that i the Beneficiation Facility shall initially be constructed and commissioned to achieve at least the Initial Beneficiation Production Capacity or the Interim Beneficial Production Capacity in certain circumstances including where the amount of High Grade Ore remaining on the Exploitation Area is insufficient to enable the Mine Project Company to achieve the Minimum Annual Ore Production; ii as from the date of BF Commissioning and other than as is provided page 61 for in this Convention the Beneficiation Facility will after ramp up produce no less than the Minimum Annual Beneficiated Ore Production; and iii as the capacity to produce High Grade Ore from the Project reduces over time the production capacity of the Beneficiation Facility will be increased in order to ensure the Beneficiation Facility once built to a capacity of thirtyfive 35 million Tonnes per annum and after ramp up produces Beneficiated Ore in an amount not less than the Targeted Annual Production Capacity. b e The Parties acknowledge that notwithstanding the Mine Project Company achieving the BF Commissioning Deadline and after any Beneficiation Capacity Expansion Works there will be a rampup period which will be set out in the Beneficiation Feasibility Study during which actual production will not be at the required levels referred to in Articles 10.13a and ii and during this time the Mine Project Company will not be in breach of this Convention or another Project Agreement. Subject to Articles 10.14 and 55. following the completion of BF the Mine Project Company must carry out all Commissioning Beneficiation Capacity Expansion Works necessary to maintain actual annual production capacity at a level equal to the Targeted Annual Production Capacity. The capacity of the Beneficiation Facility will need to be expanded where either i ii the High Grade Ore that is being blended no longer contains within the blend the the Minimum Annual Ore Production Exploitation Permit; and/or from the total High Grade Ore being mined from the Exploitation Permit and the Nabeba Permit together with the Minimum Annual Beneficiated Ore Production is less than the Targeted Annual Production Capacity. d On each occasion that the Mine Project Company must undertake Beneficiation Capacity Expansion Works in order to maintain the Targeted Annual Production Capacity the Mine Project Company must i ii iii iv

notify the State of the proposed schedule for the commencement of construction and the completion of the relevant Beneficiation Capacity Expansion Works the Proposed Expansion Schedule at the commencement of such construction works; least one hundred and eighty (180) Days prior to obtain the States approval which will not be Unreasonably withheld for any changes to the Proposed Expansion Schedule; notify the State of the actual date of commencement of construction of the relevant Beneficiation Capacity Expansion Works within seven (7) Days of that date; and notify the State of the actual date of the completion of the Beneficiation Facility Commissioning of the relevant Beneficiation Capacity Expansion Works within seven (7) Days of that date. 10.13 The acknowledgement referred to in Article 10.13(diii) applies to each time Beneficiation Capacity Expansion Works are undertaken. 10.14 Beneficiation Expansion Conditions The Project Companies are responsible for obtaining all Governmental Approvals necessary for Beneficiation Capacity Expansion Works and the State will not unreasonably deny a request for such Governmental Approvals. 10.15 Legal Regime applicable to the Assets comprising the Beneficiation Facility Except as set forth in the Project Agreements the State may elect to purchase all or some of the Assets comprising the Beneficiation Facility made available acquired constructed, installed and/or processed by the Mine Project Company or on its behalf or for its benefit upon the expiry withdrawal or termination of the Exploitation Permit in exchange for cash consideration equal to their fair market value. The Assets purchased by the State shall upon payment transfer to the State without any obligation of the Mine Project Company to pay any Taxes triggered by the transfer of such Assets to the State. 10.16 Procurement The Mine Project Company may procure for its benefit the conduct of all the design construction and maintenance operations of the Beneficiation Facility by any Subsidiary Contractor or Subcontractor. 10.17 Beneficiation of Other Low Grade Ore The Project Companies will not beneficiate Other Ore in the Exploitation Area without the consent of the State. 10.18 Early Beneficiation a This Article 10.18 contains Cam Irons commencement to undertake Beneficiation and the Parties agree that in the Beneficiation Agreement, they will include provisions which allow Cam Iron or the Mine Project Company to commence Beneficiation both i

earlier than contemplated in this Convention; and ii using a Beneficiation Facility that is sized differently to the size of what has been contemplated to date. b Notwithstanding Article 10.18a nothing in that Article is intended to limit or release Cam Iron and the Mine Project Company of any liability or commitment to build a Beneficiation Facility capable of achieving the Targeted Annual Production Capacity and its other obligations under Article 10. v paget63 SECTrON ITI CONNECTED OPERA TrONS II MINERAL TERMINAL SPECIFICATIONS AND RAIL WAY SPECIFTCA TJONS I 1.1 Capacity. While the Railway and Mineral Tenninal will only be initially built to handle the thirty five million 35000000 Tonnes of Ore in a Calendar Year as described in more detail in the Railway Agreement and the Mineral Terminal Agreement as applicable the Railway and the Mineral Terminal will be designed in a mmmer based on the assumptions and principles set forth in the Railway Agreement and Mineral Terminal Agreement respectively suited to eventually handle the Design Capacity without materially adversely impacting a b Initial Capacity and Expansion Capacity for a total capacity equal to the Design Capacity; or technical aspects of the Railway haulage services and Mineral Tenninal services being provided to any party up to the Design capacity. 11.2 Tariffs The tariffs payable with respect to the Railway and Mineral Terminal shall be calculated substantially in accordance with the drafi Tariff Frameworks for the Railway and Mineral Tem1inal which are attached to this Convention as Annex ill as the same may be modified after the Signature Date. 11.3 Dual Trac.k Design Without limiting the foregoing following receipt of the updated Feasibility Study contemplated by Article 4.1 a the State may in its sole discretion elect by the Date of Entry into Force to fund the costs required to build out the foundation for a dual track design. In such. event the State Cam Iron the Railway Project Company and the Mineral Tenninal Project Company shall agree to modify the Specifications and time frames referred to in this Convention and the Mineral Tenninal Agreement and Railway Agreement to the extent necessary to reflect any additional requirements with respect to the dual track design and will examine any additional direct costs to the Mainline Railway. TI1e Railway Project Company and the Mineral Tenninal Project Company shall be required to build the Railway and the Mineral Terminal in

accordance with such Specifications and the State shall be required to provide the requisite funding to the Railway Project Company and the Mineral Terminal Project Company as applicable, and the allocation of the equity component of the tariffs for the Expansion Capacity shall be adjusted accordingly at such time as the second track has been constructed and is being utilized. In addition the Parties may enter into discussions without any obligation to reach agreement pursuant to which Cam Iron or its Subsidiaries may agree to fund a portion of the costs in exchange for additional Expansion Capacity.

12 RAILWAY OPERATIONS AND SPUR LINES

12.1 Railway Operations

12.1.1 Rights to carry out the Railway Operations.

Railway Agreement and Creation of the Railway Project Company

a The Parties acknowledge that the transportation of the Mambong Ore from the Exploitation Area and other iron ore from either within or outside the territory of the State up to the Mineral Terminal Area constitutes a decisive part of the Project.

b c d The Railway Specifications which shall be based on the National Railway Master Plan of the State will be provided to the Railway Project Company by the State and after the Railway Project Company's review the State and the Railway Project Company will agree on the final Railway Specifications which shall be a part of the Railway Agreement. As of the later of the date when the Railway Concession is granted to the Railway Project Company and the date when the Railway Project Company becomes a Party to this Convention in accordance with Article 6.4 the Railway Project Company shall have the right to carry out the Railway Operations under this Convention the Railway Concession and the Railway Agreement. The Railway Agreement is to be drawn up as a BOOT model and shall along with the Railway Project Company Shareholder Agreement provide and set the framework of the conditions for the funding and conduct by the Railway Project Company for the Railway Operations within the Railway Area. The Railway Facility is to be built within a Project Lease in accordance with the Railway Specifications and in the compliance with Legislation and the Operating Standards. The provisions of the Railway Agreement e Cam Iron or the Railway Project Company as applicable shall operate the Railway in a manner that allows the Railway to i ii f handle Initial Capacity and Expansion Capacity up to the Design Capacity subject to the terms of the

Railway Agreement; and incorporate technical requirements that reflect the Beneficiation Operations Railway haulage services and Mineral Terminal services being provided to any party up to the Design Capacity. The Railway Agreement also provides that the Railway Project Company shall operate the Railway to provide any Expansion Capacity that may be built and provide adequate working capital to finance its operations related to Expansion Capacity for clarification this does not include capital expenditures to finance the construction of Expansion Capacity. For purposes of determining adequate working capital the Railway Project Company shall be permitted to include the value of any liquid security provided by the user of Expansion Capacity. g The Railway Agreement also provides that the Railway Project Company shall i ii maintain and keep the Railway Facilities in sound working order and in accordance with this Convention and the Operating Standards; and conduct all the works necessary and all the repairs of any damages that occur in compliance with the provisions of the Railway Agreement. b The Railway Project Company shall vii within three 3 months of the end of every two 2 year period commencing upon Project Commissioning page J65 [f provide to the State an independent report prepared by an independent expert approved by the State such approval not to be Unreasonably withheld on the maintenance carried out during the past two 2 years and the maintenance required during the succeeding two 2 year period in order to ensure the Railway Project Company's obligations under Article 12.1.1 f are being met. The Railway Agreement will contain the form of instructions to be provided to the independent expert in connection with its audit. Subject to the provisions of the Railway Agreement Cam Iron guarantees and stands surety for the obligations of the Railway Project Company and for the commissioning of the Mainline Railway and the Initial Spur Line by the Railway Project Company the Railway Commissioning. under the conditions set forth in the Railway Agreement. Cam Iron the Railway Project Company and the State will undertake to comply with their respective obligations cooperate the Railway Commissioning. ensure to to Issuance of a Finding of Compliance will constitute the Railway Commissioning. The State may raise reservations that the Railway has not been constructed in accordance with the Railway Specifications in which case such reservations must be

resolved prior to Railway Commissioning. The Railway Project Company will have a period of one hundred and eighty 180 Days plus up to an additional ninety 90 Days to the extent that the Railway Company is diligently working to remove such reservations and demonstrates in good faith that the reservations cannot be resolved within the one hundred and eighty 180 Day period to do the works such as to allow the removal of such reservations. In case of refusal of either of the Parties to sign the Finding of Compliance without prejudice the most diligent Party shall refer the matter to Expert Procedure. The term of the Railway Agreement shall be for twenty five 25 years from the Date of Entry into Force to be modified as described in Article 10.9. Every five 5 years, during the term of the Railway Agreement the State and the Railway Project Company are to review the terms of the Railway Concession to ensure the expectations of both Parties are being met and to otherwise take account of anticipated operating conditions for the next succeeding five 5 year period and discuss in good faith opportunities to expand the Railway to provide services for additional mines or commodity producers the goal of which is increasing revenue for the Parties however such review is not to result in any adverse change to either i j k l i U1e operating conditions for the Railway Facilities; or ii the basis on which the tariff is being charged for the Initial Capacity. 12.1.2 Description for the Initial Capacity of the Railway Area a The Railway Project Company shall be authorised to carry out the Railway Operations within the surface area contemplated by the Railway Agreement the site plan of which deed notably on the basis of the page [66 findings of the Environmental and Social Assessment and Management Plan will be attached to the Railway Agreement the Railway Area. b For the term referred to in Article 12.1.1k the State and the Railway Project Company each within the surface area of which it is in charge as defined in the Railway Agreement undertake to take as and when necessary any measures and steps required in accordance with the Legislation international standards and best practice in the railway industry to identify i ii the geological environmental and archaeological nature of the Railway Area; and the impact on the local populations and communities of the conduct of the Railway Operations within the Railway Area and undertake at the sole expense of the Railway Project Company to take all appropriate precautionary measures and implement

mitigation and treatment measures with respect to the negative effects on the Environment. social structures or geology of the surrounding region arising from the Railway Operations or during the conduct of the Railway Operations. c In the event that despite the Parties reasonable efforts obligation de moyens to remedy by all means the events referred to in Article 12. L2b continuation of the Railway Operations requires a modification of the Railway Area the State Cam Iron and the applicable Project Companies undertake to take all reasonable measures necessary to modify the surface area contemplated by the Railway Agreement. 12.1 .3 Purpose and intended use of the Railway a The Railway shall be built to allow i transportation of the Sale Products Other Ores and other iron ore from within the territory of the State the transportation of which by their nature would not have adverse effects on the collection unloading storage loading and shipment of the Sale Products and Other Ores; and ii transportation of the Goods Nabeba Goods and any other goods agreed to by the State and the Railway Project Company. b It is expressly agreed that during the Term of the Project the Railway shall not be used for transporting passengers or transporting equipment materials and other goods that are not intended for the Project or the Nabeba Project except for the limited cases provided in this Convention and the Railway Agreement. 12.2 Railway Operations 12.2.1 Legal Regime applicable to the Assets comprising the Railway Facilities a the Assets comprising the Railway Facilities made available All acquired constructed installed and/or processed by the Railway Project Company or on its behalf which are necessary used or desirable in page 167 operating the Railway Facilities and the other Assets identified by the Parties in an annex to the Railway Agreement are the property of the Railway Project Company and will be automatically and directly transferred to the State upon expiry of the Railway Agreement with no financial contribution being due to the Railway Project Company. The Railway Project Company shall not pay any Taxes triggered by the transfer of such Assets to the State. Any Assets transferred to the State upon expiry of the Railway Agreement shall be transferred free and clear of all security interests liens and encumbrances including in favour of the Lenders and in good working condition and the Railway Project Company shall cause all such security interests liens and encumbrances to

be removed prior to transfer. The Railway Project Company shall keep an up to date inventory of its Assets at its expense under the conditions set forth in the Railway Agreement. The Assets and equipment comprising as the case may be any Additional Spur Line or Additional Road if applicable shall be treated in the same manner as provided for in Article 12.2.1a. The Railway Project Company shall not without the States prior consent b c d e i ii transfer with or without consideration all or part of the Assets comprising the Railway Facilities Project Roads and. as the case may be any Additional Spur Line or Additional Road save in the case of any of the Railway facilities and any Additional Spur Line that may be replaced in the ordinary course of business; or create a security interest or grant any other right whatsoever over said Assets except for the purposes of financing or refinancing of the Project and in favour of the Lenders of such financing provided that in connection with any refinancing. the Railway Project Company shall not be permitted to grant any security interest or other right on its Assets that relates to Debt which matures later than five 5 years prior to the expiration of the Railway Concession. Q The State must not unreasonably withhold its consent to any transfer referred to in Article 12.2.1e i where the transferee agrees to be bound by the obligations to the State under this Convention with respect to the Railway Facilities Project Roads Additional Spur Line or Additional Road. 12.2.2 Railway Ooperation a Upon the expiration of the initial twenty five 25 year term of the Railway Companys right to operate the Railway as same may be modified pursuant to the terms of this Convention the State may to the extent the State and the Railway Project Company have reached agreement on the details of an agreement to operate the Railway Facilities prior to the expiry of the Railway Agreement for which the State shall be under no obligation or the Railway Project Company exercising its right under Article 12.2.2c i grant to the Railway Project page 68 v Company the right for a period of ten 10 years after the expiry of the Railway Agreement to operate and maintain the Railway Railway Operations Agreement provided however that State shall not be required to negotiate any such new agreement with or extension to the Railway Project Company if a material default has occurred or is persisting within twenty four 24 months of the end of the term of the Railway Agreement; b Subject to the terms and provisions of

the Railway Operations Agreement and this Convention if the State and the Railway Project Company enter into a Railway Operations Agreement following the expiration of the Railway Agreement the State and the Railway Project Company agree that i for the term of the Railway Operations Agreement the Railway Project Company shall have the exclusive possession but not title of all Assets of the Railway Project Company that transferred to the State following expiration of the Railway Agreement except as may be requested by the State in the exercise of its Reserved Rights; ii the Railway Project Company shall A B C D be obliged to maintain and keep the Railway Facilities in sound working order and construct all necessary works and repair any damage that occurs from use of the Railway Facilities; be obliged to include in the tariff to be charged to a user other than with respect to the tariff being charged to the Mine Project Company and Congo Iron for the butial Capacity and the Reserve Expansion Capacity if being utilized a capital component prescribed by the State. which amount shall be solely for the benefit of the State; and for the avoidance of doubt the tariff will substantially reflect the tariff referred to in A1ticle 4 of the Tariff Framework excluding the State charge component referred to in Article 4.6 of the Tariff Framework but the State charge will be imposed on any usage above the bltial Capacity and Reserve Expansion Capacity. for not the purpose of the tariff being charged to the Mine Project Company and Congo Iron for the bltial Capacity include a base charge as that tem1 is Ullderstood but shall include a rerum of ten percent 1 0 nollllnal on the original capital cost of the Assets that create the bltial Capacity unless there are material economic changes prior to the initial financing and in that case the Parties wil l discuss an adjustment to this rate; and be entitled to include in the tariff to be charged to a user the fiXed and variable operating costs associated with the Railway Project Company providing a haulage service to the in Article user 12.2.2biiA and an equitable portion of any Sustaining Capital incurred by the Railway Project Company together including referred costs the to pago69 iii iv v vi vii with a Fixed Profit Margin for the benefit of the Railway Project Company on each of the ftxed and variable costs and on the Sustaining Capital; the State shall detennine which users other than lthe Mine Project Company or Congo Iron may be given access to a haulage

service and, subject to compliance with Article 18 on what basis provided that the use and enjoyment by the Mine Project Company and Congo Iron and any then existing user of Expansion Capacity shall not be materially adversely affected; the Railway Project Company shall within three 3 months of the end of every two 2 year period from the effective date of the Railway Operations Agreement provide to the State an independent report by an independent expert approved by the State on the maintenance carried out during the past two 2 years period and the maintenance required during the succeeding two 2 year period in order to ensure the Railway Project Company's obligations under Article 12.2.2biiA are being met. The Railway Agreement will contain the form of instructions to be provided to the independent expert in connection with its audit; the Mine Project Company or Congo Iron will be charged a tariff in the amounts prescribed by the applicable Railway Haulage Agreements being novated; provided that consumables and spare inventory that were previously purchased by the Railway Project Company and transferred to the State will contribute to the capital expense components of the tariff only to the extent the State pays any consideration for such items to the Railway Project Company; the users other than the Mine Project Company and Congo Iron shall be charged a tariff not less than the tariff charged to the Mine Project Company and Congo Iron; and the quality of the haulage services being provided to the Mine Project Company its Subsidiaries and Congo Iron at the termination of the Railway Agreement is to be no less than that being provided prior to the termination. c At the end of the initial twentyfive 25 year term of the Railway Project Company to operate the Railway as modified by Article 10.9.2a which for clarification excludes early termination of such right pursuant to the termination of the Railway Agreement before the end of said term if the State intends to grant a Third Party the right to operate the Railway Facilities and the material terms of such offer are more favourable to the operator than the last terms the State offered to Railway Project Company in the discussions in connection with Article 12.2.2a the State must offer to the Railway Project Company the right to match the offer from that Third Party and the State shall give the Railway Project Company material terms of any such offer and the Railway Project Company shall have thirty 30 Days from its receipt of those details in

which to advise the State of its position on the matter provided however that the State shall not be required to award such new agreement or extension to the Railway . pageJ70 Project Company if a material default has occurred or is persisting within twentyfour 24 months of the end of the tenn of the Railway Operations Agreement or if tile Beneficiation Operations have not commenced; the possession of the Assets described in Article 12.2.a shall pass to the State with no financial contribution being due to the Railway Project Company; the State shall have the right to access the employment records of the Railway Project Companys employees with a view to offering such employees ongoing employment by whomever will operate the Railway and the Railway Project Company will reasonably cooperate to enable the State or any subsequent Railway operator to make offers to those employees it wishes to employ; the State or whomever is to operate the Railway is to take a novation from Railway Project Company of all ongoing haulage se.rvice agreements which the Railway Project Company had entered into with users of the Railway and which remain in force on the expiry of the Railway Agreement or the Railway Operations Agreement as the case may be; the Railway Project Company shall to the extent legally permissible transfer assib1l or grant a perpetual license for no additional charge to use the nowhow and business systems for running the Railway to the State or whoever is to run the Railway; and the Railway Project Company and Cam Iron shall cooperate and take all reasonably requested actions to facilitate the transfer of the right to operate the Railway to a Third Party. ii iii iv v vi d Each of the State and the Railway Project Company shall commence negotiating the terms of the Railway Operations Agreement at least one l year prior to the expiry of the Railway Agreement and those negotiations are to i ii proceed in good faith with a view to the terms of the Railway Operations Agreement being agreed prior to the expiry of the Railway AbTCCment; and have regard to the matters referred to in Article 12.2.2 and to otherwise be on tenus which are to be generally accepted in railway operations agreements servicing the international mining industry. 12.2.3 Haulage Services Where the State and the Railway Project Company are unable to agree on the terms of the Railway Operations Agreement prior to the expiry of the Railway Agreement or after the end of the

term of the Railway Operations Agreement then the State shall operate or arrange for a Third Party to operate the Railway Facility on and from the expiry of the Railway Agreement or Railway Operations Agreement as the case may be such that the haulage service being provided to the Mine Project Company its Subsidiaries or Congo a v pagel71 Iron shall be in accordance with applicable Operating Standards on and from the expiry of the Railway Agreement or Railway Operations Agreement as applicable and shall be of a similar quality and regularity as that provided during the term of the Railway Agreement or Railway Operations Agreement as the case may be; b c the tariff charged by the State or the Third Party operator for the haulage service referred to in Article 12.2.3a shall subject to a component of the tariff being to contribute to Sustaining Capital be calculated on a substantially similar basis as was being charged on the expiry of the Railway Agreement or Railway Operations Agreement; and the State or the Third Party operator will coordinate the operation of the haulage service with the then operator of the Mineral Terminal Facility such that subject to the production by Mine Project Company and Congo Iron of Mbalam Ore and Nabeba Ore there is a continuous supply of Products to Mineral Terminal for loading onto vessels.

12.2.4 Access to the Railway Without prejudice to Article 18 and the Reserved Rights on the Date of Entry into Force to the extent any authorization is required under the Legislation the Railway Project Company is authorised to utilize the Railway Facilities in exchange for the applicable tariff for the purposes of transportation of the Sale Products the Goods and the Nabeba Goods in accordance with the terms hereof and the Railway Agreement and the applicable Railway Haulage Agreements. This authorization does not obligate the Railway Project Company to provide rail or haulage services which is addressed by separate agreement. This authorization is limited to any authorization required from the State under the Legislation and is not a contractual right to use the Railway. For avoidance of doubt the Parties acknowledge and agree that Nabeba Ore other than Nabeba Ore included in the Blended Ore is not contemplated as being hauled on the Railway pursuant to the Railway Haulage Agreement or the applicable tariff other than as through the creation of Expansion Capacity including the Reserve Expansion Capacity.

12.2.5 General Warranties of the State a The

State warrants to Cam Iron that i ii subject to the Railway Agreement the Railway Project Company may procure the conduct of all the Railway Operations and Road Operations by any Contractor or Subcontractor; and within the framework of the operation of the Railway Facilities and Project Roads neither the Railway Project Company nor the Contractors or Subcontractors shall be deemed to be a public carrier or have public service obligations. b The remaining general warranties of the State and the Railway Project Company shall be detailed in the Railway Agreement.

12.2.6 Sustaining Capital

The Railway Project Company shall incur expenditure by way of Sustaining Capital in order to maintain the Railway Facilities pursuant to the Operating Standards and page 72 such sums shall be spent by the Railway Project Company in a manner and at times appropriate for ensuring the efficient operation of the Railway Facilities. For Sustaining Capital that is not fully recovered from the users of the haulage services in the applicable tariff calculations at the time of the transfer of Assets to the State upon the expiry of the Railway Agreement in accordance with Article 12.2. 1a and was contributed within the last five 5 years of the Railway Agreement to fund unexpected Sustaining Capital if the State elects to receive the Asset for which the Sustaining Capital was expended the State must pay to the Railway Project Company an amount equal to the portion of such Sustaining Capital for that Asset that was not covered by insurance or reserves and has not been depreciated including with any accelerated depreciation.

12.3 Liabilities and Indemnities Railway

12.3.1 Where the State a

b employs any employees of the Railway Project Company as contemplated in Article 12.2.2ciii then there is to be an appropriate adjustment of the employee entitlements between the State and the Railway Project Company and each will indemnify the other for the period the employee was or is employed by them for the claims and liabilities arising during such period of employment; takes a novation of any haulage service agreement as contemplated in Article 12.2.2civ then the Railway Project Company is liable for all claims and liabilities arising prior to the novation and the State or whoever is to run the Railway is liable for all claims and liabilities arising after the novation except for the avoidance of doubt to the extent such claims and liabilities relate to the period prior to the novation and to the extent of their respective liabilities they will indemnify the other Party against

those liabilities; and c takes a transfer assignment or License of know how and business systems contemplated in Article 12.2.2cv each Party shall indemnify the other from any claim or liability arising during the period they held or used or hold or use such know how and business systems. 13

MINERAL TERMINAL OPERATIONS 13. I a b Rights to carry out the Mineral Terminal Operations Mineral Terminal Agreement and Creation of the Mineral Terminal Project Company The Parties acknowledge that the possibility to export Sale Products by way of shipment constitutes a decisive part of the Project. The Mineral Terminal Specifications upon the election of the State will be given to the Mineral Terminal Project Company by the State and after its review the State and the Mineral Terminal Project Company will agree on the final Mineral Terminal Specifications which will be recorded in the Mineral Terminal Agreement. c As of the later of the date when the Mineral Terminal Concession is granted to the Mineral Terminal Project Company and the date when the Mineral Terminal Project Company becomes a Party to this Convention in accordance with Article 6.4 the Mineral Terminal Project Company shall have the right to carry out the Mineral Terminal Operations under this Convention the Mineral Terminal Concession and the Mineral Terminal Agreement. d The Mineral Terminal Agreement is to be drawn up as a BOOT model and shall along with the Mineral Terminal Project Company Shareholders Agreement provide and set the framework of the conditions for the funding and conduct by the Mineral Terminal Project Company of the Mineral Terminal Operations within the Mineral Terminal Area. The Mineral Terminal Facility is to be built within a Project Lease in accordance with the Mineral Terminal Specifications in compliance with the provisions of the Mineral Terminal Agreement the Legislation and the Operating Standards. e Cam Iron or the Mineral Terminal Company, as applicable will operate the Mineral Terminal in a manner that allows the Mineral Terminal to handle Initial Capacity and Expansion Capacity up to the Design Capacity; and incorporate technical aspects of the Mineral Terminal services being provided to any party up to the Design Capacity. The Mineral Terminal Agreement also provides that the Mineral Terminal Project Company shall operate the Mineral Terminal to provide any Expansion Capacity that may be built and provide adequate working capital to finance its operations related to

Expansion Capacity for clarification itis does not include capital expenditures to finance the construction of Expansion Capacity. For purposes of determining adequate working capital the Mineral Terminal Project Company shall be permitted to include the value of any liquid security provided by the user of Expansion Capacity. g The Mineral Terminal Agreement also provides that the Mineral Terminal Project Company shall i ii b maintain and keep the Mineral Terminal Facilities in sound working order and in accordance with this Convention and the Operating Standards; and conduct all the works necessary and all the repairs of any damages that could occur in compliance with the provisions of the Mineral Terminal Agreement. The Mineral Terminal Project Company shall within three 3 months of the end of every two 2 years commencing upon Project Commissioning provide to the State an independent report prepared by an independent expert approved by the State such approval not to be unreasonably withheld on the maintenance carried out during the past two 2 years and the maintenance required during the succeeding two 2 year period in order to ensure that the applicable Mineral Terminal Project Company's obligations under itis Article 13.1h are being met. The Mineral Terminal Agreement will contain the form of instructions to be page 174 11 i j k l provided to the independent expert in connection with its audit¹. Pursuant to the terms of the Mineral Terminal Agreement Cam Iron undertakes and stands surety for the obligations of the Mineral Terminal Project Company hereunder and under the Mineral Terminal Agreement including commissioning of the Mineral Terminal Facilities by the Mineral Terminal Project Company Mineral Terminal Commissioning under the conditions set forth in the Mineral Terminal Agreement. Cam Iron the Mineral Terminal Project Company and the State undertake to comply with their respective obligations to cooperate to ensure the Mineral Terminal Commissioning. the Issuance of a Finding of Compliance viii constitute the Mineral Terminal Commissioning. The State may raise reservations that the Mineral Terminal has not been constructed in accordance with the Mineral Terminal Specifications in which case such reservations shall be resolved prior to the Mineral Terminal Commissioning. The Mineral Terminal Project Company will have a period of one hundred and eighty 180 Days or up to an additional ninety 90 Days to the extent that the Mineral Terminal

Project Company demonstrates in good faith that the reservations cannot be resolved within the one hundred and eighty 180 Day period and provided that it is diligently during such additional period to resolve such reservations to do Ute works so as to allow the removal of such reservations. In case of refusal of either of the Parties to sign the Finding of Compliance the most diligent Party shall refer the matter to the Expert Procedure. The term of the Mineral Terminal Agreement shall be for twenty five 25 years from the Date of Entry into Force to be modified as described in Article 10.9. Every five 5 years during the term of the Mineral Terminal Agreement the State and the Mineral Terminal Project Company are to review the terllIS of the Mineral Terminal Concession to ensure U1e expectations of both Parties are being met and to otherwise take account of anticipated operating conditions for the next succeeding five 5 year period and to d iscuss in good faith. opportunities to expand the Mineral Terminal to provide services for additional mines the goal of which is increasing revenue for the Parties however such review is not to result in any adverse change to either i ii the operating conditions for the Mineral Terminal Facilities; or the basis on which the tariff is being charged for the Initial Capacity.

13.2 Description of the Mineral Terminal Area a The Mineral Terminal Project Company shall be authorised to carry out the Mineral Terminal Operations within the surface subsurface and waterside areas contemplated by the Mineral Tenrlinal Agreement the site plan of which will be attached to the Mineral Terminal Agreement the Mineral Terminal Area. h The provisions of Articles 12.1.2h and 12.1.2c shall apply mutatis mutandis to the State and the Mineral Terminal Project Company for the l page 175 conduct of the Mineral Terminal Operations within the Mineral Terminal Area.

13.3 Purpose and Intended Use of the Mineral Terminal The Mineral Terminal shall be built to allow notably a the collection unloading storage loading and shipment i of the Sale Products. Other Ores and other iron ore from within the territory of the State the collection unloading storage loading and shipment of which by their nature would not have adverse effects on the collection unloading storage loading and shipment of the Sale Products and Other Ores; and ii of the Goods Nabeba Goods and any other goods agreed to by the State and the Mineral Terminal Project Company; as well as b c the conduct of the Blending Operations. The initial

lease for the Mineral Terminal Area may upon agreement include the land necessary to reach the Design Capacity.

13.4 Legal Regime applicable to the Assets comprising the Mineral Terminal Facilities

a b c d i v .. All the Assets comprising the Mineral Terminal Facilities made available acquired constructed installed and/or processed by the Mineral Terminal Project Company or on its behalf which are necessary used or desirable in operating the Mineral Terminal and the other Assets identified by the Parties in an annex to the Mineral Terminal Agreement are the property of the Mineral Terminal Project Company and will be automatically and directly transferred to the State upon expiry of the Mineral Terminal Agreement with no financial contribution being due to the Mineral Terminal Project. The Mineral Terminal Project Company shall not pay any Taxes triggered by the transfer of such Assets to the State. Any Assets transferred to the State upon expiry of the Mineral Terminal Agreement shall be transferred free and clear of all security interests liens and encumbrances including in favour of the Lenders and in good working condition and the Mineral Terminal Project Company shall cause all such security interests liens and encumbrances to be removed prior to transfer. The Mineral Terminal Project Company shall keep an up-to-date inventory of its Assets at its expense under the conditions set forth in the Mineral Terminal Agreement. Regardless of the category in which they fall the Mineral Terminal Project Company shall not without the State's prior consent transfer with or without consideration all or part of the Assets comprising the Mineral Terminal Facilities save in the case of any of the Mineral Terminal Facilities that may be replaced in the ordinary course of business or ii create a security interest or grant any other right whatsoever over said Assets except for the purposes of financing or refinancing of the Project and in favour of the Lenders of such financing provided that in connection with any refinancing the Mineral Terminal Project Company shall not be permitted to grant any security interest or other right on its Assets that relates to Debt which matures later than five (5) years prior to the expiration of the Mineral Terminal Concession. iii The State must not unreasonably withhold its consent to any transfer referred to in Article 13.4d where the transferee agrees to be bound by the obligations to the State under this Convention with respect to the Mineral Terminal Facilities.

13.5 Mineral

Terminal Operatorship a Upon the expiration of the initial twentyfive 25 year term of the Mineral Terminal Company's right to operate the Mineral Terminal as same may be modified pursuant to the terms of this Convention the State may to the extent the State and the Mineral Terminal Project Company have reached agreement on the details of an agreement to operate the Mineral Terminal Facilities prior to the expiry of the Mineral Terminal Agreement for which the State shall be under no obligation or the Mineral Terminal Project Company exercising its right under Article 13.5 to grant to the Mineral Terminal Project Company the right for a period of ten (10) years after the expiry of the Mineral Terminal Agreement to operate and maintain the Mineral Terminal Mineral Terminal Operations Agreement provided however that the State shall not be required to negotiate any such new agreement with the Mineral Terminal Project Company if a material default has occurred or is persisting within twenty four (24) months of the end of the term of the Mineral Terminal Agreement. b Subject to the terms and provisions of the Mineral Terminal Operations Agreement and this Convention if the State and the Mineral Terminal Project Company enter into a Mineral Terminal Operations Agreement following the expiration of the Mineral Terminal Agreement the State and the Mineral Terminal Project Company agree that i for the term of the Mineral Terminal Operations Agreement the Mineral Terminal Project Company shall have exclusive possession but not title of all Assets of the Mineral Terminal Project Company that are transferred to the State following expiration of the Mineral Terminal Agreement except as may be requested by the State in the exercise of its Reserved Rights; ii the Mineral Terminal Project Company shall A be obliged to maintain and keep the Mineral Terminal in sound order and conduct all necessary works and repair any damage that occurs from use of the Mineral Terminal; B be obliged to include in the tariff to be charged to a user other than with respect to the tariff being charged to the Mine page 177 Project Company and Congo Iron for the Initial Capacity and the Reserve Expansion Capacity if being utilized a capital component prescribed by the State which amount shall be solely for the benefit of the State; and for the avoidance of doubt the tariff will substantially reflect the tariff referred to in Article 4 of the Tariff Framework Agreement excluding the State charge component referred to in Article 4.6 of the Tariff

Framework but the State charge will be imposed on any usage above the Initial Capacity and Reserve Expansion Capacity; and C be entitled to include in the tariff to be charged to a user the fixed and variable operating costs associated with the Mineral Terminal Project Company providing a haulage service to the user including the costs referred to in Article 13.5biiA an equitable portion of any Sustaining Capital incurred by the Mineral Terminal Project Company together with a Fixed Profit Margin on each of the fixed and variable costs and on the Sustaining Capital. the State shall determine which users other than the Mine Project Company or Congo Iron may be given access to a handling and loading service and subject to compliance with Article 18 on what basis. provided that the use and enjoyment by the Mine Project Company Congo Iron and any thenexisting user of Expansion Capacity shall not be materially adversely affected; the Mineral Terminal Project Company shall provide to the State within three 3 months of the end of every two 2 year period from the effective date of the Mineral Terminal Operations Agreement an independent report by an independent expert approved by the State on the maintenance carried out during the past two 2 year period and the maintenance required during the succeeding two 2 year period in order to ensure the Mineral Terminal Project Companys obligations under Article 13.5biiA are being met. The Mineral Terminal Project Agreement will contain the form of instructions to be provided to the independent expert in connection with its audit; the Mine Project Company or Congo Iron will be charged a tariff in the amounts prescribed by the applicable Mineral Terminal Services Agreements being novated; provided that consumables and spare inventory that were previously purchased by the Mineral Terminal Project Company and transferred to the State will contribute to the capital expense components of the tariff only to the extent that the State pays any consideration for such items to the Mineral Terminal Project Company; the users other than Mine Project Company and Congo Iron shall be charged a tariff not less than the tariff charged to the Mine Project Company and Congo Iron; and the quality of the handling and loading services being provided to the Mine Project Company and Congo Iron after the termination of the Mineral Terminal Agreement is to be no less than that being provided prior to the termination. page 78 iii iv v vi vii c At the end of the initial

twentyfive 25 year term of the right of the Mineral Tenninal Project Company to operate the Mineral Terminal as modified by Article 10.9.2a which for clarification excludes early termination of such right pursuant to the termination of the Mineral Tenninal Agreement prior to the expiration of said tenn i ii iii iv v vi if the State intends to grant a Third Party the right to operate the Mineral Terminal Facilities and the material terms of such offer are more favourable to the operator than the last temlS the State offered to Mineral Terminal Project Company in the discussions in connection with Articlel3.5a the State must offer to the Mineral Tenninal Project Company the right to match the offer from that Third Party and the State shall give the Mineral Terminal Project Company material terms of any such offer and the Mineral Terminal Project Company shall have thirty 30 Days from its receipt of those details in which to advise the State of its position on the matter; provided however that the State shall not be required to award such new agreement or extension to the Project Company if a material default has occurred or is persisting within twentyfour 24 months of the end of the tcnn of the Mineral Terminal Operations Agreement or if the Beneficiation Operations have not commenced; the possession of the Assets described in Article 13.4a sball pass to the State with no financial contribution being due to the Mineral Terminal Project Company; the State shall have the right to access the employment records of the Mineral Tenninal Project Companys employees with a view to offering such employees ongoing employment by whomever will operate the Mineral Terminal and the Mineral Temtinal Project Company will reasonably cooperate to enable the State or any subsequent Mineral Terminal operator to make offers to those employees it wishes to employ; the State or whomever is to operate the Mineral Tenninal is to take a novation from Mineral Terminal Project Company of all ongoing handling and loading service agreements which the Mineral Terminal Project Comparly had entered into with users of the Mineral Terminal and which remain in force on the expiry of the Mineral Terminal Agreement or the Mineral Tenninal Operations Agreement. as the case may be; the Mineral Temtinal Project Company shall to the extent legally pennissible transfer assign or grant a perpetual license for no additional charge to use the knowhow and business systems for running the Mineral Terminal to the State or whoever is to rw1 the Mineral

Terminal; and the Mineral Terminal Project Company and Cam Iron shall cooperate and take all reasonably requested actions to facilitate the transfer of the right to operate the Mineral Terminal to a Third Party. d Each of the State and the Mineral Terminal Project Company shall commence negotiating the terms of the Mineral Terminal Operations Agreement at least one year prior to the expiry of the Mineral Terminal Agreement and those negotiations are to proceed in good faith with a view to the terms of the Mineral Terminal Operations Agreement being agreed prior to the expiry of the Mineral Terminal Agreement; and have regard to the matters referred to in Article 13.5 and to otherwise be on terms which are to be generally accepted in mineral terminal operation agreements servicing the international mining industry. 13.6 Handling Services Where the State and the Mineral Terminal Project Company are unable to agree on the terms of the Mineral Terminal Operations Agreement prior to the expiry of the Mineral Terminal Agreement or at the end of the term of the Mineral Terminal Operations Agreement then a b c the State shall operate or arrange for a Third Party to operate the Mineral Terminal Facility on and from the expiry of the Mineral Terminal Agreement or Mineral Terminal Operations Agreement as the case may be such that the handling service being provided to the Mine Project Company its Subsidiaries or Congo Iron shall be in accordance with applicable Operating Standards on and from the expiry of the Mineral Terminal Agreement or Mineral Terminal Operations Agreement as applicable and shall be of a similar quality and regularity as that provided during the term of the Mineral Terminal Agreement or Mineral Terminal Operating Agreement as the case may be; the tariff charged by the State or the Third Party operator for the handling service referred to in Article 13.6a shall be subject to a component of the tariff being to contribute to Sustaining Capital. be calculated on a substantially similar basis as was being charged on the expiry of the Mineral Terminal Agreement or Mineral Terminal Operations Agreement; and the State or the Third Party operator will coordinate the operation of the haulage service with the then operator of the Railway facility such that subject to the production by the Mine Project Company and Congo Iron of Mamba Ore and Nabeba Ore there is a continuous supply of Products to the Mineral Terminal for loading onto vessels. 13.7 Access to the Mineral Terminal

Without prejudice to the provisions of Article 18 and the Reserved Rights. on the Date of Entry into Force to the extent any authorization is required under the Legislation the Mineral Terminal Project Company is authorised to access the Mineral Terminal Facilities in exchange for the applicable tariff in accordance with the terms hereof and the Mineral Terminal Agreement and the Mineral Terminal Services Agreement. This authorization does not obligate the Project Companies to provide handling and loading services which is addressed by separate agreement. This authorization is limited to any authorization required from the State under the Legislation and is not a contract right to use the Mineral Terminal. For clarification Nabeba Ore other than Nabeba Ore included in the Blended Ore is not contemplated as being handled and loaded through the Mineral Terminal pursuant to the Mineral Terminal Services Agreement or the applicable tariff other than as through the creation of Expansion Capacity including the Reserve Expansion Capacity.

13.8 General Warranties of the State a The State warrants to the Mineral Terminal Project Company that i ii iii subject to the Mineral Terminal Agreement the Mineral Terminal Project Company may procure the conduct of all the Mineral Terminal Operations by any Contractor or Subcontractor; within the framework of the operation of the Mineral Terminal Facilities neither the Mineral Terminal Project Company nor the Contractors or Subcontractors shall be deemed to be autonomous port bodies or to have a public service port activity; subject to the Mineral Terminal Agreement this Convention the Legislation and any applicable Operating Standards in operating the Mineral Terminal Facilities the Mineral Terminal Project Company shall be entitled to undertake or exercise control over all operations including the arrival and loading of ships departure of ships time spent by the ships in the port environmental and safety operations; and iv in the conduct of the Mineral Terminal Operations the Mineral Terminal Project Company may dredge a ship channel and ship crossing area. b The remaining general warranties of the State and the Mineral Terminal Project Company shall be detailed in the Mineral Terminal Agreement.

13.9 Liabilities and Indemnities Mineral Terminal Where the State employs any employees of the Mineral Terminal Project Company as contemplated in Article 13.5 ciii then there is to be an appropriate adjustment of the employee

emittlements between the State and the Mineral Terminal Project Company and each will indemnify the other for the period the employee was or is employed by them for claims or liabilities arising during such period of employment; takes a novation of any band ling and loading agreements as contemplated in Miele 13.5civ then the Mineral Terminal Project Company is liable for all claims and liabilities arising prior to the novation and the State or whoever is to run the Mineral Tenninal is liable for all claims and liabilities arising after the novation except for the avoidance of doubt to the extent such claims and liabilities relate to the period prior to the novation and to the extent of their respective liabilities they will indemnify the other party against those liabilities; and takes a transfer assignment or license of know how and business systems contemplated in Article 13.5cv each Party shall indemnify the other from any claim or liability arising during the period they held or used or hold or use such know how and business systems. page 181 a b c v 13.10 Sustaining Capital a b

The Mineral Terminal Project Company shall incur expenditure by way of Sustaining Capital in order to maintain the Mineral Terminal Facilities pursuant to the Operating Standards and such sum. shall be spent by the Mineral Tenninal Project Company in a manner and at the times appropriate for ensuring the efficient operation of the Mineral Tenninal. For Sustaining Capital that is not fully recovered from the users of the Mineral Terminal services in the applicable tariff calculations at the time of the transfer of assets to the State upon the expiry of the Mineral Terminal Agreement in accordance with Article 13.4a and was contributed within the last five 5 years of the Mineral Tenninal Agreement to fund unexpected Sustaining Capital if the State elects to receive the asset for which the Sustaining Capital was expended the State must pay to the Mineral Terminal Project Company an amount equal to the portion of such Sustaining Capital for such asset that was not covered by insurance or reserves and has not been depreciated including with any accelerated depreciation.

14 PROJECT ROADS 14.1 Paving of Roads. Within the three 3 year period following Project Commissioning the Project Companies will provide a metallic surfacing on the Project Road Adjacent to the Railway from Lolabe to the intersection of an existing unpaved State road near Endenge; b provide a metallic surfacing for such existing road from where it connects to the Project

Road Adjacent to the Railway to Mbelem where such existing road intersects with the existing State road from Sangmelima to Ouessou which is or shall be paved by the State; c connect with the existing road from Sangmelima to Ouessou until that road intersects with the Project Road Adjacent to the Railway; and d provide a metallic surface for the final portion of the Project Road Adjacent to the Railway from that point where it intersects with the existing road from Sangmelima to Ouessou to Mbarga the Road Plan. The Road Agreement shall address the details of the Road Plan and other provisions regarding the Project Roads.

14.2 Rights to carry out the Road Operations

a b c The Parties acknowledge that the building of the Project Roads may be necessary for the purposes of the Project and where a Project Company is to build a Project Road then it shall do so at its cost and in accordance with the Project Road Specifications. Cam Iron shall have the right to carry out directly or through the Project Companies the Road Operations under this Convention and Project Agreements. As of the date when the Project Companies become a Party to this Convention in accordance with Article 6.4 the Project Companies shall have the right to carry out the Road Operations under this Convention and the Project Agreements. page 182

14.3 Purpose and intended use of the Project Roads

a b c d e The Project Roads shall be built specifically to allow for the construction and maintenance vehicles of a Project Company and its Contractors and Subcontractors to use the Project Roads during the construction of the Mainline Railway and Initial Spur Lines. Subject to the Reserved Rights and this Article 14 nothing in this Convention shall oblige Cam Iron or the Project Companies to grant access rights to the Project Road. It is expressly agreed that the Project Roads can be used by vehicles owned by, contracted to or licensed by a Project Company. The Parties agree that the Project Road Adjacent to the Railway the site plan of which is attached notably on the basis of the findings of the Environmental and Social Assessment and Management Plan shall until such time as the portions thereof shall become a Public Road pursuant to the Road Plan shall be built, commissioned and maintained by the Railway Project Company under the conditions set forth in the Railway Agreement. Cam Iron the Railway Project Company and the State undertake to comply with their respective obligations of reasonable cooperation to

ensure the commissioning of such applicable portions of the Project Road Adjacent to the Railway within the aforementioned deadlines. The issuance of a Finding of Compliance will materialize the commissioning of the portions of the Project Road Adjacent to the Railway which shall become a Public Road pursuant to the Road Plan. The State may issue reservations that the Project Road Adjacent to the Railway has not been constructed in accordance with the Project Road Specifications in which case such reservations shall be resolved prior to the commissioning of such applicable portion of the Project Road Adjacent to the Railway. The Railway Project Company will have a period of one hundred and twenty 120 Days to do the works such as to allow for the withdrawal of reservations and the commissioning period of such applicable portions of the Project Roads Adjacent to the Railway will be extended accordingly with no penalties to the Railway Project Company. In case of refusal of either of the Parties to sign the finding of Compliance the most diligent Party may, without prejudice make use of the Expert Procedure.

14.4 Use of a Project Road by the State

Through the exercise of its Reserved Rights including in the event of an emergency or for the purposes of national security the State may use a Project Road and where possible the State shall provide to the Railway Project Company advance notice of its intended use. The State shall also be permitted to use the Project Roads on a regular interference with Project basis subject to reasonable Operations. limitations preventing

14.5 Duration of Rights to Project Roads

Subject to the terms of any applicable Project Agreement and the Reserved Rights c.m.ru oorol b PProI fw oct RdcPfor as long as any Project Company is a party to the Railway Agreement or retains operatorship of the Railway Facilities or the Mineral Terminal Facilities or with respect to the applicable portions of Project Road Adjacent to Railway which shall become a Public Road pursuant to the Road Plan until such time as the construction of the Mainline Railway is complete and such Project Road is paved and becomes a Public Road. Except as set forth below on expiry of the term of the Railway Agreement the Project Roads other than the portions of the Project Road Adjacent to Railway that may have become Public Roads in accordance with the Road Plan and all Assets constituting automobiles spare parts maintenance and other support equipment owned by the

Railway Project Company will transfer to the State free and clear of all security interests liens and encumbrances and in good working condition and the Railway Project Company shall cause all such security interests liens and encumbrances to be removed prior to transfer. The foregoing transfer of the Project Roads shall not apply to the Project Roads located within the Exploitation Area which shall continue to be owned by the Mine Project Company upon the expiration of the Railway Agreement; provided that to the extent that the Project Road located within the Exploitation Area that runs along the portion of the Railway located within the Exploitation Area and is not being used by the Mine Project Company in connection with its Mining Operations such Project Road shall transfer to the State in accordance with the first sentence of this paragraph.

14.6 Access to Project Roads

a Without prejudice to Articles 14.3b and 18 to the extent required by the legislation on the Date of Entry into Force the Project Companies and their Contractors and Subcontractors are authorised to access the Project Roads for the purposes of transportation of the Sale Product the Goods and the Nabeba Goods and to facilitate the maintenance of the Railway Facilities in accordance with the terms of this Convention and the other Project Agreements. This authorization does not obligate the Project Companies to grant access which is addressed by separate agreements and is limited to any authorization required from the State under the Legislation. This authorization is limited to any authorization required from the State under the Legislation and is not a contract right to use the Project Roads.

b Subject to the Reserved Rights the Project Companies may close or limit the use of a Project Road as they see fit for maintenance or safety purposes and the State shall use its reasonable efforts obligation de moyens to do all things reasonably and appropriately necessary to assist and enforce such actions.

14.7 Public Roads

To the extent required by the Legislation Cam Iron 01e Project Companies Contractors and Subcontractors are authorised by the State to use all Public Roads subject to the Legislation and the State shall a b maintain the Public Roads being used for the Project to the standard appropriate to the classification of such road; and authorise Cam Iron the Project Companies their Contractors and Subcontractors to carry out whatever maintenance and strengthening pagol84 work on the Public Roads that is

appropriate in consultation with the State. 15 AERODROME The Parties acknowledge the significance of the Aerodrome to the Mining Operations. The Aerodrome is to be regulated by the Aerodrome Agreement which will address the location, object and use, authorizations, construction and operation, operation of air transport services, third party access, maintenance and other topics related to the Aerodrome and shall include, without limitation, provisions: a) granting the State, through the exercise of its Reserved Rights, including in the event of an emergency or for the purposes of national security, a right to use the Aerodrome; and requiring that the Aerodrome be operated in compliance with all Legislation applicable to privately operated aerodromes. 16

BLENDING OPERATIONS

16.1 Rights in the Blending Operations a) b) c) On the basis of the findings of the Feasibility Study, as reviewed and approved by the State, the Parties agree that in order to generate a higher return from the Project due to the higher levels of silica and other chemical characteristics of the Mbalam Ore contained within the Exploitation Area, the optimal upgrading of said ore could be reached by, in particular, Blending said ore with Nabeba Ore notwithstanding and without prejudice to the provisions of this Convention relating to the Beneficiation Operations. This Convention grants to Cam Iron the right to undertake the Blending Operations for the purposes of the Project. Cam Iron will permit the Mine Project Company to contract the Mineral Terminal Project Company to carry out all the Blending Operations in compliance with the provisions of this Convention, the Mineral Terminal Services Agreement, the Monitoring Agreement, Blending and the Blending Agreement. The Mineral Terminal Services Agreement and the Blending Agreement provide and set the framework of the conditions of conduct by the Mine Project Company of the Blending Operations within the Mineral Terminal Area.

16.2 Blending Operations rates The Mine Project Company shall pay to the Mineral Terminal Project Company compensation for the provision of blending services for the Mbalam Ore. This compensation will be described in the Mineral Terminal Services Agreement.

16.3 Relief from the State The State has satisfied itself that the Blending of the Mbalam Ore is appropriate and which the State is entitled to receive under the Convention and the Monitoring Agreement. Blending then the

State will not absent manifest need require a b any further specific technical information prior to the actual Blending of the Mbalam Ore with the Nabeba Ore; or the provision of any form of bank guarantee to cover the actual Blending of the Mbalam Ore with the Nabeba Ore.

17 MARKETING OPERATIONS AND TREASURY OPERATIONS

17.1 Marketing of Ore

The Parties will negotiate the Marketing Agreement and the Monitoring Agreement Marketing which shall collectively govern the marketing of Mbalam Ore and Blended Ore by the Marketing Company and which shall include provisions providing that all transactions involving Mbalam Ore and Blended Ore will be on terms and conditions that transparently pass the price paid less a logistic and financing fee of two and a half per cent 2.5 and an administrative fee of two and half per cent 2.5 for the Mbalam Ore. or the portion of Blended Ore that consists of Mbalam Ore back to the Mine Project Company in accordance with the provisions of the Marketing Agreement and subject to the Monitoring Agreement Marketing.

17.2 Offtake Agreements

Cam Iron covenants with the State that the Marketing Company shall enter into offtake agreements on Arm's Length Terms and if the Marketing Company agrees to sell any Product to a party that has a direct or indirect interest in the Project then the specifications for the Product that are incorporated into the offtake agreement shall not be set so as to reduce the value of the Product that is being sold to that offtake party. The Marketing Company shall act with transparency with respect to the commercial terms relating to all offtake agreements.

17.3 Right to Perform Treasury Operations

The Parties will negotiate the Treasury Agreement and the Monitoring Agreement Treasury which shall collectively govern the Treasury Operations by the Treasury Company.

18 CAPACITY AND CAPACITY EXPANSION

18.1 Initial Capacity

The Parties acknowledge that the Railway Facilities and Mineral Terminal Facilities are designed to be capable of handling the Design Capacity on Project Commissioning and, after ramp up will be capable of handling at least the Targeted Annual Production Capacity but that as a result of design construction or actual operations those facilities may be capable of initially handling more Tonnes than the Targeted Annual Production Capacity. Providing Expansion Capacity in an amount which together with the Initial Capacity achieves at least the Design Capacity constitutes a decisive

part of the Project.

18.2 Access Expansion Principles The Parties acknowledge that during the Term of the Project

- a the Project Company and Congo Iron may wish to increase their usage of the Railway haulage services and Mineral Terminal services beyond the Initial Capacity; Third Parties are to have a right to access the Railway Facilities and Mineral Terminal Facilities by way of provision by the Railway Project Company of Railway haulage services and by the Mineral Terminal Project Company of Mineral Terminal services; and
- c the Parties intend to use or offer to Third Parties services of the Railway and Mineral Terminal at least up to the Design Capacity, all of which may be made available in accordance with the provisions of this Article 18.

18.3 Expansion Stage

- a During Stage I ;
- i ii the Mineral Terminal Project Company is not obliged to provide any Mineral Terminal services to any person other than the Mine Project Company and Congo Iron; and the Railway Project Company is not obliged to provide any Railway haulage services to any person other than the Mine Project Company and Congo Iron.
- b Subject to the terms of this Article 18 during any Expansion Stage
- i ii c the Mineral Terminal Project Company may provide Mineral Terminal services to any person approved by the State; and the Railway Project Company may provide Railway haulage services to any person approved by the State.

A Project Company a Subsidiary a Shareholder or Third Party may fund an Expansion Stage by any method approved by the State including if mutually agreeable to the Parties by allowing such Project Company Subsidiary Shareholder or Third Party as the case may be to purchase equity in an Expansion Project Company.

18.4 Provision of Expansion Capacity Expansion Capacity may be provided to either

- n b the Mine Project Company Cam Iron or Congo Iron where that Expansion Capacity is part of the Reserve Expansion Capacity; or
- a Person other than a Project Company where the Expansion Project Companies are requested by the State to do so.

18.5 Reserve Expansion Capacity At all times after the conclusion of Stage I but prior to the tenth Anniversary of the end of Stage I not less than an aggregate of fifteen million 15000000 Tonnes per annum of Expansion Capacity as the same may be adjusted by mutual agreement pursuant to Article 11.3 is to be available on the Railway and Mineral Terminal respectively based on the initial design specifications

for achieving the Design Capacity which for clarification shall reflect any loss of capacity due to inefficiency created by any source for the Mine Project Company and Cam Iron on behalf of itself or Congo Iron to obtain Expansion Capacity for the Mba lam Ore and Nabeba Ore respectively over and above the Targeted Annual Production Capacity Reserve Expansion Capacity and this Reserve Expansion Capacity may be sought in one or more stages. The Mine Project Company and Cam Iron on behalf of itself or Congo Iron will have the right to request Expansion Capacity beyond the Reserve Expansion Capacity on the same terms as other Third Parties in accordance with this Article 18. The State will not give Expansion Directives to authorize the creation of Expansion Capacity that would prevent Expansion Capacity from being available for Reserve Expansion Capacity which the Mine Project Company and Cam Iron on behalf of itself or Congo Iron have a right to request pursuant to this Convention. For avoidance of doubt the rights of Mine Project Company and Cam Iron on behalf of Congo Iron to Reserve Expansion Capacity may not be assigned without the consent of the State in its sole discretion.

18.6 Submission of a Services Application The State has the right to determine which Third Parties may submit a Services Application and the Mine Project Company and Cam Iron on behalf of itself or Congo Iron may submit a Services Application for the Reserve Expansion Capacity without prior State approval. At any time following the end of Stage I a Third Party with State approval and the Mine Project Company or Cam Iron on behalf of itself or Congo Iron may submit a Services Application. The Services Application shall be delivered to the State the Expansion Committee and the Expansion Project Companies. Any original amended or cancelled Services Application received by any one of the Expansion Project Companies must be forwarded to the State as is. The Expansion Project Companies shall provide any potential applicant with the information necessary to submit a Services Application and assist applicants in preparing a Services Application.

18.7 Services Application Windows a b The Parties acknowledge that the Expansion Project Companies ability to offer Expansion Capacity may be subject to restrictions contained in the Finance Documents. The Expansion Project Companies must invite by notice published in the national newspaper in the territory of the State the submission

of Services Applications on at least one occasion in each two 2 year period the first such period is to commence within the two 2 year period following the expiration of Stage I and all Services Applications howsoever received shall be considered within two 2 months of the closing date of that invitation. The Expansion Project Companies may organize the time periods for submission of Services Applications into distinct windows to allow applicants to gain greater economic efficiency by creating Expansion Capacity in larger amounts rather than several smaller amounts but shall nonetheless be required to consider all reasonable Services Applications within a reasonable amount of time from when received if not received in a specified window. The Expansion Committee shall be consulted on the timing of applications and application windows. page 88 18.8 of a Services Application A Services Application must a be submitted in writing to the relevant Expansion Project Companies; and b contain the following information i the full name and registration details of the applicant; ii the ownership structure of the applicant and the applicants project; iii a general description of the applicants project; iv the status of the applicants project feasibility study; v the status of all statutory and regulatory approvals required to be obtained in respect of the applicant s project; vi the type of iron ore product to be produced by the applicant; vii the applicants current resource and reserve definition; viii the applicant s planned production profile being estimated tonnage of product produced per annum including ramp up and the duration of the proposed use of Railway haulage or Mineral Terminal services being applied for ix the applicants infrastructure requirements including requirements for A B the Mineral Terminal Project Company to provide Mineral Terminal services; and the Railway Project Company to provide Railway haulage services to the applicant; x a timetable for the construction commissioning and operation of the applicants project; xi details of the applicants proposed project financing; xii reasonably requested financial information; xiii an overview of any negative impact on environmental geological and societal conditions and mitigation measures; xiv xv v such other information as the Expansion Committee Expansion Project Companies or Ute State may reasonably request; and details of any assistance which the State has indicated it will be providing to the applicant. page 89 18.9 Single

Services Application In the event an applicant only requires either the Mineral Terminal services or the Railway haulage services then its Services Application should make this clear.

18.10 Completeness Review of Services Application a b c All Services Applications shall be submitted to the Feasibility Expert for a determination as to whether such Services Application is complete and sufficient to proceed with a Services Feasibility Study. If the Feasibility Expert determines that a Services Application is incomplete it shall advise the Expansion Committee of such deficiencies and the Expansion Committee shall notify the applicant and identify to the applicant the deficiencies in the Services Application. If an applicant receives a notice of the type referred to in Article 18.1 Ob then it must amend the Services Application within thirty 30 Days of its original submission otherwise it will be deemed that the applicant wishes to cancel its Services Application. On receipt of the amended Services Application the provisions of Article 18.1 Oa will apply.

18.11 Amendment or withdrawal of a Services Application An applicant may amend or withdraw its Services Application by notice in writing to the Expansion Committee at any time.

18.12 Review of a Services Application

18.12.1 Principle Other than for the provisions of this Convention applicable to the Project and the Naboba Project the possibility for anyone to use the Mineral Terminal Facilities or the Railway Facilities for the purposes of transportation routing storage vessel loading export and import of any products is expressly and strictly subject to the explicit prior authorization of the State.

18.12.2 Terms and Conditions applicable to the Review of the Services Application a b On receipt of the Services Application which substantially conforms to the requirements of Article 18.8 the Expansion Committee shall conduct the review process with respect to the Services Application. If the Services Application is substantially nonconforming then the Expansion Committee shall provide a written response to the applicant explaining the areas of nonconformance with a copy to be provided to the State. c The Expansion Committee shall consider the Services Application and i by unanimous instruction of the Cam Iron Representative and the State Representative a Services Application may be rejected; and ii by the instruction of the State Representative the Expansion Committee may direct that a Services Feasibility Study be prepared in accordance with the provisions of this

Article 18 based on the Services Application as well as provide any additional information required by the State at that time as U1e case may be. 18. 13 Conduct of a Services Feasibility Study

18.13.1 Identification of a Feasibility Expen. a The State and Cam Iron shall attempt to agree prior to the end of Stage 1 on a mutually acceptable independent expen which may be a group of experts or finus Fea sibility Expert to conduct completeness reviews of Services Applications pursuant to Article 18.10 and feasibility studies regarding requests for Expansion Capacity. If the State and Cam Iron have not agreed on a Feasibility Expert prior to the time the first Services Appjcation is submitted the State and Cam Iron shall each identifY an independent expert wiU1in sixty 60 Days of submission of the Services Application and the two independent experts will choose a third independent expert who shall be the Feasibility Expert. If a Party fails to identifY an independent expert the expert appointed by the other Party shall select the Feasibility Expert. Each of the State and Cam Iron may from time to time demand the removal of the Feasibility Expert provided that the Feasibility Expert shall complete any Services Feasibility Studies then in progress. Upon a demand for removal of the Feasibility Expert the State and Cam Iron shall attempt to identifY a mutually acceptable replacement Feasibility Expert but if they are unable to do so within one hundred and twenty 120 Days of the demand for removal then the procedures set forth in the second and third sentence of tbis paragraph shall apply with respect to the selection of the replacement Feasibility Expert. b If directed by the Expansion Committee the Feasibility Expert shall promptly commence the Services Feasibility Study and shall complete and send the Services Feasibility Study to the State within a reasonable time frame from the date of receipt of s uch direction having regard to the scope of work to be undertaken to produce the Services Feasibility Study. 18.13.2 Conduct of Services Feasibility Study. a b Upon instruction of the State the Feasibility Expert shall within a reasonable time frame complete and send a copy of the Services Feasibility Study to one or more of the Expansion Committee fue Expansion Project Companies the State and fue applicant for Expansion Capacity. The Feasibility Expert shall establish a process acceptable to the Expansion Committee the Expansion Project Companies and the State in their reasonable discretion for the

Project Companies the applicant for Expansion Capacity and the State to provide input and comments on the Services Feasibility Study which the Feasibility Expert may consider but is not required to accept. c If the Feasibility Expert is of the opinion that two or more Services Applications page 91 i ii are complementary the Feasibility Expert may conduct or cause to be conducted a single Services feasibility Study in relation to those Services Applications; or are not complementary the Feasibility Expert may conduct or cause to be conducted separate Services Feasibility Studies in relation to those Services Applications. d Based on Legislation but subject to any additional requests made by the State any Services Feasibility Study required in accordance with the provisions of this Article 18.13 must in particular i ii require an indepth review of the information provided by the applicant in its Services Application to determine including any anticipated delays and disruptions of the provision of Mineral Terminal services and Railway haulage services to the applicant on impact A B C D E f G H I the Mineral Terminal Operations including with respect to the Environment efficiency reliability and safety; the Mineral Terminal capital and operating costs payable by the applicant existing users of the Mineral Terminal and the Mineral Terminal Project Company; the Railway Operations. including with respect to the Environment efficiency reliability and safety; the Railway capital and operating costs payable by the applicant existing users of the Railway and the Railway Project Company; the obligations of the Mineral Terminal Project Company to existing users of the Mineral Terminal; the obligations of the Railway Project Company to existing users of the Railway; the legitimate business and commercial interests of the Expansion Project Companies; whether the requested Expansion Capacity will result in an increase to the aggregate tariffs paid by an existing user of the Railway and Mineral Terminal if there is no such increase then such determination shall be referred to as a Positive Economic Feasibility Determination; and then nominal impact other whether the requested Expansion Capacity will result in any adverse the Environment efficiency reliability and safety of the Railway Operations and Mineral Terminal Operations which shall include whether any proposed physical collateral of rolling stock or other movable assets operated by the Expansion Project Companies for the benefit of all users and

securing impacts on page 92 the financing for such requested Expansion Capacity could upon default thereunder reasonably be expected to result in a material adverse impact on the overall Railway and Mineral Terminal system or the loss of capacity for existing users if there is no such adverse impact or loss of capacity then such determination shall be referred to as a Positive Technical Feasibility Determination; iii identify any additional land over which an Expansion Project Company may need to obtain a Project Lease in order to ensure that company has security or title to the surface area of the land on which the Railway Facility or the Mineral Terminal Facility may need to be expanded onto in order to allow for the construction and operation of the Expansion Capacity; iv identify the statutory and regulatory approvals required to be obtained by the applicant and A B the Mineral Terminal Project Company for the provision of Mineral Terminal services; and the Railway Project Company for the provision of Railway haulage services; v review the applicant's financial capacity to fund the construction of any additional Railway Facility or Mineral Terminal Facility infrastructure and meet its obligations under the anticipated service agreement with respect to provision of each of A the Mineral Terminal services; and B the Railway haulage services to the applicant; vi review the financial capacity of the Mineral Terminal Project Company to finance the supply of Mineral Terminal services to the applicant; vii review the financial capacity of the Railway Project Company to finance the supply of Railway haulage services to the applicant; viii review current environmental geological and social conditions and analyse the expected impact on the same of the proposed services including with respect to noise pollution water use and availability endangered species archaeological remains nuisance and job creation; ix identify the applicant's lenders requirements in the context of the supply of A the Mineral Terminal services; and B the Railway haulage services v page 93 to the applicant; x make recommendations on each of the elements described above in Article 18.13.2d in order to contribute to the acceptance of the Service Application.; and xi include a reasonable timetable and deadlines for completing the works required to create the Expansion Capacity. e f g The outside expenses of conducting the Services Feasibility Study must be borne solely by the applicant including the cost of engaging the Feasibility Expert and the applicant shall

reimburse the reasonable expenses incurred by Cam Iron the Expansion Project Companies and the Expansion Committee. If a single Services feasibility Study is conducted in relation to more than one Services Application the costs of conducting that Services Feasibility Study must be apportioned between the applicants as the Feasibility Expert determines. The State shall provide information regarding the portion of the tariff allocated exclusively to it to allow completion of the Services Feasibility Study.

18.14 Outcome of a Services Feasibility Study a The State may deliver a notice an Expansion Directive to the Project Companies instructing them to proceed with the acceptance and implementation of a request for Expansion Capacity if i ii there has been a Positive Economic Feasibility Determination and Positive Technical Feasibility Determination; or there has been a Positive Technical Feasibility Determination but not a Positive Economic Feasibility Determination and the applicant for Expansion Capacity agrees to indemnify and provide reasonable security to existing users to the extent reasonably required by the users for the net amount of increased tariffs as a result of the requested Expansion Capacity. b c d If as a result of a Services Feasibility Study or any updated Services Feasibility Study there has not been a Positive Economic Feasibility Determination or a Positive Technical Feasibility Determination the applicant may make changes to its Services Application and with the approval of the State the Feasibility Expert shall prepare an updated Services Feasibility Study at the expense of the applicant. If the updated Services Feasibility Study would then allow the State to deliver an Expansion Directive pursuant to Article 18.14a then the State may deliver an Expansion Directive based on the updated Services Feasibility Study. An applicant may make multiple revised Services Applications including if a Services Application does not result in a Positive Technical Feasibility Determination and may with the approval of the State have multiple Services Feasibility Studies performed in respect of such revised Services Applications. d The State shall deliver an Expansion Directive if there has been a Positive Technical Feasibility Determination and a Positive Economic Feasibility Determination and the request is from the Mine Project Company and Cam Iron on behalf of itself or Congo Iron for Reserve Expansion Capacity pursuant to an application compliant with Article 18.8. e

If the Expansion Project Companies receive an Expansion Directive or decide to offer the applicant a Mineral Terminal Service Agreement and a Railway Haulage Agreement then i ii the Expansion Project Companies shall provide a form of Mineral Terminal Services Agreement and Railway Haulage Agreement which shall be based on the terms and conditions set forth in the applicable Mineral Terminal Services Agreement and Railway Haulage Agreement to which the Mine Project Company is a party; to the extent the applicant requests material changes to the proposed form of Mineral Terminal Service Agreement and Railway Haulage Agreement which are not acceptable to the Expansion Project then the Expansion Project Companies shall as Companies applicable submit to the Expansion Committee for resolution the details of the material changes being requested by the applicant which are not acceptable to the Expansion Project Companies and shall then negotiate with the applicant on the basis of changes determined by the Expansion Committee; and iii the Railway Project Company shall enter into the final Railway Haulage Agreement with the applicant and the Mineral Terminal Project Company shall enter into the final Mineral Terminal Services Agreement with the applicant. t [f requested the Expansion Capacity would result in the loss of future Expansion Capacity due to an inefficient use of resources or design the Expansion Project Companies and Expansion Committee may raise such concerns with the State for evaluation in the State's decision whether to authorize the requested Expansion Capacity. 18.15 Construction of Expansion Capacity a The State acknowledges that notwithstanding having requested that a Third Party be provided with Expansion Capacity or consented to the creation of Expansion Capacity after the completion of a Services Feasibility Study the Expansion Project Companies are not required to incur any additional capital expenditure in connection with the construction of such Expansion Capacity although they may in their sole discretion elect to do so in which case they shall advise the State and the applicant of this. b The applicant may itself construct or negotiate with the Expansion Project Companies or third parties to construct the Expansion Project. Regardless of who is constructing the Expansion Project the applicant and the Expansion Project Companies shall cooperate and agree on a plan including a completion certificate regarding design construction

and commissioning consistent with the Services Application and Services Feasibility Study that minimizes to the extent reasonably possible the disruption the construction causes to the existing users and addresses any detailed specifications for construction and commissioning not specified in the Services Application and Services Feasibility Study that are necessary to integrate the Expansion Project and existing assets. Any disputes between the Expansion Project Companies and applicant shall be settled pursuant to the procedures set forth in the Technical Dispute Resolution Agreement and, in connection with the issuance of an Expansion Directive the applicant shall be required to enter into an agreement agreeing to be bound by the procedures set forth in the Technical Dispute Resolution Agreement.

18.16 Ownership of the Assets used to create the Expansion Capacity Notwithstanding that the user of the Expansion Capacity may provide the funding to create that Expansion Capacity all assets, be they fixed or moveable that will be owned by an Expansion Project Company pursuant to the financing plan shall belong to the Expansion Project Company that is incorporating those assets into its operation and at the time of designing the works each Expansion Project Company must advise the user which of the assets will be fixed and which will be moveable having regard to accounting standards applicable to the operations of the Expansion Project Companies.

18.17 Tariffs The Rail Project Agreement and the Mineral Terminal Agreement will address the tariffs to be charged to all users of the Railway Facilities and Mineral Terminal Facilities respectively. These tariffs will substantially incorporate the Tariff Frameworks and for the users of Expansion Capacity including for any Reserve Expansion Capacity will include a b the additional base charge which is to be allocated i seventyfive percent 75 to the State and twentyfive percent 25 to the Rail Project Company or Mineral Terminal Project Company so long as the Rail Project Company or Mineral Terminal Project Company is operator of the Railway and Mineral Terminal as the case may be and ii one hundred percent 100 to the State A if the Rail Project Company or Mineral Terminal Company is no longer the operator or B if the length of the original twenty five 25 year term of the concession under the Railway Agreement and Mineral Terminal Agreement is extended for five 5 years pursuant to Article I 0.9.2a; and an additional State

charge determined by the State which shall be allocated and paid exclusively to the State notwithstanding such amount being collected by the Expansion Project Companies; provided that there shall be no such additional State charge on any Reserve Expansion Capacity.

18.18 Security for Third Party Funding Subject to Article 18.13.2dii a Third Party or its financier that is providing capital to fund the construction of any Expansion Capacity may call upon the Expansion Project Company if through the provision of capital an Expansion Project Company will own or operate assets used as collateral for the financing of the Expansion Capacity to provide reasonable security in favour of the applicant or its financier provided any such security does not create unreasonable credit risk or to be over assets other than those being acquired by the Expansion Project Company in order to create the Expansion Cap and the Expansion Project Company and subject to Lender approval such party shall enter into an agreement on reasonable terms for such security.

18.19 Mineral Terminal Agreement and Railway Haulage Agreement Without limiting the effect of Article 18.14e each Expansion Contract which is offered to an applicant shall contain reasonable customary terms substantially in accordance with the terms of the Railway Haulage Agreement and the Mineral Terminal Services Agreement in each case other than with regards to the duration and the tariff components described in Article 18.17 and the Expansion Project Companies shall cooperate with the State to develop prior to the end of Stage I a form of contract to be proposed to the applicant. These terms of any such Mineral Terminal Services Agreement and Railway Haulage Agreement may include if reasonable in the context amongst other things a appropriate take or pay terms; b c the applicants maximum entitlement to capacity; conditions precedent to provision of the services; d obligations of the Expansion Project Companies to provide services; e f g h i j obligations of the applicant to use the services; the apportionment of risk between the applicant and the Expansion Project Companies; the time for commencement of the services the term for which the services may be provided; the charges that will apply to the services integration infrastructure required for the provision of the services to the applicant; k performance targets and key performance indicators; l stockpiling arrangements; m planning and scheduling of services; n

changes in services; o p q provisions giving effect to the matters referred to in Article 18.14; ownership of facilities and infrastructure; and from and mitigation of any negative impact limitations on and v page 197 environmental and geological effects on the Exploitation Area or other relevant areas. Nothing in the contract must result in any existing user of services from either Expansion Company having to a b c receive a lesser service more than a de minimis degradation than that being enjoyed by them at that time; provided that moving from a run when ready or similar system appropriate for a single user to a system appropriate for multiple users and any resulting changes shaU not be a violation of this requirement; pay a higher tariff in more than a de minimis amount than that being paid by them at that time and pay any capital in more than a de minimis amount over and above that paid at that time or to be paid by way of Sustaining Capital. 18.20 T hird P arty Access Facilities a If during the ferro of the Project the State the Mineral Terminal Project Company. the Railway Project Company or a Third Party wishes to build or procure the building of any Third Party Facility then tbe State the Thlrd Party if applicable the Mineral Term.inal Project Company and the Railway Project Company shall come together in order to agree upon the conditions under whicb this Third Party Facility shall be built by either the Mineral Terminal Project Company or the Railway Project Company in the context of either i ii iii the Railway Agreement andor the Project Lease relating to the Railway or Project Roads; the Mineral Terminal Agreement andor as the case may be the Project Lease relating to the Mineral Terminal; and an Additional Specific Agreement and as the case may be a new Project Lease which shall at the minimum include the obligations as U1e case may be of the Railway Project Company concerning the Railway Facilities and the Project Roads or of the Mineral Terminal Project Company concerning U1e Mineral Terminal Facilities as provided in this Convention provided that if such request is made by U1e Railway Project Company or the Mineral Tem1inal Project Company the latter shall file an Additional Facility request under the conditions set torth in Article 19.1. b For the avoidance of doubt unless U1e Parties otherwise agree the building and maintenance of any Third Party Facility pursuant to this Article 18 shall not constitute a Railway Operation a Road Operation or a Mineral Terminal Operation within the

meaning of this Convention. 18.21 Cooperation. The Project Companies shall use their reasonable efforts to cooperate with and assist the Feasibility Expert and applicant in the preparation of a Services Application page 198 preparation of a Services Feasibility Study and other matters related to Expansion Capacity. 18.22 Expansion Committee 18.22.1 Creation of the Expansion Committee An Expansion Committee shall be set up for the Project. To facilitate the fulfilment of its function and the process of requests for Expansion Capacity the Expansion Committee may delegate any of its functions and roles to an Expansion Project Company from time to time. 18.22.2 Composition of the Expansion Committee a The Expansion Committee shall be composed of nine 9 members or another number determined by mutual agreement of the State and Expansion Project Companies i ii Cam Iron shall have four 4 members each assisted by an alternate appointed by the Expansion Project Companies during the Term of the Project and among whom Cam Iron shall designate a principal representative the Cam Iron Representative; and the State shall have five 5 members each assisted by an alternate and among whom the State shall elect a principal representative the State Representative. b c The alternates appointed by the Expansion Project Companies or the State shall act only in case a Cam Iron Representative or the State Representative respectively is unavailable. Each Party is entitled to replace its representatives or alternates at any time by giving written notice to the other Party of such replacement. to take part The State and Cam Iron may arrange for a reasonable number of their respective personnel in meetings of the Expansion Committee. However only the persons appointed as the Cam Iron Representative or the State Representative or in their absence their alternates shall have a right to vote on the Expansion Committee. Each Representative or in the absence his or her alternate representative shall have one 1 vote and shall be deemed to be authorized to represent and to bind the Party that appointed it on any subject within the competence of the Expansion Committee. Any person attending the meetings of the Expansion Committee shall be under a strict obligation of confidentiality with regard to the discussions the questions raised and the information disclosed. Nevertheless the Cam Iron Representative and the State Representative shall have the right to debrief their respective

principals and advisors on the discussions and questions raised. Disclosure of confidential information as required by the Legislation or other applicable law shall not be a violation of this restriction to the extent it involves any information that i is or becomes generally available to the public or in the industry other than as a result of a disclosure by the recipient in breach of this Convention ii was within the possession of the recipient or the Party with which it is affiliated prior to its being furnished to the recipient provided that the source of such information was not bound by a confidentiality agreement with or other contractual legal or fiduciary obligation of confidentiality to the provider with respect to such information iii is or becomes available to the recipient or the Party with which it is affiliated on a nonconfidential basis from a source other than the provider provided that such source is not bound by a confidentiality agreement with or other contractual legal or fiduciary obligation of confidentiality to the provider with respect to such information or iv was independently developed by such disclosing party.

18.22.3 Competence of the Expansion Committee

a The Expansion Committee shall have the roles rights and obligations set forth in the Project Agreements and shall also serve as a forum for discussing and coordinating expansion in general. Without limitation the Expansion Committee i is to be provided with a draft of the Services Feasibility Study for comment prior to it being released; ii is to review and provide comment on any Services Application. b The Expansion Committee examines all proposals seeking access to the Mineral Terminal Facilities and the Railway Facilities. Within this framework the Expansion Committee i reviews and provides any comments on A any approach to the State by a Third Party for a right of access to the Railway Facilities and the Mineral Terminal Facilities; and B any Services Application. ii is to be consulted by the State prior to the State giving notice to the Expansion Project Companies that it wishes them to conduct a Services Feasibility Study; iii is to meet to make a recommendation on any Services Application; iv v is to be provided with a draft of the Services Feasibility Study for comment prior to it being released to the Third Party; and is to consider any other matter with respect to accessing the Mineral Terminal Facilities or the Railway Facilities. c Each Expansion Project Company is to submit to the Expansion Committee i any

Services Application it receives; and ii any other matter associated with an Expansion Project Company giving consideration to granting of access to the Railway Facilities or the Mineral Temunal Facilities. d The members of the Expansion Committee shall consult one another on page 100] the matters submitted to them in order to reach a unanimous decision. When a matter is not decided unanimously during a meeting of the Expansion Committee the examination of such matter shall be postponed to a subsequent meeting of the Expansion Committee which shall take place as convened by Cam Iron at least ten (10) but not more than forty five (45) Days following the date of the first meeting. During this period the Parties shall meet and Cam Iron shall provide all information and details as may be required by the State in its capacity as a member of the Expansion Committee. If during the subsequent meeting the members of the Expansion Committee do not reach an agreement on the decision to be made a decision may be taken by a vote of a majority of the total number of members of the Expansion Committee. e The Expansion Project Companies will keep the Expansion Committee informed of all communications with applicants.

18.22.4 Meetings of the Expansion Committee

a b c The Expansion Committee shall meet at any time at the request of the State Representative or the Cam Iron Representative. Notices of meetings of the Expansion Committee will be sent in writing to the members thereof by the Party that took the initiative for the meeting at least fifteen (15) Days before the anticipated date of the meeting. Every notice of meeting shall contain an indication of the date time and place of the planned meeting and the intended purpose. Meetings of the Expansion Committee will be held in Yaounde Cameroon or another location agreed to by the Cam Iron Representative and the State Representative. When a Party takes the initiative to call a meeting it shall provide the other Party before the anticipated date of the meeting with all the items of information necessary for the taking of decisions at the meeting. Each of the Cam Iron Representative and the State Representative shall be entitled to add subjects to the agenda subject to giving written notice thereof to the other representative before the anticipated date of the meeting. No decision may be taken at a meeting of the Expansion Committee on a subject that has not been included on the agenda for the meeting in advance unless a unanimous

decision to the contrary is taken by the Cam Iron Representative and the State Representative.

18.22.5 Subcommittee The activities of the Expansion Committee may be referred to a subcommittee. 18.22.6 Chairing and secretariat Meetings of the Expansion Committee will be

chaired by the State Representative. The Cam Iron Representative will act as secretary and a member of the Expansion Committee appointed by the State will act as deputy secretary. 18.22.7

Minutes The secretary and the deputy secretary shall prepare written minutes of each meeting and shall send a copy thereof to the State Representative and the Cam Iron v page 1101 Representative following the meeting for approval or comments and the State and Cam Iron representatives will respond to the comments of the other Party s representatives within a reasonable time period.

18.22.8 Decision without meeting a Any question may be submitted to the Expansion Conunittee for a decision without giving rise to a formal meeting of the Expansion Committee on the condition that the Pany taking this initiative transmits the question to the other Pany in writing. In this even each of the Cam Iron Representative and the State Representative must inform the other of its vote within ten 10 Days of receipt of the said question. The absence of a response from either the Cam Iron Representative or the State Representative on the question under discussion shall be deemed to represent a negative vote. b Any decision adopted by the Cam Iron Representative and the State Representative according to the terms and conditions provided by Article l8.22.8a shall have the same value as a decision adopted in the context of a formal meeting of the Expansion Committee.

18.22.9 Funding of Expansion Committee a The budget of the Expansion Committee shall be prepared in accordance with Article 18.22.9b. The Expansion Project Companies shall pay the costs of its members and advisors to the extent provided in the budget the members may bring additional advisors at the expense of the member to attend meetings of the Expansion Committee but all other actual costs shall be divided equally amongst the Railway Project Company and the Mineral Terminal Project Company. The Panies shall agree on a medtod for paying a per diem amount to the Expansion Committee members. The Parties will also provide for the completion of any docwnents necessary for the Project Companies and their parent companies as the case may be to

comply with applicable provisions of Australian legislation regarding such payments. b At least fortyfive 45 Days prior to the beginning of each Calendar Year Cam Iron shall in consultation with the State send to the State a proposal for funding the Expansion Committee for the following Calendar Year on the basis of the estimated operational costs including the daily compensation of the State Representatives. c The State within fortyfive 45 Days following receipt of the aforementioned proposal shall i accept this proposal; or ii provide its comments and recommendations to Cam Iron. d e In case of the State s failure to respond within the aforementioned period the State shall be deemed to have accepted the proposal. In case of a disagreement between the State and Cam Iron the Parties undertake to seek an agreement on the funding of the Expansion Committee. In the absence of an amicable settlement within sixty 60 pageJ102 Days following receipt of the States comments and recommendations the amount of the Expansion Committees budget for the contemplated Calendar Year shall be equal to the higher of i the sum of one hundred percent 100 of the prior Calendar Years budget plus the Inflation Adjustment or ii the amount proposed by Cam Iron. f The Mine Project Company shall fund the approved budget of the Expansion Committee. 19 OTHER FACILITIES 19.1 Other Facilities a b the The Parties acknowledge implementation and that during development of the Project the building of facilities other than the Mining Facilities Railway Facilities Mineral Terminal Facilities and Beneficiation Facility may prove necessary either for the purposes of the Project or for the needs of Third Parties entitled to access the Railway Facilities and/or Mineral Terminal Facilities under the conditions set forth in this Convention. If the entity expressing the wish to build a new facility for the purposes of the Project is a Project Company the latter will have to provide the State with a written request for a new facility indicating to the extent appropriate or required by the Legislation i ii iii to what extent the building of the requested facility satisfies a need of the Project that cannot be met by the Project Facilities or other existing facilities in the territory of the State; and timetable the practical arrangements including the base area layout design commencement development materials construction layout and completion of said new facility determined on the basis of studies conducted

by a Subsidiary Contractor or Subcontractor; as well as the impact on the Project in terms of deadlines costs and profits; for the site plan of the requested facility and in particular whether it can be connected to the Exploitation Area the Railway Area or the Mineral Terminal Area and be the subject of an amendment to the relevant Specific Agreement; or on the contrary where it requires the delivery of a Project Lease or the conclusion of an Additional Specific Agreement; iv an environmental and social assessment and management plan specific to the requested facility and to the site plan of said facility substantially in the form of the Environmental and Social Assessment and Management Plan; v a Project Lease Request a draft Additional Specific Agreement or a draft amendment to an existing Specific Agreement; vi the identity of A the Project Company in charge of building the requested facility; and B the Contractors and Subcontractors contemplated by the tender or prequalified as the case may be for the design construction operation and maintenance of the requested facility; vii whether the exclusive purpose of the requested facility is to meet the needs of one or more Project Company or Project Companies or whether Third Party access may be technically envisaged without materially changing the data referred to in Article 19.1 b ii; and viii whether the operation of the requested facility being a facility that does not form part of any Expansion Capacity it allows for the generation of additional income the Additional Facility Request. c d e The requirements of Article 19.1b to provide the State with an Additional Facility Request will not apply where the costs associated with the construction of this facility and with making the facility and any related equipment operational does not exceed a total cost of twenty million 20000000 US Dollars adjusted by the Inflation Adjustment; provided that such Additional Facility Request must comply with the Environmental and Social Assessment and Management Plan as the same may be updated to address the impact of the requested facility. Any request for the construction of an additional facility formulated by a Third Party and sent to a Project Company must immediately be notified to the State. The State within the deadlines prescribed by the Legislation or failing this within one hundred eighty 180 Days following the receipt of the Additional Facility Request shall i ii provide its comments and recommendations to the Project Company that

made the Additional Facility Request; or dismiss the Additional Facility Request subject to such dismissal being justified by one or more of the following reasons A the needs justifying the building of the requested additional facility can be met by an existing Project Facility or another preexisting facility; B failure to comply with the Legislation; C material violation of any Project Agreements by a Project Company Contractor or Subcontractor over the trailing twentyfour 24 month period or the occurrence of five 5 or more breaches over the same such period which in the aggregate have a Material Adverse Effect; D if the said request does not materially comply with the practices generally accepted for highscale international iron . . . r pagef104 ore exploitation projects; or E said request does not comply with the States material interests and standards with respect to environmental or social poiJcies or other reasonable considerations. f Within the one hundred and eighty 180 Days following the date of receipt of the States comments and recommendations the Project Company that made the Additional Facility Request shall i ii iii supplement the Additional Facility Request to take into account the States comments and recommendations provided that they arc justified from a technical andor economical standpoim under the Legislation; prepare a draft Project Lease a draft Additional Specific Agreement or a draft amendment to the applicable Specific Agreement; and provide all s uch doclllnentation to the State together with any other infonnation as may be reasonably required by the State. g Unless the State dismisses the reques t under the same conditions as those set forth in Article 19.1eii the State shall authorise the building of the requested additional facility and i ii enter with the Project Company that made the Additional Facility Request into a Project Lease or an Additional Specific Agreement in accordance with the provisions of Article 20 or as the case may be an amendment to the applicable Specific Agreement; and consider in good fuith and not unreasonably withhold its consent to any applications in compliance with the Legislation for any Project Company of any other necessary permit authorisation or administrative document according to the Legislation to validly authorise the Project Company that made the Additional Facility Request to build the requested Additional Facility together the Additional Facility Authorisation. b i The State and the relevant Project Company shall use their reasonable

endeavours for the Additional Facility Authorisation to be delivered within the deadlines prescribed by the Legislation or failing this within one hundred eighty 180 Days following the date of receipt by the State of the revised and finalized file containing the Additional Facility Request. If the Additional Facility Authorisation could not be delivered for the Beneficiation Power Station due to a refusal of the State in accordance with Article 19.1 eiiC and the State considers at its sole discretion that the building of said facility is of particular significance for the needs of the local or national economy the State may i freely organise a public offering in compliance with the World Bank standards for the financing construction maintenance and operation of the Beneficiation Power Station on the basis of all the rights page 105 equivalent to those covered by an Additional Facility Authorisation and Articles I 0.3 and I 0.4 with a view to building said facility and provided that the service offering issued for the building of said facility generally is substantially similar in substance to the service offering that would have been issued for the facility initially requested by a Project Company; and ii the Suite and Cam subject to the successful bidder agreeing to supply the said services by the BF Construction Deadline or such earlier date as mutually agreed and paying damages agreed by commensurate with estimated losses to the Mine Project Company if it fails to provide the timely supply of the power compel the Mine Project Company requiring the power for the purposes of the Beneficiation Facility to enter into any agreement with the successful bidder in the context of the aforementioned public offering under conditions better than when accessed by the Mine Project Company or identical to those set forth in the Additional Facility Request. j Where the building of any additional facility has been the subject of a Project Lease an Additional Specific Agreement or an amendment to the applicable Specific Agreement this additional facility shall become a Project Facility and the legal regime applicable to the Assets comprising said additional facility the maintenance and repair obligations and as the case may be third Party access shall be treated in accordance with the provisions of this Convention applicable to the Project Facilities as supplemented as the case may be in the Project Lease. the Additional Specific Agreement or in the amendment to the existing Specific Agreement. 19.2 Existing Facilities a b c Subject to the approval

of the State and of all relevant third Parties the relevant Project Companies may instead of constructing additional facilities use all existing facilities under conditions mutually agreed between the Parties. Where such infrastructure is operated by a public entity or a semipublic entity Controlled by a Governmental Entity the State undertakes to reasonably facilitate the conclusion of the necessary agreements between the operator and the relevant Project Company. As the case may be the relevant Project Company may if it considers it appropriate, upgrade and maintain and repair any of the existing facilities which it uses and for these purposes the relevant Project Companies may become the exclusive manager or operator under conditions mutually agreed between the Parties in accordance with Article 19.2a. The Parties shall indemnify and hold each other harmless against all third party liability and damages to each Party's property except to the extent that such damage or liability is the fault of such Party or any Contractor or Subcontractor hired by such Party.

19.3 Hydrocarbon Facility a The Parties acknowledge that the Project Companies will be a very significant consumers of hydrocarbon products in the conduct of the Project Operations and that for that purpose the Mineral Terminal Project Company will need to establish or cause to be established at the Mineral Terminal a hydrocarbon facility which is suitable for the import storage and distribution of hydrocarbon products in compliance with the Legislation. b In developing the Mineral Terminal Facilities, the Mineral Terminal Project Company will develop or engage a Contractor to develop a hydrocarbon facility to meet the requirements of the Project Operations referred to in Article 19.3a and as part of its commitment to the State the Project Companies agree to work with the State to see how the hydrocarbon facility and the Mineral Terminal can be designed and developed to provide a capacity beyond the needs of the Project so as to support the hydrocarbon demand of the region around the Mineral Terminal Facility and without limitation the Mineral Terminal Project Company will i ii assist in the assessment of the regional demand for hydrocarbon products; in conjunction with a Contractor design a hydrocarbon facility which is sufficient to meet the requirements of both the Project and more broadly the region; iii work with the State to determine how best to integrate the requirements of the Project with the forecast

requirements of the region so as to use the Projects hydrocarbon demand as the catalyst for the development of a hydrocarbon facility which can support the requirements of the region; iv work with the State to develop a finding plan for the proposed hydrocarbon facility; and v use its proposed hydrocarbon product buying power to support or attract the involvement of a fuel supply and distributor to assist in the development of the hydrocarbon facility it being understood that the development and operation of such a hydrocarbon facility is not intended to adversely impact on the vi economics of the Project and in particular the tax and excise concessions on hydrocarbon products; vii occupation health and safety of the Mineral Terminal Project Company's operations; and viii operating philosophy of the Mineral Terminal Project Company.

20 ADDITIONAL SPECIFIC AGREEMENTS AND PROJECT LEASES

20.1 Purpose of the Additional Specific Agreements and of the Project Leases a The Parties agree that in the context of the implementation and development of the Project the delivery of the Project Leases and/or the conclusion of one or more Additional Specific Agreements may prove necessary to allow the Project Companies or their Contractors and Subcontractors to i temporarily use and occupy any portion of land located either A B outside the Exploitation Area the Railway Area or the Mineral Terminal Area for the purposes of the Project including for the procuring of building materials; or within the Exploitation Area the Railway Area or the Mineral Terminal Area ahead of the grant of a Project Lease for the purposes of the Project including for the procuring of building materials and ii determine more precisely the rights and obligations of the Project Company in the conduct of the Project Operations it is entitled to carry out. b c For the avoidance of doubt neither the Project Leases nor the Specific Agreements shall grant to their beneficiary any mining rights rights in the subsoil or rights in the mining substances and other natural resources contained in the soil and/or the subsoil of the State. It is further agreed that every time the use of another portion of land is necessary for the conduct of a commercial activity for the purposes of the Project the conclusion of an Additional Specific Agreement under conditions substantially similar to those of the Specific Agreements and/or the delivery of a Project Lease will constitute a mandatory prerequisite it being specified that the State shall have the right to

choose the legal instrument it deems most appropriate at its sole discretion.

20.2 Project Lease Request and proposed Additional Specific Agreement Any Project Lease Request or proposed Additional Specific Agreement to the State shall be made either i in the context of an Additional Facility Request; or ii as a separate requirement indicating the purpose of the Project Lease Request or the Additional Specific Agreement and indicate a detailed study specifying A B the situation area and layout of the lands for which the Project Lease or the Additional Specific Agreement is requested; and the extent to which such request cannot be satisfied within the Exploitation Area the Railway Area or the Mineral Terminal Area as they exist at the date of the Project Lease Request.

b Any Project Lease Request or proposed Additional Specific Agreement and any related rental fee if applicable shall be appraised and negotiated by mutual agreement between the Parties in compliance with the timetable determined by the party making the request or the proposal and the State according to the purpose of the request.

20.3 Grant of Project Leases The State shall grant to each of the Railway Project Company and the Mineral Terminal Project Company Project Leases over the areas identified in the Railway Concession and Mineral Terminal Concession as being needed to construct and operate the Railway and the Mineral Terminal and these Project Leases shall a b c be for the term of the Railway Concession and the Mineral Terminal Concession; and be on terms usually associated with project leases in the territory of the State and attract a rental of the greater of i a total of five hundred and ten million 5 1 000 000 CFA Franc or ii three 3 CFA Franc per square metre for the area comprising the Mineral Terminal Area Railway Area and area of the Project Road Adjacent to the Railway if not duplicative and continuing after the applicable portions of such road are dedicated to public use per annum paid half yearly in advance.

20.4 Temporary Use and Occupation Where Cam Iron or a Project Company or their Contractors or Subcontractors require building materials or sites for construction camps for the purposes of the Project as contemplated in Article 20. i ai the State shall employ reasonable efforts obligation de moyens consistent with applicable standards to promptly grant to the party the temporary use and occupancy rights requested provided that the application is in accordance with

the terms thereof and of the Legislation and does not otherwise adversely impact on the rights of Third Parties or the Reserved Rights of the State. The party requesting such temporary rights shall indemnify the State and the other Project Companies against any damage or liability resulting therefrom. Any such request shall take into account existing use and condition from an environmental geological and social standpoint of the land and take all reasonable measures to avoid or mitigate any negative effects thereon.

2.1 OPERATING REGIME FOR RAILWAY OPERATIONS AND MINERAL TERMINAL OPERATIONS

21.1 Access Protocol

In order for Mine Company Congo Iron an Subsidiary or a Third Party to be provided with a Railway services by the Railway Project Company; and b Mineral Terminal services by the Mineral Terminal Project Company it will be necessary for i the exact nature and range of services to be provided by each of the Railway Project Company and Mineral Terminal Project Company to be defined; ii the basis of the tariff to be charged for each service to be determined; and the variables for insertion into the Railway Haulage Agreement and Mineral Terminal Agreement to be determined and in order to achieve this each of the Railway Project Company and the Mineral Terminal Project Company will in addition to the requirements set forth in the Railway Agreement and Mineral Terminal Agreement ne.i to develop an access protocol for each of the Railway and Mineral Terminal Access Protocol.

21.2 Development of Access Protocols

The State and Cam Iron recognise that in order to develop the Access Protocols referred to in clause 21. 1 it will take time and require each of the Railway Project Company and Mineral Terminal Project Company to a b better develop the range of services each will be providing and how they will charge each user for those services; and develop the terms of each of the Railway Haulage Agreement and the Mineral Terminal Agreement and Cam Iron will cause each of the Railway Project Company and the Mineral Terminal Project Company to develop such Access Protocols both in a timely manner in consultation with the State and in accordance with internationally accepted access principles for bulk commodity supply chains.

SECTION IV PROJECT OPERATIONS JOINT PROVISIONS

22 GENERAL PROVISIONS CONCERNING THE EXPLOITATION AREA THE PROJECT LEASES AND THE

SPECIFIC AGREEMENTS In addition to the general warranties of the State contained in Articles 12.2.5 and 13.8 the delivery of the Project Lease or the conclusion of a Specific Agreement is to result in the holder or signatory Project Company being granted the following additional rights and protections.

22.1 General rights of Project Companies Each Project Company in charge of carrying out all or part of the Project Operations shall be entitled subject to the Project Agreements the Reserved Rights and the Environmental and Social Assessment and Management Plan a to a right to access and use the lands contemplated by the Ute Project Leases and the Specific Agreements under the conditions determined by the said documents. The State or any Third Party appointed to represent the State may access these lands at any time subject to a prior notification to the relevant Project Company and shall comply with the applicable provisions of the Legislation and the caution and security rules in force on the site of which it shall be advised by such Project Company; b subject to the provisions of Article 19.2 to a right to negotiate with the applicable Third Party to use pursuant to applicable Legislation the existing public facilities for the Project Operations including any pageJ 110 c aerodrome roads worksites and other similar facilities. in consideration of payment of the duties payable as the case may be for such a use in accordance with the Legislation provided that i such use does not materially interfere with the exercise of the Reserved Rights ii such use complies with any applicable usage restrictions and iii any user of such assets agrees to indemnify the State and applicable Project Companies for any liabilities or damages resulting therefrom; and to a right to exploit exclusively for required Project uses and in a reasonable and conservative manner the stone sand clay and gravels existing within the Project Area in accordance with the Legislation. without such exploitation being subject to any additional rent or fee. It is further agreed that save where exemption is granted by the State these substances found within such Project Area shall be used exclusively for the purposes of the Project Operations within the same Project Area other than to the extent such stone may be required in order to provide the ballast for standard gauge heavy haulage railway line connecting the Nabeba Project to the Initial Spur Line. Any use of such substances shall require indemnification by the user thereof to the State for any liabilities or

damages resulting therefrom and shall be preceded by a mutually agreeable mitigation plan for any displacement.

22.2 Covenants by the State on Conflicting Land Use a Subject to the Legislation and the Reserved Rights the State undertakes to i ii iii ensure that its various ministries do not create or authorize material conflicting land use with respect to the land on which the Project Operations are being undertaken or conservation operations which are being undertaken by Can1Iron or a Project Company to offset the impact of Project Operations including in accordance with U1e Conservation Convention; enforce any provisions of any concession licence agreement right or title that it has granted or entered into with a Third Party where the failure to do so is allowing that Third Party to cause or create a materially adverse land use with respect to the Project Operations; and not grant to a l11ird Party any rights to the land described in the Mineral Tenninal Agreement as being set aside for expansion of the Mineral Tenninal to achieve the Design Capacity nor will the State permit any ministry to utilise any of that land so set aside without having sought the confir1ation from U1e Mineral Tenninal Project Company that it no longer has any potential need for that land for the purpose of creating Expansion Capacity. To the extem possible the Parties will consider including this land in the initial Project Lease for the Mineral Terminal Facility to avoid potential conflicts. Any violation of the foregoing by the State may be deemed a Compensation Event subject to the definition set forth in Article 1 hereof and as such may qualify for Convention Compensation pursuant to Article 39 hereof. b The Project Companies shall give U1e State prompt notice of any event or pagel111 circumstances known to them which has or could be reasonably be expected to result in conflicting land use or other violation of the State s obligations of this Article 22.2 whether material or not so that the State may attempt to mitigate the impact and the Project Companies shall cooperate with the State and use their reasonable efforts to mitigate any such impact. c Where the State provides to i ii a Project Company a Project Lease then it undertakes subject to the Legislation and the Reserved Rights to ensure that no Third Party is granted any right to use the surface area of the Project Lease where such use materially adversely impacts the intended use of that surface area by the Project Company; and Cam Iron the Exploitation Permit

then any grant to a Third Party other than the Mine Project Company of substantially equivalent exploration or exploitation rights may be deemed a Compensation Event, subject to the definition set forth in Article I, and if so deemed may qualify for Convention Compensation pursuant to Article 39.

d e Where a Project Company establishes an offset programme in the territory of the State to offset any environmental and social damage which that Project Company may cause as a result of Project Operations then the State covenants that it shall employ reasonable efforts obligation de moyens to not do or cause or allow any Third Party to do anything which may materially damage or impair the offset programme without consulting with the affected Project Company. Where a Project Company has been responsible for or has funded the expropriation of villages or users of land such that the Project Company if granted a Project Lease is then able to undertake Project Operations on that land and as part of the expropriation the villages or users of land are given the rights to use other land by the State then the State will not the Project Company concerned without expropriate or allow a materially adversely conflicting use to be undertaken on that land for the benefit of a Third Party.

the consultation with 22.3 Third Party rights to access the Project. For the term of the Project the State agrees that if it builds or grants to any Third Party a right enabling the building of any road right of way right to access the water resources or any other right of any nature in any Project Area it shall obtain the prior consent of the Project Company that holds the rights to occupy the relevant Project Area provided that any refusal to consent by such Project Company shall only be motivated and reasoned to the extent that the grant of such rights is likely to have a Material Adverse Effect on the Project Operations carried out in the relevant Project Area any such material interference with Project Operations may be deemed a Compensation Event subject to the definition thereof in Article I hereof.

22.4 Emergency access to lands outside the Project Areas In case of emergency Cam Iron and any applicable Project Company Contractor or Subcontractor shall after having informed any competent authority thereof to the page 111 2 extent possible take any reasonable step or measure in order to prevent any imminent hazard or emergency situation of which it will be advised in the areas immediately adjacent to the Project Areas.

22.5 Prohibition on the right to sublease assign or

pledge The Project Companies will not have the right a b c to sublease all or part of the Project Areas; to assign all or part of their rights in the Project Areas; or to mortgage secure pledge assign by way of security or grant any other security interest over all or part of any Project Area except for the assignments or securities provided for under the Finance Documents.

23 WATER 23.1 Access to water resources for the purposes of the Project a b i ii The Parties acknowledge that the conduct of the Project shall require access to the water resources of the State for the industrial and human purposes of the Project and that the water in the Project Area is in pristine condition. According to the needs specified by the relevant Project Company and to the water facilities and resources available in the relevant Project Area the relevant Project Company can either negotiate to draw in a reasonable and conservative manner from the operators of water facilities available in the relevant Project Area in compliance with the Legislation negotiate to receive running water supplies by way of conclusion of a distribution contract with Camerounaise des Eaux or any other entity validly entitled to carry out water distribution activities in the territory of the State and in the event that the connection to the existing distribution networks requires the building of one or more facilities be granted the possibility to build or procure the building of such facilities within the framework of an Additional Facility Request; and iii request from the State an authorisation to exploit or procure the exploitation on its behalf of certain water resources in the territory of the State including the Project Area pursuant to a water usage agreement that will address the volume and manner of free use and standards of use all in compliance with the Legislation. c d The access referred to in Article 23.1 a shall be granted in the context of the grant of the Additional Facility Authorisations in accordance with the provisions of Article 19. 1g. Regardless of the manner in which any Project Company receives water supplies and of the contracts it enters into to this end it is expressly agreed that i ii all the water resources supplied to a Project Company or exploited by same or on its behalf shall be exclusively intended to satisfy its needs strictly required for the proper conduct of the Project Operations of which it is in charge including human needs excluding any other use with or without consideration; and the use of said water for any purpose whatsoever binds the relevant

Project Company to meet the provisions of the Legislation and use water in a manner that adequately protects the water resources and does not adversely impact existing use by Third Parties. If the building of an additional facility is necessary to enable the relevant Project Company to satisfy its obligations under this Article 23.1 d the Additional Facility Authorisation shall be deemed delivered under the conditions determined by the relevant Project Company and reasonably satisfactory to the State.

23.2 Rates and costs relating to access to water resources for the purposes of the Project a Where the water is being supplied by a Third Party the rates relating to the supply of water resources for the purposes of the Project shall be set and invoiced to the beneficiary Project Company by as the case may be Camerounaise des Eaux or CAMW ATER in accordance with the applicable provisions of the Legislation and any applicable agreements. b However and without prejudice to the provisions of the Legislation to such matters where the relevant Project Company contracts with i ii a private entity or semipublic entity Controlled by a private entity the applicable rates shall be the negotiated market rates as the case may be; or the State undertakes a public entity or semipublic entity Controlled by a Governmental Entity reasonable efforts obligation de moyens to facilitate the grant of preferential rates in compliance with the principle of nondiscrimination between operators of similar scale. to exercise c d As the case may be all the Costs relating as applicable for connection to the distribution networks as well as exploitation treatment and sanitation of the water resources including construction operation and maintenance of the facilities built to this end shall be fully borne by the Project Company beneficiary of the Additional Facility Authorisation. Where pursuant to this Article 23 an application is made to the State by a Project Company for water usage reasonably required by the Project Company for the Project. the State shall grant the authorization other than where it is in the national interest not to and the State shall not impose anything other than fees specified in Legislation or a nominal fee or charge on the application for or usage of the activity the subject of the application. par 1114 rm 23.3 No warranty of the State The provisions of this Article 23 shall not be construed as comprising any undertaking or warranty whatsoever from the State that the State's water resources whether exploited or not suffice

to meet the Project requirements in terms of water and Cam Iron expressly and irrevocably waives to seek, and stands surety for a subsidiary Contractor or Subcontractor not seeking the State's liability in case of insufficient water resources for the purposes of the Project provided however that this absence of warranty of the State shall not extend to the contractual liability of the State or other Governmental Entities under contracts entered into by Cam Iron, a subsidiary Contractor or Subcontractor with a Governmental Entity or with any other entity of which a Governmental Entity would be a shareholder.

24 POWER 24.1 Purchase and generation a b The Parties acknowledge that the conduct of the Project shall require a reliable supply of power to the Project Facilities for the industrial and human purposes of the Project. According to the needs specified by the relevant Project Company and to the power resources available in the relevant Project Area any Project Company may either i ii iii negotiate to receive power supplies by way of conclusion of a supply contract with AES SONEL or any other entity validly entitled to carry out power production and supply activities in the territory of the State and in the event that the connection to the existing transmission networks requires the building of one or more facilities have the possibility to build or procure the building of such facilities within the framework of an Additional Facility Request request from the State an authorisation to produce supply and consume power produced from a new Power Plant which in the case of the Mining Operations will be granted for generation on the Exploitation Area and in the case of the Beneficiation Power Station it shall file an Additional Facility Request for the building of the Beneficiation Power Station and the facilities required for the transmission and use of the power so supplied all in accordance with the Legislation or negotiate to purchase power from any alternate supplier of its choosing including outside the territory of the State to which the State undertakes as the case may be to consider in good faith and not to unreasonably withhold all the authorisations required to undertake such power transmission and supply activities for the purposes of the Project and the Project Companies shall also comply with the Legislation in such activities. c Notwithstanding anything in this Convention to the contrary if the State constructs or procures from a Third Party the construction of a power station to provide power to the Project

including the Beneficiation Power Station Cam Iron and any applicable Project Companies undertake to enter into a take-or-pay power purchase agreement for the term of the Project with the applicable Governmental Entity or Third Party on mutually agreeable terms consistent with practices applicable to international power production and generation plants managed by the private sector.

24.2 Rates and costs relating to access to power resources for the purposes of the Project where the power is being supplied pursuant to the arrangements referred to in either Articles 24.1b or iii then the rates applicable to the supply of power for the purposes of the Project shall be set and invoiced to the beneficiary Project Company by AES SONEL or any alternate Third Party supplier in accordance with the provisions of the Legislation and any applicable agreement.

b The provisions of Article 23.2b apply to power rates mutatis mutandis.

c d As the case may be all the Costs relating as applicable to connection to the transmission networks for power production and transmission operations including construction operation and maintenance of the facilities built to this end shall be fully borne by the Project Company beneficiary or any applicable third party operator of the Additional Facility Authorisation. Where pursuant to this Article an application is made to the State by a Project Company for the use of electricity reasonably required by the Project other than with respect to the Beneficiation Power Station for the Beneficiation Operations, for which the provisions in this Convention and the Beneficiation Agreement shall govern the State shall grant the authorization other than where it is the national interest not to and the State shall not impose anything for its account other than fees specified in Legislation and a nominal fee or charge on the application for or usage of the activity the subject of the application. The State will use its reasonable efforts to offer a concessional rate for any applicable leasing fees.

24.3 Third Party access to the power facilities in the event a Project Company files an Additional Facility Request for the building of a Power Plant other than with respect to the Beneficiation Power Station the Project Company may if the provider of power has a need enter into a long-term power supply agreement with such entity in charge of supplying power in the territory of the State including the applicable commercial rates which will ensure the Project

Company achieves an appropriate return on the additional capital it is required to spend in order to produce the surplus power and if it agrees to set aside a portion of production in accordance with as the case may be the provisions of the Legislation and/or the Additional Specific Agreement or the amendment to the applicable Specific Agreement and/or the principles and practices applicable to international power production and generation plants managed by the private sector in view of a commercial exploitation. Nothing in this Convention shall require the State or the Project Company to provide any Third Party subsidised power.

page 1116 24.4 No warranty of the State Subject to the provisions of Article 22 the provisions of this Article 24 shall not be construed as comprising an undertaking or a guarantee whatsoever by the State that the State's power resources suffice to meet the power needs of the Project and Cam Iron expressly and irrevocably undertakes not to seek and guarantees that no Subsidiary Contractor or Subcontractor shall seek the State's liability in case of insufficient power resources for the purposes of the Project provided however that this absence of a warranty of the State shall not extend to the contractual liability of the State or other Governmental Entities under contracts entered into by Cam Iron a Subsidiary a Contractor or Subcontractor with a Governmental Entity or with any other entity of which a Governmental Entity would be a shareholder.

25 GAS 25.1 Purchase a b c d The Parties acknowledge that the conduct of the Project may require a supply of gas to the Project Facilities for the industrial and human purposes of the Project in particular in case a Power Plant requiring a gas supply is built. According to the needs specified by the relevant Project Company and to the gas facilities and resources available in the relevant Project Area any Project Company may either i ii negotiate to receive gas supplies by way of conclusion of a supply contract with SNH or any other entity validly entitled to carry out gas production and supply activities in the territory of the State and in the event that the connection to the existing transportation networks requires the building of one or more facilities subject to applicable standards and requirements be granted the possibility to build or procure the building of such facilities in the framework of an Additional Facility Request; or purchase gas from any alternate supplier of its choosing including outside the State to which the State undertakes as the case may

be not to unreasonably withhold the authorisations required to undertake such gas transmission and supply activities for the purposes of the Project. The Project Companies shall comply with the Legislation in such gas related activities. Notwithstanding anything in this Convention to the contrary if the State constructs or procures the construction of a gas supply facility or terminal to provide gas to the Project Cam Iron and any applicable Project Companies undertake to enter into a take-or-pay gas purchase agreement for the Term of the Project with the applicable Governmental Entity on mutually agreeable terms consistent with practices applicable to international gas supply managed by the private sector. Regardless of the manner in which any Project Company receives gas supplies and of the contracts it enters into to this end it is expressly agreed that all the gas resources supplied to a Project Company shall be exclusively intended to satisfy its needs strictly required for the proper conduct of the Project Operations of which it is in charge including personnel needs excluding any other use with or without consideration.

25.2 Rates and costs relating to access to gas resources for the purposes of the Project

a b c i ii The rates applicable to the supply of gas for the purposes of the Project shall be set and invoiced to the beneficiary Project Company by SNH or any alternate supplier referred to in Article 25.1 b in accordance with the provisions of the Legislation. However and without prejudice to the provisions of the Legislation where the relevant Project Company contracts with a private entity or semipublic entity Controlled by a private entity the applicable rates shall be the negotiated market rates as the case may be; or a public entity or semipublic entity Controlled by a Governmental Entity the State undertakes to use its reasonable efforts obligation de moyens to facilitate the grant of preferential rates in compliance with the principle of nondiscrimination between operators of similar scale. As the case may be all the Costs relating to connection to the and transportation networks maintenance of the facilities built to this end shall be fully borne by the Project Company beneficiary of the Additional Facility Authorisation.

construction operation including

25.3 No warranty of the State Subject to the provisions of Article 22 the provisions of this Article 25 shall not be construed as comprising an undertaking or a guarantee whatsoever by the State that the State's gas resources suffice to meet the gas needs of the Project

and Cam Iron expressly and irrevocably undertakes not to seek and guarantees that no Subsidiary Contractor or Subcontractor shall seek the States liability in case of insufficient gas resources for the purposes of the Project provided however that this absence of warranty of the State shall not extend to the contractual liability of the State or oilier Governmental Entities under contracts entered into by Cam Iron a Subsidiary a Contractor or Subcontractor with a Governmental Entity or with any other entity of which a Governmental Entity would be a shareholder. 26 COMMUNICATIONS 26.1

Purchase and use a b The Parties acknowledge that the conduct of the Project shall require the implementation of communication means for the industrial and human purposes ofthe Project. According to the needs specified by the relevant Project Company and to the conunication means available in the relevant Project Area the Project Company will be able to either i negotiate a services agreement w ith CAMTEL or any other entity validly entitled to supply communication services and means in the page 1 118 territory of the State and in the event that the connection to the existing transmission networks requires the bui lding of one or more facilities be granted the possibility to request to build or procure the building of such facilities in the framework of an Additional Facility Request in a manner that complies with the Legislation. The State shall not unreasonably withhold its consent to such a request; ii iii iv request from the State for an authorisation to use its own satellite wireless optic fibre ullrahigh frequency UHF very high frequency VHF and other communication means in a manner that complies with the Legislation. The State shall not tmreasonably withhold its consent to such a request; file an Additional Facility Request for the building of said facilities; and negotiate to enter into any services agreement with any lbird Party or build the faci lities itself. c Notwithstanding anything in this Convention to the contrary if the State agrees to provide or procure the provision of conumutications services to any applicable Project Company such Project Company undertakes to pay the applicable Governmental Entity for the provision of such service to the extent provided and on mutually agreeable tenns consistent with practices applicable to international communications managed by the private sector. d Where the Project Company enters into any services agreement with a Third Party supplier

including one from outside the State the State undertakes to not unreasonably withhold all the authorisations required to undertake such communications activities for the purposes of the Project subject to such requests being in accordance with the legislation. e Regardless of the manner in which any Project Company receives communication means and of the contracts it enters into to this end, it is expressly agreed that all the communication means made available to a Project Company shall be exclusively intended to satisfy its needs strictly required for the proper conduct of the Project Operations of which it is in charge including human needs excluding any other use with or without consideration.

26.2 Rates and costs relating to access to communication means for the purposes of the Project

a Where the communications are being supplied by CAMTEL or any alternate supplier the rates applicable to the supply of communication means for the purposes of the Project shall be set and invoiced to the beneficiary Project Company by CAMTEL or any alternate supplier in accordance with the provisions of the Legislation and applicable agreement. b However and without prejudice to the provisions of the Legislation where the relevant Project Company contracts with

i I V a private entity or semipublic entity Controlled by a private entity page1 19 the applicable rates shall be the negotiated market rates as the case may be weighted according to the volumes; or ii a public entity or semipublic entity Controlled by a Governmental Entity the State undertakes to use its reasonable efforts obligation de moyens to facilitate the grant of preferential rates, in compliance with the principle of nondiscrimination between operators of similar scale. c As the case may be, all the Costs relating to connection to the communication and including construction operation and maintenance of the facilities built to this end shall be fully borne by the Project Company beneficiary of the Additional Facility Authorisation, transmission networks d Where pursuant to this Article an application is made to the State by a Project Company, the State shall grant the authorization other than where it is the national interest not to and the State shall not impose for its own account anything other than fees specified in Legislation and a nominal fee or charge on the application for or usage of the activity the subject of the application.

26.3 No warranty of the State Subject to the provisions of Article 22 the provisions of this Article 26 shall not be

constructed as comprising an undertaking or a guarantee whatsoever by the State that the States communication means suffice to meet the needs for communication means of the Project and Cam Iron expressly and irrevocably undertakes not to seek and guarantees that no Subsidiary Contractor or Subcontractor shall seek the States liability in case of insufficient communication means for the purposes of the Project provided however that this absence of warranty of the State shall not extend to the contractual liability of the State or other Governmental Entities under contracts entered into by Cam Iron a Subsidiary a Contractor or Subcontractor with a Governmental Entity or with any other entity of which a Governmental Entity would be a shareholder.

27 EXPLOSIVES

27.1 Use of Explosives

The Project Companies will use significant quantities of blasting agents both during Construction Phase and the Exploitation Phase. Operating plans will be developed to ensure that blasting agents are transported stored manufactured and used in a safe secure and auditable manner and in accordance with the Central African Monetary Union Council of Ministers Regulation No. 299/UEACCM/654 the Legislation and international standards in relation to the manufacture transportation storage and use of explosives.

27.2 Explosives Agreement

The Parties acknowledge the significance of Explosives to the Construction Phase and the Exploitation Phase and as a result they have agreed that the use of Explosives is to be regulated by the Explosives Agreement and the Legislation.

28 EXPROPRIATION AND COMPENSATION

28.1 Occupation and use of private land

The warranties granted to the Project Companies under this Article 28.1 award where necessary a right to occupy and to authorise use of the land fully owned or occupied by individuals and considered by the State and the relevant Project Company as essential for the proper conduct of the Project. At the time of delineating any Project Area for Mining Operations or Beneficiation Operations the occupation of which is requested by the Mine Project Company within the framework either of the conclusion of a Specific Agreement or of a Project Lease Request or proposed Additional Specific Agreement the expropriation of the land in such Project Area shall be governed by the Mining Code. The Railway Agreement and Mineral Terminal Agreement shall discuss expropriation of any lands needed for the Railway Operations and Mineral Terminal

Operations but the Parties agree that no new land will need to be expropriated for the Mineral Operations other than for the turnaround loop because a port facility has already been created and expropriation of the land needed for the Railway Operations will result in the State owning such land and leasing it to the Railway Project Company.

28.2 Fees and indemnification

The Mine Project Company shall be liable to pay all indemnities due to Third Parties as a result of i ii any expropriation carried out pursuant to the provisions of Article 28.1b; any disturbance of peaceful possession by a Third Party of the land they occupy or the activities they conduct therein as a result of A the grant to such Project Company of rights to occupy this Project Area; or B the conduct of activities in the same area; and iii any loss or damage caused to a Third Party or their assets by a such Project Company its Contractors or Subcontractors including their employees in compliance with the provisions of Article 28.2b . b With respect to indemnities due to Third Parties under Articles 28.2ai 28.2aii and 28.2aiii i the costs indemnities and more generally all charges resulting from the application of measures aimed at releasing and granting a right of enjoyment in the taxable land are borne by the Mine Project Company; and v page 1121 ii the Mine Project Company shall fulfil its payment obligation within thirty 30 Days following receipt of said terms and conditions for payment expressly provided that the rights to occupy and enjoy any land granted to the Mine Project Company is conditional upon the prior payment by the Mine Project Company. c The Mine Project Company shall be liable for the payment of all fees duties and charges incurred by any Governmental Entity in connection with the implementation and conduct of any expropriation procedure carried out pursuant to the provisions of Article 28.1 b.

28.3 Publications The land concerned by the expropriation measure and by the indemnities paid to Third Parties and the latter's identity pursuant to the provisions respectively of Articles 28.1 and 28.2 shall be published in the Official Gazette to the extent required by Legislation.

28.4 Direct right of Third Party beneficiary Each Third Party beneficiary of the indemnities referred to in Article 28.2a shall be entitled to the direct benefit of the provisions of this Article 28.

29 HEALTH AND SAFETY ENVIRONMENT AND COMMUNITY

29.1 General provisions a b The Parties acknowledge that the protection of the

Environment and the issues of safety health and protection of Living beings and local communities are a key element of the Project. As a consequence each Project Company its Contractors and Subcontractors shall undertake the Project Operations of which they are in charge or for which they operate in accordance with the provisions of this Article 29 and in accordance with i ii iii iv v the Legislation including Sections 84 85 and 87 of the Mining Code Sections 118 and J 19 of the Mining Code Implementing Decree and the laws relating to vapour and gas pressure vessels Law n20020 13 of 30 December 2002 and the law relating to establishments classified as hazardous unhealthy and uncomfortable; that portion of the Environmental and Social Assessment and Management Plan which relates to their respective activities and any environmental and social assessment and management plan required pursuant to the provisions of Article 19.1 b iv; with respect to the Beneficiation Operations the provisions of the other applicable Project Agreements; Good International Industry Practice; and more generally international standards applicable to protection of the Environment safety health and protection of living beings generally accepted in the mining railway and port industries. page 122 IIJ v c d Each Project Company shall be responsible for compliance by each Contractor and Subcontractor it uses for the purposes of the Project Operations of which it is in charge with the obligations contained in this Article 29. Subject to Article 50.4 the State shall be entitled to exercise its Reserved Rights to rectify or prevent any actual or reasonably anticipated violation of the health safety environmental and other related standards set forth in the Project Agreements and such exercise for the avoidance of doubt shall not serve to entitle any Project Company or Cam Iron to any compensation or indemnification except in the event of a State Fault. 29.2 Environment 29.2.1 Environmental obligations a b c d i ii i Cam Iron hereby and each Project Company by the Specific Agreements undertake to strictly perform all their respective obligations under the Environmental and Social Assessment and Management Plan and as the case may be any environmental and social assessment and management plan required pursuant to the provisions of Article 19. 1biv. In this Article 29 any reference to the Environmental and Social Assessment and Management Plan includes any environmental and social assessment and
